INTRODUCTION

What you're looking at is the most comprehensive review of American comics ever published. It beats the previous holder of that position, our first edition, by almost doubling the amount of titles covered. I've always found it odd that most comic guides are primarily concerned with a perceived value of a comic. You'll find several guides telling you a copy of Spawn issue 1 is now "worth" $10 or so, but none will tell you whether it's a good read or not. That's where we come in. The aim of *The Slings & Arrows Comic Guide* is to present a widespread, qualitative guide to comics published for the American market from the 1930s to the present day. You'll disagree with many of our reviews, and embrace others. I hope everyone who buys this book will be rewarded by discovering at least one excellent series they'd previously overlooked or not heard of. The reviewers who've compiled the bulk of the entries have discovered dozens.

Happy reading
Frank Plowright, Editor

The content and scope of the guide

This guide reviews every American comic series of note from the 1960s to the present day, along with plenty not of note, and many more dating back long before that time. Exclusions encompass comics so rare we just couldn't get hold of them, comics produced for young children unlikely to have wider appeal, most collections of single-tier gag newspaper strips, promotional and giveaway comics only available to a limited percentage of the public, below-average adaptations of films and TV series, and comic sized publications consisting primarily of text and accompanying illustrations, such as sourcebooks, or collections of pin-ups.

The titles covered were read and reviewed to allow a contemporary perspective, and the text encompasses comics up to those dated December 2002, occasionally slipping into 2003 for miniseries.

Definition of entries

The alphabetical system used in the main body of the text flies in the face of conventional order. It's long been a tradition that comics named after people such as *Katy Keene* are listed in trade publications under Katy, and we're sticking with that. There are also cases where the exact title of a comic is uncertain, conflicting versions being on the cover and the first-page indicia. Our solution is simple but effective: we consider the title the largest logo lettering on the cover. As always, though, there are exceptions. One is for titles such as *Shadow of the Bat*, so known for over half its run, and listed here under S despite latter issues prominently featuring Batman's name instead. Another is *Marvel Premiere*, home for dozens of different features, many for no more than a single issue and each with their own logo printed in larger type than the words 'Marvel Premiere'. For cases like this there's an index at the back of the book advising where to locate assorted one-offs and features from umbrella titles. One-shot team-ups between characters are mentioned under reviews concerning the first named character in the title.

Multiple comics with the same title and character from the same publisher are covered under one entry, so all series of *Elementals* are together, whereas Marvel have published three distinct *Spider-Woman* titles, so they're dealt with individually. So are series from different companies with the same title, such as *Beauty and the Beast*, which are listed in order of publication. Properties from outside comics are generally only licensed to publishers for a limited period. As each successive publisher has different editorial approaches and creators there are separate entries for licensed titles such as *Tarzan* and *Star Trek* each time they change publisher. These are listed in chronological order. Creator-owned properties switching publisher, such as *Madman*, are only allocated the single entry because they have a consistent creative vision. Limited series are generally allocated a separate entry, but if they have a parent title or spawn an ongoing title there'll only be the single entry. Likewise multiple miniseries featuring the same characters are gathered under the one entry.

Graphic novels are the hardest items to categorise. Those starring characters already given an entry, such as *She-Hulk*, are covered in that entry. Characters best known from an ongoing series of graphic novels such as Corto Maltese or Tintin, have their own entry, as does any series extending to three volumes or beyond, such as Raptors. Beyond that, the simplest manner of covering other graphic novels has been to cover all entries under publishers' names. Those included are Alternative Press, Amerotica, Catalan, Cha Cha, Comcat, Dark Horse, DC, Diva Graphics, Drawn and Quarterly, Eclipse, Epic, Eros, Eurotica, Fantagraphics, Heavy Metal, Humanoids, Image, Kitchen Sink, Knockabout, Marvel, NBM, Piranha Press, Slave Labor, Spire Christian Comics, Top Shelf, Venture and Vertigo. Just to be contrary, reviews of graphic novels featuring stories that originally saw print in the UK's *2000AD* have been gathered under a 2000AD Graphic Novels entry, with the amount of Judge Dredd collections rating them a separate entry. One-off graphic novels from imprints that don't generally publish such material are given a separate entry, like *The Cowboy Wally Show*.

Ordering of entries

In cases where a character occupies multiple comics with slight variations of title they're largely to be found in the same general area. The largest lettering on the cover is considered the title portion and capitalised, while for purposes of identification the remainder of the title is in lower case. SUPERMAN precedes Adventures of SUPERMAN, which in turn precedes SUPERMAN ADVENTURES. Numeric titles such as 22 Brides are ordered as if spelled out, and for purposes of easy location acronymic titles such as *M.A.C.H. One* are treated as if spelled out. Again, for ease of location, titles featuring the contractions 'Dr', 'Mr', 'Sgt' or 'St' are filed under Doctor, Mister, Sergeant and Saint respectively. Titles with two or more words will precede single-word titles starting with the same letters, so *Black Hood* will be found before *Blackball*. Although wrong, the sheer volume of x-hyphenated titles has necessitated listing them alphabetically as if without hyphen, as that's where most people will look. *Xenozoic Tales* therefore precedes *X-Files*, *X-Men* and numerous others. The few titles known by their initials such as E.V.E. are also listed in the main alphabetical run.

Components of entries

Below the title the publisher is listed, followed by the number of issues plus any annuals or specials, and publication dates. Where the run doesn't start with 1, issue numbers are noted in parentheses, and if there's a large gap in publication this is also noted, together with the split in issue numbers. In the instance of titles still being published as of December 2002 the number of issues is followed by a + sign. The text of each review is followed by the initials of the reviewer (whose full names are noted in our colour section), and recommended issues are only listed where applicable. Those familiar with our first edition will note collections are no longer listed at the end of an entry. So many are now available, that listing them is prohibitive. Instead, for miniseries and limited series, an asterisk by the dates on the publication line indicates a collection was published. This is also used when all issues of longer running titles have been collected, but in this instance it's likely that more than one collection was required. For other longer-running titles asterisks within the body of the text denote any issues mentioned that have been collected, or feature in collections. Not all the collections noted are still in print, although a large proportion are, and in the case of long-running titles there will be plenty of collections available of material not noted in the text.

Recommended issues

There's a wealth of recommended old comics here, many of which can be found in the discount boxes at your local comic shop. The choice of recommended issues will occasionally be controversial, with accepted classics neglected and previous non-contenders reappraised. It amounts to personal choice, although a guiding principle was that this isn't intended to be an elitist selection. In terms of artistic achievement and literary qualities, an issue of *Love and Rockets* is clearly a greater work than most Spider-Man comics, yet there's plenty to enjoy in *Spider-Man* on a different level, and we therefore recommend issues of both. The criterion for recommendation was to assess how well a particular issue had achieved what it set out to do, with only the best being recommended. The best issue of an abysmal run is never listed by default, only if it matches better issues of similar comics. Inversely, if a title is of exceptional quality throughout perfectly acceptable issues may not be listed simply because they fail to match the high standards attained by other issues in the run.

It's usually only issues containing original material that are recommended. Plenty of comics, often starring Disney characters, reprinted stories up to four times during the run. We felt it less likely to confuse readers if just the original received a recommendation. The exceptions are anthology titles gathering reprints from hither and yon, or titles reprinting material almost impossible to obtain in original form, such as *The Spirit* or *Little Nemo*.

Imprints and publishers

Several companies have used multiple imprints, usually to distinguish a selection of titles differing from their traditional output, and the company of origin isn't immediately apparent from the name. If both company name and imprint appear on the cover of a comic, such as DC and Vertigo, that's the way the publisher is listed in this book. In cases where the parent publisher is not immediately apparent from the cover, such as DC's WildStorm imprint, then only the cover imprint is noted. Listed below are imprints together with the name most regularly associated with their parent companies. In the case of companies still existing today the current publishing name is used.

Adventure = Malibu
Aircel = Malibu

Windjammer = Valiant
Zongo = Bongo

Some definitions and some history

Atlas Comics The Atlas Comics of the 1950s is what would evolve into Marvel Comics. The Atlas Comics of 1975 is a different company, although, confusingly, started by the same person, Martin Goodman, who ran the 1950s company.

Bad Girl Art A 1990s equivalent of Good Girl Art (see below): a plethora of scantily clad females with attitude bursting out all over.

Colourist Known as a 'colorist' in the USA, traditionally they were responsible for colouring copies of the inked pages of artwork, but today are more likely to provide guides for computer generated colouring.

The Comics Code A self-regulating method of proclaiming comics as wholesome, introduced in 1954 when the threat of congressional investigation hung over the industry. The prominent application of the Code stamp on the cover of a comic was an assurance to parents that the contents conformed to a stringent set of guidelines. It was once essential to ensure the distribution of comics, but is increasingly irrelevant today as only Archie and DC continue to carry the stamp (at about an eighth of its original size).

Continuity Ongoing plot elements continuing from issue to issue in the manner of TV soap opera. Introduced to comics in the 1960s, it's now rare to have superhero stories complete in one issue.

Cover date The month displayed on a comic's cover. In order to ensure extended display time on the news-stand shelves, the cover date is rarely the date of publication, but anything up to three months later. Comics are increasingly published with date of publication only printed in the interior indicia.

Crisis on Infinite Earths This limited series had a long-lasting impact on the continuity of DC heroes. In the 1950s DC introduced updated versions of their 1940s superheroes, who eventually met their counterparts. When these meetings occurred, the 1940s heroes were consigned to what was labelled "Earth Two", an Earth similar to that occupied by the more modern heroes. Over the years assorted other alternative Earths were introduced, all separated from "Earth One" by virtue of "vibrating at a different speed". In the 1980s DC editors decided this plethora of alternative Earths (and, by then futures) was too complicated and after Crisis on Infinite Earths all DC heroes occupied a single Earth with an established timeline.

Crossover When the story from one title is continued in another. In recent years four monthly Batman titles and four monthly Superman titles have been used as weekly editions of the same comic. Since the 1980s DC titles feature an annual event affecting all their characters (*Crisis on Infinite Earths*, *Final Night*, *Legends*, and *Zero Hour* to name but a few), and more recently themes connecting their annuals.

Editor Generally the company employee who liases with the freelance creators. Until the 1970s it was common for an editor to be actively involved in plotting a comic, and to this day, particularly with major characters, they apply a general storyline. They are also responsible for offering suggestions, imposing deadlines and, at the big companies, ensuring stories don't violate previously established strictures.

The Golden Age Term applied to 1940s superhero comics by 1950s comic fans nostalgically looking back through rose-coloured glasses at material that was largely poorly executed and predictable.

Good Girl Art Most prevalent in the 1940s and 1950s as artists tended to over-emphasise female attributes and provide provocative poses.

Graphic Novel Basically a big comic. Usually a self-contained story of forty-eight pages or longer in length, like Asterix and Tintin, but often also applied to collections of previously serialised material.

Inker The artist who applies black ink to pencilled pages. This is more than just tracing, with different inkers bringing individual styles to the art, and sometimes correcting pencil deficiencies.

Layouts In some cases of artistic collaboration an artist will provide rough pencil sketches breaking down a story for the pencil artist to follow. These may occasionally be detailed enough for an inker to fill in directly.

Letterer The person who physically writes the text within word balloons, although specifically designed computer fonts are now used on comics from most big companies.

Limited Series Title planned as a self-contained story of pre-determined length upwards of six issues.
Logo Artistically distinctive title lettering.

Manga - Name applied to a form of comics in Japan, but generally used as a term for all Japanese comic material outside Japan.

Microseries Two-issue self-contained story.

Minicomics Self-produced and photocopied comics usually in multiples of eight small sized pages, cut down from one photocopied sheet. Many more individual creators started by producing minicomics.

Miniseries Title planned as a self-contained short-run story, usually of four to six issues.

Multiverse The wider universes occupied by superhero comics, encompassing numerous alternate Earths, eerily familiar, yet oddly different.

One-shot Individual issue not part of a regular series with a self-contained story.

Penciller In order to save time in monthly publications it is common for one artist to break down a plot into pencilled pages depicting all necessary elements, which are passed to another artist for inking in black.

Plotter A writer who conceives a story, but turns it over to someone else for scripting.

Scripter A creator who dialogues someone else's plot.

The Silver Age 1940s superhero comics having been called the Golden Age, the natural successor is rather an elastic term that can begin with the arrival of Martian Manhunter in 1955's *Detective* 225. It's more commonly acknowledged to start with *Showcase*'s revival of The Flash a year later, but can stretch to encompass superhero comics up to the late 1960s.

Underground The 1960s counterculture found comics a cheaply produced and effective way of communicating ideas, and a medium that had been the exclusive province of the major publishers was suddenly host to a wide variety of new talent and adult topics.

Universe A term applied to the sphere of existence occupied by the major superheroes, primarily at Marvel and DC. It encompasses places as familiar as the streets of New York, or as strange as another dimension.

Writer Generally the person who has conceived and written a story, although until the 1970s it was commonplace for an editor to suggest a story or plot it with the writer. Since the 1960s a writer will often produce story synopsis for a pencil artist, who breaks it down to fill the required amount of pages, which are then scripted by the writer. Alternatively the writer supplies a full script, which resembles a film script complete with dialogue and directions for the artist.

Xeric Foundation An organisation founded by Peter Laird with the money earned from *Teenage Mutant Ninja Turtles* to administer grants for new creators to produce their own comics. Much respect, sir.

Zero issues In the early 1990s companies went through a phase of issuing comics numbered 0, often to introduce a new title. DC's reorganisation of their multiverse in *Zero Hour* was followed by every title reverting to issue 0 and providing an origin story for new readers with their comics cover-dated October 1994.

Acknowledgements

Thanks are due to the following people for letting us dig into their collections, lending us specific comics, services rendered or supplying invaluable background information. Without them this guide would have been a much more expensive proposition: Simon Baker, Clive Banks, Dewi Black, Miki Breakwell, Lee Brimmicombe-Wood, Mark Buckingham, Hugh Campbell, Phil Clarke, Ben Counter, Mike Collins, Mike Conroy, Simon Curran, John Freeman, Ken Gale, Dave Gibbons, Martin Hand, Allan Harvey, Richard Hayes, Peter Hayward-Brewer, Emma Hull, Niall Gordon, GothicGuru, Trin Li Lau, Tim Leng, Andy Mangels, John McCrea, John McShane, Bob Napier, Kevin O'Donnell, Joe Palmer, David Pardoe, Peter C. Phillips, Peter Root, Peter Rubinstein, Rob Rudderham, Scott Saavedra, Chris Savva, Gio Spinella, Andrew Sweeney, Dave Thomas, Mercy Van Vlack, Dean Whittaker and Jan Wiacek.

The first edition of this book would have been much more work without the consideration of Chris Bleistein at Kitchen Sink, Ruth Cole at Titan, and Charlie Novinskie at Topps. This edition has considerably benefited from the following company representatives Oliver Chin at Viz, then North Atlantic Books, Richard Davies at Red Route, Shawna Erwin-Gore at Dark Horse, Jeff Mason of Alternative Comics, Thierry Nantier at NBM, Michele Pugilese at CrossGen, Chris Staros at Top Shelf, George Broderick of Comics Library International, and Tim Stroup at Cold Cut Distribution. Two gentlemen however stand out as having been exceptionally helpful throughout and unceasingly charming to boot: Brent Braun at Image and Eric Reynolds at Fantagraphics. If you ever meet either of them, shake them heartily by the hand, ply them with drinks and offer to have their children.

Special thanks are due to the following retailers who've been generous enough to lend comics they might have sold while in our hands. They've been unfailingly helpful when asked to search their entire stock for specific comics, or to let us do the same, and in supplying out of the blue comics that had been eluding us for months. Without their assistance and generosity this guide wouldn't have been possible. They are:

Peter Root of City Centre Comics, Kollectibles, Parnie Street, Glasgow G1 5LU
Paul Hudson of Comics Showcase, 63 Charing Cross Road, London WC2H 0NE
Gafin Austin of Deadhead Comics, Candlemaker Row, Edinburgh EH1 2QG
Kenny Burns of Static, Argyle Street Market, Arglye St, Glasgow G1
Rob Rudderham of 30th Century Comics, 18 Lower Richmond Road, Putney, London SW15 1JP

Special thanks are due to **Adrian Snowdon** for his generosity. Without him there would not be a second edition of *The Slings & Arrows Comic Guide*.

E. &. O.E.

Finally, there are going to be errors in this guide: whether they're typos or plain mistakes we hope they've been restricted to a minimum. Wherever possible we've attempted to verify information ourselves, and this will account for some discrepancies between this and other publications. In cases where we're just plain wrong, though, please let us know at comments@slingsandarrowspublishing.com, so that we can correct any future editions.

A1

Atomeka Press: *6 issues, 1 Special 1989-1992*
Epic/Atomeka Press: *4 issues 1992-1993*

A1 allowed a lot of class artists to let off steam, sometimes without a writer in tow, and published some corking stories alongside the resultant indulgences, which were always great to look at. Where else will you find Glenn Fabry writing and drawing a modern story of street life ('Bricktop' in 1-6)? Encouraging more mainstream creators to experiment was part of the remit: Barry Windsor-Smith submitted loose black and white strips, and Moebius was notable among other contributors. The first issue started auspiciously with Ted McKeever and Dave Gibbons each writing a story for the other to illustrate, and Pete Milligan and Brendan McCarthy's experimental collage about a child molester sitting next to a wacky Bob Burden Flaming Carrot strip. A similar willingness to mix and match on the part of editors Dave Elliott and Garry Leach prevailed throughout.

The emphasis was on British creators; there are a lot of strips from *Warrior* ('Father Shandor', Warpsmiths, 'Bojeffries Saga') in the first series and Deadline (Tank Girl, Cheeky Wee Budgie Boy) in the second. Sexy fantasy stories by Leach and Brian Bolland, particularly in the 'Bikini Confidential Special', rub shoulders with serious drama, comedy and slice-of-life tales. Although it's lacking in direction at times it's a pleasure to see so many great names in one place, rarely doing what you expect of them. Series one was in black and white, while the Epic volumes were in colour.~FJ

Recommended: Series one 1, 3, Special

A.A. PRIME

Viz: *1 volume 1995*

Three romances set in a future where a race of delicate red-maned 'unicorns' (mutates genetically developed for space exploration) dot frontier society. In '*A, A*' (46 pages) we learn that clones of specialists are available to make fatalities at colonial outposts less disruptive to progress. For those who have developed relationships with the deceased a perfect copy's arrival is unexpectedly traumatic. In '4/4' (50 pages) the childlike Trill's life has been concentrated on reason, intellect and experience by her guardian, a scientist who is experimenting on her. An almost-relationship with Mori, a telekinetic, unleashes a 'fourth quarter': emotion. In 'X & Y' (99 pages) Mori has moved to Mars and meets Tacto, a unicorn coming to terms with discovering that he/she is transsexual. The emotional turmoil provides an unpredictable trigger to Mori's powers. Moto Hagio gives us a masterful example of science fiction in a shojo (girls') manga style. The stories are relationship-based and sentimental, but work in the futures that she unfolds for us. The expected romantic facials and montages are carefully played-off against the portrayal of the various planets and their communities.~SW

Recommended

A.A.R.G.H.

Mad Love: *One-shot 1988*

A benefit comic intended to raise funds to combat anti-gay legislation. The acronym stands for Artists Against Rampant Government Homophobia, and the list of contributors is stellar – Neil Gaiman, Frank Miller, Alan Moore, Bill Sienkiewicz, Dave Sim and a cast of thousands. Unfortunately the stories tend to be painfully earnest (Moore), or suspectly flippant and dismissive (Miller's 'Robohomophobe'). Still, most readers will find something of interest.~HS

A & D Armed Dangerous

Acclaim: *4 issue miniseries 1996-1997*, one-shot ('Saturday Night Special') 1997*

'I can do that,' thought Bob Hall after a glance at *Sin City*, and indeed he can. Not as well, though. Charly Donovan is a washed-out drunken ex-gangster who inadvertently becomes involved in a gang war. Hall lacks Frank Miller's sense of design and dynamics, and while his writing is good enough why buy *A & D* when the real thing is so much better at the same price?~WJ

AARGH!

Marvel: *5 issues 1974-1975*

A combination of horror and humour that never managed the consistency of its inspiration, DC's *Plop*. Creators like Alfredo Alcala, Mike Sekowsky and Roy Thomas contributed decent enough material without ever coming up with anything particularly memorable. Tom Sutton's 'Rat' in 1 and 3 was the comic's highpoint, although 1950s reprints from Bill Everett in 1 and 2 were equally nice to look at. The final issue, by contrast, was a calamitous change of direction to more mainstream humour by Ross Andru and Mike Esposito that seems prepared for a different comic altogether. Avoid.~DAR

AARON STRIPS

Image: *4 issues 1997*

Collects Aaron Warner's syndicated strip *The Adventures of Aaron*, about a slacker youth with an overactive libido and a dysfunctional family. Attractively drawn, and, while not original, and possessed of no belly laughs, there are quite a few wry smiles to be found here.~HS

ABC WARRIORS

Fleetway/Quality: *8 issues 1990-1991**
Hamlyn: *1 Volume 1997*

The ABC Warriors are an eccentric bunch of robots with personalities able to resist Atomic, Bacterial and Chemical warfare, none more so than the mystical Deadlock, combining spells and steel. Originally serialised in five-page episodes in *2000AD*, when collected the lack of any developing plot is glaring. Luckily, the largely inventive scripts of Pat Mills ensure individual episodes remain memorable, and 1-4 are a showcase for almost all the artists working regularly on *2000AD* in the late 1970s. The best are Mike McMahon's chunky stylings and Kev O'Neill's more angular work, but other artists of note include Carlos Ezquerra, Dave Gibbons and Brendan McCarthy. By *2000AD*'s third run of ABC Warriors, serialised from the end of 4, Mills was plotting an entire story in advance, and the greater cohesiveness and a fixed destination provide a more satisfying read. It features the first comics work of Simon Bisley, although the other artist used, SMS, is good and generally overlooked. In the end, though, shoddy printing ensures everything looks terrible. Titan Books volumes reprinting the early stories are the best place to see *ABC Warriors*, and a Hamlyn volume reprints work continuing the series, two stories titled 'Khronicles of Khaos' and 'Hellbringer'. By now the Warriors have a mission to spread Khaos, Tony Skinner has a heavy and detrimental hand in the writing, and there's an ecological and anti-corporate subtext. Kev Walker's art is good as far as it goes, which isn't beyond powerful figures to any backgrounds, although his vibrant and vivid palette is distinctive.~WJ

ABE SAPIEN

Dark Horse: *One-shot 1998*

Spun-off from *Hellboy*, this starred his fellow paranormal investigator in a tale of ships haunted by the ghosts of African slaves. Brian McDonald's script is decent enough, and Derek Thompson puts a lot of work into the art, but there's no denying that without Mike Mignola things fall a little flat. This is underlined by a great Hellboy back-up by Mignola that has all the style and wit lacking in the lead strip.~DAR

A. BIZARRO

DC: *4 issue miniseries 1999*

Gene tampering has produced a resilient being with the I.Q of your average ape. As the bizarro attempts to piece together his past and find a future he has to fight off Luthor's attempts at capture via a side-trip to Apokolips, along the way meeting several people familiar to Superman readers. It's a sometimes amusing read, but just the transitory diversion.~FP

ABOMINATIONS

Marvel: *3 issue miniseries 1996-1997*

Hulk-free sequel to his 'Future Imperfect' microseries by Ivan Velez Jr and Angel Medina. In the wake of the Maestro's departure a decaying Abomination rises to take the tyrant's throne, motivating some of the Outlaws to escape to our present. Inevitably, they face off with the current Abomination. Everyone and his brother has an attitude and it is all too cute for its own good.~APS

ABRAHAM STONE

Platinum: *1 Graphic Novel 1991*
Epic: *2 issues 1995*

In the graphic novel Abraham Stone leaves his rural homeland to seek his destiny in New York. Since this is the century's second decade his experiences of getting to grips with city life manage to include a fair amount of violence, especially since he's looking for the criminals that killed his family. In doing so he becomes an enforcer for a local mobster, eventually moving closer to the person who ordered his parents' execution.

The Epic volumes are traditional comic size, and see Abraham bedding a rich woman who takes him to Hollywood, where he gets involved in the early days of the movie industry, in 1, and becoming an unwilling part of Pancho Villa's revolution in 2. Abraham looks out for himself first, and is all too easily cajoled into illicit activities, but he retains a nobility and sense of justice that sees him through to the other side. Written and drawn by Joe Kubert, it's well up to standard artistically with Kubert evoking a strong period flavour in all issues, but equally all issues could have used a tighter script.~NF

ABSOLUTE ZERO

Antarctic: *6 issues 1995-1996*

Hit-or-miss anthology title that features work from unpublished creators, most notably Dean Hsieh who debuted Athena in 1-3, and the return of anthropomorphic mouse warrior Mighty Tiny (2 onwards) by Pat Kelly. Most of the remaining content is very forgettable, including early work from James Kochalka.~WW

The ABYSS

Dark Horse: *2 issue microseries 1989**

Film adaptation notable for Mike Kaluta's art. Unfortunately his usually decorative and well designed pages are muted by the necessity of multiple-talking-heads panels. The special effects endowed the movie with an eerie splendour, and lacking them the script's resemblance to a 1950s B-movie is highlighted.~FP

AC ANNUAL

Americomics: *4 issues 1991-1994*

Expanded adventures of AC's *Femforce* and their supporting heroes and villains. That's all there is to say really. Go on to the next entry. Or look up *Deadbeats*, which is rather good.~HS

ACCELERATE

DC/Vertigo: *4 issue miniseries 2000*

Punk science fiction, written by Richard Kadrey and drawn by the Pander Brothers. A young woman whose dead boyfriend contacts her on the anniversary of his death is set off on a drug-fuelled adventure that takes her through the mutated Los Angeles landscape and pits her against the city's cops and politicians. Accelerate is the drug that allows her to move outside normal time and eventually re-unite with her boyfriend in cyberspace. As much a homage to L.A. and lost youth as a thriller, its strong characters and expressionistic artwork just about keep your interest.~NF

ACCIDENT MAN

Dark Horse: *3 issue miniseries 1993*

Mike Fallon is a high-level assassin, arranging accidents on behalf of the CIA, but putting most of his energies into comparing designer labels with buxom fellow-assassins while in the process of changing into bondage gear. Pat Mills and Tony Skinner lift the standard of dialogue and ideas slightly above average for this category of soft porn, but nowhere near high enough to justify three issues, and the mean artwork provides even less reason to stick around.~FC

ACE

Harrier: *One-shot 1987*

The pick of Eddie Campbell's earliest comic work, done for the fun of it, documenting the adventures of attendees at the Ace Rock And Roll Club, a 1950s revival hang-out in Southend. Stories don't get much more kitchen-sink than 'If Monkeys Could Fly', in which a girl recounts how she may have become pregnant and considers an abortion, and while the art is sometimes rough in places, the writing is among Campbell's best.~FJ
Recommended

ACE INTERNATIONAL

Starhead: *1 issue 1993*

Dennis Eichhorn narrates tales of the days when he was a hippy Private Eye/Process Server. Underground-style humour in short stories illustrated by the cream of the alternative cartoonists circuit, including Peter Kuper and Jim Woodring.~WW

ACE McCOY

ACG: *3 issues 1999-2000*

This reprints the latter end of the Frank Frazetta newspaper strip Johnny Comet featuring the hectic adventures of a daredevil race-driver and movie stuntman – a career change that ostensibly prompted the name-change of the lead character. Both daily and Sunday strips are featured, leavened with some truly appalling reprints from Charlton's 1960's motoring comic *Dragstrip Hot-Rodders*, but although Frazetta's art is magnificent the scripting is mediocre and the strip was cancelled mid-term. Historically interesting but unsatisfactory.~WW

ACES

Acme/Eclipse: *5 issues 1988*

One of the many valiant attempts to sell European strips to an English speaking audience. The magazine format *Aces* consisted of 'Air Mail' a 1920s aviation strip by Micheluzzi, 'Hollywood Eye', a 1930s detective story by Rivière, Bocquet and Berthet, and the hard-boiled 'Morgon' by Segura and Ortiz. They're all fine, but it was Zentner and Pellejero's superb adventure strip 'Dieter Lumpen', making its sole appearance in 4, that made the comic worth picking up.~DAR

ACES HIGH

EC: *5 issues 1955**
Gemstone: *5 issues 1999**

Aces High is a comic about the rather limited subject of World War I flying aces which, after only five issues, was clearly running out of creative direction. The artists and writers faced several problems, not least finding ways to introduce American characters to stories set in France.

Visually, while there is some stunning artwork, particularly from George Evans, it proved difficult to make the multiple dogfights that comprised the bulk of the action look different from story to story. The issues followed a similar pattern, opening with a visually accurate Evans story with beautiful artwork, followed by a story illustrated by Wally Wood, which usually had less fights and more characterisation. Even so this is obviously not Wood's favourite subject matter and some of the figure work looks rushed. Bernie Krigstein looked most out of place in the line-up, cluttering his art as if trying to ape Evans and Wood's level of intricacy. It doesn't suit him, although the writers have obviously tried to accommodate his strengths and supply him with more character-based stories such as 'Revenge' in 1 and 'The Mascot' in 2. Finally Jack Davis, again drawing in a slightly more detailed style than one associates with him, would round out the issue with a quirky shock story like 5's 'Iron Man', about a seemingly invulnerable fighter who doesn't realise he's a ghost. Davis' broader line and robust approach to storytelling added a much-needed vigour.

Although lovely to look at, it's clear Evans would have happily illustrated the same basic story until the cows came home. In issue one's lead story, 'The Way It Was', an old man reminisces to his grandchildren about how fine and chivalrous fighting was in the old days, and how the air aces subscribed to a forgotten code of conduct which was transgressed at their peril. It's repeated time and again ('Chivalry!' in 2, 'Footnote' in 3). Evans does get to draw the best story in the run, 'The Green Kids' in 4, in which a squadron leader, sickened by the way young pilots with almost no experience were supplied as aerial cannon fodder, continually harangues his commanding officer, who seems cold and distant. When appointed to replace him he discovers that he had been futilely battling for the same ends. Generally, Aces High soft-pedals the 'awfulness of war' angle for which Kurtzman's earlier titles became justly famous, and here the idea is refreshing. Ultimately, beautifully drawn but few stories worth reading. For the art at its best, seek out the black and white hardback collection reprinting the entire run.~FJ

ACME NOVELTY LIBRARY

Fantagraphics: *15 issues + 1993 to date*

Chris Ware's Acme Novelty Library is an astounding publication, presenting comics that engage the intellect, and managing from the first issue to do so in an accessible manner, thus succeeding where Raw failed. It's also arguably the first comic to move the medium forward since the undergrounds of the 1960s, yet keeps a clear eye on the past. Ware employs a regular cast including an archaic representation of a robot, an aged superhero archetype (sometimes presented as God), a hapless rural character dominated by his father, and Jimmy Corrigan, the smartest kid on Earth. Seen as child that fantasises about superheroes, and a dull middle-aged adult, the appellation is a cruelly capricious label, as Corrigan's strip, described in 5 as "an attempt to accurately counterfeit the mechanism of mundanity", portrays him as the loneliest and most pitiful person seen in comics. Occupying a spartanly furnished apartment and dreaming of dating his co-workers, his only social interaction is frequent phone calls from his overbearing mother. Ware's very dark humour puts his character through the grinder and an optimistic childhood becomes a solitary adult life punctuated by brief bursts of aspiration, always unfulfilled. The very epitome of the person who's always worse off than you are, Corrigan's incessantly depressed existence and hangdog face can't help but induce guilty laughter. As the series progresses, Corrigan comes to dominate, undergoing a disappointing reunion with his father. The family history is also disinterred by Ware, stretching back to events centred on the Chicago World Fair at the end of the 19th century. Here the narrative has a sense of foreboding and if anything, the humour becomes even more jaw-droppingly bleak in the longer concluding chapters presented in 13 and 14. The Jimmy Corrigan stories have been collected and in 2001 received the Guardian newspaper award for that year's best first book.

Quimby the Mouse is also remarkable, a 1930s-style cartoon mouse going about his business in an enormous series of intricate, minute panels, encompassed within a far larger design. Echoing the tomfoolery of *Krazy Kat*, Quimby's existence is also solitary and troublesome, and is the focus of 2 and 4, and there is now a Quimby collection. 15 concentrates on Rusty Brown, briefly seen in earlier editions, manifesting the worst habits of the obsessive collector. He's mercenary, unhygienic, calculating, and, unlike Corrigan, entirely unsympathetic as the engineer of his own isolated life. There are also a few 'Tales of Tomorrow', best described as Jimmy Corrigan in the future. This all makes *Acme Novelty Library* sound depressing, when in fact it's riotously funny if you're of a cruel-humoured disposition.

Ware's art is astounding. With what is on the surface a clear and simple line, his ability to portray a full range of emotions within this style is remarkable, and his frequent bleak land- and cityscapes, intended to convey isolation, are surprisingly edifying. His skill as a designer is even more impressive, with each issue meticulously pieced together and living up to the novelty aspect of the title. His storytelling also innovates, skipping back and forth over time from panel to panel in some instances. Only the first issue resembles the traditional comic format. 2 and 4 are each over a foot high, with 7 and 15 standing a full eighteen inches, while Jimmy Corrigan's chapters beyond 5 are presented in small pocket-sized landscape editions. 3 is a slightly larger portrait variation. Ware obsessively tinkers with the material as well. Most of it originates as strips produced for *The Daily Texan* or Chicago paper *New City*, which are re-jigged for *Acme Novelty Library*, often after having previously been altered for interim publication elsewhere. The content of 10, for instance was previously seen in *Blab* 7-8, but is here modified, including extra colour and a new epilogue. In turn the text pieces in 10 are very funny, particularly Ware's rant at the art world, but these are omitted from the Corrigan collection.

The comics are rounded out with ludicrously formally phrased (and very funny) nonsensical articles and fake ads, and intricately designed cut-out models of the type that might have been presented had there been comics in the Victorian era. This would be mere whimsical window-dressing elsewhere, but the archaic and convoluted language and formality of address bestow a cohesive substance to the entire package. *Acme Novelty Library* is a rare, and possibly unique, instance where the innovatively designed original comics stand as worthy artefacts and more desirable purchases than the collections.~FP

ACTION COMICS

DC: *796 issues +, 9 Annuals 1938 to date*

Action Comics 1 is clearly the most important comic ever published, defining the entire future of the American comics industry and creating a new genre in the superpowered crimefighter. Editor Vincent Sullivan made a bold decision in allocating the cover of his new title to a feature rejected by several other comic companies and newspaper syndicates. It was, of course, Superman, created by Jerry Siegel and Joe Shuster. While he may not have been the first skintight-costumed character in comic strip form, he was the first to lift a car over his head and smash it. Comics were certainly different in 1938 and for ten cents you got your money's worth. In addition to Superman the first issue included two black and white strips, one a Western strip titled 'Chuck Dawson', the other 'Scoop Scanlon Five Star Reporter'. Additionally in colour there were the adventures of Marco Polo, a cartoon strip, Bernard Baily's 'Tex Thomson', an adventurer, who would have a long run under various names, and 'Pep Morgan', a boxer by Fred Guardineer. 'Zatara The Master Magician' rounded out the issue, again by Guardineer, inspired by Mandrake the Magician, to whom he bore more than a passing resemblance. What differed him, though, was that he would recite his spells backwards! He was later better known as father of Zatanna, who inherited his abilities.

Contrary to current wisdom, the comics of the 1930s weren't all simplistic, and Action contained well plotted material. In his first appearance Superman must stop an execution, confront a wife beater, and almost becomes involved in political corruption. Siegel's plotting is tight, and Shuster's art, while perhaps a little crude, is very dramatic, and it's easy to see why this strip was a hit from day one. It contained large portions of the legend that remain today. Lois Lane appears in the first story, admiring Superman, but despising his timid alter ego Clark Kent. She's gutsy from the off, and Kent's persona is also well established as he begins working at *The Daily Star* (changed to *The Daily Planet* in 23). By all accounts this was an extremely high-selling comic, but DC didn't appear to realise this was due to Superman, who wasn't cover-featured again until 7, but from 9 either his name or image was presented, and from 19 there was no doubt who was the star of the comic. 6 introduced an office boy generally thought to be the first appearance of Jimmy Olsen. Superman's career as a journalist sees off Scoop Scanlon from 13, and Lex Luthor débuts in 23, oddly with a shock of red hair, although he does have a bald assistant. He'd not be seen again here until 42. You can find all these early stories in DC's *Superman Archives* series.

1940s Superman stories were strictly Earthbound, often prompted by Clark Kent's newspaper career, although his enemies were initially gangsters, then largely humans with a gimmick such as the Prankster and Toyman, introduced in 51 and 64 respectively. The former in particular proved more popular at first than Lex Luthor, and it wasn't until the 1950s that the bald evil genius was beefed up into Superman's pre-eminent foe. Like most other superheroes, Superman played a large part in the war effort, fighting home-front saboteurs and Nazis abroad. The most notoriously jingoistic result of the conflict was 58's cover proclaiming 'You Can Slap A Jap', and Superman putting up posters saying so.

Assorted back-up features replaced those from the first issue over time, with 23, 33, 37, 40 and 42 seeing the débuts of the Black Pirate, Mr America (actually Tex Thomson, who would further become the Americommando in 51), Congo Bill, The Star-Spangled Kid and the Vigilante respectively. Congo Bill lasted well in to the 1950s, eventually as the giant golden gorilla Congorilla, and in lasting to 86 the Star-Spangled Kid turned convention on its head by having an adult sidekick Stripsey. Often drawn by the expressive Mort Meskin, it was the Vigilante who was the quality act, replacing Shelly Moldoff's Black Pirate and running until 198. Country singer ("Prairie Troubadour") Greg Sanders had a dual career as radio star and crime fighter, masking himself by means of a distinctive red scarf tied around his mouth. The back-ups remained remarkably stable for years, some only dropping out when the page count was reduced. The last significant addition was Tommy Tomorrow in 127, a space-adventure strip set in the 21st century, who would run until 251.

Superman's powers gradually increased over the years, with X-ray vision introduced in 18, and his strength and speed on an upward curve. Pretty soon he was no longer leaping buildings in a single bound, but flying over them easy as you like. In 60 Lois Lane gains superpowers to become Superwoman, nicely handled for what was then a new idea. It would be recycled many times in the following decades. By this time Superman was established on Earth, although fantastic elements were added to his stories by recurring inept magicians Hocus and Pocus. Seemingly popular in the mid-1940s, they were the nearest Superman came to comedy sidekicks, but their bumbling was eventually deemed surplus to requirements, and the jokes were left to the Prankster. There were few glimpses into Superman's Kryptonian background until the late 1940s, and 158 features his own personal album 'The Kid From Krypton', expanding on his origin. This was in the early 1950s, and by this point Superman's stories had become more fantasy oriented. The appearance of aliens was frequent, as were time-travel stories, and Superman saw out the demise of the superheroes that had followed him with ease. This was possibly because as well as being the original article, despite his powers Superman had always offered more than a succession of villains, and the strip was consistently strong, with a distinctive supporting cast. Of course, that there was a Superman radio show throughout the 1940s and TV series running between 1952 and 1957 may have helped.

Although Jerry Siegel was still writing Superman stories, Shuster had long since given way to other artists. The pair maintained a studio from which various artists drew the strip, most notably Fred Ray, Paul Cassidy, Leo Nowak and John Sikela, who would go on to be the pre-eminent Superboy artist of the 1950s. Foremost among them, though, and longest lasting was Wayne Boring. His figures were stiff-looking, but there was a unique dynamism, albeit coupled with a tendency to draw everyone with lockjaw. DC also appointed Jack Burnley to draw some strips. The mid-1950s Superman is probably the version that most commonly comes to mind for most people. Still at *The Daily Planet*, Clark Kent was now a fully rounded and distinct character, and Luthor was making more of a nuisance of himself with a succession of outlandish schemes. The Kryptonian heritage was being mined to the full, not least with the various shades of Kryptonite, each affecting Superman in a different way, with green the deadliest. Assorted villains from Krypton's past would pop up with increasing frequency, starting with 194, and Lois Lane played a big part in most stories, now often obsessed with the idea of uncovering Superman's other identity. In 206 Superman married Lois Lane, except he didn't, but this teaser, and many others later, were for an event probably ordained from their first appearance. The Superman series was gathering momentum in *Action* by the late 1950s, and additions to his legend were constant, with the origin of Brainiac in 242, in which it was revealed that an entire Kryptonian city had been shrunk and was preserved in a bottle. The miniature inhabitants often later emerged to give Superman a hand when required, and he in turn would regularly shrink himself to visit the city for an adventure, occasionally masquerading with Jimmy Olsen as Kandorian superheroes Nightwing and Flamebird.

252 is a landmark, with the origin and first appearance of Supergirl. She's also a Kryptonian, who escaped the planet's destruction, and was, coincidentally, Superman's cousin. Not a hoax, villain or robot, she was for real, a female counterpart for Superman and a permanent addition to the legend, gaining a back-up strip from 253. Her late arrival on Earth was due to her domed city being detached whole from Krypton's destruction, and her only following Superman into space when a meteorite devastated the city. She lived in an orphanage, adopting the identity of Linda Lee, and secretly shooting out to perform heroic deeds in her Superman-inspired costume, during which a robot Linda Lee would replace her. Some stories focused on her romantic interludes, and she had a particular crush on a fellow orphan, Dick Malvern. Leo Dorfman and Jim Mooney provided constantly well plotted and drawn stories, page-turners each and every one. These earliest stories have recently been represented in hardbound DC Archives edition. In 285 Supergirl became known to the world at large, and a good sampler of her back-up years is 295-298, conveniently reprinted as a one-shot special. They put Supergirl through the wringer, but even more so did the same to her friend, Lena Thorul. Hmmm, can't those letters be rearranged? Yes, Lena was Lex's younger sister, and the family changed their name when Lex went bad. Other samples of classic Supergirl can be found in reprint issues 334, 347, 360 and 373.

By the mid-1960s there'd been an upheaval in the comics industry, but Superman, both here and in his own title, never really stood still. While editor Mort Weisinger had a low regard for the opinions of fans he nonetheless gave them what they wanted with tight continuity and inventive additions to Superman's legend. The regular pencillers at this time were Al Plastino and Curt Swan, with Swan being the more special of the two. A highlight of his is 'The Death of Luthor' in 318-319, in which Luthor returns to the planet Lexor, named in his honour after he used his great scientific know-how to save the planet from destruction. Here he's a hero, and lures Superman to the planet and fixes events to seem as if Superman has killed him. 319 is the trial, and even when Luthor's deception is revealed he's so beloved that he's forgiven and Superman banished. Luthor remains, married to the delightful Adora, apparently to live happily ever after. Of course, it doesn't last. The 1960s was also the heyday of the 'Imaginary Stories', which, unconstrained by continuity, allowed Superman's writers to present some very interesting ideas. 332, for instance, has the wrinkle of Supergirl preceding her cousin's arrival on Earth, and then training him, while 338 and 339 star Superman's descendant. 351-353 are Wayne Boring's finest hour, featuring Zha-Vam, a character obviously inspired by the original Captain Marvel. 357 was Boring's last issue, while the back-up Supergirl strip was drawn by the excellent Kurt Schaffenberger from 359. 363 began a great multi-part story in which Luthor afflicts Superman with a disease turning him into a leper. Not wanting to infect others, he exiles himself into space, and then plans suicide in order to destroy the virus. Before he becomes cosmic dust, though, he's saved by the Bizarros. This strange tale was the work of writer Jim Shooter and artist Ross Andru.

From 377 Supergirl was elevated into *Adventure Comics*, while the previous headliners there, The Legion of Super-Heroes, occupied her back-up slot. With only a few pages to play around with, Shooter turned in some memorable character-driven stories, particularly 378, which dealt with drug addiction (strangely passing the comic Code Authority which banned all mention of drugs). 381 spotlighted a Legionnaire who lived in the poorer section of town, along with family hardship. Shooter's last story was 384, and the remainder of the Legion's run was written by E. Nelson Bridwell and Cary Bates in admirable fashion. Bates was also becoming an inventive and popular Superman writer. Try 385-387, where the Man of Steel is trapped in the future and becomes immortal. The end of an era came with 392 as Mort Weisinger retired, having edited the Superman line for decades. Fittingly his final issue was an imaginary story, a form he pioneered. It was also the death knell for The Legion of Super-Heroes, not required by new editor Murray Boltinoff, whose preferred back-up feature was 'Tales from the Fortress of Solitude', introduced in 395 and detailing the history of assorted artefacts kept by Superman in his Arctic hideaway. Boltinoff also introduced credits for creators, and teamed now regular penciller Curt Swan with the magnificent inking of Murphy Anderson for the Superman art team supreme. There was no great change in the substance of the stories, but the team of Swan and Anderson made events look substantially more dynamic. Boltinoff also dropped the idea of imaginary stories, the final one occupying 396-397. Years later they were to be resurrected as 'Elseworlds' tales.

403-413 are fifty-two pages, all containing a nice selection of reprint strips, and a new back-up starts in 413, running until 418. Bob Haney and John Calnan failed to capture the quirky flavour of Metamorpho's 1960s series, although Haney did pack a lot of plot into eight pages. 419 introduced a new back-up, The Human Target, an inventive idea from Len Wein later to become a TV movie. Christopher Chance took the place of people marked for murder, using his wits to trap the killer. Carmine Infantino pencilled the first strip, inked by Dick Giordano, who thereafter pencilled as well. The Human Target alternated with Green Arrow (nicely drawn by Sal Amendola and Giordano) and the Atom in the back-up slot. Throughout a period of revitalisation at DC during the early 1970s, the Superman strip in *Action Comics* had remained largely unmodified, unlike his own title, even when the instigator of those changes Julie Schwartz, became editor. The only changes filtering through were that Clark Kent now worked as a TV reporter for WGBS, facilitating the introduction of sports correspondent Steve Lombard to the cast. He was always a practical joker, with Kent his constant target, but the jokes rarely went as planned. It also returned Lana Lang to the strip on a regular basis, now a more mature character able to appreciate Clark Kent a lot more, and eventually a relationship develops. Lucky old Clark. Although the art of Swan and Anderson remained very nice, the stories, now mainly written by Cary Bates and occasionally Elliot Maggin, verged on average. There were a few outstanding issues, though, such as 437 and 443, with lead stories written by Maggin and an excellent selection of reprints.

484 is another wedding of Superman and Lois Lane, but this time it's not a hoax, a dream or an imaginary story. It's the marriage of the 1940s Superman, whom DC continuity revisions had consigned to an alternate Earth. It's a charming issue giving the fans what they wanted. 488 saw the start of an occasional Air Wave back-up strip. This was an updated version of a 1940s superhero, and while competent was never outstanding, and ran to 535, often teaming with the Atom. 500's 'The Life Story of Superman' recaps Superman's life from the explosion of Krypton onwards from Martin Pasko and the usual Swan and Anderson art team. It coincided with the release of the first *Superman* film, which seemed to prompt some outstanding stories. 507-508 offer the miraculous return of Jonathan Kent, a time paradox story involving aliens, but returning a seventy-year-old Pa Kent, who hadn't died when Superman was a boy. It was a moment of inspiration from Cary Bates, who was also responsible for the very well plotted story, and very convincing 510-512, in which Lex Luthor apparently abandons his villainous ways. Sadly, having hit form, Bates was replaced by an uninspired Marv Wolfman. Combined with Bob Rozakis' determination to retain a 1960s feel to the Air Wave, Aquaman and Atom back-up strips, the early 1980s was far from a golden era for Action. This was compounded by Curt Swan's departure with 534, although he returned for 544, the 45th anniversary issue, to draw an excellent Cary Bates-scripted Lex Luthor story, returning him to Lexor. New artist Gil Kane drew some nice issues between 539 and 552, and his contribution to 544 was a Wolfman written tale transforming the old-style Brainiac into a new, grotesque cybernetic model. Kane's art was distinctive, but he gave way to Kurt Schaffenberger in 556. Splendid artist though he is, Schaffenberger's style was definitely 1960s, which can't have helped declining sales. 560, 563, 565 featured Keith Giffen's wacky Ambush Bug in the back-up slot, a decidedly welcome breath of fresh air. Giffen also drew the Superman strip in 577-579, the latter a nice Asterix homage written by Jean Marc and Randy L'Officier. It was a welcome change of pace, but the Superman strip was just coasting along with ever poorer plots. Something needed to be done and the result was a whole new look for Superman from 584. Before that, though, in 583* there was one of the best Superman stories ever, a nostalgia-drenched imaginary story drawn by the classy team of Curt Swan and Kurt Schaffenberger, and written by Alan Moore. It concluded the story begun in *Superman* 423 featuring all the classic Superman elements. It's magnificent, and no comic fan should deny themselves this story. Schwartz ended his editorship on a well-deserved high.

584 featured the new Superman in a revised continuity. The strip had reverted to its roots, and Superman's unique nature was emphasised by his being the only Kryptonian to survive the destruction of the planet. Artist and writer John Byrne revived the DC Presents idea of Superman teaming with different guest stars each issue, kicking off with the popular Teen Titans. The selection of guest stars was engagingly offbeat, as Byrne seemed to be running through his favourites. Jack Kirby-created characters were

---

* Available in a collected edition

high on the list with the New Gods, Demon, Big Barda and Mister Miracle appearing in 586, 587, 592 and 593 respectively. He also had a soft spot for the Metal Men, featuring them in 590 and 599, but his most notable story was 591, in which the old Superboy starred in a tale of alternate realities. None of these stories dealt with Superman's personal life apart from 597, which guest-starred the two women in Clark Kent's life, Lana Lang and Lois Lane, sorting out their relationships with Clark. Byrne's run ended in impressive fashion with 600, an anniversary issue, with a number of stories all plotted by Byrne. There's a possible romance with Wonder Woman, drawn by George Perez and featuring Darkseid, and we're also treated to solos for many of Superman's supporting cast, drawn by classic artists. Although a nostalgic look at *Action Comics* it's also decidedly modern.

601 to 642 saw a complete change as *Action* became a weekly publication with episodes of several ongoing strips in each issue. This was innovative for the USA (although the traditional British format), and further risks were taken with the choice of strips, few of them headliners. Max Allan Collins and Terry Beatty's Wild Dog was a vigilante-style defender of the suburbs. Numerous attempts at popularising Blackhawk had failed since the 1950s, while the espionage strip Secret Six hadn't been seen since their own short-run comic in the 1960s. Mike Baron and Dan Jurgens revived Deadman, later illustrated by Kelley Jones, and Superman was relegated to a two-page centrespread in newspaper style format. The nominal star of the comic was Gil Kane, returning to former glories in illustrating Green Lantern, but the stories were disappointing. Later highlights included the return of 1940s tease Phantom Lady in a new incarnation from 636, the same issue in which Alan Grant started the restoration of the Demon. The weekly format was a brave experiment, but eventually produced little of note, much of the problem stemming from a generation of writers not used to providing a beginning, middle and end, or cliffhanger, in an eight-page story every issue. The final weekly issue is notable for a story running through the Deadman, Nightwing, Green Lantern and Superman strips pencilled by a number of veteran artists inked by young Turks. There's some nice combinations, including Carmine Infantino and Kevin Nowlan, Steve Ditko and Art Thibert and Curt Swan and Ty Templeton.

George Perez was at the helm as artist/writer in 643 to 652, producing decent enough stories scripted by Roger Stern, who carries on as writer after Perez' departure, with Brett Breeding taking over the art. A significant story occurs in 660, in which Lex Luthor dies. And we see the body. But who's this person with flowing red hair claiming to be Luthor's long-lost son? Even more significantly, in 662 Superman finally confides in Lois Lane, revealing his Clark Kent identity. It's the end of an era and the beginning of a new one as they decide to get married. Superman's immediately whisked away for two issues as part of the 'Time and Time Again'* story crossing over between all the Superman titles. Here he encounters old DC villain Chronos in the Stone Age and moves to the 1940s in 665, featuring a nice cameo from the Justice Society of America, while Luthor Jnr is proving very popular with the citizens of Metropolis. 674 was part of another crossover story 'Panic in the Sky'*, and introduced the new Supergirl, an artificial creature called Matrix, with shapeshifting abilities among others, who is befriended by the new, genial Luthor. Jackson Guice becomes regular penciller with 476, by which point Action had become part of what was to all intents and purposes a weekly *Superman* comic. Stories ran through all the Superman titles, with each having individual subplots, and the running order denoted by triangles on the cover. *Action*'s main sub-plot concerned Luthor, a paragon of virtue in public, yet with Supergirl apparently under his thrall. 683-691* are part of three long crossover stories in which Superman is killed by Doomsday, after which four possible versions of Superman appear, with each occupying one of the *Superman* titles. *Action* concentrates on the Eradicator, most resembling Superman physically, but brutal and vengeful in his actions. The genuine article is back in 692. Despite some faults, the entire idea of killing Superman and subsequent plots were well conceived and marketed, drawing many new fans to the comics, and convincing them that the oldest superhero could still be exciting and worthwhile. It rejuvenated Superman, who now has a higher profile than at any time since the Superman movie era.

The plots concerning Supergirl and Luthor come to a head in 700, which contains a nice sequence involving the wedding of Clark Kent's best childhood friends, Lana Lang and Pete Ross. The main story, though, has Lois Lane's investigations of Luthor bear fruit at last, to the great detriment of Metropolis. David Michelinie writes from 702, just in time to slot in 0 between 703 and 704 as part of the *Zero Hour* crossover, and Kieron Dwyer is the artist from 713. A lot of media attention focused on 720 as Lois calls off her engagement to Superman. The tiff didn't last long, though, and Lois and Clark get hitched, again with much media attention, and tying in to the 1990s TV series. While weekly appearances of Superman made for stronger stories, they sacrificed the individual personality of each title. Still, with the arrival of Tom Grummett as penciller from 727 at least the stories looked good while Michelinie ran out of steam. A protracted plot that has Superman change costume and powers (now electro-based) from 733 didn't help. New writer/artist from 738, Stuart Immonen was at an obvious disadvantage. His art was lovely, but his writing less polished. Superman was now back with his familiar costumes and powers, and subplots included Lex Luthor buying and shutting down *The Daily Planet* and forcing Lois Lane to work for him. A new super-team for Metropolis, The Supermen of America are spotlighted in 752, before their own miniseries. Issue 1,000,000 slots in between 748 and 749 and features Superman from the 853rd century. The last annual appeared in 1997. The second in 1989 is by far the best of the bunch featuring a story as part of 'Superman in Exile' storyline of that year with contributions by Jerry Ordway, George Perez and Curt Swan.

There's a big editorial shake-up from 760 and it's been downhill ever since. Joe Kelly takes over as scripter along with a succession of talented but totally miscast artists, most trying to imitate a manga style. If there are any decent Kelly stories, they're hard to find among dreadful storytelling and messy computer colouring. Storylines of note include the upgrading of Metropolis to a space-age city due to a Y2K virus in 763, the conclusion of first 'Return To Krypton' saga in 776 where the original style Krypton appears. Any confusion is explained in the final episode of a second 'Return to Krypton' story in 793. It was just a tease for old-time readers, but it's nice to see Krypto the Superdog (789-790) is still around. There's a darker tone to *Superman* from 783 after the conclusion of the 'Our Worlds at War' crossover, paralleling the disastrous events of September 11th 2001. 785 is the last issue with the continuing cover triangles, featuring a Bizarro story where – ha-ha – the story is printed back to front. Oh what wit! Mind you, reading any issue backwards at this stage would be a distinct advantage. You can start when everything's over! Yes! Only 791, a flashback to Clark Kent in Smallville is of any merit highlighting prejudices against anyone not body-perfect. Having ended the policy of continuing stories through all Superman titles, back they come again. The 'Ending Battle' story in 795-796 is only notable for Superman abandoning his dark look, perhaps suggesting there's new hope for this series. Avoid anything from 760, at which point DC mystifyingly let standards plummet on their international icon.~HY

* Available in a collected edition

ACTION GIRL

Slave Labor: *19 issues 1994-2000*

Outgrowth of editor Sarah Dyer's *Action Girl* 'zine, this women-only anthology suffers from the common delusion that excluding men is somehow less wrong than any other form of discrimination. To be fair, though, that's the only male bashing you'll find in this generally fun, upbeat and energetic book. The contributions of Patty Leidy, Chris Tobey, Carolyn Ridsdale, Elizabeth Watasin and editor Dyer are the front runners. *Action Girl* is a candybox comic, and with the range and diversity on offer you're not going to like everything, but the odds are that you'll love some of it. 13 debuted two characters who later headlined their own titles: Jill Thompson's Scary Godmother, and Watasin's 'Magical Witch Girl Bunny', star of Charm School. Following a hiatus of several months, 14 turned up in Summer 1998, but since 19 there has been no sign of further issues. A formal cancellation has not been announced, however, so it's to be hoped we'll see more.~HS

ACTION PLANET COMICS

Action Planet: *2 issues 1996*
Image: *1 issue (3) 1997*

Artist Mike Manley launched his own anthology title attracting an accomplished list of contributors, and the brief given to all of them appears to have been 'make it fun'. If anything it resembles an American take on the idea of Britain's *2000AD*. Jerry Ordway's 'The Messenger' would later be completed as a one-shot, and Manley's Monsterman and Ande Parks' Uncle Slam would have their own one-shots. The best feature, though, is 'Nails' by Phil Hester, the never completed story of a crime-busting cyborg.~FP

ACTIONOPOLIS

Antarctic: *1 issue 2002*

Huge anthology of name creators wrangled by Shannon Denton into producing short comics stories of action, adventure, science fiction and superheroics. Contributors include Ladronn, Bernie Wrightson, Shawn McManus, Keith Giffen, Cedric Nocoon and others, but sadly it's mostly of a forgettable quality.~WW

Sergio Aragonés ACTIONS SPEAK

Dark Horse: *6 issue miniseries 2001**

Sergio Aragonés is famous for his Mad Marginals, tiny silent gag cartoons that nestle in the corners of *Mad*. This series expands on the concept, with each issue featuring 24 wordless one-page gag strips. Aragonés is certainly a masterful storyteller who can cram an amazing amount of detail into a single panel, but frankly the vast majority of these strips are unlikely to raise much more than a (very) brief smile. The whole series can also be read in about ten minutes, making it remarkably poor value for money.~AL

AD Police

Viz (U.S.), Manga Publishing (U.K.): *1 Volume 1995*

In the 21st Century, the Genom Corporation controls those living in a post-disaster Tokyo. Genom's ultimate aim is computer control of the world but some freedom fighters (or maybe terrorists) have emerged to hinder the plan. The AD Police are a special police unit designed to combat terrorist and boomer crime (boomers being the cyberdroids that are used for most heavy manual labour). Into this situation comes a boomer whose brain has been affected by cosmic rays so that it can think for itself. It would have taken a minor miracle for author Tony Takezaki to raise this above its routine action-adventure roots. The messianic philosophising by the aberrant boomer is often funny but usually unconvincingly connected to the plot as a result. It almost reads like a cut version, as though there's a larger story just out of view. The reproduction doesn't do justice to Takezaki's detailed and evocative artwork, which bears comparison in style to Katsuhiro Otomo.~NF

ADAM STRANGE

DC: *3 issue miniseries 1990**

His *Mystery in Space* appearances have a nostalgic charm, but Adam Strange has rarely seen the limelight even from a distance since, and his guest appearances have decreased over the years. Instead of letting a character whose time had passed remain a fond memory, DC issued this pointless 1990s revision. Unsavoury aspects of Adam's apparently random trips across the universe to Rann are revealed, and it appears he'll be absent in his adopted planet's greatest hour of need. Despite Adam Kubert art, it's all downhill from there, and by the end of the series few constants remain in Adam Strange's life. The success of the makeover can be measured by Strange's continuing lack of presence until the status quo was restored in Starman almost a decade later.~WJ

ADDAM OMEGA

Antarctic: *4 issue miniseries 1997*

The Controllers have taken over the Earth and set out to remove all non-human life from the Galaxy. Addam Omega is a 350 year old biomechanoid, built by the Controllers, but now in the middle of an adventure that forces a reassessment of his blind obedience to their orders. Bill Hughes' space opera is an annoying, disjointed affair with its oddly minimalist art style, unnatural dialogue and his inability to decide whether he's writing a satire, a moralistic tale or a simple romp.~NF

Luftwaffe: 1946 Color Special – Der ADLER

Antarctic: *One-shot 1998*

A short story about race, equality and patriotism, backed with character biographies and aeroplane designs, all part of Ted Nomura's 'Altered Wars' series. It tries a little too hard to be *Enemy Ace*, but is a thoughtful piece, nevertheless.~NF

ADOLESCENT RADIOACTIVE BLACK-BELT HAMSTERS

Eclipse: *9 issues 1986-1989**

Don't be tempted by early Sam Keith art, this is slipshod pre-pubescent derivative rubbish.~FP

ADOLESCENT RADIOACTIVE BLACK-BELT HAMSTERS IN 3-D

Eclipse: *4 issues 1986*

Slipshod pre-pubescent derivative rubbish in 3-D.~FP

ADOLF: A Tale of the Twentieth Century

Cadence Books: *5 volumes 1995-1996*

Osamu Tezuka is best known outside Japan as the creator of Astro Boy, but was regarded in his homeland as the "God of Manga", his prodigious output unmatched in terms of quality, variety and influence. Early innovations include the application of film and animation techniques to comics in the 1940s, and his later contribution to Japanese animation was almost as noteworthy. Adolf is his career peak. It's part soap opera, part thriller, and part historical polemic; Tezuka's view of World War II as applied to two boys named Adolf, with a better known Adolf also examined. Adolf Kamil is Jewish and Adolf Kaufmann is the son of a German ambassador married to a Japanese woman. That both reside in pre-war Kobe stretches credulity, but has a historical basis regarding Japan as a destination for Jewish refugees. Tezuka masterfully details the development of both Adolfs, entwined by a secret concerning Hitler with far reaching implications should it become public knowledge. The secret involves a wider cast, each deftly and convincingly portrayed, with Tezuka diverting to strip away the demonic myth of Hitler to portray a man, albeit a considerably troubled man. For what's subtitled 'A Tale of the Twentieth Century' *Adolf* concentrates for the most part on the ten year period 1936-1945, although tellingly, the story doesn't end with the atom bombing of Japan. Despite the effects being chillingly detailed in microcosm, that's merely a pause before an uncomfortable conclusion set in 1970s Palestine. Both Adolfs are there, trapped by events that occurred thirty years previously.

---

* Available in a collected edition

To pick, both junior Adolfs act beyond their established ages, and the Japanese tradition of instant switches into slapstick expressions for emphasis, often at tragic moments, is jarring. These are, however, minor quibbles concerning a masterpiece that will have grown men weeping at times. 'Epic' is an over-used adjective, cheaply applied to stories continued over several twenty-two page comics irregardless of scope. Adolf, totalling over 1250 pages, deserves the description, and ranks among the best comics ever published.~WJ

Recommended: 1-5

ADRENALYNN

Image: *4 issue miniseries 1999*

In 1980 Russian orphan Sabina Nikoli swaps her calipers for a new set of mechanical legs and starts her reconstruction as terrorist espionage cyborg Adrenalynn. In the present day she's retrieved from a Washington sewer, presumed dead, and if you ever wondered how unconvincing a corpse in an unzipped body bag would look drawn in the big-eyed girlie style this title obliges. Addy and her minder Yuri have to eliminate the four previous cyborgs sent to America to prevent a biochemical bomb exploding. Created and written by Tony Daniel, this series is drawn by Marty Egeland. The script is moronic but mercifully low on cloying exposition. Forgettable unless you're keen on cuties maiming and killing.~SW

ADULTS ONLY

Inkwell Ink: *1 issue 1979*
Yentzler & Goniff: *2 issues (2-3) 1985-1987*

Silly, and very often poorly drawn comics with panels of explicit sex. Produced at a time when this was a rarity, there was presumably a market, but with so much material in a throbbing vein now available there's no point in wasting your time with this.~FP

ADVANCED DUNGEONS & DRAGONS

DC: *36 issues, 1 Annual 1988-1991*

Surely the joy of role-playing games is participating, affecting the fate of characters, challenging others and relying on your wits and creativity? This seemed to be the opinion of all the writers, who consequently did their utmost to ensure people would stop buying the comics and return to playing the game. Writers were initially rotated every four issues, but it eventually fell to Dan Mishkin to ensure a consistent level of tedium. Jan Duursema's art, though, is rather a surprise. She obviously enjoyed this a whole lot more than other titles she's worked on.~WJ

ADVENTURE COMICS

DC: *472 issues (32-503) 1938-1983, 1 80 Page Giant 1998, one-shot 1999*

This series began life as *New Comics* in 1935, featuring cartoony humour strips, most notably by Sheldon Mayer, but also an adventure strip 'Federal Men', which ran until 70, from Superman creators Jerry Siegel and Joe Shuster. With 12 the title became *New Adventure Comics*, largely supplanting the humour strips with more adventure material, and with time the comedy was altogether phased out for a bunch of rugged he-men and 'Nadir, Master Magician'. With 32 the title changed to *Adventure Comics* and remained that way for forty-five years.

A pre-Batman Bob Kane strip, 'Rusty and his Pals' ran until 52, but the first departure from the norm, representing the gradual emergence of superheroes, is 40, with the débût of the original Sandman. Playboy Wesley Dodds donned cloak, hat and gas mask, used a gas gun to subdue the criminal element, and was obviously inspired by the pulp-fiction success, The Shadow. He quickly became the lead feature and dominated the covers, with stories largely illustrated by Creig Flessel. With superheroes becoming ever more dominant, 48 introduced The Hourman, drawn by Bernard Bailey. Physicist Rex Tyler swallowed a miracle pill to become super strong and agile for an hour. Certainly a popular strip, and even more so when aided by the Minutemen of America, a young kids' gang. A third superhero débuted in 61, Starman, with distinctive art from Jack Burnley. He was powered by a 'cosmic rod' that drew energy from the stars, enabling him to fly and shoot energy bursts. The Shining Knight arrived in 66, a genuine member of King Arthur's Camelot, transported through time with a winged steed. 69 sees the débût of Sandy, the Golden Boy, a kid sidekick for Sandman courtesy of writer Bob Kane, in a story giving Sandman a new skintight superhero costume. That's just in time for the arrival of Joe Simon and Jack Kirby on the strip with 72 to produce some truly dramatic stories until 91. In 73-80 the prolific duo offer us the first appearance of Manhunter, a costumed acrobat, having transformed the Paul Kirk strip about a big-game adventurer introduced in 58. Although a short-run obscurity at the time, he'd have considerable impact on DC continuity decades later. Jack Burnley left Starman after 80, and Hourman dropped out from 83, although Sandman was continued by other creators until 102, when he and Starman faded away, ending the first phase of DC superheroes.

A new look and several new features transferred from *More Fun Comics* with 103. That issue introduced Aquaman, underwater adventurer and King of the Seven Seas, speedster Johnny Quick, ace archer Green Arrow, and 'The adventures of Superman as a boy', One of Superboy's most significant adventures was in 128, which featured the first meeting between Superboy and a young Lois Lane. Superboy monopolised covers, being the main selling point, but oddly enough this may have contributed to the longevity of the Green Arrow and Aquaman strips, which outlasted the demise of superheroes towards the end of the 1940s, surviving all the way to 269 and 284 respectively. Even Johnny Quick survived until 207. Connoisseurs of good art may be interested to know that the Shining Knight was illustrated by a young Frank Frazetta, in 150, 151, and every alternate issue thereafter until 163, in stories later reissued as a *Shining Knight* one-shot. The character departed with 166, but Ramona Fradon's art on Aquaman kept up a high standard of art. Meanwhile regular Green Arrow artist George Papp made way for Jack Kirby in 250-256, recently reissued as a collection. 262 introduces Speedy, Green Arrow's kid helper, and Aquaman's young assistant Aqualad makes his first appearance in 269. Superboy's light-hearted adventure strip continued with few changes in format and substance from the 1940s to the late 1960s, mirroring stories in his own title, and those of his adult counterpart. Typical plots had him travelling into the past, the future, or battling strange beasts. Lana Lang, teenage pal of Clark Kent, was often the catalyst for the stories. In 167 she's transformed into Supergirl, complete with superpowers, the first use of the concept, although it wasn't lasting. 195 is typical, featuring 'Lana's Romance on Mars', with Superboy desperately jealous because she has a date with Mars Boy! Ahh...young love. It's all frivolous and enjoyable in small amounts. As Superboy continued, the legend of Superman was slowly being enhanced, never more so than in 210, which introduced Krypto, the superdog, who arrives on Earth in an experimental spaceship fired off by Superman's father as a trial run for that saving his son. Of course, Krypto is a dog also with super-powers, and he stuck around. 217-218 are, for the period, a rarity, being a continued story where Superboy's Kryptonian parents are apparently resurrected. Thereafter a robot teacher prepared by Jor-El to instruct Superboy how to use his powers arrives on Earth, and soon the entire population of Krypton appears to have avoided its destruction as assorted superpowered beings turn up. The most significant Kryptonians, and an imaginative addition to the cast, were those from The Phantom Zone, a concept introduced here in 283. Kryptonian criminals were transformed into phantoms, unable to materialise but seeing everything, and who survived the destruction of the planet in their ghostly forms.

By far the most significant issue of *Adventure* was 247, which introduced the Legion of Super-Heroes, a superhero club from the 30th century. Cosmic Boy, Lightning Boy and Saturn Girl (complete with names written on their chests in case of confusion) came back in time to test Superboy's eligibility to join their club. When introduced by Otto Binder and Al Plastino, the Legion were no more than another odd idea to be used for a single issue and forgotten like the earlier Mars Boy. Something about them, though, captured the imagination of the readership, and they returned in 267 (sadly, this time with only symbols on their costumes). Between those appearances Superboy and Lois Lane met again, and he befriends the young Green Arrow in 258. Giant golden gorilla Congorilla has a run in 271-281, and a Bizarro World back-up runs from 285 to 299, flying in the face of Bizarro when first introduced as a tragic Frankenstein's monster-like figure. He lives on a square world populated by comedy equivalents of the Superman cast. The distinguishing aspect of the Bizarro world was that everything was the opposite of the known world. You stop at green for their traffic lights, and gold is worthless while coal is almost priceless. It can be explained by the Bizarro code, which is "Us do opposite of all Earthly things. Us hate beauty. Us love ugliness. Is big crime to make anything perfect on Bizarro World". There you have it. The perfect world was the imperfect world. The strip was written by Superman creator Jerry Siegel with his tongue planted firmly in his cheek, wonderfully illustrated by John Forte, and recently collected in book form. If you like your stories ludicrous, they don't come more so than Bizarro World. It's the Legion of Super-Heroes who're gradually in the ascendant, though. In addition to appearing in *Action, Superboy* and *Superman,* they're back here in 282, 290 and 293, gradually introducing new members. From 300 they have a regular strip, starting as a back-up, but quickly usurping the lead strip, absorbing Superboy into the team.

The Legion were the first teenage superteam, and the longevity of the feature owes a lot to the colourful characters in its ranks, living up to its name when reaching a high of twenty-six members in the late 1960s. Early adventures were usually written by Siegel or Edmond Hamilton, and were illustrated by Forte, and have a certain primitive charm. In some ways, though, the strip was quite progressive, with one character dying in 304, and although he was later resurrected it was at the sacrifice of another character. An early blow for women's rights was struck when Saturn Girl became team leader, but then negated very soon after when she was barred from a mission because it was too dangerous for a girl! Incidents like these only add to the charm and somewhat daft nature of the series, as do some of the lesser powered characters such as Matter-Eater Lad, who could eat anything, Bouncing Boy (he could bounce), and Triplicate Girl, who could split into three people. While the Legion's early run was well received, the golden age of the feature began when a young Jim Shooter's first story was published in 346, introducing some new Legionnaires, one of whom he kills off a few issues later.

While the action was just as dramatic, Shooter developed the personalities of the team, redefined many relationships and was able to flesh out the minor characters. The majority of Shooter's stories were further improved by the art of Curt Swan and George Klein. By all accounts Swan never enjoyed drawing series, but it never showed and he gave each Legionnaire a distinctive look. Shooter provided many milestones, including the introduction of the Fatal Five in 352-353, who became mainstay adversaries. He also scripted one of the best Legion stories to date, 'The Outlaw Legionnaires' in 359-360. Bad guy Universo, introduced in 349, takes over the minds of virtually the whole of Metropolis, causing the Legion to be outlawed. Some are arrested and put to work on a chain gang, and others aren't permitted to use their powers. It's pure excitement all the way, and is reprinted in *Superboy and the Legion of Super-Heroes* 238. 354-355 have Superman travelling to the 30th century to meet the team as adults. It proved awkward in later years as it committed the Legion to a fixed history, but was interesting at the time. 365-366 return the Fatal Five and introduce Shadow Lass, and 367 débuts The Dark Circle, another perennial enemy. Shooter's other great two-parter was 369-370, concentrating on only a few Legionnaires and Lana Lang in the guise of Insect Queen, while introducing the evil magician Mordru. Shooter's work was occasionally interrupted with the stories of E. Nelson Bridwell, whose best is 350-351, featuring almost everyone ever connected with the Legion. The Legion ended in 379, but their entire run has been reprinted in the first seven volumes of their DC Archives series. It was thought at the time that they were taking sales away from the Superboy comic whenever he appeared prominently on *Adventure*'s cover, so they moved to back-up status in *Action*, with the former occupant of that slot, Supergirl, becoming the lead in *Adventure* from 381.

The Supergirl stories were much as they had been since the 1950s, usually involving a romantic interlude for the Maid of Steel, who, it was thought, appealed mainly to female readers. The magnificent Kurt Schaffenberger, and the equally professional team of Win Mortimer and Jack Abel drew one Supergirl story each per issue. Progressive times finally permeated in 397 with the appointment of editor/writer/artist Mike Sekowsky, recruited to rejuvenate a staid series. Sekowsky instituted some interesting changes, not the least being continual new costumes, many designs submitted by the readers, though most of them were terrible. Supergirl now had a recurring villain in Starfire, and her civilian identity Linda Danvers began employment at a TV station, where one of her colleagues happened to be Nasthalthia, Nasty for short, the evil niece of Lex Luthor. More significantly, Supergirl's powers began to fade, leading to a few interesting moments. Very much up to date, Sekowsky's costumes and scenarios reflected the late 1960s and early 1970s, and while often a stiff artist, his style is unique and engaging, and Supergirl has never been better. His departure was certainly felt, his sense of style and wonder leaving with him, although he did return to draw Supergirl's final few issues here 421-424. In the interim Bob Oksner, primarily known for his cartooning, adapted well to a more realistic style, drawing a far more feminine Supergirl, but the stories are forgettable.

From 409 Adventure increased to fifty-two pages, offering a selection of back-up reprints including Animal Man, The Enchantress, Hawkman, The Phantom Stranger and The Shining Knight among others. There were also new strips, including a beautiful Alex Toth Black Canary story in 418-419, and a gorgeous Zatanna story by Len Wein and Gray Morrow in 413-415, while Morrow also drew lovely Vigilante stories in 417 and 422. Zatanna was also well handled by Wein and Dick Giordano in 419. 425-428 showcased a number of features reflecting the title, with only the Alex Toth drawn Captain Fear in 425 standing out. Black Orchid appeared in 428-430, and was a well produced series about a mysterious silent superpowered heroine whose identity and origin were only revealed in her own miniseries fifteen years later. Written by Sheldon Mayer with art by Tony DeZuniga, Black Orchid was unlike anything else DC were producing at the time, with a nice gothic mood to the strip.

431-440 revived 1940s ghost The Spectre in controversial fashion, not least due to the unusual ways writer Michael Fleisher had the Spectre dispose of villains, all gorily drawn by Jim Aparo. One group was turned into wood and run through an electric buzzsaw, while another villain was cut in half by a giant pair of scissors. Always a spirit of vengeance, The Spectre had never been quite so extreme. Fleisher was obviously having a whale of a time conceiving ways to kill villains, but the over-the-top nature led to a hasty cancellation. Luckily for you the entire run plus the stories completed but never previously printed were collected as a four-issue series titled Wrath Of The Spectre in 1988. Aquaman was back in 441-452 after successful back-up appearances in 435 and 437 by Paul Levitz and Mike Grell. It was an enjoyable series by David Michelinie and Jim Aparo that led to Aquaman's own title being revived, though 452 did see the pointless death of a member of the Aqua family just for gratuitous shock. In 449-451 there was a Martian Manhunter strip written by Denny O'Neil, and nicely illustrated by Mike Nasser and Terry Austin, that heralded the return of the character after an absence of many years. Superboy is back for 453-458, without any notable moments among them, yet popular enough to propel him back into his own series. With 459 *Adventure* became sixty-four pages without ads until 466, running a variety of superheroes. The better ones were the Deadman strip written by Len Wein with art by Jim Aparo or José Luis Garcia-Lopez, Gerry Conway and Don Newton continuing the New Gods saga and the continuation of the Justice Society Of America strip, recently of *All-Star Comics*. Paul Levitz and Joe Staton continued as the creative team and the most significant event here is 462's death of the original golden-age Batman.

Starman, a new superhero with an old name, appeared in 467-478 from Levitz and Steve Ditko in an interesting space saga. Those issues also featured Plastic Man by Marty Pasko and Joe Staton, the later being a natural for the strip who produced his best artwork since *E-Man*. Aquaman, seemingly never able to keep his own series, was back for 475-478 in a story revealing his past before moving over to *Action Comics*. It was clearout time again in 479 as everything was replaced by 'Dial H For Hero', an update on the 1960s *House of Mystery* strip. This time there were two magic dials transforming the finders into a different superhero each time they dialled the word 'hero'. All heroes were created by readers, and largely drawn by Carmine Infantino, with Marv Wolfman scripts. The feature continued in *Superboy*. Cancelled with 490, the title was quickly revived as a hundred page digest comic reprinting previous glories including The Legion of Super-Heroes, Sandman, Aquaman, Spectre and Superboy, and occasional issues featured a single new story. This was largely inventory material that had been gathering dust in a drawer, the most notable of which was Shazam drawn by Don Newton.

The 1998 Giant offers stories featuring previous tenants Green Arrow, Legion of Super-Heroes, Shazam, Superboy, and Supergirl, and newcomer Wonder Wonder by John Byrne and Phil Winslade. It's worth picking up for a tale of the Bizarro World by Tom Peyer with art by Kevin O'Neill, a series he was born to draw! An all-new number 1 appeared in 1999, but for that see *JSA*.~HY

Recommended: 349-355, 357-360, 365-367, 369-370, 380, 397-402, 403-408, 428-440

ADVENTURE ILLUSTRATED

New Media: *1 issue 1981*

An early attempt to bring something different to U.S. comic market, *Adventure Illustrated* and its companion, *Fantasy Illustrated*, were designed to be American equivalents to such European anthology titles as *Pilote* and *Tintin* (but specifically not like *Metal Hurlant*). Lofty ambitions, however, were not enough to produce a bestseller. Despite bringing together some well-regarded writers and artists, only one issue was ever published, leaving all of its serials incomplete. It's tempting to say that it was ahead of its time but later attempts to introduce similar magazines have almost without exception failed. Only *Drawn and Quarterly* is still published and that infrequently. Still, for the curious, there's some pleasure to be found in either the story or artwork of most strips. Doug Moench and Bill Sienkiewicz offer the science fiction 'Magenta Core' with Sienkiewicz in full Neal Adams mode while 'Stinger Ray' by Pat Boyette is time-travelling horror. Mark Evanier and Mike Sekowsky's complex political science fiction epic, 'Rayder' did continue into *Fantasy Illustrated* 1 but Tom Sutton's sentient dolphins in 'Matrix' didn't. Finally, for no very good reason, there are three illustrations by Don Heck accompanying a chapter from Owen Wister's western novel, *The Virginian*.~NF

ADVENTURE Strip Digest

WCG: *4 issues 1994-1996*

Originally produced as a small-press series, this is an appealing and largely successful attempt to recreate an adventure tradition exemplified by newspaper strips like *Terry and the Pirates*, *Steve Canyon* and *The Spirit*. Rob Hanes is a private detective working for Justice International in a fictional Middle Eastern country threatened by rebels. In 1 a princess involves him in the local conflict between the army and rebels. 2 switches to Russia and two femme fatales in Isabelle Corbeil and the Siberian Minx. Industrial espionage in Paris (3) introduces villain, Nikolai Korda who also turns up in 4, framing Rob for murder. Creator, Randy Reynaldo works hard to establish credible plots and characters. His artwork, heavily influenced by Caniff and Toth, is clean and simple, but is least effective on Hanes himself, simply because he looks far too young. *Rob Hanes Archives* collects the small press stories and the series continues as *Rob Hanes Adventures*.~NF

THE ADVENTURERS

Aircel: *2 issues 1986*
Adventure: *11 issues (0-10) 1986-1987*

It's a standard Dungeons and Dragons campaign: the by-the-dice assortment of fighters and magic-users, undertaking an escalating series of quests, in this case, for a set of keys. Nothing startling, but it trots along at a fair pace and the ideas get steadily better. The artwork in Issues 1 and 0 (the origin issue, published out of sequence) is by Peter Hsu, who has a definite talent with architecture that can make a small panel seem like the set of an epic film.~FC

ADVENTURES IN THE DC UNIVERSE

DC: *19 issues, 1 Annual 1997-1998*

In the manner of the comics based on the Batman and Superman animated TV shows, this takes a look at the wider DC cast of characters, but without an accompanying cartoon series. The usual format consists of one complete feature story, usually by Steve Vance and John Delaney, which are generally rather unimpressive, and a short vignette. 1 stars the Justice League of America who returned in 12 and 18, followed by JLA members Flash (2 and again in 9 and 14), Wonder Woman (3 and 11) and Green Lantern (4 and 11), the Martian Manhunter (5 and 13) and Aquaman (6). The Shazam Family starred in 7 and 15, and the Legion of Super Heroes in 10, but the best stories are team-ups of established heroes, such as the race between Superboy and Flash in issue 14. There's a detective caper for Blue Beetle and Booster Gold in 8, Catwoman and Wonder Woman against the Gods (19), a drug tale covering two generations of Green Lantern and Green Arrow (16), and the excellently zany Martian Manhunter and Impulse (13), with the modern Green Arrow. The annual contains five well produced short tales of Dr. Fate, Impulse, Rose and Thorn, Superboy and Mr. Miracle. Although its always good to see another series aimed at younger readers, there's an inescapable feeling here that the entire series was designed as a promotional device for TV Animation producers to pick and choose from.~WW

Recommended: 13, Annual 1

ADVENTURES IN THE RIFLE BRIGADE

DC/Vertigo: *3 issue miniseries 2000, 3 issue miniseries ('Operation Bollock') 2001-2002*

That Garth Ennis is a very naughty boy and needs to be shot at dawn for this obscenity! It's *Monty Python* meets *The Dirty Dozen* as Ennis, superbly aided by artist Carlos

Ezquerra, storm troops through minefields of British stereotypes and clichés. The first series has our band of British misfits trying to thwart Nazi plans to create a special rocket fuel. Along the way they encounter various opponents such as the Gestapo officer, Wankshaft ("Venkschaft! Damn you!") and a unique bunch of Nazi paratroopers. The second series is the icing on the cake. This time our adventurous heroes seek out Hitler's missing testicle, which has developed mystic powers. Well weirder things have happened in life. Along with buggering elephants and an Indiana Jones piss-take it all makes for a gem of a read. One running joke has the closet homosexual Lieutenant Doubtful trying to get his commanding officer, Captain Darcy, to give him some er...oral relief. Yes, that Ennis chap deserves six of the British best! Followed by a good thrashing.~HY

Recommended: 1-3, 'Operation Bollock' 1-3

ADVENTURES INTO THE UNKNOWN

ACG: *174 issues 1948-1967*

On its début this became the first continuing horror anthology comic, setting the tone with an adaptation of Horace Walpole's *Castle of Otranto.* In several issues from 5 there's a continuing strip, 'Spirit of Frankenstein', although once it finished in 16 no other ongoing feature appeared until Nemesis in the 1960s. 27 is notable for a strip drawn by Al Williamson and Roy Krenkel, but by and large there's very little in the early days that would have anyone demanding the comics. Always professionally produced, the 'shock' endings were nevertheless predictable. The arrival of the Comics Code Authority in the mid-1950s toned the content down considerably, and forced writer/editor Richard E. Hughes to become more inventive, and given the already high standard of art, it's worth sampling at least one issue after 62. Some of John Buscema's early work can be found in 100, 106, 108-110.

Changing with the times, a superhero, Nemesis, was introduced in 154, running until 170. He was returned from the dead in order to avenge himself on his murderers in an origin story clearly inspired by DC's Spectre. The artwork by Pete Costanza and later Chic Stone could hardly compete with DC or Marvel's superheroes. The tongue-in-cheek scripts of Hughes never really clicked. Realising Nemesis was a bit of turkey, he was ousted as the final four issues returned to the anthology format, but by then it was too late for ACG.~SW

ADVENTURES OF AARON

Image: *4 issues (1-3, 100) 1997*

Creator Aaron Warner certainly enjoys himself in the companion title to *Aaron Strips.* Wacky humour is the name of the game, as young Aaron, who seems to like hanging around a xeroxing bureau, has many adventures while baby sitting, is wrongly accused of a robbery, gains super-powers, and is attacked by his smelly socks and the occasional busty-babe garbed in leather and chains (lucky devil). Perhaps too self-indulgent, but you can't help but be amused, and wondering if Warner was smoking something illegal while writing this series. 100 is a larger-sized edition with guest creators, which compensates for 3, where the reader is expected to write and draw most of the story. What fun!~HY

THE ADVENTURES OF BARRY WEEN, BOY GENIUS

Image: *3 issue miniseries 1999**

Oni Press: *3 issue miniseries 2000*, 6 issue miniseries ('Monkey Tales') 2001**

Ten year old Barry is the smartest person on Earth, but conceals this from everyone bar his friend Jeremy. While his peers are learning basic reading, Barry is constructing androids to fill-in for him at school. It's a good premise, and creator Judd Winick has the imagination to conceive appropriate scenarios, and the wit to ensure they're very funny. Barry is never lost for an inventive sarcastic put-down, or the means to pull off the most outrageous stunts. Your best friend been turned into a dinosaur from something you left lying around your lab? No problemo, just clone a new body from follicles left in his hairbrush. Other problems concern returning a crooked alien mob accountant home, the covert security services tracking Barry and an intelligent alien ape needing freed from the zoo to return home through an inter-dimensional portal. A major component of the humour is Winick's facility with dialogue, which brings us to the potty mouth problem. There has been much discussion of the frequent profanity, perhaps because it's somehow more shocking coming from cutely drawn cartoon kids. Move past that, though, and see *Barry Ween* in terms of adult cartoon shows that have followed *The Simpsons.* The first two series are the funniest. The third, using a theme of apes or monkeys throughout switches the focus away from Barry for large portions of each issue, and the comic is weaker for it, as it is for the continued story occupying 4-6, although the conclusion is well worked.~WJ

Recommended: Series one 1-3, series two 1-3

THE ADVENTURES OF EVIL AND MALICE

Image: *3 issue miniseries 1999*

The two young daughters of arch-villain The Black Eye set up as superheroes while Dad's out trying to take revenge on Dooplis City, which he blames for the death of his wife. While a pleasant enough read, the story and art fail to hit the level of charm they obviously aimed for, and the big secret is way too obvious to be intriguing.~DB

THE ADVENTURES OF JO, ZETTE AND JOCKO

Methuen: *3 volumes 1987*

Early in his career, Hergé experimented with various strips before Tintin's all-conquering success forced him to concentrate on the intrepid reporter. Jo, Zette and Jocko may predate Hergé's classic period but the wonderfully simple line and dynamic storytelling are unquestionably there and his narrative gifts are breathtakingly evident. Young Jo and Zette are brother and sister, while Jocko is their pet monkey. Together the trio whiz around the globe, righting wrongs and defeating dastardly villains of all descriptions. Admittedly, there is nothing here that is not found in *Tintin* in spades, but nevertheless this is still a terrific read from one of the medium's true geniuses.~DAR

Recommended: 1-3.

THE ADVENTURES OF PUSSYCAT

Marvel: *One-shot 1968*

One of the least-known characters of Marvel's 1960s revolution was Pussycat, who ran in numerous men's magazines for years. This magazine collects eight adventures of the pneumatic airhead agent of S.C.O.R.E. as she takes on the evil minions of L.U.S.T. Yes, the whole affair is every bit as vacuous as that suggests. Not surprisingly, considering the strip's provenance, the secret agent set-up is a transparent excuse for Pussycat to walk around in her underwear and, since she was drawn by Bill Ward, Al Harty, Bill Everett and (gasp!) Wally Wood, the magazine is at least easy on the eye. The title is rounded out by a new strip by Jim Mooney, who would go on to draw Pussycat strips well into the 1970s.~DAR

THE ADVENTURES OF RHEUMY PEEPERS AND CHUNKY HIGHLIGHTS

Oni Press: *One-Shot 1999*

Not quite the laughfest the title and the involvement of Penn Jillette (from Penn & Teller) might lead you to expect. These are slim stories about a pair of show business types, dragged down further by very little variance in the art, which is Renée French reined in. Very disappointing.~FP

AFTER DARK

Millennium: *One-shot 1995*

Themed anthology featuring a selection of Vampire characters in short complete tales. An excellent *Vigil* story bridges the gap between 'Road Trips' and 'Desert Foxes'.

Additionally there's Faye Perozich's 'Nico', 'Lost Soul' from Wendy Snow-Lang's Night's Children, plus two illustrated poems and a Brazilian horror short by the Mike Deodato studio, insipid offerings all. Goth chicks and Vigil completists only.~WW

(AFTER) LIFE IN GOTHLAND

NBM: *4 issue miniseries 2000*

Shea Anton Pensa writes and draws this surreal look at the subculture of black eyeliner, sex and drugs. We follow the adventures of Maddox, who's moved into a new apartment with three other freaks who spend their time making their debauched way through the goth underworld. Pensa's script is very funny, with Maddox's unpleasant outlook on life making him a fascinating study. The art starts off looking like something from a goth fanzine, by the end, it's developed its own style that fits the feel of the comic perfectly.~DB

AFTER SHOCK

Last Gasp: *1 issue 1981*

All women anthology comic with an immense variation in quality. Trina Robbins, Diane Noomin and Aline Kominsky-Crumb conform to expectation, Mary Wilshire turns in some charmingly drawn tongue in cheek gag strips, and Phoebe Gloeckner chronicles an empty life. Beyond that, though, there's nothing to interest or beguile.~FP

AFTERMATH

Chaos!: *One-shot 2000*

After the events in *Armageddon*, Lord Chaos restarts existence and creates eight separate Earths in parallel dimensions. This provides a brief glimpse of five of these worlds as Bedlam travels between them. Very much an introduction to the new Chaos Universe, there's little by way of storytelling or of interest to the casual reader.~NF

AFTERTIME

Antarctic: *3 issue miniseries 1998-1999*

Antarctic's Warrior Nun universe is The Crusades meet Dungeons and Dragons with a few spaceships thrown in. In this story, written and painted by Patrick Thornton, Dei has a crisis of faith and falls foul of a corrupt cleric. There are occasional flashes of imagination in the details, but the whole is leaden and the painting poor.~FC

AGE OF BRONZE

Image: *15 issues †, 1 Special 1998 to date*

The deceptive name doesn't hint at the grandeur of this series, which is a lavish account of the Trojan War by writer and artist Eric Shanower. It's obviously a labour of love for which Shanower has researched in depth beyond just *The Iliad* to present a faithful adaptation of the legends. Artistic licence is required, particularly in providing dialogue, but the liberties taken never approach the level of a Hollywood movie. Events are set in motion when adventurous young cowherd Paris discovers he's really a prince from the city of Troy and escalate through rash acts and misunderstanding to the point of war. The chronicles of the Trojan War, are of course full of the stuff of legends, and the circumstances of all the major players are spotlighted as Shanower draws them together. He plans a seven volume series to chronicle the entire tale, although the number of issues this will be is open-ended.

There is a downside to producing such a legitimate and all-encompassing work, and it's most prominent in the often sluggish pace, and a seeming tendency not to overlook any detail researched, no matter how slight. Keeping track of a vast cast, some only occasionally seen, over the infrequent publication of the comics is also difficult. 'A Thousand Ships' collects 1-9, and is a better way to consume the series. Don't expect a quick read, though, as in addition to the density of the text Shanower's black and white art is gloriously detailed, and bears scanning on its own.

The 1999 special highlights the brothers Agamemnon and Menelaus, and Shanower adapts his style to adapt this tale, drawing it in the fashion of the depictions found on ancient Greek and Etruscan pottery. There was also a 'Behind the Scenes' one-shot providing a who's who, production sketches and articles explaining Shanower's creative thinking. Overall, this is a refreshing change from the superhero titles that dominate the market. Both Shanower and Image are to be congratulated for their persistence, and it's to be hoped that the accolade of several award nominations ensures continued publication.~HY

Recommended: 'A Thousand Ships'

THE AGE OF HEROES

Halloween: *2 issues 1996*

Image: *2 issues 1997, one-shot ('Wex'), 2 Specials 1997-1999*

Ye olde comic booke fantasy, written by James D. Hudnall and illustrated by John Ridgway, whose scratchy yet atmospheric line style is well-suited to the strips' predominantly rural settings. If you like your quests to be epic, your fairies to be faery, and your monsters to be the personification of all evil, then you could do a lot worse than this thoroughly professional package. The two specials reprint the first four issues of the comic, while 'Wex' features a more continental art style from Angel Fernandez.~AL

AGE OF REPTILES

Dark Horse: *4 issue miniseries 1993-1994*, 5 issue miniseries 1996**

Each issue contains a well conceived vignette of what life might have been like during the Cretaceous era. Dinosaur fans will be seduced by the excellent, although oddly coloured, art from Ricardo Delgado while everyone else will flick through the comics in a minute.~WJ

The AGENCY

Image/Top Cow: *6 issue miniseries 2001-2002*

A team of operatives from the mercenary police force, the Agency (including the cybernetically-enhanced, Virtual Jonez), is tasked with stopping the serial killer, God's Man. However, it quickly becomes apparent that they are as much hunted as hunters in this complex, twisted tale from Paul Jenkins, with suitably dark and outlandish artwork from Kyle Hotz. It's full of graphic violence and other psychotic mayhem, but lots of fun for all that.~NF

AGENT LIBERTY

DC: *One-shot 1992*

A minor supporting character from the *Superman* series muscles fleetingly into the spotlight performing a tired and threadbare 'Dark Captain America' routine. Soporific.~HS

AGENT X

Marvel: *5 issues + 2002 to date*

Sharp and snappy continuation of the adventures of Deadpool rebooted for the post-Manga generation. Alex Hayden is amnesiac, butt-ugly with huge X-shaped scars on his face, permanently horny and a chick magnet. He is also trying to re-establish himself as the world's greatest mercenary, which leads to being stabbed quite a lot by his trainer, Taskmaster. Nevertheless he still manages to have lots of thrill-packed, bullet-riddled adventures. Gail Simone writes and Alvin Lee, Rob Ross and a host of assistants illustrate a fun little action series just slightly left-field of the Marvel Universe. Fun for the non-purists.~WW

AGENTS OF LAW

Dark Horse: *6 issues 1995*

An unknown figure called Law arrives at the gates of Golden City carrying the corpse of its ruler Grace. Within weeks he's organised a coup, and Golden City is his. An excellent compact study in the acquisition and maintenance of power from plotter Keith Giffen, scripter Lovern Kindzierski and artists Dan Lawlis and Ian Akin. By focusing largely on the cold-blooded brutality of Law some events are related only in expository dialogue, and others given no explanation in a curtailed series. Additionally, the peremptory dismissal of previously essential Golden City characters with unfulfilled potential is a shame. Otherwise a fine title let down only by an abrupt resolution predicated by poor sales.~FP

AGONY ACRES
AA2: *5 issue miniseries 1996-1997*

A police investigation drama set in a near future when the major sport is Agony, a virtual reality game pitting combatants against each other in a variety of historical or fantasy scenarios. The sport is dirty, and as the conclusion to the championship draws near the leading challengers are all dying, leaving the way to the top open to a rookie. Ronn Stern's lead Jack Calhoun is a little too obviously based on Clint Eastwood's Dirty Harry, but his storytelling is good, and he and Charles Satterlee have turned out a well-constructed thriller.~WJ

AIDA-ZEE
Nate Butler Studios: *1 issue 1990*

This evangelical anthology boasts a contributor line-up including Murphy Anderson, Dick Ayers, Gaylord DuBois, Kerry Gammill, and Nestor Redondo. The set-up nature of several strips marks this as an attempt to introduce an ongoing title. There are proselytising teenagers in a tough neighbourhood, an old-style biblical warrior Bukki, and the most original story has Satan sending a civil war reprobate to the 20th century. Elsewhere there's a horror tale using alien abduction as an allegory for abortion, surely the only ever artistic pairing of Steve Lightle and Jay Disbrow, and Jesus returning as a space-man. Not as rabid as some Christian comics, but surely entertainment for the converted.~WJ

AIR FIGHTERS CLASSICS
Eclipse: *6 issues 1987-1989*

Facsimile reprints of the 1940s *Air Fighters Comics* (2-7), featuring such heroes as Airboy, Black Angel, Flying Dutchman et al. Invaluable for Golden Age buffs.~HS

AIR RAIDERS
Marvel: *5 issues 1988*

Insipid toy tie-in featuring – no doubt to his eternal shame – early work by later acclaimed artist Kelley Jones.~HS

AIR WARRIORS
Bad to the Bone: *Graphic Novel, 1 issue 1997*

An assemblage of fantasy clichés (chivalric politics, enchantresses, dragonriders) concerning an elite squad of airship pilots in what appears to be an alternate Earth. It's stitched together quite skilfully, and redeemed by Derek Gray's art, which, while very far from technically perfect, is curiously engaging.~HS

AIRBOY
Eclipse: *50 issues 1986-1989*

Tim Truman and Chuck Dixon's revival of the 1940s flyer was a fond homage that captured the spirit of fun and adventure of the original, who appeared in Hillman Periodicals' *Air Fighters Comics* during the 1940s. Colourful and flamboyant, Truman and Dixon's hero, the son of the original, faced a series of pulp-inspired foes including left-over Nazis, zombies and robots, with a supporting cast re-introduced from the 1940s. *Airboy* proved popular enough to spawn numerous spin-offs including a solo series for Valkyrie and The Airmaidens, several one-shots, team-ups and reprints. Back issues have never descended to bargain box prices, but are relatively cheap for the easy, satisfying read they deliver.~JC

AIRBOY One-shots
Eclipse: *Airboy And Mr Monster Special 1987, Airboy Meets The Prowler 1987, Airboy Vs The Airmaidens 1988*

The *Mr Monster* special continues the story begun in *Airboy* 28, teaming the two Eclipse characters and most of their supporting casts. What seemed like a bizarre pairing of the colourful, flamboyant Airboy and the more detective noir-influenced Prowler actually produced an entertaining tale in which the two second-generation heroes take time out from the action to reflect on what it means to live up to their 1940s legends. Especially useful for the complete Eclipse Airboy checklist contained in the back. For the final one-shot while under the influence of a brainwashing drug, Valkyrie and the Airmaidens assassinate a drug baron for a rival crimelord. Wondering what the hell his girlfriend's up to, Airboy follows her and – wait for it – her love for him snaps her out of it, where upon the lot of them whup the bad guys and live happily ever after. Actually, it's not (quite) as bad as it sounds.~JC

THE AIRMAIDENS
Eclipse: *One-shot 1987*

Yet another spin-off from the popular *Airboy* comic, the Airmaidens were essentially a team of superheroines led by Valkyrie, Airboy's reformed ex-Nazi girlfriend. Like *Airboy*, the comic was a lot of fun as the girls travelled round the world righting wrongs and generally enjoying themselves. This features the origin of La Lupina. Not the best of the spin-offs, but nonetheless worth picking up from the cheap boxes.~JC

AIRMAN
Malibu: *One-shot 1993*

The Hawkman-alike member of The Protectors has a pointless solo adventure continuing directly into issue 7 of the team title. Reads like a *Protectors* fill-in that was drawn too badly, so issued as a one-shot to flog it to a few 'must have number ones' diehards.~HS

AIRWAVES
Caliber: *5 issues 1991*

Sadly uncompleted story of a future where corporate power and government are synonymous and the masses are kept docile by pabulum fed through radio programming. Michael Lark's art brings Ted McKeever to mind, and although an expansive use of space restricts the plot it's intriguing enough to investigate.~FP

AKA GOLDFISH
Caliber: *5 issue miniseries 1995-1996**

Brian Michael Bendis creates a powerful crime noir story as small time con artist David Gold, 'Goldfish', comes home after ten years. Nothing is the same; his old point man Izzy is now a cop, and ex-girlfriend Lauren Bacall is now the most powerful and ruthless criminal in the city, which she rules from her nightclub, Cinderella. An ugly coterie of gangsters and power hungry city officials fill the background, all jockeying for position. As the players advance their own agendas, each exploiting friend and foe alike, it is impossible to guess who, if any will survive the inevitable final confrontation. It's a dark, ruthless tale with no heroes, and Bendis manages to blend staccato action with moments of slow, choking tension. Excellent stuff, well worth seeking out.~WW

Recommended: 1-5

AKIKO On The Planet Smoo
Sirius: *One-shot 1995, 40 issues + 1995 to date*

Glorious story for children of all ages as little Akiko journeys to the fabulous planet Smoo where she has adventures with a cast of characters as memorable as any from *Little Nemo* or the *Oz* stories. Mark Crilley crafts genuine 'sense of wonder' tales where the evil villains are not all that bad and the dauntless companions aren't particularly competent, all the while stage-managing enough gratuitous violence to keep even the most hardened toddler happy. The world abounds with cool robots, one-legged rogues, princes and professors, and some of the best-drawn hideous monsters you could ever hope not to see. Thoroughly enjoyable. Issues to 31 are now collected over five paperbacks, with 'Flights of Fantasy' collecting the back-ups.~WW

* Available in a collected edition

Recommended: One-shot, 1-24, 31-33

AKIRA

Marvel/Epic: *38 issue limited series 1988-1995**

The first thing to make clear about *Akira* is that it's important to the history of comics. It was a huge success in Japan when it first appeared, helping *Young Magazine* achieve a circulation of a million (bi-weekly!). It spawned a state of the art animated movie that broke into the English-speaking mainstream, and created a large market for Japanese animation in the West. Visually, Katsuhiro Otomo set standards and started trends that have had vast repercussions for Japanese comics and then, in turn, for US and European comics. If the current popularity of Manga in the West can't be laid entirely at Otomo's door he has certainly played the most important role in popularising them. *Akira* is his magnum opus.

Akira is set in Neo-Tokyo, 2030AD, a world recovering from World War III. Kaneda and Tetsuo are school friends forever getting into trouble on their motorbikes. While Kay and Ryu, members of an underground resistance organisation, try to rescue an escaped paranormal, child- like figure from the military, Tetsuo is captured by them. They discover he's a latent psychic himself, and when he escapes starts exhibiting dangerous powers and needs large amounts of drugs to stay sane. The military have been looking for a way of controlling Akira, potentially the most powerful psychic of all, who has been imprisoned since birth. When Tetsuo frees Akira a laser canon is fired at them and the city is devastated by the force of Akira's mental response.

Tetsuo and Akira create the Great Tokyo Empire, healing and organising the survivors of Akira's blast. As Tetsuo relives his past and tries to find more psychics, the religious leader Lady Miyako tries to hold together what remains of the resistance with the help of her own psychics and Kay. The Western powers eventually take an interest in what's happening in Japan, sending an assassination squad against Akira and using biochemical weapons. Then things get really weird. After destroying part of the moon, Tetsuo's arm begins to mutate. In the final chapters Akira consumes Tetsuo and then seemingly himself, as Otomo hammers out his message about the necessity for humankind to evolve.

Though action-packed, the strip staggers forward, sometimes lacking a sense of direction, and characters disappear and re-appear later with no explanation. Otomo seemed to have abandoned *Akira* at one point, there was such a wait before it was completed, and maybe this accounts for the disappointing conclusion. Though the artwork remains of high quality, there is a real sense of retreading old ground towards the end and the metaphysical nonsense of the final revelations sours the memory of the previous issues. With a detailed and labyrinthine plot, the huge scope of Akira warrants attention but it's not always all it's cracked up to be.~NF

Recommended: 1-12

ALADDIN

Disney: *One-shot 1992, 2 issue microseries 1993*

The one-shot is a good (condensed) adaptation of the excellent movie, with artist Xavi's cartooning delightful. The microseries is an original story with an illogical plot by John Blair Moore drawn by the anonymous artists of the Jaime Diaz studio. There is some entertainment value to be had, but it falls well short of the real thing.~WJ

Recommended: One-shot

Disney's ALADDIN

Marvel: *11 issues 1994-1995*

Pencilled by David Riguard (1-6) and Eduardo Savid (7-11), assorted writers produce reasonable stories. Any will entertain children, but adults having to read them repeatedly will best appreciate 2 about an ancient curse, 11's magic carpet race, both written by Dan Slott, and Buzz Dixon's 8, in which Aladdin and Jasmine exchange bodies.~FP

ALARMING ADVENTURES

Harvey: *3 issues 1961-1962*

This title sported intelligent stories by editor Joe Simon and a débuting Archie Goodwin among others with artists of the calibre of Baily, Crandall, Powell and Williamson adding a touch of class to the package. Sadly Simon's efforts to reprise the quality achieved in 1950s science fiction anthologies seemed ill-advised at a time when everyone else was shutting down science fiction titles or converting them to superhero venues.~SW

ALBEDO

Thoughts & Images: *15 issues (0-14) 1984-1989*

Antarctic: *10 issues 1991-1993, Series two 4 issues 1994, series three 1 issue 1996*

Albedo was originally a science fiction anthology, primarily featuring anthropomorphic characters. Steve Gallacci's 'Erma Felma EDF' became the mainstay and raison d'etre, a complex, hard-science tale concerning the Extraplanetary Defense Force, which concentrates on the social and political aspects of policing, largely eschewing scenes of conflict. The 'Erma Felma' stories from 1-14 and the first two issues of the Antarctic series are reprinted in four issues of *Command Review* and a 1993 colour special reprints the first story. Stan Sakai's Usagi Yojimbo made his first appearance here (2-4), as did Matt Howarth and D.M. Kister's 'Konny And Czu' (6-14), a humour strip about interplanetary trading featuring aliens who actually look and behave like alternate life forms. Both have since appeared in their own titles. Albedo is an ambitious project, but the wordiness of much of the content often gives the impression of an illustrated story, and with only one issue since 1996, it looks as though the series may never be completed..~NF

ALEC

Escape: *3 issues 1984-1986*

Acme/Eclipse: *1 volume 1990*

Eddie Campbell Comics: *1 volume (After the Snooter) 2002*

Before embarking on *Bacchus*, Eddie Campbell was exploring similar themes of drink and companionship in self-published stories. In the early 1980s Essex, his thinly disguised alter ego Alec MacGarry socialised in the King Canute pub, into which wander sooner or later a rich collection of friends and acquaintances, most notably van driver, pub philosopher and all-round good egg Danny Grey. Warm and knowing, Campbell tells his stories in the manner of a pub raconteur, rolling around the houses before getting to the point, which is by no means a complaint. Anecdotes in the first issue relate to those in the third, which in turn will have connections to those in the second, so don't expect a linear narrative. MacGarry/Campbell makes a good observer of life, constantly puzzled by people, continually unable to grasp his opportunities, and always reactive rather than proactive.

Campbell's artwork is as understated as his stories, sketchy characters and backgrounds with endearingly appended patches of letratone. Even at this early stage, though, Campbell's storytelling is excellent, particularly in knowing when to leave a pause for emphasis. Anyone who's enjoyed an active social life ought to be able to see aspects of their friends mythologised by Campbell. A typical story, this from the second issue, has MacGarry and friends awakening on the pub floor after a heavy night, clearing up, being fed breakfast by the landlady, then returning to the bar as the lunchtime crowd arrives and attempting to name the fifty states of the USA between them. It's a recollection, not a plot, but its strength lies in prompting similar recollections and a consequent warm glow in the reader. If it all seems like a pile of self-indulgent wank, then *Alec* is not the comic for you.

A collection titled *The Complete Alec*, later republished by Campbell as *Alec*: 'The King Canute Crowd', presents material intended for an unpublished fourth issue. It's therefore, a more desirable (and easily obtained) purchase than the individual volumes. *After The Snooter* collects shorter, more recent autobiographical strips by Campbell, now married with children and living in Queensland. There are also longer strips dealing with founding his own publishing company, touring the world to promote his comics, and how strange it is to deal with Hollywood over *From Hell*. The expected grace, charm and mixture of awkward ego and self-deprecation is present and correct, and just how well the younger Campbell did his job in the past is realised by the strips chronicling a visit to a now much older Danny Grey. His alias now stripped away, we didn't know we cared so much.~FP

Recommended: After the Snooter, 'The King Canute Crowd'

ALEX

Fantagraphics: *6 issue miniseries 1994-1995*

Alex Kalienka, a dog-headed bunny cartoonist, who briefly worked for Mickey Walt Studios, has returned to his hometown of Bandini. Still dreaming of escape and love, he's downhearted and often drunk. He has no real social life apart from his friend Jerome, who calls around to watch Gilligan's Island with him, accidental meetings with his neighbour when he's thrown something out of the house, and strange conversations with an old teacher, when they meet in the liquor aisle of the supermarket. Mark Kalesniko's simple, sketchy artwork complements his themes well, though he offers no explanations or easy answers, and despite the black humour this is not an upbeat series.~NF

Nightwing ALFRED'S RETURN

DC: *One-shot 1995*

After the events of 'Knightfall', Alfred has moved to London, where he's been convinced by an old flame that he has a son who's in trouble and needs help. When Nightwing turns up to ask Alfred to return to Gotham, they are both involved in an attempted coup against the British government. The plot's daft but the background on Alfred's past is well handled. Alan Grant and Dick Giordano provide adequate, if uninspired script and pencils.~NF

ALIAS:

Now: *5 issues 1990*

Ponderous and rambling story of a serial killer/hitman with a coldly efficient manner and a gift for disguise. Alias picks up contract after contract as the fumblingly obsessive FBI agent Neal Mathis finds himself outclassed again and again. Chuck Dixon, Todd Fox and Enrique Villagran fail to impress in this soporific would-be thriller. The title changes each issue encompassing the identity adopted by our man.~WW

ALIAS

Max: *15 issues + 2001 to date*

Jessica Jones is a New York private investigator with an unusual past: she used to be an Avenger named Jewel. It goes without saying that no such character existed before this series. This series works as a street-level complement to writer Brian Michael Bendis' revamps of the Marvel universe in *Ultimate Marvel Team-Up*. Jessica "doesn't do the superhero thing anymore", but her investigations still tend to involve many second-string Marvel characters – Luke Cage, Carol Danvers, Man Mountain Marko, Clay Quartermain, J. Jonah Jameson, Rick Jones and Scott Lang. 1-5* involves Jessica witnessing a murder that appears to implicate Captain America. The problems she has getting in touch with The Avengers and The Fantastic Four as a member of the public (in 2 and 8 respectively) are hilarious. In 11-14 she drives out to smalltown Lago on a missing persons inquiry that stirs up some unpleasant prejudices and allows cover artist David Mack to construct some pages in the style of a collaged diary of sorts.

Bendis floats his dialogue strings over Michael Gaydos' cleverly constructed pages where the repeated panel is allowed to become a virtue. 10 is a little hard to follow – the typeset dialogue refusing to separate from the painted artwork. Overall a steady, non-super pace is maintained, but the creative team wring such excellent performances out of the characters that it's hardly noticeable. Prior knowledge of Marvel since the 1960s makes this title even more of a delight given Bendis' propensity for in-jokes. There's adult subject matter and language but it's in the interests of giving the dialogue-driven stories an informal, understated feel as well as emotional currency. An excellent read. 1-9 are colleted.~SW

ALICE COOPER – THE LAST TEMPTATION

Marvel: *3 issue miniseries 1994**

Writer Neil Gaiman's almost unblemished streak of quality comics came crashing to an end with this half-baked nonsense. Apparently developed as both album and comic, *The Last Temptation* is sorely lacking as the latter. It's the all too common seduction of the innocent scenario with Alice playing the role of a manipulative and theatrical tempter. In a world of AIDS and school massacres Alice poses the threat of a gerbil, and if souls or coins of the realm are to be redeemed it should be for the consistently excellent art of Michael Zulli.~FP

ALIEN ENCOUNTERS

Eclipse: *14 issues 1985-1987*

Mixing humorous and twist-in-the-tail plots, this science-fiction anthology suffered from the predictability of its stories, and with little space to develop characters it was largely artwork that carried the series. Worth seeking out are Micheluzzi (3, 8), Tim Truman (4), David Lloyd (5), Richard Corben (5), Rick Geary (7), John Bolton (9) and Gray Morrow (10). Later issues tended to use fewer established artists and writers though the overall quality of the strips remained consistent. Sometimes attacked for including unnecessary nude scenes, *Alien Encounters* did largely manage to avoid gratuitous sex and violence.~NF

ALIEN FIRE

Kitchen Sink: *3 issues 1987, one-shot ('Pass in Thunder') 1995*

In the near future Earth has been devastated by nuclear war, but *Alien Fire* is not a dystopian story, it's about the legacy of Earth and a few humans living among alien races. Ed's a crew member aboard the Wooden Bird, which trades in antiques from Earth – jukeboxes, books, anything that survived. When Chia X Hong, a Vietnamese businesswoman, accidentally comes into possession of an ancient artefact, made in Japan, sold in a gumball machine, an item regarded with horror by the Hive Nations, a mystery starts to unravel that threatens the peace on Leyden Frost, the artificial world on which she lives. There's much more going on than this can begin to explain. Writer Anthony F. Smith and artist Eric Vincent have created a wonderfully rich future, populated by imaginatively conceived and designed aliens, reflecting the thought that has clearly gone into the series. It is really unfortunate that *Alien Fire* has never been finished. 'Pass In Thunder' reprints stories from *Dark Horse Presents* and *Plastron Café*, dealing respectively with Ed trying to trade a convertible and an alien's passage through Ed's mind.~NF

ALIEN LEGION

Marvel/Epic: *Series one 20 issues 1984-1987, series two 18 issues 1987-1990*, 3 issue miniseries ('On the Edge') 1990-1991, 2 issue microseries ('Tenants of Hell'), 2 issue microseries ('Grimrod') 1992, one-shot ('Binary Deep') 1993*

Alien Legion was basically Epic's attempt at straight science fiction. In 'a future age', the TGU is an alliance of three galaxies devoted to achieving and maintaining peace. The Alien Legion is the Foreign Legion idea spread onto a galactic stage: soldiers of fortune getting the dog end of the jobs with no questions asked. The first issue opened on eight pages of handbookesque text info. It's hardly the best way to immediately snare the reader's attention, especially when it's leading into a fairly clichéd and none too original Marvel-style intra-group bickering and 'oh this terrible war' angst. Early issues read as a fast-track immersion course in the Alien Legion's universe, deluging the reader with alien glossaries and text explanations, which could have been introduced more slowly, and less confusingly, in the stories themselves. Back-up stories about the characters' pasts were more entertaining than the main event, and perhaps writer Carl Potts just needed tighter editing to have made what wasn't a bad idea more palatable. The series improves when there's no more info to be dumped on you by the truckload and you can just settle down to reading the story. Checker have just republished the entire second series in two paperbacks.

Following the regular series, the characters were kept in print through miniseries and one-shots. Of these, *Grimrod*, written by Chuck Dixon with innovative art by Mike McMahon, is the best, achieving the sense of alien weirdness so often striven for and so seldom obtained. Legionnaire Grimrod sets off for what he thinks is going to be an easy job on a paradise planet, only to find that he's made a terrible mistake. If you sample any *Alien Legion* make this the one and forget the rest. Assorted issues from the first series are collected, and Checker are now collecting the entire run chronologically.~JC.

ALIEN NATION

Adventure: *4 issue miniseries ('The Spartans') 1990*, 4 issue miniseries ('A Breed Apart') 1990-1991, 4 issue miniseries ('The Skin Trade') 1991, 4 issue miniseries ('The Firstcomers') 1991, 4 issue miniseries ('Public Enemy') 1992, one-shot ('The Lost Episode') 1992*

After DC's release of a straight-faced unexciting movie adaptation, rights went to Adventure who produced a series of mini-series featuring new stories set in the continuity of the TV show. 'The Spartans' proved unexpectedly successful, to the point that it generated several variants of its first issue (four different colour covers, a gold limited, an embossed with additional art and a regular second printing). None of the hoo-hah could conceal the stories were done with more fannish enthusiasm than skill and interest rapidly died away. 'The Lost Episode' one-shot wraps up all dangling plotlines from the TV show.~HS

ALIEN WORLDS

Pacific: *7 issues, 1 Special 1982-1984*
Eclipse: *2 issues (8-9) 1984*

An attempt to revive the quality of EC science fiction comics was a laudable editorial decision, and an opening tale from Al Williamson in 1 reinforced the intent. Sadly, it was an experiment that largely failed. Bruce Jones wrote almost all the material, varying wildly in quality, but instead of enforcing a unity through a stable of regular artistic contributors, the net was stretched far and wide, with only Bo Hampton and Al Williamson drawing more than two stories. The sex and nudity permissible in 1980s comics is largely gratuitous and juvenile, and thirty years after EC too many stories still hinged on the last-panel shock ending. Two better twist-in-the-tail shorts appear in 8, Ken Steacy drawing a story based on *Mars Attacks* bubblegum cards and Al Williamson adapting a wistful William Nolan tale. Other notable contributions amid the rough are the Tim Conrad illustrated 'Talk To Tedi', which pulls on the heartstrings in 1, some fine John Bolton art in 5, and Bo Hampton's 'The Maiden And The Dragon' in the final issue. Dave Stevens is in 2 and 4, 4 being a particularly good issue for artists, with Bo Hampton, Jeff Jones, Ken Steacy and Al Williamson all on hand. The latter's contribution is a vintage piece, actually completed in the 1950s, while the Roy Krenkel story in 6 is his last work. Having published the work inherited from Pacific, Eclipse chose to start anew with the similar *Alien Encounters*.~WJ

ALIENS

Heavy Metal/Futura: *Graphic Novel 1979*
Dark Horse: *6 issue miniseries 1988-1989*, 4 issue miniseries ('Aliens II') 1989-1990*, 4 issue miniseries ('Earth War') 1990*, 4 issue miniseries ('Hive') 1992*, 4 issue miniseries ('Genocide') 1992*, 3 issue miniseries ('Aliens III') 1992*, 2 issue microseries ('Newt's Tale') 1992, one-shot ('Tribes') 1992, 4 issue miniseries ('Rogue') 1993*, one-shot ('Sacrifice') 1993*, one-shot ('Salvation') 1993*, 4 issue miniseries ('Labyrinth') 1993-1994*, 10 issue limited series ('Colonial Marines') 1993-1994, 4 issue miniseries ('Stronghold) 1994*, one-shot ('Earth Angel') 1994, 4 issue miniseries ('Music of the Spears') 1994, one-shot ('Mondo Pest') 1995, 6 issue miniseries ('Berserkers') 1995, one-shot ('Mondo Heat') 1996, one-shot ('Lovesick') 1997, one-shot ('Pig') 1997, 1 Special 1997, 2 issue microseries ('Havoc') 1997, 3 issue miniseries ('Alchemy') 1997, 3 issue miniseries ('Kidnapped') 1997-1998*, one-shot ('Glass Corridor') 1998, one-shot ('Stalker') 1998, one-shot ('Wraith') 1998, 3 issue miniseries ('Survival') 1998, 4 issue miniseries ('Apocalypse – The Destroying Angels') 1999*, 4 issue miniseries ('Xenogenesis') 1999*

A huge success, the Aliens have not always inspired noteworthy comics despite many notable writers and numerous approaches to the central idea up to and including comedy aliens. Artists have done better. Fans of Sam Kieth, Kelley Jones, Mike Mignola, Richard Corben or Kevin Nowlan will not be disappointed by their bits of this extended epic.

Aliens, *Aliens II* and 'Earth War' all feature Hicks and Newt from the films (Ripley turns up in 'Earth War') battling on the alien home world and then on Earth. Mark Verheiden writes in competent fashion, concentrating on the madness of corporate greed and the relationship between the three combatants. Artwork by Mark Nelson, Denis Beauvais and Kieth respectively is diverting. Kieth pays homage to EC science fiction but he's not yet fully developed his own skills. Beauvais' painted artwork suffers from over-colouring and, like Nelson, a stiffness of composition. Later collections have changed the names of the characters.

'Hive' is a change of pace. Written by Jerry Prosser, it concerns a bizarre plan to use a robotic alien to steal the Alien queen's royal jelly, "the most sought after consciousness-altering substance in existence". It's drawn by Kelley Jones, who does great aliens but weak faces. 'Newt's Tale' retells the *Aliens* screenplay from her point of view, lacking the atmosphere or pace of the film. 'Genocide' concerns an expedition to steal royal jelly to synthesise, but there's no passion to the story. Also lacking zip, although much admired, is 'Tribes', a graphic novel written by Stephen Bissette with static art from Dave Dorman. 'Salvation', by contrast, has gorgeous artwork by Mignola and Nowlan, and a punchy Dave Gibbons script. Another series with beautifully rendered artwork is 'Apocalypse' by Mark Schultz and Doug Wheatley. Tying in to the original film, the aliens are believed to be universal cleansers, ensuring that no race reaches too far into space. Schultz draws on the films and on other horror themes to produce an atmospheric, thrilling tale.

Schultz also writes 'Havoc', again dealing with royal jelly and a ship full of aliens engineered for psychic abilities. The novelty is in having each page drawn by a different artist, from Peter Bagge, Sergio Aragonés and Dave Cooper to Moebius, P. Craig Russell, Art Adams and Travis Charest. 'Survival', by James Vance and Guy Davis is a good tale about the Company sacrificing colonists in an attempt to find a way to inoculate humans against alien infection. It might have worked better with more realistic artwork. 'Rogue', by Ian Edginton and Will Simpson, and 'Sacrifice', by Pete Milligan and Paul Johnson, both reprint stories produced for the UK.

'Colonial Marines' marks a change of emphasis, concentrating on troopers sent into battle against the aliens. Also different is 'Labyrinth', the most chilling and intelligent Aliens story to date, written by Jim Woodring.

A scientist survives for six weeks as a captive of diseased aliens and then dedicates his life to experimenting on them for the government. The Labyrinth refers to the tests he puts the aliens and an enquiring soldier through. The artwork by Kilian Plunkett bears comparison with Art Adams and is clearly also indebted to Moebius, which is no bad thing for this tale of clinical horror. 'Xenogenesis' introduces a strikeforce attempting to clean up an alien infestation. It's something of a return to the themes of the first films with concerns for team-mates and the machinations of the Company.

The Special features two short stories, from Darko Macan and Frank Teran in which a marine dreams of an encounter with the aliens and from Nancy A. Collins and Leif Jones in which a colony of religious fanatics decide to become one with the alien. Further diverging from the basic premise, 'Alchemy', by John Arcudi and Richard Corben, describes a small planetary community struggling with progress, suddenly beset by an alien. In 'Kidnapped', Woodring and Justin Green with F. Solano Lopez produce a twisted and grim story about the dangers of trafficking in alien eggs infected with serious diseases. David Lloyd's 'Glass Corridor' concerns stowaways on a spaceship and one man's coming to terms with past mistakes. Jay Stephens and Eduardo Risso tell a tale of teenagers confronting an old alien near their campsite in 'Wraith'.

Several Aliens series experiment with the established scenario. David Wenzel pits Vikings against aliens in 'Stalker', John Byrne' sets 'Earth Angel' in the 1950s, while 'Music Of The Spears' is an oddity in which an alien is trained to produce the right sounds to perform a symphony. What were C. Williamson and T. Hamilton on when they thought of that? 'Stronghold' by Arcudi and Doug Mahnke, featuring a cigar-smoking alien and 'Pig' by Chuck Dixon and Flint Henry in which a bomb-rigged pig is used as a lure, are attempts at a funny Aliens story. None of them are outstanding, except for their quirks. Unfortunately 'Berserkers' is equally forgettable, as is 'Mondo Pest', reprinting the story from *Dark Horse Comics* 22-24, and 'Mondo Heat', but none are as avoidable as the adaptation of *Aliens* 3.

People who liked the films should seek out the 1979 adaptation of the original by Archie Goodwin and Walt Simonson, two creators who know something about creating a tense atmosphere. There are few moments in the entire Dark Horse *Aliens* series that better it. Almost every *Aliens* miniseries is available as a collection.~NF

Recommended: Alien graphic novel, 'Labyrinth' 1-4, 'Apocalypse – The Destroying Angels' 1-4

ALIENS vs. PREDATOR

Dark Horse: *5 issue miniseries (0-4) 1990*, 12 issue limited series ('The Deadliest of the Species') 1993-1995*, 2 issue microseries ('Duel') 1995, one-shot ('War') 1995, 4 issue miniseries ('War') 1995*, one-shot ('Booty') 1996, 4 issue miniseries ('Eternal') 1998*, 4 issue miniseries ('Xenogenesis') 1999-2000, 1 Annual 1999, 4 issue miniseries (Aliens vs Predator vs Terminator) 2000**

Dark Horse's decision to pair their two successful licensed properties was another canny commercial move and the results are mostly entertaining. The first series has the Predators seeding a planet with Aliens intending to return and hunt them later. Randy Stradley's script creates a sassy heroine in Machiko and it's her story that draws you in. The collection includes the prequels from *Dark Horse Comics* (also collected as issue zero) and the short sequel from the *Dark Horse Presents Fifth* Anniversary Special.

'Deadliest Of The Species' is an ambitious thriller in which Chris Claremont pulls out all the stops with a story featuring his trademarks, strong women and physical transformation, as Aliens, Predators and humans fight for survival against a common foe. Mostly drawn by Eduardo Barreto, after the initial issues by Jackson Guice (1-3), the script calls for switches between genres and gives him plenty of room to display his skill. 'Duel' is a clichéd tale of humans and Predators overcoming their differences against an Alien/Predator hybrid. The 'War' one-shot collects the strip originally published in Dark Horse's publicity zine, *The Insider*. 'War', the miniseries returns Machiko, initially working with the Predators but ultimately having to choose between their code of honour and the lives of the humans. The artwork by Mark Heike and Ricardo Villagran makes this an enjoyable. 'Booty' is a straightforward adventure in which a cargo ship becomes the scene for a battle between Predators and Aliens. 'Eternal' is less about Aliens and Predators than *X-Files*-type conspiracies producing an effective, downbeat tale. Charlie and Elliot are duped into breaking into a company working with Alien genetic material in 'Xenogenesis'. Again, the aliens are secondary to the human plot, but Andi Watson's protagonists are smart and likeable.

The Annual contains five short stories. The first three all offer female protagonists trying to survive amongst the aliens, but the perspective of each is sufficiently different to keep reader interest. Mark Schultz explores the pressures of Predator society (drawn by Tom Biondolillo) and Alex Maleev gives the legend of Saint George an alien twist. Schultz returns for 'Aliens versus Predator versus The Terminator', reuniting Ripley and Annalee Call from *Alien: Resurrection*. Call has heard about more military tampering with aliens, but both are unprepared for a Terminator/Alien hybrid that wants to rebuild Skynet. Schultz just about pulls off the crossover, allocating reasonable plot-time to each of the franchises.

After the Annual, 'Deadliest of the Species' comes closest to making the series interesting rather than just an enjoyable series of bloodthirsty romps and is almost worth recommending on the strength of the artwork.~NF

Recommended: Annual

ALISON DARE

Oni Press: *One-shot ('Little Miss Adventures') 2000, 3 issue miniseries ('The Return of Alison Dare, Little Miss Adventures') 2001*, 2 issue microseries ('and the Heart of the Maiden') 2002*

Alison is the child of an archaeologist/adventurer and her superhero husband The Blue Scarab, and the niece of an international super-spy for good measure. Living a 'normal' life at the St. Joan of Arc Academy for Girls, Alison drags her friends, Wendy and Dot, into dangerous situations at every opportunity, including meeting a genie and Baron von Baron, intent on world domination. The story of how her parents met and her father received his powers is told 'The Return' 2, and, in the latest series, the school is invaded by ninjas and neo-nazis, all seeking the mysterious Heart of the Maiden. J. Torres is clearly aiming at a young audience, but his script is funny and clever enough to entertain older readers. J. Bone's artwork is cartoony, perhaps too blocky and simplistic, but has loosened up a little for 'Heart of the Maiden'.~NF

ALL ACCESS

DC/Marvel: *4 issue miniseries 1996-1997**

The character Access is jointly owned by DC and Marvel, and first appeared during their 1996 crossover. His job is to maintain the separate status of the DC and Marvel worlds by ensuring there are no rifts in reality. Of course, without them there's no story, so when Venom turns up on DC Earth Spider-Man is brought across to help Superman battle him. Other teamings include a reprise meeting for young loverhearts Jubilee and Robin, and Batman meeting Doctor Strange, who has an idea of what's going on. The final issue features a tiff between the X-Men and the JLA, during which the characters merge for a short time in some interesting combinations. All in all it's some nice hokum that passes the time, but is nothing to be taken too seriously.~HY

ALL-AMERICAN COMICS

DC/All-American: *102 issues 1939-1948*

Like the majority of 1930s anthology comics, *All-American* began life with features that were either recycled newspaper strips such as Mutt & Jeff, or new material designed to look like a strip reprint. It was thought readers wouldn't warm up to a feature unless it had been 'proved' by a newspaper placement! In addition to Mutt & Jeff, who managed to endure until 101 in the majority of issues, *All-American* featured largely forgettable humour and light adventure fare. The only notable or enduring series were aviator Hop Harrigan and Sheldon Mayer's boy cartoonist Scribbly, star of his own fifteen issue series from 1948 to 1952, and progenitor of the Red Tornado, of whom more later. Harrigan enjoyed an astonishing success throughout the 1940's, lasting until 99 and starring in a radio show and movie serial. The way ahead was indicated by Ultra-Man, who debuted in 8. While a Flash-Gordonesque future champion rather than a superhero, the brightly-costumed Gary Concord's short-lived series (ending in 19) paved the way for more fantastic adventurers, and established the dominant theme for most of the decade.

In 16, Green Lantern made his first appearance. Engineer Alan Scott discovers an ancient mystic lantern, which flares with an emerald light, granting him immense power. Naming himself for this talisman, he arrays himself in a largely red & purple costume (he's heroic, but nobody said he had any colour sense...) to battle the dark forces. The vitality of the concept, as created by Martin Nodell, outweighed the rather pedestrian art, also by Nodell, later by Paul Reinman, Martin Naydel and Irwin Hasen. It captured the public imagination, establishing GL as the title's unquestioned star, and granting him a popularity that resulted in his own 38 issue series from 1941 to 1949, collected in *Golden Age Green Lantern Archives*. For most of the 1940s, Green Lantern succeeded despite its illustrators; although some stories were very imaginative, (especially the introduction of the undead Solomon Grundy in 61 in 1944) the majority were marred by illustrations more suited to a humour series. This tendency was exacerbated by the introduction of comedy sidekick, Brooklyn cabbie Doiby Dickles, in 27. Circa 1947, Hasen's art dramatically improved and Carmine Infantino and Alex Toth, took over several instalments. Suddenly, the series had the graceful and dynamic art it always should have possessed, and during this period that two of our hero's most notable enemies made their first appearances. The Icicle (90) was a cryogenic foe with surprising longevity, and the Harlequin (89), a female felon who was secretly a good guy, attacking the villainous community from within, and who was also, of course, in love with Green Lantern. Both proved popular with readers, but the Harlequin in particular, making six repeat appearances in the last fourteen issues and being prominently cover-featured, was a latter-day hit, and, had the tide not turned against superheroes, may well have been spun off into her own series.

Green Lantern was *All American*'s unchallenged star, but several long-lived and popular series backed him up. In 20 Scribbly introduced the Red Tornado, a.k.a. Ma Hunkle, Scribbly's burly landlady, who pulled on a pair of long johns and a stewpot helmet to become DC's first super-heroine, albeit one not to be taken entirely seriously. Scribbly and the Red Tornado shared the strip until it was dropped with 59. The Atom (from 19) was diminutive student Al Pratt, who compensated for his lack of height with a power-packed physique. Clearly possessing 'issues', he donned leather shorts, a cape and a full-face mask and ran around at night beating up the tallest crooks he could find. This slender concept presumably appealed to 'vertically-challenged' readers, as he enjoyed a surprisingly long run until 72, then transferred to *Flash Comics*. Dr. Mid-Nite (25-102) was, for a change, an actual M.D., Charles McNider, who was blinded in a criminal attack. He discovered he could see in the dark, but needed special lenses to function in normal light, so stocked up on 'blackout bombs', and set out to 'cure' his city of crime. Sargon the Sorceror (26-76, not every issue) possessed the 'Ruby of Life', an enchanted heirloom that gave him control over everything he touched. Illustrated primarily by Paul Reinman, his adventures, particularly against his female nemesis the Blue Lama, were a cut above the usual Mandrake-imitator. Even Hop Harrigan slid into super-tights for a handful of issues as the Guardian Angel (25-28) before deciding that it wasn't really him. A rare non-superheroic entry in was the Black Pirate (72-102), a saga of a corsair and his son who swashed their buckles together on the Spanish Main, imported from *Sensation Comics* and clearly modelled on the popular Flynn/Fairbanks movie thrillers.

By 1948, waning sales on all the superhero titles prompted DC editors to try different genres. In 100 Johnny Thunder made his first appearance. No relation to the earlier JSA member, this Johnny Thunder was a western sheriff, and signalled the end of the comic as readers had known it. With 103, Green Lantern, Dr. Nid-Nite, Black Pirate and co. were rudely despatched, and the title continued for a further three years as *All-American Western*, before being again refurbished as *All-American Men of War*.~HS

ALL-AMERICAN MEN OF WAR

DC: *118 issues (127, 128, 2-117) 1952-1966*

This rose from the ashes of *All American Western*, hence the unusual numbering. As with other DC war titles, unconnected short stories are the order of the day throughout the 1950s. Almost from the start the title favoured editor Robert Kanigher's stable of top-flight artists, with plenty of work from Russ Heath, Joe Kubert, Jerry Grandenetti, Irv Novick and the team of Ross Andru and Mike Esposito. The first year saw notable additional art contributions from Bernie Krigstein (2, 3, 5) and Gene Colan (3, 4, 6-8), while a little later Wally Wood (29, 30), John Severin (58) and Bill Everett (77) all left their mark. Mort Drucker is worthy of a special mention for his exceptional combination of realism, grit and narrative, and his work can be found in 47, 48, 52, 58, 61, 63, 68, 69, 71, 73, 74 and 77. Kanigher wrote most stories, although the likes of Dave Wood, Bob Haney and Bill Finger also made significant contributions. The archetypal 1950s story would use a gimmick or theme of some sort, most infamously in 41's '50-50 War' by Kanigher and Kubert, where a soldier who can't walk teams with one who can't see. The era's best tale, though, was 'Toy Jet' in 78 by Haney and Heath. Atypically set in Korea, it concerned an escape from a prisoner-of-war camp, and was surprisingly convincing. As a rule, almost any issue to 80 will contain at least one good story and some lovely artwork.

Early attempts at series with Gunner And Sarge (67, 68, then quickly transferred to *Our Fighting Forces*) and 'Tank Killer' (69, 71, 72, 76) foundered, but led to the long-lived Kanigher and Novick strip 'Johnny Cloud'. The eponymous hero was a Mustang-flying pilot who also happened to be a Native American – 'the Navajo Ace' as the title had it. The writing continually drew parallels between the character's military endeavours and native customs and beliefs, even to the extent that Cloud would habitually thank his "brother in the sky", an actual cloud conveniently shaped like a horse-riding brave! Cloud himself was a grim, uncharismatic character, and the strip's most outstanding feature was Novick's stylish art.

One final strip was introduced in the comic's death throes, 'Lt Savage... The Balloon Buster', a World War I aviation strip that was very much conceived as a counterpoint to the German Enemy Ace. Savage was a sharpshooter very much given to saying "I'm th'gun" (yes, it was written by Kanigher), and something of a rebel. The strip's brief run in 112-114 and 116 never really gave it time to (ahem) take off, but Russ Heath's art, particularly on 116, was glorious.~DAR

Recommended: 2, 3, 5, 78, **112-114, 116**

ALL-AMERICAN WESTERN

DC: *24 issues (103-126) 1948-1952*

Continuing the numbering from *All American Comics*, which effectively became a western title with its last issues, much of the appeal lies in the artwork of Alex Toth. He supplied some wonderful covers (103-107, 109-114, 117, 121, 122, 125, 126) and also drew the lead strip, Johnny Thunder, written by Robert Kanigher. Johnny lives a double life as a timid schoolteacher who disguises his appearance to help his sheriff father. Overland Coach (unusual in having a female lead), Minstrel Maverick (a guitar-plucking wanderer) and Foley of the Fighting 5th (cavalry versus Indians) are in each issue (with Minstrel Maverick missing from 123). The writers on the first two of these strips are unknown, though the artists are easier to identify. Overland Coach's include Irwin Hasen (103-106, 109), Gil Kane (107-108, 114-115, 117-119, 121-126) and Frank Giacoia (110-111, 113). Minstrel Maverick was usually drawn by Irwin Hasen. Amongst the known writers on Foley of the Fighting 5th, are Lee Goldsmith, John Broome and David V. Reed whilst the artwork was by Joe Kubert (103-116), Frank Giacoia (117, 126) and Carmine Infantino (118-125). Apart from the regular strips, issues often carried another short story until the page count dropped to thirty-six with 122. These included a number of 'Epics of the Texas Rangers' (109, 110, 112-116, 118-121). Johnny Thunder is always entertaining and with the bonus of Toth artwork, is pretty much compulsory reading. The other features can't match this combination, but there's plenty of compensation in the form of Kubert, Kane and Infantino artwork.~NF

ALL HALLOWS EVE

Innovation: *One-shot 1991*

Charmless retelling of the "legends and origins" surrounding America's favourite holiday. Michael Perkins and painter John Lang provide the ghoulies and goblins but don't expect any chills or thrills.~WW

ALL-OUT WAR

DC: *6 issues 1979-1980*

War comics were on the decline in the 1980s, so it's not surprising that this oversize comic didn't last. It's main feature was Viking Commando, a true Viking who avoided Valhalla and spent his time helping the Allied cause against the Nazis in the usual Viking way without a uru hammer in sight.~HY

ALL-STAR COMICS

DC: *74 issues 1940-1951 (1-57), 1976-1978 (58-74)*

The first two issues resembled any number of other 1940s anthologies with several popular heroes in separate stories under one cover, but with the third issue a revolutionary new concept was introduced. There were, as before, separate stories for each featured hero: The Flash, Hawkman, Green Lantern, Hourman, Atom, Dr Fate, the Spectre, Sandman and Johnny Thunder, but in a framing sequence these heroes met, talked and compared notes on what was happening in the world of 'mystery men'. A fraternity of superheroes, the Justice Society of America, was introduced to the readers and became the mould for countless other superteams. The heroes would meet in the first and final chapter of each issue, and each JSA member would battle an aspect of the menace featured in that particular issue in his own chapter drawn by that hero's regular creators. This initial formula became compressed by the shrinking page count as the decade progressed, with chapters starring two or three heroes, but remained essentially unchanged until the title's conversion into *All-Star Western* with 58. In the intervening decade most of DC's heavy hitters joined the team, and fought bizarre menaces such as Per Degaton, Brain Wave, Solomon Grundy, The Wizard, the Injustice Gang, and of course Hitler. Along the way they were the first heroes to tackle social issues, with stories on racial prejudice (16), juvenile delinquency (40) and the role of disabled people in society (27). Wonder Woman débuted in 8 in a story unrelated to that issue's JSA tale, before joining in 11.

Roaring across time and space, treating the solar system like a small neighbourhood where it was possible to go to Jupiter, thrash the bad guys and still get back for supper, the scope of these adventures rattles the reader along at a hectic pace. Yet for all their world-conquering power, the JSA were never reluctant to help the common man, as in the memorable 21, where the team travels back in time solely to help a dying man undo his earlier misdeeds and die with a clear conscience. The hardcover *All-Star Archives* have now reprinted 1-38.

Falling sales for the entire superhero genre transformed *All-Star* into *All-Star Western* in 1951, but it lived on in fandom's collective mind. The JSA were revived in 1963 in Flash 123, rapidly followed by the first teaming with the Justice League of America in JLA 21, inaugurating an annual tradition continued until the 1980s. A clamour for the revival of All-Star began, but when DC finally revived the title in 1976 the JSA connection was downplayed, with the emphasis on three younger characters: Robin, the Star-Spangled Kid and Power Girl as "The Super Squad". This bogus ploy was only discarded in 66 when they were accepted as JSA members and the *JSA* logo was again heavily cover-featured. Possessed of snappy scripts by Paul Levitz, working with Gerry Conway on 58-62, and excellent art from Keith Giffen and Wally Wood, supplanted by Joe Staton and Bob Layton from 66, the new JSA was rapturously received. The old heroes were portrayed realistically as older people still striving to do the right thing, and the newly created Power Girl, a startlingly pneumatic Kryptonian with a major attitude, was a huge hit. Abrasive, rude and arrogant, she proved you don't have to be a nice person to be a good person, and people who only know the gutless shell of Power Girl around today don't know what they've missed. Sadly not even her introduction and, later, the Huntress, daughter of Batman and Catwoman, helped the title survive. The JSA stories continued in the extra large *Adventure Comics*, and there's a fine explanation for why the JSA didn't win World War II on their own in *DC Special* 29, but by 1980 they were once again mere guest stars. For the 1999 *All Star* see *JSA*.~HS

Recommended: 13, 21, 27, 33-38, 58-73

ALL-STAR SQUADRON

DC: *67 issues, 3 Annuals 1981-1987*

The greatest DC heroes of the 1940s live again in a series of untold World War II adventures recounted by writer Roy Thomas – surely his dream assignment, having been a Justice Society Of America buff since the 1940s. Originally under instruction not to use too many characters with modern counterparts, Thomas had to work with second-stringers as his core team. When the restriction was dropped the title was a JSA series in all but name. Sadly, to the comic's detriment, Thomas proved unable to detach himself from his fanboy roots. Rather than concentrating on entertaining the reader, he worried over explaining and correcting perceived continuity errors. Many issues were excessively wordy and dry, lacking the gung-ho zeal of the 1940s originals. Although often well illustrated (Jerry Ordway's run of 19-26 and Annual 2 being particularly lovely), the series was all too often strictly for ageing nostalgists. A pity.~HS

ALL-STAR WESTERN

DC: *Series one 62 issues (58-119) 1951-1961, series two 11 issues 1970-1972*

As the door closed on the first superhero era, DC shunted out the Justice Society of America, and added 'Western' to their title for a seamless overhaul. In contrast to the majority of DC's themed titles of the time, *All-Star Western* featured ongoing characters. The Trigger Twins, introduced in 58, ran until 116, largely illustrated by Carmine Infantino. Gimmick-led from day one, humour came from Wayne's shop assistant forever holding up town sheriff Walt as a paragon of virtue and bravery. It's only charming in small doses. Less popular features introduced in 58 were the sharpshooter Jeff Graham, the Roving Ranger, and Don Caballero, a Zorro rip-off. He named his fencing sword El Capitan, and luckily the bullet with his name on never came his way. Strong Bow was a more interesting idea, pedestrianly executed. Only he survived the massacre that wiped out his tribe to become a sort of Native American ronin (masterless samurai) who wandered a 14th-century USA preaching peace, but perfectly able to defend himself.

All-Star Western's other mainstay was an already proven success. Johnny Thunder débuted in *All-American Comics* 100, created by Robert Kanigher and Alex Toth. Toth didn't follow him to *All-Star Western* in 67, but Gil Kane was an acceptable substitute. Johnny Thunder could have been your typical lightning-fast sureshot, but Kanigher introduced complexities, with Thunder promising his dying mother he'd become a schoolteacher, thus devastating his Sheriff father, who'd seen Johnny as his successor. Johnny circumvents his emotional conflict by adopting a disguise to fight crime at his father's side. Arch-enemy Silk Black was a regular visiting desperado and Kanigher introduced Madame .44 in the dying days. She was driven to ensure those who robbed and cheated others faced justice and ended up marrying Johnny.

The only other notable feature was Super Chief, by Gardner Fox and Infantino (whose art graces almost every issue), introduced in the title's death throes. Flying Stag is bestowed with a mystical stone (a chunk of meteorite) making him a thousand times stronger than the bear, with the leading prowess of the wolf and swifter than the deer. Wearing a rather fetching buffalo head mask, he protects his people.

In 1970 DC revived the idea of the Western anthology comic. Early issues feature a mixed bunch of strips, the best of which are the Gray Morrow-drawn El Diablo stories from 2. Paralysed in a wheelchair by day, by night he was a mystical spirit of justice. It was gruesomely disfigured bounty hunter Jonah Hex, however, who was to prove enduring. In comparison with what was to follow, his first two outings (10 and 11) are relatively tame, although they set the tone for the series, with people requiring Hex's prodigious gunslinging talents but unwilling to accept his company. With 12 the title was altered to *Weird Western*.~FP

ALL THE WRONG PLACES

Laszlo Press: *4 issue miniseries 1999-2000**

Nathan looks after his mother, who is dying of cancer, isolated in the family farmhouse except for visits from his friends, Richard and, more occasionally, Jessica, herself awaiting her boyfriend's return from the army. Tom Galambos has crafted a restrained story of grief and unrequited love, supported by a uncomplicated drawing style that conveys emotion without really stirring the reader.~NF

The ALLAGASH INCIDENT

Tundra: *One-shot 1993*

Recounting famous UFO abductions using clumsy computer-generated images. One for Forteans only.~HS

ALLEGRA

Image: *4 issue miniseries 1996*

Allegra leads a corps of warriors whose job it is to defend Midian against the sky colony of Kioram. Both of these societies live above a desolate Earth but Kioram's leader, Dr. Tullus, hopes to return to the surface eventually. Powered by armour invented by Dr. Huber, Allegra has been conditioned to believe that returning to Earth is a crime. Nevertheless she's continually drawn to the all-but-uninhabitable surface world. As Allegra starts to question the nature of her world clues are dropped that the whole is an elaborate virtual-reality creation and, as she remembers another name, that she's the unwilling subject of a weapons experiment. Intriguingly plotted by Steven Seagle, with good art by Scott Clark, it's not a bad mystery tale.~NF

ALLEY CAT

Image: *6 issues 1999-2000*

Playboy model Alley Baggett is credited as a creator of this series about a young woman (in Alley's likeness) who becomes the host for an evil costume once owned by the Marquis de Sade. Though her fiancé is drugging her and is also a serial killer, Alley resists the evil of the costume for a resolution in 1-3. In her second adventure (4-6), Alley investigates the deaths of a number of priests, apparently perpetrated by the brother of a friend. A strange mixture of fetishism, the supernatural and superheroics, the concept's let down by pedestrian dialogue and artwork. Limited editions include a Prelude and *Alley Cat vs. Lady Pendragon*.~NF

ALLEY OOP Adventures

Antarctic: *3 issues 1998*, 3 issues ('Quarterly') 1999*

How unexpected and brave of Antarctic to release that rarest of beasts, a warm-hearted children's comic, in the testosterone-saturated 1990s comic scene. Predictably, the world wasn't crying out for a revival of a 1930s comic strip legend, Alley Oop the time-travelling caveman, which is a shame since this is a well crafted, colourful and entertaining package. The prematurely curtailed second series was in black and white. No one is going to claim that this is a classic but, with the current newspaper strip team of Dave Grave and Jack Bender on board, there is a lot to enjoy here, particularly for younger readers.~DAR

THE ALLIANCE

Image: *3 issues 1995*

Superhero space opera in a distant galaxy with the usual tendency for ridiculously (and barely) costumed women. Don't bother unless you've read at least 90% of the other titles reviewed here, and the fact that the concluding issue was never published won't ruin any pleasure you may derive.~FP

Robert E. Howard's Ironhand of ALMURIC

*Dark Horse: 4 issue miniseries 1991**

Amateurishly drawn sword-and-sorcery clichés using Esau Cairn from the Howard novels. Far superior is the collection of the Roy Thomas and Tim Conrad story originally serialised in *Epic Illustrated*.~WJ

ALONE IN THE DARK

Image: *One-shot 2002*

Based on the computer game, this has turned out more like a substitute *Indiana Jones* adventure, and that's no bad thing. It looks good, offers a fair adventure and should appeal to the fans of *Tomb Raider*, comic, game, or film.~DB

ALPHA CENTURION

DC: *One-shot 1996*

After a run guest-starring in *Superman* titles, this tested the waters for an ongoing series. The idea of a Roman centurion returned to earth two thousand years later with alien armour and technology is novel. Everything else about this padded story has been seen dozens of times by anyone who's been reading comics for a while. Wonder if that's why there was no series?~FP

ALPHA FLIGHT

Marvel: *Series one 130 issues, 2 Annuals, 1 Special, 1983-1994, series two 20 issues 1997-1998*

Created by John Byrne and marketed largely on the novelty of being Canada's first superhero team, *Alpha Flight* featured the characters who first appeared in *X-Men* 120-121 and had already been established as Wolverine's original team-mates. The first dozen or so issues, until Byrne loses interest, are amongst his best solo work, with tight plotting and good characterisation. The death of Guardian, the team's leader, in 12, is particularly well handled although, this being a Marvel comic, it's not all that long before he's back. Unfortunately the title never found a direction without Byrne, lacking any outstanding creators for the rest of a surprisingly long run. The issues around 50, written by Bill Mantlo, are so cringingly bad, and have such ludicrous plots, that they become unintentionally funny. Alpha Flight tended to have a knack for ludicrous plots. In the issues leading up to 50 stories include Sasquatch trapped in a female body and (among other things) trying to get his ex-wife to vouch for him so that he can access his bank account, and the adventures of Beta and Gamma Flight, Alpha Flight's increasingly inept reserves. All this from a team who put their leader's widow in charge because they didn't know what else to do with her – and the real joy is that it's never intentionally a comedy series. 97-100 were also issued as a four-issue miniseries titled *Alpha Flight Special*. The series will, however, be remembered for introducing Marvel's first openly gay character, Northstar. Although the character's sexuality was obvious without being stated from about 30 onwards, it was not until 106, written by Scott Lobdell, that it was set in stone. For those who want to read between the lines, hints start to be dropped around the time Northstar tells the sex-changed Sasquatch that he preferred the old male body, carry on through a (too) long flirtation by team-mate The Purple Girl, and almost cumulated in what was expected to be an AIDS revelation in 50. Except that Marvel wimped out at the last minute in favour of a revelation far too stupid to have been planned (go on, read it yourself, a snip at 10p). An unimpressive *Northstar* miniseries followed, but despite the publicity the 'outing' brought, the book's days were already numbered. Most issues between 51 and 64 are notable for containing some of Jim Lee's earliest work for Marvel, but the best place to read about Alpha Flight is in the excellent 2-issue *X-Men/Alpha Flight* miniseries by Chris Claremont and Paul Smith.

The 1990s return produced 20 issues of readable but unspectacular run-of-the mill spandex adventures as writer Steven Seagle pretty much regurgitates the plots readers didn't like enough to keep buying first time. The interminable love hexagons between Vindicator and every (hetero) male member of the team continue, but not even the resurrection of her dead husband in the body of a teenager can make them too interesting. The same old villains return and the same old government conspiracies plague Department H. Things aren't helped by an unsettled run of pencillers resulting in wildly different styles from issue to issue. They range from Image-alike on the early numbers, through the Joe Madureira influenced sub-Manga of Duncan Rouleau (who takes a co-plotter's credit on later issues) to Vertigo-esque and back again. The early indication of a more individual style from Bryan Hitch on 6 is nice, but hardly enough to recommend what was a pretty pointless revival.~JC

ALPHABET SUPES

BigBadWorld: *One-shot 1999*

An engaging one-shot featuring a team of twenty-six super-hero wannabes, each representing one letter of the Anglo-American alphabet. These people, diverse in age, gender and ethnicity, have to perform virtual 'cheerleading routines' to 'spell out' whatever attack or tactic they want to use – F-I-R-E, I-C-E, F-L-Y, and so forth. The real ingenuity is in the personality traits author Jim Krueger extracts purely from the alphabetical position of the heroes – I and E are always wrangling about who "goes first" and leads the team, Q is co-dependent on U, Y doesn't know whether she belongs with the consonants and the vowels, and so on. Pure whimsy, and wouldn't sustain a repeat performance, but fun while it lasts.~HS.

ALRAUNE

Eros: *5 issues + 2001 to date*

After touching the impossibly proportioned member of a sideshow retard our heroine is cursed with an insatiable sexual appetite. There is an element of plot as she attempts to rectify her condition, but sex in all forms takes precedence. The cartoony grey toned art of Toni Greis has appeal, and anyone enjoying raunchy comics will probably like this.~WJ

ALTER EGO

First: *4 issue miniseries 1986*

A young boy is transferred to another dimension where comic book heroes are real, and he joins the heroic fraternity as Alter Ego. The comics and character are named after writer Roy Thomas' fanzine about 1940s comics, and the slightly disguised Golden Age characters who abound will provide diversion for nostalgia buffs.~HS

ALTERED IMAGE

Image: *3 issue miniseries 1998*

Jim Valentino's penchant for nostalgia is charming, but insufficient to justify this pointless team-up of characters from the various Image studios – Witchblade, Savage Dragon, Spawn, the Maxx, Majestic and Shadowhawk – in a homage to the 1960s Justice League of America. Run-of-the-mill is perhaps being too kind.~HS.

ALTERNATIVE COMICS Graphic Novels

The editorial outlook of these books is that of Jeff Mason, who's done a fine job in finding and promoting creators with an individual vision. The best of them is Nick Bertozzi. *The Masochists* displays assured storytelling and haunting themes over three pieces, two concerning social outcasts and the third about a successful soundtrack musician whose material comfort has overwhelmed the thrills of his performing past. The variety of tone and unflinching peeks into humanity's darker emotional recesses are very promising, and Bertozzi's visual inventiveness delights. He's not above a joke or two either, whereas jokes, albeit very black ones, are what Graham Annable's *Grickle* collection presents. His cartooning merges Matt Feazell with 1940s *New Yorker* cartoons for a simple effect, although there is no total consistency of style. Most strips have a decent laugh within, and the best of them, a nonsense rhyme about a sullen factory worker whose joys are at home, certainly deserves a wider audience. The mystifyingly praised and largely pointless, although well drawn, meanderings of James Kochalka occupy two books. The premise and possible purpose of *Quit Your Job* is summed up over two pages in what runs for over eighty, and the cover-promoted introduction by Jeff Smith appears to have gone missing, along with any plot or inspiration. The incongruous elements of *Fantastic Butterflies* offer marginally more life, but overall were Kochalka a teenage offspring you'd pat him on the back, say "well done" and go back to watching the football. There's also an element of wishing Leela Corman would pick up the pace on occasions, but at least she has stories to tell. *Queen's Day* takes its title from the most oblique of three tales within, the best of which is the wittily titled exorcism 'The Myth Of Never Being Sick A Day In Your Life', in which Alice searches for answers after a bereavement. That's bettered, though, by Corman's graphic novel *Subway Series*, in which the wistful Tina drifts through life with a largely absent boyfriend she cares little for, attracted to another boy, and with friends unable to see past the superficial. Drawn in a simple style, it's a sensitive exploration of the social pressures experienced by teenage girls, and very good. Better still, taken together, there's the certain knowledge that Corman's best work is still ahead of her. *Rosetta* is a well-designed, but disappointing anthology with an international theme reflected in its contributors, too many of whom have little to say, difficulty saying it or present the emperor's new clothes. The better pieces include a thirty page chunk of Megan Kelso's allegorical fantasy, David Collier contrasting Islamic and North American parental concerns, Malaysian cartoonist Yat recalling his school hostel, Matt Madden's multinational version of *La Ronde*, and Tobias Schalken's clever story about a failed relationship with unrelated images, some of which work in concert through the page. These are differing pieces sharing a common factor of being relatively simple stories or observations well told. A shame more of the contributors didn't take the opportunity.~FP

AMALGAM COMICS

DC/Marvel: *12 one-shots 1996**

Following the events in issue 3 of the DC Vs. Marvel crossover, the two superhero universes got 'smooshed' together, and these odd titles, created as if they were part of an ongoing joint universe that had 'always' been that way, were the result. Think of them as issues 3a-3l of the 4-issue parent series. (Ulp!) Some of them work as stand-alone stories, others were deliberately created with references to fake previous and future issues, to enhance the illusion. The twelve, all numbered 1, are *Amazon* (a Storm/Wonder Woman hybrid), by John Byrne; Assassins (Catwoman/Elektra teamed with a female Daredevil/Deathstroke), by Chichester and McDaniel; *Bruce Wayne, Agent of S.H.I.E.L.D.* (Batman/Nick Fury), by Dixon and Nord; *Bullets & Bracelets* (Wonder Woman/Punisher), by Ostrander and Frank; *Doctor StrangeFate* (Drs. Strange and Fate), by Marz and Garcia Lopez; *JLX* (Justice League and X-Men), by Waid, Jones and Porter; Legend of the Dark Claw (Batman/ Wolverine), by Hama and Balent; *Magneto and The Magnetic Men* (X-Men/Metal Men), by Waid and Matsuda; *Speed Demon* (Ghost Rider/Flash), by Mackie, Falder and Larocca; *Spider-Boy* (Spider-Man/Superboy) by Kesel and Wieringo; *Super-Soldier* (Superman/Captain America) by Waid and Gibbons; *X-Patrol* (X-Force/Doom Patrol) by Kesel, Kesel and Cruz). Much to everyone's surprise, the gag worked brilliantly. Some were better than others – *X-Patrol, Bullets & Bracelets* and *Dr.StrangeFate* being the wittiest and grittiest, while the pompous *Amazon* and plodding *JLX* were definitely poorest, but all of them were much more fun than the lacklustre Marvel Vs. DC crossover itself.~HS

Recommended: *Bullets & Bracelets, Dr.StrangeFate, Spider-Boy, X-Patrol*

AMANDA AND GUNN

Image: *4 issue miniseries 1997*

It's 2036, and Montana has been partitioned as a nature reserve, with all those now living there doing so at their own risk. One of them is Amanda, attempting to forget her previous life, but forced out of retirement when townspeople are being murdered. Jimmie Robinson has produced a title that's part western, part science fiction and all enjoyable as a well-written and drawn adventure comic featuring a likeable cast. And there's plenty of plot surprises to boot.~FP

AMAZING ADULT FANTASY

Marvel: *8 issues (7-14) 1961-1962*

"The Magazine That Respects Your Intelligence". This mix of science fiction and fantasy stingers continues numbering from the first series of *Amazing Adventures* and differs from Marvel's other anthology titles in that it features stories by Stan Lee and Steve Ditko exclusively. This, plus the illustrated contents page and Marvel's earliest letters page, shows Lee's obvious pride in his story-telling formula. All issues run four or five stories and are of equally classic quality. 'The Icy Fingers Of Fear' in 7, 'The Terror of Tim Boo Ba' in 9, 'For The Rest Of Your Life' and the superb 'Secret Of The Universe' in 11 are all highspots. 14's 'The Man In The Sky' introduces Lee's concept of mutants, with several striking similarities with scenes in *X-Men* 1 a year or so later. The title changed to *Amazing Fantasy* for its famous final issue in which Spider-Man débuted.~SW

AMAZING ADVENTURES

Marvel: *Series one 6 issues 1961, series two 39 issues 1970-1976, series three 14 issues 1979-1981, one-shot 1988*

Dr Droom was the feature connecting *Amazing Adventures'* first run. He was a mystic seen by some as a putative Dr Strange, being written by Stan Lee and drawn by Jack Kirby and Steve Ditko. Although he appeared in every issue but 5, the covers instead depict one of the standard mystery tales inside. Droom's stories were no better than the surrounding material, but once the cult of Marvel hit full pelt in the 1970s he was revived as the more fortunately named Dr Druid. After six issues Marvel changed the title to *Amazing Adult Fantasy*.

The second series initially split the twenty-two pages, and, more eccentrically, the cover between The Inhumans and the Black Widow. Both were popular supporting characters, and neither really took off as a solo feature. The Black Widow's pages were competent but dull throughout, and despite Jack Kirby writing the Inhumans strip in 1-4, one of his few pre 1977 writing credits at Marvel, the highlight was the artwork of Neal Adams on 5-8, particularly excelling on Thor's guest appearance in 8. Roy Thomas tied his stories in tenuously with the 'Kree/Skrull War' story running in the *Avengers* at the time, and X-Men fans might be enticed to sample Magneto's appearances in 9 and 10, by which time the Inhumans occupied the full page count. Venture in with expectations low, though. It's hard to conceive a time when the X-Men were a commercial failure and consigned to limbo, but that was the case in the early 1970s. New writer Steve Englehart revived The Beast from 11, and, tapping into the prevalent mode for horror characters, transformed the mutant Hank McCoy into a character more in keeping with his alias. Now possessing the hirsute body of an animal, but retaining his human intellect, McCoy stars in a decent run, well illustrated by Tom Sutton. Sample 13, when some old X-Men villains come calling. Not a sales success, the Beast was ousted after six issues (and a reprint in 17), and plotlines were concluded in *Hulk* 161.

Although certainly not obvious from early appearances, the best strip to appear in *Amazing Adventures* saw the second series to a close. Roy Thomas conceived the idea of extrapolating on H.G. Wells' *War of the Worlds* from 18 (with Adams art) and having his Martians return for a second and more successful invasion of Earth in the mid-21st century. Luckily there was the charismatic and effective Killraven on hand to lead a band of rebels against the Martians. Alternating between being cover-featured as *War of the Worlds* and *Killraven*, it's a pedestrian feature until the arrival of Don McGregor. His 1970s work is often regarded as pretentious and over-written, but credit is due for attempting to inject a poetry into Marvel material, and for producing a story propelled as much by the interaction between the cast as by any conflict. He also eloquently conveyed the horror of a subjugated humanity. The series would probably have remained obscure had McGregor's original artistic collaborators continued. Luckily deadline problems introduced P. Craig Russell. Once given the opportunity to ink and colour his pencils, Russell matched McGregor's vision with his own to create stunning illustrations with an almost fragile line, and if his experimental layouts sometimes confused it was a small price to pay.

Killraven's band of freedom fighters attack the Martians and their agents wherever possible, but rarely without cost. A character called Skar is a proto-Terminator whose head features mouth and ears, but disturbingly and memorably only a gaping hole instead of nose and eyes. The camaraderie between Killraven and best buddy M'Shulla – far too often tweely referred to as "Mud brother" – is exceptionally well developed, and the surly Hawk, simple but strong Old Skull, and the only woman of the group, although far from a token, Carmilla Frost round out the regular cast. One dies in 34, a rare occurrence in the comics of the time, and the story remains excellent. Such was the detail of his work that Russell obviously had difficulty maintaining even a bi-monthly schedule, and fill-ins punctuate the run, but they're also interesting. Keith Giffen's first published work in 35 illustrates 'The 24 Hour Man', a weird take on an old science fiction concept, and he also illustrates 38, designed to pull in new readers, as it cover-features assorted familiar Marvel heroes. The series finale is a beautifully drawn, but ultimately empty Killraven solo, obviously intended as an interlude issue. Readers waited over five years for a conclusion among the first flush of Marvel graphic novels. Russell's art had progressed immensely by this point, and McGregor's florid tendencies diminished, but it's a muddled and disappointing affair.

The peculiar idea of reprinting *Uncanny X-Men* 1-8 over two issues apiece provided the third *Amazing Adventures* series. The stories are reprinted elsewhere with more care and attention. The one-shot anthology was seemingly issued to utilise material commissioned for cancelled titles, particularly *High Adventure,* as many stories have a historical bent. The lead story should have been the most appealing, combining the creative talents of Chris Claremont and Michael Golden (inked by Terry Austin). Unfortunately, it's nonsense. Anticipating *The Accused,* a woman is raped and afforded the opportunity to revenge herself on her rapists. So far, so good, except to do so she has to be transformed into a space warrior riding a dragon. It's a distressingly trivial and offensive solution to a ghastly experience. Mike Vosburg contributes a decent short about Reilly, Ace of Spies and 'Mata Hari', and 'The Grail' by DeMatteis and Ridgway also succeeds. In its entirety, though, this is only worth picking out of a bargain box.~FP

Atelier Lana's THE AMAZING ADVENTURES OF PROFESSOR JONES

Antarctic: *2 issues 1996*

The wacky archeologist Professor Jones and his wacky assistant and their wacky demon have wacky adventures on wacky quests against wacky foes. While well drawn by Lana, the modicum of charm evaporates after five pages.~FP

THE AMAZING CYNICALMAN

Eclipse: *One-shot 1987*

Matt Feazell's photocopied minicomics were a revelation. Extremely confident from the off, Feazell's speedy stick-figure style of art and stream-of-consciousness plotting resulted in some very funny moments, the best of which are collected in Caliber's paperback volume *Ert.* Eclipse gave Feazell the opportunity to extend his talents over a complete comic, and despite some very funny moments and pointed comments, 'Cynicalman Sells Out' begins to ramble long before the end. There are several other minicomics creators backing up the lead strip, including one drawn by Bob Burden.~WJ

AMAZING FANTASY

Marvel: *4 issues (15-18), 1962 (15), 1995-1996 (16-18)*

Stan Lee knew that this series, previously titled *Amazing Adult Fantasy,* was heading for cancellation graveyard. With nothing to lose, he and Steve Ditko introduced a new and different superhero in the final issue. This superhero had real-life problems in his normal identity as shy, unpopular, teenaged Peter Parker. Thus Spider-Man was born. The rest is history.

Thirty-three years later the title was revived. Some concepts do take time to catch on. Kurt Busiek retrospectively conceived the tale linking *Amazing Fantasy* 15 to *Amazing Spider-Man* 1. This will grate on continuity buffs as inconsistencies inevitably result and the difference in sophistication between the 1960s and 1990s narratives is jarring. Nevertheless, his story is sensitively written and Paul Lee supplies moody, painted artwork. Surely no other title will ever undergo a 3192% price rise between consecutive issues.~APS

THE AMAZING SCREW-ON HEAD

Dark Horse: *One-shot 2002*

Whatever other talents he displays, the work of Mike Mignola isn't noted for its high comedy content, but after this a re-assessment is in order. Set in a fictitious 1860s, the Screw-On Head is a sentient metal head that screws into a metal body, after which he goes adventuring. Mignola's dialogue is arch, his characters ridiculous, and his art gorgeous. Handled straight, though, much of this wouldn't be far removed from Hellboy. Has Mignola been laughing at us all along?~FP

AMAZING STRIP

Antarctic: *10 issues 1993-1994**

Sex and Drugs and Rock'n'Roll – well mostly just sex, actually as Ippongi Bang traces the coyly debauched careers of a trio of strangely wholesome rockstars. Unable to decide whether it's fictional reportage or a dirty version of *Spinal Tap* it quickly devolves into the cutesy mysticism and serial bonking. Less 'amazing', rather dull.~WW

Heroic Tales: AMAZON

Lone Star: *10 issues 1997-2000*

Matt Sears investigates an explosion in the desert and finds a mysterious woman called Faith, in a space suit. He buys her some clothes and starts to teach her English before an alien attacks. In 4-5, Faith has left Matt's protection and taken a job as a construction worker on the border, but answers "Yes" when asked whether she's an alien, leading to a fight in jail. After fighting Mr Muscles in 6, Amazon meets a fugitive, Gunslinger, who sends her on a mission to find other superheroes (7-9). Her adventures continue in *Force Seven,* as part of a government-sponsored team. Backups include Ace of Diamonds, another female hero (3, 5), Blackheart (6) and Pantheon by Bill Willingham (7). Written by Robb Phipps, with artwork from Bill Williams, who has a clean, bold style, Amazon tries not to be obvious, but in the end she isn't interesting enough in her own right. The last three issues feature Atlas, Gunslinger and Blackheart respectively on the cover instead of Amazon, who is also not actually in 10.~NF

THE AMAZON

Comico: *3 issue miniseries 1989*

American journalist Malcolm Hilliard becomes obsessed with discovering the truth about rumours concerning missing workers and disruptions at a Brazilian logging camp. The local tribes believe a physical manifestation of the Amazon occurs to protect the land in times of need, and the further Hilliard digs the more he's forced to question his beliefs. A remarkably assured comic début from writer Steven Seagle, and while Tim Sale's early art is less adept this is a rare instance of a series managing to wrap a forceful point in a well paced story.~FP

Recommended: 1-3

AMAZON WOMAN

Fantaco: *2 issue microseries 1995, 4 issue miniseries 1996**

When trouble comes calling Karol Hammel takes almost all her clothes off and uses her prodigious strength to fight it. Tom Simonton is a decent enough cartoonist, but there's more substance to an autumn dandelion.~WJ

Nine Princes In AMBER

DC: *3 issue miniseries 1996*

Roger Zelazny's *Amber* novels are gripping fantasy, and even diluted through the necessity of contraction for three comics their compelling page turning nature survives. The artwork is somewhat less satisfactory. Lou Harrison should be a very accomplished painter someday, but his static visualisations in the first issue aren't quite the finished article. Bryn Barnard concludes the story, and while a little more fluid is technically inferior, despite his impressive credit page resume. If you've any interest at all read the novels first, then look these out if your appetite for Amber remains unsated.~WJ

AMBUSH BUG

DC: *4 issue miniseries 1985, 6 issue miniseries ('Son of...') 1986, one-shot ('Stocking Stuffer') 1986, one-shot ('Nothing Special') 1992*

Introduced by Keith Giffen in DC Comics Presents 52, and given assorted guest appearances thereafter, Ambush Bug began as an inventive piece of irreverent whimsy. The first miniseries remains an energetic joke-packed romp, drawn by Giffen in his best Muñoz style, inked by Bob Oksner, with Robert Loren Fleming wittily filling the word balloons. The only problem is that it's so full of in-jokes and jibes at contemporary comics it will mystify any new reader. The jokes become ever more surreal in the second series, and wackiness wears thin long before the end. It's threadbare by the first Christmas themed special, while the second, despite the unlikely pairing of Lobo and Sandman in the same comic, is very much contractual obligation.~FJ

* Available in a collected edition

AMELIA RULES

Renaissance Press: *7 issues + 2001 to date*

Jimmy Gownley takes the TV sitcom route of focussing on childhood with a knowing adult eye, and does it very well indeed. Nine-year old Amelia's parents are divorced, and she and her mother have moved to a new town to live with her mother's considerably younger sister. Amelia is wise beyond her years, and the friends and enemies with whom her world is populated are a well fleshed-out group. Gownley's cartooning is eloquent, with a touch of *Doonesbury* about the faces, and miles removed from his previous work, although Amelia's careworn mother is indicative of well conceived characterisation. His merging of computer techniques and simple, bold colouring, is a combination with widespread appeal, but although this is promoted as being "all-ages" it's unlikely that children of Amelia's age would draw much other than the obvious gags from it. All issues are self-contained, so sample any of them, and 1-5 are now available in book form.~FP

Recommended: 2-6

AMERICA VS THE JUSTICE SOCIETY

DC: *4 issue miniseries 1985*

Set on Earth Two, where DC consigned their 1940s heroes at one stage, Batman's diary posthumously accuses the JSA of murder. Dick (Robin) Grayson and Helena (Huntress) Wayne are on opposite sides of the judicial fence. Overly talky, inappropriately illustrated, and you know you're onto a loser when the text pages are much more interesting than the story they surround.~HS

The AMERICAN

Dark Horse: *8 issues 1987-1988*, 1 Special 1990, 4 issue miniseries ('Lost In America') 1992*

Well loved super-soldier 'The American' is a media darling and hero of the masses, but one determined reporter uncovers a fraud perpetrated over generations of false heroics, which has cost untold lives. He, and his loved ones, suffer the consequences, and despite help along the way, including catastrophic intercession from the former Kid American, the hero's sidekick, he stands alone against overwhelming forces. Deft writing from Mark Verheiden keeps the suspense tight, and the, at best, partial victory of the protagonist adds an unexpectedly realistic note of compromise. The second series focuses on the latest American himself, and his attempts to find an identity now that his cherished façade has been stripped away. This leads him to a strange cult – a carefully non-litigious blend of the Moonies and the Scientologists – and a disturbing series of revelations, about himself and the behaviour of the 'Average Man' from which he's been so carefully shielded for most of his life. An interesting sidenote is that the original *American* series was allegedly a proposal for Marvel's Captain America, rejected because the then Marvel management didn't want to drastically revamp their hero as a pawn of the government. Considering what they've allowed to happen to him since, it might have been kinder if they'd followed this proposal.~HS

AMERICAN FLAGG

First: *50 issues, 1 Special 1983-1988, series two 12 issues 1988-1989*

Howard Chaykin's *American Flagg* is a cynical, bitter satire on American culture, morality and politics, with a lot of attendant violence. Its 'underground' sensibilities arguably paved the way for the introduction of more mature themes in titles from otherwise conservative, US publishers. Chaykin's approach involves packing large amounts of information and reference into every page using TV reports to provide plot synopses, and background images of billboards or TV advertisements and shows. His tightly inked, stippled artwork is sharp yet still conveys the story's ambiguities and the lettering of Ken Bruzenak is worth mentioning as also being highly influential on the series' visual appeal. On the basis on the first two years of this series, *American Flagg* deserves to be measured against titles like *Watchmen*, as a highpoint of American comics.

Discarded actor, Reuben Flagg arrives in Chicago from Mars for a five-year tour of duty in the Rangers, a police force sponsored by the corporate government, the Plex. 1-4* introduce a large number of recurring characters and establish Flagg as a rebel against the status quo, pitting him against both the Plex (specifically, Internal Affairs agent Scheiskopf), and the racist and subversive, American Survivalist Labor Committee. Flagg 'inherits' a pirate TV station, Q-USA after his chief is murdered by Scheiskopf, which he runs while continuing to police Chicago. The supporting cast includes the glamourous Mandy Krieger, Raul, a talking cat, Mayor C.K. Blitz, a robotic deputy called Luther Ironheart, Bill, the rightful King of England and a large number of sexual partners, though noticeably fewer when Chaykin's not involved. Guest artists in 13 and 14 don't much detract from the story, which continues with an adventure amongst the communist cowboys of Canada (15-18), an election battle between Mandy and C.K. with unexpected results (19-22) and a trip to London, which involves Flagg in a conspiracy to overthrow the Brazilian government (23-26). A two-part backup strip about Flagg's on screen character, Mark Thrust, Sexus Ranger (19-20), is followed by one written by Alan Moore (21-26) focusing on the supporting cast and climaxing in the full-length 27. Moore is on the same wavelength as Chaykin as far as the storytelling goes, but Don Lomax's artwork is very unappealing.

Chaykin writes 28-30, drawn by Joe Staton, but takes on a co-writer, Steven Grant (31-34) before leaving it to him entirely. The Special appeared at this point, with Flagg and Raul transported to the world of Chaykin's Time2 and the story largely just a preview for that title. Grant produces a tale of Oklahoma under British sovereignty (35-37) and then gives way to J.M. DeMatteis who has Flagg resign from the Rangers, head off on a road trip across America with Raul and Luther, before returning to Chicago on hearing of the death of a major character (38-45). Mark Badger's artwork (31-45) is stylish, but is inappropriate after Chaykin's own. A backup featuring Bob Violence (a fictional TV shows) is in 31-40, Chaykin's initial involvement at least tempering his loss on the lead.

An attempt to redress the problems (angrily articulated in many of the letters) saw Chaykin plotting 47-50, drawn by Paul Smith (47-48) and Mike Vosburg (49-50) in an approximation of Chaykin's style for a crowd-pleasing finale. The second series continued where the first left off with Mike Vosburg art and Mindy Newell scripts, allegedly to Chaykin plots, but John Moore was quickly credited too and at the end, it was said to have always been intended as a limited series.~NF

AMERICAN FLYER Funnies

Print Mint: *1 issue 1971*

Last Gasp: *1 issue (2) 1972*

Quite the strange subject matter for 1970s underground comics, as Larrys Sutherland, Todd and Welz have a try at superheroes with that counterculture twist. He's nowhere near as good, but Welz is drawing from the same well as Moebius for his Wyatt Winghead strips, particularly in 1, and his assorted mystics, The Holy Five, is a grin-inducing exercise in bathos. Sutherland's Right-On Squad ("They're righteous, they're revolutionary, they're so full of shit they can't see straight") is a good idea with feeble plots. The first issue at least was still being reprinted a decade later.~FP

AMERICAN FREAK, A tale of the Un-Men

DC/Vertigo: *5 issue miniseries 1994*

Army orphan Damien Kane discovers his true lineage as the offspring of procreation experiments between genetically engineered freaks. Discovering he's also mutating, Kane is befriended by the deformed Crassus, who promises a cure for Kane's condition and leads him to a community of others with deformities. Don't be put off by the preposterous covers and their glaring taglines. *American Freak* is a fine study of humanity's reaction to anyone different, and Dave Louapre's poignant script avoids sentimentality or a predictable outcome.~WJ

AMERICAN SPLENDOR

Harvey Pekar: *16 issues 1976-1991*
Dark Horse: *One-shot ('A Step Out of the Nest') 1994, 2 issue microseries ('Windfall') 1995, one-shot ('Comic-Con Comics') 1996, one-shot ('On the Job') 1997, One-shot ('Odds & Ends'), one-shot ('Music Comics') 1997, one-shot ('Transatlantic Comics') 1988, one-shot ('Terminal') 1999, one-shot ('Bedtime Stories') 2000, one-shot ('Portrait of the Artist in his Declining Years') 2001, 3 issue miniseries ('Unsung Hero') 2002*
Four Walls Eight Windows: *Graphic Novel (Our Cancer Year) 1995*

Harvey Pekar's *American Splendor* is a truly unique creation. Long before the fashion for autobiographical comics Pekar was documenting the trials, tribulations and trivia of being a filing clerk and part-time journalist in Cleveland. In magazine-size issues, illustrated by a host of artists including Frank (Foolbert Sturgeon) Stack, Robert Crumb, Spain, Joe Zabel and Gary Dumm and Jim Woodring, Pekar lays bare his life, from tiny crises about feeding the cat or meeting a college friend after twenty years to major upsets, like divorce and cancer. Rarely has anyone been willing to open up and show the world all their insecurities, stupid acts, fleeting moments of triumph, petty worries and often pettier hatreds like Pekar, joined in later issues by his current wife Joyce Brabner. Despite this many of his most beautifully scripted strips are about overheard conversations, jokes told to him by co-workers, or bits of local oral history, such as the Crumb-illustrated 'The Maggie' in 7, about Yiddish linoleum salesmen, that frequently top and tail the more dramatic pieces. As the series has developed the shorter pieces become fewer as Pekar settles down to chronicle his fears and worries over illness and old age. He kvetches constantly, whinges and whines and probes his own psyche like a kid unable to stop poking an aching tooth with his tongue. All his worst fears are realised on discovering he has cancer. The impact of his illness, on himself and all around him, is brutally explored in *Our Cancer Year*, an extraordinarily frank graphic novel co-written with Brabner. Pekar lays bare his deepest fears in this book, loosely but effectively documented by Frank Stack. It's the closest comics get to effective documentary, and is deeply moving.

After *Our Cancer Year* Pekar ceased self-publishing and has since concentrated on one-shots of varying quality. Most of the later ones collect gripes, recollections and biographical material on jazz musicians like regular issues ('Portrait', 'Bedtime Stories', 'Terminal', 'On the Job' and Odds & Ends', 'Comic-Con Comics'). 'Music Comics' is entirely about musicians. It's the single story issues that shine: 'A Step Out of the Nest' concerns a trip to do *The David Letterman Show* for the first time in years. He used to be a regular guest until he and David had a falling out. 'Windfall' is about a trip to Chicago to give a lecture, in which Joyce Brabner allows herself to be portrayed as a pushy, politically annoying woman who analyses her husband's every action. Fascinating. And probably the best, 'Transatlantic Comics', put together from a correspondence between Pekar and Colin Warneford, an autistic autobiographical cartoonist who contacted Pekar for advice. Warneford wants to communicate the complete difference in perception and response his autism gives him, without being patronised because of his "difference". 'Unsung Hero' is the very dull biography of marine, Robert McNeill, poorly illustrated by David Collier. The point Pekar may be making is that his subject isn't militant, enters the Vietnam War pointlessly and is an unexceptional soldier, representing an everyman viewpoint of the conflict. Unfortunately this makes for exceptionally mundane reading.~FJ
Recommended: 2, 3, 7, 12, 15, Our Cancer Year, 'Windfall', 'Transatlantic Comics'

AMERICAN WOMAN

Antarctic: *2 issues 1998*

Five pages of story stretched over twenty-one comprise the first issue, the extra being required to include as many full page or double page half-naked shots of our heroine as possible. Even in costume, madam is the worst kind of patriot's fetish, dressed up in frilly knickers and thigh length boots with breasts dangling from a star shaped chest cut-out, the entire ensemble in red, white and blue. There's more story (and costume) in 2, but not a very good one. Depressingly this was apparently Antarctic's top selling comic of 1998.~FP

64 Page Giant AMERICA'S BEST COMICS

America's Best Comics: *One-shot 2001*

Funny and playful scripts, full of in-jokes, by Alan Moore and Steve Moore, distinguish this bumper album of pastiches in various styles by many superb artists. The artistic highlights are Eric Shanower's *Promethea*, which is a homage to *Little Nemo*, Kyle Baker's Splash Brannigan, Humberto Ramos' Tom Strong, and Sergio Aragonés at his very best on 'The First First American'. Recommended

AMERICA'S BEST TV COMICS

Marvel: *1 issue 1967*

Certainly the oddity with edited reprints of *Fantastic Four* 19 and *Amazing Spider-Man* 42 sitting alongside a *George of the Jungle* strip and a tale featuring the characters from the TV cartoon *Journey to the Centre of the Earth*. Surely no-one would want this today?~WJ

AMERICOMICS

AC: *6 issues, 1 Special 1983-1984*

One of publisher Bill Black's first attempts at crossing over from fanzines to small-press comics, this anthology is a very mixed bag indeed. It features several of the pneumatic heroines that would later comprise Femforce (Dragonfly, Tara), heroes who would become mainstays of AC continuity (Shade, Captain Freedom), and odd material created under a temporary licence starring discontinued Charlton heroes such as Blue Beetle. Seldom better than fair, Americomics showcases the early efforts of several folk who would progress to less embarrassing work, including Jerry Ordway, Will Nyberg and Vic Bridges. The special teamed Blue Beetle, Captain Atom, Nightshade and The Question as The Sentinels of Justice, a title later co-opted by Black for his own creations.~HS

AMEROTICA Graphic Novels

NBM's Amerotica line hasn't been productive as their Eurotica strand, either in terms of quality or quantity. While undoubtedly publishers of some of the finest European smut, the more inventive American output has gone to Fantagraphics' Eros line. Elaine Lee's series of erotic science fiction stories, which promised to be real tales rather than just excuses to bonk, turn out to be a load of clichés, indifferently and often poorly illustrated in two volumes of *The Skintight Orbit*, while Amerotica's big 'discovery', Michael Manning, creates a world of weird sado-masochistic creatures, aliens, horse people and dominatrixes. Pity he can't draw, but he's become a darling of the S&M crowd, particularly in the UK. *The Spider Garden* has some sort of plot about bitchy rivalries among not quite human sex mystics, *Hydrophibian* creates a world of bondage mermaids, while *The Lumenagerie* and *Cathexis* are reprint collections of shorts and sketches. In *Tranceptor* he returns to longer tales of intrigue among rubber-clad Dominas and, er, miners. Before the division, about the only saucy US creator they'd published was Will Desberg, whose *The Garden of Desire* is a sexy world tour about a man searching for his ideal woman, drawn in a simple, cartoony style.

Overall one can't help but feel that Amerotica is a line for rather mature wankers. Kiki Kjaer's *Retreat* and *Undertow* feel like they should be from the 1960s, but are set in the 1980s. Beardy blokes and liberal women enjoy sexual hijinx in a beach cabin and out in the woods. The artwork's fluid pen and ink work, and if you get off on surfer dudes, hippies and checked shirts then it's the book for you. *The Phoebe Chronicles* 1 and 2 are the ongoing adventures of a futuristic heroine escaping from her tyrannical father and the clutches of the uptight Purity League to enjoy untrammelled cum-guzzling drawn in a dynamic, superhero style. To keep things simple there are usually only two or three panels per page, so you don't have to strain to follow the plot, but escape from totalitarian anti-sexers is such a yesterday concept. Tim Fischer explores another hoary SF cliché in *Llisica*, who's some sort of super tracker on an alien planet, searching for a lost girl. The planet's full of mutants who secrete an irresistible pheromone (not to mention phallic plants and horny animals). Everything does everything. Yawn.

A genuine blast from the past is Kevin Taylor's *Girl*, which enjoyed a ten year hiatus between his original *Girl* strips (collected as, er, *Girl*) and his latest pair of graphic novels, *Girl:* 'The Second Coming', in which his demonic dabbler and go-go dancer heroine has become a successful business woman with a club empire and a sideline in sorcery. And gigantic juggs of course. There's also *Girl*: 'The Rule of Darkness', about her struggles to maintain order as a club manageress over both lap dancers and Satan's little helpers and *JILL: Part Time Lover*. As ever it's plastically drawn anal sex and cock sucking to the max, and should really be titled 'How I lost my job and became a prostitute'.

A little literary credibility is added by two volumes of stories by Robert Edison Sandiford, drawn by Justin Norman. Sandiford is a well-known contributor to America's literary porn fiction magazines (well, as literary as porn magazines can get). He understands there's more to erotica than thrashing around, and *Stray Moonbeams* and *Attractive Forces* both let the pictures tell the story in their own time, building atmosphere. Another interesting creator is Jack Munroe, although his *Ada Lee* graphic novels don't feel polished (or indeed finished). They're more like the notes for an interesting lesbian sex book. Ada's a teen prodigy writer who devotes her life (and royalty cheques) to getting drunk and shagging her friends. However the cluster of stories isn't worked out and stops and starts with no real structure. *You can never have too few teen lesbian stories, and The Adventures of a Lesbian College School Girl* by Petra Waldron and Jennifer Finch, does exactly what it says on the tin. It's fluidly if simply drawn, and nothing if not enthusiastic about its subject matter.

Finally there's *Sapphire* by Barry Blair and Colin Chan, only a hop and a skip away from Blair's *Elflord* and *Elfquest* work, full of child-like elfin creatures with exaggerated sexual organs. There is something deeply unwholesome both about the cuteness of the drawing and plot, full of tree-protecting warriors, sorceress/dominatrixes and sacred quests. Bondage and bollocks in equal measure.~FJ

Recommended: *Attractive Forces, Stray Moonbeams*

AMETHYST, Princess of Gemworld

DC: Series one 12 issues, 1 Annual 1983-1984, series two 16 issues, 1 Special 1985-1986, 4 issue miniseries 1987-1988

On her thirteenth birthday, Amy Winston discovers that she's also the twenty-year-old Princess Amethyst, rightful ruler of Gemworld and its twelve royal houses. She discovers this the hard way when she's abducted by the evil Dark Opal, who wants to dispose of her to make his domination of Gemworld complete. From the title and the covers, this looks all pastel colours and dressing-up-games, a truly girly girls' comic, providing yet another princess fantasy for those girls who are so inclined. But, no. It's a thoroughly intelligent adventure story, where the good characters have to work hard at it, facing some very tough decisions, and where the ultimate outcome owes quite as much to sub-plots among the villains as to our heroes' superior firepower, which makes for a particularly satisfying and logical ending. The writing by Dan Mishkin and Gary Cohn is terrific, with some wonderful characters (the swashbuckling Princess Turquoise striking a chord), and with pace and plot that make the twelve issues fly by. The story would probably have worked even without Ernie Colón's artwork, but with it, it's unforgettable. Goodness, that man can draw!

Maybe it's a testament to how very good the first *Amethyst* series was that DC were back the very next year to maul her beyond recognition. Mishkin and Cohn returned as writers (for the Annual, and 1-8), but this time they have no real story to tell, and they take out their boredom and frustration on the characters, ripping from them all integrity and zest for life. From 9, the writing team starts changing every few issues, and thereafter we all know that it's just a matter of time. Sad, very sad. And what can one say in favour of the miniseries? It's mercifully short, and the characters are so far from their 1983 versions that the sight of their zombie forms lurching through these pages is less traumatic than it might have been. The storyline is some gibberish about Amethyst returning to Gemworld to sort out a problem with the next generation, while the real problem – the devastating failure of self-esteem that's affected every one of the female characters – goes unacknowledged and unremedied. Hideous.~FC

Recommended: Series one 1-12

AMMO ARMAGEDDON

Atomeka: *One-shot 1993*

If some boys haven't got big toys then they'll write about them and draw them. An excellent Geof Darrow cover conceals a largely dull weapon-and-war anthology, although at least Warren Ellis and Phil Winslade have the wit to turn in a story about a mechanised penis.~FP

Gray Morrow's AMORA

Eros: *1 issue 1991*

While Gray Morrow's artwork is always decorative, it's only his ardent followers who should be investigating this. It's a ragbag of what seem to be samples for skin mags, well illustrated, but of no other value.~WJ

AMY PAPUDA

Northstar: *2 issues 1990, one-shot (Amy Papuda Returns) 1992*

As bizarre a series as has been seen in comics, *Amy Papuda* blends the spirit of *Beavis and Butthead* with an incredibly bleak sense of humour. The ugly Amy is the butt of many typical high-school jokes, and is abused by a drunken father, but when she arranges revenge she's jailed for her troubles. Her chief tormentor, jock Doug and his sidekick Wally, are suitably ghastly creations, and moments of triumph for Amy are few and far between. Writer and artist Michael Pearlstein's style bears a similarity to that of J.R. Williams (whose 'Bad Boys' strip would seem to be an influence). He's obviously enjoying himself, but the nihilistic approach and casual treatment of deeply upsetting subjects may render *Amy Papuda* thoroughly offensive to some.~WJ

AMY RACECAR Color Special

El Capitan: *2 issues 1997-1999**

The first of these is a retelling of sorts of the story told in *Stray Bullets* 6. Amy is the ultimate assassin and thief, target of everyone who's after the bazillion dollar reward on her head, including her boyfriend. In the second, having destroyed most of the planet, Amy is awakened, five hundred years later, by the pitiful survivors. David Lapham's anti-heroine is hard to dislike, though all other characters are portrayed as idiots or morons. Not exactly a laugh a minute, this is very black comedy, taking wild swipes at the manipulations of fame and popularity and the clichés of science fiction.~NF

A-NEXT The Next Generation of Avengers.

Marvel: *12 issues 1998-1999*

Conceived as part of Tom DeFalco's vision of a second-generation Marvel Universe, A Next missed the mark far more than its sister titles *J2*, *Fantastic Five* and *Spider-Girl*. Without the tight family soap of those books, which offered real opportunities to explore what it meant to have grown up in the superhero community, *A-Next* was little more than another dumb superteam book. One-dimensional characters and an over-reverence for the 'real' Avengers' villains (Loki in 1, Dr Doom by 5) provided the feel of a creative team going through the motions rather than looking to the boundaries of what this opportunity could have offered. Competent but resolutely house style artwork by Ron Frenz did little to raise the interest levels. 10 and 11, in which the team visit a Nazi-ruled alternate reality to which Captain America disappeared a decade before, pushes the right fanboy buttons, but there's nothing original in it. Even its plot of the Scarlet Witch-in-a-coma to seal a dimensional gateway is recycled. Dull, unoriginal and ultimately pointless ... unless the idea of anything original or different ever happening to the Avengers really, really upsets you, in which case you'll probably love its safe mediocrity down to the ground.~JC

AN ACCIDENTAL DEATH

Fantagraphics: *One-shot 1993*

Originally serialised in *Dark Horse Presents* 65-67, artist Eric Shanower and writer Ed Brubaker's quiet but terrible story of teenage death and unspoken codes of secrecy among army brats in the 1970s is brilliantly observed and drawn. The military background is essential to the resonance of the story, particularly the conclusion, and Brubaker's distanced narrative serves to bring the reader closer to the horror.~WJ

Recommended

ANARCHY COMICS

Last Gasp: *3 issues 1978-1981*

A mixture of political and social commentaries, plus historical strips about various Anarchist actions, there's still room for poetry, humour and melodrama in this fine series. In the spirit of the title, the first issue of *Anarchy Comics* is numbered 2.

From Spain's excellent 'Blood And Sky' about anarchy during the Spanish Civil War to Melinda Gebbie's ornate story of Estelle Dufy, and Epistolier and Volny's 'Kronstadt' (reprinted from *L'Echo Des Savanes*), issue one sets a high standard, actually matched by the following issues. It also includes work by editor Jay Kinney, Paul Mavrides, Cliff Harper and Gilbert Shelton. 2 features Kinney and Mavrides' 'Kultur Dokuments', an Archie parody/parable, 'The Black Freighter', adapted by Cliff Harper from Brecht, another terrific history lesson by Spain about Spanish Anarchist leader Durruti (he of Column fame) and more work by Gebbie and Epistolier. 3 is more of the same, augmented by strips from Albo Helm, Gerd Seyfried, early Gary Panter, Sharon Rudahl, Greg Irons and Matt Feazell. Throughout *Anarchy Comics* squarely addressed its theme, prompting creators to produce work of the highest quality, and the inclusion of European material strengthens an already worthwhile package.~NF

Recommended: 1-3

ANARKY

DC: *4 issue miniseries 1997, 8 issues 1999*

It ought to be a treat to read a comic in which the script acknowledges the existence of books, but gosh it's tiresome when Alan Grant does it so assiduously. Self-made boy genius in V For Vendetta outfit Anarky gives first-year philosophy lessons to his dog and attempts to analyse evil with guest stars The Demon, Darkseid, and Batman. No turd was ever polished so dazzlingly as Norm Breyfogle's absurd abstractions by Kevin Nowlan's inks on the covers, a trick you would rightly not expect the hapless Joe Rubenstein to repeat inside. No doubt you get what you pay for. The regular series, by the same team (minus Nowlan, sniff) is less outlandish, though no less silly, and has plenty more guest stars, most notably The Haunted Tank and the USA's founding fathers in a pretty funny 'war is hell' story in 7.~GK

ANCIENT JOE

Dark Horse Maverick: *3 issue miniseries 2001**

Joe believes his recently dead wife has gone to hell and he wants to save her soul. The mood takes precedence over the plot, which fails to address the set-up in satisfactory fashion, or to offer compensation in the form of believable or endearing characters as it meanders to fill pages. This is Scott Morse's attempt at magical realism presented in a ponderous manner with highly stylised art, and it's difficult to imagine it appealing to anyone.~FP

ANCIENT WARRIORS

Caliber: *1 issue 1999*

Anthology dedicated to the greatest warriors of history. The main bulk of the issue features Genghis Khan by Steve Jones and Wayne Reid, not simply in his role as the greatest conqueror in history, but as the civiliser and lawmaker who largely founded modern China and whose innovations and reforms shaped Europe and the world. Competent but dull. Extra features include a look at Agincourt and Hannibal.~WW

ANDROMEDA

Andromeda Publications: *6 issues 1977-1979*

Stylish if somewhat hit-and-miss science fiction comic edited by Dean Motter combining comics talents with a selection of the prose genre's most notable talents. John Allison and Tony Meers adapt James Tiptree Jr.'s 'The Man Who Walked Home' in 1, supplemented by Motter's own 'The Escape and Pursuit of Jeanne d'Arc', and he returns as artist on A. E. Van Vogt's 'Process' in 2. That also has short pieces by Jeffrey Morgan and Ken Steacy, George Henderson, Gene Day and Jim Beveridge. B. P. Nichol and Paul Rivoche's adaptation of Arthur C. Clarke's 'Exile of the Eons' is the star of the third issue, but Nichol and Tom Nesbitt's treatment of Jack Vance's 'The Narrow Land' in 4 falls far short of acceptable quality. In 5 Nichol and Meers combine well to adapt Walter M. Miller's 'The Big Hunger', which is just as well as the rest of the issue is substandard. 6 is an Alan Dean Foster special with Nesbitt illustrating 'Metrognome', Peter Hsu putting pictures to 'Why Johnny Can't Speed', Don Marshall depicting 'Thrust' and Rivoche providing a visual for the very odd 'Where Do You Get Those Ideas?' Generally over-wordy, but book readers might not mind that much.~WW

ANGEL

Dark Horse: *3 issue miniseries 1999*, 17 issues 1999-2001*, 4 issue miniseries 2001-2002**

Technically surtitled, *Buffy The Vampire Slayer: Angel*, the first miniseries is the solo showcase for the vampire-with-a-soul in the TV spin-off, as Angel faces both a woman and a monster from his past, and Buffy and chums, while around, definitely play second bananas. Chris Golden's script exploited the opportunity to display monsters and effects beyond the budget of the TV show, and the art, while generic, was adequate. The ongoing series coincided with the launch of Angel's own TV series. Still with Golden scripting (in collaboration with Tom Sniegowski), it never took flight, and became a monster-of-the-episode cliché, without the charm of the parent programme. The art, largely by Christian Zanier, is indifferent, and only the final issue, a Cordelia spotlight, demonstrates enough wit to make a (not very good) TV episode. Joss Whedon, co-creator of Buffy and Angel, co-wrote the miniseries with Brett Matthew, and the Mel Rubi art, while better, was still not good enough. The four-issue battle with a fellow vampire who seeks a soul of his own wasn't sufficiently interesting to make up for the reader's tried patience with delays, and there are no plans for further Angel solo comics in the foreseeable future. Each issue of *Angel* has two variant covers; one artistic rendering of a scene from the story, and one photo-cover of the star of the TV show, the pouty David Boreanz, brooding into the middle distance, occasionally assisted in this arduous task by his supporting cast. Both variants were equally available, but, comics retailers having some insight into the series' appeal, the photo covers are much more commonplace.~HS

* Available in a collected edition

ANGEL AND THE APE

DC: *7 issues 1968-1969, 4 issue miniseries 1990-1991*
DC/Vertigo: *4 issue miniseries 2001-2002*

A humour series débuting in *Showcase* 77 featuring private investigator Angel O'Day and her gorilla partner, Sam Simeon. Written by E. Nelson Bridwell and Howie Post, the series was illustrated by Bob Oksner, whose nice style was further improved by the inks of Wally Wood in 2-6. The cases they took involved them in the usual hairy detection adventures, with Sam holding down a part-time job as a comic strip artist for an editor named Stan Bragg, who dressed in a snappy Stars and Stripes costume. The final 1960s issue was titled *Meet Angel*. An unpublished story finally saw the light of day in the tabloid sized *Christmas with the Super-Heroes* in 1975.

The 1990 miniseries by Phil Foglio had a more realistic tone, and revealed that Dumb Bunny from the Inferior Five was Angel's half-sister and descended from the ancient Amazons. It's worth sampling, but the best series was the Vertigo one. Howard Chaykin and David Tischman write lashings of acidic dialogue and there's superb art by Philip Bond, who's mastered the technique of ape-expressions. Who killed poor model/dancer Bambi? That starts an outrageous murder mystery full of weird, wonderful and hideous characters. If it doesn't raise a smile you're a boring old fart.~HY

Recommended: Vertigo 1-4

ANGEL FIRE

Crusade: *3 issue miniseries 1997*

Spinning off from *Shi*, this is a tale of cross, double-cross and triple-cross as technologically-enhanced secret agent and hot babe Anastasia Pizer attempts to keep a soviet death-ray satellite out of the hands of organised crime. Woefully derivative twaddle.~WW

ANGEL HEAT

Amazing: *1 issue 1997*

Terrible wet dream fantasy story about a near-naked angel, female of course, landing on the bed of a teenage boy. There's a battle with Satan's minion during which she saves him, followed by a bubblebath. It's all nicely drawn by Richard Fraga, but only for the desperate.~FP

ANGEL LOVE

DC: *8 issues, 1 Special 1986-1987*

This was an unusual series by Barbara Slate, drawn in cartoon style, but with quite realistic settings involving the life of Angel Love, a young woman coping in modern society. The talking cockroaches in her apartment gave the series a nice kookie feel. This would have made a great TV series, and is worth a look.~ HY

ANGEL OF DEATH

Innovation: *4 issue miniseries 1991*

A judge and executioner and his immortal enemy arrive in 20th century USA to play a game of cat and mouse, involving a TV journalist along the way. A not quite professional standard of art mars an otherwise decent potboiler.~WJ

ANGELA

Image: *3 issue miniseries*, 1 Special 1994-1995*

Neil Gaiman fleshes out the background to the angel Angela in this *Spawn* spin-off. Angela is put on trial after her battle with Spawn and his appearance during the proceedings doesn't do much to restore her to the good graces of the rulers of her angelic homeworld, Elysium. Gaiman has fun with the odd couple's adventure in Hell and sets the stage for Angela to go solo in this enjoyable if lightweight series. Greg Capullo's artwork is, as ever, reminiscent of McFarlane's but his straightforward storytelling and attention to detail make the whole thing visually attractive.~NF

ANGRY YOUTH COMIX

Fantagraphics: *4 issues + 2000 to date*

Creator Johnny Ryan isn't so much an angry youth as an obnoxious, whining adolescent determined to offend. Each page of his comic is so full of racial slurs, misogyny and casual obscenity that it becomes difficult to endorse the Ryan 'aesthetic'. Lead characters Loady McGee and Sinus O'Gynus make Beavis and Butthead look like Gareth Gates and Will Young, while co-star Blecky Yuckerella is nothing more than a repulsive woman-thing who exists solely to torment 'the boys'. Ryan is a confident and clear cartoonist who certainly knows how to deliver a good gag, and in places *Angry Youth Comix* is laugh-out-loud funny, so your tolerance for this material could well depend on how close you still are to your inner Fred Durst. Ryan titles the fourth issue *Hot-Headed Cyborg Ass-Kicker!*~AL

ANGRYMAN

Iconografix: *3 issues 1992-1993*

Ned's life falls apart as he has dreams letting him view the actions of Angryman. There's a germ of a good idea hiding in *Angryman*, but the comic can't decide if it wants to be superhero parody or semi-autobiographical. The best issue is 2, in which Ned forms a new relationship and there's a well conceived back-up parody of the Fantastic Four.~WJ

ANIMA

DC: *15 issues 1994-1995*

ANIMAL CONFIDENTIAL

Dark Horse: *One-shot 1992*

Peculiar selection of short stories involving animals. Randy Stradley and Eric Vincent retell the legend of the Hartlepool monkeyhangers to hilarious effect, backed up by Rick Geary, Nina Paley, and parody text stories and ads. Spotty, but entertaining.~HS

ANIMAL MAN

DC/Vertigo: *89 issues, 1 Annual, 1988-1995*

Prior to Grant Morrison getting hold of Animal Man, his previous appearance had been in *Action Comics* 552-553, 1984, as part of a group called The Forgotten Heroes, which wasn't far off the mark. Before that he'd been a small-time 1960s superhero from a short run in *Strange Adventures*. His own title will prove more memorable, not least for the superb cover art of Brian Bolland on 1-63. Chas Truog's interiors in 1-32 are markedly less attractive, and strong scripts by Morrison made the comic a success despite Truog rather than helped by him.

1-4 is a tremendously confident opening story, reintroducing Buddy Baker and explaining his power to take on the abilities of any animal in the immediate vicinity. He's relaunching his superhero career, while living with his wife and two kids. This gives the title a lasting family flavour all its own. Another enduring issue is that of animal rights, introduced with the arrival from Africa of an even shorter-lived 1960s hero, B'wana Beast, to free animals from zoos and research labs. Animal Man fights B'wana Beast at first, but then realises he agrees with him. Such attitudes will complicate his relationship with the authorities, and thus his career (another lasting theme). 5 is a poignant tale of a Wile E.Coyote figure who comes from a dimension where animated cartoons are reality. Alternate worlds and the suffering of cartoon characters for our entertainment will be important later. Things really hot up in 10. *Secret Origins* 39 is a prologue to this story, which sees the reappearance of the yellow aliens whose exploding spaceship accidentally gave Buddy his animal powers. Animal Man's naïve 1960s origin is given the now-traditional late 1980s twist – it wasn't an accident, the aliens deliberately linked Buddy into the 'morphogenetic field' generated by all life on earth. But Morrison then goes as far beyond the 'realistic' superhero style of contemporary comics as they are beyond the 1960s, as characters in *Animal Man* start to perceive the comic-book nature of their reality. In 18-19, Buddy takes a peyote trip and sees the readers of his comic staring down at him. In 20-24 the reality of the DC Universe almost breaks down. It's a sequel of sorts to *Crisis on Infinite Earths*, but with built-in satire and comics criticism, aimed at grim'n'gritty modern superheroes. In 25-26's epilogue, Buddy meets his maker, Grant Morrison, and some of Grant's motivations in writing the series are explored. It's been a truly unique experience.

27-32 is Peter Milligan's underrated run, satisfyingly weird, in which the formerly vegetarian Buddy acquires a strong taste for raw meat, and has more alternate reality adventures. With 33 writer Tom Veitch takes over, with Steve Dillon artwork. Veitch brings a more superficially serious tone to the comic, but achieves less than his predecessors did with their apparently lighter-hearted romps. Case in point: Morrison's Native American character is a professor of physics who helps Buddy perceive the nature of reality, i.e. they are living in a comic book. Veitch's Amerindians are Carlos Casteneda-style mystics, the good guys in a struggle against evil corporate America with its arms factories, computers and killer clones. Which is the more radical, and which a case of seen it all before? Veitch gives us the kind of 'realistic' comic that Morrison mocked. Buddy's powers are explored in tedious detail, and the yellow aliens are revealed as a childish rationalisation of Animal Man's true Native American mystical roots. It's a slim story spread out too thin. Not all that bad, just not in the same league as what came before.

In 51 Jamie Delano arrives to prove that 'serious' doesn't have to mean 'dull'. He integrates Veitch's settings and characterisations respectfully, as with Buddy's daughter Maxine's inherited superpowers (climaxing in 1993's annual, crossing over with The Children's Crusade). He also develops *Animal Man* into something new, if decidedly gloomy in outlook. Animal Man dies in 51, struggling back to a new form of life via the morphogenetic field in 56. Meanwhile his son Cliff suffers at the hands of the sadistic Uncle Dudley, another well developed Veitch element: no supervillains here, but some very dark human evil. In the urban jungle, wife Ellen is almost raped and joins some lesbian feminists in 57-60. 61-63 introduces the idea that the natural world has had enough of mankind's abuses and is going to fight back. In 71, Buddy mutates into a hideous, gargoyle-like form, remaking himself as Mother Nature's champion. He starts a new natural religion, the Life-Power Church, and gathers around himself an army of the dispossessed – hippies, punks, slackers and grungers. The State, of course, fights back. At 79's huge religious meeting/rock festival/love-in Animal Man commits ritual (and overtly messianic) suicide. He thinks that a martyred dead hero will be better remembered than an embittered one living on. With strong art from Steve Pugh and others, Delano takes elements from Morrison and Veitch, plus some familiar to readers of Moore's *Swamp Thing*, and stirs them into his own potent brew, with confrontation of difficult real-world issues, and refusal to find easy answers. Grim'n'gritty to be sure, but in a unique way, with high quality and a mordant wit. Sadly, Buddy Baker couldn't be allowed the peace of the grave, and once again his connection to the Life Web brings reincarnation. From 80 it's writer Jerry Prosser and artist Fred Harper who take on the thankless task. They have a pretty fair stab at it. The Animal Man experience is looked at from the Shamanistic point of view, and the travails of the Life-Power Church continue. It doesn't really go anywhere, though, and it's all over by 89. Ten issues too late.~GL

Recommended: 1-5, 17-32, 51-63, 72-79

ANIMAL MYSTIC

Cry For Dawn: *4 issue miniseries 1995**

Sirius: *6 issue miniseries ('Water Wars') 1996-1997**

Cutesy adventures of Nikki Roanokke, seemingly ordinary California chick revealed as not only the Queen of a tribe of Amazons who live in the Rain Forest (Gettit?), but she's also slowly becoming an animal goddess and saviour of a whole bunch of universes across time and space. Short on sense, and treading a fine line between a Benny Hill chase scene and the last ten minutes of a *Star Wars* movie, but with an honest ecological sensibility, its an okay read if you don't want to be challenged. Dark One is the named creator, and has a strong art presence, in the style of Vaughn Bodé.~WW

ANIMANIACS

DC: *One-shot 1994, 59 issues 1995-2000*

Animaniacs was the longest-running TV cartoon tie-in for several decades (barring *Batman*). The reason is far from clear. Transferring the animated anarchy to comics was troublesome, and while the irreverence and fast gags are present and correct, plots are a problem. Throughout it's the more straightforward humour of the initially sporadic Pinky and the Brain segments that succeeds. From 13 to issues in the mid-twenties occasional specific pop culture targets are satirised, although the target audience surely took little but the gags from 13's *Seven Samurai* pastiche in manga style. Other noteworthy parodies include *James Bond* (14) and *X-Files* (19), including pages from that comic's artist Charles Adlard, but the best issue of the period is 16's wrestling mayhem.

Yakko, Wakko and Dot star in most issues, but rarely occupy the entire comic. Slappy Squirrel is the most frequent back-up feature, but all the TV supporting features have their own strips during the run, all well drawn, but not matching the wit of their cartoon counterparts. In 50 Hello Nurse drops in on all the characters who appear in the show, and they're united again in 59's finale. Their own title cancelled, Pinky and the Brain are cover-subtitled regulars from 43. From this point the Animaniacs feature is only one of three strips, the third slot being occupied by assorted back-ups. The comic is better for the variety, and for Pinky and the Brain requiring a plot rather than being slapstick vehicles. Try their singing version of Evita in 47. Of the later issues 54 is a good sample with the Animaniacs subverting *Leave It To Beaver*, Minerva Mink encountering lecherous dwarves and a decent Pinky and the Brain story.~WJ

ANNEX

Marvel: *4 issue miniseries 1994*

It's quite an achievement to write a strip featuring a 1990s state of the art technology based superhero with the contemporary sophistication of 1940s comics. Jack C. Harris pulls off this feat with aplomb.~FP

ANOTHER DAY

Raised Brow: *2 issues 1995-1997*

A young man discovers he has telekinetic powers, but spends most of his time trying to prevent his sexist friend from being beaten up by various women he's offended, or avoiding the sex games of an all too sociable couple. Charming, funny, underplayed comic that's keenly observant of relationships. If the title continues it deserves a wider audience.~HS

Recommended: 1- 2

---

*Available in a collected edition

ANT BOY

Steeldragon: *2 issues 1988*

Originally self-published minicomics from creator Matt Feazell, these are drawn in a pleasingly loose style. Ant Boy is a human boy raised by ants, and therefore has a skewed view of humanity, their habits and their artefacts. It's very silly, particularly the battle with the lawnmower in 2. Further stories can be found as back-ups in *Captain Confederacy*.~WJ

ANT-MAN'S BIG CHRISTMAS

Marvel: *One-shot 2000*

Considering he's one of Marvel's oldest heroes, Ant-Man has rarely seen the spotlight since the early 1960s in *Tales to Astonish*. There were seven issues of *Marvel Feature*, an artistically impressive solo in *Avengers* 93 and a *Marvel Premiere* outing for his successor, who also starred in *Marvel Comics Presents* 131. This, however, was worth waiting for. The original Ant Man and the Wasp make good use of their shrinking abilities to transform a boy's Christmas and give his odious relatives much-needed lessons. Phil Winslade's art is excellent, and Bob Gale's script witty and well conceived. Apparently a rare flop for the Marvel Knights imprint, rectify this mistake by pulling it out of the bargain bins and giving it a home. No-one with a sense of humour will be disappointed.~WJ
Recommended

ANTARCTIC PRESS JAM

Bite size snippets of *Ninja High School*, *Tigers Of Terra* and *Twilight X*, with the former celebrating ten years of publication. Ostensibly tackling the subject of a coherent real world timeline, the strip also serves as a guide to the cast. There's no such concessions for *Twilight X*, which is labelled 'chapter 07', or the incomprehensible *Tigers of Terra* chapter.~FP

ANTARES CIRCLE

Antarctic: *2 issues 1990*

Third-rate science-fiction that hedges its bets by also going for that furry appeal. Artist Shepherd Hendrix would one day be very good, but you'd not guess it from this.~WJ

ANTHRO

DC: *6 issues 1968-1969*

Not the usual prehistoric/jungle series that it appeared to be. Starting life in *Showcase* 74, *Anthro* was a well written, witty account of a Stone-Age family, the titular character being the eldest son. Howie Post wrote and drew the strip and his wonderful art style suited the setting perfectly. If you want to read something different, try this series, but don't expect *The Flintstones*.~HY
Recommended: 1-6

ANTIETAM The Fiery Trial

The Heritage Collection: *One-shot 1997*

Wayne Vansant's story of the Civil War battle succeeds in bringing it to life by adding small stories of heroism or the effects on the civilians whose homes became part of the battlefield. By contrast, his artwork is not dynamic enough, leaving too much to the accompanying text, itself already compressed to fit a single-issue format.~NF

ANYTHING GOES

Fantagraphics: *6 issues 1986-1987*

Fund raiser featuring some top talent delivering short stories. Among the contributors are Bob Burden, Eddie Campbell, Mark Martin and Dave Sim. Look out 4 with Gilbert Hernandez contributing a 'Heartbreak Soup' vignette, Peter Bagge and a *Journey* short, and 2 with Jaime Hernandez, a disappointing Jack Kirby and Joe Sinnott *Captain Victory* and Alan Moore and Don Simpson's excellent 'Pictopia'. It's a fondly observed lament about the monopolisation of comics by superheroes with thinly veiled guest appearances.~WJ
Recommended: 2, 4

APACHE DICK: The Dick and the Doll

Eternity: *4 issue miniseries 1990**

Spun-off from *The Trouble With Girls*, this highlights the normally ultra-cool Native American best friend of Lester Girls in a tale of seduction and double-cross as he falls for an angel with murder in her heart. Apache's cousin Private Dick embroils the suave ladykiller in a plan to trap a suspected female Bluebeard who has murdered seven previous husbands. Typically, Apache falls for her despite all the warnings and has to eventually redeem himself and catch the hidden silent partner of the murderous black widow Baby Doll. Never as funny as *The Trouble With Girls*, the series relies on decreasingly funny Dick jokes and obvious surprise twists. For *Girls* completists only.~WW

APACHE SKIES

Max: *4 issue miniseries 2002**

The Rawhide Kid is drawn into a vendetta between Rosa and Billy Tyler, when the latter kills the Apache Kid, Rosa's husband and the Rawhide Kid's friend. Things escalate after Billy's death, when his father demands vengeance and hires Colonel Trask to kill anyone in the way of his revenge. This is a terrific western adventure from John Ostrander, only occasionally let down by too loose, or too dark, artwork from the otherwise impressive, Leonardo Manco.~NF

APATHY CAT

Entity: *1 issue 1996*

Superficially, this is by the book anthropomorphic hijinx. Actually, it's the tale of a cat who does... well, nothing much. But for him, apathy is an act of rebellion against the status quo. Clever, inventive and quite charming in an insidious way.~HS

APE CITY

Adventure: *4 issue miniseries 1990*

Charles Marshall writes a far livelier and more interesting version of the apes in this miniseries than he does in the *Planet of the Apes* parent title. Mixing monkey gangsters, ninja apes, heavily armed human killers and a fair amount of humour, Marshall is forced to write with a beginning, middle and end, and proves he can do so. The thrust of the plot is the chase for a crystal that powers the humans' craft, but also offers unlimited energy for the apes. The artwork, though, deteriorates as the series progresses, becoming slipshod and amateur by the conclusion.~FP

APE NATION

Adventure: *4 issue miniseries 1991*

Mixing the concepts from *Planet of the Apes* with TV show *Alien Nation* might not seem a sensible idea. They've little to link them beyond both races being subjugated by humans at some stage, and the comic rights for both series being in the hands of Adventure. Featuring the cast from Adventure's regular *Planet of the Apes* series, the stories have Tectonese forces landing on the apes' planet and forming an alliance with the renegade General Ollo. Joining forces they march on Ape City, on the way encountering a party of apes led by Heston (!) sent to investigate the strange craft. It's lacklustre stuff ending in one big battle. There, saved you buying it.~FP

APHRODITE IX

Image/Top Cow: *4 issue miniseries 2000-2002*

Aphrodite is a synthetic human, possibly the ninth in a series, and assassin, who forgets what she's done after each kill. The mysterious Burch sets up her missions and new acquaintance, Neville Stewart, clearly know more

* Available in a collected edition

than they're telling while Aphrodite's past is starting to reveal itself through her dreams. David Wohl provides the bare bones of an interesting story, but the revealingly posed heroine and muddled storytelling offer little support. David Finch (1-2) and Clarence Lansang (3-4) contribute similar, ornately rendered artwork that has surface attraction, but doesn't hold up under closer inspection.~NF

Miracleman APOCRYPHA

Eclipse: *3 issue miniseries 1991-1992*

This series of short six-eight page vignettes from the past and present of the Miracleman family, by various creators, suffers as all such projects do from fluctuating quality. Okay for die-hard collectors, but the whole idea was largely superfluous.~JC

Underworld Unleashed APOKOLIPS Dark Uprising

DC: *One-shot 1995*

Tying in with both *Underworld Unleashed* and *New Gods*, Darkseid is, temporarily, among the deceased. This offers arch-tempter Neron the opportunity to set the next tier of the Apokolips hierarchy at each other's throats, promising them all that they're destined to succeed Darkseid. It's all reasonably well produced, but merely tangential to both the series with which it's tied, and not a strong enough story to be worth having for itself.~WJ

APORIATICA

Cyberosia Publishing: *One-shot 2001*

This collection of Marcel Guldemond's strips indicates the development of his comics storytelling technique: almost linear for 'In The Dark', the intertwining of texts in 'Resonating Transparent', the nearly wordless, linear, smoking a pack of cigarettes, 'Bill', and the experimentation of 'Under A Slowly Spinning Sun'. Here two separate visual threads compete for attention with three textual threads, only one of which appears to be related to the pictures. There are some excellent drawings here, even some decent storytelling, but the combinations are just so much useless navel-gazing.~NF

THE APPARITION

Caliber: *One-shot ('Abandoned') 1995, one-shot ('Visitations') 1995, 4 issues 1996*

In 'Abandoned', the angel, Adriel helps a young boy abandoned in a forest by his parents. When the angel causes the parents car to crash, killing the evil dad and severely injuring the mother, Lucifer appears and tries to convince the angel that he too has been abandoned by Heaven and takes him on a trip though Hell. All of this before a life-affirming ending... 'Visitations' (with some new stories and others reprinted from *Negative Burn*) and the regular series continue the theme of more people (particularly children) saved in some way by the presence of Adriel. Creator James Pruett tries to avoid sentimentality but ends up with clichéd scenarios and a simplistic manipulation of the reader's emotions.~NF

APPLESEED

Eclipse: *Book one 5 issues 1988-1989*, book two 5 issues 1989*, book three 5 issues 1991*, book four 4 issues 1991**

This translates Masamune Shirow's manga epic set in the aftermath of a non-nuclear World War III. The main characters are Deunan Knute, cute girl soldier who's only really happy when inside an exoskeleton, and Briareos, cyborg warrior and Knute's partner and lover. At the beginning of Book one, the pair are invited to Olympus, a 'utopian' city with ambitious plans for world peace and for the refinement of the human race. Books one and two concentrate on this 'refinement' plan, and this means a lot of factional meetings and parliamentary debates, conducted throughout in fluent gibberish masquerading as philosophical profundity. Meanwhile, Knute and Briareos join the local police force, so each issue has many pages devoted to frenzied and incomprehensible fight sequences, particularly Books three and four, which take a break from the refinement plan in order to spout gibberish about international relations.

Shirow seems incapable of telling a story in a direct, interesting or believable way. One suspects he doesn't really know what the refinement plan involves or what the nations are intriguing about, and to avoid the effort of working out the details, he just has his characters talking about things in vague and pompous terms. Hellishly dull. To call his cast characters, by the way, is to be generous. You can tell them apart only by gender (i.e. bambi-eyes or scars), or by the make of their cyborg parts, or by whether their nose is drawn badly or really badly. With this shaky foundation, it's not surprising that they have problems conducting conversations along the you-make-a-statement-I-make-a-related-response lines favoured by mentally competent adults. Surely the translators could have helped Shirow out here? A thoroughly unrewarding and irritating read – though if you're mad keen on exoskeletons you may get a buzz from skimming through and looking at the pictures.~FC

Not APRIL HORRORS

Rip-Off: *One-shot 1992*

A misleadingly repackaged collection of Doug Wheeler's 'Classics Desecrated' stories from *Negative Burn* and other sources. Kind of, well, a rip-off.~HS

AQUA KNIGHT

Viz: *Part one 6 issues 2000*, part two 5 issues 2000-2001*, part three 5 issues 2001**

When a young knight, Ruliya, is saved from death by lighthouse keeper Arrabarus, she promises to make his son, Ashika, her squire. Before she can do so, however, Arrabarus is killed and Ashika is kidnapped by Alcantara, an inventor searching for a cure for the disease that is killing one of his companions, Zykey. What follows is a series of adventures that further define these characters whilst examining the fantasy world of Marmundo. Yukito Kishiro's story is full of wondrous beings and increasingly important conflicts. His artwork has continued to develop away from manga traditions but this is not as extreme as his previous Ashen Victor. The series ends rather abruptly, leaving the story of Ruliya and Ashika stillborn but there's plenty to admire in what's here.~NF

AQUAMAN

DC: *Series one 63 issues 1962-1971 (1-56), 1977-1978 (57-63), 4 issue miniseries 1986, one-shot 1988, one-shot (The Legend of Aquaman) 1989, 5 issue miniseries 1989, series two 13 issues 1991-1992, 4 issue miniseries ('Time and Tide') 1993*, series three 75 issues, 5 Annuals, 1 Secret Files 1993-2001, one-shot 1998, series four 1 issue + 2003 to date*

Aquaman is one of DC's longest running heroes, making his first appearance in *More Fun Comics* 73 in 1941, created by Mort Weisinger and artist Paul Norris. Throughout the 1940s and 1950s he appeared in *Adventure Comics, Detective Comics* and *World's Finest Comics*, and was one of only five DC superheroes to survive the death of such characters in the late 1940s and early 1950s.

Aquaman was born Arthur Curry, the product of a human and a princess from the underwater world of Atlantis. He can communicate with marine life and the ability to withstand the enormous pressures of the sea grants him great strength and speed on the surface. Despite his long career Aquaman was never a member of DC's 1940s supergroups, and never tried as a headliner until 1961, at which time he could also be found in *Detective* 293-300. *Showcase* 30-33 were written by Jack Miller and Bob Haney, and illustrated by the artist of most 1950s Aquaman strips, the superb Ramona Fradon. 31, though, had art by Nick Cardy, another artist who would play an important role in developing the character, drawing the new title from its inception. These stories all featured Aquaman's sidekick Aqualad, and promoted Aquaman to king of Atlantis. The early issues didn't impress, having the feel of back-up features, and to make matters worse there's the introduction of a 'humorous' water spirit called Quisp. Notable issue among the mediocrity is 11, which introduces Mera, an underwater character from another dimension able to create hard substances from water, a powerful talent never fully utilised. It's a short courtship when Aquaman and Mera marry in 18, and it wasn't too long before Aquababy (that's right, Aquababy) turned up in 23. When Cardy began drawing *Aquaman* he approximated Fradon's cartoony style, but there over the issues his art becomes bolder and more fluid: he drew the most luscious lips on any female character! Another positive side to Aquaman now being a headliner was that he slowly built up a cast of recurring villains, most prominently his evil half-brother, Orm, the Ocean Master, who débuted in 29. It was the first sign of his dysfunctional family. A better supporting character was Tula the Aquagirl, a bit of a wild girl who liked to party, and led Aqualad astray on her first appearance in 33, luring him with her two-piece swimsuit. Or, as Aqualad put it, "Wowee. I like. You're some chick, Tula. In fact that's what I'm calling you from now on, Aquachick!" Well, it was the 1960s. Not all stories were as trivial, with 37's excellent. It begins with a superb cover depicting a rotting seabed with Aquaman holding Mera in his arms. Inside the sea king battles Ocean Master and the Scavenger, a villain who's slowly polluting the Earth's oceans.

---

* Available in a collected edition

From 40 writer Steve Skeates and artist Jim Aparo take over. They produce what remains *Aquaman*'s finest run, starting with a multi-part story, very rare for DC at the time, culminating in 48. Mera is kidnapped in 40, and while trying to find her Aquaman encounters various adversaries. Aparo began by emulating Cardy's style for the sake of continuity, but his unique rendering soon shone through. He was a master of the zip-a-tone effect (pre-computer toning) and his style had a superficial similarity to that of Neal Adams, who drew some wonderful Deadman back-ups in 50-52, tying in to the Aquaman story. Alas, quality doesn't always equate with sales, and the series was cancelled in 1971.

The sea king returned to *Adventure Comics* with 435, and a successful run led to a revived title, in which Aquaman comes to terms with Black Manta murdering his son in *Adventure* 452. It wasn't a long run, and although competent, produced little of note. Aquaman returned to eight years of back-up roles in *Adventure*, *Action* and *World's Finest*, before his next solo run. Neal Pozner wrote and Craig Hamilton worked wonders with a complicated new blue costume intended to camouflage Aquaman in the sea. Atlantis is on the verge of war with humanity over a stolen Atlantean seal, in what's a well-plotted series and very impressive visually. The 1988 special contains nothing of note, and 1989's outlines the revised history of Aquaman, with an expanded origin, and sets up the 1989 miniseries, also written by Keith Giffen and Robert Loren Fleming. Curt Swan and Al Vey, who turn in a wonderfully illustrated story in which Atlantis is taken over by alien creatures. The main thrust, though is the relationship between Aquaman and his estranged wife, with 3 featuring a magnificent battle between them. It only ranks below the Skeates and Aparo run in Aquaman's history.

The 1991 series celebrated Aquaman's 50th anniversary, and takes the previous miniseries as a starting point. Politics and ecological problems feature strongly in Shaun McLaughlin's plots. 'Time and Tide' was written by Peter David, and pencilled by Kirk Javinen, once more recounting Aquaman's origin and chronicling his turbulent life, and was successful enough to prompt another monthly title. Peter David continues as writer, with Martin Egeland illustrating, and they certainly get to grips with Aquaman's personality. He had slowly been changing since the 1970s, becoming more aggressive, and from the start of this series it's no more Mr Nice Guy. In line with DC's policy of giving their older characters more bite, Aquaman grows his hair and a beard necessary to maintain his body weight, since he loses a hand in 2. It's replaced with a form of an adaptable harpoon, and there's another new costume, this time armoured. David populates the series with some old characters, and Aqualad gains new mystic ice/fire powers, and a new costume and name, Tempest. David's most significant addition is Dolphin, a mysterious water-breather introduced in *Showcase* 79, and here Aquaman's love interest. An unwelcome addition is a teenage son, a product of Aquaman's first love. He's a chip off the old block with a chip on his shoulder. Mera returns in 12 (though doesn't hang around for long), prompting domestic strife. David enjoyed himself exploring Atlantean life and history, but none of his plots are memorable. His artistic partners didn't help. Egeland's style never seemed to fit the strip, and his replacement from 32, J. Calafiore was even more miscast. David concentrated too much on the tedious relationship between Aquaman and Dolphin, and by giving her a distinctive personality the whole mystique of the character was ruined. And Aquaman's permanent frown became unbearable. Mera returns in 47 and Erik Larsen takes up the scripting from 50, with more suitable art from Eric Battle (but the frown's still there). It's an enjoyable run up to 61, which puts a new emphasis on the Aquaman/Mera relationship. Luckily his ex-lover, Dolphin hooks up with his ex-sidekick, Tempest and they tie the knot in 60. The excellent team of writer Dan Jurgens and artists Steve Epting and Norm Rapmund arrive in 63 and end the series in fine form. 63-70 is told in flashbacks from the future by a grown-up Tempest to his granddaughter, chronicling the events of the war between Atlantis and a rogue state. After a story featuring another bearded character, Warlord, the series ends on a happy note with happy families, now joined by Tempest and Dolphin's child. And at long last the frown is gone! What makes this work is the sheer readability of the story, coupled with an interesting premise and decent art.

The annuals were based on the theme of the year. 5 featuring the 'Gorilla Warfare' story line was mildly amusing, and you can catch up on Aquaman's past and cast of characters in the *Aquaman Secret Files*. 2003 saw another new series with Aquaman cast out from Atlantis. It's an interesting storyline from Rick Veitch, and the stylised art by Yvel Guichet and Mark Propst works quite well, even though that bloody frown is back again! He gets a new look in 3, but will it be enough to guarantee a long run?~HY

Recommended: Series one 37, 40-52, *The Legend of Aquaman*, miniseries two 1-5, series three 63-70

ARAK, Son of Thunder

DC: *50 issues, 1 Annual 1981-1985*

It was quite a surprise when Roy Thomas, former editor-in-chief and long-time writing mainstay of Marvel Comics, elected for a career and company change with their rivals. DC already had properties in place able to cope with his particular interests – World War II, super teams, tightening up continuity – except for a title to replace *Conan* in his schedule. Not to worry, though, because with a few tweaks and nudges Roy came up with a Native American wandering the globe during the Dark Ages. Unfortunately he'd run through every possible permutation of sword and sorcery while writing two *Conan* titles, and there's nothing to distinguish *Arak* from any other attempt at the genre – not even when the relatively fresh Dann Thomas comes on as co-plotter. It says something for DC's faith in Thomas' ability that they let this meander on for four years, eschewing the neat ending when Arak's heart stops beating in 32. Instead it begins a new sequence with our man now a full shaman. Viking Prince fans may want to investigate his back-up strip in 8-11. Although artist Jan Duursema tries hard to live up to Kubert's version, writer Robert Kanigher certainly holds up his end.~HY

ARCADE

Print Mint: *7 issues 1975-1976*

This was the transition between the often indulgent underground of the 1960s and the idea of producing comics as intelligent material for an adult audience as the class of 1968 grew up. After a trial run with *Short Order Comix*, editors Art Spiegelman and Bill Griffith merged the vitality of the undergrounds with an ambition that far outstrips them and is possibly the finest anthology comic ever produced. Every issue contains work from Bob Armstrong, Robert Crumb, Kim Deitch, Justin Green, the under-rated Willy Murphy, Spain Rodriguez, Griffith and Spiegelman. More than half also play host to Aline Kominsky, Gilbert Shelton, Robert Williams and S. Clay Wilson. Encouraging the top underground creators to flex their talents beyond what they'd produced before results in startling work like Crumb's 'Modern America' (2) and 'That's Life' (3), Justin Green's Brooklyn adaptation of *The Winter's Tale* casting Karl Malden as Polixenes (1), Griffith's biography of Henri Rousseau (3) and Spain's memorable 'Stalin' (4).

The editorial care taken by Griffith and Spiegelman is represented not only in the almost impeccable choice of material, but also in the design, with every contents page presenting a new self-portrait from all contributors. The balance is also perfect. Each issue features vital contemporary material and the work of a top cartoonist or illustrator from the early part of the century, a short strips section, and prose fiction from the likes of Burroughs and Bukowski, illustrated by Crumb or Green. Arcade matches the mixture indicated by the title with humour, polemic, questioning, introspection and plain lunacy from the top talents of the day. If you feel inclined to sample only a single issue, try 2, but you shouldn't stop there.~FP

Recommended: 1-7

ARCANA

Wells & Clark: *11 issues 1994-1997*

The reclusive Clorinda flees a tragedy and meets small-time con merchants Flagg and Foxglove. They journey together revealing more about their pasts and the purpose of their journey to Lorn. It was apparently chance that the cast was portrayed in anthropomorphic style, instantly creating a set of genre expectations that are never played out. There is a very leisurely pace to the writing of T.S. Wells, which picks up a little with 9 when Lorn is reached, and a very understated quality to the storytelling and pastoral covers of Rob Clark. His interior art is heavily crosshatched. Nebulous and obvious clues are dropped that there's a far wider story than was ever told in these issues, but conversely 11 issues should be more than enough to tell a very good story indeed. Instead of building towards the bigger picture in tiny steps, a series of smaller pictures with fewer talking heads might have been a better idea. This will still intrigue and appeal, though, and you can still be drawn in by the characters.~WJ

ARCANUM

Image: *8 issues 1997-1998*

Having conceived a potentially interesting plot about the universal nature of magic, and its tendency to bend those it possesses to one of its extremes, Brandon Peterson then reduces the entirety to pages of crash, bang and wallop between superheroes. The plot was hardly original, but had a far greater potential.~WJ

ARCHANGEL

Marvel: *One-shot 1996*

This black and white one shot, written by Peter Milligan and drawn by Leonardo Manco, was an unusual package for a Marvel X-comic, and one that didn't really work. Instead of giving the story an air of sophistication, as was presumably the intention, the scratchy art looks amateurish and out of place on a Milligan script which is no better suited to the subject matter. The dialogue is stilted, and the plot about the ghost of a woman whose mutant powers draw birds to her is predictable and contrived. Best avoided.~JC

ARCHER AND ARMSTRONG

Valiant: *27 issues (0-26) 1992-1994*

Archer is an ascetic teenage martial arts expert raised in a Buddhist monastery and Armstrong is a bulky immortal carouser. The well conceived and engagingly mismatched characters make for an entertaining run of comics as Archer is incredulous at Armstrong's indulgent lifestyle, and Armstrong is forever the tempter. The first issue, confusingly numbered 0, introduces the pair along with a centuries-old single-minded religious sect who believe Armstrong to be Satan and seek his death, with 1-2 jumping straight into the Unity crossover. Earlier issues are the best, being written and drawn by Barry Windsor-Smith, who stays just the right side of dropping into farce. In 8 (also issue 8 of *Eternal Warrior*, Armstrong's brother) Smith introduces the interesting idea of showing Armstrong's earlier escapades, accompanied by a suitably naïve character in the Archer role. The resulting *Three Musketeers* plot is the best of the run. Mike Baron writes most issues from 13, with Mike Vosburg art from 17. Their run also entertains, but doesn't quite match the Smith issues. The final issue is again combined with *Eternal Warrior*.~FP

ARCHIE

MLJ/Archie: *530+ issues 1942 to date, plus countless spin-offs, related titles, one-shots, annuals and specials.*

Archie Andrews, a well-meaning but maladroit teenager, was introduced in MLJ's *Pep Comics* 22 in 1941 as a back-up feature to some tolerably successful superheroes. He became a money-spinning juggernaut who, by the end of the 1940s, had ousted all MLJ's heroes, and netted the publisher so much revenue that the company was renamed in his honour. Red-haired, freckle-faced Archie is in love with Betty Cooper, the blonde, virtuous (but spunky) girl down the road. He's also in love with Veronica Lodge, the rich, spoiled (but sweet) brunette who lives in a mansion on the outskirts of Riverdale, USA. His best friend is Forsythe P. 'Jughead' Jones, fervent omnivore and woman-hater. Archie's rival for both Veronica's and Betty's affections is Reggie Mantle, a braggart and schemer with a well-concealed heart of gold.

And that's all you need to know to comprehend virtually any of the thousands of Archie stories. Within a year of Archie's début, all these pieces were in place, and the essential dynamic of the series was established. There are many more supporting characters, but these key players have kept an eternal, ageless soap opera spinning for over sixty years. Hairstyles and clothing trends change; a polite nod of recognition is given to whatever fashion, music or media fads are 'in', but nothing really alters. The Archie gang have been secret agents, superheroes, pop idols and actors; they've been recast as tiny tots, as pre-teens, as their own prehistoric ancestors and futuristic descendants, but the relationships remain the same, and at the end of every story, whatever events may have occurred, the status quo is lovingly restored. To feed the unending demand for Archie material, countless writers and artists have laboured in the Riverdale sweatshops; among the most prominent being co-creator Bob Montana, Harry Lucey, Samm Schwartz (who virtually specialised in Jughead stories for forty years), Stan Goldberg, and the illustrious Dan DeCarlo. He arrived at the company in the 1950s, and although he may not have created Betty and Veronica, certainly created the definitive version of them, which has been the template for all subsequent illustrators. Those are the people primarily known for their Archie work, but some surprising artists who have more 'serious' pedigrees, including Kurt Schaffenberger, John Rosenberger, and Gene Colan, have not been averse to adopting the Archie style from time to time for a few extra bucks. And, of course, it mustn't be forgotten that Neal Adams owes his professional debut to Archie Comics, in 1959's *Archie's Joke Book* 41!

Archie has spawned countless spin-offs bearing his name and also *Jughead*, (series 2, 146 issues to date, 1987-present). See other entries for *Betty* and *Veronica*, but they've also co-starred in two series of their joint title, 347 issues (1950-1987) and 182 issues (1987 to date), plus the supplementary Betty & Veronica Spectacular (58 issues to date, 1992-present). Archie's Weird Mysteries (23 issues, 2000 to present) is a mild adventure title spinning off from an animated TV version of the character, and an ensemble title, *Archie & Friends*, (67 issues to date, 1992 – present) features any and all of the characters. There have also been scads of previous Archie titles. Some of the longer-running ones you may encounter are *Pep, Laugh, Life With Archie, Archie at Riverdale High, Archie's Pals n' Gals, Archie Giant Series, Archie's Christmas Stocking, Archie's Vacation Special, Archie and Me, Betty & Me, Reggie & Me, Reggie, Reggie's Wise-Guy Jokes, Archie's Joke Book, Archie's TV Laugh-Out,* and many, many more, including a line of hugely successful paperback-size Digest Comics that have been busily recycling old material since the early 1970s. Since they all have the same cast and premise, this review encompasses them all. The Archie gang are archetypes – some would say stereotypes – whose ageless, unchanging façade is curiously reassuring to those of us who have seen all our childhood heroes mutate into murderous psychopaths. Long may they reign.~HS

AREA 88

Eclipse: *36 issues 1987-1989*
Viz: *6 issues (37-42) 1989*

One of the first Japanese comics to be translated for the American audience, and the choice was a wise one. Kaoru Shintani's story is about Shin, a mercenary fighter pilot who's been tricked into signing a three-year-mission contract to fight as part of a force embroiled in a fictional African nation's civil war. Shin's the best pilot at the base, but tormented by his circumstances. Within a simple structure the stories address complex emotional issues, particularly once the focus expands beyond the airbase and skies from 17. At that point we learn more of Shin's past, his friends and his enemies. The introductory issues tend towards aerial combats, which, while dynamic and varied, don't thrill as they should. 9's story of a war correspondent trapped behind enemy lines is a good starter, and 13 goes a long way to explaining the circumstances of the war and the isolated airbase.~FP

AREA 52

Image: *4 issue miniseries 2001*

Corporal Monica Lane is assigned as security officer to Antarctic military storage facility Area 52. Nothing's happened there for decades, but when a crate from Roswell is accidentally sundered mysterious deaths occur. The other storage crates house the means to deal with the problem, including a magic ring and a lantern that recharges its green energy beams! There's a battle royale in 4. Brian Haberlin dialogues over a familiar plot: John Carpenter's *The Thing*. The characters are well-portrayed and often funny. Clayton Henry's artwork is the semi-manga Image blend we've come to expect and is tastefully offset by Ian Hannin's restrained colour. With a number of strikes against it, this series' gradual development of its characters is still remarkably entertaining. Very readable.~SW

Warrior Nun AREALA

Antarctic: *3 issue miniseries 1994-1995, 6 issue miniseries ('Rituals') 1995-1996, series one 6 issues 1997-1998, 3 issue miniseries ('Resurrection') 1998-1999, Series two 19 issues, 1 annual 1999-2001, 4 issue miniseries ('Ghosts of the Past') 2001, 3 issue miniseries ('Dangerous Game') 2001, Series three 12 issues + ('Books of Peril' 1-4) 2001 to date*

The first miniseries introduces a world where the Vatican, like other religions, has an élite fighting force of warrior Nuns, whose job is to aid the Magic Priests in defending Earth against demon attack. Sister Shannon, recently assigned to New York, meets former nun Shotgun Mary and together they thwart the latest Hell-born invasion (with a little help from the spirit of the original Warrior Nun, Areala, and a wayward demon princess, Lillith). 'Rituals' introduces more characters and builds up the background to the series, including warriors from other religions and guest appearances by other Antarctic characters.

The first ongoing series retreads much the same ground until creator Ben Dunn returns to draw 6 and a vengeful Valkyrie, Helga creates a recurring enemy for Areala's avatars in Nebelhex. 'Resurrection', again by Dunn, adds a purpose by giving Sister Shannon a quest to find the God Armor used by Areala and reusing Nebelhex. Series two has Brian Farrens (1-8) writing with Dunn illustrating 1-4, in which Shannon must prove that the Warrior Nuns are still needed when political forces within the Vatican suggest that the Magic Priests can do everything themselves. A Crimson Nun story is told in 5-6 while Lillith and Shotgun Mary return in 9-12. At this point Chris Allen ends his run as writer (9-12) and artist (5-12). With 13, Nathan Lumm becomes writer, and there's another attempt to find a direction for the character. Shannon is now missing and Eleanore must take her place. The artwork, by Craig Babiar is more stylish here, clearly influenced by manga and the success of animations such as Batman Adventures, though the black and white issues (17-19) are less effective. A back-up story in 14-19, Silver Cross, by Dunn, is based in an academy for trainee Warrior Nuns and Magic Priests. In the annual Kevin Gunstone and John Haward tell the story of a Frost Giant's daughter, Agaberte and her clash with Areala, but the effect is weakened by the pages being printed out of order.

'Ghosts of the Past' and 'Dangerous Game' essentially just continue the storylines, though Craig Babiar takes over story and artwork for the latter, as Sir Charles Westlake decides to do some Nun-hunting. Series three (still by Babiar) begins as another miniseries, 'Books of Peril', introducing new villains, Ivan Seethe (who manages to infect Areala with a techno-virus in 10-12), and Pillage and Plunder, but the numbering has continued beyond the title story's end. Dunn's creation is not quite as bad as it sounds, though the artwork's often rough and there's little depth to the scripts. However, if you like plenty of action performed by beautiful women with superpowers, swords and guns, then this might be to your liking. Issue 3 of the first miniseries has an alternative version that came with a CD soundtrack.~NF

Warrior Nun AREALA Miniseries and one-shots

Antarctic: *One-shot ('Warrior Nun vs Razor') 1996, one-shot ('Portraits') 1996, 4 issue miniseries ('Scorpio Rose') 1996-1997, one-shot ('Warrior Nun Areala and Glory') 1997, 2 issue microseries ('Frenzy') 1998, 2 issue microseries ('Rheintöchter') 1997-1998, 4 issue miniseries ('Angel of War') 1998-1999, one-shot (Warrior Nun Areala/Razor: Revenge') 1999, one-shot ('Manga') 2000, 3 issue miniseries ('Brigantia') 2000*

Drawn by Areala's creator, Ben Dunn, the first Razor issue is full of textual errors that distract from the fight against a demon-possessed child-killer. 'Revenge' appears to be Dunn's homage to Jack Kirby as our heroes try to rescue a missing doctor from some monstrous aliens (several other meetings between the characters have been published by London Night). 'Portraits' is a collection of pin-ups by the usual Antarctic artists, but with the addition of some unexpected names. Among them are Bob Burden, Colleen Doran, Stan Sakai and Evan Dorkin. Steve Englehart's 'Scorpio Rose' has a more entertaining and challenging script (both for the reader and for Areala's own beliefs) as the pair take on demons within the Vatican over a four hundred year period. Dunn's erratic artwork makes it hard going, however. Dunn overwrites and draws the comedy meeting with Glory in which comic writer, Rod

McLarsen sells his soul and brings his strangely familiar creations (such as Demonspawn) to life. Esad Ribic's autumnal, painted palette of 'Frenzy' makes it worth looking for. The story, by Miljenko Horvatic, teams warrior nuns, Frenzy and Shannon to stop a spate of church burnings. In Yanick Paquette and Michel Lacombe's 'Rheintöchter', mermaid-like creatures become the focus for an overzealous priest until a warrior nun arrives with some tolerance. 'Angel of War' is Areala's origin, covering her youth as Auria, her death and rebirth as a Valkyrie, and her rebellion against Odin and adoption of Christianity. Though the story hinges on her conversion, taking after her mother rather than her Viking father, and little attempt is made to examine religious differences. Craig Babiar's art is not served well by the transition from colour with 3. The 'Manga' issue was originally produced in Japan by fans of the series. Run Ishida's Japanese nun, Sakura, meets a demon who forces her to think about the true origins of the evil she faces. The dull and poorly drawn, 'Brigantia' is set during the Second World War and sees Churchill send Brigantia to recover the head of King Bran which allegedly protects Britain from invasion. For fans of the characters, 'Frenzy' and 'Manga' offer the most rewards, though Englehart almost rescues 'Scorpio Rose'.~NF

ARGON The Savage

S.Q.P. Inc.: *2 issues 1991*

Displaced from his own time, Argon is a powerful telepath, thrust into a warring galaxy. With Professor Drakosky and warrior-woman, Cara, Argon searches for a near-mythical super-weapon on the dead planet, Mather, to which the female cult of Nejas has been flocking, and where the Confederation believes it can capture them. This is fast-paced science fiction fantasy from Fernando Fernandez with fine artwork, but it's very much an all-action adventure with little time for anything but plot.~NF

The ARGONAUTS

Eternity: *4 issues 1988-1989*
Alpha Productions: *2 issues ('System Crash') 1993*

The Argonauts are a team of adventurers including a mathematician, a test pilot, a spy, and a female special effects expert who combat the Advanced Bio-Engineering Concepts (ABEC) Corporation. In 1-2 a scientist breeds mutated humans in an underground bunker, convincing them they survived a nuclear holocaust. Former Argonaut, Lila Haven leads an attack on the Vector Foundation where they're based (3), and a vigilante group also sets its sights on ABEC in 4. The story is incomplete at this point, with the Alpha Productions issues starting afresh. Writer, Bill Spangler, is clearly working hard to give his characters personalities, while Patrick Olliffe's art on the Eternity issues was still unpolished.~NF

ARGUS

DC: *6 issues 1995*

Another of the heroes created during 'Bloodlines' tries out for a regular series. Argus is an undercover cop in the mob whose childhood links to the underworld have given him a position of power as second in command to D'Angelo, a mob leader. With super strength, invisibility and some mysterious visual powers, Argus finds himself fighting to prevent D'Angelo using satellite technology to create his own empire. Mark Wheatley and Allan Gross tell a good story, making Argus' character a pivotal aspect of the plot and showing how it influences his powers. Phil Hester's artwork on 1-4 is stylish and makes excellent use of blacks for atmosphere, but Luke McDonnell's two issues are less adventurous.~NF

ARIA

Image/Avalon Studios: *4 issue miniseries 1999**
Image: *2 issue microseries (Aria Angela) 2000, 6 issue miniseries ('The Soul Market') 2001-2002, one-shot ('A Midwinter's Dream') 2002, 2 issue microseries ('Summer's Spell') 2002*

The glamourous Kildare is an Irish faerie princess living in New York, a practitioner of the magic of which the wider world remains ignorant. Brian Holguin writes everything, the one-shot apart avoiding the cloying sentimentality often associated with faerie stories, liberally and imaginatively adapting his cast from myth and legend. They're engaging eccentrics who compensate for slim plots. The alluring airbrushed work of Jay Anacleto, is on all covers, the first and fourth issues of the first miniseries, the one-shot and the first microseries, which co-stars the fallen angel from *Spawn*, Angela. David Yardin's first professional artwork appears in the second miniseries, and his growth can be charted over five issues, during which he contributes less and less, leaving the concluding chapter to other artists. That series has the disruptive sprite Robin Goodfellow come to New York to sell souls captured in paintings. He may be a mythical character, but here he's all too obviously *Hellblazer*'s John Constantine. The series builds well, but the conclusion disappoints. The poor one-shot is two-thirds the height of a regular comic, with Holguin's text accompanied by Anacleto's portraits. There's the germ of a fair story to 'Summer's Spell', set in 1960s London, but in dropping in every cultural reference he can, Holguin ensures anyone over twenty-five will have stopped paying attention long before the end.~FP

ARIANE & BLUEBEARD

Eclipse: *One-shot 1989*

One of P. Craig Russell's series of opera adaptations, in this case Maurice Maeterlinck's allegorical poem and Paul Dukas' music/stage-play. Russell's ornate artwork is always a delight and he manages to capture both the beauty and the drama of the original work (the colouring doing much to offset the lack of sound).~NF
Recommended

ARIK KHAN

Andromeda: *3 issues 1977-1979*

One of the earliest independent titles, and seemingly a labour of love from creator Franc Reyes. He put a lot of work into creating a real world for his character, which makes it a shame that this is nothing but bog-standard barbarian material. Except the back-ups, which are sub-standard barbarian material.~FP

ARION

DC: *Lord of Atlantis 35 issues, 1 Special 1982-1985, 6 issue miniseries (The Immortal Arion) 1992*

Introduced as a back-up in *Warlord* 55-62, the first series is sword-and-sorcery-based, with Arion as Lord High Mage of Atlantis in 45,000 BC, a period of mystical transition as a great civilisation begins a slow decline. Paul Kupperberg and Jan Duursema are responsible for most issues (although Doug Moench donates Arion's origin in 4 & 5), and provide quests, sorcery, dragons and other standard fantasy trappings. If that appeals, look at 12, featuring most of the cast and a fair feel as to the rest of the series despite Arion being temporarily bereft of power. The first series concludes in the 1985 *Arion Special*. The second series has a very different flavour. The age of magic is long past, but the immortal Arion remains, barely surviving as a card sharp in New York and telling true stories about his past that no one believes. Magic returns, tensions in the Middle East escalate, a familiar foe is back and Arion has to figure how to make a twenty year old woman love an immortal. The ideas are better, and this series makes for a more satisfying read.~WJ

ARISTOCRATIC XTRATERRESTRIAL TIME-TRAVELLING THIEVES

Comics Interview: *One-shot 1986, 12 issues 1987-1988**

Small alien Fred and human Bianca are the best thieves any time any place, and in their two first issues steal the formula for Coke and artwork for the *Dazzler*, which indicates the way the series is. Fred and Bianca are likeable, gags abound and entertainment is a priority for creators Henry Vogel and Mark Propst. Quality varies, but

* Available in a collected edition

no issue is dull. Try 3, in which the pair steal a Mom robot without understanding what it is. Created during the fad for adjective-heavy titles, the joke had worn thin by 7 when the title was contracted to *X-Thieves*.~FP

ARKAGA

Image: *1 issue 1997*

Promising science fiction saga that looks good, in spite of artist Arnie Tang Jorgensen's sometimes odd mix of eastern and western styles. Writer David Meikis' script doesn't appear particularly challenging – our heroes are trying to stop the evil Lord Arkaga who is attempting insurrection from 'The Empire' – but there's enough in this single issue to warrant reading the next.~NF

ARKANIUM

Dreamwave: *2 issues + 2002 to date*

Ridiculous, portentous dialogue, at times incomprehensible storytelling and ghastly computer colouring. It takes its inspiration from the Tony Wong school of martial arts comics, but without the imagination. Topping off the whole package, Dreamwave have a terrible company logo.~WJ

ARMAGEDDON

Chaos!: *4 issue miniseries 1999-2000*

Company crossover in which the whole Chaos! Universe is about to be destroyed by Armageddon, the Father of Fear. The Chosen, Bedlam and Chastity appear to be humanity's only hope while Lady Death, Evil Ernie and Purgatori play out their long-standing personal conflicts in connected issues of their own titles. Written by Brian Pulido and Len Kaminski, drawn by Luke Ross, this works well as the comics equivalent of a disaster movie.~NF

ARMAGEDDON: THE ALIEN AGENDA

DC: *4 issue miniseries 1991-1992*

The middle part of DC's *Armageddon* trilogy sees Monarch and Captain Atom whizzing about through time fighting hideous aliens. The pick of the four is issue 3, where writer Jonathan Peterson has lots of fun with DC's western heroes. It's well drawn by Al Weiss, and Dick Giordano acquits himself well in 4, but there's nothing essential here.~DAR

ARMAGEDDON: INFERNO

DC: *4 issue miniseries 1992*

Written by John Ostrander different chapters are drawn by Luke McDonnell, Tom Mandrake, Art Adams, Mike Netzer and Walt Simonson. The whole ties in to DC's multi-part crossover from the previous year, *Armageddon 2001*. Some strange combinations of characters (including the bizarre grouping of Guy Gardner, Starfire, Orion, Lobo and Enemy Ace) are sent to stop the evil Abraxis and his daemen but about the only significant aspect of the series is that it's the basis for the release of the JSA from their battle to prevent Ragnarok.~NF

ARMAGEDDON: INFERNO

DC: *2 issues 1991*

A time-traveller from 2001 knows a 1990s DC hero has turned bad, but doesn't know which one. 1 introduced the idea, which ran through all DC annuals in 1991 before concluding in 2. By Archie Goodwin, Dan Jurgens and Dick Giordano, it was never going to be bad, but neither is it essential reading.~FP

ARMATURE

Olyoptics: *2 issues 1996-1997*

A strange, self-published fantasy created by colourist Steve Oliff, set in 'the only holographic alternative reality theme park on the planet' (LSD fuelled). It owes something to Jim Woodring's *Frank* and Sam Kieth's Maxx (who makes a guest appearance in 1). That said, Armature, a mute, twisted, skeletal figure, looks to be a playful but potentially more serious character, as he wanders the park and meets Limbo and talking dog, Redgy, who can walk between dimensions and are searching for Shadow Marks, herself looking for the ghost of her mother. Unfortunately, the series has not been continued.~NF

ARMOR

Continuity: *Series one 13 issues 1985-1992, series two 6 issues 1993*

Even amongst a company that prizes artwork as much as Continuity, Armor stands head and shoulders above its companion titles. Pencillers Tom Grindberg (1-4), Sal Velluto (12-13, series two 1, 2 and 4) and particularly the excellent Brian Apthorp (7, 11 and series two 3, 5, 6) all produced some fine work, but it was the superlative inks of Rudy Nebres (2-10, 12, 13, Series two 1, 2) that raised this title to its lofty artistic heights. Sadly the fine art was saddled with Continuity's typically addled stories and English-as-a-second-language dialogue. The title's nadir came with 10's hard-hitting drug exposé 'Kracky The Clown's Krack House', which was every bit as stupid as you'd imagine it to be. The second series is chapters of the company crossover 'Deathwatch 2000', but, as with the first, a comic to savour visually but on no account to be read.~DAR

ARMORINES

Valiant: *13 issues (0-12), 1994©1995*

A bunch of U.S. Marines are equipped with armoured suits and weaponry derived from the X-O Armour, and become pawns of various factions within the government and military. A mostly action series lacking well defined characters, launched when Valiant was in decline, and an early victim of their 1995 cutbacks. 0 was released as a separate premium item, but is more commonly available bound into X-O Manowar 25.~HS

ARMORINES

Acclaim: *4 issue miniseries 1999*

Feeble and histrionic re-hash of the super-armoured soldiers refitted and reunited to fight invading spider aliens. Slick pictures can't save this cynical tie-in to yet another computer game shoot-'em-up.~WW

ARMY AT WAR

DC: *1 issue 1978*

The "exciting new idea" proclaimed on the cover banner appears to have been cancelling this ordinary war anthology title after a single issue.~WJ

ARMY ATTACK

Charlton: *Series one 4 issues 1964-1965, Series two 10 issues (38-47) 1965-1967*

A routine war anthology with US fighting men winning World War II, although most feature fine artwork from Sam Glanzman. The second series increasingly featured vivid and realistic stories (probably by Joe Gill) of the then ongoing Vietnam conflict, with Glanzman illustrating at the top of his form.~WW

Recommended: 46

ARROW

Malibu: *One-shot 1992*

Malibu's archer type has a chance to rectify a mistake from five years previously in this rather pointless one-shot. Artist Lee Moder progressed to better things.~FP

ARROW ANTHOLOGY

Arrow Comics: *4 issues 1997-1998*

An eclectic mix of comedy, superhero and fantasy, with some characters appearing out of or previewing separate series, such as *Dark Oz* and *Tales from the Aniverse*. The best and most interesting strips are 'Crimson and Clover' (a *Night Streets* tale) from Mark Bloodworth (1-2), in which the Black Dahlia and Blonde Venus apprehend a serial killer, and Andrew Pepoy's funny detectives, Simone and Ajax (2-4), though their origin story is left unfinished by the non-appearance of 5.~NF

ARSENAL

DC: *Special 1996, 4 issue miniseries 1998-1999*

Green Arrow's sidekick, Roy (Speedy) Harper, grew up, diversified into a weapons expert, fathered a daughter with an international nuclear terrorist, and started to call himself Arsenal. The one-shot has him going off to capture a drugs baron in a convoluted tale where there's little difference between the good guys and the bad guys. All this grim and gritty nonsense is such a bore. Give it a miss. It's back to heroics for the miniseries by Devin Grayson and Rick Mays, who hit the target as far as the character's happy-go-lucky attitude goes. Harper and offspring are related to immortal bad guy Vandal Savage, who's looking for some spare body parts to keep himself going. Hasn't he heard of cloning? It's a serious, but fun tale that also explores Arsenal's past, his drug addiction, relationship with Green Arrow, and native American upbringing.~HY

ARSENIC LULLABY

A Silent Comics: *14 issues, 1 Special 1998-2001*
AAA Milwaukie Publishing: *1 issue 2001*

Describing *Arsenic Lullaby* as a comic that takes the horrors of the world and makes you laugh at them is either doing a great or appalling job, depending on your outlook. A sample: two flies are watching a TV appeal for the starving commenting on how great the conditions are what with fetid water, open sores and sewage on the street. Another strip is the sitcom like (and wrongly spelled) 'The Devil Your Nieghbor', in which Satan, later downgraded to a witchdoctor, sorts out neighbourhood problems. Babies feature heavily, both in numerous abortion clinic gags, and in a strip where federal agents have to kill them in order to ensure the continuing accuracy of census statistics. If you don't find anything remotely funny in this, stay well away from the rest. Like Ivan Brunetti and Bob Burden, Doug Paszkiewicz has a unique view of the world, and like them it's not for everybody. If your sense of humour is black enough, though, *Arsenic Lullaby* is hilarious. Most of the comics along with some new pieces are available in the collection 'The Devil's Hat Trick'.~FP

Recommended: 1-14, Special

ART D'ECCO

Fantagraphics: *4 issues 1990-1992*

Art D'Ecco contains various strips by the Langridge brothers, Andrew and Roger. Andrew 'generally' writes them, and Roger "generally" draws them, in a variety of angular styles, if the introductions are to be believed. The title character, a Frankenstein's monster lookalike, and his triangular friend Gump engage in various surreal and zany adventures interspersed by short strips. Throughout *Art D'Ecco* is clever and considered and has an extremely good line in visual slapstick. And which other creators would box off congratulatory letters from fellow artists and writers and call it 'Wank Corner'?~FJ

ART SCHOOL SUPERSTARS

Fantagraphics: *One-shot 1998*

Simon Grennan and Christopher Sperandio have succeeded in the fine arts world by appropriating the form of comics and applying a decent sense of design. Should they be applauded for exploiting the gullibility of the art world, or should we be appalled at the notion that any old tosh can be considered art? This slim, but well-produced volume consists of full page head shots and snippets of interviews with art school students. "Are they art stars of tomorrow?" asks the blurb. It's unlikely, and no-one should care about this until they are.~FP

ARTBABE

Fantagraphics: *4 issues 1996-1999**

Jessica Abel is a very earnest writer attempting to find some answers about human emotion through her comics. Each issue is a self-contained story about twenty-somethings, and in each her protagonist is lacking something, possibly indefinable, in their life. Abel is adept at capturing the mundanity of real life conversation, including a wealth of small details, but page after page of such conversation or similar captioned introspection results in detached and dreary comics. The art is expressive, but also out of proportion and overworked.~WJ

ARTESIA

Sirius: *6 issue miniseries 1999*, 6 issue miniseries ('Afield') 2000-2001, 2 Annuals 1999-2001*

The daughter of a witch, priestess of dread goddesses and a magician with power over spirits, Artesia is also the Captain and concubine of Branimir, King of the Highland citadel of Dara Dess in Daradja. Jealous of her military victories, though all in his name, Branimir conspires with emissaries from the Middle Kingdom, worshippers of Islik, the Divine King, to kill Artesia. After taking a bloody revenge on Branimir, Artesia learns that the Middle Kingdom has been invaded by the forces of the Empire of Thessid-Gola. Exhausted after their own campaigns, the other Citadel Kings of Daradja appoint Artesia their representative and she rides with her forces against the invaders, eventually accepting the title and responsibilities of Queen of Dara Dess.

Mark Smylie's epic fantasy is richly detailed and far more complex than such a short plot synopsis would suggest. Each issue offers a textual essay providing background information on the history, politics and mythology of Artesia's world. The annuals contain short stories complementing the main series as well as information about the culture and character of the different peoples that populate them. Smylie's sympathetic watercolour artwork is enhanced with coloured pencil and ink. The writing is thoughtful and mature, as concerned with the nature of war, leadership and their consequences as with the characters, intrigues and conflicts that propel the story forwards.~NF

Recommended: 1-6, 'Afield' 1-6, Annuals 1, 2

ARTHUR: KING OF BRITAIN

Caliber: *5 issues 1997-1998*

Stripped down re-telling of the Arthur legend basing itself on the Geoffrey of Monmouth version rather than the better known *Morte D'Arthur* by Sir Thomas Mallory. All that means to you and me is post-Romano Britain rather than Camelot, so no Knights or Grail Quests, just brutes slaughtering each other. Adequate drawing and predictable writing from creator Michael Fraley but its all been done before and better.~WW

ARTISTIC COMICS

Golden Gate: *One-shot 1973*

Although published in comic format, this is not a comic per-se, rather a collection of sketchbook pages from Robert Crumb. Of course, Crumb is no typical artist and his sketchbooks are a delight, mixing fragments of strip with outrageous doodles and beautifully realised life studies. Underground fans and Crumb afficianados should search out a copy.~DAR

ARTISTIC LICENTIOUSNESS

Starhead: *1 issue 1991*
Comix Bitch: *2 issues (2-3) 1994, 1997*

The original impetus for this, before Roberta Gregory's success with *Naughty Bits*, was to produce a quickie porno comic to make easy money. Gregory took every opportunity to introduce sex between her characters. Despite this it grew into an organic soap opera about which Gregory rapidly became obsessive, hence the long gap between issues. Reading a sex comic about human-looking, normal people who don't have perfect chiselled fantasy bods and are as fucked-up as the rest of us still has great appeal even if the original prurient motivation didn't quite come across. Pressed for time to work on *Naughty Bits*, Gregory brought the series to a semi-conclusion with 3, though she promises to revisit the characters someday.~HS

ASCENSION

Image/Top Cow: *22 issues 1997-1999*

Two races, the Dayak and the Mineans, have been living alongside but unknown to mankind, and are at war over a formula that can resurrect an ancient evil. Coming into contact with a few pages of this formula causes Lucien Barnes and Andromeda Weaver to gain strange powers as they try to rescue a young, winged girl who turns out to be heir to the Minean throne. Security chief Vladimir Gregorieff is also affected but uses his powers to aid the Dayaks and succeeds in resurrecting Voivodul. After the conclusion of the Voivodul storyline in 6, Gregorieff becomes leader of the Dayaks but his genetic experiments eventually have unforseen consequences, while Lucien and Andromeda become involved in a power struggle over Minean sovereignty.

---

* Available in a collected edition

Created by David Finch and Batt the artwork begins with a fluid, ornately rendered style and the story tries hard to be more than just another angels versus demons fantasy. However, the storytelling's both hard to follow and difficult to care for while Finch's departure after 13 produced a different artistic team with almost every subsequent issue. A new creative team in 20 simply brought back Voivodul.~NF

ASH

Event: *6 issues 1994-1995*, one-shot ('Zero') 1996, 2 issue microseries ('The Fire Within') 1996-1997, 6 issue miniseries ('Cinder & Smoke') 1997, 2 issue microseries ('Fire and Crossfire') 1999*

Ashley Quinn is a fire-fighter whose life is saved by a genetically enhanced warrior from the future. Ashley is given power over fire and he takes on the task of preventing the alien, Adam, from destroying the world. Written and drawn by Joe Quesada and Jimmy Palmiotti, the mix of science fiction with 'real-life' heroics and amusing characterisation holds the attention. The artwork's at it's best, however, before 'The Fire Within', which was never finished. For 'Cinder & Smoke', Mark Waid and Brian Augustyn take over the scripting with Humberto Ramos on pencils. The future-threat is dropped in favour of more straightforward superheroics. Ashley's policewoman sister, Maureen, investigates the death of their father (in a fire) while a villain called Molotov sets fires in a mob war and an assassin called Smoke tries to kill her as she gets closer to the truth. Ramos' characters look too young but this is a well-told story that doesn't overly rely on fights to establish character. Quesada and Palmiotti return as artists for 'Fire and Crossfire', which James Robinson writes. It begins with the near death of Ashley's mother and the return of a previous villain. From there it reverses the subtle ending of 'Cinder and Smoke', and with Quesada appointed to Marvel has never been heard of again.~NF

ASH/22 BRIDES

Event: *2 issue microseries 1996-1997*

Enjoyable enough adventure as the Brides and Ash get drawn into a chase to possess a key to some secret technology (that may or may not be related to Ash's origin). Girl gang the Brides are portrayed in the usual light-hearted way by writer Fabian Nicieza but fireman Ash is more of a cipher. Humberto Ramos provides good, tight pencils which give the work a harder edge, nicely undercutting the comedy-thriller basis of the story.~NF

ASHEN VICTOR

Viz: *4 issues 1998**

This is a tale from the world of *Battle Angel Alita*, set before her arrival and participation in the Rollerball-like sport of Motorball. Snev's a competitor who's never recovered from the death of a member of the audience, killed after running into his path during a race. Beretta, Snev's prostitute girlfriend, is brutally murdered by an assassin possibly hired by the Megil Corp, which has been secretly using Snev as the guinea-pig for a new drug. Now Snev must find a missing bag that might hold the answers to this mystery. The story's a good action-adventure thriller, but the artwork is what makes this compelling. Taking a lead from Frank Miller, Yukito Kishiro has produced some marvellous, shadow-driven drawings. Relying less on swathes of black than Miller, Kishiro switches effortlessly between characterisations in negative and more delicately rendered line-drawings.~NF

Recommended: 1-4

ASHES

Caliber: *6 issues 1990*

A selection of short stories by John Bergin (with occasional writing assistance), mixing reprints from his arty self-published zine Brain Dead and new material. Bergen circles round the same themes like a vulture: religious guilt, vampires, torture and doomed love surface again and again. Amateur psychologists will have a field day counting the number of times a vagina dentata (women's bits with teeth) crops up in the artwork. Ashes is an angry book that broods on the unfairness of life without becoming tiresome. Some of the stories attain an almost transcendent sense of magic realism; others come over like Hammer horror. It deserves to be read for the inventiveness of Bergin's drawing, from spiky inks to soft charcoal, if nothing else.~FJ

ASKANI'SON

Marvel: *4 issue miniseries 1996*

Following the first series of *The Adventures of Cyclops and Phoenix*, *Askani'son* continues the story of the boy who will one day grow into the man called Cable. Scott Lobdell and Gene Ha once again weave an intricate tale which is part fantasy, part superhero, mixed with liberal dashes of science fiction. As young Nathan continues his journey towards his destiny as the saviour of a desperate world, more of the pieces fall into place, among them the first meetings with his mysterious mentor Blaquesmith and his wife-to-be Alyia.~JC

ASRIAL VS CHEETAH

Antarctic: *2 issue microseries 1997*

Also collected into a single issue, you basically get what it says on the cover, poorly drawn and with little plot. Those already familiar with the characters from *Gold Digger* and *Ninja High School* might not object, but it won't win any new readers.~WJ

ASSUME NOTHING

Slab-O-Concrete: *1 volume 1997*

Leanne Franson's Liliane minicomics were a highlight of the early 1990s. Autobiographical pieces, they dealt for the most part with being bisexual, firstly coming to terms, then the politics involved. These were no dry diatribes, though, and issues were handled in witty and understanding fashion, all drawn in a simple, expressive style. This reprints and reworks some of the minicomics alongside new strips, although there's a broader scope to the topics. A second volume titled *Teaching Through Trauma* is more of the same, and equally good. Sadly all too few of Franson's comics have seen a wide circulation, so these are to be cherished.~FP

Recommended

ASTER

Entity: *3 issues 1994-1995*

Filipino produced fantasy about a Celestial landing on a primitive planet and forging his destiny. It's unremarkable with over-rendered art until the first work for the American market by Leinil Francis Yu in 3.~WJ

ASTERIX

Hodder and Stoughton/Orion: *33 volumes 1961 to date*

Created for the weekly French anthology comic Pilote in 1959, Asterix has become one of the few globally recognised comic characters through worldwide circulation of the collections. The stories are set in the Roman-occupied Gaul of 50BC. One coastal village remains beyond Caesar's reach due to the magic potion brewed by village druid Getafix. Those drinking the potion are endowed with great strength, speed and invulnerability, the exception being the giant Obelix, who requires no potion, having fallen in the brew as a baby, with lasting consequences. Artist Albert Uderzo's open and expressive cartoon style is ideal for conveying René Goscinny's largely slapstick scripts.

Asterix the Gaul, although primitive by later standards, sets the premise and introduces most of the recurring cast. The best of the early titles is *Asterix the Gladiator* (4), as Asterix and Obelix fight in Caesar's arena to free their village's captured bard Cacofonix. The Asterix formula develops early, with most stories involving Asterix on a quest accompanied by Obelix, often in a foreign land, enabling the creators to take easy swipes at national stereotypes. Running gags include a band of inept pirates whose ship invariably sinks on contact with Asterix, the fearsome Roman legionnaires reduced to a bruised mass, and modified speech balloons conveying mood, nationality or character. By *Asterix and Cleopatra* (6) Goscinny and Uderzo are finding their feet, stepping beyond mere farce to address wider concerns, and the series begins to gel as both children's entertainment and social satire. Uderzo's art has become more detailed and researched, and the main characters have solidified into their final forms.

1967's *Asterix the Legionary* (10) begins a golden era, with both creators hitting peak form and inventive plots flowing for the next five years. Oblelix volunteers to rescue the boyfriend of a girl he himself yearns after in a story satirising military bureaucracy and inflexibility. It temporarily exhausts the national stereotype jokes, as Asterix and Obelix encounter assorted other foreign legionnaires. It's noticeable that there are only two foreign adventures in the following nine albums, *Asterix in Spain* (14) and the excellent *Asterix in Switzerland* (16), with its hilarious portrayal of a corrupt official.

The problem with an invincible village is that their indomitability works against the strip after a while, requiring Goscinny to conceive ever more inventive ways to circumvent the easy answer of the magic potion (although it invariably saves the day eventually). In *Asterix and the Big Fight* (7) Getafix becomes amnesiac and is unable to brew a potion, and in *Asterix and the Soothsayer* (19) the villagers' own superstitions almost cause their downfall. In the best album of the series, *Asterix and the Roman Agent* (15), Caesar, realising force alone won't prevail, enlists a Roman with a particular talent for sowing discord wherever he travels. His arrival has the villagers at each other's throats, and the book ends with a mass battle involving all local Roman garrisons and the village, masterfully condensed to a single page. Developing the area around the village is Caesar's plan in *The Mansions of the Gods* (17). It's an uncharacteristic tale castigating urban development and promoting conservation: not only is Asterix omitted from the title, but the Gauls only play a small part for much of the story, planting magic acorns to replace trees removed by the Romans.

By 1972 Goscinny appears to have overdosed on Asterix. Stories now only appeared on an annual basis, and although always professional, some were more contractual obligation than inspiration. *Asterix and Caesar's Gift* (21), with a challenge to Vitalstatistix's position of Chief, is excellent, but only Obelix and Co (23) otherwise displays much spark. Goscinny died after completing *Asterix in Belgium* (24), and Uderzo continued the series alone. His first efforts, *Asterix and the Great Divide* (25) and *Asterix and the Black Gold* (26), were shaky, but by *Asterix and Son* (27) he'd mastered the formula. *Asterix and the Secret Weapon* (30), with the arrival of feminism in the Gaulish village, while tending to deride the central concept, stands alongside the best Asterix stories. With Uderzo in his mid-70s as of writing, it's largely assumed that *Asterix and the Actress* (32) will be the final Asterix story. It has a valedictory feel in returning several characters from previous books and introducing the parents of Asterix and Obelix.

A portion of the credit for the English-language success of *Asterix* must go to Anthea Bell and Derek Hockridge. Avoiding the cardinal sin of literalism, their sympathetic and inventive translations deftly convey the verbal dexterity and anachronistic references to contemporary culture in the French originals. The back cover running order on Hodder and Stoughton's editions is not the chronology of the series, referred to with the numbering here, and includes illustrated text adaptations of *Asterix* films. The *Asterix* books are available as large-format hardcover and softcover editions, and, more recently, as small-size paperbacks and collected three stories to the volume.~FP

Recommended: *Asterix and Cleopatra, Asterix and the Big Fight, Asterix the Legionary, Asterix at the Olympic Games* (12), *Asterix and the Cauldron* (13), *Asterix in Spain, Asterix and the Roman Agent, Asterix in Switzerland,* The *Mansions of the Gods, Asterix and the Soothsayer* (19), *Asterix and Caesar's Gift, Asterix and the Secret Weapon*

ASTONISHING

Atlas: *61 issues (3-63) 1951-1957*

Astonishing started life as *Marvel Boy* at the very end of the Golden Age. Despite better than average superhero tales from Russ Heath and Bill Everett the title changed with 3, as the teen wonder began losing space to an increasing number of mystery stories (including a rare non-*Superman* short by Wayne Boring in number 4). By 7 the conversion to a horror anthology was complete, with content consisting of the usual blend of Vampires, Mad Doctors and Evil Aliens, albeit drawn by some of the best artists in the industry. It's with the middle years that the title became really memorable as editor and chief writer Stan Lee moved away from tales of inevitable doom and began to run stories that owed as much to wit and satire as to whips and Satan. The protagonists became ordinary folk: farmers, salesmen and housewives, not He-Men heroes or scientists, and the threats were to home and values, not country and life. Joe Everyman could outwit the aliens or murder his neighbour. There was usually a scientific explanation for the weirdest events and a seemingly benign providence was making sure that good and bad got what they deserved.

Gathering a stable of top artists such as Bill Benulis, John Tartagloine, Mac Pakula, Bill Everett, and Bob Powell, joined in later issues by Jack Kirby and Steve Ditko, Lee changed the style of his horror comics to such an extent that when the Comics Code began with 38 (April 1955) there was no appreciable difference.~WW

ASTONISHING EXCITEMENT

All Jonh Comics: *3 issues (501-503) 1995-1996*

Well produced humour comic presented as if part of a long running series, and just one of a large list of titles, complete with fake ads and editorial pages. Lead strip 'Sandwich High' concerns a group of super-powered teenagers who are guardians of the school sandwich, lest anyone sit on it and inherit the power to rule the galaxy. It's a daft take on TV school dramas, and anyone who likes the idea of that will probably enjoy the remainder of the strips.~WJ

ASTONISHING TALES

Marvel: *36 issues 1970-1976*

This started life splitting the title between Ka-Zar and Dr Doom strips before spotlighting a single character with 9. Ka-Zar proved to be the longest lasting feature, though its assorted creators continually changed the strip's direction resulting in a very inconsistent series. 1 and 2 were typically exciting superhero fare from Jack Kirby, but Gerry Conway switched locales to Ka-Zar's native Savage Land with 3, and with an emerging Barry Smith's art in 3-6 and 10 it was Conan in all but name. Roy Thomas and Gil Kane produced a superb origin story in 11, and 12-13 were early Man-Thing appearances with 12 featuring a lovely re-cap of the monster's origin drawn by Neal Adams. In 15 things switched back to the urban jungle of New York for a couple of 'relevant' stories before devolving into a humdrum superhero strip. Being unable to retain a creative team for more than a couple of issues notwithstanding, Ka-Zar was popular enough to be promoted into his own title.

His companion feature proved less successful, though the Dr Doom story in 1-4 by Thomas and Wally Wood was terrific and collected in *The Marvel Art of Wally Wood*. Sadly the tale of Latverians rising up to depose the evil Doom used up all the decent plot ideas in one swoop and 5-8 are inconsequential despite some nice Gene Colan art in 7-8. It, The Living Colossus by Tony Isabella and Dick Ayers in 21-24 was an unsuccessful attempt, both commercially and artistically, to revive the feel of Marvel's old monster comics.

Far more memorable was Deathlok in 25-36, interrupted by 29 reprinting the Guardians of the Galaxy's origin. In classic 1970s exploitation style it was a mixture of *Six Million Dollar Man*, *Dawn of the Dead* horror and conspiracy theory paranoia, but amazingly managed to rise above that to become a strip of real quality. Set in the lawless future of 1990 (!), Colonel Luther Manning's long dead remains were 'enhanced' with bionic prosthetics and a computer implant in his brain to create a super soldier. Subsequent issues dealt with his fruitless attempts to regain his humanity and raised questions of identity in a surprisingly mature way. Of course, it was also a Marvel comic, so Deathlok also had to kick copious amounts of butt at every opportunity. Created, plotted and drawn by Rich Buckler (with scripts by Doug Moench and Bill Mantlo), this was certainly his finest hour, despite a reliance on assistants. From 33 Klaus Janson's superb inks raised the quality level another notch, but sadly the title was cancelled soon after. What was to have been 37 later appeared as *Marvel Spotlight* 33, but despite guest appearances and revivals the original series was never satisfactorily resolved.~DAR

ASTOUNDING SPACE THRILLS

Day One Comics: *3 issues 1998*
Image: *4 issues 2000*

Steve Conley's gentle space opera is aimed firmly at fellow fans of 1950s science fiction. Homages to the pre-space flight era's fascination with the cosmos abound, from the name of lead character Argosy Smith onwards. Combined with Conley's crisp, clear-line style and bold colours, the comic is an absolute delight, although unless you already love this kind of thing it doesn't really have anything new to say. The first series has pulp magazine influenced painted covers by Jim Steranko, the Hildebrandt brothers and Drew Struzan and the second series continues this trend with Kelly Freas on 2 and an unimpressive effort from Dave Gibbons on 4. Conley's love of the comics and science fiction extends to online promotion on his excellent website: www.astoundingspacethrills.com. However, if this labour of love was going to succeed, it really needed something to say for itself rather than simply retreading all the old clichés, no matter how fondly they were being remembered. It'll be missed, but never mind, there's bound to be something just like it along again soon. Back-up strip Marty Baumann's 'The Crater Kid' is a humourous space-western in the same vein.~JC

ASTRA

CPM Manga: *4 issues 2001**

An amazingly cliched story of a planet of women who run out of banked sperm and must send their beautiful teenaged princess in search of a good man. It's based on an idea for a theatrical musical from Jerry Robinson, the Batman artist who created The Joker. Jerry seems to have been a bit stuck in the Golden Age but this is an enjoyable quick read if you don't mind some perhaps rather outdated sexual schemas. The excellent art is by Shojin Tanaka.~GK

ASTRIDER HUGO

Radio: *2 issues 2000-2001*

Inspector Regina Bennett of the Orbital Guard is tasked with the capture of flamboyant space pirate Hugo, who's a bit of a handful with a secret agenda in this overwrought translated manga series.~FP

ASTRO BOY

Gold Key: *1 issue 1965*

American artists try adapting the then popular Japanese cartoon. It all ends in tears. Only for hardcore fans of the TV show.~WJ

The Original ASTRO BOY

Now: *20 issues 1987-1989*

Japan's most famous comic character, Tetsuwan Atom, is known as Astro Boy in the USA and, due to regular screening of his cartoon series, is familiar to most Americans under forty. Ken Steacy provides light children's adventure in 1-16, but our kind-hearted super-strong robot chum suffers with Steacy's departure. Astro Boy's origin is in 8.~FP

ASTRO BOY

Dark Horse: *10 volumes + 2002 to date*

Tetsuwan (Mighty) Atom was created in 1951 by Osamu Tezuka, and renamed Astro Boy when Tezuka's 1963 animated show was translated and broadcast in the U.S. Tezuka drew Astro Boy for eighteen years, but when it came to be collected (in the twenty-three volume series that Dark Horse is translating), he redrew parts of the story that he felt weren't up to standard. He also added to many of the individual stories, a brief introduction, with himself addressing the readers, explaining the story's place in continuity or how it came to be written. So though this is not a chronological printing, the original dates are given for each strip, and a new strip explaining who Astro Boy is was added at the beginning.

The robot, Tobio, was built (in 2003) by a scientist grieving for his dead son. Understanding that Tobio would never grow any older, however, led him to sell the robot to a circus, where he's renamed Astro Boy as part of a strongman act. He's eventually discovered by another scientist, who becomes his guardian, placing him with a robot family, which includes a brother and sister (Cobalt and Uran), who occasionally help him in his adventures. Astro Boy also enrols at school, where he develops another surrogate father in teacher (and amateur detective), Mr Moustache.

There are usually at least two stories in each volume, depending on the length of the main feature, and Astro Boy's opponents are usually robots of one sort or another. In 1, Grand Duchess Anta Maria builds an army of robots using the brains of dogs, in a plan to mine diamonds on the Moon, only to find that the original inhabitants have left a giant robot to repel all visitors. 2 features the first elected robot President, who's threatened by an anti-robot society. The robots in a theme park are abused in 4, and a robotic Cleopatra is intent on recreating the glory of ancient Egypt in 9.

As well as robots, however, Astro Boy meets and battles aliens, is lost in the past and gradually losing power in an extended sequence (6-8), which includes a brief encounter with the war in Vietnam. Tezuka's themes are always evident in his pleas for peace and tolerance for all creatures (and even plants). Astro Boy himself is always courageous and eager to do the right thing. Full of action, adventure and inventiveness, it's impossible to imagine the sense of wonder that must have greeted their first publication, and yet there is still a freshness to them that makes them engaging, fun and thought-provoking.~NF

Kurt Busiek's ASTRO CITY

Image: *6 issue miniseries 1995-1996**
Homage: *22, 1/2 issues 1996-2000*

On first appearances this seems to be set in a 1950s-style futuristic city, but Astro City is in fact a modern-day American city inhabited by ordinary and extraordinary people. With his work on *Marvels*, Kurt Busiek created a niche for exploring the world of the superhero through the eyes of ordinary people, but *Astro City* offers more. We see the human side of superheroes, with their aims and personalities confidently and intelligently explored, and they're a marvellous set of characters, some with obvious resemblances to the icons of the comics world. Even if Busiek denies it, regulars like the First Family are based on the Fantastic Four. Homage or satire? There's a very thin line, but Busiek manages to pull it off. Costumed characters, however aren't always the stars of the comic. The city's non-powered inhabitants whose lives are affected by the activities of the superheroes are featured heavily, usually to good success. 4's tale of a secretary whose office becomes a battleground won an industry award for Best Story, and is a fine example of the series.

The Homage series (1 also available jumping at you in 3-D) switches focus as Busiek concentrates on the costumed characters until 20. 4-9* concern a young lad becoming Altar Boy, sidekick to the Confessor, who himself has an unusual secret. Add in some shapeshifting aliens and you have an interesting and unusual story. 13 spotlights cartoon character, Loony Leo, come to life and now a restaurant owner. 14-20* is a murder/mystery tale, where Steeplejack, an ex-supervillain is hired to find the killer of small-time supervillains like himself and stumbles across a shocking secret. Alex Ross provides the covers, but the interior art by Brent Anderson is also of a high standard, with Will Blyberg inks providing a more polished look in the Homage issues. The oddly-numbered 1/2 first saw print as a special from *Wizard* fan magazine. If you had to live in a world full of superpowered beings you couldn't do better than to move to Astro City, but as you probably don't settle in for a good read instead.~HY

ASTRONAUTS IN TROUBLE

AiT/Planet Lar: *5 issue miniseries ('Live from the Moon') 1999*, one-shot ('Cool Ed's') 1999, 3 issue miniseries ('Space 1959') 2000*, one-shot ('One Shot One Beer') 2000*

Cool, blackly comic tales set fifty years from now, revolving around a billionaire's attempt to restart the space program by setting up a base on the Moon. Of course it's not as simple and altruistic as that, and as the story unfolds through the eyes of an independent news team events spiral to a spectacular and gripping conclusion. Follow-up tales take the brave step of ignoring the main cast to focus on complementary stories that develop from the aftermath of the main miniseries. Witty and engaging blend of action and drama from Larry Young and artists Matt Smith, who draws1-3, and Charlie Adlard who draws everything else. 'One Shot One Beer' is an expanded version of 'Cool Ed's', and there's also *The Making of Astronauts in Trouble*, which provides the script for the first series.~WW

Recommended: Live from the Moon 1-5

ASYLUM

Millennium: *3 issues 1993*

With mystery anthologies extinct by 1993, Millennium were able to attract an impressive batch of A-list contributors wanting to produce short stories. John Bolton covers grace 1-2, and he has a story in 1. Others participating are Neil Gaiman and Mark Buckingham (2), Steven Seagle (1) and P. Craig Russell (1-2). Very little of the material is of much consequence, though, and it's padded out with poorly reproduced reprints from Archie's short-lived 1970s Red Circle line drawn by Al McWilliams (1), Vincente Alcazar (2) and Howard Chaykin (3). The one poignant highlight is almost an afterthought in 2, written by Faye Perozich concerning an old lady trading memories, and there's some nice early art from Pia Guerra in 3.~WJ

ASYLUM

Maximum Press: *11 issues 1995-1997*

A showcase anthology for Rob Liefield's Extreme Studios, the major redeeming feature of this series is the occasional appearance of Larry Marder's Tales of the Beanworld. There are new colour stories, albeit only four pages per issue, in 1-6. Using the anthology as a way of premiering new titles or characters, Liefield gives us the adventures of Starbuck from *Battlestar Galactica*, Avengelyne, Warchild (drawn by Art Adams in 1), Deathkiss (art by Mike Deodato) and Christian (script by Robert Loren Fleming, art by Pop Mhan). Megaton Man replaces Tales of the Beanworld (7, 8, 11) and if it's not as interesting, it's better than its companion pieces. Surprisingly concluding some stories from elsewhere, Kid Supreme shares 9 with Jim Krueger's Foot Soldiers and Terry Moore's Lady Supreme story concludes in 10.~NF

AT THE SEAMS

Alternative Press: *1 issue 1997*

Three stories by Ed Brubaker about relationships: starting them, ending them, sifting through the debris afterwards and, perhaps, learning something useful about yourself. The stories are all similar in content and tone but the lessons in each are different, making the comic as a whole read like a nicely rounded three-part story. Perceptive and well above average, but short of remarkable.~FC

ATARI FORCE

DC: *20 issues 1984-1985, 1 Special 1986*

Space adventure that's far better than it had any right to be considering it originated as a corporate promotion for Atari, which in the comic stands for Advanced Technology and Research Institute. Engaging characters and compelling plots from Gerry Conway and never less than excellent art from José Luis Garcia-Lopez, inked by Ricardo Villigran and Bob Smith, ensure that the first thirteen issues are a roller-coaster ride. 1-5 introduce and unite the Atari Force under Martin Champion, leader of a previous incarnation, in order to battle a being calling himself the Dark Destroyer. Despite the stupid name, he's a threat that lasts until 13, after which Mike Baron and Eduardo Barreto take over and keep the quality up for the remainder of the run. Light-hearted back-up stories from 13 focus on individual members of Atari Force, but the 1986 special with none of the regular creators didn't pave the way for a revival as hoped.~FP

ATHENA

A.M. Works: *14 issues 1995-1997**

Antarctic: *One-shot (0) 1996*

Dean Hsieh tells an intriguing if muddled tale blending Greek mythology, science fiction and punk rock. Athena looks like a tough bitch with a foul mouth and a bionic arm but she's actually The Goddess Athena, who, like the rest of her pantheon has been forced out of her job and sent to live in a crappy retirement home, Earth. She isn't taking retirement too well and spends most of her time fighting, drinking and playing thrash guitar very badly. There's a weak plot involving an attempt by Apollo and Nemesis to supplant their successors and get their old jobs back but it's really incidental to the soap opera antics of the Olympians and their grungy teen friends in and around the local fetish bar. The Antarctic one-shot reprints the two original appearances from *Absolute Zero* 1-2. Engaging but lightweight.~WW

@THENA INC.

Image: *One-shot ('The Beginning') 2001, 4 issues + 2002 to date*

'The Beginning' introduces black ops organisation Athena Inc., which hides behind the benevolent front of charitable acts. In sending one of their genetically modified assassins (able to completely alter their appearances) to kill a hacker, they encounter opponents, who have the power to kill them. In 1-4, Gwen (a celebrity), known as Mary when a manhunter, walks into a trap, created because Mary knows about Gwen, which is not supposed to happen. Seemingly designed to allow Jay Anacleto to produce as few photo-realistic, but passionless drawings as possible, the pages are filled with dialogue (by Brian Haberlin) that must carry the burden of the storytelling. Too much, however, appears out of context in relation to the rest of the page.~NF

* Available in a collected edition

ATLANTIS CHRONICLES

DC: *7 issue limited series 1990*

Peter David details the fables and history of the lost continent of Atlantis, or at least the DC history thereof. This seemed a labour of love for him, but to most readers it may just seem a bit laboured. At forty-eight pages for seven issues it's stretched too far to keep the interest up. David fleshes out the characteristics of all the major players in recording the history of the turbulent continent, beginning before it sank, featuring Arion, up to the present day and Aquaman. In brief, there are two warring factions, the humanoid water-breathers who come to occupy Poseidonis and the mer-people living in Tritonis, and along the way there's plenty of intrigue and treachery. Esteban Maroto's fluid art is well suited to the period pieces. Each issue can be read independently, and anyone wanting to sample it should try 3, a well-paced story combining much wit and violence.~HY

Recommended: 3

ATLAS

Dark Horse: *4 issue miniseries 1994*

Writer and artist Bruce Zick has a fair turn at producing a Jack Kirby homage, swiping the title from an old Kirby creation. Zick's art strives for the Kirby grandeur, and there are plenty of interesting ideas packed alongside Kirby-style themes, but there's also the often terrible Kirby-style dialogue as well. This distracts from what would otherwise be a good miniseries.~FP

ATLAS

Drawn and Quarterly: *1 issue + 2001 to date*

Dylan Horrocks continues laying bare mythical comics of the past with plenty of references to his work in *Hicksville*. This time, in a long opening sequence, Horrocks himself is interrogated by the state police of Cornucopia for associating with subversives, in this case renowned cartoonist Emil Kopen. Thereafter comics journalist Leonard Batts, star of *Hicksville*, returns to an old friend and announces his intention to produce a biography of Kopen. The skillful weaving of fictional elements into a familiar world is disorienting (as is the concept that comics are taken seriously anywhere) and Horrocks intrigues with his world. This first issue also includes work by James Kochalka set in the legendary comics library at Hicksville, but you can't have everything.~FP

ATLAS

Avatar: *1 issue + 2002 to date*

At one time his day job was holding up the world, but freed from that task he's now a superhero. Introduced in *10th Muse*, Atlas is a lantern-jawed musclebound God, unlikely to succeed without screwing up in some fashion. In this first issue he's employed as a security guard and makes a strange discovery. Not quite as funny as the creative team seem to think, this is nonetheless a decent modern-era superhero title so far.~WJ

The ATOM

DC: *Series one 38 issues 1962-1968, series two (Power of the Atom) 18 issues 1988-1989, 2 Specials 1993-1995*

Using a white-dwarf star fragment, scientist Ray Palmer developed a method of shrinking himself down from six foot to sub-microscopic size. This was another case of DC recycling the name from one of their 1940s superheroes, and the new Atom was another successful graduate of try-out title *Showcase* (34-36)*. Editor Julius Schwartz was always interested in imparting scientific knowledge as part of his comics, and The Atom was particularly science-heavy, with most of his adventures being science-fiction-based with an emphasis on detection and characterisation. Unusually, very few supervillains turned up, the most notable among them being nutty botanist Jason Woodrue, who would later be beefed up as the Floronic Man in *Swamp Thing*, and the time-obsessed Chronos. He was a ludicrous figure in black and white striped tights, and yellow cape, gloves and boots, yet, when unmasked, drawn by Gil Kane to resemble Richard Nixon! The most noteworthy of the earlier issues involved the Time Pool, through which the Atom was able to meet historical figures such as Jules Verne and Edgar Allan Poe. The character's early adventures are now available in DC's *Atom Archives*.

With the exception of the final issue, the first series was written by Gardner Fox and drawn by Gil Kane, so there are no complaints about artistic quality here. And with Sid Greene inking Kane's pencils the Mighty Mite was a six-inch powerhouse of pure muscle. A perfectly acceptable standard was maintained throughout, but few issues jump out as particularly noteworthy until the end of the run. Then the comic became more action-oriented, with the issues starring the 1940s Atom, 29 and 36, standing out. Hawkman dropped by for a guest slot in 31, foreshadowing the future of the title, which became *Atom and Hawkman* with 39.

When that run ended the Atom spent fifteen years as a little-used cog in Justice League of America before returning in the radically different Sword of the Atom (dealt with as a separate entry). He returned in a straight superhero series titled *Power of the Atom*, originally written by Roger Stern. A good sample issue is the John Byrne-drawn 6, which beefs up Chronos considerably. The most persistent and mysterious of the villains introduced, though, is Humbug, who débuts in 11 and becomes a particular thorn in Atom's side. The CIA are background players throughout the series, and 16-18 tie up all plots, including some left over from *Sword of the Atom*. Never spectacular, but always solid, Graham Nolan draws most issues. The first of two specials is a worthy effort by Tom Peyer and Steve Dillon featuring recurring baddie Chronos. The second focuses on his coping with being seventeen again (don't ask). He's currently back as an adult and a member of the JLA.~HY

Recommended: 29, 36, special 1

THE ATOM AND HAWKMAN

DC: *7 issues (39-45) 1968-1969*

Editor Julius Schwartz's idea of making the eponymous heroes here best buddies (like the Flash and Green Lantern) seems to have led to the merging of their titles (continuing Atom's numbering) at a time when split books were all but extinct. Both crossover and solo stories were featured. Unusual but distinguished artwork and some interesting stories by Bob Kanigher, Denny O'Neil and Gardner Fox characterise this curious, doomed title. High points are Fox's 'Panic Button' stories in 40-41 drawn by Joe Kubert, a memorable villain in 43's spectral 18th- century highwayman The Gentleman Ghost, and Kubert's superb covers.~SW

Recommended: 40, 41

THE ATOMIC AGE

Marvel/Epic: *4 issue miniseries 1990*

A renegade alien called Nimbus appears in this retro look at the 1950s, which contrasts the fears of the age (alien invasions, communism) with mom's-apple-pie rose-tinted nostalgia. More aliens arrive and it all becomes rather silly.~WJ

ATOMIC CITY TALES

Black Eye: *3 issues, 1 Special 1994-1995**

Kitchen Sink: *3 issues 1996**

Jay Stephens' Atomic City is a strange and wonderful place to visit, populated by a vast selection of imaginative superpowered characters who behave as most real folk would if they had abilities beyond the levels of everyone else. They go about their business as usual, living, loving and holding parties, except that every now and then there's a planet to save, a robbery to carry out or a score to

settle. Stephens even incorporates himself into the strips as official cartoonist to Big Bang, near omnipotent, but also shallow and self-centred. The disjointed aspects of Stephens' *Sin Comics* have been discarded, but, in the manner of a Ronnie Corbett monologue, don't expect a strictly linear structure. Stephens weaves all over the place, creating the impression of a stream-of-consciousness comic with wit and artifice, at times knowing and at times seemingly naïve.~WJ
Recommended: Black Eye 1-3, Special, Kitchen Sink 1-3

ATOMIC OVERDRIVE

Caliber: *2 issues 1997*

A stylish pastiche of 1950's America by Dave Darrigo and Peter Grau. A mysterious glowing zombie is wandering through Van Doren county. Two-Fisted Detective Broderick narrates tales that abound with cool clichés, and the villains Tony The Punk and Doctor Guido Haiti are excellent. Of course, it all takes place near the local atomic testing ground, as everything did in 1950's America, and the tagline is to die for "Fast Teens, Fast Cars, Big Slow Monsters".~WW

ATOMIC TOYBOX

Image: *1 issue 1999*

Nice art and an entertaining script from Aaron Lopresti as a teenager is given a box that can make his dreams reality. Sales seem not to have matched expectations and there was no continuation.~FP

THE ATOMICS

AAA Pop: *15 issues 2000-2001**

Spinning off from *Madman*, Michael Allred's zany superfreaks get the chance to shine in their own series. This is Allred's usual mix of gentle homage to the Lee/Kirby comics of the 1960s with liberal seasonings of the more ludicrous characters and situations you'd expect to find in the *Batman* or *Doom Patrol* comics of the same era. If you're being uber-cynical then yes, it is mostly style over substance; the plots meander and often seem to be more an excuse to introduce a new bonkers idea than an attempt to tell a story, but who cares when it's this beautifully drawn and executed? No fanboy with a soul, that's for sure. Unrequited hopeless love, low self-esteem, the tragedy of monstrous transformations, cover lines such as "My Mom ate my Dad! How do you think I feel!" and "One will die!! But who? And for how long?!" could be mistaken for parody, but Allred clearly loves these comics too much to be poking fun. And his propensity to encourage his readers to cut up their comics in a two-fingered salute to the collectors' market just HAS to be commended. A real treat for any ageing fanboy on a rainy afternoon.~JC

ATTACK!

Charlton: *Series one 7 issues (54-60) 1958-1959, series two 3 Annuals 1962-1965, series three 48 issues 1971-1984*

Anthology war comic that ranges from excruciatingly bad to extremely good as American soldiers fight for freedom and democracy, winning every battle, even those they lost. Probably the best of Charlton's combat comics, the stories were always generic and dependant upon the artwork to fail or succeed. Contributors include Pat Boyette, Sam Glanzman, Montes and Bache, Simon and Kirby, and Wally Wood.~WW

ATTITUDE LAD

Caliber: *One-shot 1993*
Slave Labor: *3 issues 1994*

Paul Tobin scripts and various artists deliver short outbursts from the male answer to Bitchy Bitch. See a mouthy, aggressive, cowardly, obnoxious squirt sound off on a host of topics such as religion, feminism, actors, and practically everything else, but still be unable to do anything about it. Originally ran as a back-up feature in *Fringe*, so Phil Hester fans might be interested in seeing some of his earliest work. With the second outing the cast grows and the Lad is more aggressive as Tobin, Hester, Vincent Stall and Colleen Coover downsize the one-note antics in favour of an expanded range of short stories. All are in your face and out of touch, obnoxious self-indulgences. Strident and visually uninspired. ~WW

THE AUTHORITY

WildStorm: *29 issues, 1 Annual 1999-2002, one-shot ('Kev') 2002, one-shot ('Scorched Earth') 2003*

After sixty years, a new take on superheroes is increasingly rare. Developed when writer Warren Ellis tired of the constraints of *Stormwatch*, where many of the cast were introduced, The Authority operate on a universal scale against menaces inconceivable for most superheroes, and characters such as The Engineer and The Doctor have planet-altering capabilities. They inhabit a vast sentient carrier (which exists out of space and time, yet orbits Earth!), and consider themselves representing a higher moral authority with an agenda to interfere for the betterment of humanity. Among other innovations, while not being responsible for the first gay superheroes in comics, Ellis gives his couple a realistic gloss not previously seen, all the while maintaining a sly smile at Apollo and Midnighter being Superman and Batman substitutes. 1-8* form two four part stories, the first introducing the cast and their capabilities amid a particularly nasty revenge plot on a global scale, while 5-8 have the world invaded by an other-dimensional Britain under alien control. This is very much Ellis' vision, but unsympathetic art could have easily sabotaged it. Thankfully the team of Bryan Hitch and Paul Neary provide spectacular scenarios to match the ambitious scope, with colourist Laura Dupuy essential. Hitch had moved away from his slavish imitation of Alan Davis, but learned well how to define a cast.

The entire creative team departs after a disappointing story about the return of God in 9-12*, although it's not without surprises and tension, and Ellis takes pivotal character Jenny Sparks with him. As the comic was infused with her abrasive, yet appealing personality it might have been expected that *The Authority* would flounder, but if anything the new creative team of Mark Millar and artist Frank Quitely (13-16*, 19, 20, 22) raise the quality a notch. Announcing their intentions early, Millar has the team overthrowing despotic regimes, and presenting themselves as celebrities for the betterment of their agenda. Predictably enough, this doesn't sit well with those believing themselves the powers behind the throne, and has later repercussions in disturbing fashion. Millar proves as adept as Ellis in conjuring up astoundingly powerful threats and imaginative methods of dealing with them, and artistically Quitely is always excellent with his simulacrums of the first Avengers team in 13-15 particularly impressive. Assorted deadline problems rapidly lead to fill-ins, though. Chris Weston, unusually sub-par in places, pencils 17 and 18 as Earth itself rebels against humanity, then Tom Peyer and Dustin Nguyen produce 23-26. They introduce an even more obnoxious Authority in thrall to American corporate interests, and while not quite matching the remainder of the run, these are very good superhero comics. Along with Doselle Young and John McCrea's prologue to *The Monarchy* in 21, the annual is inessential, and it's not very good either. Also inessential, but a lot of fun is 'Kev', wherein a hapless S.A.S. agent is sent to kill The Authority. By Garth Ennis and Glenn Fabry, it injects a slapstick sense of humour, and as such may not appeal to previous readers.

'Scorched Earth' provides a widescreen plot (the sun is attacking Earth), and returns someone unseen since the final days of *Stormwatch*. As superhero comics go it's okay, but expectations are set high for *The Authority* and as the prelude to a new series it doesn't bode well.

It should be noted that aspects of *The Authority* in all incarnations may offend. Those who like their heroes clean-cut, morally unambiguous and radiating positivity

---

*Available in a collected edition

should stay away. It is a particularly violent comic, with the violence often gratuitous and sometimes sadistic, although equally often very imaginative as per the legless giant that opens 15. It was the violence that led to the first run's premature demise, reflecting a seemingly new thought for the average American post September 2001 that persistent interference with other cultures might have violent consequences.~WJ

AUTO-BE RECYCLED

Last Gasp: *One-shot 1980*

This is an eco-friendly, public service project that explains how and when to use recycled car parts. Tim Boxell, Corrine Pettys and Vince Ballard essentially take turns telling the same basic story of someone in need of car repairs, who's ready to abandon the car or can't afford new parts, but is shown the enlightened path to recycling (whilst avoiding stolen parts, of course). Worthy, informative and, occasionally, amusing.~NF

AUTOMATIC KAFKA

WildStorm: *4 issues + 2002 to date*

Android, Kafka, takes some nanotecheroin, allegedly a drug that even his mechanical brain will feel, and the reader is treated to flashbacks of his life as a superhero. It seems that Kafka was one of the Strangers with Helen of Troy, The Constitution and Saint Nick, and that he's wanted by Agent Stahl of the National Park Service. Then Kafka becomes a game show host (with, ho hum, hilarious consequences). Unfortunately, Joe Casey's script contains some of the most remorselessly pretentious claptrap that's been committed to print outside of a Grant Morrison title, and the whole experience is made even worse by the unremittingly ugly (and pretentious) 'artwork' of Ashley Wood.~NF

AUTOMATON

Image/Flypaper Press: *3 issue miniseries 1998*

Three automatons, sent to Mars to provide scientific information about human capacity to survive the trip, are possessed by the alien beings, Sherzad, Bront and Konak. However, Konak is driven insane by the trip back to Earth and on arrival sets off on a mass killing spree. Only with the help of their creator and his estranged wife can Sherzad and Bront prevent the nuclear destruction of mankind. R.A. Jones' science fiction thriller throws up a few clichéd characters, but it's entertainingly done and solidly drawn by Peter Vale.~NF

AUTUMN

Caliber: *3 issue miniseries 1995*

This is an unusual World War II serial killer story, written by Chris Dows and Colin Clayton, and illustrated by Horus in a rather lumpen but striking black and white style. The emphasis is on a young boy who becomes obsessed with a killer who only strikes during the autumn, and only murders in the London Underground, rather than on police procedure and tracking him down. However, by the end of 2 it's turned into a historical version of the *X-Files*, with the boy, grown up, donning a costume to track down the inhuman creature he thinks has been living down the sewers. In the final issue, although it's atmospherically drawn by Horus, things go further astray as the serial killer is revealed. After a effectively short and unspectacular struggle, and a great deal of emotional language, there's a neat and poetic end to an interesting but rather wavering storyline.~FJ

AUTUMN ADVENTURES

Disney: *2 issues 1990-1991*

An annual collection of seasonal stories that revolve around Halloween and Thanksgiving. American and European reprints of Donald Duck, Uncle Scrooge, Mickey Mouse, Pluto, Chip'n'Dale and the whole Disney pantheon including the Gummi Bears are featured in these 64-pagers. Carl Barks fans will be pleased to find Donald stories by him in both issues. Brilliantly crafted lightweight entertainment.~SW

A-V IN 3-D

Aardvark-Vanaheim: *One-shot 1984*

If you were looking for the best independent anthology in the world you might well feel that one that included *Cerebus*, *Journey* and *Flaming Carrot* would be hard to beat. That this sampler of A-V's comics line also includes *Neil The Horse*, *Ms Tree* and *Normalman* ought to be the spur that has you rushing to find a copy. This is certainly the best of the mid-1980s 3-D comics fad, partly, at least, because all creators were drawing for 3-D and incorporated special scenes to take advantage of it, while retaining the integrity of the stories.~NF
Recommended

AVALON

Harrier: *14 issues 1986-1988*

Cheap and cheesy mainstream anthology full of sub-standard artwork. The occasional one- or two-page gem fails to make this grim array of bargain-basement superheroes and reprinted fan strips worth a look.~FJ

AVATAARS

Marvel: *3 issue miniseries 2000*

Pointless redress of the Marvel Universe, primarily the Avengers, in faux-mediaeval, Dungeons and Dragons 'drag'. Someone, presumably writer Len Kaminski, was shooting for an ongoing series with this 'Alterniverse', but serendipitously the general public were more discerning.~HS

AVATAR

DC: *3 issue miniseries 1990-1991*

TSR role-playing game spin-off. At ninety-six pages extra thick! More absorbent! Well meaning but stodgy stories with some nice art.~HS

AVENGELYNE

Maximum Press: *Series one 4 issues (1/2-3) 1995, one-shot (Avengelyne/Glory) 1995, 3 issue miniseries (Avengelyne/Power) 1995-1996, one-shot (Avengelyne/Warrior Nun Areala) 1996, one-shot (Avengelyne/Glory: 'Godyssey') 1996, 2 issue microseries ('Deadly Sins') 1996, series two 15 issues (0-14) 1996-1997, 2 issue microseries (Avengelyne/Prophet) 1996-1997, 3 issue miniseries ('Armageddon') 1996-1997*
Awesome: *1 issue 1999*
Avatar: *One-shot (Avengelyne/Pandora) 2000, 3 issue miniseries (1/2-2) ('Bad Blood') 2000, one-shot ('Revelation') 2001, 3 issue miniseries (1/2-2) ('Dark Depths') 2001, 2 issue microseries ('Dragon Realm') 2001, one-shot (Avengelyne/Shi) 2001, 2 issue microseries ('Seraphicide') 2002*

An angel is sent to Earth, as punishment for her sins, to help redeem mankind, seemingly by striking appallingly drawn cheesecake poses and carrying a big sword. Originally conceived by Rob Liefeld, she was a short-haired brunette who wore a skimpy, but barely feasible, tiny tunic arrangement. Devoid of almost all her angelic power (apart from a degree of superhuman strength), she had to make her way in the sinful world, aided by a young priest and hindered by her 'baby sister' Divinity, who keeps dropping in from Heaven to see how big sis is doing. All this makes it sound much more interesting than the sub-literate drivel it actually was. The second volume of the series was run in tandem with a series of one-offs either featuring inept 'swimsuit' poses, or teaming Avengelyne with other Liefeld creations or any busty heroine who happened to be passing. After Liefeld's Maximum Press imprint collapsed, and following a fleeting attempt to relaunch her at the also Liefeld-owned Awesome Press, Avengelyne fell into the hands of Avatar. They promptly launched a series of one-offs or microseries, calculated to appeal to readers with short attention spans, in which our fallen angel was given a makeover. Her hair became long, flowing and blonde, and she gained a 'uniform': a leather crucifix whose arms reach out to (just) cover her nipples and crotch, and a fishnet body stocking with, no doubt, unperceived religious connotations. Despite being riddled with cheesecake (angelcake?), the Avatar stories are better than Liefeld's own work. Avengelyne is given a network of friends and confidantes in the other Avatar heroines – Pandora, the Lookers – who function effectively as a supporting cast, and the art, while variable, generally isn't bad; Rick Lyon, for example, could get a job in proper comics if he wanted to. Still not something you should read unless you're pretty desperate, though.~HS

THE AVENGERS

Marvel: *Series one 402 issues, 23 Annuals, 5 Giant-Size, 1 Graphic Novel 1963-1996, series two 13 issues 1996-1997, series three 59 issues +, 4 Annuals 1998 to date*

Initially conceived of as a way of uniting most superheroes in the then nascent Marvel comics line, *The Avengers* has grown to incorporate almost every major Marvel superhero and plenty of minor ones besides. The combination of writer Stan Lee and pencil artist Jack Kirby created the title, teaming Iron Man, Thor, Giant Man, the Wasp and the Hulk, and reviving 1940s character Captain America in 4. Although entertaining enough, it lacked the inspiration of other early Marvel comics. 8, the best of the Lee/Kirby run, introduced recurring time-travelling villain Kang the Conqueror and was Kirby's swansong (although he returned as layout artist for 14-16). Replacement artist Don Heck never approached Kirby's dynamism, but, with inker Dick Ayers maintaining the house style, turned out adequately rendered action until 36. 1-30 are collected in three hardcover volumes of *Marvel Masterworks*, and the cheaper black and white *Essential Avengers* gathers 1-68, stopping just short of a golden era.

The first indication that the *Avengers* were anything other than superheroes by numbers came with the brave decision to replace the founding cast with three characters from the Marvel school of well-intentioned-but-misunderstood villains. Hawkeye, Quicksilver and the Scarlet Witch arrived in 16, establishing a long tradition of rotating membership (although everyone returns sooner or later). Lee relinquished the writing to Roy Thomas with 34, and Thomas established a tradition of Avengers writers taking a year or so to settle. Joined by pencil artist John Buscema with 37, he gradually became more adept and imaginative and gave a hint of what was to come with issues in the mid-50s introducing another recurring adversary, Ultron. Of particular note were 57-58*, introducing the android Vision, the first character created specifically for the title. From 69 onwards Thomas crafted stories that stand among the best *Avengers* issues to date. He introduced a take on DC's Justice League of America in both evil (70-71) and benign (85-86) versions as the Squadron Sinister/Supreme, and dealt with topics such as race-hate groups (73-74) and land rights and corporate greed (77, 80-81). It's best to look on his feminism issue (83) as well meant but misguided, although it's an entertaining superhero comic. Sal Buscema took over the pencilling from brother John until 92, and many regard the space opera of the Kree/Skrull war, largely illustrated by Neal Adams in 93-97*, as Thomas' finest moment. 93's trip by Ant-Man is stunningly rendered by Adams, but overall the story drags and suffers from a deus ex machina ending implausible even for superhero comics. It was reprinted as a miniseries in 1983. Far superior are 98-100, drawn by Barry Smith, dealing again with the fermentation of hate groups and reprinted complete in 48 of the third series.

Steve Englehart wrote from 105. Struggling initially, and suffering throughout his run from changing art teams and fill-ins, he evolved into possibly the best *Avengers* writer. His forte was mixing and matching characters to provide the thrust of the plot, then throwing in adversaries to complicate matters. Englehart's first big story was the Avengers/Defenders War in 115-118*, crossing over into *Defenders* 8-11, a portent of the multi-title crossovers to follow fifteen years later, but then a noteworthy event. He later made logical use of the time-travelling Kang, who would attack the team, retire defeated and return next issue to fight the exhausted Avengers, having rested for ten years. Kang's attempt to kidnap an Avenger destined to become the all-powerful Celestial Madonna and her subsequent transformation occupied 129-135*. It incorporated *Giant Size Avengers* 2, featuring the touching death of a team member, 3 reviving assorted 'dead' characters and concluded in the appallingly drawn Giant Size 4 (an unwelcome return for Don Heck). Having dealt with the future, Englehart changed the cast again and sent the Avengers into the past and an alternate world to meet Marvel's cowboy characters and the Squadron Supreme in 141-144 and 147-148. George Pérez débuted as penciller in 141, and would become the longest-running artist since the Buscema days, but Englehart was replaced from 152, having revived another *Avengers* mainstay, Wonder Man, believed dead since 9.

Jim Shooter, with artists Pérez, and later John Byrne, turned out a succession of fast-moving stories, mixing Thomas' flair for superheroes with Englehart's deft characterisation. The battle against a superstrong Count Nefaria (164-166) is highly entertaining, but his peak was 'The Korvac Saga', in which almost every Avenger to date combats a being determined to impose a peaceful autocracy (167,168, 170-177*). Also of note is *Avengers Annual* 7, where Jim Starlin concludes his laudable Warlock series. David Michelinie adhered to the Avengers template, producing solid stories that fell short of previous quality, with 194-196 the exception. A highspot during this run was the tenth *Avengers* annual by the team of Chris Claremont and Michael Golden, introducing future X-Person Rogue. Sadly, the subsequent return of Jim Shooter (both alone and collaborating with Michelinie) was less successful. A protracted plotline saw the gradual mental dissolution of founder-member Hank Pym, once Giant Man, now Yellowjacket. His marriage dissolves and he's later framed and jailed. It has fine moments (particularly the single issue 224 and the finale 229-230), but lacks the dynamic artwork that graced previous *Avengers* epics.

Roger Stern, from 231 onwards, was also hamstrung by lacklustre art throughout the early part of his run, but didn't lack for ideas. He bowed to popular demand by inducting Spider-Man (232), had the Vision attempt to take over the world (253-254), and returned Kang in fine fashion (267-269), by which time the old art team of John Buscema and Tom Palmer were back on board. His best story took the obvious idea that the villains always failed against the Avengers singly or in pairs, but an army should succeed (274-277*). Stern's departure heralds a dismal period during which no writer managed to stamp any personality on the title, despite consistently fine art from the Buscema/Palmer team. The situation lasts until the emergence of Bob Harras in 343. In the company of highly regarded pencil artists Steve Epting and Mike Deodato, Harras was adept at creating new adversaries, sustaining mystery and the soap-opera aspects of the title, but also at stretching a single issue of plot over five issues. Initially he wrote the most entertaining *Avengers* comics in years, his best being the one-issue examination of the Vision in 348, but his conclusions to multi-part stories consistently fail to deliver the pay-off. Longer plots see alternate-reality counterparts of the Avengers emerging to kill Sersi (355-375), and in 'The Crossing' (391-395, plus one-shots 'Timeslide' and 'The Crossing') Tony Stark near-enough destroys the team and a long-gone former Avenger returns with a vengeance. An unwelcome development is that to follow individual stories assorted issues of other titles and one-shots are necessary, and almost all the oversize anniversary issues are disappointing. By the conclusion drastic surgery was required, although if he'd been allocated more than three issues writer Mark Waid might have rectified matters. The graphic novel 'Death Trap: The

Vault' is a pedestrian affair as the Avengers team with Freedom Force to prevent the escape of dozens of supervillains.

The initial issues of the second series struggle to earn a designation of merely appalling, with daft plots, grotesque art, ill-advised character redesigns, and wretched dialogue. This combination is exacerbated by their status as a much heralded and excessively promoted relaunch under the aegis of Rob Liefeld. The arrival of Jeph Loeb as co-plotter improves matters slightly, but later writer Walt Simonson is bequeathed a complete mess that he can't rectify. The highlight of the run is the pencilling of Michael Ryan in 7.

By contrast the third series is well handled to date, and anyone whose experience of *The Avengers* extends back no further than the late 1980s will probably consider the issues by Kurt Busiek and George Pérez masterpieces. Busiek's scripts to 56 are occasionally a little too knowing, but his retro-style certainly has appeal, echoing the work of Thomas and Englehart. Pérez pencils fluid and dynamic pages, gracefully inked by Al Vey, and is always keen to illustrate the maximum number of team members. 1-3* give him that opportunity along with the chance to design medieval counterparts, without the story ever seeming crowded, as decent a sample of the run as any. 5-6 feature The Squadron Supreme, who return in the best of the recent annuals, 1998, illustrated by Carlos Pacheco. New faces include former New Warriors Firestar and Justice (1), the frankly best forgotten Silverclaw (8), DC's Beast Boy/Changeling in all but green skin, and a rather hokey update of the old 3-D Man in Triathalon (8). He's tied in to a suspicious religious cult who long outstay their welcome, and the eventual revelations about their leader (50) are not worth the wait. There are also unexpected returns for the original obnoxious Yellowjacket (30) post *Avengers Forever*, and the long among the missing Jack of Hearts (35). Jerry Ordway's filler story in 16-18 is surprisingly ordinary. Pérez departs with 34, the conclusion of a story crossing over with *Thunderbolts* 43-44, and while Alan Davis and Mark Farmer (38-43) provide decent art, there is no stable penciller until the arrival of Kieron Dwyer with 46. While Busiek is fine with characterisation and dialogue, his plots often lack twists or spectacular pay-offs, although a grinding battle with Ultron in 19-22 is well executed. A lack of direction is particularly apparent during what is to all intents and purposes Busiek's finale, encompassing 40-55, featuring the return of Kang as the most dangerous of several simultaneous problems that tie-up almost all plot threads he's set in motion. Unusually, the villain wins for once, and 51 is a good issue set in a prison camp, but overall, the story drags. Better a failure with ambition, though, than retreading familiar ground yet again. Geoff Johns writes from 57, bringing a good track record with team comics. While fine on characterisation, his first story to 60* is ordinary, and in that (and since) his focus is very much on characters thus far peripheral to the Avengers like Ant-Man, The Falcon and Jack of Hearts.~FP

The AVENGERS: Celestial Quest

Marvel: *8 issue limited series 2001-2002*

Thanos kills various aspects of Mantis, the Celestial Madonna in order to locate her son Quoi. A number of Avengers – Thor, Vision, Scarlet Witch, Silverclaw – and Haywire from the Squadron Supreme, journey into space with Mantis to protect Quoi, who's been living with his father on Tamal, home of the Cotati. Along the way, three pirates find themselves drawn into the conflict, two granted god-like power by Thanos, the other romancing Quoi. Inoffensively drawn in a fluid, if featureless style, by Jorge Santamaria, the major problem with Steve Englehart's story is the incredibly irritating character of Quoi, but the use of Thanos is hardly innovative either.~NF

AVENGERS FOREVER

Marvel: *12 issue limited series 1998-2000**

Though dismissed as "Avengers Algebra" because of the vast number of characters and references to Avengers lore, this is, in fact, a straightforward plot with a lot of elaborate garnish.

Seven Avengers are snatched from different points in the team's lengthy history by Immortus, and enlisted in a battle to thwart the schemes of Kang, who, as usual, is trying to twist time to best serve himself, in this case, to avert his own destiny. During the course of events, our 'core' of heroes travel back, forward, and across in time to meet different incarnations of the Avengers. Penciller Carlos Pacheco and inker Jesús Meriño dextrously juggle a cast of around a thousand. Every character who has ever been in the team makes at least a cameo appearance, as do a couple of hundred who've never (as yet) been Avengers. By keeping the focus tightly on Immortus' reluctant temporal crusaders, writers Kurt Busiek and Roger Stern present an epic adventure without losing sight of the human element. Characterisation is deft and accurate, emphasising inherent emotional conflicts. Some of the time-tossed Avengers are complete strangers to each other, some well-acquainted (too well, in some cases) and have to be on their guard against disclosing each other's futures. Both script and art display an admirable clarity and strength given the myriad characters involved, and you don't, as has been asserted, need "A degree in Avengers" to read the series. Knowledge of the team's history is a bonus, and will enable you to appreciate the extra touches the creators have put into the story, but only the most cursory acquaintance with the Avengers is needed to enjoy the tale purely as a straightforward superhero saga – albeit a rather superior one.~HS

AVENGERS: Miniseries and One-shots

Marvel: 4 issue miniseries ('The Terminatrix Objective') 1993, 2 issue microseries (Avengers/Ultraforce) 1995, one-shot ('The Crossing') 1995, 4 issue miniseries ('The Domination Factor') 1999-2000, one-shot ('Timeslide') 1996, 2 issue microseries (The Last Avengers Story) 1995, one-shot ('Timeslip') 1998, one-shot ('Ultron Unleashed') 1999, one-shot (issue $1^{1/2}$*) 1999, 3 issue miniseries (Avengers Two: Wonder Man And Beast) 2000, 4 issue miniseries ('Infinity') 2000, one-shot ('The Ultron Imperative') 2001*

The Avengers have been poorly served by spin-offs, and very few are worth investigating. 'The Crossing' and 'Timeslide' are connected with an interminable story towards the end of the parent title's first run, 'Terminatrix Objective' is a fight against old enemy Kang, and 'Domination Factor' ties into a Fantastic Four miniseries of the same name. They're all poor, while the teaming of Wonder Man and the Beast, and 'Infinity' hardly stretch the imagination, although the latter stars rarely seen Avengers Moondragon, Photon, Quasar, and Tigra locating long among the missing Jack of Hearts. 'Ultron Unleashed' is a cheap way of obtaining Avengers 57, 58, 170 and 171, all very good, and 'The Ultron Imperative' is an early sidebar to the long story running in Avengers (third series) 41-55 and in hindsight an early indicator of how that story would drag. There are guest artists galore, but none nearing their peak. *The Last Avengers Story* is a dark future and slapdash story in expensive format, although Peter David fans might want it anyway, while *Avengers/Ultraforce* is a rushed re-run of *Avengers* 70 with Ultraforce replacing the Squadron Sinister. It precedes *Ultraforce/Avengers*, which can, and should, be read separately. Largely an excuse to let George Pérez draw alternate versions of Avengers and Ultraforce members, it's a decent enough, if eventually cramped plot from Warren Ellis. Alternative Avengers, and Asgardians, also feature in the bleak 'Timeslip', wherein Jim Krueger weaves a different origin for the team with other heroes on another Earth that Odin is attempting to destroy. Matt Smith's craggy art is very good, if largely bereft of backgrounds, and overall it's a spirited revision with a neat twist ending. *Avengers* $1^{1/2}$ is a curiosity prepared as if set between issues 1 and 2 of the original *Avengers* series, complete with fake ads. Roger Stern effortlessly apes Stan Lee, while Bruce Timm finds imitating Jack Kirby a little harder, but comics had moved on, and the joke wears thin after a few pages.~FP

AVENGERS SPOTLIGHT

Marvel: *20 issues (21-40) 1989-1991*

Previously *Solo Avengers Starring Hawkeye*, this also splits the pages between Hawkeye and other Avengers, the back-ups being used as try-outs for new creators. Many later worked on regular Marvel titles, but here the only exception to the appalling material is Dwaynes McDuffie and Turner's 'Acts of Vengeance' tie-ins in 26-28, which show some wit and spark. This was absent from Howard Mackie's writing on Hawkeye, but 30 institutes changes. The strip expands to occupy two-thirds of the comic, and Steve Gerber becomes writer. This is nowhere near his best work, but he immediately throws in one logical plot element, it being unlikely Hawkeye would survive a shooting. This leads to a beefed-up costume, and a vendetta against drug gangs concluded in shocking fashion in 36. Al Milgrom and Don Heck's art is adequate, but no more. The other change from 30 is continuing back-ups with USAgent (31-34) and Gilgamesh, although only the staunchest of fans – if there is such a thing as a Gilgamesh fan – are advised to seek them out. 'Avengers Reborn' is the tagline for 37-40, with Hawkeye ousted in preference for complete issues returning a neglected character for new use. The stories by Roy and Dann Thomas are universally slapdash, the best being the Greg Capullo-drawn Black Knight in 39.~WJ

AVENGERS: UNITED THEY STAND

Marvel: *7 issues 1999-2000*

An Avengers team not seen before thanks to the constraints of this being a tie-in with the Fox animated Cartoon. The team is led by Hank Pym and consists of Wasp, Hawkeye, Scarlet Witch, Tigra, Falcon and Wonder Man before the Vision kills him in 3. Most costumes have been redesigned, often with new colour schemes which jar a little. Guest stars include Black Panther in 1, 6 and 7, a clever melding of Swordsman and Black Knight in 4, Captain America in 6-7, Black Widow in 2 and 5, and not forgetting Devil Dinosaur in the last issue! For someone writing a piece of merchandising, Ty Templeton excels, making the comic more entertaining than the cartoon ever was. Derec Aucoin's artwork keeps things cartoony (as does Jason Armstrong's Kirbyesque work in 2) but is often hampered by ugly colouring. Fans of the original comic will find it hard not to be entertained by this title's light-hearted alternative reality.~SW

AVENGERS UNPLUGGED

Marvel: *6 issues 1995-1996*

An editorial decision seems to have been made that as this title sold for a third less than the regular *Avengers* comic there was little point in bothering about such standards as coherency, plot or basic artistic knowledge. Absolutely worthless.~FP

AVENGING WORLD

Bruce Hershenson: *One-shot 1973*

Avenging World was the best of the four mid-1970s Ditko solo titles. As with *Mr A* and *Wha..!?* the point of the title was to get across his right-wing views. Less of a strip than an illustrated essay narrated by the world himself, this contains some of Ditko's most startling imagery and fevered philosophy. In fact, as the comic progresses the text becomes ever heavier until we're left almost solely with Ditko's incessant ranting. Mad, but compelling.~DAR

Recommended

AVENUE D

Fantagraphics: *One-shot 1991*

A collection of Glenn Head's previously self-published strips showing the sordid underbelly of New York. An excellent cartoonist, Head portrays sadly true-to-life seedy characters with brutal lives and no hope.~FP

Recommended

AVIGNON

Image: *One-shot 2000*

A fairy tale about the clockwork Avignon, who yearns to escape from the plush, but empty surroundings her creator maintains to see the wider world. This is a stylish, but melancholy, story with Jimmie Robinson's stretched figures bringing to mind the look of *The Nightmare Before Christmas*. Seemingly originally intended to be serialised elsewhere, that might have been a better solution, as there's not enough story here to warrant the price.~WJ

AWAKENING

Void: *2 issues ('First Cycle') 1996*

Black Hound: *1 issue ('Goethe Garden') 1998*

The first series is about the world after the Apocalypse with Earth Angels (vampires) rebelling against the angels of Heaven. One of the vampires is Johnny Angel, servant of Lusipher. In the second, it's now 2051 and Johnny has abandoned the service of others and finds himself looking after a young woman, Angeline, whose suicide attempt fails when she lands on top of him. This is a confused and confusing strip, but does have some good fine-lined drawing from creator, Chen-Jeh Chen, who is clearly not working in a first language.~NF

THE AWAKENING

Image: *4 issue miniseries 1997-1998**

A woman shot, in hospital, dreaming as she recovers, struggles to the surface only to find that someone's trying to strangle her. Released into the care of Uncle David, she's thrown off a building, but saved by a ring that seems to enable flight. There's an underlying tale of misunderstanding, love and loss explored through the surreal landscapes of dreams before the final issue unravels their hidden meaning. Creator Stephen Blue has a very detailed style reminiscent of the Schuiten Brothers in its realist approach. This is an intriguing series but its deliberately haunting images ultimately fail to deliver as strong an emotional response as the revelations would seem to demand.~NF

AWAKENING COMICS:The Everwinds Awakening War

Awakening: *3 issues 1998-1999*

Surreal tale of a confluence of realities called Everwinds and the plot to conquer them all using Virtual Reality. Steve Peters draws well but it's a little confusing having ninety-eight characters whizzing about. Full of left-over Hippie grooviness, so if you hate that you'll despise this.~WW

AWESOME ADVENTURES

Awesome: *1 issue 1999*

Intended as an umbrella title to use unpublished scripts Alan Moore had written for Awesome, only the single issue appeared, presenting what was *Youngblood* 3 under another name. It's a good superhero comic of the type Moore can seemingly turn out in his sleep, competently drawn by Steve Skroce (whose name is mis-spelled on the cover). Alas, the money ran out, and the conclusion never saw print, leaving Youngblood wiped out in both story and reality.~FP

AWESOME HOLIDAY SPECIAL

Awesome: *One-shot 1997*

For fans of *Fighting American, Youngblood, Kaboom* and *The Coven*, this special features short stories with a Christmas theme. The strips are entertaining, good-natured superhero tales with artwork by the regular teams but only Alan Moore's Youngblood offers anything more by way of plot and continuity. Otherwise, they all serve as representative samplers for their individual series.~NF

---

* Available in a collected edition

AWESOME MAN

Astonish: *1 issue + 2002 to date*

Little Joey's favourite TV cartoon is Awesome Man, while his extremely bright near teenage brother has other things on his mind, and they won't progress if he has to babysit his brother. There's not inconsiderable charm to this first issue in terms of character, dialogue and art, although it might have been nice if Joe Mateo had bothered erasing his pencil lines.~WJ

The Man Called A-X

Bravura: *6 issue miniseries (0-5) 1994-1995*
DC: *8 issues 1997-1998*

A heavily armed behemoth rampages through Bedlam City, wiping out gangsters infesting the place. Apparently indestructible, the survivor of numerous deathtraps, and able to regenerate to an extent, his major concern is that he's unaware of who he is and why he's killing gangsters. Meanwhile, the local gangsters have to club together to stand any chance of dealing with him, and a newspaper reporter is on his trail. In his introduction writer Marv Wolfman compares A-X to a Hong Kong action movie, and it's certainly got that fast-paced, relentless, over-the-top feel, but Wolfman is also canny enough to avoid presenting the clichéd big bloke with bigger guns. The gangsters are colourful, and artist Shawn McManus, usually known for subtler projects, proves very adaptable. The zero issue starts to offer the explanation as to what A-X is, and slots in between 3 and 4, rather than starting the series.

At DC A-X concentrates on discovering his true identity, a plot that's a little prolonged. All the while one of Bedlam's ten gang leaders is manipulating his adversaries. It's every bit as good as the previous series, but for a stand alone sample try 5, in which there's a touching and unconventional reunion of mother and son amid the ongoing quest. It's a mystery why an action thriller this good, seemingly completely in tune with the times, was a commercial failure.~WJ

Recommended: Bravura 0-5, DC 1, 4-8

AXA

Ken Pierce: *9 issues 1982-1988, one-shot ('Color Album') 1985*
Eclipse: *2 issues 1987*

Axa leaves the comfort of her post-holocaust dome to seek freedom, and, occasionally, on missions at the behest of the dome's Director. Axa is a sword-wielding adventuress, battling the customs and prejudices of the world as much as the mutated creatures, exploitative humans and even aliens. The story of Axa's birth is told in 8, and her first boyfriend, Jon shares some adventures, but her more constant companions are Matt and Robot Mark. The nine issues reprint all of the newspaper strip, written by Donne Avenell and drawn by Enrique Romero (perhaps better known for his work on *Modesty Blaise*) that ran in the British Sun between 1978 and 1985. This includes the final, unfinished storyline in which a group of robots have taken to Robot Mark as their leader against mankind. The 'Color Album', was originally produced in Spanish by the same creative team, with Axa alone against a gang of Hell's Angels besieging a lighthouse and its father and daughter occupants. The two issue series, distributed by Eclipse, features all new stores by Chuck Dixon and Romero, as Axa and friends escort children to the Starwatchers whilst protecting them from the Engineers (1) and then return to the dome in 2. It's always good to see a strong female character in an adventure strip, but these are not the most imaginative of stories despite Romero's decorative drawings.~NF

AXEL PRESSBUTTON

Eclipse: *6 issue miniseries 1984-1985.*

Pressbutton is a demented ex-florist whose body is almost completely consumed by Vegan Green Fungus, a telepathic, slow and very well mannered carnivorous plant. Everything save one arm and his head is replaced with clunky mechanicals, including a huge shiny chopper for a left arm. As some kind of compensation, a button on his chest is hot-wired directly into his pleasure centres. His partner, Mysta Mystralis, is a thirteen year old artificially matured (she looks 21) clone, with whom he works as a licensed hitman (slash, hack, stab and chopman, actually). They find themselves the subject of an assassins' plot, accidentally catch some drug-runners and Mysta narrowly escapes becoming God, in breakneck adventures chockfull of wit and bad taste in equal measure, written with manic glee by Steve 'Pedro Henry' Moore and drawn by Steve Dillon and Alan Davis. These stories are reprinted from the UK magazine *Warrior*, as are the back-up strips, by such luminaries as Alan Moore (who, as Kurt Vile created Pressbutton as Kurt in the *Sounds* comic strip 'The Stars My Degradation'), Hunt Emerson, Brian Bolland, Dave Gibbons and John Ridgway. After this series more Pressbutton can be found in *Laser Eraser and Pressbutton*.~WW

Recommended: 1-6

AXIS Alpha

Axis Comics: *One-shot 1994*

This preview of forthcoming Axis series is a collection of short stories featuring B.E.A.S.T.I.E.S. (an armoured anti-terrorist squad), Dethgrip (an armoured thief), Shelter (a mercenary superhero team), Tribe (an armoured something or other) and W (a team of assassins that includes Why and Where). The creators are too eager to show their characters in action, but there isn't an interesting one in the bunch and only Gene Ha on Shelter offers a glimmer of promise as far as the artwork is concerned.~NF

AXIS MUNDI

Slave Labor: *2 issues 1996*
Slab O Concrete: *1 volume 2001*

In writer Ian Carney's cyber-fantasy vested interests own the worldwide web. If you're not very rich your only way into the party is to gatecrash. This is exactly what 14 year old schoolgirl Button Smith does as thug Axis Mundi. Her alter ego becomes a cult star of Unreal Estate (the web) with a following that irks plutocrats and media whores alike. The Slave Labor series was prematurely cancelled, so the collection is the first printing of parts 3 and 4. Artist Garry Marshall has a tremendous feel for cast shadow and, key when evoking virtual reality in mono, scale. Some of the references are doomed to obscurity but the political sharpness and graphic chutzpah should ensure this stays a well-remembered bash.~SW

AZ

Comico: *2 issues 1983*

Dear, oh dear, oh dear. Az is large pink alien (an Azonian), who is captured by the evil monocled Baron Stroker. There are a few nice ideas, like a cigar-smoking fish, but you can't sympathise with our pink friend as he's a violent bugger. The abysmal art only made matters worse. This is sub-standard fanzine level at best, so who would have thought Comico would grow into a respected publisher.~HY

AZRAEL

DC: *100 issues, 3 Annuals, one-shot (Azrael +) 1995-2003*

Jean Paul Valley is the avenging angel Azrael, defender and chief assassin of the ancient Order of Saint Dumas. Conditioned from birth by the System, which is manifested when he puts on his costume, Jean Paul does not really know who or what he is. This series picks up where the Batman 'Knights End' story left off, with Jean Paul living on the streets of Gotham, unsure of anything. The first storyline (1-4) gives him some companions, the drunken ex-psychiatrist Brian and Sister Lilhy, who has left the Order. As the series progresses, Jean Paul discovers more about his past, including that he was born in a laboratory and has animal genes in his makeup. 21-26 feature the fall of the Order of Saint Dumas, before Ra's Al Ghul tests Azrael as a possible mate for Talia (29-30). 34 is a *Genesis* crossover, 35 guest-stars Hitman and 40 is a 'Cataclysm' crossover. After battling Bane (36-40), then losing and re-finding Sister Lilhy and Brian, Azrael becomes 'Agent of the Bat' on the cover and in the indicia (47). 'No Man's Land' (50-61) gives Azrael a new costume (silver instead of gold) and teams him with Oracle, Batgirl and Catwoman against Nicholas Scratch and the Joker amongst others. It also introduces him to Leslie Thompkins, whose pacifism writer Denny O'Neil will use (at tedious length), in counterpoint to Azrael's aggressive tendencies for the rest of the series.

After surviving an attempt by Nicholas Scratch to frame him for murder (and a return to his old costume), Azrael searches for Leslie's missing brother who has become a fanatic and co-opted Sister Lilhy's new Azrael as his own weapon of retribution (63-75). Thereafter, another new beginning sees Harold help Azrael build his own cave as he tries to help local people, but falls prey to a mad scientist. 83 is a 'Joker: Last Laugh' crossover, reintroducing Sister Lilhy (again). After defeating a superpowered opponent, Azrael begins a descent into madness, urged on by visions of Saint Dumas, and puts his Batman costume on again briefly, before becoming the unwitting tool of a couple of con men who set out to make Azrael a popular saviour, thus lining their own pockets. Then Batman decides that it's time to take responsibility for Jean Paul's fate. The run-of-the-mill nature of the series wasn't helped by the artwork. Drawn mostly by Barry Kitson (1-28), Roger Robinson (31-33, 35-40, 42-68) and Sergio Cariello (69-100), only the last of these managed to bring any real life to their work.

The 1995 annual explains events leading up to the *Sword of Azrael* miniseries, and the 1996 annual is a tale of a future Azrael. Best issue of the whole series is the Pulp Heroes themed, 1997 annual, drawn by Jim Aparo, in which Jean Paul narrates a hard-boiled detective team up with Catwoman. Issue 1,000,000, set in the future, seems designed to confirm that Azrael is and always will be a dull-witted character. Written by O'Neil, in what was clearly meant to be a thoughtful manner, the series was simply repetitious and dull because Jean Paul as a character was effectively comatose for most of the series (O'Neil's attempt to demonstrate that Azrael was a naïve innocent). O'Neil gets to write The Question again in *Azrael +*. In this dull team-up Vic Sage and Jean-Paul Valley end up on the same riverboat when The Question is hired as bodyguard to a colonel's actress daughter, and Azrael takes an advert for her performance as an omen in his quest for self-understanding. Drawn without much life by Vince Giarrano, there's a lot of talking but nothing much actually happens~NF

AZRAEL/ASH

DC/Event: *One-shot 1997*

A cut above the standard cross-company crossover in so far as there's a decent, if unexceptional, storyline that has Azrael and Ash trying to prevent a mad Professor from killing hundreds of people. The professor is abusing the trust of a young, lost alien that thinks it's summoning its mother with the fires it sets. With a cameo from Batman and one of his old villains, Firefly and support from Oracle, Denny O'Neil makes good use of his experience with the DC characters while Joe Quesada and Jimmy Palmiotti turn in their usual, pretty, tightly-inked artwork.~NF

AZTEC ACE

Eclipse: *15 issues 1984-1985*

Doug Moench, writer on Marvel's occasionally inspired *Master of Kung-Fu*, seemed to lose all sense of proportion when granted a greater degree of editorial freedom for this series. *Aztec Ace* is an impossibly prolix time-travel yarn full of hippy dippy philosophising such as this load of old tosh from 1: "The whole thing was a symbolic realisation of time, space, history's mystery, and that which could unravel the whole ball of yarn, an onion with five layers and a nasty center – or five apples sharing the same worm-riddled core." Like wow, man. No wonder the letters page is full of people recommending Grateful Dead albums...

Moench throws away an interesting mix of time travel, alternate worlds, mythology, history and the occult on a series of hideously complicated and pretentious storylines. They're full of distracting cameos from the likes of Benjamin Franklin, Humphrey Bogart and Charlie Parker, which require great concentration for very little reward. By 13 even Moench's resolve was weakening, as our Aztec hero wearily donned a superhero costume to become imaginary 1940s hero The Crimson Comet. The passable artwork of Mike Hernandez (1, 2) and Dan Day (3-15) plays second fiddle to writer Moench's text-heavy scripts.~AL

AZTEK:The Ultimate Man

DC: *10 issues 1996-1997*

Grant Morrison and Mark Millar teamed to write a new hero for the end of the century: naïve and unworldly (he's been brought up in a Tibetan monastery), inexperienced but nevertheless bred to battle the Shadow God. While he's waiting for the latter to show up, he has to find a place for himself in Vanity, an ugly city. In 1 he's involved in the death of the city's resident superhero, Bloodtype, and becomes a target of the city's various ganglords, who don't want a superhero around. A team-up with Batman (6-7) against the Joker sets him firmly within the DC Universe. This is followed by a closer look at the Q Society that trained him, revealed to have connections to Lex Luthor. The artwork by N. Steven Harris and Keith Champagne, neither of which sound like real names, has clean lines and clever use of shadows, but faces out of costume needed work. Perhaps Morrison and Millar took too long to get to the point, although the title's humour and the lack of their familiar psychobabble was refreshing. With Aztek's cancellation his future was played out in *JLA*.~NF

B

BABE

Dark Horse: *4 issue miniseries 1994, 2 issue microseries 1995*

An unscrupulous agent (showbiz, not secret) almost runs down a naked lady one rainy night. She's seven feet tall, amnesiac, and phenomenally strong. He decides to search for her true identity, but not too hard, since there's money to be made in the meantime. The first series is lightweight, but an amiable read, polluted by the sickeningly cutesy 'Proto-Tykes' back-up. The second is so pointless and perfunctory one wonders why John Byrne bothered. Presumably the hugely successful talking pig movie of the same name will preclude a third attempt.~HS

BABYHEAD Magazine

Slave Labor: 1 *issue + 2002 to date*

A strange concoction of short strips featuring thick-lined heavily photo-referenced art, bizarre but pointless characters, heavily marketed superheroes and stories steeped in the pop culture of the early 1980s. Part scattershot satire and part wacky humour, it's not half as funny or clever as it's meant to be.~FP

BABYLON 5

DC: *11 issues 1995*, 3 issue miniseries ('In Valen's Name') 1998**

This first series is unique in the annals of comic adaptations in attempting to complement then current events in the TV show continuity. With previous base commander Jeffrey Sinclair having left Babylon 5, it's revealed that he's become Earth's ambassador to Minbari, and 1-4* focus on him there, being framed for murder. It is well connected with the TV series, being plotted by series creator J. Michael Straczynski, who also writes the first issue. Thereafter it's written by Mark Moretti, and drawn by Mike Netzer and Carlos Garzon, who are better at capturing likenesses than John Ridgway, who draws the following story arc. 5-8 are set prior to the arrival of the Shadows in the TV series and have Garibaldi discovering a Shadow base in a story that also encompasses his first meeting and adventure with Sinclair. While good, it doesn't match the first story, but the team of Tim DeHaas and Ridgway return for a Psi-Ops tale in 11. 9 and 10, written by David Gerrold, are competent, but don't match the remainder of the run. The miniseries concerns the return of Babylon 4 from the past, with Straczynski plotting and writing 1, before leaving the rest to Peter David. Mike Collins and David Roach produce the best show likenesses, but unless you're desperate for snippets of Valen's legacy in the past and then final fate of Sinclair, it's dull.~WJ

Recommended: 1-4

BABYSITTER

Slave Labor: *2 issues 1999*

Setsuko's just transferred to a new high school and wants to get on with the normal things that a normal little girl does in Japan. If only she wasn't continually hassled by devils, monsters, amok robots and their mad makers and the ubiquitous secret societies. Good thing she has her own jet-pack! Engaging insanity from Andy Rastaino who explores a complex culture from the viewpoint of someone addicted to Nippon's cartoon exports.~WW

Eddie Campbell's BACCHUS

Harrier: *2 issues 1988**
Dark Horse: *1 Special 1995**
Eddie Campbell: *60 issues 1995-2001*

This originated as a companion title to Campbell's *Deadface* series, which starred Bacchus but was much more adventure orientated, or at least as active as Eddie Campbell's stories get. After the first 30 or so issues the title has metamorphosed into a compendium of everything Eddie's ever done. There's the early Days of the Ace Rock'n'Roll Club strips (52's 'If Monkeys Learned To Fly', about teenage pregnancy scares, is among the best) through fanzine covers, to reprints of Eyeball Kid and Joe Theseus stories (*1001 Nights of Bacchus* runs in 34-43, 'Picture of Doreen Grey' in 41-47). The latter issues are more commonly made up of a couple of short new strips about everyday life, and dream encounters with his characters, backed up by a chunk of reprint and contributions from Montague Hale and Daren White. In the case of many creators, this would be worthless, but there are many gems to be scraped up from Campbell's amateur years, and he does have some sense of quality control in what sees the light of day.

Bacchus begins as a vehicle for retelling whichever Greek myths catch Campbell's magpie eye, with a certain joyous irreverence. The narrator is the 4000-year old god on history's longest bender: "It's all a bit of a blur after I invented wine". The scripting perfectly captures the simultaneously wise and rambling nature of pub conversations, and yet there is always a certain threat of violence. The Harrier story shows us the old rascal in Rome laughing at the roly-poly version of himself the Romans dreamt up. He remains firmly the anarchic god whose followers ripped people apart in their god-sent, wine-fuelled frenzy.

The first self-published issue disappoints – a *Cerebus* jam probably designed to lure readers with a bigger name – but then the pedal's down and we're off on a wild ride with 'King Bacchus' in which the old guy's local pub secedes from UK rule. All would be well if Delirium Tremens and his Screaming Habdabs weren't on Bacchus's trail, forcing him to take refuge in a handy painting. As Bacchus is chased through a world of artworks, the cleverest among the pub's citizens bring in Neil 'Scary Trousers' Gaiman to reinvent their hero as a more popular, offbeat superhero version of himself. Alan Moore pops up as the wizard who lives in the basement, as Campbell weaves fine art, fine wine and parody effortlessly into a detailed and inventive tapestry. The only downside is the art assistance from Pete Mullins, who smoothes out some of Campbell's rough and scratchy edges, and doesn't have his feel for line quality, which is a great pity. However, he's a fixture of the series so you soon get used to it.

Campbell's semi-autobiographical Alec stories begin reprints with 15 and run to 29. Alec pops up again in some of the Ace Rock'n'Roll Club stories also. Particular highlights among the many vignettes of Campbell family life that represent the new material in the later issues include 'Running a Publishing House out of the Front Room' in 47, 51's 'Ouch' where Eddie reminisces about discovering the perplexing world of American comics while in hospital as a child, and 'Monty the Dog' in 59, a slapstick comedy about a new family dog who uproots bushes, terrorises joggers by yanking down their shorts when they pass the house, and mounts the children's legs at every opportunity. Bacchus is an intensely civilised comic whose charms may bypass many readers. Lovers of spinning yarns over a few pints will adore it, however. All of the Bacchus material is collected in a series of nine trade paperbacks.~FJ

BACKLASH

Image/WildStorm: *32 issues 1994-1997*

Backlash is Marc Slayton, an ex-member of Team 7. As the series starts, Slayton is employed as a teacher by Stormwatch, but when his girlfriend Diane is put into a coma by a daemonite he is forced to become a renegade in order to find a cure. He breaks Taboo out of jail hoping her inside knowledge will help. From this premise the series concentrates on Slayton's place in the scheme of things, introducing a daughter, Crimson, and a rivalry between the cured Diane and Taboo. His hitherto unknown ancestry is revealed and as a result he loses his powers, but he and Taboo are pardoned and hired by the government's Psi Department. His relationship with Team 7 continues to cause friction, however, in the WildStorm crossovers *WildStorm Rising* (8) and 'Fire From Heaven' (19, 20). From 27 a long-running story begins with revelations about Marc's father and the introduction of an ancient alien race, the Drahn. These storylines were then carried over into replacement series *WildC.O.R.E*, a team title. Written by Sean Ruffner and drawn by Brett Booth and later Juvaun Kirby (21-28) and Pete Woods (28-32), Backlash was a better than average superhero series, strong on characterisation and always seeming to possess a definite direction.~NF

BACKLASH/SPIDER-MAN

Image/WildStorm: *2 issue microseries 1996*

While conforming to most of the rules about inter-company crossovers (namely "for every one of yours you'd better include one of mine"), Sean Ruffner and Brett Booth manage to produce a pretty good story. It's about Venom being misled by Pike into believing that Taboo is somehow related to his symbiote and therefore drawing himself into conflict with Spider-Man and Backlash when he kidnaps her. The story ties in more to Backlash's than Spider-Man's continuity but is frankly all the better for avoiding any clone nonsense, and Brett Booth's artwork is excellent. Not good enough to recommend, perhaps, but well worth a look.~NF

BAD BOY

Oni Press: *One-shot 1997*

High profile, but disappointing premiere outing for cutting edge publisher Oni, that teams writer Frank Miller and illustrator Simon Bisley (with colour and letters by Angus McKie) to tell the tale of incorrigible kid Jason and his struggle against conformity. In most situations, however, that wouldn't involve being kidnapped by killer cyborgs, chemically brainwashed and made the test case for a scheme to spiritually and emotionally lobotomise humanity to produce shinier happier people that will do what you tell them to. Although competent and good to look at, it's not the best work from either creator, and Harlan Ellison did it first and better.~WW

BAD COMPANY

Quality/Fleetway: *18 issues 1988-1989**

In the future, Earth is on the verge of ecological collapse and wars are fought in space with the alien Krool for planets to migrate to. Young Danny Frank is sent as a replacement to the planet Ararat where he is almost instantly the last survivor of his unit. He is rescued by and joins the legendary Bad Company, an in-country team who are in many ways worse than the aliens they fight. The Krool are dedicated to research, mutilation and all the arts of torture, and Danny learns the horrors of war and that you can't trust a human. He's alongside Kano, Thrax, Dogbrain and Scummer, escaped experiments of the alien monsters, who would rather die free than return to their own lines. The work by Pete Milligan, Brett Ewins and Jim McCarthy was considered ground-breaking and very popular on its initial run in the UK's *2000AD*, but seems terribly dated now. The comics also feature a number of other *2000AD* strips as backups, including 'Universal Soldier' by Alan McKenzie and Will Simpson, 'Freaks' by Pete Milligan and John Higgins, and 'Tribal Memories' by Pat Mills and Riot. Titan volumes collect all stories in black and white.~WW

The BAD EGGS

Armada: *4 issue miniseries 1996*
Acclaim: *4 issue miniseries 1996-1997*

Dinosaurs as sitcom? Hasn't this been done before? Yes, and considerably better than this. Particularly feeble are the abundance of knowing references to the present; one can almost imagine the canned laughter. There are some funny moments in this story of dinosaur tearaways, particularly in the final issue of the first series, when no dinosaur other than the leads will believe the local volcano is going to blow. All in all, though, stick to the TV show.~WJ

BAD KITTY

Chaos!: *3 issue miniseries 2001, one-shot ('Mischief Night') 2001, 4 issue miniseries ('Reloaded') 2001-2002*

Catherine Bell is a cop, beautiful, blonde, bad-assed (it can usually be seen hanging out the top of her low slung, too-tight leather trousers) and on the trail of corruption in New Orleans. When she's framed for murdering her partner 'Kitty' goes on the run to uncover the Voodoo conspiracy that is crushing the city. Dreadful tosh from Brian Pulido, Steven Grant and Adriano Batista. 'Mischief Night' is part of a company crossover which examines the supernatural hi-jinks of the Bad Girls one Halloween before the second miniseries explores the repercussions as Catherine becomes involved in a war between a werewolf pack and Vampire Babe, Chastity. Joshua Dysart and Batista prove that you're never too old to be a sweaty adolescent.~WW

BAD LUCK

King Comics: *1 issue 1993*

This is such an accurate representation of 1940s comics that one almost wonders if it isn't some sort of hoax. It does seem to lack any sense of irony, but the daft plotting, simple art, illogical decisions by the protagonist and strange jumps in the story are straight from the so-called Golden Age. Why?~FP

BAD NEWS

Fantagraphics: *1 issue (3) 1988*

Following the semi-pro issues, editors Paul Karasik and Mark Newgarden brought their anthology title to Fantagraphics for one, terrific final issue, with contributions from Richard McGuire, Ben Katchor, Kaz, Gary Panter and even Art Spiegelman. It is no surprise that this reads like a slimmer version of *Raw*, but there's nothing wrong with that. Standout strips include R. Sikoryak's lovingly crafted newspaper strip pastiches and Mark Newgarden's breathtaking comics deconstruction, 'What We Like'. Pretty much the only downside to the comic was that there were no more issues, since the quality was so obviously there.~DAR
Recommended

Warren Ellis's BAD WORLD

Avatar: *3 issue miniseries 2001*

Peculiar blend of anecdote, after-dinner tale and tirade as Warren Ellis produces a veritable catalogue of the disturbing, the disgusting and the vile things that human beings choose to do. Jacen Burrows produces illustrations for short prose pieces. The patented Ellis rants and tirades are as readable as ever but one wonders how you can bemoan the venality of humanity whilst packaging it for sale.~WW

BADAXE

Adventure: *3 issues 1989*

This spin-off from *The Adventurers* recounts how the War God of Pangaea attempts to return to the world of mortals by manipulating warriors and wizards into finding a suitable body to act as an avatar. A hodge-podge of badly written and drawn *Conan*, *Jungle Book*, and *Lord of the Rings* 'homages' that is as bewildering as it is dull.~WW

BADE BIKER and ORSON

Mirage: *4 issue miniseries 1986-1987**

Jim Lawson's paen to the freewheeling *Easy Rider* lifestyle as cool drop-out Bade hooks up with Orson, a talking frog possessed by the artificial soul of an alien culture. They have meandering encounters with juvenile delinquents, mutant killer shrubs and devils from Hell. Good-humoured but unmemorable.~WW

* Available in a collected edition

BADGER

Capital: *4 issues 1983-1984*
First: 66 issues (5-70), 1 Graphic Novel ('Hexbreaker'), 1984-1991, 4 issue miniseries (Badger Goes Berserk) 1989, one-Shot ('Bedlam') 1991
Dark Horse: *4 issue miniseries ('Shattered Mirror') 1994, 2 issue microseries ('Zen Pop Funny Animal Version') 1994*
Image: *11 issues 1997-1998*

The adventures of Hammaglystwyth, a 6th century druid and the Vietnam veteran he meets in a Wisconsin Psychiatric Institution. It's an incredibly inconsistent series, all the more surprising for being written almost exclusively by Mike Baron. The Badger is a martial arts/costumed hero and one of several peculiar personalities that alternate in running the body of the very disturbed Norbert Sykes. When Ham discharges himself from the hospital, he takes Sykes and therapist Daisy Fields, abandoning his previous speciality (Weather Control) in favour of acquiring control of the 20th century's dominant power system – money. Sykes, the chosen tool of Matilda the Badger God, is charged with protecting animals, with whom he can converse, whilst Ham uses them as blood sacrifices. This makes for some good comedic moments in early issues, but as the series progresses characterisation is increasingly sacrificed to the demands of whatever gag the story revolves around. A broad supporting cast, including the many dead film stars that 'help' Badger fight a succession of martial artists, demons and weirdoes keep the fast-paced stories from becoming formulaic, as do the jaywalkers, litterbugs, lovers of loud music and animals abusers that he regularly thrashes, presumably as a vicarious thrill for scripter Mike Baron.

Badger Goes Berserk miniseries tells a better than average tale as Norbert's stepfather returns, forcing Badger to confront the events that created his multiple personalities, with different artists drawing each of Norbert's identities. The 'Hexbreaker' graphic novel has him get married and participate in a martial arts tournament run by the Rulers of the World.

Taken individually, most issues are an entertaining read but anyone hindered by a sense of logic, or with a dislike for the works of Chuck Jones, Hong Kong cinema and the Three Stooges may find *Badger* palls very quickly. As the series folded, First released a mediocre one-shot in which Norbert is re-committed to an asylum that just happens to be run by a mad psychiatrist and Badger's arch-enemy, the Roach Wrangler. For Dark Horse Baron wrote a more or less straight (gag-free) reworking of the origin tale ('Shattered Mirror') followed by a pedestrian tale of cattle mutilations and demonic college professors ('Zen-Pop Funny Animal Version'). At Image *Badger* returns to his action-humour roots in forgettable tales with all the ingredients, but little inspiration to lift them out of the category of formula writing.~WW

BADLANDS

Dark Horse: *6 issue miniseries 1991-1992**

It's 1963 and small-time crook and full-time patsy Connie Bremen is contacted by a former cellmate on release from jail with an offer of work. He's moved to Texas and given a job guarding the promiscuous daughter of a local businessman. It gradually dawns on Bremen he's there for a reason. Yup, it's Kennedy shooting time in Dallas. Considering the assassination shaped the American psyche, astonishingly few comic stories have used it, even as a touchstone for the times. Steven Grant and Vince Giarrano weave a compelling story around a man no longer in control of his destiny, but about to change the destiny of a nation.~WJ

Recommended: 1-6

BADROCK

Image: *2 issues, 1 Annual 1996*

The hulking teenaged member of Youngblood gets a solo series. Being written and drawn by Rob Liefeld, it's even more devoid of imagination than you might expect, being a clichéd missing-parent storyline that, despite the presence of the Savage Dragon in 2, was abruptly cancelled. The Annual, written by the usually inventive Tom & Mary Bierbaum, also disappoints. Guests the Freak Force turn up and guess what? Everybody fights! At one point, a character asks, "What's the story here?" What, indeed.~HS

BADROCK & COMPANY

Image: *6 issue miniseries 1994-1995*

Youngblood's rocky adolescent giant worked his way through a series of guest stars in this light, entertaining series. The plot involved him desperately trying to become older heroes' sidekick until they finally told him to go away and never come back, a joke that just about lasted the six issues and into the spin-off Grifter & Badrock miniseries that followed.~JC

Recommended: 3 (Mighty Man), 5 (Grifter)

BADROCK WOLVERINE

Image/Marvel: *One-shot 1996*

Very ordinary teaming of the youngest Youngblood and the oldest X-Man, incorporating a tour of the Savage Land and the mutates that appear every time the X-Men visit. As company team-up policy dictates equal opportunity, this time they're under the control of interstellar conqueror Tyrax, who mutates a few dinosaurs to pad the comic to the requisite length.~FP

BAKER STREET

Caliber: *10 issues 1988-1992*

Former police inspector and current punk Sharon investigates in an alternate London experiencing a resurgence of Victorianism amid the prevalence of rival punk gangs. Allusions to Sherlock Holmes and his world form an intriguing setting, but they're secondary to a well portrayed cast and well plotted mysteries that would work with any window dressing. 'Honour Among Punks' occupies 1-5*, a tale of forgeries and gang wars from Gary Reed and co-plotter and artist Guy Davis, whose style is detailed, expressive, confident and far removed from his amateur efforts on *The Realm*. We're in Jack The Ripper territory for 'Children Of The Night' (6-10*). It's even better, with Davis now solo and managing to shock with the identity of his killer. There's far more to *Baker Street* than mystery, though. Sharon and Susan, her straight American counterfoil, are endearingly portrayed, having a warmth never present in Holmes and Watson, and if you want more there's a short in *Caliber Presents* 9, and the 'Sketchbook', containing a wealth of background material unpublished elsewhere.~FP

Recommended: 1-10

BALDER THE BRAVE

Marvel: *4 issue miniseries 1985-1986*

This ties in with *Thor* 353-362, where Balder is established as a hero who has a special ability to communicate with birds. Here he's involved with the sorcerer Karnilla, the Queen of Norn, but has to leave on a rescue mission to Hel, and while he is gone the Frost Giants attack Norn and abduct Karnilla. Poor Balder, two rescue missions in the space of a single issue, with not even time between for a change of underwear. Actually, it's not a bad story, and stands on its own quite happily after a slow, Thor-burdened start. Walter Simonson keeps it zipping along, with plenty of twists and turns, with some unusual dark aspects. Sal Buscema's artwork works well, and the scenes in the giants' castle are particularly enjoyable. It's above average, but it's not essential reading.~FC

BALL AND CHAIN

Homage: *4 issue miniseries 1999-2000*

Edgar and Mallory are very much in love, and each is trapped in the Marriage from Hell. Trouble is, they're married to each other, and despite their mutual passion, they're about to call it quits when a meteorite falls out of the sky, smiting them both. Normally, this would be the perfect solution to their marital differences, but it turns out that the meteorite has given them amazing powers; as long as they stay in close proximity to each other. It's also made them "weirdness magnets", so they find their lives becoming even more complicated. Scott Lobdell's tale of wedded angst and reluctant super-heroics is fun, but just misses being a great deal better due to the limits of artist Ale Garza. Under a penciller with a better grasp of body language and facial expression, this would have been delicious. As it is, it's....okay.~HS

THE BALLAD OF DOCTOR RICHARDSON

Horse Press: *Graphic Novel 1994*

Set in the imminent future, Paul Pope's "drawn novel" is a stylish disintegration of a man's life. Doctor Richardson has a secure university tenure, but his attempts to publish are meeting with failure. A single man, on meeting a former student he throws his customary caution to the wind in pursuit of her, being drawn into situations and company far outside his cosy academic closet. This is a very accomplished character study from Pope, who is particularly impressive in detailing the bleak nature of Doctor Richardson's existence. Pope's art may not be to all tastes, being very stylised and European, and not at all helped by the detail of his lines blurring in print. There is, however, fluidity and confidence and Pope's is a rare vision and talent.~WJ

BALLISTIC

Image: *3 issue miniseries 1995*

Kracus, the mad-god leader of the Ethreal (a race of vampire/werewolf hybrids), pursues Cyberforce's Ballistic to force her to become his queen. With the help of some of the Wetworks team and Kracus' sister, Ballistic must use the combination of her cybernetic powers and newly acquired vampire abilities to overcome Kracus' destructive urges. This is an excellent example of how to handle crossovers between different universes. Brian Haberlin connects Mother One from Wetworks' origin to the Cyberdata corporation that created Ballistic, and it's Cyberdata's search for alien technology that brings them into contact with the Ethreal from the WildStorm universe. Despite annoying tendencies to distort the human figure for the sake of a good pose, Michael Turner's artwork is very pleasing. Haberlin's script avoids a lot of the superhero clichés but fails to make much use of the Wetworks characters other than Mother One.~NF

BALLISTIC IMAGERY

Image/Top Cow: *1 issue 1996*

Uninspired, but well illustrated anthology featuring the dimension patrolling Hellcop later to progress to a miniseries, a sci-fi fantasy quest and 'Tales of Cyberforce'. Ho-hum.~WW

BANANA FISH

Viz: *7 volumes – 1998 to date*

Lacklustre, rambling and often off-key gangster thriller that began English serialisation in the anthology magazine *Pulp*. When a US soldier seemingly goes mad in the final days of the Vietnam war and starts blasting the members of his own platoon he is shot and crippled by his buddy Max Lobo. The only thing the demented grunt will say is "Banana Fish". Twelve years later, in 1985, gangland atrocity is on the increase in New York and the police are floundering. When charismatic young Gangsta Ash Lynx is suddenly embroiled in the drug schemes of his "patron" and pimp, the Godfather Papa Dino he is suddenly betrayed by his own homeys and becomes the target of every cheap thug in town. When his best friend Skip and visiting Japanese reporter Eiji are kidnapped Ash's resources are pushed to the limit to save them and himself. A permanent target now, Ash, whose brother was driven mad in Vietnam by the designer drug "Banana Fish" teams with Lobo, now a reporter, to save himself and gain revenge. Originally created as a strip for young women by Akima Yoshida, the story telling is convoluted, the crime element is vague and inauthentic, as are many of the situations, and aspects of sexuality seem to regularly overwhelm basic plot advancement. Pretty enough to look at but insubstantial and unsatisfactory.~WW

THE BANDY MAN

Caliber: *3 issues 1996*

An atmospheric curiosity, written by Stefan Petrucha, with three artists, Miran Kim, Jill Thompson, and Charles Adlard, each depicting a different time period: Creation, just before the birth of Christ, and the present day. Thompson's contributions are particularly good. The unusual subject matter includes heretical females, gnostic texts, and the mysterious title character, God's creation predating Man. It's interesting, apart from the dull present day sections.~GK

Batman: BANE OF THE DEMON

DC: *4 issue miniseries 1998*

When criminal strongman Bane ("the man who broke the Batman") decides to track down the Order of St Dumas he finds instead Talia and Ra's Al Ghul "The Demon's Head". An uneasy alliance is struck as Al Ghul's search for the order's doomsday plague triggers new yearnings in Bane; he wants Talia and he wants to be immortal like Al Ghul. Chuck Dixon, Graham Nolan and Tom Palmer produce a competent thriller, chockfull of suspense, action, intrigue and double-cross.~WW

BANISHED KNIGHTS

Image: *2 issues 2001-2002*
Dreamwave: *2 issues (3-4) 2002*

Ponderous *Warlands* spin-off about conflict among vampires, made all the more dull by the poor computer colouring and gloomy backgrounds. The four issues tell a complete story, or what there is of one, split when Dreamwave started publishing their own comics rather than producing them for Image.~FP

BANZAI

Kitchen Sink: *One-shot 1978*

Banzai was a nice collection of three underground artists – Kim Deitch, Joel Beck and Roger Brand – all of whom were on top form. Brand's 'More Innocent Times' was a typically autobiographical piece about a drug bust, whilst the best of Beck's efforts was 'The Great Comic Book Conspiracy', which featured the Mafia robbing a comic shop. Better than either, however, was Kim Deitch, whose 'Anthropomorphism' centrespread was an astonishing feat of anthropomorphism gone mad.~DAR

Recommended

The Adventures of Jinky Coronado! BANZAI GIRL

Sirius: *2 issues + 2002 to date*

With all things manga seeping into American comics it was inevitable that sooner or later the Japanese obsession with schoolgirls in provocative poses would arrive. This might have been quite a cute and well-drawn comic about a schoolgirl who fantasises about other-worldly adventures then experiences them for real. Unfortunately, though, there's the additional sordid elements of constant perky nipples and underwear shots, factors that belie the editorial page interview attempting to convince a real Asian girl is responsible for the comics.~WJ

BAOH

Viz: *8 issue limited series 1990**

Given licence to continue their bacteriological experiments after World War II, the Judas Laboratory also takes an interest in humans with paranormal abilities. One such is

---

* Available in a collected edition

Baoh, who's biologically engineered to be the perfect organic weapon. Once he's freed from the clutches of Judas by a nine-year-old precognitive girl, the pair want to make their own way in the world, but the ruthless Judas aren't about to let their investments disappear. From there it's one long chase scene punctuated by occasional conflicts. *Baoh* is certainly competent and romps along at a fair clip unencumbered by what seems to be a far too literal translation, but ultimately there's nothing to distinguish the series or render it memorable.~FP

BAR SINISTER

Windjammer: *4 issue miniseries 1995*

A band of gene-spliced animal/human crossbreeds escape from the nasty corporation that designed them. They then open a civil rights can of worms by seeking sanctuary in a church, and demanding recognition as sentient beings, not private property, with violent and utterly predictable results. Spinning off from Mike Grell's *Shaman's Tears* this old tosh is well below his usual standard.~WW

BARB WIRE

Dark Horse: *9 issues 1994-1995, one-shot 1996, 4 issue miniseries ('Ace of Spades') 1996*

The *Barb Wire* movie might be an all-time turkey, although the one-shot adaptation achieves the miracle of making it seem okay, but the regular issues are of a high standard. Operating from a bar in the run-down industrial city Steel Harbour, Barb is a bounty hunter, albeit a particularly glamorous one prone to displaying acres of flesh. Despite her aversion to superpowered types they just can't avoid her. Luckily more off-beat paranormals Motorhead and the Machine are also on hand when matters escalate. John Arcudi writes a solid superhero comic, and artists Paul Gulacy (in the Comics Greatest World issue), Dan Lawlis and Mike Manley match the scripts. Barb was created by Chris Warner, but the 1996 miniseries is the first time he works on the character, and he does a fine job by and large. The fickle finger of fashion has made Barb's club a jumping hotspot, and there's a more ruthless female bounty hunter in town. She's adopted the identity of an old villain and is killing Steel Harbour's thugs, aiming to spark a gang war. Everyone has her fingered as Barb, so there's one person with a vested interest in stopping her. Unfortunately the concluding issue disappoints.~FP

Recommended: 1-9, miniseries 1-3

The BARBARIANS

Atlas: *1 issue 1975*

Contents: one below-par Iron-Jaw story, and one duff German reprint. You could surely better spend even the pittance this would cost from back-issue boxes.~ WJ

The BARBI TWINS ADVENTURES

Topps: *1 issue 1995*

Science-fiction adventure starring real life *Playboy* models the Barbi Twins. It gave writer Robert Conte the opportunity to meet the girls, and he certainly looks happy in the photograph, but one can't imagine too many purchasers were pleased with this daft and nonsensical piece of exploitation. Topps followed it up with a Barbi Twins Calendar.~FP

BARBIE

Marvel: *63 issues 1991-1995*

The famous fashion doll saunters through innocuous adventures. One of the earlier *Barbie* writers, Trina Robbins, commented on the difficulty of scripting these stories since Mattel wouldn't allow any character to have any negative traits, even minor 'friendly rival' ones like a Veronica Lodge or Chili Storm, so no real conflict could be created. Having said that, the series and its companion title *Barbie Fashion* (55 issues 1991-1995) had a loyal following. They were only cancelled due to Marvel withdrawing from the licensing agreement, not because of a lack of sales, and they regularly featured talented creators. One can't help feeling the likes of Robbins, Anna-Maria Cool, Amanda Conner, Barbara Slate and Lisa Trusiani were ghettoised because of their gender into working only on the Barbie comics. If you have to check out a Barbie try 63, the 'Flying Hero Barbie' special. Trippy.~HS

BAREFOOT GEN

Project Gen: *2 volumes 1979*
New Society: *4 volumes 1988-1994*
Penguin: *2 volumes 1990*
Last Gasp: *4 volumes 1994-1999*

When the atomic bomb was dropped on Hiroshima Keiji Nakazawa was seven years old. He survived. By 1963 he'd become a comic artist, and in 1972 began serialising a comic featuring his autobiographical recollections of Hiroshima before and after the bomb, portraying himself as Gen. It's a monstrously powerful work, affecting in many levels. For American readers, it pulls the Japanese away from their demonised status during World War II, portraying, at the start, a vibrant community explored over two-hundred and forty pages in the first volume. They're easily recognisable people with the same basic concerns as anyone else. Most importantly, it depicts the living hell endured by the survivors via a series of horrific and memorable images. It's at this stage that you're very grateful indeed that Nakazawa has chosen to draw the story in a cartoon style.

The survivors experience small victories in the face of almost incomprehensible adversity, ignorant of the protracted deaths that await many of them. Nakazawa's story is about personal experiences, not political scenarios, so the reasons for the bombing are only covered in passing, but he doesn't flinch from displaying the inhumane treatment of Hiroshima survivors by their fellow citizens. Were the story unrelenting misery, though, it would provide a message without being nearly as readable. Throughout the horror Gen behaves in the manner of any seven year old boy, so splicing the book with moments of laughter, while his mother is portrayed as a woman of incredible fortitude with a wider experience.

In the final analysis, this is a very joyful story for much of the time, and by focusing on ordinary people it's more successful in conveying Nakazawa's message of the dangers of atomic warfare. It's a compelling read that puts the trivia of most autobiographical comics to shame.

Barefoot Gen has a complicated publishing history, with most volumes stemming from the late 1970s Project Gen translation. They originally published the entire story over two thick volumes. The same story was split into four volumes by New Society, and later Last Gasp in the USA, while Penguin published the first two of these volumes in the UK. The first 104 pages were also published as two *Gen of Hiroshima* comics.~ WJ

Recommended: 1-4

BAREFOOTZ

Kitchen Sink: *3 issues 1975-1977*
Renegade: *One-shot 1986*

The first three issues reprint many of Howard Cruse's earlier 'Barefootz' strips from various underground comix and papers, with some new stories. Barefootz is an eternal optimist living in the strange and sinful city. His closest friends are the stressed-out artist Headrack and the voracious, man-hungry Dolly, both engaging and well developed characters. The stars of the strip, though, are the myriad cockroaches who run free through his apartment, cultivated by him as friends, but usually obsessed by their own affairs, and Glory, the thing under the bed who 'makes frogs' at people she doesn't like. The cutesy style leads a lot of people to underestimate Barefootz – a fact Howard Cruse himself took a swing at on the back cover of issue 3, a 'traditional' underground pastiche cramming as many sexual, violent, and drug-related references as possible onto one page – but it's a witty, understated strip with great charm and imagination. The Renegade one-shot reprints the previously uncollected 'Barefootz' strips from the 1970s *Comix Book*.~HS

BARRY WINDSOR-SMITH STORYTELLER

Dark Horse: *9 issues 1996-1997*

Large-size, large-scale work from Barry Windsor-Smith, who, it seems, has taken to comedy. Each issue contains episodes of three ongoing stories alternately occupying half the magazine. 'The Freebooters' features a character much like Armstrong (of Archer and Armstrong) in that he's an old boozer who can't fight as well as he used to, but who is being sought by a dim-witted young man who wants him to help save the world. The difference is that it harkens back to Windsor-Smith's earliest triumph through a barbarian setting. 'The Paradoxman' has a bike that travels through time and lands him in the hands of aliens at some point in Earth's past. This may or may not be real, however, because as the series ended, the character was discussing the story so far with its writer. 'Young Gods' (dedicated to Jack Kirby) begins with Heros about to be married to Celestra but going for one last drunken binge with her sister Adastra and his friend Strangehands. Despite Windsor-Smith's confounding of some expectations in maintaining a (mostly) monthly schedule for his intricate and ornate style, sales brought a premature end to the series. Conclusions are promised in some form, though, from Fantagraphics in 2003.~NF

BART SIMPSON

Bongo: *10 issues + 2000 to date*

Following the format of the *Simpsons* comic, this normally contains a lead story with one or two shorter backups. While named after Bart and concentrating on his exploits, Lisa shows up quite frequently either as the object of Bart's mischief or the means to help him escape its consequences. There are several of Professor Frink's 'Partly Probable Parables', in which Bart misuses the professor's inventions, or becomes their victim (as in 8, when he's turned part-fish). Some stories are pure fantasy (obviously beyond the fact that it's all a fantasy), as in the space and Wild West adventures in 3 and 5 respectively. There is no regular writer, though Chris Yambar or Gail Simone contribute to most issues with scripts by George Gladir and Scott Shaw! among others. The artwork preserves the look of the cartoon series, but Dan DeCarlo appeared most regularly, even though he was just providing layouts, and after his death, 8, which he laid out, was dedicated to him. The series is well produced and each issue supplies some good gags. Bart convincing Milhouse that he's invisible in 6 is notable, as Lisa's irreverent version of *Great Expectations*, taken at face value by Bart, who doesn't know any better in 8, and Ralph's entry into the *Duff Book of World Records* by forcing one-hundred-and-eighty-three lima beans up his nose in 9.~NF

BARTMAN

Bongo: *6 issues 1993-1995**

Spinning off from the Simpsons TV show and comic, this stars Bart's superheroic incarnation as he battles injustice in Springfield. One of the most successful TV-to-comic adaptations ever, this is just as funny as the real thing.~HS
Recommended: 1-6

BASEBALL Comics

Will Eisner Productions: *1 issue 1949*
Kitchen Sink: *2 issues 1991-1992*

Will Eisner's attempted introduction of a baseball-themed comic in 1949 failed, and the first issue reprints the original, featuring Eisner and Tex Blaisdell's hick from the sticks, which is a decent, if predictable story. 2 reprints a tale of more recent vintage from *Death Rattle*, and a very average *Spirit* effort. There's no issue 3, proving that forty years hadn't increased the market for baseball-themed comics.~WJ

BASEBALL GREATS

Dark Horse: *3 issues 1992*

Never materialising into the planned ongoing series, this presents biographies of Jimmy Piersall, a very good, if eccentric outfielder, driven pitcher Bob Gibson, and power hitter Harmon Killibrew. Triple A rather than major league, but a grand slam better than similar titles from Revolutionary.~WJ

BASTARD!!

Viz: *13 issues + ('Wizard' 1-2) ('Nija'3-5), ('Fighter'6-8), ('Vampire' 9-10), ('Empress!!' 11-14), 2001 to date*

Nonsensical and ponderous fantasy tales set in a world based on Heavy Metal music. The kingdom of Metallion is at war, allied to the neighbouring nations of White Snake, Iron Maiden and Metallicana in a battle against the forces of Chaos, who have established a beachhead in the conquered land of Judas. Lucien, a young washboy has the spirit of an evil wizard, Dark Schneider, bound within him. The desperate rockers free the wizard, who led the Orcs, Golems and other Chaotic riff-raff in a previous attempt to conquer humanity, as a last-ditch ploy to save themselves and the world. It's a daft mish-mash of bad boy makes good and *Lord of the Rings* with lashings of nudity and lots of big flashy fights from creator Kazushi Hagiwara, but there's no sense to it, nor any real point. Read a book and play a record instead, headbangers.~WW

BASTARD BUNNY

That Rabbit: *9 issues 1993-1996*

A bloody great skinhead rabbit in braces and docs is not yer average comics character, and he's the star of some great T-shirts. Unfortunately, when it comes to the comics the idea wasn't as funny, with writer Dave Anderson extending silly jokes and slapstick routines beyond the cause of duty. With 5 things start to improve, not least because there are finally some people able to draw working with Anderson's scripts, which are improving with every issue. David Jukes and John Moore are particularly talented artists, and there's a decent supporting character in Toot Toucan. Any issue after 6 will while away those few minutes waiting at the bar, or elsewhere. A selection of material was collected by Virgin Books.~FP

BASTARD SAMURAI

Image: *3 issue miniseries 2002*

A world of secret ninja societies and gangster-sponsored fights to the death for gamblers are laid bare. Predictably enough, when one samurai discovers some unsavoury truths, he goes rogue. It's a simple story interestingly drawn by Kelsey Shannon and Michael Avon Oeming in cartoon fashion, so numbing the violence. Shannon's colouring further adds to the mood. A simple story, stylishly told.~DB

BASTARD TALES

Baboon Books: *2 issues + 1998 to date*

Richard Marcej expels some bile from his system railing against the insipid quality of mainstream entertainment and the ubiquitous passive acceptance of it. The fantasy final episodes of long-running cartoon strips raise a smile, and the cartooning overall is of a high standard, but it's ultimately tilting at windmills.~WJ

THE BAT

Adventure: *One-shot 1992*

Pulp villain The Bat, as noted on the cover, was an inspiration for Batman, and here we have a decently written isolated house mystery. Its major failings are the art, which, while not bad, completely fails to evoke the 1920s setting and a bizarre ending. This may well be understood by those few familiar with the character, but anyone else will be scratching their head. These aren't fatal flaws, however, and *The Bat* is a diverting ten minute read with spoilt heiress Cordelia particularly well established.~WJ

---

* Available in a collected edition

BAT LASH

DC: *7 issues 1968-1969*

Premiered in *Showcase* 76, Bat Lash was a fast gun with an eye for the women and an appreciation of the finer things in life. Created by Sergio Aragonés, who wrote the feature with Denny O'Neil, and beautifully drawn by Nick Cardy, the combination of humour and action is a winner. Ironically, in a fine run the best issue is 6, revealing Lash's past, at odds with other stories by being played straight. Despite high quality throughout, the feature was never fully appreciated at home, but proved very successful in Europe, particularly in Italy, where collections are easily found. Bat Lash was to return in the *Jonah Hex Spectacular* and as a back-up in *Jonah Hex* 49, 51 and 52.~FP
Recommended: 1-7

BATCH

Caliber: *1 issue 1991*

Well-drawn three-panel strip humour collection about a bachelor and his friends, written by Charles Marshall and drawn by Greg Cravens. There are some amusing moments.~DB

BATGIRL

DC: *One-shot 1988, one-shot (Batgirl Adventures) 1998, one-shot 1998, 4 issue miniseries ('Year One') 2002-2003*

The first one-shot is the story of Barbara Gordon's last case before being crippled in Batman 'The Killing Joke'. She comes to terms with a villain who terrorised and injured her, now himself the target of a criminal who kills abusers of women. There's a neat resolution of moral dilemmas that refreshingly avoids a twist ending. Batgirl had usurped the cartoon based *Batman Adventures* (12 and 18), and her own *Batgirl Adventures* is a rare multi-level comic, which can be enjoyed by youngsters while having subtext and depth to intrigue adult readers. Pitting Batgirl against Poison Ivy and Harley Quinn, courtesy of Paul Dini and Rick Burchett, it's one of the best examples of what DC's animated series can achieve. The second 1998 one-shot is part of the *Girlfrenzy* month, a pointless flashback with inconsistent art. When the most fun to be had is noticing whether the heroine is wearing heels or flats in any given panel, you know the story's in dire straits. 'Year One' follows Barbara Gordon's chance meeting with Robin at the conclusion of Robin 'Year One', which inspired her to become a costumed adventurer. Written skilfully by Chuck Dixon and Scott Beatty, the first-person narrative convincingly conveys the awestruck tone of a determined but nervous neophyte adventurer intimidated by the enormity of what she's trying to do. Mention should also be made of a sympathetic Batgirl tale in *Legends of the DC Universe* 10-11.~HS
Recommended: Batgirl Adventures

BATGIRL

DC: *33 issues +, 1 Annual, 1 Secret Files 2000 to date*

Introduced, during the 'No Man's Land' event, this Batgirl is Cassandra Cain, acquired at birth by master assassin, David Cain and raised to be his successor. Trained constantly in combat techniques, Cassandra developed an ability to read people through their physical movements, but is largely unable to communicate verbally as a result. At age eight she completes her first assassination, but realising that it was wrong, runs away from Cain, finally surfacing in Gotham. Her guilt over this act and a need to recover her fighting skills after a telepath accidentally takes them away by 'fixing' her brain, drives Cassandra into a death-wish pact with Lady Shiva. She offers to teach Cassandra on condition that they fight to the death a year later (1-25). She has few friends not only because of her lack of communication skills, but also because of her drive to prove worthy of Batman's trust. That said, Spoiler has made regular guest appearances (from 20), and after the events of 25, there is scope for increasing Cassandra's cast and giving her something to do other than fight crime. Batgirl has largely avoided crossovers, but 23, 27 and 29 tie in to the 'Bruce Wayne: Murderer' series.

Initially written by Scott Peterson and Kelley Puckett, the latter becomes sole writer with 7, though Peterson writes 26 and Chuck Dixon fills in for the 'Officer Down' crossover in 12, Spoiler in 20, and the Green Arrow (Connor Hawke) and Robin team-up in 30-32. Most of the artwork is by Damion Scott, inked by Robert Campanella, and the result is bold, cartoony, deliberately simplified, but very pleasing. Overall, this is a better than average series, that would have merited greater recommendation, if more issues had been by Peterson or Puckett, Scott and Campanella. The Annual introduces new hero, Aruna Shende, an Indian stuntwoman and shapeshifter, but is more a Batman story, though it's interestingly drawn by Mike Deodato (or his studio at any rate). The main story in 'Secret Files and Origins' reiterates what's already known, but there's also a funny, old vs. new Batgirl backup story. 1-14 are available in paperback collections.~NF
Recommended: 1-11, 15-19, 22-25

BATHROOM GIRLS

Modern Comics: *4 issues +, 1 Special ('Guide to Holiday Chaos') 1998 to date*

While sometimes crude, in both senses of the term, there's a lot to enjoy about Yvonne Mojica's gang of in your face high school girls drinking, swearing and fighting. There's even more to enjoy about her cut and paste approach to comics that includes photo strips, alcoholic recipes, ornaments, extra strips running along the bottom of the page, and plenty of cut out items. The Bathroom Girls website is a lot of fun as well.~WJ

BATMAN

DC: *608 issues + 24 Annuals, 3 80-Page Giants, 1 Secret Files, 1 Special, 1 Spectacular, 1940 to date*

Batman is one of the few American comic characters to have passed beyond the comics world into common public recognition. Wealthy Bruce Wayne is inspired by a bat flying through his window to adopt that identity as his manner of fighting crime, having trained since childhood, when his parents were murdered in front of his eyes. Created by Bob Kane with help from Bill Finger, the dark and brooding result was instantly successful, and a year after his début in *Detective Comics* Batman was awarded his own title. It begins by adding two major pieces of the myth as Catwoman débuts minus costume, which she'll get in 3, as The Cat, and also the first appearance of the Joker, indisputably created by Jerry Robinson. Despite the colourful covers, often of a patriotic nature as the USA entered World War II, *Batman*'s early issues contained dark and gritty detective-oriented stories, with the odd colourful villain thrown in. The Joker was instantly popular, and 11's cover is a classic, with Batman and Robin punching him out surrounded by giant playing cards. Kane's art quickly developed from being quite crude to sophistication, and Robinson, also a very fine artist, and with a better eye for design, drew many of the early tales. Very simple by today's standards, plots were nonetheless emphasised over all other story elements, and there's an admirable quirky quality to them. In 25 the Joker and the Penguin team up (for the first time), drawing up a deed of partnership, but each at first falls prey to his attempts to swindle the other. With Batman captured and trussed, he outwits the pair by appealing to their vanity. Other early landmarks included the first solo story of Alfred the butler in 32; and look for a very detailed origin of Batman in 47. Wacky villains and crime stories weren't enough for the fans, though, and Batman and Robin occasionally travelled into the past, such as 24's trip to ancient Rome, 32's meeting with the Three Musketeers, and a journey to King Arthur's court in 36. And, like all good superheroes, Earth wasn't their only battleground. In 41 they became interplanetary policemen battling green-skinned aliens, and 59 offered us 'Batman of the Future', in which the bat-signal was projected onto the moon! The Joker, Catwoman (with an origin in 62), Penguin, Two Face and Killer Moth remained popular villains. Many of these stories were written by Bill Finger, and Gardner Fox, Otto Binder, Bill Woolfolk and Jack Schiff also contributed, but as they were uncredited attributing writers is far more difficult than artists. By the early 1950s Robinson was sometimes still drawing Batman, with Kane only occasionally turning in a story, and the bulk of the art was being handled by Sheldon Moldoff and Dick Sprang. It was the latter's angular style and penchant for setting fight scenes on giant props that made him come to be associated with Batman more than any other artist until the 1970s.

Noting the popularity of Lois Lane in the Superman titles, Batman was given his own prying female journalist in the form of Vicki Vale, who débuted in 45, returning in 49 along with villain The Mad Hatter. She would never achieve the popularity of Lois Lane, and attempts at transforming her into a romantic interest for Batman were half-hearted, as if even among aliens and time travel this was a preposterous concept. An oddity occupied 78, with Roh Kar, the manhunter from Mars. The first Martian lawman to visit Earth was perhaps an inspiration for the début of the Martian Manhunter four years later. The story personified the increasing fantasy elements around which Batman comics were based from the early 1950s, seemingly attempting to emulate the style of the very successful Superman comics of the time. Batman's darker persona was completely eroded as everything became light-hearted, and the franchise was milked for all it was worth, a mood sealed with the arrival of Ace, the Bat-Hound, complete with mask (!) in 92. Batwoman in a bright yellow outfit in 105 was only slightly better, given a young companion, Bat-Girl, in 139. The costumed villains were gradually phased out, with only the Joker recurring regularly, and not as frequently as in the 1940s. As ever, the stories were competently produced, unique in their own way, offering decent entertainment, but far removed from the original Batman.

Readers at the time seemed to agree, and sales began a gradual decline. By the early 1960s the comic was in trouble, with Bat-Mite – an imp from another dimension who wanted to help Batman – indicative of how far Batman had strayed from his roots. In an attempt to jump start a change, Julie Schwartz was appointed editor of the *Batman* titles, having successfully revived the superhero genre from the mid-1950s at DC. He introduced a new look to Batman from 164. While Bob Kane was credited as drawing the interiors (he actually farmed out the work to Sheldon Moldoff), co-artist Carmine Infantino gave the title a new look, most significantly adding a yellow oval around Batman's chest emblem. Alfred the Butler was killed, only to be revived because he was a major part of the *Batman* TV show. Batman's stories now reverted to the old detective format, but this style didn't last with the arrival of the TV show in 1966, at which point Batman's colourful adversaries were restored to the series. While certainly pepped up, Batman's stories weren't as overtly comic as the TV episodes, though they occasionally verge on farce. These were hot sellers, but with the waning of interest in the TV show sales dropped back down again.

DC redefined many of their comics in the late 1960s, and *Batman* was no exception. The first sign of change came with 200's cover from Neal Adams, a man who was to become very important to the series. First, though, Bob Kane was bought out. His stranglehold on the title's art was over, and there was an immense contrast between his final issues and those of his successors, writer Frank Robbins and artists Irv Novick and Joe Giella. Robbins' Batman was certainly more dramatic, as was the art, and when Dick Giordano began inking Novick's pencils with 219 the new look had been clearly established. Although Robbins didn't write the more noted stories of the era, he was consistent and imaginative, and all his Batman stories are polished. Things improved still further when writer Denny O'Neil joined the team and Neal Adams began contributing interior artwork. Adams' image of Batman remains a definitive version, modern, stylish and dynamic, and he, O'Neil and Giordano remain a classic Batman creative team. A conscious decision was made to divest Batman of almost all fantasy trappings. He now operated largely at night, only rarely with Robin, and his detective skills were emphasised as he dealt as often as not with the type of criminals infesting the real world. The sight of Batman swooping from the rooftops was once again striking fear into the hearts of cowardly criminals. A new arch-villain was introduced in 232, Ra's Al Ghul, along with alluring daughter Talia, both of whom would play a considerable part in the years to come. 237's 'The Night of the Reaper' is a classic of the time from O'Neil, Adams and Giordano, with Berni Wrightson and Harlan Ellison also contributing to a story concerning revenge on a Nazi butcher. The back-up is also noteworthy, reprinting Batman's last solo adventure pre-Robin from *Detective* 37. 234 is another triumph from the same creative trio, returning Two-Face for the first time since the 1950s, 'twice as evil, twice as dangerous', as the cover tells us. If that wasn't enough, 243-245 had a classic Ra's Al Ghul story, again by Adams, O'Neil and Giordano, and 251, with Adams inking his own pencils, is the first modern-day appearance of the definitive Joker: mad, bad and decidedly very dangerous to know. This was also a growing-up period for Robin, who left for college in 217 and a back-up strip keeping readers abreast of his adventures and college life. 234-242 were forty-eight pages long, with a new Batman story leading off, followed by the Robin strip and a reprint of a classic Batman tale in the back, with 238 a hundred pages with assorted reprints. All are excellent packages for Batman fans.

Fans of pulp hero The Shadow should look for 253 and 259, in which he guested. His influence on Batman's creation in reality is nicely mirrored by an admission in the stories that Batman modelled himself on the character. 254-261 were all a hundred pages, with a new Batman story in the front and 1940s, 1950s and 1960s reprints filling the remainder. The standout story of this period was again drawn by Adams, his finale in 255, a werewolf tale written by Len Wein. Novick also left, to be replaced by Ernie Chua with 262, who portrayed Batman more as a superhero than a creature of the night, and O'Neil went with 269, initially replaced by David Reed.

This wasn't an impressive period for *Batman*. Successive short-run creators turned out adequate material that lacked an extra spark, with the contemporary Batman strips in Detective definitely the star turn. The highlights during the late 1970s are all artistic. The peculiar combination of Rich Buckler inked by Berni Wrightson can be found in 286, Mike Grell illustrates his only Batman stories in 287-290, Michael Golden draws 295 and 303, and the vastly underrated Sal Amendola illustrates 296. 300 was a special issue: 'The Last Batman Story' by Reed, illustrated by Walt Simonson and Dick Giordano. Again, art apart, it was just adequate, with an older Batman and adult Robin. Simonson was back in 312. 321 was an oasis, with Wein and Simonson turning in a very nice Joker caper. By that time Wein was writing most Batman issues, and he played a notable part in reviving Catwoman, with Selina Kyle attempting to go straight in 322-324.

A significant change occurred with 327 (until 354) as Dick Giordano became editor, bringing Gerry Conway along with him as writer. Giordano is a rare editor able to bring out the best in the most unlikely creators, and certainly worked well with Conway, whose writing was a considerable improvement on the previous several years. It was Marv Wolfman, Irv Novick and Frank McLaughlin in 332-335 who provided the era's most significant story, 'The Lazarus Affair', involving Ra's Al Ghul, Talia and Catwoman in a mystery and action-packed adventure.

332 also contained the first solo Catwoman story. In order to stimulate sales of both titles throughout the early 1980s, *Batman* often crossed over with *Detective*. Gene Colan drew 343-351, and one might imagine that if ever there was an artist suited to Batman it was Colan, with his flowing, moody artwork and distinctive night scenes. The

other regular penciller was Don Newton, who drew 354 and 356, a very good Gerry Conway story crossing over into *Detective* 520, featuring Hugo Strange usurping Batman's identity. It's Conway's final fling as Doug Moench becomes writer, and by this time Vicki Vale is back, now having a far more convincing romance with Bruce Wayne. Except he's also developing strong feelings for Selina Kyle, and the pallid and mysterious Nocturna. With all these women after him (it was probably the mask), how did he find the time to fight crime? It all comes to a head in messy fashion in 391.

368 introduces a new Robin. The previous version had now outgrown the role, and was then a mainstay of the Teen Titans as Nightwing. Jason Todd, the new incumbent, was several years younger, and lost his parents in a story told in 408-410. Editorial judgement for once was misplaced, and the revival of an adolescent Robin didn't prove as popular as expected with the readership. Letters demanding Robin's removal began arriving soon after his introduction, and their frequency and quantity increased to the point where DC agreed to let the readers decide. 'A Death in the Family*' began in 426, and rather innovatively DC ran a poll in which readers could vote as to the ending in 429. It was a close call for Jason Todd, but he was murdered by the Joker, the series being written by Jim Starlin and drawn by Jim Aparo. Many felt pandering to the immature bloodlust of the readership was marketing ploy lacking dignity.

In issues leading up to 400 Catwoman is a regular co-star, almost completely reformed, and slobby Gotham police detective Bullock is also playing a larger part, often as comic relief. Paul Gulacy draws 393 and 394, but Tom Mandrake is now regular penciller, never outstanding, but more solid here than elsewhere. 400 is a longer than usual anniversary issue in which all of Batman's major villains escape confinement, and in a series of short chapters illustrated by a stellar line-up he has to recapture them all. There's lovely art from Brian Bolland, Joe Kubert, Steve Leialoha, George Pérez, Bill Sienkiewicz and many more, although the art of Trevor Von Eeden in 401 is equally memorable, giving Batman a fine Gothic look. Von Eeden was also good on the 1992 annual (15). 404-407* is 'Batman: Year One', by Frank Miller and David Mazzucchelli. Miller returned to Batman's past to write an impressive story dealing with his early career. It also covers the past of Selina Kyle and Commissioner Gordon, who arrives in Gotham at the same time as Batman first appears, and a long-lived relationship begins. Mazzucchelli's art superbly evokes the period and the action for a must-have story. Jim Starlin began contributing both art and stories to Batman in 1987, writing 414-425, and for a man known more for his cosmic and mystical series his Batman scripts were satisfactorily down to Earth. His best was 'Ten Nights of the Beast' in 417-420, drawn by Jim Aparo, and introducing the KGBeast, a Russian stalking victims in Gotham.

433-435 have now regular artist Jim Aparo drawing a John Byrne story 'The Many Deaths of Batman', in which those who had a hand in training Batman are being murdered. Look who's introduced in 436, only seven issues after Robin's death: here comes Tim Drake, who would become the third Robin. This was in the first part of 'Batman: Year Three', Marv Wolfman's return as regular writer, with art by Pat Broderick, the last and weakest of the early-days four-parters ('Year Two' had been in *Detective* 575-578). It details Batman meeting Dick Grayson and training him as Robin. 'A Lonely Place of Dying' in 440-442 is an improvement, with Aparo returning as artist and the restoration of Robin, who first appears in costume in 442. By now Batman is once again crossing over with Detective on a regular basis, and the best of the crossovers is plotted with *Detective* writer Alan Grant, and features the Penguin in 448 and 449. The creative teams of *Batman* and *Detective* swap with 455 as Grant becomes the regular writer, bringing dynamic artist Norm Breyfogle with him. Grant's stories maintain the action, mystery and suspense, and add a welcome touch of British humour, an example being 475, with the return of Scarface, the mad ventriloquist dummy and the most successful addition to Batman's enemies in recent years. With one exception: Bane.

492-500* are chapters of the 'Knightfall' saga by Moench and Breyfogle, a massive story running through both main Batman titles in which all Batman's enemies are freed by Bane, and he becomes more and more exhausted in his attempts to recapture them. At his weakest Batman is confronted by Bane, a drug-powered powerhouse, who cripples him in 497. Bane is defeated, but by Jean Paul Vallelly, Azrael, introduced in the *Sword of Azrael* miniseries. Also raised to combat crime, he takes over as Batman, but significantly modifies the costume, incorporating armour and weaponry. The attendant publicity for the series boosted sales, and Bruce Wayne's recovery was strung out for almost two years during the 'Knightquest' (501-508*) and 'Knightsend' (509-510*) stories, crossing over into *Shadow of the Bat* as well as *Detective*. Azrael as Batman becomes increasingly more violent, to the point where he oversteps the boundaries between wrong and right, and, as we always knew he would, the real Batman returns. Sandwiched in between 511 and 512 is 0, part of the *Zero Hour* crossover.

The more notable of the annuals and specials for this era are 1984's special with Michael Golden art, the 1987 annual (11), which has an Alan Moore and George Freeman Clayface story, and the 1989 annual by Mike Barr and Jerry Ordway.

Having seen proof that committee conceived blockbuster storylines crossing between all *Batman* titles pulled in the readers, there have been several more. 'Contagion' (529-530*) and 'Legacy' (533-535) are interspersed with stories incorporating elements pertaining to DC's annual cross-company event. There's definitely a concerted effort to keep Batman dark and moody and not to let the series stray off course. Moench with new regular artist, Kelley Jones keep the tradition going, even though they're allowed to play around with characters such as the Demon (544-546). Soon the concept of the 'event' would take over, but first we're introduced to Chase, a female agent of the D.O.E – Department of Extra-Normal Operations in 550 in a story involving a new Clayface.

Gotham City experiences an earthquake in 'Cataclysm' (553-554*), followed by 'Aftershock' in 555-559* and 'Road To No Man's Land in 560-562*. 663-674* offers 'No Man's Land'. This was a devastated Gotham isolated and sealed off by the authorities after the earthquake. Many die-hards refuse to leave, especially Bat-villains such as the Joker, Penguin and Poison Ivy to name a few, all claiming their little section of Gotham. Within this framework assorted creators provide smaller stories crossing between all Batman titles, and a new Batgirl is introduced. The various trade paperbacks present this over-long saga in the correct order.

An unlikely character eventually comes to Gotham's rescue in the form of Lex Luthor, whose company rebuilds the city in record time – with dark alleyways and slums still intact of course. 576 ends editor Denny O'Neil's long association with the title. His replacement Bob Schreck has to carry on with the miscast team of Larry Hama, and artists Scott McDaniel and Karl Story, whose manga-ish style, though quite unique, just looks messy. The stories aren't memorable, and a succession of new writers don't help, maintaining a misguided attempt to change Batman into a myth, despite previous evidence of his existence (in the DC Universe of course)! In 587 Commissioner Gordon resigns in the 'Officer Down' crossover, an occurrence thankfully becoming scarce. A well constructed major one starts, though, in *Batman*: 'The 10 cent Adventure' and continues as 'Bruce Wayne: Murderer?' and 'Bruce Wayne: Fugitive' in 599-605*. As the titles suggest, Bruce Wayne is framed for murder and arrested. Not being able to prove his innocence he escapes and abandons his Bruce Wayne identity. It's left to the other cast members, to find out the truth. The conclusion is disappointing, but the whole saga was well thought out. None of the annuals during this period really stand out – usually based on a company-wide theme for that particular year. The 80-Page Giants are worth looking at though. The first two issues offer a wide selection of stories and art of the Batman cast, while the third offers a full-length saga featuring the Calendar Man written by Chuck Dixon.

As denoted above, there are plenty of recent stories available in collections, but those wanting a more general flavour of Batman through the years could try *The Greatest Batman Stories Ever Told,* which samples stories from the earliest days to the mid-1980s. For the really enthusiastic there's a similar follow-up, technically the second-greatest Batman stories ever told, but titled *The Greatest Batman Stories Ever Told* Vol II. If you're looking exclusively for very early issues, these are being reprinted in hardcover as the ongoing *Dark Knight Archives,* which have now covered up to issue 12 in three volumes.

Keeping us all on our toes as 2002 ends, Bob Schreck provided a new creative team that elevated *Batman* to the number one best selling slot. Speculation comes to mind, or thousands of Batman fans are coming out of the closet. Jeph Loeb is the writer, but, no disrespect to him, the rise in sales is due to artist Jim Lee. 'Hush' begins in 608 and involves a kidnapping with Poison Ivy and Killer Croc in for good measure. While the story isn't outstanding, there's a lot of promise. It's been years since the title looked as good as it does under Lee, who is an excellent storyteller. If only he could get away of trying to turn the soles of Batman's boots into an art form. Is he trying for a patent? Things are looking up.~HY

BATMAN ADVENTURES

DC: *36 issues, 2 Annuals, 2 Specials 1992-1995, 5 issue miniseries ('The Lost Years') 1998*

The stylised animated *Batman* TV series of the early 1990s is arguably the best ever TV depiction of a character originating in comics. For the comic Kelley Puckett and vastly underrated artists Mike Parobeck and Rick Burchett adopt the TV formula of simple continuity-free stories paying attention to detail and character with equally impressive results. Most issues by the regular creative team are excellent, but for samples try the début of Batgirl in 12 or three villains hijacking the title in 30. This isn't to say issues by people other than the regulars are substandard, they just fall a little short unless the TV series writer and artist Paul Dini and Bruce Timm drop by. Their *Mad Love Special* focuses on the Joker's sidekick Harley Quinn, and the attraction she has for a lunatic criminal mastermind, and was one of the best comics published anywhere in 1994. Dini and Timm return for the Holiday Special along with other animators from the TV show, and it's another treat. 'The Lost Years' bridges the gap between seasons of the TV show where the action jumped forward a number of years. Bo Hampton, known for his painted artwork, surprises with his cartooning ability, while TV writer Hilary Bader turns out an adequate script lacking the underlying humour of the better *Batman Adventures* comics. 1-12 were collected over two volumes.~FP

Recommended: 1-3, 6-10, 12-16, 18, 20, 25-28, 30, 33-36, Mad Love Special, Holiday Special, Annual 1

BATMAN AND ROBIN ADVENTURES

DC: *25 issues, 2 Annuals 1995-1997, one-shot ('Sub Zero') 1998*

Renamed to coincide with the start of the new TV cartoon, the continuity of *The Batman Adventures* resumes with a quick succession of regular villains, such as Two-Face, The Riddler, Penguin and Joker all performing under par, before hitting its stride with Robin's replacement in number 6. From then on a string of good to great stories result from Ty Templeton as the dynamic duo battle crime in classic fashion, aided on occasion (and sometimes completely supplanted) by Batgirl. Of particular note are The Harley Quinn/Poison Ivy team-up in 8, Batgirl vs. Talia in 9, Man-Bat in 10 and Bane in 11, although succeeding issues are enjoyable, none more so than the hilarious 18 when the Joker loses his sense of humour. The annuals are equally enjoyable as the first presents a sequel to 'Mask of The Phantasm' and the second relates a tale from Bruce Wayne's youth as Zatarra the Magician teaches him some useful tricks, and crosses over with *Superman Adventures* Annual 1. 'SubZero' ties-in to the Mister Freeze animated film. It moves at breakneck pace and still manages to tell a good old-fashioned Batman story, blending pathos, humour and thrills seamlessly together. What superheroes ought to be like. Gotham Adventures continued essentially the same type of material.~WW

Recommended: 6, 8-11, 18, 21, 25. Annual 1-2, 'Sub-Zero'

BATMAN & SUPERMAN ADVENTURES WORLD'S FINEST

DC: *One-shot 1997*

Paul Dini adapts the movie script he wrote with many others, while Joe Staton and Terry Beatty supply slick cartooning. The story also features many of the characters' background cast as well as The Joker and Lex Luthor. It's not quite up to the standard of the best animated *Batman* comics, but nevertheless a solid piece of entertainment.~WJ

BATMAN AND THE OUTSIDERS

DC: *46 issues, 2 Annuals 1983-1987*

At a time when Batman was moving back to his darker, more serious roots, this spin-off team title allowed a lighter feel to the Dark Knight, albeit away from his own comic. With the help of some perennial second-stringers and equally uninspired new creations, Batman escapes the clutches of Nazi-sympathiser Baron Bedlam and restores the rightful ruler to the throne of Markovia, a fictional Bavarian state. The new king's superpowered brother heads back to the US with Batman and his new pals, and together the team engage in a series of pedestrian, but generally entertaining, adventures under the creative team of Mike Barr and Jim Aparo, then Alan Davis from 22, his first American comics work. When Batman bowed out and left the others to their own devices, the comic was retitled *Adventures of the Outsiders* from 33, but survived less than a year, indicating that perhaps his presence was the only thing that had kept it going as long as it did. 'Nuclear Fear' (39-41) is worth a look if you like stories so-bad-they're-almost-good, but overall the series pretty much deserves the cheap-box obscurity that has become its fate.~JC

BATMAN BEYOND

DC: *6 issue miniseries 1999, 24 issues 1999-2001, 1 Special ('Return of the Joker) 2001*

This enjoyable, if usually undemanding comic, is set in the future and based on the animated TV series. The elderly Bruce Wayne has retired and now serves as cantankerous mentor to teenager Terry McGinnis, who wears a new Batman costume. He must balance his schoolwork and love life with superheroics, making the stories reminiscent of the early Spider-Man. It's nearly all written consistently well, and in a much more sophisticated way than the non-animation based Batman titles, by TV scripter Hilary Bader. Art on 1-3 of the miniseries is by Rick Burchett, whose elan is not quite matched by Joe Staton, who does the second half, or Craig Rousseau, who draws nearly all of the regular series, though all are far above average.

It's easy to pick up and enjoy any of the mostly self-contained and largely light-hearted issues, although if you've not seen the TV series presumed familiarity with characters introduced there can confuse. There's a good supporting cast, including a grown-up Barbara Gordon, former Batgirl, now police Commissioner, as her father was. The best villains are the Royal Flush Gang in 4 and 23. Burchett returns for the grand Justice League Unlimited story in 21 and 22, featuring a funny little monk as Green Lantern, and the sexiest Big Barda ever, which is saying something.~GK

Recommended: Miniseries 1-3, 4, 21, 22

BATMAN CHRONICLES

DC: *23 issues 1995-2001*

Extra-length quarterly Batman comic focussing on his friends, allies and environment, and his interaction with them. Each issue has at least one, usually two or three, self-contained stories, thus appealing to the more casual reader wanting the occasional Batman comic without having to cope with a multi-part story arc. A few crossover chapters do creep in, such as 4's Hitman story tying in to the 'Contagion' sequence and 20's odd and forced team-up between Catwoman and the *Relative Heroes* miniseries. Even so, generally the title can be read on its own merits in isolation from the rest of the Bat-line. It's never less than competent and readable, and has occasional flashes of brilliance. Outstanding is 5's 'Oracle: Year One', by Kim Yale and John Ostrander, which details Barbara Gordon's struggle to build a new life for herself after the events of The Killing Joke, and the untold tale of Batgirl and Robin's first meeting in 9, written by Devin Grayson with gorgeous Duncan Fegredo artwork. Charming and insightful, the story presents both characters as enjoyably gauche without making either look foolish. Brian Michael Bendis wrote his only DC story to date in 21's 'Citizen Wayne', an over-clever homage to the Welles movie. There's also a Gallery issue containing a selection of pin-ups ranging from the stellar to the mediocre, easily ignored if you're looking for story content.~HS

BATMAN: DARK VICTORY

DC: *13 issue limited series 1999-2000*

Jeph Loeb and Tim Sale continue their series of stories about Batman's early years with an epic, entertaining noir mystery set over thirteen different public holidays and notable days. The emphasis, once again, is on the grim and the gritty, and 'Dark Victory' certainly owes a considerable debt to the hardboiled style of Frank Miller and David Mazzuchelli's 'Batman: Year One', still the superior model for this kind of revisionism. Loeb delivers a fast-paced, tightly structured script that juggles an impressively wide range of supporting characters and subplots, climaxing with a slightly over-familiar retelling of Robin's origin story. Sale's minimalist artwork is derivative but atmospheric, and his clear storytelling helps to sustain the momentum of some entertainingly clipped and slangy dialogue.~AL

BATMAN FAMILY

DC: *20 issues 1975-1978*

One of DC's fondly remembered giant-sized comics, *Batman Family* is nothing like as good as memory suggests. The principal strip was a Robin/Batgirl team-up that ran almost every issue, occasionally replaced by solo stories. To begin with the series was decidedly silly, with the pair battling Benedict Arnold, or getting married, but later, more serious stories are less interesting, and many issues are spectacularly dull. After a decent first issue from Mike Grell, pencillers like Curt Swan, Irv Novick, Don Heck and even Garcia-Lopez (in 3) fight a losing battle against the dreaded inks of Vince Colletta, so the strip was doomed from all sides. Until 10 each issue was padded with old, mostly 1950s, Batman reprints, but the title's salvation arrived with 11 in the form of Man-Bat. Where Bob Rozakis scripts for the lead strip were pedestrian in the extreme, on Man-Bat he proved to be a writer of real quality. The best feature was the comparatively low-key atmosphere, with as much space given to Kirk Langstrom's pregnant wife as to the villains he tangled with. Rozakis was also lucky to be paired with a succession of excellent artists in Marshall Rogers (11-13), Howard Chaykin (14) and most impressively Michael Golden (15-17, 20). Golden proved to be the star of the title, and when it converted to an even larger dollar format with 17 he graduated to the added Batman strip to fine effect. Another memorable addition was The Huntress by Paul Levitz and Joe Staton (18-20), which was fast-moving and plotted, making the last issues the best of the run.~DAR

Recommended: 18-20

BATMAN FAMILY

DC: *8 issue limited series 2002-2003*

John Francis Moore and alternating pencillers/inkers Stefano Gaudiano and Rick Hoberg grind out a competent conspiracy thriller wherein an old friend of Bruce Wayne's mother shmoozes her way into the chairmanship of Wayne Industries. She intends to gut it from within whilst her pet team of international thieves attempts to destroy the various members of Batman's "family" of assistant crime fighters. A good look at a different sort of crime caper and the weekly publication schedule concentrating on one protagonist's story per issue adds some welcome pace. Worth a look.~WW

BATMAN Graphic Novels and One-shots

Batman graphic novels and one-shots cover a vast territory, with the most common prompt giving creators the opportunity to work on a 20th-century cultural icon without being bogged down by the monthly deadlines of the regular titles. Perhaps the obvious place to begin is with adaptations of the films. 'Batman' covers Batman's origin and first encounters with a Jack Nicholson-style Joker. Visually, Jerry Ordway captures the look of the film and its actors, but Denny O'Neil can only plough through the plot. 'Batman Returns' presents exactly the same problem for O'Neil, though there's a lot more plot to play with. He sticks to the formula for 'Batman Forever' and 'Batman and Robin', and even Bill Sienkiewicz inking can't save the latter.

Concurrently with the films, DC released issues spotlighting their villains. 'Penguin Triumphant' sees the Penguin apparently going straight and living the high life in Wayne Manor, while he plots the downfall of his childhood tormentors. 'Two Face' suffers from a J.M. DeMatteis script, but Scott McDaniel, gives the dreary psychobabble a visual impact. 'Riddler – The Riddle Factory' is written by Matt Wagner, who weaves decent characterisation and good detection around the story of The Riddler's search for an old gangster's hidden stash, supported by Dave Taylor's attractive artwork. 'Poison Ivy', 'Batgirl' and 'Bane' all have clean artwork, without being special, but 'Mr Freeze', by Paul Dini and Mark Buckingham, even in retreading old ground, contains some excellent storytelling.

A frequent form of Batman graphic novels is Elseworlds tales, representing Batman as he might have been if born in different times or different circumstances – otherwise known as 'imaginary' stories. 'Gotham By Gaslight' set the trend (predating the Elseworlds tag), merging the Batman's origin with the story of Jack The Ripper in 1880s Gotham. Brian Augustyn overwrites a little, but this doesn't undermine the strength of Mike Mignola and P. Craig Russell's atmospheric artwork, which makes the story. Augustyn's sequel, 'Master of the Future', has a better script and some of Eduardo Barreto's best artwork. A madman threatens to destroy Gotham as it prepares an exposition to celebrate the dawn of the 20th century, and Bruce Wayne must decide whether to put on the costume again. In Jan Van Meter's The Golden Streets of Gotham, Batman is the son of Polish immigrants, Robin Hood-style burglar, Selina Kyle is the Mayor's daughter and cat-masked Union Organiser and Barbara Gordon is the daughter of a policeman and intrepid reporter. They battle the corruption and terrible working conditions of 1910 Gotham, in this stirring story, which subtly incorporates other elements of the Batman mythos, and whose atmospheric setting is enhanced by the dark and grainy artwork of Cliff Chiang, and Tommy Lee Edwards. 'The Devil's Workshop' teams Batman with Houdini against the Joker and a vampire. Mark Chiarello's painted artwork lets down Howard Chaykin and John Francis Moore's script, being far too static and forced. Chaykin also wrote and drew 'Dark Allegiances', set just before World War II, employing many of his usual touches, including a sordid atmosphere and racial politicking, as Bruce Wayne and Catwoman try to prevent the assassinations of Roosevelt and Hitler. It's not exactly charming, but Chaykin's flair pulls it off.

'The Blue, The Grey and the Bat' is set during the American Civil War, as Colonel Bruce Wayne disguises himself in order to flush out murderous gold thieves with the aid of an Indian called Redbird. The plot is chaotic and artist Alan Weiss, even inked by José Luis Garcia-Lopez, seems completely unsuited to the project. A much more interesting mix with real history is Max Allan Collins' 'Scar of the Bat', in which Eliot Ness puts on a cape and cowl to fight the Chicago mobs. With Eduardo Barreto providing an excellent period feel, this is definitely one of the most original Elseworlds tales. Even better is Mike W. Barr's 'Reign of Terror', set during the French Revolution and drawn by Garcia-Lopez. 'Holy Terror' is an alternative history tale postulating that Oliver Cromwell didn't die in 1658 but lived to spread his Commonwealth to the New World. As a result, America is a fiercely religious country where agitators like Bruce Wayne's parents are executed by the state, covertly or otherwise. Alan Brennert sets the whole thing up neatly, with decent artwork from Norm Breyfogle, though this is more an alternative version of the DC universe than a solo Batman story. In a similar vein, Alan Grant and Alcatena portray a 1900s Bruce Wayne as the doctor in charge of the asylum in 'The Batman of Arkham', threatened from within by Professor Crane and from without by the Joker. 'Castle of the Bat' is a classic horror story, setting Bruce Wayne on the path of Dr Frankenstein while a rival of his father's conducts his own hellish experiments on passing travellers. Mike Grell's 'Masque' is a terribly sketchy variation on 'The Phantom of the Opera', 'Two Faces' retells Dr Jekyll and Mister Hyde, while 'Nosferatu' attempts to bring German expressionist cinema to the mix with references to 'Nosferatu' itself, 'Metropolis' and 'The Cabinet of Dr Caligari'. Ted McKeever's artwork is as distorted as ever, and this looks like no other Batman comic.

The mysterious side of Batman's character lends itself to the right horror plots, so a Dracula story comes as no surprise. 'Red Rain' sees Batman aided in his fight against the vampire by the convenient Tanya, whose gift to him is exactly the power he needs to overcome Dracula. In the sequel, 'Bloodstorm', a lycanthropic Selina Kyle helps the now vampiric Batman against a serial killer Joker. Doug Moench's gothic ideas are perfectly realised by Kelley Jones (whose artwork here shows touches of Berni Wrightson and Paul Gulacy). In the final part of the trilogy, 'Crimson Mist', a resurrected Batman attempts to kill all his foes before he succumbs to his own bloodlust. These are grim fairy tales, enhanced by Moench's obvious feel for the character and surrounding mythology. It's therefore a disappointment to find that the same team don't hack it on the oddly titled 'Dark Joker – The Wild', a dark fantasy about sorcerers, flying islands and a man who turns into a bat in order to fight the evil Joker's magic. 'Batman & Demon', is also fantasy based, with Bruce Wayne is the immortal vessel of a bat demon with Alfred as Merlin. Written by Alan Grant, this is a grim tale. Sometimes the obvious settings work best, and two hard-boiled detective stories are issues are worth looking out for. Ed Brubaker and Sean Phillips have James Gordon in the role for 'Gotham Noir', while Dean Motter and Michael Lark have Dick Grayson hunt the murderer of Selina Kyle in 'Nine Lives'. 'Brotherhood of the Bat' is a more traditional imaginary story with Batman dead and Ra's Al Ghul killing millions in his absence. Taking over the Batcave, Ra's costumes his assassins as Batman to make a ruined Gotham his. His daughter Talia, however, has borne Batman's son and guides him along the path that will restore a true Batman to the city. Moench tells a good tale, but there's too much plot and not enough characterisation, while the use of eight different artists distracts rather than pleases. 'The Dark Knight Dynasty', written by Barr, and well-drawn by various artists (Scott Hampton, Gary Frank and McDaniel), presents tales of the past, present and future as two Batmen and a Batwoman fight Vandal Savage through the ages. 'In Darkest Night' asks: what if Bruce Wayne had been given Abin Sur's power ring and become Green Lantern? Little more than a mishmash of both origins, it's of no particular interest.

Comedy (and violent mayhem) is served up in 'Batman/Lobo', by Grant and Simon Bisley, in which the Joker hires Lobo to kill Batman, and, surprisingly, it's quite engaging. 'Mite-Fall' is a real curiosity, featuring the return of Bat-Mite, the impish creature out to have fun at Batman's expense. Drawn by Kevin O'Neill, it at least looks good, but the humour is way past its sell-by date and Grant's tired old jokes don't raise a smile. Finally, in this category, 'The Last Angel' is by novelist Eric Van Lustbader, illustrated by Lee Moder in a clean, sensuous style. Though not categorised as an Elseworlds tale, the death of Rupert Thorne and the distinctly different version of Selina Kyle (Catwoman) seem to indicate that it should be. In any event, it's a well-told story involving the Joker, Catwoman and an ancient mask with evil powers. An alternative to Elseworlds is Realworlds, in which comics characters are just that. In Batman: Realworlds, Charlie, slow and somewhat delusional, thinks he's Batman and tries to protect his 'Robin' from local drug dealers. Artwork from Marshall Rogers helps and the story's touching, but not convincing.

Some Batman one-shots, sometimes originally released in hardcover, sometimes just deluxe editions, and sometimes just labelled 'specials' take place within accepted Batman continuity. They may be referred to or continue from the regular comics. One of the earliest graphic novels incorporated into continuity was the controversial 'The Killing Joke', the infamous clash between Batman and The Joker in which Barbara Gordon (Batgirl) is crippled and Commissioner Gordon tortured. Alan Moore tells this grim tale alongside an origin of The Joker, contrasting his madness with that of The Batman, but reportedly was reined in by editors at DC. Brian Bolland's lovingly detailed artwork stays just the right side of glamorous. 'Arkham Asylum' suffered similar interference. Long anticipated, when it arrived it turned out to be an overwritten, pretentious exercise by Grant Morrison and Dave McKean. 'Full Circle' is a sequel to 'Batman: Year Two' (*Detective* 575-578) in which The Reaper seemingly returns from the dead for revenge. Barr produces good mysteries and Alan Davis' artwork is bold and distinctive, while there are many elements from Batman's past sprinkled throughout the story for nostalgia fans.

There was a 1995 tie-in to the 'Underworld Unleashed' series, 'Devil's Asylum', in which Batman is tempted by the poisoner, Kryppen. Alan Grant writes and Brian Stelfreeze "story-tells" (whatever the difference is) while Rick Burchett does the artwork. It's better than many crossovers, but retreads a lot of old ground. Set during 'No-Mans Land', the 'Day of Judgement' tie-in has Robin and Nightwing battle zombie gangsters whilst the 'Our Worlds At War' tie-in sets the scene for Batman to confront President Luthor over the use of federal forces in Gotham. 'The 10 Cent Adventure' (an issue costing 10¢), is an introduction to the character and a prelude to the 'Batman: Murderer' storyline running through *Batman* titles in 2001 and 2002.

'Vengeance of Bane' introduced Bane, the character integral to the 'Knightfall' storyline. Graham Nolan and Barreto produce reasonable art, and Chuck Dixon's script conveys the information succinctly, but this remains a heartless tale reading like the scene-setter it obviously is. It was followed in 1995 by 'The Vengeance of Bane II' by the same creative team. This is a better tale, making use of the past, freeing Bane from his drug dependency and from prison. Dixon creates another simplistic story in 'Blackgate' where Batman has to infiltrate Blackgate prison to prevent an escape. Joe Staton and James A. Hodgkins make a good art team on a dull story. Much the same can be said of 'Bullock's Law', in which detective Bullock is pressured not to testify in court. Alan Grant contributes a couple of titles based on conspiracy theories. 'The Abduction' toys with the idea that Batman has really been abducted by aliens and 'Dreamland' concerns government drug experiments in an underground complex. Breyfogle draws both, and the latter is the better of the two. Grant's own contribution to Batman's villains, Scarface, appears in 'Scarface: A Psychodrama' in which the Ventriloquist thinks he's escaped from his puppet. This is a good tale, made all the better by being well illustrated by Charlie Adlard. Frank Quitely's fine artwork on 'The Scottish Connection', again by Grant, with Batman investigating strange goings-on in Rosslyn Chapel, raises this above the average.

Every now and again, the mistake is made of giving Batman supernatural adventures in continuity. Neither George Pratt's 'Harvest Breed' nor Pat Mills and Duke Mighten's 'The Book of Shadows' have even the redeeming quality of decent artwork. 'Fortunate Son' does have good art from Gene Ha on a dull tale of Batman and Robin falling out over the merits of a rock singer. Hall's 'DOA' has Batman poisoned, but refusing to give up before he's rescued a kidnapped girl. The visually impressive 'Ego', by Darwyn Cooke, explores Batman's psyche (again) and 'The Hill', written by Christopher Priest, is a clever, thought-provoking story about a criminal who isn't frightened by Batman and uses politics to defend himself. 'Absolution' comes as something of a surprise, having an absorbing script by J.M. DeMatteis, about Batman's ten-year pursuit of a terrorist, who's always managed to stay one step ahead of him until she hides herself amongst missionaries in Thailand. The painted artwork, by Brian Ashmore, is also better than average, and overall this is a good, thought-provoking piece.

'Seduction of the Gun' was much praised on release because of its stance on the question of gun ownership and use. John Ostrander avoids preachiness, but the issue itself impairs any real plot, though Vince Giarrano's artwork shows occasional flashes of inspiration. 'Night Cries' is another issue-based story, this time by Archie Goodwin with painted artwork by Hampton. Goodwin handles child abuse sensibly, but once again, there's no escaping the lack of a decent plot. Concern also outweighs plot in 'Death of Innocents', about landmines, but why Batman should be considered the ideal vehicle for a story about such an issue is odd. The art is another matter. Staton inked by Sienkiewicz is an unlikely marriage made in heaven though they're wasted on this. Dini and Alex Ross' treasury sized 'War On Crime' isn't quite as moralistic, but the didactic intent overwhelms any attempt at complexity. 'Digital Justice' is another failure, full of high-tech babble and hideous computer-generated artwork by Pepe Moreno. As you might expect, the 'Batman 3-D' graphic novel is in 3-D. It's an unexciting adventure in which Batman's villains are trying to outdo each other in the murder of a millionaire. There are also 3-D pin-ups and a reprint of a rare Batman story produced during the original 3-D craze in 1953. 'Scarecrow 3-D' uses 3-D for just a few scenes to show the effect of Scarecrow's fear drugs in what is effectively a Robin solo story.

There's a sequence of graphic novels concerning Batman's relationship with Ra's Al Ghul, The Demon. 'Son of the Demon' and 'Bride of the Demon' are both written by Barr and take up the idea, from an earlier, non-continuity special, that Batman and Ra's daughter Talia are lovers. Both have plenty of action as Batman spoils Ra's Al Ghul's plan to recreate the world in his own image. The first ends with the birth of Batman and Talia's child, and the second with the conception of Ra's' own offspring. Jerry Bingham has never bettered his art on 'Son of the Demon'. Tom Grindberg on 'Bride', by contrast, does a bad Neal Adams and gets the look completely wrong, as he does so often. 'Birth of the Demon' is by The Demon's creator O'Neil, and concerns the character's origin. It should probably not be considered part of continuity since it involves a dying Batman being revived by Ra's Al Ghul's Lazarus Pit, which is what has kept him alive for centuries. Nevertheless, it's not a bad tale and has the advantage of Breyfogle's best artwork on Batman. Ra's Al Ghul also turns up in 'The Chalice', by Dixon and John Van Fleet, which concerns an uninspired conflict over the Holy Grail, but does at least have better painted artwork than usual.

There are two Secret Files issues – 'Villains' and 'Gotham City' – that are primarily pin-ups and facts about characters and places, but they do each have a lead story, the Catwoman meeting with the new Batgirl by Scott Peterson and Paul Ryan in the latter, being the better of the two. The final category contains Batman's team-ups with other characters. *Batman/Demon* by Grant and David Roach, sees the pair joining forces to battle a devil worshipper and the devil he's trying to bring to Gotham. It's a facile excuse for taking Batman to hell, complete with guilty vision of the dead (his parents, Robin). It's not unentertaining, just a waste of time. 'The Poison Tomorrow' teams Batman with Green Arrow, and is O'Neil at his most moralistic as Poison Ivy plans to poison the world to save it. The supernatural elements of *Batman/Phantom Stranger* and *Batman/Deadman* sit uncomfortably with Batman's character, despite the efforts of Grant with Arthur Ranson and James Robinson with John Estes respectively. 'Plus: Arsenal' is a straightforward teaming of Batman with the ex-Green Arrow sidekick against the KGBeast, while *Batman/Nightwing*: 'Bloodborne' is just confused and ugly.

Batman and the Incredible Hulk is undemanding, but overall avoids the clichés common to company crossovers, and has smooth artwork by Garcia-Lopez. *Batman/Captain America*, by John Byrne, is better, if only because it's set during World War II. The Red Skull tricks the Joker into helping him steal atomic weapons and the plot's going swimmingly until the characters are called upon to out-fly a nuclear blast. Still, there are some good touches for nostalgia buffs. *Daredevil/Batman* spends too much time on the obligatory fight between the heroes and their personal antagonism, but Batman/Daredevil (by Grant and Barreto), with Scarecrow and the Kingpin is better. *Batman/Spider-Man* features a battle of wits between the Kingpin and Ra's Al Ghul, largely playing down Spider-Man's participation. *Batman/Punisher* and *Punisher/Batman* form a two-part story that sees The Punisher visit Gotham in search of Jigsaw and run into first the Azrael-Batman and then the real Batman. In the meantime, Jigsaw has teamed with the Joker. O'Neil on the first half is restrained but Dixon goes for big gun battles. On the art front, Barry Kitson and James Pascoe do creditable work on O'Neil's script but John Romita Jr and Klaus Janson make a very unappealing meal of Dixon's. Overall an oddity not worth seeking out unless you're a completist. *Batman/Spawn*: 'War Devil' and 'Spawn/Batman' aren't related, and you know you're in trouble when one of them needs three writers. It's a fiasco that involves Gotham being the site for the return of the dead. Janson's art is suited neither to Batman nor to Spawn. Todd McFarlane has the sense to have Frank Miller to script for him, and the Image issue is more successful, but since most of the issue consists of Spawn and Batman fighting each other (understandable in context, although a bit of a cliché), it's not exactly a long read. *The Darkness/Batman*, despite being produced by committee, is better than average and takes place in continuity for Jackie Estacado, who's ordered to kill Batman, but ends up betraying his 'family'.–NF

BATMAN:THE LONG HALLOWEEN

DC: *13 issue limited series 1996-1997**

Building on the success of the *Legends of the Dark Knight* Halloween Specials, this is by their regular team of Jeph Loeb and Tim Sale. Set during Batman's early career, the series concerns itself with a serial killer, nicknamed 'Holiday', apparently out to destroy a particular Mob family. Each issue takes place on a different holiday (Christmas with the Joker, Valentine's Day with

Catwoman) and over the course of the year, most of Batman's foes make an appearance. The series considers the disagreements between different Mob families, and how the Mob came to lose control of Gotham to the growing number of 'Bat-villains'. Loeb makes good use of the supporting cast with a major sub-plot concerning the relationship between Batman/Bruce Wayne, James Gordon and Harvey Dent, both before and after the latter becomes Two-Face. Sale's artwork has come on by leaps and bounds and, with its references to Miller and Toth, seems perfectly suited to the Batman.~NF

BATMAN Miniseries

DC: *2 issue microseries (Batman/Grendel:'Devil's Riddle', 'Devil's Masque') 1993, 3 issue miniseries ('Jazz') 1995, 4 issue miniseries ('Black and White') 1996*, 2 issue microseries (Batman/Grendel: 'Devil's Dance', 'Devil's Bones') 1996, 3 issue miniseries (Batman Vs Wildcat) 1997, 4 issue miniseries ('Bane of the Demon') 1998, 4 issue miniseries (Batman/Toyman) 1998-1999, 2 issue microseries ('Dark Knight of the Round Table') 1999, 2 issue microseries ('Book of the Dead') 1999, 6 issue miniseries (Batman/Huntress: 'Cry For Blood') 2000*, 3 issue miniseries ('Outlaws') 2000, 4 issue miniseries ('Haunted Gotham') 2000, 3 issue miniseries ('The Doom that Came to Gotham') 2000-2001, 2 issue microseries ('The Ankh') 2000-2001, 3 issue miniseries ('Hollywood Knight') 2001, 2 issue microseries ('League of Batmen') 2001, 5 issue miniseries ('Turning Points') 2002 3 issue miniseries (Batman/Deathblow) 2002**

DC/Dark Horse: *3 issue miniseries (Batman Vs Predator) 1991*, 4 issue miniseries (Batman Vs Predator II: 'Bloodmatch') 1994*, 4 issue miniseries (Batman Vs Predator III: 'Blood Ties') 1997* 2 issue microseries (Batman/Aliens) 1997, 4 issue miniseries (Batman/Tarzan: 'Claws of the Cat-Woman') 1999, 2 issue microseries (Batman/Hellboy Starman) 1999, 3 issue miniseries (Batman/Aliens II) 2003*

DC/Fleetway: *one-shot (Batman/Judge Dredd: 'Judgement on Gotham') 1991, one-shot (Batman/Judge Dredd: 'Vendetta in Gotham') 1993, one-shot (Batman/Judge Dredd: 'The Ultimate Riddle') 1995, 2 issue microseries (Batman/Judge Dredd: 'Die Laughing') 1998-1999**

Batman's archetypal nature seems to lend the character naturally to a variety of situations and milieu, both within and outside his regular comic continuity, but this very familiarity, and the abundance of supporting characters, has meant that individual creators' treatments can produce material of widely varying quality. 'Bane of the Demon' tells of the criminal strongman's alliance with Talia and Ra's Al Ghul ("The Demon's Head") and a search for a doomsday plague. Chuck Dixon, Graham Nolan and Tom Palmer's competent thriller contrasts harshly with the action packed but plot-free *Batman Vs Wildcat*, who team to crush an illegal Pay-Per-View pit-fighting scheme only to end up beating the stuffings out of each other. Dixon, Beau Smith, Sergio Cariello and Art Thibert do their best not to tax our brains whilst pandering to our dark sides, unlike Larry Hama's tense *Batman/Toyman*, dealing with a deaf boy abducted by the insane toy maker who thinks the child has compromised his latest scheme. Anthony Williams' art is competent, and each chapter has a different inker and a different narrative voice, with the silent 3, the deaf boy's tale, amazingly effective. Dixon and John Van Fleet tell a moribund tale of an Egyptian Wizard's daughter in 'The Ankh', who after being trapped for thousands of years in a tomb is released to begin a campaign of theft and possibly mystic murders. The pretty pictures fail to disguise a vapid and predictable plot, unlike 'Outlaws', by Doug Moench and Paul Gulacy, a high-octane action thriller that deals with a corrupt federal task-force moving into Gotham with a mandate to take down all costumed vigilantes. 'Jazz' is an eccentric looking crime caper from Gerard Jones and Mark Badger that concentrates on the Dark Knight's detective skills, and concerns the mysterious return of a be-bop legend long believed dead, and the measures persons unknown undertake to return him to that state.

'Cry For Blood' by Greg Rucka, Rich Burchett and Terry Beatty is a well produced yarn that has the Huntress re-examine her tragic origins, and with the help of the enigmatic Question and his mentor Richard Dragon re-define who she is and why she does what she does. *Batman/Deathblow* is a confused and cynical muddle from Brian Azzarello, Lee Bermejo, Mick Gray and Grant Goleash, as the ultimate Black Ops specialist hits Gotham City on the trail of a pyrokinetic super spy. By contrast, 'Black and White' is a spectacular showing from comics' greatest talents, producing short complete tales without benefit or hindrance of colour. Ranging from poignant ('Good Evening Midnight' by Klaus Janson in 3) to tragic (Bruce Timm's 'Two of a Kind' in 1) to the just plain weird ('The Third Mask' from Katsuhiro Otomo in 4) these highly personalised stories show why Batman continues to grip the public consciousness. The success of the miniseries lead to the institution of a regular black and white back-up series in the back of *Gotham Knights*. 'Turning Points' is also an excellent and different sort of anthology, with each issue dealing with a different period of Batman's career, produced by a different team and in an appropriate style for each era.

Matt Wagner's Grendel fits well with the Batman mythos. Hunter Rose is the world's greatest criminal and seeks out the Batman as a challenge, in the first microseries, a well conceived and executed tale of opposites. The sequel features Grendel's thematic successor Grendel Prime, who travels from the future to acquire the skull of Hunter Rose, which is on display in Gotham City. Prime is an almost unstoppable physical force who tests Batman's abilities to the limit.

Elseworlds tales are set outside continuity and can therefore place the character in any situation imaginable, and there isn't the knowledge that Batman will always survive. 'The Doom That Came To Gotham' is a classic horror pastiche. In 1928 millionaire recluse Bruce Wayne returns from a twenty year sea voyage with surviving crew Dick, Jason and Tim, in time to fall foul of the witch Talia as she tries to revive her dead father and return the Dark, Slithery Gods from the Outer Abyss to control of Earth. Set against the backdrop of a Gotham City founded on an act of dark magic that has a singular tragic effects on the lives of the wealthy, writers Mike Mignola and Richard Pace produce a moody masterpiece stylishly illustrated by Troy Nixey and Dennis Janke. Magic also features in the moronic 'Haunted Gotham', a tale of a city plagued by evil sprits, fought by Bruce Wayne's parents and with Bruce trained from birth to battle these ghosts as Batman. 'Dark Knight of the Round Table', by Bob Layton and Dick Giordano is a pretty but vapid adventure that sets the character in the time of King Arthur, with Wayne's parents murdered by Morgana LeFay's bat demon as the catalytic force that sets the orphan on his vengeance trail. Another tack is to diverge at some stage from accepted continuity. In Moench and Mark Bright's 'League of Batmen', Ra's Al Ghul has killed his arch foe and devastated the world with plague, but his grandson, child of Bruce Wayne and Talia, organises an international team of caped crusaders to save humanity. 'Book of the Dead' stipulates Batman's parents were archaeologists murdered to prevent their solving the "Riddle of the Ages". When Bruce Wayne funds a project to prove the gods of Egypt were in fact aliens, it precipitates a dull rehashing of every B-movie cliché of the last twenty years. Movies also feature in the excellent 'Hollywood Knight' with Layton and Giordano telling a taut, post-war crime thriller as independent film producer Byron Wyatt directs and stars in the movie serial Batman until a rival studio tries to murder him. His subsequent derangement and quest for justice makes for a cracking read.

The co-ventures with movie and licensed properties are a mixed bag. The three Predator tales suffer from an inescapable feeling of inevitability. Unlike characters in a *Predator* movie, and even more so in the *Predator* comics, the cast of *Batman* have not the slightest hint of expendability. Batman and Co are always going to win, and won't get lastingly damaged in the process. In the first

Dave Gibbons and Andy and Adam Kubert spin a yarn of gangsters and boxers falling foul of the invisible hunter. In II a rogue Predator stalks Gotham hunted by its own kind, whilst Batman finds himself the target of a $5,000,000 hit. By Doug Moench and Paul Gulacy, it's the pick of the bunch, better than father and son Predators stalking Batman and Robin in the predictable and tension-free 'Blood Ties', which shoe-horns Mr Freeze in to coincide with the release of the fourth Batman movie. *Batman/Aliens* by Ron Marz and Bernie Wrightson at least yields some focus to other characters before the inevitable conclusion, as Batman invades a Mayan Temple, while the long delayed sequel by Ian Edgington and Staz Johnson pits the Dark Knight against an Alien that's been entombed in a Gotham City basement for seventy-five years. *Batman/Tarzan* is an uninspired period quest to lost cities in search of evil white men and lost treasures, but *Batman/Hellboy/Starman* is a moody, atmospheric tale of magic wielding Nazis who kidnap Ted Knight (the original Starman) just as Batman must contend with the Joker's latest slaughter spree. Good thing Knight's son is also a superhero, and that Government agent and good demon Hellboy is in town too. Enjoyable stuff from James Robinson and Mike Mignola, but casual readers will need a scorecard for the less well-known characters.

Batman transfers readily to the blackly humourous world of Judge Dredd and the similarities in their characters means the jokes and one-liners work double-duty. 'Judgement On Gotham', from Alan Grant, John Wagner and Simon Bisley traps Batman in Mega-City 1 whilst Judge Death and the Scarecrow prepare to unleash genocide on Gotham, whilst 'Vendetta' is little more than an incredibly long fight between Dredd and Batman, drawn this time by Cam Kennedy. 'The Ultimate Riddle' is illustrated by Carl Critchlow and Dermot Power and is another punch-up, this time at the bidding of an alien sportsman, whilst the oft-delayed 'Die Laughing', illustrated by Glenn Fabry (1) and Jim Murray (2) teams the Joker and the Dark Judges as they attempt to slaughter the 10,000 inhabitants of a sealed Megasphere.~WW

Recommended: 'Black and White'1-4, 'Hollywood Knight' 1-3, 'Outlaws' 1-3, 'Turning Points' 1-5

BATS, CATS & CADILLACS

Now: *2 issues 1990*

A vampire, a werecat and a wererat don't make for your everyday buddy team. Written as light comedy, it never really gels, with the characters little more than gag delivery vehicles, and the gags not good enough to distract from that fact.~FP

BATTLE

Atlas: *70 issues 1951-1960*

A general war anthology title that featured 'Buck Private O'Toole' in early issues. The anthology format means there are contributions from some excellent artists, including EC stalwarts Bernie Krigstein in 21 and 23, Jack Davis (49), John Severin (28, 32, 34) and Al Williamson (55, 67, and 68, inking Jack Kirby). Others to be found include Russ Heath (6), Joe Maneely (4), Angelo Torres (59) and plenty of Kirby in the late issues. Combat Kelly and Combat Casey were briefly featured in 60-62. Although it survived Marvel's great bout of cancellations in 1957, the greater need for *My Girl Pearl* in 1960 killed Marvel's only remaining war title.~SW

BATTLE ANGEL ALITA

Viz: *9 issue limited series ('Part One') 1992-1993*, 7 issue limited series ('Part Two') 1993*, 13 issue limited series ('Part Three') 1994-1995*, 7 issue limited series ('Part Four') 1995*, 7 issue limited series ('Part Five') 1995-1996*, 8 issue limited series ('Part Six') 1996*, 8 issue limited series ('Part Seven') 1996-1997*, 9 issue limited series ('Part Eight') 1997-1998*, 6 issue miniseries ('Last Order Part One') 2002-2003*

Alita is a cyborg with little memory except for her knowledge of the Panzer Kunst, a very powerful fighting technique. In the world of the Scrapyard, Alita is reconstructed by Ido, a refugee from the floating city of Tiphares – everyone wants to go there but it's fiercely protected. There's plenty of opportunity in the early series for Alita to show off her fighting abilities, whether against rogue cyborgs or in the Motorball arena. After the death of her boyfriend Hugo at the end of Part Two she seeks her own death in this arena, where the most powerful cyborgs work in teams to race around a circuit. Part Three contains this storyline but is also the story of the champion Jashugan, whose victories come with a higher and higher cost to his health. Part Four features the return of Zapan, the rogue cyborg from Part One, determined to destroy Alita and the whole of the Scrapyard if it won't surrender her to him. Part Five sees a new direction as, searching for Ido, who's been taken prisoner by an old colleague, Alita becomes a member of an élite force in service to Tiphares. She's a bodyguard on a nuclear-powered train until it's attacked and destroyed. Part Six continues the search, with Alita now accompanied by her new friend Figure. The final two Parts conclude the series as Alita encounters mad scientist Desty Nova and his son Kaos / Den. She finally uncovers her own origin as well as that of Tiphares just before, it seems, the whole world will be destroyed by Nova's machinations. 'Last Order' picks up the story in the middle of the last part, and creates an alternate ending, beginning with Alita's memories, as she is being reborn, of Yoko and Erica being forced to walk through a minefield until they're saved by a female warrior using the PanzerKunst.

Yukito Kishiro's artwork is what draws you to this tale, although as the series progresses his characterisation and storytelling grow in depth, increasing our understanding of the whole situation but politicising and adding emotion where it had been lacking. Part Four shows a growing maturity, being mostly a big fight but containing seeds of emotional and physical rebirth. Where the artwork also increases in ambition in the later parts, the scripts have a lighter touch too, as Kishiro's confidence increases and touches of humour are allowed to shine through.~NF

Recommended: Part Four 1-7, Part Five 1-7, Part Six 1-8, Part Seven 1-8, Part Eight 1-9

BATTLE CHASERS

Image/Cliffhanger: *4 issues 1998**
Cliffhanger: *4 issues (5-8) 1999-2001*
Image: *1 issue (9) 2001*

A text-book example of how to screw up a good thing big time. Joe Madureira concocted an appealing brew combining elements of Tolkein, Star Wars and the Roman Empire to good effect. He introduced an intriguing, although hardly original, cast including an aged wizard, young neophyte, an enormous battle robot who loves nature, and a woman with the biggest breasts in the world. It was well dialogued by the previously unknown Munier Sharrieff, and Madureira's impressive action pencils inked by Tom McWeeney completed a stylish and enticing package. The mistake? The gaps between issues grew longer and longer, eventually alienating an absurdly loyal audience beyond redemption. What there is should still be worth investigating for fantasy fans. 1-5 are the best issues, and a relatively complete story, with 1-4 available in two collected editions, and Adam Warren applies his manga style to short stories in 6 and 9.~WJ

BATTLE CLASSICS

DC: *1 issue 1978*

An attempt by DC to earn a bit of extra pocket money by reprinting some of their vast library of war stories. It teams their main World War II characters – Sgt Rock, Mlle Marie, Johnny Cloud and Jeb Stuart – and was intended to initiate an ongoing series. As it débuted, though, swingeing cuts were being applied to DC's entire line and there was only ever the one issue.~HY

BATTLE FOR A THREE DIMENSIONAL WORLD

3D Cosmic Publications: *1 issue 1982*

Definitely the novelty in 1982, long term 3-D comics enthusiast Ray Zone covers the main developments in the history of 3-D, and the Jack Kirby artwork is separated for the 3-D viewing. Typically Kirbyesque hero figure Stereon is despatched to pivotal moments in the lives of those who perfected the 3-D process and prevents their destruction from second dimensional 'flatties'. It's a painless educational pamphlet, and if you've ever wanted to see Jayne Mansfield in 3-D, this is your opportunity. You will need 3-D glasses, though.~FP

BATTLE GIRLZ

Antarctic: *6 issue miniseries 2002*

Mech Girl Yunna arrives on the planet, Arlan, and is immediately attacked by Blood Hand Assassins. Rescued by the Priestess and Eevi, the Mighty Girl, she's welcomed as the newest recruit to Special Imperial Security and is introduced to her team-mates, Gadgeteer, Temptress, Vamp and their leader, Sasa Rai, the Saintly Perfect Goddess. Together they must shop, learn more about each other and overcome the interplanetary threat of Geneszorr and his villainous minions. Nothing too serious, then about this light-hearted action romp, full of big robots, magic and scantily-clad, beautiful, female warriors, all delineated in a decorative, manga style by creator, Rod Espinosa. It's fun, but Espinosa's too fond of the grand gesture (there are too many single panel pages), which, attractive as they may be, upset the flow of the narrative.~NF

BATTLE GODS: Warriors of the Chaak

Dark Horse: *9 Issue limited series 2000-2001**

A confusing blend of science-fiction, Mexican Wrestling and Mayan mythology as a disparate band of professional fighters in 2065AD seek entrance to the Chaak, the Tournament of the Gods, against a backdrop of approaching armageddon. It's well illustrated by sole creator Francisco Ruiz Velasco, but its just *Mortal Kombat* with Mexican accents.~WW

BATTLE GROUP PEIPER

Tome Press: *One-shot 1997*

Scholarly examination of the actions of a German Panzer commander who executed American P.O.W.'s during the Battle of the Bulge. A workmanlike fact-based piece from Wayne Vansant.~WW

BATTLE OF THE PLANETS

Image/Top Cow: *5 issues + 2002 to date*

In the near future an apparently alien device rampages through a city, and the only people able to stop it are a previously untested group of genetically modified pilots. There is also a covert organisation on Earth plotting global domination and infiltrated into positions of power. This is based on the late 1970s cartoon series fondly remembered by thirty-somethings of the present day, and every effort is made to merge nostalgia with the current tastes of the comic market. There's a smooth animation gloss to the art, decently distinguished pilots and enough intrigue to keep the comic interesting for some while yet.~FP

BATTLE OF THE ULTRA BROTHERS

Viz: *5 issue miniseries 1993-1994*

If you find the sight of paint drying dangerously over-stimulating, this may be the comic for you. Normally you would expect moments of excitement in stories of 120 foot high Ultra Warriors fighting space-going monsters that are larger still, but have no fear. The Warriors, with their blank, insectoid eyes, are unburdened by any detectable personality and if you didn't know they were the heroes, you would take them for an evil robot army. It's only the marginal notes that let you know they're impressively tall, since they're never drawn against anything that's normal human scale. Yes, this is the cure for your insomnia, as long as you don't start wondering why Viz ever felt the need to translate Mamoro Uchiyama's manga original.~FC

BATTLE POPE

Funk-O-Tron: *12 issues + 2000 to date*

Delightfully blasphemous tale of the World's last Pope from Robert Kirkman and Tony Moore. When God finally judges the Earth and takes the Saved to Heaven, there's an awful lot of people left standing around looking surprised, none more so than the lecherous and brutally violent reigning Pontiff. Things get worse as the doors to Hell open and a horde of Devils move in to lower property values. After a bar-fight the Pope is killed by a demon while he's boffing the barmaid, although Jesus Christ is able to blow the murderer away. God then resurrects the Pope, buffs him up like a superhero and sends him back to clean up the world for humanity – with Jesus as his gun-toting, bumbling sidekick. Along the way they pick up a few helpers, St Michael, a Demon and Santa Claus as they begin the never-ending battle to save the unsalvageable. Originally intended as a miniseries, the project was immediately extended by producing themed one shots that carried on the numbering: 'Shorts' (5), 'Mayhem' (6), 'Mayhem II' (7), 'Shorts II' (8), 'Shorts III' (9), 'Christmas Pope-tacular' (10) before beginning another story-arc ('Wrath of God' 11-13). There's also an affiliated Saint Michael miniseries, and collections appear when enough material has been produced. Overall, well done, but probably on the top of many people's "to be banned" list.~WW

BATTLE TIDE

Marvel UK: *4 issue miniseries 1993, 4 issue miniseries 1993*

"Tag Team Wrestling Inter-Galactic Style!" screams the cover blurb, and that's about all you need to know. Death's Head II and Killpower co-star, Psylocke and Sabretooth guest star. Series two is more of the same, but with only the Hulk getting between Killpower and Death's Head.~HS

BATTLE TO THE DEATH

Imperial: *1 issue 1987*
Eternity: *2 issues (2-3) 1987-1988*

In order to rule Japan, Inspector Tanasa, with samurai warriors and the weapons of an ancient alien race at his command, has raised the dead with the Flame of Life, but is thwarted by a band of ninjas led by Lieutenant Katsu. At which point, the aliens appear and whatever sense there was is ditched for the sake of ludicrous comedy. Writer, John Arcudi, and artist Jim Rohn (1-2) may not appreciate being reminded of their part in this, as there's little good to be said for it, other than that it ended when it did, albeit unfinished.~NF

BATTLEAXES

DC/Vertigo: *4 issue miniseries 2000*

Sword and sorcery served up with a twist by Terry LaBan and Alex Horley. Four female warriors and an apprentice druidess seek their fortunes as mercenaries in the kingdom of Birzenia, currently at war with the barbarian Tenguts. There's a lot of sex and violence, but it's supported by a well-crafted tale and earthy artwork from Horley, whose pencils are far more attractive than his painting.~NF
Recommended: 1-4

BATTLEFIELD ACTION

Charlton: *74 issues (16-89) 1957-1966 (16-62), 1983-1984 (63-89)*

Pedestrian anthology war comic with little to recommend it other than the occasional name artist, such as Sam Glanzman and Pat Boyette. 84 features reprints from Jack Kirby, Bill Draut and Al McWilliams and looks as if it might be a leftover 1950s Prize comic.~WW

BATTLESTAR GALACTICA

Marvel: *23 issues 1979-1981*

Based on the post-*Star Wars* TV series, *Battlestar Galactica* was launched in *Marvel Super Special* 8, with the TV pilot adapted by Ernie Colón. The subsequent ongoing title was a cut above your average tie-in comic, thanks mainly to Walt Simonson's regular appearances as penciller.

---

* Available in a collected edition

Although his blocky style didn't produce the greatest likenesses he was well suited to drawing the dog-fights, and there were plenty of them in issues 4, 5, 11-13, 15-20 and 23. The last remnants of space-faring humanity are fleeing across galaxies, hotly pursued by the evil robot-like Cylons. Their mission: to find the legendary home of mankind without leading the Cylons there to massacre whoever they may find. Their motley fleet of small craft is protected by the Galactica, which is crewed by the usual bunch of white-toothed young people, crusty old blokes, cute kids with pageboy haircuts and comedy aliens. Walt Simonson's scripts brought a heart-warming touch to the book without getting as mawkish as the series itself. She developed the characters well. As in the TV series most adventures centred around staid but sexy pilot Apollo (who just happened to be the son of Adama, the Battlestar's commander), his spunky sister Athena and his devil-may-care best buddy, Starbuck, a gambling womaniser with a cheeky grin. There was more space to develop the struggle for power between the military Battlestar and the secular Grand Council, although this was used chiefly to generate plot ideas.~FJ

BATTLESTAR GALACTICA

Maximum Press: *4 issue miniseries 1995*, 3 issue miniseries ('The Enemy Within') 1995-1996, 3 issue miniseries ('Starbuck') 1995-1996, 3 issue miniseries ('Apollo's Journey') 1996, one-shot ('Journey's End') 1996, one-shot ('Special Edition') 1997, one-shot ('The Compendium') 1997*

Having liked the TV series as a kid, Rob Liefeld decided to revive the comic using various Maximum Press regulars to flesh out his concepts. Leaving Earth, Apollo goes through a long dark teatime of the soul when his wife and Starbuck die, but remember kids, this is comics. He gives in to his 'dark side', discovering psychic powers just in time to save the Galactica from the Cylon's allies The Nomen to whom he's conveniently given it while evil. If one explains that this miniseries is written by the actor who played the character in the 1970s, Richard Hatch, that might explain a lot. It's drawn by Hector Gomez and coloured in the horrible plastic computer style that makes everything look slimy. In 'Starbuck', the show's most popular character grows long hair and womanises his way through a band of resistance fighters on the moon, while being tormented by a sadistic prison camp commandant. Gomez inks the first issue himself and it's not a wise decision, but he's far superior to the other bunch of artists who fill in on the rest of the series in that he can draw perspective and mostly humanoid bodies. The nadir is 'Journey's End', drawn by two incompetent pencillers and finished by 3 inkers, who put no effort (and no background) into illustrating Liefeld's plot. Liefeld himself unerringly confuses an already muddied pond by having the Galactica transported into the future and then into it's own past to save itself. Or something. Utter toss.~FJ

BATTLESTAR GALACTICA

Realm: *5 issues 1997-1998*

Realm took the third shot at producing the further adventures of the Last Survivors of Humanity as they flee across uncharted space from a relentless mechanoid foe. All the cast regulars are in evidence as they search for fuel ('Law Of Volahd' in 1-2) and allies ('Prison Of Souls', 3-5). The obvious love that creators James Kuhoric and Chris Scalf have for the TV show isn't infectious, resulting in uninspiring stories, and the full painted art is meticulous lacks, but lacks punch.~WW

BATTLESTONE

Image: *2 issues 1994*

Trips through the memory of the former Brigade member, largely relating to the *Youngblood* and *Spawn* continuities. When our hero wakes up from his cold sleep, he fights... Unhhhh... too boring... blacking out.... (thud)...Zzzzz...~HS

BATTRON

NEC: *3 issues 1992*

A series that surely sank without trace on the appalling and unrepresentative covers. Anyone purchasing 1 on the basis of the (poorly depicted) naked woman draped behind a sheet would surely be put off by Wayne Vansant's tale of a French Foreign Legionnaire named Battron during World War II. Despite featuring a travelling brothel, it's sober fare, extremely well drawn in Vansant's nigh-photo-realist style, but very dry and slow-paced in the telling.~WJ

BAY CITY JIVE

WildStorm: *3 issue miniseries 2001*

Pastiche of 1970s "Blacksploitation" and Kung Fu movies featuring white cop Halloran and righteous Bad Mutha Nathan 'Sugah' Rollins (no, really!) as they try to keep a dimension busting jade idol out of the hands of Mad Scientists, gun-totin' gangster dirtbags and the inevitable clan of easy-to-kill ninjas. Stick your tongue in your cheek and it's a hoot.~WW

BAZOOKA JOOLS

Com.X: *3 issues + 2000 to date*

Jules is a streetwise teenager embroiled in a high-tech conspiracy that leaves her conjoined with a symbiote. Naturally the nasty corporation want their tech back, but Jules isn't keen on their methods. To her advantage is the fact that the symbiote makes her very tough and gives the ability to generate and operate really big guns. One major side-effect is that using her powers makes her breasts inflate to huge and unmanageable proportions. If this is supposed to be an ironic or subversive subtext it's subverted by its own medium, as the end result is still a sexy blond with massive jugs shooting big guns. Not nearly as entertaining as you might think.~WW

Bobby Benson's B-BAR-B RIDERS

Magazine Enterprises: *20 issues 1950-1953*

Based on the radio show of the same name, this concerned adventures on a modern-day ranch. Owner Bobby Benson is a kid, and most of the ranch work is done by the foreman Tex Mason, conveniently leaving Bobby and his friends Harka, Irish, Waco and Windy Wales free to get into scrapes. When Tex has finished running the ranch he's usually called upon to get them out of trouble as well. As if this wasn't enough, he also finds time to star as the Lemonade Kid in the back-up strip, an FBI Agent pitted against would-be world-conquerors and the like. Other back-up strips included Ghost Rider and Red Hawk. While fighting bank robbers and rustlers for the most part, Bobby also managed to get involved with Fifth Columnists and evil scientists from time to time. The first thirteen issues were drawn by Bob Powell; Dick Ayers continued *Bobby Benson* and drew the first *Ghost Rider* episodes.

14 has a famous horror cover featuring shrunken heads, marking the series' move away from straight Western stories to compete with the rising number of crime and horror titles. The B-Bar-B riders also featured in *Model Fun* and *Best of the West* (Magazine Enterprises 1951-1953). In 1990 AC Comics published a black and white one-off reprinting three of Powell's B-Bar-B stories and one Red Hawk back-up strip.~NF

BEAST

Former New Mutant Karma drags Cannonball and The Beast along as she attempts to free her long vanished and genetically altered brother and sister from the clutches of villains Spiral and Viper. It's a moronic excuse for a story. Stick it in a cage and throw peanuts at it.~WW

BEAST BOY

DC: *4 issue miniseries 2000*

The former Changeling is given a run-out under his original name. Once a TV star as well as a Teen Titan he finds life after cancellation harder than he anticipated, particularly as someone is impersonating his shape-changing abilities to murder people. The art by Josue

* Available in a collected edition

Justiniano is very good in places, but otherwise it may satisfy fans of the character, but is hardly essential.~WJ

B.E.A.S.T.I.E.S.

Axis: *1 issue 1994*

A well drawn but practically content-free package from Javier Saltares as a mysterious team of heroes in animal themed high-tech armour posture and flex. Before anything could happen the comic ran out of pages.~WW

BEAUTY & THE BEAST

Marvel: *4 issue miniseries 1985*

No, not the TV show, nor the Disney Movie, nor even the classic fairytale that inspired both. Rather, this is the X-Men's Beast, with Dazzler unconvincingly roped in to play Beauty. Our mismatched couple, who start a torrid romance just for this series that is never referred to again in the X-canon, fall foul of a secret organisation which kidnaps mutants and forces them to participate in gladiatorial combat and...urrrgh...ackk...coma....~HS

BEAUTY AND THE BEAST

First: *2 issues 1989-1990*

Spin-offs from the mid-1980s TV show about the unlikely romance between a crusading social worker and a bestial subterranean whose deformed exterior hides a noble spirit. Okay, they're 'girlie' comics: pretty, soft-focus, soft-centred and sentimental, but they're lovingly illustrated by Wendy Pini and more satisfying and coherent than the irrational show that generated them.~HS

BEAUTY AND THE BEAST

Innovation: *9 issues 1993*

The soppy romantic TV series gets another run through comics, this time adapting episodes, beginning with the pilot stretched over the first three issues. Mike Deodato produces decent likenesses among the adept but static artwork. The stories are taken from the original scripts, so there are some scenes that weren't in the screened versions to attract fans of the series. Those who aren't already fans are likely to find this saccharine and ridiculous.~FP

Disney's BEAUTY AND THE BEAST

Marvel: *13 issues 1994-1995*

Marvel had a limited license to produce Disney Comics in the mid-1990s to promote the faltering film company's current or forthcoming TV enterprise. *Beauty and the Beast* is set before the movie's conclusion when the lovely and good Belle is living in the Beast's enchanted castle and acting as his librarian. In an uncharacteristic move, writer Barbara Slate eschews the usual complete story or stories per issue in favour of a continuing storyline (1-4) with the monster slowly coming to love Belle. The soap opera elements continue all through the run as Belle teaches the Beast to read and they grow ever closer, in a perpetual set-up for the last ten minutes of the movie. Artist Cosme Quartieri does a more than competent job keeping the mushy stuff interesting looking. A good effort if short on thrills.~WW

Stan Shaw's BEAUTY AND THE BEAST

BEAVIS AND BUTT-HEAD

Marvel: *28 issues 1994-1996*

Despite 1-8 being collected, this is a staggeringly bad tie-in to the MTV cartoon featuring two generation zero saddoes nerding their way through life. Masturbation and fart jokes with the monotony broken up by clips and specially drawn snippets of Marvel heroes and villains acting as equivalents to the music videos on the TV show. Total Doo-Doo, Man, Heh-Heh.~WW

BECK & CAUL Investigations

Gauntlet: *4 issues, 1 Annual 1994*
Caliber: *2 issues (5-6) 1995*

Jonas Beck, a centuries-old werewolf, and 'Caul' Guillane, a young Cajun psychic, form an uneasy partnership to fight evil when they're both involved in trailing a succubus serial killer to the Underside. Reginald Chaney manages some neat twists on established ideas of supernatural beings, but his dialogue is plodding and expository, and the plot over-dramatic. In 3 they go up against a child-killing witch and then Caul reinvestigates the mysterious disappearance of her brother. There are some nice touches, but ultimately Paul Kowalski's overblown art, which looks like a bad 1970s Neal Adams rip-off, is enough to put anyone off, with its distorted faces, hackneyed poses and gimmicky panel arrangements. A 1994 special reprinted the first two issues.~FJ

BEDLAM

Eclipse: *2 issues 1985*

Collections of short horror pieces by Stephen Bissette and Rick Veitch, not to be attempted while in the vicinity of food. The quality is uneven, though each issue has its moments, such as 'Cell Food' in 1 (truly nightmarish), and 'Banana Planet' and 'Arena' in 2.~FC

BEDLAM

Chaos!: *One-shot 2000*

Having accidentally freed the eight families of evil from their prison, a young Native American is transformed into the immortal, time-travelling, skull-faced Bedlam when he touches the Chaos Shield, which had served as the prison's lock. Hunting the families, he's joined unexpectedly by the demonic Carnelian, who offers her companionship and assistance. David Brewer's artwork is uninspired, but writer, Steven Grant, has some fun with the time travel and treachery.~NF

BEER AND ROAMING IN LAS VEGAS

Slave Labor: *One-shot 1998*

Humour title about a slacker barman trying to retrieve a stolen video tape from a house surrounded by a tall wall, and his attempts to get over it. Not very funny, and not very well drawn.~DB

BEER NUTZ

Tundra: *3 issues 1991-1992*

Picture three versions of *Cheers'* Cliff Claven and you've hit on Bink, Humphrey and Luther, three sad cases who substitute boastful bar conversation for friendship. BELL'S THEOREM

Catalan: *3 volumes 1987-1989*

A scientific proposition has it that hidden variables have to be present in matter, and that for quantum mechanics to work a matter is influenced not only by forces in the space and time it occupies, but in other potential places it might occupy. Taking this idea, Matthias Schultheiss begins to extrapolate creative ideas from it. Volume one begins with a convict, Shalby, being offered freedom if he'll take part in some medical testing. In the course of the experiment his consciousness becomes merged with someone else and he finds he's part of someone else's past. The second volume ('The Connections') covers his continuing search for his own identity in an inner landscape during psychotic seizures, and in volume 3 ('Contact'), having discovered

some of the secrets of what's going on, he finds himself on the run in Hamburg with mysterious U.S. agents on his tail. His new 'memories' lead him to a haunting conclusion in a forgotten Nazi submarine. However the story's by no means as simple as a mere plot outline suggests. A great deal of the atmosphere of dislocation and menace is created by Schultheiss' beautiful artwork, but many readers will find the content indecipherable.~FJ

Before the Fantastic Four: BEN GRIMM AND LOGAN

Marvel: *3 issue miniseries 2000*

Action spy adventure story, set before Ben Grimm became the Thing and Logan joined the X-Men. Both are in the military and are sent to Communist Russia to investigate a secret weapon. This is a very silly story, and so lightweight that writer Larry Hama must have had to nail the pages to his desk to work on them. Only for the very young, or those with severe head injuries.~DB

BENZINE

Antarctic: *7 issues 2000-2001*

One of the earliest proponents of American Manga was Ben Dunn and this is his attempt to create a Japanese style anthology with comics and comics-related material (e.g. articles on Nazism in Japanese comics, American manga creators and a manga comics list/price guide). Dunn himself is involved with many of the serials, *Tiger-X* (a re-imagination of the film Red Dawn with giant robots, 1-4), The Lightning (2), Broken Axis (4-5), The Redeemers (6-7) and The Adventures of Swimmer (6-7). Other strips include 'Asrial's Salusian Armored Corps' (a *Ninja High School* spin-off) by Holly Daughtrey and Hiro-San (1, 3, 5), 'Tomorrow Man' by Kevin Gunstone and Terry Pallot (1-2) and 'The Happyness Plan' by Jeremy Forrester (6-7).

The overall quality is barely average, the artwork in particular being very inconsistent. The most accomplished strip is a Warrior Nun Areala story in 5 by Gunstone and artist Jon Haward.~NF

BEOWULF

DC: *6 issues 1975-1976*

Another of the mid-1970s DC barbarian strips. Despite writer Mike Uslan's credible plotting it's hard to read American idioms such as "I owe him one" or 'In a pig's eye it is!' coming from the mouth of a character from popular European folklore. Ricardo Villamonte's artistry is similarly inconsistent, but on the whole passable. Result: forgettable.~SW

BERLIN

Black Eye: *4 issues 1996-1998*
Drawn & Quarterly: *5 issues + (5-9) 1998 to date*

As both capital and microcosm of Weimar Germany in the late 1920s Berlin was at the forefront of German artistic renaissance and on the cusp of political and cultural turmoil. Through the eyes of a large cast, although primarily newcomer mature art student Marthe Müller, Jason Lutes examines the city and its tensions. Berlin is very accomplished, with Lutes particularly adept at cementing character with well-written dialogue, for example the tyrannical art teacher in 2. The historical inevitability encircling the cast offers the reader an extra layer of knowledge and emotional investment, and the whole is fascinating. The infrequent publication, though, now down to annual, can hardly aid in sustaining a readership. There is a collection of 1-8, which is probably easier to find than the comics.~WJ
Recommended: 1-9

BERNI WRIGHTSON, MASTER OF THE MACABRE

Pacific: *4 issues 1983-1984.*
Eclipse: *1 issue (5) 1984*

A collection of Wrightson's work for Warren black and white magazines, *Creepy*, *Eerie* and *Vampirella*, the first three issues contain the better material, with some spirited versions of Poe's *Black Cat* and Lovecraft's *Cool Air*. The final issue is very badly coloured and Wrightson's detailed artwork and beautiful rendering are done no favours throughout the series. Steve Oliff does his best on the first three issues but the considerable reduction in size of the artwork hampers him; colouring the strips is ultimately a misjudged decision and seriously mars the quality of these books.~NF

BERZERKERS

Image/Extreme: *3 issues 1995*

On the basis of his artwork herein one has to assume that Dan Fraga has spent his life devoid of any contact with other human beings, mirrors, or any film, TV show or book depicting humans. Given his sheltered existence and that he's obviously drawn this entire series with only verbal instructions on how a human being looks, one has to commend Fraga. Despite his achievement, though, this ridiculous tale of assembly-line superheroes was cancelled before completion.~FP

BEST BUY COMICS

Apex Novelties: *One-shot 1979*

Robert Crumb once again attempts to understand a world with which he's resolutely out of step in a selection of strips originally printed in *Coevolution Quarterly*. The magazine rejected one of the best strips here, an early collaboration with Crumb's wife Aline in which the pair visit the Whole Earth Jamboree. The other highlight spotlights impoverished jazz pianist Frank Melrose. Beyond that and an assignment to visit the Space Day Symposium there's little Crumb hasn't done better, although perhaps not as concisely, elsewhere.~WJ

BETA SEXUS

Eros: *3 issue miniseries 1994*

Psychic vampire Sarah finds her soulmate in Vanessa, and they travel through space feeding their sexual appetites. This starts off decently, but the art deteriorates as the series continues and the gaps between issues become longer.~FP

BETTI COZMO

Antarctic: *2 issues 1999*

Betti is an intergalactic mercenary, who with her monsterous co-pilot Croaker works for Lady B's agency with the reluctant dispensation of the Intergalactic Royal Police. The artwork borders on cartoony, but the heavily rendered colour keeps the mood serious. Away from the balloon dialogue the writing is overlong and under-edited. Lightweight space thrills with, alas, no plot driving them.~SW

BETTIE PAGE COMICS

Dark Horse: *One-shot 1996, one-shot ('Spicy Adventure') 1997, 3 issue miniseries ('Queen of the Nile') 1999-2000**

1950s pin-up icon Bettie Page saw interest in her modelling career rocket through Dave Stevens' appropriation of her image in his cult *Rocketeer* strip, and it is fitting that he is the guiding light behind her comic career. The first one-shot was a beautifully drawn collection of high-camp strips by the likes of Russ Heath and Bret Blevins, Jeff Gelb and Stevens himself, which managed to capture just the right tone of irreverent fun. The second one-shot and the Queen of the Nile mini-series were less successful ventures by Jim Silke. Whereas the Stevens issue parodied all manner of 1950s trash genres, Silke's material was a take-off of 1930s pulps and movie serials and, while the art is pretty enough, the writing is perilously thin and rather unsatisfying.~DAR

BETTY

Archie: *118 issues + 1992 to date*

Betty is the sweet, perfect girl, who vies with Veronica for Archie's affections. In her own title, the focus tends to be on how good she is as she is forced to seek employment to pay for her clothes and dates, often making use of her skills as a mechanic. She is also handy with small children, either as a babysitter or as a coach to baseball team, The Tigers and the local girl's soccer team. As if school, work and an active social life didn't keep her busy enough, her hobbies include painting, poetry, sculpture, acting, and photography, whilst she also plays basketball and soccer, and is on the school's cheerleading team. Other stories play on her kindness to friends, family and strangers, her occasional attempts to change her personality, and her fantasies and daydreams (in which she and Archie are about to be married). Dating also plays a part, but her plans to be alone with Archie often backfire or she or Archie are too tired and fall asleep during the date. Though Betty is usually portrayed as a boy chaser, she's normally much more loyal to Archie than Veronica is. 55, however, shows Betty mooning after an unnamed boy, and 87 introduces Adam, someone who actually treats her with respect. This leads to The Big Breakup (99-100) in which Betty stops going out with Archie, briefly, of course, and thereafter she's occasionally seen on dates with Adam (if Archie hasn't managed to prevent them). Each issue normally contains four stories and, from 20, a Dear Betty page addressing readers' problems with friendships and romance.

---

* Available in a collected edition

Regular writers include Mike Pellowski, Bob Bolling, George Gladir, Bill Golliher, Frank Doyle, Kathleen Webb, and Dan Parent (from 48). Doug Crane was the regular penciller (until 46) with a more elaborate style than usual on *Archie* comics, alongside Rex Lindsey, with occasional strips by Dan DeCarlo. After Crane, Stan Goldberg has been the most common penciller. Though there are small variations in the relationship between Betty, Veronica and Archie, the underlying premise is that it will never change. Nevertheless, Betty is kept busy, with or without them, and the writers ensure that though the characters may never grow up, they won't seem out of touch with modern life or its concerns.~NF

BEWARE

Marvel: *8 issues 1973-1974*

This all-reprint title contains weird horror shorts from the 1950's. The title changed to *Tomb of Darkness* from issue 9.~APS

Whitley Strieber's BEYOND COMMUNION

Caliber: *2 issues 1997*

Strieber has made a career of 'informing' the credulous about his alien abduction experiences, and this follows on from his book *Communion* as Whitley strives to convince a doubting world that he's telling the truth. It's an awkwardly told and unsatisfying story. As for the truth of it, it's not likely to convert any sceptics.~FP

BEYOND THE GRAVE

Charlton: *6 issues 1975-1976*

Can you imagine the person so starved of even the most basic forms of entertainment in the 1970s that they might resort to buying a Charlton mystery title? Universally unimaginative and poorly drawn (even by Steve Ditko, who features in every issue), there's a thrill rating of absolute zero here. Back to the original poser, though. Back covers feature adverts inviting readers to train for a career in law enforcement, border patrols or broadcasting. The successful applicants will by now be running your local police and immigration services or be heads of programming somewhere. Now you know why they're so humourless and lacking in imagination.~WJ

THE BIBLE

DC: *One-shot 1975*

This tabloid-sized comic adapted the Book of Genesis from creation to Sodom and Gomorrah, and was intended as the first of a series that sadly never materialised. Sheldon Mayer's script very concisely reduces the stories down to the bare essentials, and uses quite contemporary and straightforward writing so that the comics would be accessible to a young audience. To an older readership it may be too simplistic to be wholly engaging, but the emphasis on the Bible's panoramic scale is an enormous compensation, thanks to Nestor Redondo's spectacular artwork. Redondo, working from editor Joe Kubert's layouts, excelled himself in providing page after page of detailed, almost baroquely intricate tableaux, making full use of the comic's large format. Almost inevitably, there's nothing ground-breaking here, but for fans of great art this is an absolute must.~DAR

Recommended

BICENTENNIAL GROSS-OUTS

Yentzer & Gonif: *1 issue 1976*

Despite its title few of the contents have anything to do with America's bicentennial, the real meat of the comic being two strips by William Stout, the hard-hitting 'Filipino Massacre' and the libellous Disney spoof 'Realityland'. The other strips are largely inconsequential.~DAR

BIFF BANG POW!

Paisano Publishing: *3 issues 1991-1992*

As Ivan Brunetti predicts in his first issue introduction, this would be unappreciated in its own time and destined to commercial failure. Jokingly, he considers it will be rediscovered, prompting scholarly essays from French critics. Will it? Well, here he's already a brilliant cartoonist with a number of styles. Brunetti's later work combines hectoring underpinned by a fragile combination of insecurity and large ego, and a seeming desire to crumble the boundaries of acceptable taste. Luckily he's also very funny otherwise he'd be some strange hybrid of Steve Ditko and the Austrian doctor who creates art from corpses. There are plenty of grotesque gags such as 'Misery Loves Comedy' (all issues), 'Hitler's Sunday Comix' (1), and 'Manson Family Circus' (2), but the bulk of his contribution is a long 'Fine Art Force' strip. Treating arguments about art as superhero fights featuring the likes of Renaissance Man (who can do anything), Ms Minimalist and Captain Cubist, it's an interesting intellectual exercise that surprisingly sustains itself over three issues. Sadly, Brunetti occupies under half the pages. Art and pop culture themes stretch to the other contributors as well, with Richard Polt's strips covering the same ground as Brunetti. A strip about a samurai truck driver, although crudely drawn, is funny in places, but other than Brunetti it's only Jessica Abel whose work is noteworthy. Future French critics will probably look elsewhere, but fans of Brunetti's work shouldn't.~WJ

BIG APPLE COMIX

Big Apple: *One-shot 1975*

A group of New York-based comic professionals step away from the mainstream to produce an underground comic with the Big Apple as a theme. Revelling in the freedom bestowed by retreat from superheroes, everyone's work is top notch, so selecting the best strip is difficult. 'Over and Under' sees Neal Adams portraying the city's high life while the team of Larry Hama and Ralph Reese contrast on the opposite side of the page, and Wally Wood parodies his own highly regarded 'My World'. Other contributors include Archie Goodwin, Mike Ploog and Al Williamson. A must-have double-bag item.~FP

Recommended

BIG ASS COMICS

Rip-Off/Last Gasp: *2 issues 1969-1971*

When the politically correct critics have the knives out for Robert Crumb, **Big Ass Comics** provides prime ammunition. "Weird sex fantasies with the behind in mind" runs the coverline to the first issue, and it doesn't lie, but neglects to mention the racist caricatures. The odd thing is, it's all such absurd nonsense, drawn by Crumb in his early-period cartoony style. As part of his canon Big Ass Comics is a trivial footnote. Kept in print since the original publication, the most recent editions were published in 1991 by Last Gasp.~WJ

BIG BANG

Caliber: *5 issues (1-4, 0) 1994-1995*

Image: *35 issues 1995-2001*

"Comics haven't been this fun for fifty years!" exclaims 1's cover, and, guardedly, one can agree. An affectionate homage to the comics of the 1940s to the 1960s, Big Bang introduces lookalike versions of archetypal heroes, mimicking all the old styles. Caliber's 1-2, the Golden Age tributes, were very successful, 3's Silver Age homage less so with the artists simply lacking the fluidity of Sekowsky and Sachs, whom they were imitating in this JLA-style salute. 4 ill-advisedly takes the heroes to modern times, with distorted anatomy and moronic dialogue, but 0 is back to the Golden Age. It apparently impressed Image's Erik Larsen sufficiently that he offered to relaunch the comic as an ongoing series adding retro versions of Image heroes such as Mighty Man to the line-up, and crossing over with mainstays such as Savage Dragon. The Image series presents a plethora of 'historical' heroes, ranging from the 1940s through to (very occasionally) the 1970s of a publishing company that never existed. The evocations are not always successful, but any comics fan of riper vintage will at least appreciate their intentions, and frequently they're very skilfully done. Jerry Acerno's Shadow Lady (16, 17, 21, 26), a Phantom Lady tribute and 'Good Girl Art' heroine, is a pleasure, and Billy Fugate rapidly became distinguished as an artist who combined a nostalgic feel with exquisite skill, especially on the delightful Mary Marvel homage, Thunder Girl. 24 and 27 are 'The Big Bang History of Comics', text & illustration works imitating Steranko's famous tomes and relating in more detail Big Bang's fictitious publishing history, a cleverly-done pastiche which may nevertheless have alienated a certain percentage of the readership as taking the gag too far. 6 reprints the rapidly-sold-out issue 3 of Caliber's series, and 35 is a rather ignominious reprinting of various Big Bang stories from other Image titles, but the rest of the series is all-new, all-old entertainment.~HS

Recommended: Series one 0-2, series two 1, 3, 4, 17, 21, 26

Red Calloway's BIG BANG

Zoo Arsonist Press: *4 issue miniseries 1995-1996*

A bleak look at the fickle, manipulative and transitory nature of fame, as the titular Red Calloway is transformed from the man who lost it all into a movie star. Paul Sharar's almost Ditkoesque world of repetition is presented in black and white, both artistically and morally, and touches on disturbing topics in portraying almost the entirety of his cast as sleazy scumbags. Four magazine size issues stretch the plot a little thin, but there's plenty to commend, particularly Sharar's art, evoking a bygone era with a contemporary perspective.~WJ

BIG BLOWN BABY

Dark Horse: *4 issues 1996*

Picking up where its appearances in Dark Horse Presents left off, this broad superhero parody from the twisted minds of Bill Wray (ideas and art) and Robert Loren Fleming (script) is the kind of comic it's easy to dismiss as juvenile and disgusting. It also happens to be rather funny, in a tasteless way. When you get used to it, Fleming's script, which at first appears over-written, begins to crack you up, especially when teamed with Wray's manic drawings. All this and jokes about Stan Lee's wig and Vinnie Colletta's death too. Told you it was tasteless.~FJ

The BIG BOOK OF...

Paradox Press: *17 volumes 1994-2000*

Paradox Press' Big Books are an important attempt to bring comics to a wider audience. Always concerned with the weird side of life, they build upon people's enjoyment of odd stories and, by concentrating on humour and packed storytelling, provide great toilet reading. "Did you know there was this guy who..." is their stock in trade; stories to tell your mates in bars and weird facts to wow your friends.

The first volume, Urban Legends, was based on the many books of cheery folklorist Jan Harold Brunvand. Writers Robert Loren Fleming and Robert Boyd Jr misguidedly tried to make each story fit a single page format, rushing many while there are simultaneously stories without punchlines that are really one-line funnies. After that the format was relaxed, as there are a limited number of subjects where a writer can come up with 300 plus good stories to fill a volume, not to mention the complexity of commissioning so many short strips! In Doug Moench's *Conspiracies* volume the stories run up to eight pages, a good idea when trying to deal with the entire Kennedy conspiracy or the history of Area 51 in one chunk. Moench does a creditable job of rounding up a very difficult subject, using a Mr A-type figure to introduce it all, but has trouble slipping enough information onto a comic book page; complex conspiracies are often not very visual and suit prose better.

Early volumes tended to rely on a different single writer/editor for each subject. Carl Posey for *Weirdos* provides an interesting selection from a very rich and diverse field of ridiculous human endeavour. Bronwyn Carlton for *Deaths* comes up with some very dull ideas like illustrated tours of famous cemeteries, but Gahan Wilson on Freaks approaches the subject with he right mix of prurience and understanding. Jonathan Vankin's *Big Book of Bad* is all over the place, featuring Roman emperors, serial killers and Vanilla Ice, taking a creative interpretation of the subject to fill the volume when so many areas have already been covered in previous volumes. *Thugs* under Joel Rose's editorship jumps from Indian Thugee, the history of which he gets hopelessly wrong, to almost exclusively concentrate on American gang leaders from 1850-1930, told in a very dry manner. Similarly the *Vice* volume has to stretch the subject to fill its pages, moving from sex and drugs to pinball machines and comics.

Disappointments include John Wagner's collection of *Martyr* stories. It's not that they're not interesting individually if you like religious excess, it's just that dozens and dozens of stories of conversion, torture and catholic weirdness become repetitive. And the book of the 1970s is like those TV programmes that fill a cheap hour with colourful clips. Except it lacks the clips and jokes so mostly your response is either "Yes, I remember pet rocks. Hmm" or "Were my parents really dumb enough to buy a pet rock?"

Some of the best volumes are those that benefit from the input of several writers. *Little Criminals* is particularly well rounded, although the name is a misnomer. In the mix of well-known criminal comedowns and obscure but interesting stories are a number of rather ept thieves, fakers and murderers. Equally well-edited is *Scandal*, which has a good range of recent and forgotten cause celebres, and approaches the subject from a number of angles, dishing the dirt on politicians, sportsmen, film stars and those famous for being famous (often as a result of being involved in a scandal, of course!) Carl Sifakis edits the volume on *Hoaxes* with a similar mixed bag of writers to help him out. The two gems of the series for putting a new slant on orthodoxy are the collection of the Grimm Brothers' fairytales and the *Weird Wild West* which both, in their way, overturn romantic received ideas. Grimm unearths the bloody, psychologically-laden originals of stories like Cinderella and Rapunzel, along with a lot of much weirder tales like Hans My Hedgehog, while *Weird Wild West* dredges up gruesome tales of cannibalism, pickled outlaws, UFOs and mad cults.

Part of the joy of reading these volumes is the wide range of artists who illustrate the tales, from mainstream to underground, old pros alongside talented newcomers. Frank Quitely rubs shoulders with Russ Heath, Drew Friedman sits next to Bryan Talbot. There's something for everybody's taste, provided it's a little twisted. Selected offerings from Paradox's successful *Big Books* have been repackaged in magazine format as *100% True*.~FJ

Recommended: *Freaks, Little Criminals, Grimm, Weird Wild West*

BIG BRUISERS

Image: *One-shot 1996*

With that title and a teaming of Badrock from Youngblood, Maul from WildC.A.T.S. and Impact from Cyberforce, you're not expecting great literature, are you? There's considerably more invention than one might imagine, though, as the trio (or quartet if you include *Savage Dragon*'s humanoid shark villain Mako) are transported to a distant planet to fulfil an ancient prophesy. If you're looking for unchallenging fun you could do far worse than pick this from the bargain boxes.~WJ

BIG DADDY DANGER

DC: *5 issues + 2002 to date*

Adam Pollina (with inking by Tyson McAdoo) delivers a lively and engaging series starring the greatest masked wrestler on Earth, who has to balance the trials of being World Champion with the role of single parent. His son, Little Danny Danger (also masked!) feels neglected by his ever busy dad, but is unaware that his father's schedule is so hectic because Big Daddy Danger is also the Free World's greatest secret agent and defender of liberty! Planned as a nine issue limited series, this is wonderful fun for all ages, with thrills and spills ranging from spy action to extra-dimensional fantasy. Buy it for the kids and read it yourself.~WW

BIG DOG FUNNIES

Rip Off: *One-shot 1992*

Collects a selection from five years' worth of utterly feeble humour one-pagers presumably produced for a newspaper. Lead character M. Littlechief Bigdog is a hippy Native American fount of philosophical aphorisms, and his meditations on life and TV, seemingly intended as satire, make one scream for all the comforts of the straight life. Creator D.M. Pitts' 'jokes' are on a level with those found on Garfield mugs. He'd probably be appalled at the comparison. Good.~WJ

BIG GAME

Antarctic: *1 issue 1999*

Master of Chinese weapons magic Sushi, and Texas Ranger Ulysses, have been granted extended life spans and now fight together against the vampires and other monsters inhabiting a near-future "Los Vegos". Creator Shannon Denton's stylised, animation-like artwork can't overcome his lifeless script and the lack of characterisation.~NF

THE BIG GUY AND RUSTY THE ROBOT

Dark Horse: *2 issue microseries 1995**

This delightful oversized comic, written by Frank Miller with beautiful artwork from Geof Darrow, is a treat for lovers of big-robot comics everywhere. The story is a mix of pure whimsy and comic genius, following the adventures of Rusty, a cute li'l two-foot high robot boy created to save Japan from the threat of big monsters. He wants nothing more than to be a success so that the army will build others like him and stop him being so lonely. But, sadly, Rusty's pretty crap as robots go and the monster kicks his butt, meaning that Japan has to take advantage of a gift from America in the form of a huge robot called the Big Guy. Big Guy sees off the monsters and, in gratitude, Japan gives him Rusty to be his kid sidekick. The Big Guy is not impressed. Will Rusty be able to prove himself worthy? Or is he really just too – sob – small? Let's just hope that Miller and Darrow continue this wonderful series so we find out either way. A real joy.~JC

Recommended: 1-2

BIG HAIR COMICS

Image: *3 issues 2000*

Andy Suriano's funnies are drawn in a retro, 1960s cartoon show style. The main features are SF cockroach Astro Bug's adventures in outer space with his sidekick Kip, and Little Polynesian Pu-Pu's rock and roll encounter with a volcano god. The shorter strips include 'Byron And His Balloon Animals', 'Little Man Jake' and his size-reduction mishaps and 'What A Dawg' where a kid reaches puberty and literally becomes a dog! The cover of 1 features the dog boy's droppings in an unwholesome landmark of sorts. Mono laughs that cry out for colour.~SW

You and Your BIG MOUTH

Starhead: *2 issues 1993*

Fantagraphics: *5 issues (3-7) 1993-1998*

Pat Moriarity's lively and characterful cartooning is largely wasted on this collection of poems, rants, recounted dreams, observational comedy and pointless anecdotes by a wide variety of scripters. They include pop singer Henry Rollins and the late nouveau beat author Charles Bukowski, and this is not excused by including strips that lament the fact and wonder what to do about it. The long strip about a ruined friendship in 5, reminiscent of Peter Bagge's work, is much better but still ends weakly.~GK

BIG NUMBERS

Mad Love: *2 issues 1990*

Big Numbers united Alan Moore and Bill Sienkiewicz, two creators at the height of their powers and popularity. Their combined clout enabled them to convince distributors that twelve issues of a square, oversize comic about seemingly unconnected events in the lives of inhabitants of a grey home counties town (not unlike Moore's native Northampton, England) was the biggest thing since *Watchmen*. Although critically acclaimed, *Big Numbers*' complexity, oblique story-telling techniques and lack of conventional 'action' left some fans of Moore's earlier mainstream work bewildered. Moore explores the mechanics of modern society through the device of a writer returning to the places and people she outgrew ten years earlier. The story is aggressively multi-cultural and plays upon our perceptions of the British class system. Of particular note is Moore's ear for dialogue and speech rhythms, which the dialogue attempts to spell out for the benefits of American readers. Sienkiewicz matches the 'kitchen sink' story-line with evocative, detailed imagery that often dissolves into pencil lines or brush strokes, emphasising the transience of the characters' existence. He puts a wealth of techniques to the service of the story, using extensive photo reference.

This ambitious series began falling apart before issue 2 was even printed, with the artist continually delaying delivery of artwork. Plans to replace Sienkiewicz with Dave McKean or Al Columbia, who at the time was drawing in a very similar style, never came to fruition, and the story remains becalmed after two tantalising, morally-pointed issues.~FJ

THE BIG O

Viz: *5 issue miniseries 2002*, 4 issue miniseries 2002*

Based on an anime series, the concept of a population whose memories have been largely wiped is introduced with minimum explanation over three pages before the action starts. Stored memories are the city's greatest treasure, and The Big O is a combat robot called on by Paradigm City's top hostage negotiator Roger Smith when events move beyond his control. There's much of Bruce Wayne about Smith, who's independently wealthy and lives in opulent surroundings, and a Japanese take on *Batman* with a giant robot thrown in is the way to view this series. There's the distinctive locale, a chief rogue who's camp personified, and artist Hitoshi Ariga has a dark, angular style. He produces original material, by the way, not just adaptations of the anime. The logic of the premise stands up to little scrutiny, but the series doesn't need that and manga fans should find plenty to enjoy here. The Viz numbering is odd, with the final issue of the first miniseries concluding in the first issue of the second, and as is common with Viz, more miniseries are planned. *The Big O* improves as it continues, so they'll be worth watching out for.~FP

Here Come the BIG PEOPLE

Event: *One-shot 1997*

Humorous tale of nerdy computer billionaire Austin Milcsop, whose best-selling programs and products are all a subconscious attempt to find himself a mother. When his new supercomputer plunders time and space to build him (and all men) one, the stage is set for societal disaster. Well drawn social comedy with disturbing overtones (all the synthetic mothers are giant-sized, young, busty, pretty and a shocking shade of pink) from Trace Beaulieu, Amanda Conner and Jimmy Palmiotti.~WW

---

* Available in a collected edition

The BIG PRIZE

Eternity: *2 issues 1988*

The peculiarly named Willis Austerlitz dreams of the gentler days of the 1930s, when, he feels, everything was somehow more decent. He's given the opportunity to live his dreams courtesy of the winning ticket in a planet-wide lottery of the future that materialises in 1988. The thin plot contrivance is forgivable in context, as the remainder of the issues compensate. Austerlitz is wearing rose-coloured glasses, of course, and discovers 1934 is not what he anticipated. Gerard Jones writes in an intriguing and wistful manner, and the art of Bryon Carson and Mike Roberts improves immensely, almost from page to page. Disappointingly, the story remains incomplete, but it is worth investigating. Jones later had another try at Innovation, this time titling the story *Timedrifter*, but this was also prematurely cancelled.~FP

A BIG SOMEPLACE

Iconographix: *2 issues 1992*

Thel's just found a new boyfriend, but her room-mate's disappeared. Then her downstairs neighbours Doc and Josephine intend to transplant Thel's bum onto Josephine. Dave Cooper's lumpy art and odd stories either appeal or they don't, with no mid-point. With this uncompleted tale the whimsy is almost all there is, and by far the best entertainment to be had is from a two page interruption in 2 about turtles Cooper has.~WJ

Colin Upton's BIG THING

Ed Varney: *1 issue 1990*
Fantagraphics: *4 issues 1991-1992*
Starhead: *1 issue 1994*
Aeon Press: *1 issue 1994*

Stop sniggering. This is an autobiographical title. There's an occasional excess of self-pity and whining about the day-to-day annoyances of life, but it's balanced by plenty of observations and telling asides that ensure each issue contains something worthwhile. In the opening issue 'Looneys' is the standout strip, contrasting the mixed feelings Upton has about a local eccentric with his own mental traumas. All too often, though, there are recollections that are obviously important to Upton, yet fail to engage the readership as intended. This is largely due to Upton's drawing style, which, while functional, is very limited and cluttered, and unable to convey the full emotional range of his stories. This is most vividly brought home in the second Fantagraphics issue, an over-extended story of the problems occurring when Upton crossed from Canada into the USA to see an art performance group. Ironically the strongest issue is 4, in which there's an angry response to hearing about *Big Thing*'s impending cancellation, 'Fuck'. It rails against superficial sweeteners in comics while bemoaning that *Big Thing*'s more intelligent content is sadly uncommercial. There's also a good selection of shorter stories, closing with a 'Famous Bus Rides' strip. A carry-over from Upton's minicomics days, there's one strip in most issues, all of them short, sharp and wry.

Bizarrely, the Starhead issue, titled *Big Black Thing*, is a response to a fake issue of *Big Thing* circulated with blank black pages. Initially despondent, Upton pasted in several of his minicomics, and a strange story about Hotxha The Albanian. The Aeon issue, officially *Aeon Focus* 2, is the strongest issue overall. There's a brutal and hard-hitting honesty transcending the still limited art with strips Upton had completed with no idea of where they'd see print. 'I'm Not Angry Anymore' is a visceral depiction of the bouts of despair and low self-esteem Upton experiences, and 'Chris' encompasses narrow-minded feminism and positive discrimination. Bleak and thought-provoking, the only page-filler is a strange humorous attempt at depicting the life of St Anthony. The Ed Varney issue and first Fantagraphics issue are magazine-sized, but the remaining issues are all in standard comic format.~FP

Recommended: Aeon Press 1

Fantastic Four: BIG TOWN

Marvel: *4 issue miniseries 2001*

This had the potential to be a great series, with writer Steve Englehart returning to form, and nice art by Mike McKone and Mark McKenna, but something went terribly wrong. It's set in a universe such as ours where super-heroes just appear in comics, but when Reed Richards and friends head off into space and come back all fantastic-upped, the universe changes and there's an explosion of superheroes and villains, mainly centred in New York, or rather, Big Town. Englehart features what seems to be variants of the entire Marvel universe. Not all the good guys are that good anymore, but Dr Doom, the Red Skull and Magneto are still rotten to the core. The major storyline focuses on The Human Torch, and it wouldn't be Englehart without a hefty portion of angst. This would have benefited immensely from some breathing space rather than being crammed into four-issues. Everything is rushed at the end, with major characters unaccounted for, and terrible bits of storytelling. It's not a disaster by any means, but there's a feeling it could have been so much more.~HY

BIGGER

Free Lunch: *One-shot 1998, 4 issue miniseries ('Will Rison and the Devil's Concubine') 1998-1999*

You've got a problem if your whole body grows every time you're aroused, and that's what happens to Will Rison after circumstances detailed in the one-shot, while his problem draws the attention of a satanic seductress in the miniseries. The whimsy of Ranma$^{1/2}$ is an obvious influence, but Matt Ryan and Allan Holcomb also bring their own ideas to the table, and display an odd coyness besides. Their teenagers are a slightly racier Archie cast, but all likeable enough, and there's an appealing simplicity throughout.~WJ

BIJOU FUNNIES

Bijou Publishing: *1 issue 1998*
Kitchen Sink: *7 issues (2-8) 1969-1973*

One of the first and best underground anthologies, edited by Skip Williamson and Jay Lynch. Both were excellent cartoonists in their own right and the comic featured Williamson's Snappy Sammy Smoot and Lynch's Nard'n'Pat in a series of skits that mixed counterculture politics, knockabout humour and surrealism to great effect. Other artists included Robert Crumb, Justin Green and Art Spiegelman, making *Bijou* an essential buy. The final issue was an all-colour *Mad*-style spoof, which featured almost all the main underground artists drawing each other's characters and is a big favourite among some collectors despite lacking the bite of the previous seven. Two collections present a selection of material from the comics.~DAR

Recommended: 1-8

BILL & TED'S Excellent Comic Book

Marvel: *One-shot, 12 issues 1991-1992*

Magnificent, although anyone who's not a fan of the *Bill & Ted* films should stay away. Writer and artist Even Dorkin populates the comic with all the characters from both films and more, consistently delivering hilarity based on the dumb characters. As with the films, the plots are thin, but Dorkin packs a full complement of silly jokes in, and, this being a comic, there's the added bonus of all sorts of visual asides. He doesn't skimp on his backgrounds either, so pity poor inkers Stephen DeStefano (1-3) and Marie Severin (4-12) having to ink page after page of crowd scenes. There's Bill and Ted's wedding party in 1, while 4 introduces Fight Man, later to star in his own one-shot, and in 10 Bill and Ted enter his world. It's obvious Dorkin's favourite cast member is Death, who is

humiliated in assorted hilarious ways each issue, with 9 being the best as Death has to find a job to pay his rent and is replaced by Death Jnr. In 2 he goes on vacation with most egregious consequences, and the funniest issue is 11. Bill and Ted discover their friend Abraham Lincoln is to be assassinated and vow to prevent his death. Prior to the series Dorkin produced the comic adaptation of *Bill & Ted's Bogus Journey*, which, as the cover promises, is most excellent. Be warned, though, to stay well clear of issue 8, produced by altogether heinous and non-righteous less talented individuals, dude.~FP
Recommended: 2, 5-7, 9-11, *Bill & Ted's Bogus Journey*

BILL THE CLOWN

Slave Labor: *One-shot 1992, one-shot ('Comedy Isn't Pretty') 1992, one-shot ('Death & Clown White') 1993*

Poor old Bill, the time of the clown is past. He's yesterday's unsophisticated laughter maker without a future ahead. His refuge is violence. This is a satire on the testosterone breed of anti-heroes populating comics, drawn in appropriate Lobo style by Troy Nixey from Dan Vado scripts. It just about works the first time, but is already played out by the second attempt. There's plenty of worse comics to buy, but there's plenty better as well.~WJ

Harry Harrison's BILL THE GALACTIC HERO

Topps: *3 issue miniseries 1994*

BILLI 99

Dark Horse: *4 issue miniseries 1991**

In the year 1999 America is falling apart; police forces need corporate funds to fight crime; there's mass unemployment. Billi's father, a cross between Batman and Zorro, is killed and she is framed by her uncle, who's a serial killer. Billi runs her father's company but can't inherit until she's cleared of his murder. Only her Mob boyfriend and a rogue honest cop can help her. *Billi 99* is a rather grim political thriller written by Sarah Byam and drawn by Tim Sale. It's one of Sale's earliest published works and the first issue shows some rough edges. By the end of the series, however, his confident, European style has firmly established the pessimistic tone of Byam's story. The politics sit a little uneasily with the favourable portrayal of organised crime, but overall the script is intelligent, with strong characterisation driving the story along.~NF

BILLY BOY the Sick Little Fat Kid

Asylum Press: *2 issues 2001*

With stories about a voodoo charm, death in the swamp and mischief with a slingshot and a teddy bear (until interrupted by a neighbour with a shotgun), there's a raw cartoon energy, in a simple-minded, ugly protagonist. Self-indulgent nihilism.~NF

BILLY COLE

Cult Press: *4 issue miniseries 1994*

A metaphorical strip about a newly-born baby who decides to rid the world of evil, whatever that might be! The city he wanders is overrun with brain-eating zombies in the factory, the church, even in the boxing ring. Ted Seko's stark artwork is often just functional and occasionally unclear, but the extreme, cast shadow style is in keeping with the tone of the story. This is not unentertaining, and had potential to be a genuinely didactic comic if only the pages were more lucid.~SW

BILLY NGUYEN, Private Eye

O'Leary's Books/Attitude Zone: *1 issue 1988*
Attitude Zone: *2 issues (2-3) 1988*
Caliber: *1 issue 1990*

In a divergent reality, smart-mouthed private detective, Billy Nguyen, and his friends, skate-punk Beep, gay muscleman, Tiger and police lieutenant, Amadeus Jones, tangle with a pair of scientists, Dr Delacroix and Dr Crowder. They're competing for a computer chip, and cause Billy some problems with a giant slug (1-2). 3 concerns the walking dead in the K-Marche store, and in the Caliber issue, Dr Delacroix returns for revenge. John Hartman and Stanley Shaw's strip is full of madcap adventure, post-modern, cynical dialogue and is visually inventive, though the pages can look over-full.~NF

BILLY RAY CYRUS

Marvel Music: *One-shot 1995*

This all-surpassingly strangely conceived work is by "King Of The Comic Book Writers" Paul S. Newman and long-time *Flash Gordon* artist Dan Barry. The bemulleted but otherwise wholesome Achy-Breaky Heartster takes young fans on what may be time travel trips, firstly to US frontier wars days, giving them all a chance to wear Davy Crockett hats which resemble Billy Ray's hair, and to do battle with a bunch of theme-holidaying Native American lawyers who eat a Chinese takeaway meal, and then, via I. M. Merlin's Mystic gas station, to mediaeval England. There they must battle a geyser which Edward I has mistaken for a dragon. And Cyrus' PR is called Lotta Flack. Go long on this soon to be hot title before Twist-crazy Neutro fans scoop the lot.~GK

BILLY THE KID

Charlton: *145 issues 1957-1983*

Incredibly long-lived and archetypal 'B' western series featuring the cousin of the infamous outlaw riding the range righting wrongs to atone for the shame heaped upon the name of Bonney, although changing a name seems less trouble than shooting every owlhoot in the West. Most of the time nobody cares anyway as the baby-faced gunfighter goes through all the cowboy set pieces. Some, though, are magnificently done, with the likes of Al Williamson, Angelo Torres, Dick Giordano, José Delbo and especially John Severin producing beautiful looking stories from mediocre scripts. Mike Kaluta fans might want to see 85, as it features his early comics work.~WW

BINKY

DC: *82 issues 1948-1958 (1-60), 1968-1971 (61-81), 1977 (82)*

An imitation of Archie, Binky's teenage adventures ran for a decade, even more innocuous and dated to the contemporary eye than their inspiration, particularly the bizarre Lord Fauntleroy outfit affected by his kid brother Allergy. Revived following a successful try-out in *Showcase* 70 in 1967, a new, 'groovy' version had limited success – spawning a spin-off title, Binky's Buddies, which ran for twelve issues in 1969/1970 – but couldn't crack the Archie monopoly long-term. For no known reason, issue 82 unexpectedly dribbled out in 1977, six years after the title's cancellation.~HS

BINKY BROWN Meets the Holy VIRGIN MARY

Last Gasp: *One-shot 1972*

Justin Green's *Binky Brown* single-handedly invented the autobiographical comic, and it remains to this day one of the finest strips ever drawn. It's a frenzied tale of Catholic and sexual guilt that keeps the reader riveted to the page in admiration and sometimes disbelief. Some may find the art initially crude, but it's perfectly suited to the story. Quite possibly the finest comic ever made, and reissued in book form by Kitchen Sink as *The Binky Brown Sampler*.~DAR
Recommended

BIO-BOOSTER ARMOUR GUYVER

Viz: *12 issue limited series ('Part One') 1993-1994*, 6 issue miniseries ('Part Two') 1994-1995*, 7 issue limited series ('Part Three') 1995*, 6 issue miniseries ('Part Four') 1995-1996*, 7 issue limited series ('Part Five') 1996*, 6 issue miniseries ('Part Six') 1996-1997**

Written and drawn by Yoshiki Takaya, this is a lengthy slice of unremarkable manga similar to hundreds of other Japanese strips. High school student Sho is possessed by The Guyver, an alien lifeform that turns our hero into an armoured superhero, with 'Guyver' meaning "beyond the norm", incidentally. Sho soon finds himself in conflict with the secret organisation that developed the Guyver technology, eager to reclaim their deadly biological weapon. The art credited to Takaya is obviously the work of several artists of varying ability. The story ends on a cliffhanger, but we're told in a bit of text on the last page that "With this volume, *Bio-Booster Armor Guyver* goes on hiatus indefinitely" – cheers lads! Despite an appeal only to the most undemanding of manga enthusiasts, it led to an animated series and even a 1992 movie starring Mark Hamill.~AL

THE BIOLOGIC SHOW

Fantagraphics: *2 issues (0-1) 1994-1995*

BIONIC WOMAN

Charlton: *5 issues 1977-1978*

With Charlton already producing a *Six Million Dollar Man* comic and black and white magazine, a comic starring the TV series' spin-off *The Bionic Woman* was inevitable. The counter-espionage adventures of Jamie Summers, a beautiful woman with a mechanically enhanced body, may have had some potential in another publisher's hands. Sadly, there is nothing to recommend Charlton's attempt, from the production standards right down to the awful artwork and scripts. Use bionic force of will to avoid this comic.~SW

BIONICLE

DC: *10 issues + 2001 to date*

Lego's *Bionicle* toys are fantastic creations and good value for money. DC's *Bionicle* comics are very poor creations and astoundingly poor value for money at twelve story pages for $2.25. Worse still, they make little sense in isolation, needing the reader to log on to the *Bionicle* website for updates and continuations. Despite all the disadvantages the art team of Carlos D'Anda and Randy Elliott (with Richard Bennett inking 1) provide all the detail fans will want, but the lack of story is woeful.~WJ

BIPOLAR

Five O'Clock Shadow: *2 issues 2001*

Alternative Comics: *1 issue + (3) 2001 to date*

The efforts of twin Israeli artists Assaf and Tomer Hanuka press those same squishy nerves accessed by Dan Clowes. The work of Tomer particularly presents a disturbing world with sometimes surreal occurrences amid very familiar surroundings. His loose, scratchy and jagged art heightens the unease of fracturing relationships and lonely children, and violence and isolation are common themes. Where the strips are deficient is in structural terms, with fragmented, obscure storytelling, elusive purpose and often a lack of resolution. This is brought into focus by the work of Assaf, who is adapting a story by Hebrew author Etgar Keret, one chapter per issue. This is a tremendous piece incorporating all the unsettling aspects of Tomer's work along with a strong narrative. Frustrated at his unreciprocated love Mordy commits suicide, awakening in a world much like our own populated by others who've killed themselves, many bearing the scars of their death. Assaf's art and storytelling is very traditional, and he's excellent at conveying emotion and in constructing a distinct and recognisable identity for his cast. Both creators are producing high quality work deserving a wider audience.~FP

Recommended: 1-3

THE BIRD

Bananland Arts: *1 issue 1996*

Larry Welz harbours quite a few grudges and deals with them vicariously here by having a clown with a big hammer and a talking bird go around murdering people. It's nicely drawn, but let's hope this exorcism meant Welz returned to readable material.~FP

BIRDLAND

Eros: *3 issue miniseries 1991, one-shot 1994*

Gilbert Hernandez here abandons the sublimated eroticism of his more 'respectable' comic strips for an orgy of unfettered hardcore filth that takes in just about every sexual kink and combination. Along with a great many graphic sex scenes you also get a needlessly convoluted plot about two strippers, Bang Bang and Inez, and their many friends, enemies and lovers, including a female psychiatrist and a group of mysterious, sexually curious aliens. The second volume of the comic is an almost entirely wordless time travel fantasy that fully exploits Hernandez's talent for drawing pneumatic female heroines and their horse-hung but hapless studs. A photo in 2 shows Hernandez standing next to *Supervixens* director Russ Meyer, and *Birdland* can perhaps be best appreciated as an enthusiastic tribute to the unabashed, polymorphous perversity of classic American porno cinema. At the very least, the sheer glee with which Hernandez approaches his task certainly 'rubs off' on the reader.~AL

BIRDS OF PREY

DC: *One-shot 1996 (Black Canary/Oracle: 'Birds of Prey'), 4 issue miniseries ('Manhunt') 1996, one-shot ('Revolution') 1997, one-shot ('Wolves') 1997, one-shot ('Batgirl') 1998, 50 issues + 1999 to date*

Since being crippled, Barbara Gordon, the former Batgirl, is forced to fight evil by proxy. Using her computer skills, photographic memory and contact network she develops the persona of Oracle, supplying information to support other heroes. Enlisting the unemployed Black Canary for a one-off case, she senses a rapport between them and the two form a friendship and partnership despite never meeting face to face. The first one-shot is sleek, stylish and gorgeously illustrated by Gary Frank, and sharply written by Chuck Dixon, reading like a superior action movie with a brain behind it. It was a surprise success, and DC decided to keep the team going in a series of miniseries and specials under the umbrella title, *Birds of Prey*. The first teams the Black Canary – and, unwittingly, Oracle – with rogue vigilante Huntress and bad girl Catwoman, when the latter two and the Canary discover something unexpected in common: they've all been screwed – fiscally, or... otherwise – by the same man, and are hot for revenge. It's Thelma and Louise with spandex, as the girls go on the road, and across the world, to get their own back. Slick, fast, punchy, and the relationship between the travellers is handled with humour and sympathy by writer Chuck Dixon. Matt Haley turns in gorgeous art, and the deadline-crunching addition of Sal Buscema in 4 works surprisingly well.

'Revolution' concerns slavery in the "island paradise" of Santa Prisca, and is set before the events of 'Manhunt', and 'Wolves' sees our heroines having problems with disastrous relationships. These were followed by 'Batgirl' teasing about Oracle regaining the power of movement, after which the ongoing series started in bravura form when Dinah gets embroiled with one of Barbara's old flames on an undercover mission. Artist Greg Land, who took over with the 'Batgirl' one-shot, turns in beautiful work, and the balance between action and emotion is skilfully maintained by Dixon, especially in 8, guest-starring Nightwing, and featuring major progress in his and Oracle's partnership which finally gave fans what they'd wanted for years. After 'Manhunt' the stories reverted to two-handers between Babs and Dinah, though Catwoman did rejoin for the fun 'Apokolips Express' (14-15). Unfortunately, Greg Land departed after 15 to be

replaced by Butch Guice. Guice tried his hardest, particularly in 16, featuring the Joker and the identity of Oracle's first partner, but his work just wasn't up to the demands of a strip that required subtlety of facial expressions and body language. Whether Dixon lost interest or stopped trying remains a matter of conjecture, but the title rapidly lost focus. It reached its lowest point in 33-35, in which the Black Canary romances a major foe of Batman's without having a bleeding clue about his identity until it's too late, a plot insulting to the character. One oasis among the mediocrity was 42, in which the secret of Oracle and Power Girl's relationship was disclosed. Despite damned peculiar Glenn Fabry art, it was a strong, intelligent issue that reflected some of the series' original integrity. Terry Moore wrote 47-49, joined by Amanda Conner as illustrator, for a fun, fast moving yet poignant story involving a young woman with the power to heal devastating medical conditions. From 50 Gilbert Hernandez writes, and DC's plans are to continue the series with various creative teams. In view of the short-lived TV show, which has given *Birds of Prey* a higher public profile, it appears the ladies will be breaking hearts and faces for some time to come.~HS
Recommended: 'Birds of Prey', 'Manhunt' 1-4, 'Wolves', 'Batgirl', 1-15

THE BIRTH CAUL

Eddie Campbell Comics: *One-shot 1999.*

The Birth Caul was originally a multimedia performance staged by Alan Moore and friends in 1995, and here Eddie Campbell transformed the text into a comic format. The story's subtitle, 'A Shamanism of Childhood', probably comes closest to describing this extraordinary comic in which Moore traces his life from the death of his mother backwards through work, school, infancy, birth and beyond. Moore's writing is by turns meditative, touching, flowery, oblique and poetic, and while not all of it works, there are moments of real beauty. Campbell's drawing is consistently inventive and serves as a welcome anchor in some of the strip's more ethereal passages. For those looking for a genuinely mature comic that will reward repeated readings, *The Birth Caul* will be a satisfyingly demanding read.~DAR
Recommended

BIRTH RITE: Chapter One

Congress Press: *2 issues 1989-1990*

A policeman, undercover as a down-and-out, is murdered by two men, who may be members of a criminal organisation, dedicated to cleaning up the city. Experimental (not always in a good sense), both in storytelling and artwork (photographs, pencils, paints), this might have made sense eventually.~NF

THE BIRTHDAY BOY

Beetlebomb: *4 issue miniseries 1997-1998**

When nine year old Hugo wishes it could be his birthday every day the circumstances are exactly right, and his wish is granted. Cosmic balance, though, demands that for this to occur someone else is not born. Jason Lethcoe weaves in a possible invasion from the moon, Larry Stooge, giant robots, pez dispensers and a creature very much resembling the Foozle. It's one long shaggy dog story, plotted, it would seem, on the hoof. It displays some good cartooning, but not as many laughs as intended, and any charm expires before the end.~FP

BISHOP

Marvel: *4 issue miniseries 1994-1995, 3 issue miniseries ('Xavier Security Enforcer') 1998, 16 issues 1999-2001*

In one of the *X-Men*'s periodic *Terminator* riffs (you know, people travelling back from the future in order to save/change it), Bishop was introduced, and remained in the present with our mutant heroes. At first apparently possessed of no other power than the really big gun beloved of 1990s heroes, it emerges that he's an energy-channeller, absorbing and redirecting forces used against him. His first series pits him against an old enemy from his own time, in a pedestrian slugfest enlivened only by Terry Dodson's attractive art. The second series, set in Bishop's past of the future – bear with me – is a look at his relationship with his XSE team, including his sister Shard, and the conspiracies that they faced; very competently done, written by John Ostrander with art by Steve Epting, but completely inconsequential. The emotions aroused are not so much "What If?" as "So What?" The ongoing series was written by Joseph Harris with Georges Jeanty art, and begins with Bishop leaving the X-Men to seek out his old enemy, Trevor Fitzroy, former colleague from the XSE, and put paid to him. He briefly reunites with his sister, now a photonic-based lifeform, before Chronomancer's troops transport him into a dystopic future similar to the one he originated in, but surrounded by unfamiliar faces, some of whom may be old friends in new guises. Basically, *Mad Max* with mutant powers. Wolverine and Storm guest-star in 8, but it's all very by-the-numbers, and the removal of Bishop from the present day also removes any impetus for the readers to care, as whatever happens in the series doesn't 'count', and the audience has no emotional investment in the events or players. Eventually, Marvel grasped this, and after the 'Chronowar' segment of 12-14, Bishop returned to the present just in time for two crossovers before being shuffled off with indecent haste. He returns in X-Treme X-Men.~HS

BITCH IN HEAT

Eros: *14 issues + 1997 to date*

Erotic vignettes, usually three or four to an issue, illustrated by Italian creator Giovanna Casotto in a gorgeously realistic style, using grey wash inks. There's not much plot, and a certain repetitious quality, but the stories credited to D. Cajelli usually display a modicum more wit. Despite the provocative title and although explicit, by and large these are the type of stories that can be shared with a partner rather than hidden in the back of the cupboard.~FP

BIZARRE ADVENTURES

Marvel: *10 issues (25-34) 1981-1983*

The title *Bizarre Adventures*, to encompass more than one lead feature in *Marvel Preview* 20 and 23, must have boosted sales considerably, because it switched to that title with 25. The magazine format remains the same, though, with more adult-oriented stories and concepts in black and white, largely offering solo slots that wouldn't fit elsewhere in the Marvel line. Consistently good cover paintings entice for often average interior material. The best story of the run is Walt Simonson's adaptation of *The Lawnmower Man* in 29, a glorious bacchanalian celebration of excess worth the cost of the issue alone, although the other features disappoint. John Bolton's art on *Kull* in 26 is magnificent and overcomes a standard sword-and-sorcery story, and he's back in the otherwise meagre 32. *X-Men* fans might want to look out 27, with serviceable solos for Iceman and Nightcrawler and a daft Phoenix story, and 28's list of talent includes Frank Miller, Neal Adams and Michael Golden, none of them at their best. Miller's on far better form in 31, the best overall issue in the run. Seemingly cobbled together from inventory material with the theme of violence applied as an afterthought, the sheer contrast and variety works. Miller's followed by the over the top cartooning of Larry Hama before the styling of Bill Sienkiewicz, and there's also the solid old-fashioned art of Herb Trimpe, the disturbing Steve Bissette, and the excellent Mark Armstrong. The horror theme in 33 never gels, nor does 34's Christmas issue, also published in a standard colour comic format.~WJ

BIZARRE FANTASY

Flashback Comics: *1 issue 1995*

The most bizarre aspect of this is why anyone would want to publish pretty straight copies of 1950s Marvel monster stories, and then not do them as well.~FP

---

*Available in a collected edition

BIZARRE SEX

Kitchen Sink: *10 issues 1972-1982*

Bizarre Sex more than lives up to its name – animals, aliens, robots, they all got 'em off and got it on in Kitchen Sink's ground-breaking underground anthology. Right until the end it retained a homemade quality that was by turns annoying and appealing. A typical issue mixed goofy comic strips drawn in cartoony styles with po-faced drama featuring stiff-figured, over-inked artwork. Issue 9 featured a full-length *Omaha the Cat Dancer* story, far and away the most sophisticated strip in the entire run. There's also a short follow-up tale in 10, with the story continued in *Omaha The Cat Dancer* 1. The only other work of note is Howard Cruse's Barefootz.~FJ

BLAB!

Monte Comix: *2 issues 1986-1987*
Kitchen Sink: *6 issues (3-8) 1988-1995*
Fantagraphics: *5 issues + (9-13) 1997 to date*

Blab! began as a professionally produced EC fanzine from Monte Beauchamp. The comic content is restricted to reprinted panels in 1 and four pages apiece by Dan Clowes and Kim Deitch in 2. The remainder of these paperback-sized publications is devoted to assorted comic creators recounting their memories of EC comics, and an interview concerning the influential *Mars Attacks* bubblegum cards. In 2 there's also assorted illustrations of Wolverton-style deformed humans by XNO. Both are excellent reading and were reprinted by Kitchen Sink, who instituted a squarebound package. Increased comic content was the order of the day, with strips by Richard Sala, Clowes and Spain along with Deitch and Joe Coleman illustrating text pieces, and a recollection section on the 1960s undergrounds. The comic content increased again in 4 (Clowes, Sala, Spain alongside Doug Allen, Drew Friedman, Jay Lynch and Gary Whitney, and Skip Williamson) and 5 (the same line-up, but replacing Lynch and Whitney with Lloyd Dangle).

With 6 the comics have all but edged out the features and interviews. Gary Lieb, Mary Fleener and Frank Stack join the regulars, and it's Stack who single-handedly raises the quality threshold of *Blab!*'s comics quota. Whereas almost all previous contributors seem to have seen *Blab!* as a home for dashed-off shorts or hollow whimsy (with the possible exception of Sala, who produces nothing but), Stack takes the infrequent publication schedule to produce noteworthy material. All his strips have a historical context, with the best in 7 concerning Shakespeare's deliberations about being asked by King James to postpone writing plays until he's rewritten the Bible. Other noteworthy material in 7 comes from Mary Fleener, Terry LaBan and the startling Chris Ware's Jimmy Corrigan, under an excellent Clowes cover that bears close examination.

From 8 *Blab!* is a squarebound 10" x 10" package with colour sections, 8's turned over to the brilliantly depressing Ware and Peter Kuper, who's ever-present thereafter. There's another excellent Frank Stack strip, this time about the excesses of Caravaggio, with several Drew Friedman illustrations and accompanying interview, and it's nice to see publisher Denis Kitchen drawing once again. With 9 most regulars are jettisoned and *Blab!* begins a distressing slide into vacuous mediocrity as it courts the fine art world. Beauchamp prioritises design, seemingly unable to distinguish genuine visionary talent from the King's new clothes, and the pages are filled with woeful collages (including Mark Mothersbaugh in 12) and brightly coloured strips whose only comment is on the gullibility of the editor. Even the formerly reliable Friedman disappoints, and not because he's relinquished his heavily-stippled style. Oddly, in the face of this, some portfolios display remarkable work, with Boris Artzybasheff (9), the Krampus (11, 12) and Beauchamp's compilation of odd catalogue ads (13) all compelling. The more worthwhile material includes Blanquet's shadow strips (11, 12), Sue Coe's horrific tale of a doomed cattle cargo ship (13), Tony Fitzpatrick's bizarre 'Dirty Boulevard' (9), Kuper, Archer Prewitt in 9 and 10, Spain's reflections on his 1950s youth (9-13) and Catholicism (11), and Chris Ware in 9 and 10. A compilation is due from Chronicle Books in 2003.~FP

BLACK & WHITE

Image: *3 issue miniseries 1994, one-shot 1996*

A cross between superheroics and James Bond-style adventures, *Black & White* is the story of Whitney Samsung and Reed Blackett, hired to defend Whitney and thereafter cast into the role of bodyguard/guardian as she refuses to listen to reason and throws herself headlong into trouble. She's seeking vengeance against the company that killed her father. Creators Art and Pamela Thibert produce competent scripts, while Art Thibert's drawing is better than average, with some attention to detail. However, the series didn't catch on and was never finished, despite an attempt to relaunch it in 1996.~NF

BLACK & WHITE

Viz: *5 issue miniseries 1999**

Thought-provoking conclusion to the story part-serialised in *Pulp* (the previous episodes are reprinted in two volumes). Black and White are street urchins whose anarchic lives in Treasure Town encompass street wars, the Yakuza, police and aliens. This is an at-times surreal exploration of the psyche and the universal questions of good versus evil. The highly stylised story and artwork of Taiyo Matsumoto owes a lot to the European comics tradition whilst the overall effect is of trying to pull meaning out of a dream.~NF

BLACK AXE

Marvel UK: *7 issues 1993*

10,000-year-old assassin Black Axe is revived in modern-day Japan, where he uses his big black axe against ninjas, giant robots, Japanese Marvel hero Sunfire and fellow Marvel UK hero Death's Head 2. The idiosyncratic artwork of Ed Perryman may be something of an acquired taste, but it remains the most distinctive thing about this otherwise uninvolving series.~AL

BLACK CANARY

DC: *4 issue miniseries 1991-1992, 12 issues 1993*

After years of neglect and misrepresentation in *Green Arrow*, Dinah Lance, the Black Canary, was given a try-out miniseries. No one seems to have been more surprised at its success than DC, who'd been content with her third-class citizenship. Nevertheless, a tough, uncompromising script from Sarah Byam and striking visuals by the team of Trevor Von Eeden and Dick Giordano produced the sleeper hit of 1992. Without Giordano's sharp ink line on the regular series Von Eeden's art was too often blurred and confusing. Too many panels require squinting to figure what was going on. Although Byam's scripts remained thoughtful and interesting, too many social and political issues were brought forward too rapidly and a disastrous misjudgement was made when Black Canary ditched her traditional hell's-angel-cum-cocktail-waitress look for a 1990s punk outfit of cropped hair, boots, fishnets, a basque and a leather jacket. Contrary to editorial expectations this didn't make her look 'street', it just seemed she'd omitted an entire layer of clothing. This is the single action that probably ended Black Canary's solo flight. A pity, because until the rather schlocky final issue the stories remained strong. A hardcover Archive Edition collects her solo appearances from the 1940s to the 1980s, mostly drawn by Alex Toth, after which Black Canary was next seen in *Birds of Prey*.~HS

Recommended: Miniseries 1-4

BLACK CANDY

Black Eye: *One-shot 1998*

Matt Madden's debut is notable more for the promise of a blossoming talent than anything else. Carl drifts through life largely without participating, dedicated only to his regular sperm donations. At the clinic he's given pills that he takes without knowing their purpose or considering the consequences. Inevitably, circumstances eventually force Carl to make an important decision. Madden's writing and art is very naturalistic, and the story involves several potentially interesting dramas, but Madden never quite pulls them together, so the conclusion just induces a shrug of the shoulders.~FP

BLACK CAT

Harvey: *65 issues 1946-1958 (1-62), 1962-1963 (63-65)*
Recollections/Lorne Harvey: *10 issues 1988-1992, One-shot 1995*

"Linda Turner, Hollywood Star and America's Sweetheart, becomes bored with her ultra-sophisticated life of movie make-believe and takes to crime-fighting in her most dramatic role of all as...The Black Cat!" Phew. This blurb ran in most 1940s stories of our eponymous heroine, and aptly evokes the breathless pace of the series. A successful alumna of Harvey's *Speed Comics* anthology, the Cat was drawn by Joe Kubert in her first two issues, after which Lee Elias took over, and made the Cat a sophisticated Hollywood lady, as opposed to Kubert's busty virago. One of the few heroines of the 1940s who didn't start her career as a sidekick or a team member, the Cat was popular with both male and female readers. The girls liked the Hollywood setting, the cool toughness of the heroine, and Elias' carefully detailed clothing and fashions, while the boys liked the action scenes, and the way the Cat fitted into her low-cut satin costume.

By 1951's issue 30, things were changing, and that was the last we saw of the Cat for a while, as the title switched to horror and mystery stories, several among the most gruesome recorded in comics. Most of the stories, though derivative of the EC twist-ending formula, were beautifully illustrated, with Mort Meskin, Howard Nostrand, Bob Powell and equally gifted artists taking the helm. The Cat came back for issues 54-56, inventory material pulled in to keep the magazine regular while Harvey rewrote and redrew stories in the wake of the Comics Code Authority and their new standards, which must have puzzled the hell out of regular readers. Jack Kirby contributed some really off-the-wall work for issues 58-60, but, faced with declining sales, Harvey folded the title in 1958.

In the wake of the superheroic revival, 63-65 were published as reprint compilations of the Black Cat, in the hope that she'd catch on. Sadly, it didn't take, but the character was affectionately remembered, and was the subject of two later revivals. The first, entitled *The Original Black Cat* to distinguish her from Marvel's impostor, reprinted the Elias work (with Kubert in 3-4) with occasional new covers. The 1995 revival, dubbed *Alfred Harvey's Black Cat*, featured a new short story by Mark Evanier and Murphy Anderson in which an actress and stuntwoman, working on a biopic of the original Black Cat, finds herself recast as the heroine in life as well as on film. More Lee Elias reprints and some inferior new material filled out the issue. The announced second issue was never published, but is available online at www.blackcatcomics.com.~HS

Felicia Hardy, the BLACK CAT

Marvel: *4 issue miniseries 1994*

Marvel's imitation Black Cat, a former lover of Spider-Man, flies solo in what was promised in advance solicitations as a light-hearted, fun series. What emerged was a leaden, plodding battle with cyborgs, so one can only assume plans were altered. A scond miniseries is emerging at treacle-like pace, and is covered as a Spider-Man Miniseries enrty.~HS

BLACK CONDOR

DC: *12 issues 1992-1993*

A Native American develops the power of flight as the result of strange experiments, and is reluctantly drawn into the heroic life, guided, or haunted, by what appears to be the ghost of the 1940s Black Condor. Nice artwork by Rags Morales doesn't compensate for wilfully obtuse scripting.~HS

BLACK CROSS Special

Dark Horse: *One-shot 1988, one-shot ('Dirty Work') 1997*

The 1988 Special collects the first two episodes of Chris Warner's series originally published in *Dark Horse Presents* 1 and 3, and includes a new prequel establishing the background of the death squad from which Black Cross rebels. 'Dirty Work' has a more complex storyline as Black Cross seeks to prove himself trustworthy to a female gang leader. Set in a near-future totalitarian America, this is very much the comics equivalent of a spaghetti Western. Warner's script doesn't offer any surprises but his detailed artwork is effective whether in back and white or colour ('Dirty Work').~NF

BLACK DIAMOND

AC: *5 issues 1983-1984*

The lead character is a female James Bond fighting the hoards of QUANSA. The comic's based on a projected B movie to be followed by a projected TV series starring Sybil Danning. Needless to say, neither materialised. The back-up strip features Colt, Weapons Mistress, and might be of marginally more interest to fans of *FemForce*. The Paul Gulacy covers and pin-ups are the best thing about the title since neither strip really manages to rise above its fannish origins.~NF

Morningstar Book One: BLACK DOG

Trident: *1 issue 1990*

Better-than-average fantasy story written and drawn in his distinctive blocky style by Nige Kitching, with the last eight pages inked by Nigel Dobbyn. Kitching takes a traditional British legend (of ghostly black dogs which appear near water, harbingers of doom) and brings it up to date for his magical hero Morningstar to fight.~FJ

BLACK DOGS

Fantagraphics: *One-shot 1993*

Ho Che Anderson's response to the 1993 Los Angeles riots is a confused and fence-sitting tale detailing an ongoing discussion between a black couple as to the merits of the action filtered through the thoughts of black leaders. Part polemic, part soap opera, it's an uneasy mix. Anderson's art is well worth a glance if you're unfamiliar, but at a miserly fourteen pages plus promo material, this isn't the place.~WJ

THE BLACK DRAGON

Epic: *6 issue miniseries 1985**

Chris Claremont is to be commended for taking a risk at the peak of his popularity as X-Men writer to pen this tale of 12th-century sorcery, although there's places where it creaks under his excess verbiage. *The Black Dragon* doesn't succeed as the classical tragedy it appears to be intended as, with Claremont's aptitude for characterisation all but deserting him, but it's never predictable and there's enough action to keep the pages turning. John Bolton, though, is on stunning form, with his art looking far better in the later black and white collected edition than in the muddy original colour comics.~FP

BLACK FLAG

Image/Extreme: *1 issue 1994*
Maximum Press: *5 issues (0-4) 1994-1995*

Dan Fraga's Black Flag is a hi-tech vigilante team consisting of Spot, Guerilla, Sniper, Geisha and Raiden, a genius child, a talking gorilla, a muscular hero, a beautiful woman and a master of the mystic arts. The only thing that really ties them all together is violence. Not worth getting out of bed for.~NF

BLACK GOLIATH

Marvel: *5 issues 1976*

A miniseries before such things were conceived. Stark technician Bill Foster taking a serum to become giant-sized seemed a good bet in a boom period. It was duff throughout, though. Come a recession this patronising title was cancelled, and Bill joined The Champions with White Angel, White Black Widow, White Hercules, White Iceman and Pallid Skeletal With A Fiery Halo Ghost Rider.~FP

---

* Available in a collected edition

BLACK HEART BILLY

Slave Labor: *2 issues 2000**

Rick Remender and Kieron Dwyer concoct adult only tales of a skate boarding punk waster whose skull has been replaced with a robot head. Rude, crude with a bad attitude, this is a real forbidden pleasure. The AiT published collection also includes material for a never previously seen third issue.~WW

Recommended: 1-2

BLACK HOLE

Kitchen Sink: *4 issues 1995-1997*
Fantagraphics: *6 issues + (5-10) 1998 to date*

Charles Burns is not currently bettered at presenting, deep, disconcerting fantasy, wrapped in simple thick-lined art. *Black Hole* is his longest project, planned for thirteen issues, the spur to the story being a disturbing sexually transmitted virus. It causes irreversible mutation, ranging from lesser afflictions like webbed fingers to full-blown plague-of-boils deformity. Burns combines the horrors of the virus with the nightmares of 1970s high school social interaction to weave an unsettling story. The analogy is obvious, but by fusing it to the past it provides an innocence, and eventually for all the horror of the mutated teens resorting to life in a hidden community in the woods, there's even more horror in the manner in which those not afflicted are easily able to ignore them. It might be said that content is slim and price is high, but the mood of the story requires a leisurely pace. Confusingly, the Kitchen Sink issues aren't numbered on the cover, so those wanting to start should look for the cover illustration of shed human skin with a gaping hole in the chest.~FP

Recommended: 1-10

BLACK HOOD

Red Circle: *3 issues 1983*

Since his 1960s incarnation mincing about and cracking wise in the pages of *Mighty Comics Presents*, the Black Hood had been partially rehabilitated by Neal Adams, Al McWilliams and Gray Morrow-illustrated stories in the otherwise reprint *Archie Superhero Comics Digest Magazine*. The digest introduces policeman Kip Burland as a less flamboyant Black Hood, with the hood the only concession to crimefighting costume. Riding a motorcycle modified by fellow hero The Comet, Burland stars in a series of atmospheric short stories drawn by excellent old-school artists like Pat Boyette, Gray Morrow, Dan Spiegle and Doug Wildey. Alex Toth draws three excellent covers, and illustrates 2 and 3's back-up strips starring The Fox. It's not his best art, but there's little Toth that's poor. All in all an unpretentious and extremely well drawn series worth investigating.~WJ

Recommended: 1-3

The BLACK HOOD

DC/!mpact: *12 issues, 1 Annual 1991-1992*

As with other former Archie superheroes, there's an inventive !mpact twist on Black Hood: the hood empowers the wearer. The first issue is a Punisher-style parody at the end of which the character (who is introduced only after several guest appearances in other titles, in which he met all the other !mpact characters) is slain. The story really begins in 2 as 17-year-old Nate Cray inherits the distinctive hood. It enables him to become an athletic hero, but he's unsure why. Mark Wheatley and Rick Burchett (usually) weave an appealing story, and that the title is consciously aimed at younger readers matters not a jot. Cray is later the focal point for *Crucible*, tying up the !mpact line.~FP

BLACK JACK Special

Viz: *2 volumes 1998*

Osamu Tezuka's whiz-bang medical manga tales of a brilliant and handsome mercenary surgeon are insanely funny. There is a marvellous scene in 'Operation Down Under' in which he operates on his own abdomen, to remove a mutated tapeworm, while under attack from mad dingoes in a tent in the Australian outback. His assistant Pinoco, the former cystoma in an artificial four year old girl's body, who believes herself to be his wife, is a disturbing touch.~GK

Recommended: 1-2

BLACK KISS

Vortex: *12 issues 1988-1989**

Howard Chaykin's noirish sex tale *Black Kiss* came in for a lot of flak when first published. Although set in Reagan's America, from the look, sound and action of it, it could well have slunk in from the 1930s or 1940s. Cass Pollack, a small-time crook, finds his hated wife and kid murdered and himself in the frame for the shootings. In order to have the famous actress who happened to be giving him a blow-job on the motorway while the triggers were being pulled to alibi him he has to do a small service for her: retrieve from a mystery woman a film that will ruin her career. Some of Chaykin's end-of-issue revelations are rather predictable, but on the whole the scripting is fast and stylish. His black and white art looks rather crowded, packing a great deal into each panel and using detail to build up the sense of a coherent world inhabited by the characters. Right at the start it's established that they're all pretty unpleasant; it's also clear that they like to play sexual roles, which is what prompted a lot of the criticisms. No one who enjoyed *American Flagg!*, which is littered with moments of violent sex, should really complain that the fucking and sucking in *Black Kiss* oversteps the boundaries. It's definitely pornographic, but hardly harmful. Originally published in short segments, prior to being issued as a collection it was republished as three issues titled *Big Black Kiss*.~FJ

BLACK KNIGHT

Atlas: *5 issues 1955-1956*
Marvel: *4 issue miniseries 1990, one-shot ('Exodus') 1996*

Stan Lee wrote the 1950s series, ably illustrated by Joe Maneely, most of which was reprinted in *Fantasy Masterpieces* and the first series of *Marvel Super-Heroes*. It's set in the court of King Arthur. Unable to oppose the machinations of Mordred and Morgan Le Fay openly, Sir Percy adopted the identity of the Black Knight. His ebony blade was cursed with repercussions for his descendant Dane Whitman centuries later, rendering him less mobile every time it drew blood. By the start of the 1990 series he's a statue. Roy and Dann Thomas condense the histories of the assorted Black Knights admirably in the first issue, there are plenty of guest stars, and Mordred and Morgan are up to their old tricks, but Tony De Zuniga and Rich Buckler's uninspired art torpedoes their efforts. The 1996 effort sets Whitman in the body of a 12th century ancestor and features Sersi and Apocalypse. It's rubbish.~WJ

THE BLACK LAMB

DC/Helix: *6 issue miniseries 1996-1997*

Much as you may like Tim Truman, this tale of a vampire avenger is terribly hackneyed. The Black Lamb visits vengeance on those who kill vampires, whoever they may be, and as such is a sort of bogeyman to human and vampire alike. As concepts go it's a dead end, with a vaguely futuristic setting to qualify it as part of the Helix science-fiction line.~NF

BLACK LIGHTNING

DC: *Series one 11 issues 1977-1978, series two 13 issues 1995-1996*

The man with the electric force field was DC's attempt to portray a modern black superhero in the 1970s. Created by

* Available in a collected edition

Tony Isabella, the series had Black Lightning battling the 100, a criminal organisation run by the aptly named Tobias Whale. The last issue had a back-up starring Golden Age character The Ray, but that didn't save the series from cancellation. Tony Isabella revived his creation in 1995 and fared a bit better than the original, with somewhat grittier stories. There was certainly a decent urban feel to them, but not much seemed to have changed over the decades.~HY

BLACK MAGIC

DC: *9 issues 1973-1975*

A reprint series that featured pre-comics-code horror stories edited and primarily drawn by the team of Joe Simon and Jack Kirby. It's high quality as you would expect from these two, one of the industry's most successful team-ups, especially the eerie art style. Other artists contributing included Mort Meskin and John Prentice making this a lot better than most new mystery/horror comics during the 1970s.~HY

BLACK MAGIC

Eclipse: *4 issue miniseries 1990**

There is much that is good about Masamune Shirow's work, and much that is bad. That it emanates from a largely alien culture exacerbates the often annoying differences in plot-structure and pacing you experience when reading Appleseed. Black Magic reprints his earliest series, a rather obvious (but nonetheless complicated) re-telling of the Greek creation myths set in a far future were a genetically-engineered mankind lives on Venus, ruled over by a bioroid called Zeus and closely watched by the Nemesis computer. Nemesis has created another bioroid to challenge Zeus' supremacy and hidden her among the ordinary populace until it's time to fight him. Shirow tells the story of Typhon the bioroid with the mixture of pomp, charm and humour peculiar to his work. The trappings are rather too grand for such a simple story and the development of character is jerky, as huge amounts of space have to be found for battles. Interesting for fans of his work, but not the place to start exploring Manga.~FJ

BLACK MIST

Caliber: *4 issue miniseries 1994*, 3 issues 1997-1998*

The miniseries (titled 'Anguish of the Mist') tells how Christian Allen, a US P.O.W as the Great War draws to a close, 'dies' as a result of an experiment by German doctors and becomes a monstrous being roaming the German trenches, slaughtering soldiers with a black, acidic mist. Allen's inner struggle to overcome the monster he has become is not original but is handled well. 2 has a guest appearance by Caliber hot-shot Kilroy. The second series is part of the Caliber Core group of titles and follows directly the events in *Red Diaries*. Dr Lonnie Talbot's corpse is stolen by Thugs (the cult, not gangsters), revived as an avatar of the Goddess Kali, and let loose on the ills of modern society with a kiss of death and swirling, acid mists. An above average use of an old, old plot. Worth a look.~WW

BLACK ORCHID

DC: *3 issue miniseries 1988-1989**

DC/Vertigo: *22 issues, 1 Annual 1993-1995*

The Black Orchid débuted in 1973 in *Adventure Comics* 428, a flying, superstrong mystery woman whose true identity and origin were never revealed. After a few stories, she fizzled out into such obscurity that writer Neil Gaiman, on proposing a revival of the character to DC, was allegedly greeted with blank looks and one puzzled question: "Blackhawk Kid? Was he in the Legion of Super-Heroes?" Fortunately, Gaiman persisted, and the three-issue series gave us a new take on the Orchid, solving some mysteries while generating others, in a suspenseful and haunting tale that established the Orchid as a major player on the darker side of the DC Universe. Superbly illustrated by Dave McKean at a time when he still bothered to draw, it's a thoroughly satisfying read. Somewhat after the event, DC decided to add an ongoing *Black Orchid* series to their new Vertigo line, and Dick Foreman initially set her in an urban environment, where she worked surprisingly well. Rather too soon, the action switched to the rainforest, and things began to ramble rather, despite the ironic humour that characterised Foreman's work. Coupled with the replacement of opening artist Jill Thompson by less talented hands, it all added up to an impression that some heroes don't stand up to being explained, analysed, or even portrayed in too much detail. The annual ties in to the 'Children's Crusade' crossover.~HS

Recommended: Miniseries 1-3.

BLACK PANTHER

Marvel: *Series one 15 issues 1977-1979, 4 issue miniseries 1988, 4 issue miniseries ('Panther's Prey') 1991, series two 50 issues + 1998 to date*

When Jack Kirby rejoined Marvel in the late 1970s the Black Panther's much lauded run in *Jungle Action* was abruptly cancelled. Kirby immediately put his own stamp on King T'Challa of Wakanda, the Black Panther, pretty much ignoring everything that had happened since he created him for *Fantastic Four* 52. His Panther eschewed all political and social relevance in favour of fantastic science and breakneck adventure. In short order the Panther meets the world's most rabid and homicidal antiques collectors and becomes involved with time machines, invasions from the future, escaped convicts, lost civilisations and lots and lots of monsters before returning to his own hidden kingdom. Here Kirby once again whips up enough new ideas to feed succeeding writers for decades. He introduces the Royal Family of the Wakandas, deals with the economic and mutagenic power of Vibranium (the mystery element that is the only bankable resource of the Panther's homeland) and most importantly, returns a flavour of ethnicity to what is fundamentally not a land of Americans of colour. They may not have been accurate portrayals of Africans, but Kirby's cast were recognisably not the people that you saw and heard on your own streets. That flavour of the exotic would be better used later, but it noticeably started here. Kirby left halfway through another fantasy opus with 12, involving molecular vampirism and new powers for the Panther. His replacements brought the story to a rapid conclusion and returned T'Challa to New York and the less risky arena of mainstream superheroics with the Avengers featuring heavily in 14 and 15. The impetus was lost and for the second time a *Black Panther* series ended in the middle of a tale, being finally concluded in *Marvel Premiere*, which became a kind of clearing house for cancelled titles in its own latter days.

He bummed around in various Marvel titles before a miniseries that dealt, albeit rather timidly, with the issue of apartheid. The neighbouring white ruled African nation of Azania abuses Wakandan citizens to such an extent that not only does T'Challa lose his position as King but also the sponsorship of the Panther Spirit that is the fundamental source of his abilities. Peter B. Gillis and Denys Cowan provide a good-looking, well intentioned, but ultimately insubstantial story that is still better than the next miniseries, three years later following a long serial in *Marvel Comics Presents*. In 'Panther's Prey', Don McGregor and Dwayne Turner slickly rehash McGregor's 'Panther's Rage' from *Jungle Action*. Yet another band of rebels attempts to depose the King whilst the author tries to cram resolutions to all the hanging plot and characters threads left unresolved from his previous run, resulting in a bland and overblown mess.

The next return was under the Marvel Knights banner with Christopher Priest catapulting the Panther into the heart of contemporary political and social context as well as the heartland of the Marvel Universe. Racial and tribal hatreds in the nation of Ghudaza destabilise Wakandan society when refugees from genocide flood into the

---

* Available in a collected edition

Hidden Kingdom and force T'Challa to cede control to their spiritual leader the Reverend Dr. Achebe. Relocating to New York with his close entourage, he is assigned an aid, Everett K. Ross, from the US Office of the Chief of Protocol – responsible for wrangling foreign diplomats and dignitaries on American soil – and begins long range plans to regain his kingdom. Ross becomes the narrative voice for the series, giving The Panther a sense of awesome mystery, as the reader is no longer privy to the hero's innermost workings. There is some truly inspired plotting, especially in 'Enemy of the State' (9-12) where T'Challa regains control of his country by declaring war on America, and when, inevitably, long-time foe Killmonger finally rears his dreadlocked head (15-20). Priest constantly inverts comics tradition to produce captivating superhero stories shot through with his trademark sharp, funny dialogue. In another break with custom, Priest has also worked hard to include the minutiae, no matter how dumb or dated, from all previous series. Even the time-busting King Solomon's Frog (series one 1-4) makes a bewildering reappearance during a tale of past and future selves (45-50). With capable art from the likes of Mark Texeira, Mike Manley, Joe Jusko and Sal Velluto this incarnation of the Black Panther is an absolute joy to read.~WW

The BLACK PEARL

Dark Horse: *5 issue miniseries 1996-1997**

Appearing in so many films and TV shows since his break in *Star Wars* has obviously given Mark Hamill an appreciation of the elements resulting in a decent script, and here he combines with Eric Johnson to produce just that. The theme concerns just what would prompt someone to don a costume and fight crime in the real world. The mantle falls on court clerk Luther, part-time voyeur whose object of desire is abducted in his presence. Lashing out, he kills one of the kidnappers, but can't prevent her kidnap. His escape is filmed, and the film stolen by a talk-show host on the slide, doctored and screened to show a hero dubbed the Black Pearl escaping. Luther subsequently adopts the identity, tracking the remaining kidnappers down and killing them. Public reaction veers from gung-ho endorsement to concerns about civil rights via opinions between, with the talk-show host reviving his career via extensive Black Pearl promotion. This comic has some interesting points to make, and enough fine touches displaying the care applied to the scripts, such as Luther having to bolt to stop his answerphone message from activating during a public broadcast. The art team of H.M. Baker and Bruce Patterson provide clean, detailed and appealing visuals conveying the necessary small details very well, making for a solid adventure thriller.~FP

Recommended: 1-5

BLACK PLAGUE and Jimmy the Leper

Keenspot Entertainment: *2 issues + 2001 to date*

Funny gross-out superhero parody from Paul Southworth and Roger Sims. Jimmy the Leper is the long-suffering sidekick of his elder brother, The Black Plague, who has the power to inflict diseases at will and is a venal and vindictive hero at best. Jimmy wasn't always a leper, after all. In their premiere outing they save Cesspool Junction from a squid who's the reincarnation of Adolf Hitler and 2 sees them selling their bodies to science to make ends meet and maybe pay the hospital for sewing Jimmy's extremities back on. Great stuff!~WW

Recommended: 1

BLACK SUN

WildStorm: *6 issue miniseries 2002-2003*

In Hong Kong, Inspector Maggie Sun is an anti-procedural, reckless police officer, whose father, Hsu, is her commander. Her rich uncle, Zhao, is involved with some very dangerous non-human villains, who appear to be linked to the latest, addictive, toy fad, Wrist Dragons. This is a well told, if rather clichéd, tough cop story from Marc Andreyko, but Trevor Scott's artwork is occasionally muddled by atrocious colouring.~NF

THE BLACK TERROR

Eclipse: *3 issue miniseries 1989-1990*

In a world where a Capone is Governor of Illinois, Ryan Delvecchio appears to be just another Mob enforcer. At night, however, he becomes the Black Terror, a masked vigilante trying to bring down the Capones' criminal empire. Allison Capone has her own plans, that involve displacing her father and destroying the world's financial centres. Frankie Dio, Ryan's partner in crime, has his own hidden backers who would be as happy to grab the power for themselves as bring down the Capones. This moody, noir thriller is written by Beau Smith and Chuck Dixon in an efficient, hardboiled manner but it's Daniel Brereton's artwork that raises the story from the humdrum. The images of Allison, in particular, always catch the hint of her true nature. Overall, it's a good read. Brereton's not reached his best yet but there's plenty to enjoy.~NF

BLACK TIDE

Image: *4 issue miniseries 2001*

Mike Miller illustrates a slight yet muddled tale of three superspies who unbeknownst to some of them are in fact semi-reincarnated royalty from the hidden but omnipresent Atlantean empire that exists below the floor of the Atlantic Ocean. Writer Debbie Bishop jams too much by-play and back-story into what is basically a mindless shoot'em-up. Dissatisfaction is compounded by the miniseries coming to a cliffhanger but not ending, readers being told to wait for a succeeding series from another publisher at a future date. Unprofessional and unacceptable~WW

BLACK WIDOW

Marvel: *Graphic Novel 1990, 3 issue miniseries 1999*, one-shot ('Web of Intrigue') 1999, 3 issue miniseries 2001*, 3 issue miniseries 2002*

Perennial bit-player Natasha Romanov, the Black Widow, has enjoyed a lengthy comic career, but had to wait until the 1990s for any success. Following appearances as an alluring villain in *Iron Man* and *Avengers*, she reformed and progressed to cover status in early 1970s *Daredevil* and a decent series in *Amazing Adventures*. The Black Widow's first full-length solo stories were in the patchy *Marvel Fanfare* 10-13, collected in the 1999 one-shot. The graphic novel, 'The Coldest War' by Gerry Conway, George Freeman and an army of inkers, was equally patchy, but interestingly played up the character's cold war origins, as did later appearances. Much better was the 1999 miniseries by Devin Grayson and J.G. Jones, which pitted Romanov against a blonde replacement and made its artist a star, thanks to some of the decade's finest art. The 2001 follow-up was another quality production, with Jones being replaced by an equally impressive Scott Hampton. Sadly, a third miniseries by Greg Rucka and Igor Kordey looked rushed, and its sleazy subject matter might well have killed an entertaining title.~DAR

Recommended: 1999 miniseries 1-3

Renegade: *5 issues 1985-1986*

An anthology title created in the late 1970s, featuring work by Gene Day, his brothers Dan and David, and various creative friends, including a young Dave Sim. Day's busy schedule never allowed him time to publish, and after his untimely death friends and family dusted off the old pages and finished it. Most stories are horror and fantasy tales by young enthusiasts, which show promise but are immature, thus more interesting as history than entertainment. The first issue encapsulates the balance of the series as a whole, with scripts by Day, illustrated by himself and brother Dan, plus strips from Charles Vess and Sim.~NF

BLACKBALL COMICS

Blackball: *1 issue 1994*

Short-lived anthology series (and company) bringing together Kevin O'Neill, Keith Giffen, Simon Bisley and others to little effect. O'Neill's 'John Pain' retreads some of the ground of *Marshall Law*, while Keith Giffen's Trencher is more unreadable, expressionistic experimentation.~NF

BLACKHAWK

DC: *Series one 166 issues 1957-1968 (108-243), 1976-1977 (244-250), 1982-1984 (251-273), 3 issue miniseries 1988, series two 16 issues, 1 Annual 1989-1990, 1 Special 1992*

Created by Will Eisner and Chuck Cuidera Blackhawk was originally published by Quality Comics, in both this and *Military/Modern Comics*. Blackhawk leads the team of fighter pilots named after him. Formed during World War II, their original raison d'être was as refugees from occupied countries fighting Nazis, and a hardbound collection of their earliest stories is available as Blackhawk Archives. At the time of their acquisition by DC they were a tired bunch, having spent a decade seeing off Nazis, then assorted Communist-sponsored threats. Keeping the solid Dick Dillin as artist, DC dispensed with the Commies, introducing more science fiction and supervillains, the most frequently recurring of whom was former Nazi Killer Shark. They also returned Lady Blackhawk, an adventuress who often accompanied the team, and made a positive step in transforming Chinese racial caricature Chop Chop into a more rounded human being. That said, the comics were unremarkable, with little to differentiate Blackhawk from other DC adventure titles published concurrently. All applied a simple formula of an attention-grabbing cover featuring an astounding situation, all too often explained away by ridiculous contrivance inside, two to three short gimmick-plot-based stories per issue and little characterisation. What made the Blackhawks unique was their ability as pilots, and a long career as combat adventurers, yet this was of little relevance to most stories.

Gaudier uniforms débuted in 197 and Bob Haney become writer with 202. He gave the cast and stories some individuality, starting with an origin and motivation for Chop Chop in 203. The back-ups were formalised into series, with the individual tales of the team members in 'Detached Service Diary' the best. The changes obviously did little for sales, however, and from 228, during the height of the Batman TV show's success, an all-time misguided editorial judgement transformed the Blackhawks into the most preposterous superheroes imaginable. Each team member assumed an identity conforming to a particular skill, with the most embarrassing being radio operator Chuck, now clad in blue pyjamas spattered with pink ears and rechristened The Listener. Only Blackhawk himself retained a modicum of dignity amid this sorry camp bunch, and it was the kiss of death after twenty years, a last-ditch attempt to restore honour in 242-243 coming too late. Cancellation was a mercy killing.

The 1970s revival was uninspired, but correctly restored the team to Blackhawk Island as a respected mercenary and security force. Mark Evanier and Dan Spiegle are the creative spark for the next revival, and, recognising that the Blackhawks have the greatest impact in World War II, their contribution is set in 1940, combining the frequent appearances of Hitler common to comics of the period with strong stories. And for the first time the entire squad have characters transcending national stereotypes, although Blackhawk himself is still rather the brave blank slate. Evanier also restores the 'Detached Service Diary' in the company of a stunning selection of artists (260 and 268 are nothing but). Producing the best Blackhawk stories to date didn't convince buyers, but at least the first Blackhawk series died an honourable death.

A Howard Chaykin shock-tactic makeover finally gave Blackhawk a character. It wasn't a particularly pleasant one, with him designated the callous libertine, previously the exclusive province of the French André. The miniseries proved popular enough to warrant another stab at a regular series in *Action* 601-635 before a second ongoing title. It moves the team forward to 1947, with Blackhawk operating an air charter service acting as a front for CIA-sponsored activities. The more distasteful aspects of the miniseries are tempered by Martin Pasko and Rick Burchett, who deal largely with the murky consequences of an association with the CIA and the anti-communist paranoia that fuelled the era. From 4 those in power who consider the Blackhawks a liability take action, and from that point the title is very good, second only to the Evanier and Spiegle run. It tinkers with the Blackhawks personnel for the first time in fifty years, and is solid adventure with interesting narratives and imaginative plot twists. Sadly, once again, this wasn't enough to attract an audience able to sustain the title. Doug Moench concludes things, rapidly finishing Pasko's plots and starting his own, which, although adequate, don't match preceding issues.~WJ

Recommended: Series one 259, 264-267, 269-271, Series two 6-10

BLACKJACK

Dark Angel Productions: *3 issue miniseries 1996-1997, 2 issues ('Blood & Honor') 1997-1998, 1 volume ('Blood & Honor') 1999*

The creation of writer, Alex Simmons, Blackjack is a negro soldier-of-fortune whose adventures are set in the 1930s. The first series introduces Arron Day and his supporting cast and pits him against an old enemy of his father, the Cobra. With exotic settings (Egypt in the first series, China in the second) and strong female as well as male leads, this is a good, thoughtfully written action adventure series. The accomplished artwork on the first series, by Joe Bennett (reminiscent, in different places, of Joe Kubert and Matt Wagner), is unfortunately not present on the second, which suffers from ten different artists. The collected 'Blood & Honor'completes the miniseries (originally intended as four-issues).~NF

BLACKMARK

Bantam: *1 volume 1971*

Fantagraphics: *1 volume 2002*

Unusually, for the time, a paperback book rather than a comic, and the innovative storytelling technique of typeset text illustrated by comic panels disguise what is in reality a fairly ordinary sword and sorcery strip. Although a genre piece, Gil Kane's superbly dynamic art and solid grasp of language raises Blackmark well above most of its rivals. Sporadic inking from Neal Adams doesn't do any harm either. This book was reprinted in *Savage Sword of Conan*, and a second novel saw print years later in *Marvel Preview* 17. Both are collected in the Fantagraphics volume.~DAR

BLACKMASK

DC: *3 issue miniseries 1993*

Jim Baikie's moody, noir style gives this retro pulp thriller atmosphere, but Brian Augustyn's script lacks depth and suspense. Harking back to Hollywood's preoccupation with organised crime, Augustyn updates the setting to the 1950s and his script reflects the nihilistic overtones of the classic 1960s thriller (by the likes of Donald Westlake and Lawrence Block). His main character is a shellshocked Korean veteran, but unfortunately neither he nor any of the bit players engage your sympathy. Comes over as a bit of a technical exercise.~NF

BLACKOPS

Image: *5 issue miniseries 1996**

A hi-tech spy story throwing a team of government agents against a would-be world ruler specialising in the construction of robots and high-power battle suits. It's all very Cold War, and laughable when authenticity is conveyed by the use of dozens of military acronyms, each of which has to be explained with a footnote. That said, there's enough action and deception to keep up the interest, and it's encouraging to see spy novels as an influence in the place of old comics.~FP

---

* Available in a collected edition

BLACKWULF

Marvel: *10 issues 1994-1995*

If the pages-long fight scenes had been trimmed a little there might have been something interesting going on. As it is there are about twenty new superpowered characters involved in an interstellar plot about genetic manipulation stretching back centuries that all comes to a premature end after the sales figures have been scanned.~FP

BLADE

Marvel: *Series one 10 issues 1994-1995, one-shot ('Crescent City Blues') 1998, one-shot ('Sins of the Father') 1998, series two 3 issues 1998-1999, 6 issue miniseries 1999-2000*
Max: *6 issue miniseries 2002*

Blade is an Afro-American vampire hunter created by Marv Wolfman and Gene Colan during their critically-acclaimed run on *Tomb of Dracula* in the 1970s. His mother was bitten by a vampire just as he was about to be born, an attack that proved fatal for her, but conveyed upon the infant the status of a 'Daywalker', one possessed of all the strengths, and none of the weaknesses, of a vampire. It also gave him an incredible loathing of vampires, and he has dedicated his life to slaying them. After *Tomb of Dracula* folded, Blade was left homeless until the short-lived *Nightstalkers* series, where he teamed with two other *ToD* alumni Frank Drake and Hannibal King. Following this modest success, he was tried solo again in 1994, but it was an unhappy mix of modern shocker and 'Streetwise' dude clichés left over from Blaxploitation movies. The whole lacklustre premise should have remained in the 1970's. A few years later, Blade was optioned for a movie starring Wesley Snipes, which became, to everyone's astonishment, Marvel's first successful movie franchise, a stylish and accomplished horror film which has spawned one sequel, with more in the pipeline. 'Sins of the Father' was the comic adaptation, preceded by 'Crescent City Blues', which in many ways dug the foundations for the movie. Blade learns that Deacon Frost, the vampire who killed his mother, has been organising vampires to take on the Mafia in New Orleans. Reuniting Blade with his old artist, Gene Colan, it was an effective combination of old and new sensibilities.

Under Marvel's short-lived 'Strange Tales' imprint, three issues appeared in which Blade roamed around New Orleans mopping up the undead while facing the machinations of the mysterious Dominique and Michael Morbius. All that scripter Don McGregor proved was that he had lost none of his notorious propensity for loquaciousness since the 1970s, but at least it was competent, which is more than could be said for the next foray launched in 1999. Drawn and (using this term in the vaguest possible sense) written by the inexplicably popular Bart Sears, it was so determined to be 'kewl' and 'tuff' that it is completely impenetrable. Our hero runs around dressed in what looks like a pair of opaque support tights (all that exposed skin v. practical for vampire-hunting...) while fending off the attentions of a sinister industrialist with a hidden agenda and an uber-vampire. A 1940s hero is brought back from Limbo in 4, only to die a pointless death shortly thereafter. One would be indignant about this if the whole mess wasn't so damn soporific.

Never holding back from flogging a dead horse, Marvel actually managed to beat some life back into it with the 2002 series. Under Marvel's adult-oriented (tits n' swearing) Max imprint scripter Christopher Hinz and artist Steve Pugh produced a tense and atmospheric thriller reminiscent of the film, but not derivative of it. A new breed of vampire is on the rise, and Blade is forced into an uneasy alliance with a secret organisation who fight supernatural threats. Blade is given an interesting supporting cast, most of whom survive to the end, and some genuine relationships with others. The pacing is a little odd, as 5 ends on a semi-cliffhanger, and 6 is a fairly good, but completely separate, stand-alone story with no connection to the previous issues. Since the series was planned as six issues, this is a little perplexing. Nevertheless, it's by far the best Blade solo series to date, and it is to be hoped that there will be follow-ups.~HS

BLADE OF THE IMMORTAL

Dark Horse: *74 issues +, 1 Special 1996 to date*

Hirokai Samura, the man behind this extraordinary Modernist re-interpretation of the classic samurai revenge comic, is probably the most important creator not working in English to be introduced to Western audiences in the 1990s. Drawing upon a long tradition of carefully observed action artwork, he brings a tightness of line and breadth of technique to his black and white work that is quite stunning, frequently using pastel effects and pencil work alongside inking that ranges from almost ethereal to controlled and detailed, to action frames that look like a herd of spiders have trampled through an ink drift. The sensitivity of his line is immensely pleasurable and the design of his splash pages, often carried out in soft pencil in contrast to the scenes of extreme violence they portray, is at once beautiful and terrifying.

Dark Horse published a one issue special introducing his scruffy, but arrogant, twelve-bladed hero Manji, cursed to live forever following the introduction of mysterious worms into his blood stream that repair almost any damage by a shuffling old woman claiming to be 800 years old. Manji is a wild dog Ronin, known as 100-cop-killer. He's cursed with the theoretical immortality after killing the lord for whom he slew the 100 men, on discovering the lord himself was a thief. As a result his worldview is a little jaundiced – that and being hideously hacked, maimed and wounded on a regular basis. In reparation for his unthinking slaying of 100 lawmen, Manji vows to kill 1000 genuinely bad blokes, but having had the samurai system of honour blown apart by his realisation about his own lord, he has increasing difficulty identifying who they are. Eventually he winds up with a price on his head for the brutal slayings of three seemingly innocent travellers (actually renegade swordsmen), done by a psychopath he later tries to kill. Throughout the comic Samura plays with ideas of honour, right and wrong.

He begins what's turning into an epic tale by teaming Manji up with Rin, a teenage girl who's trying for revenge on the bunch of renegade swordsmen who, two years earlier, killed her father and mother when they eradicated the fighting school her father ran. These renegades, under the charismatic leadership of Anotsu Kagehisi, want to destroy the numerous fight schools in Japan and unite all the fighters under their banner, teaching that anything that keeps you alive and lets you win is permissible. So far so good, you think, she's in the right, he's good for helping her, these ruffians are definitely wronguns. As the story develops, and different characters are brought to the foreground, perspective begins to shift. As Manji and Rin encounter more and more of the renegade swordsmen involved in the attack, some of whom have left the gang for ideological reasons, some for practical ones, such as becoming single parents, we're offered a series of takes on the violent event that sets the whole story in motion, and the reasons each had for taking part, from sheer blood lust to ideological righteousness.

Samura systematically removes your right to like his 'hero' and 'heroine' as they question their behaviour, although this makes them more likeable simply as characters. He stops and follows Anotsu's tale, revealing his political motivation, and introduces a gang of state-sponsored assassins led by the machiavellian and seemingly cold-hearted Hyakurin, sentenced to death for killing her husband after the death of their child, for some unexplained reason. She's released along with other killers a la Dirty Dozen, provided they do the government's dirty work. When Manji and Rin throw in their lot with them, it allows Samura to explore even more shades of grey as they set out to murder Anotsu. At the same time, Blade is a coming of age story, a bildungsroman, and takes the traditional western form of a journey. Rin journeys through Edo period Japan looking for revenge, and growing into maturity.

Samura's use of language is startling, and may not please some purists. He switches from formalised utterances to street slang within the same word balloon, and has his characters exchange poetic couplets when they swear at each other. This gives a startling modernity and vitality to the period setting. Similarly some later issues are extremely violent. Some of the torture scenes are unpleasant and shocking, and carried out in full view of the reader. They're gut-wrenching, even in a comic featuring bloody fights too numerous to count, including some amazing sequences like the one where Manji uses dripping, hacked off bits of his own limbs to trick assassins on his trail into thinking he's hiding in trees. It's not for the weak stomached.

The other difficulty with the series is that Samura did not want his artwork 'mirrored' (the flipping of pages before the words are added so they read from left to right instead of the oriental right to left). Wherever possible the panels are cut and re-pasted, but at times you'll find you have to read from right to left to make sense of the action! A small price to pay for what is developing into a masterpiece not only of samurai comics, but of manga, full stop. Issues to 72 are now collected in books.~FJ

Sergio Aragonés' BLAIR WHICH?

Dark Horse: *One-shot 1999*

Feeble humour cash-in on *The Blair Witch Project.* In Aragonés' version of events, it's a group of cub scouts camping in the same woods who are responsible for the documentary makers' terror. The laughs are non-existent.~DB

BLAIR WITCH

Oni Press: *One-shot 1999, 4 issue miniseries (The Blair Witch Chronicles) 2000*

A surprise box office hit in 1999, Eduardo Sanchez and Daniel Myrick's The Blair Witch Project was a low budget spookfest ingeniously made to look like a 'recovered' documentary recording of 'genuine' supernatural activity. In the one-shot writer Jen Van Meter tries the same sort of trick, claiming that her trio of tall tales are based on a bizarre mini-comic issued by one Cece Malvey in 1983, which may or may not be a knowing nod in the direction of the hoax Australian poet 'Ern Malley'. As with the film, the strips all revolve around a small town called Burkittsville, where a vengeful witch haunts the deep, dark Blair Woods. The anthology series follows the same basic formula of unwitting innocents encountering the witch to be cursed by her, but Van Meter's varied and allusive storytelling often succeeds in evoking the film's sense of creeping dread. Van Meter is helped by such sympathetic artistic collaborators as Tommy Lee Edwards, Guy Davis and Bernie Mireault, although the covers on all issues are uniformly poor. All in all, as unnecessary movie cash-ins go, this one really isn't too bad at all.~AL

BLAIR WITCH Dark Testaments

Image: *One-shot 2000*

A prequel to *The Blair Witch Project*, exploring the background to the murders mentioned in the film. Helped by Charlie Adlard's bleak artwork, Ian Edginton's strangely eerie tale doesn't attempt to explain too much of what happens in the woods, retaining the sense of mystery that made the film such a hit.~DB

BLAKE AND MORTIMER

Editions B&M: *6 volumes 1986-1988*
Comcat: *2 volumes 1989-1990*

Robust English adventurers Captain Francis Blake and Professor Philip Mortimer made their début in the September 26th 1946 edition of the Belgian children's anthology *Tintin.* Written and drawn by baritone opera singer and former Hergé assistant Edgar P. Jacobs, from the start the strip was distinguished by the author's obsessive attention to detail, as well as a 'clear line' drawing style that showcased his formidable design skills. Inspired by the works of H.G. Wells and Jules Verne, Blake and Mortimer's exotic science-fiction adventures are amongst the most revered of all European strip classics, 'juvenile' comic albums still capable of engaging adult imaginations.

When the outbreak of World War II put an end to Jacobs' promising operatic career he resumed his first calling, as an artist contributing illustrations and cartoons to a variety of publications. From the mid-1940s Jacobs worked as an assistant to Hergé, re-formatting old *Tintin* pages, adding glorious colour to black and white stories, working on the strip's authentic backgrounds and décor (most notably for *King Ottokar's Sceptre*) and making an appearance on the front of *Cigars of the Pharaoh* as mummified Professor 'E.P. Jacobini'. Encouraged by Hergé, Jacobs began work on the first Blake and Mortimer adventure 'The Secret of the Swordfish' in 1946, a vast narrative eventually collected into three albums, which were published between 1950 and 1953. This futuristic war story introduced many of the strip's defining motifs: Jacobs' love of technology and archaeology at the expense of human feeling, huge chunks of expository dialogue, recurring villain Orlik, and a peerless story-telling technique. Marred by its racist depiction of 'The Yellow Peril', the three volumes of 'Swordfish' nevertheless chart the maturation of Jacobs' style. By the following story-line, the two-volume adventure 'The Secret of the Great Pyramid' (1954-1955), the marriage between style and content was complete, with Jacobs immersing himself in the world of Ancient Egypt to produce a mesmerising story about the hidden tomb of heretic pharaoh Akhnaton. Next was Jacobs' undisputed masterpiece, the single-volume adventure 'The Yellow Mark' (1956). Set in fog-bound London, this moody mind-control mystery pits Blake and Mortimer against a seemingly superhuman burglar who marks his crimes with the letter m, the yellow mark of the title. Using his own extensive photographic reference collection, Jacobs created a love-letter to England's capital, his inherent conservatism clearly enraptured by London's dark history, timeless monuments and respectable institutions.

After 'The Yellow Mark' Jacobs completed only four more forty-four-page albums: 'S.O.S Meteors' (1959), a French-based noir with Orlik as advance guard for a Soviet invasion, 'The Time Trap' (1962), an almost solo Mortimer time-travel romp, 'The Queen's Necklace' (1965), a fairly straightforward detective adventure, and the first volume of 'The Three Formulae Of Professor Sato' (1972). The second volume of Sato remained uncompleted after Jacobs' death, and was eventually finished by former Hergé assistant Bob DeMoor in 1990. Whilst Jacobs' work lacks the sharp character humour of Hergé's Tintin – Blake and Mortimer remain little more than functional stereotypes, the dotty Prof and stiff-upper-lipped military man – its imaginative scope and passionate verisimilitude continue to inspire and seduce readers and creators.

Despite Blake and Mortimer's European pre-eminence, Jacobs' oeuvre remains largely unknown in America and Britain. In the mid-1980s Jacobs' estate established Blake and Mortimer Editions and finally produced English editions of 'Swordfish', 'Pyramid' and 'The Yellow Mark' (as 'The Yellow M', for some reason). Despite their attractive size and faithful reproduction these volumes were poorly publicised, ineptly translated and are now out of print. Also hard to come by are the two volumes issued by Catalan, through their children's imprint Comcat Comics. Despite their smaller size, these versions of 'Atlantis Mystery' and 'Time Trap' boast far better translations, and are well worth seeking out.~AL

Recommended: *Atlantis Mystery, The Time Trap, The Yellow M*

BLANCHE GOES TO...

Dark Horse: *One-shot 1992, one-shot 1993*

The whimsy and nostalgia forming the strongest threads of Rick Geary's works are united in his tale of a new arrival firstly in 1907 New York, and then in 1915 Hollywood.

There's a decent period feel to New York, as Blanche studies under an eccentric musician with an odd secret, but the follow-up better. As in the previous issue, her story is told as illustrated letters home. By emphasising the expanse of Los Angeles, the general naïvety, and the head of the film studio attempting to impart wholesome entertainment with a moral message, Geary implicitly contrasts them with today's equivalents in a wistful fashion. There's an edge to the story, though, with agitation concerning the poor working conditions in the early picture industry, but for Geary it's more an occurrence for Blanche to witness than any comment. It's all drawn in his gloriously simple, yet detailed style, and the conclusion hints at an era floating away. Magnificent.~WJ

BLANDMAN

Eclipse: *One-shot 1992*

Despite being titled to attract *Sandman* fans, this wretched parody casts its net over comics as a whole in 1992, focussing more on DC titles than any other. That the creators are only identified in miniscule type in the indicia probably speaks of their shame at having produced such a woeful attempt at a cash-in.~FP

BLAST CORPS

Dark Horse: *One-shot 1998*

Buzzy art by Pop Mhan and stupid writing in this shoot-'em-up based on computer game. A collection of reprints from *Nintendo Power* magazine.~WW

BLASTERS Special

DC: *One-shot 1989*

Writer Peter David performs a minor miracle by taking a bunch of feeble throwaway characters created by DC's Invasion crossover and combining them with the Justice League's old mascot Snapper Carr to forge the most eccentric superteam yet. Finding that none of the genetically altered humans can find a purpose on Earth, they hook up with a spacefaring cat-woman and head off for adventures in the outer galaxy. The Blasters won't be to everyone's taste with lots of in-jokes, comedy clichés and breaking of the fourth wall, but the light tone of the comic is a pleasant bubblegum read. James Fry and Robert Campanella's art remains just the right side of cartoony to retain its appeal.~HS

BLAZE

Marvel: *4 issue miniseries 1993-1994, 12 issues 1994-1995*

Johnny Blaze, the original demon biker at Marvel, stars in limp supernatural encounters in the hope of mounting the then lucrative *Ghost Rider* bandwagon. Happily, the anticipated demand was of short duration, and within eighteen months he was back to a supporting role in his successor's comic.~HS

BLAZE OF GLORY

Marvel: *4 issue miniseries 2000**

John Ostrander makes exciting fun from not immoderately unintelligent and uneducational ludicrous revisionist meta-fictional retelling of *The Magnificent Seven Samurai*. It's recast with all the old Marvel western characters right down to Caleb Hammer, Red Wolf and even the 'relevant' Gunhawks. Suitably adequate art by Leonardo Manco is not enhanced by Mariana Manco's colouring.~GK

BLAZING BATTLE TALES

Atlas: *1 issue 1975*

In common with other Atlas titles you got more graphically portrayed violence for your buck, but otherwise an ordinary war title.~FP

BLAZING COMBAT

Warren: *4 issues 1965-1966*

This was packaged like a standard bloodthirsty war comic: "Exciting Battle and Adventure", it says on the cover, and "Illustrated Excitement in War". How many outraged letters were sent along the lines of: "What kind of war comic do you call this? You must be a bunch of pinkos, making out that the Germans and even the gooks are human beings, and never showing our boys but to have them fighting each other or running scared." They didn't print such letters if they arrived – maybe the potential critics were overawed by the quality of the work. It's not too hard to imagine such a reaction, since this is an astonishing comic. Almost all the stories are written by Archie Goodwin, also the editor, and they're mature, intelligent, sobering and always readable. Add to this a generous seven stories per issues and stunning black and white artwork from people such as Alex Toth, John Severin, Reed Crandall, Joe Orlando, Wally Wood, Gene Colan, Russ Heath, Gray Morrow and Angelo Torres, and it truly is breathtaking. Everyone should read this comic. There's barely a weak story in the four issues, but some deserve special mention: 'Cantigny' (1) for Read Crandall's fine pen and ink work; 'Enemy!' (1) for John Severin and a story of one American disturbed by another's brutality; 'Holding Action' (2) for John Severin and a depiction of the long-term mental effects of combat; 'Foragers' (3) for Reed Crandall's wash work and the reality of enforcing a scorched-earth strategy; 'U-Boat' (3) for Gene Colan and an exceptionally strong story of confused loyalties; 'Survival' (3) for Alex Toth and a grim post-World War III story; 'Souvenirs' (3) for John Severin and a gruesome moral tale; and 'Give and Take' (4) for Russ Heath's perfect artwork. Surely the best comic Warren ever produced, a selection of stories appear in a flimsy collection.~FC
Recommended: 1-4

BLAZING COMBAT

Apple: *2 issues ('Vietnam And Korea') 1993, 2 issues ('World War I and World War II') 1994*

As the subtitle suggests, the first series reprints the Vietnam and Korean war stories from the Warren comics, and the second the World War stories. Alongside the first series, though, there's material from Don Lomax reprinted from the *Vietnam Journal* collections, and featuring his reporter from that series. It's equally sympathetic and hard-hitting, and the remaining material has already been canonised. As the cheapest way of obtaining otherwise expensive masterpieces these series are indispensable.~WJ
Recommended: 'Vietnam And Korea' 1, 2, 'World War I and World War II' 1, 2

BLAZING SIX-GUNS

Skywald: *2 issues 1971*

Like all of Skywald's short-lived colour comics, this was a 52-page bonanza of humdrum new strips deftly mixed with humdrum reprints. The star of the show was the astonishingly average Sundance Kid by Len Wein and Dick Ayers, a character who soon graduated to his own equally unremarkable title. Passable material from the Avon and M.E. archives rounded out the package.~DAR

BLEAT

Slave Labor: *1 issue 1995*

Often screamingly funny odds and sods from the hearteningly demented mind and pen of Basilio Amaro. In this one issue you've got several condensed comics ('Good Cop, Bad Cop' is the best), wine reviews, a guide to the people who use communication forums on the Internet, a great introduction, a brilliant downbeat back cover, and wonderful cartooning. In a parallel universe Amaro lives in a luxury penthouse apartment, hosts his own talk show, and his inside-back-cover comments are true. More, more, more, please.~FP
Recommended

Peter Kuper's BLEEDING HEART

Fantagraphics: *4 issues 1992-1993*

Kuper is a true original, adopting a stark, fast style, often scratched onto black board, sometimes stencilled. His art is unique and instantly recognisable among comic artists, yet he's more appreciated as an illustrator. *Bleeding Heart* has autobiographical recollections alongside quirky nonsense, dream recitations, travelogues and the political commentary for which he's best known. This is useful in collecting Kuper strips that have previously appeared elsewhere (most frequently in *World War 3* and *Heavy Metal*), but the consequent lack of unity damages the magazine as a whole, and only the fourth issue contains a significant proportion of new material. That said, there's at least one essential strip in each issue, and such is Kuper's adaptability that they're completely different in tone and style. 'Gorillas' in 1 recounts a trip to Tanzania and the difficulty associated with a trip to see mountain gorillas, while 2's caustic premonition about New York, 'The Wall', is an all too believable fantasy. 'The Jungle' in 3 is a ghastly tale of urban 'renewal', and 4's tales of relationships and masturbation are frank and funny.~FP

Recommended: 1-4

BLINDSIDE

Image: *1 issue 1996*

By the numbers renegade covert agent with a gun, but able to see through walls. To read the fawning editorial by creator Marat Mychaels, though, about how he'd nurtured the character for a decade you'd imagine he'd come up with a startling original concept, not just adapted Hitman. What moments of pleasure occur are from the occasional wit of Robert Loren Fleming's script. The advertised second issue was published in part in Asylum 11, and Blindside hasn't been seen since.~FP

BLINK

Marvel: *4 issue miniseries 2001*

In the alternate X-Men universe of The Age of Apocalypse Blink is a teleporting mutant who accidentally ends up in the anti-matter Negative Zone. Amnesiac, she's used as a pawn in a battle between major baddies Annihilus and Blastaar to control a super weapon that could destroy the universe. Uninspired writing from Scott Lobdell and Judd Winick, with competent art by Trevor McCarthy and a legion of inkers. The entire series, which is without an ending, is nothing but a loss-leader for another new comic *The Exiles*. Shameless and exploitative.~WW

BLIP

Bardic Press: *One-shot 1998*

Blip is the Book of Little Independent Publishers, and serves its purpose by offering promotional previews of a number of alternate (usually self-published) series. To make it a little more interesting, some previews were created especially for this collection, including those for Craig Taillefer's *Wahoo Morris*, Bill Knapp's *The Furies*, Teri S. Wood's *Darklight*, Joe Zabel's *Trespassers* and David Yurkovich's *Threshold*. Scott Morse's 'Harvest Season' is also new, but not connected to any specific series of his. The other previews are for *Dreamwalker, Astounding Space Thrills, Thieves and Kings, Shades of Grey, Strange Attractors, Galaxion, Finder* and *Mythography*. An additional feature is a two-page jam strip by Michael Cohen and Dave Sim – a bit of nonsense about symbols and psychoanalysis.~NF

BLISS ALLEY

Image: *2 issues 1997-1998*

Bill Messner-Loebs weaves some interesting urban tales about a down-and-out, all amusingly told in an unpatronising way. There's some weird and wacky characters making up a city's homeless society, including a floating rat. Messner-Loebs, always a versatile writer, has taken Eisner as an artistic inspiration for an unusual and engaging title.~HY

BLITZKREIG

DC: *5 issues 1976*

An attempt to show World War II through the enemy's eyes, which never really lived up to expectations. DC's top war story writer, Robert Kanigher, scripted and Ric Estrada's artwork, though not exceptional, suited the series. While DC made an attempt to be unbiased, we must nevertheless remind ourselves that the Germans did actually lose the war. Both of them, in fact.~HY

THE BLONDE

Eros: *3 issue miniseries ('Double Cross') 1991*, 5 issue miniseries ('Bondage Palace') 1993-1994*, 3 issue miniseries ('Phoebus III') 1995, 6 issues ('Twelve Pearls') 1996-1997*

Translations of the adventures of Italian foot-fetishist Franco Saudelli's extremely popular supercriminal The Blonde. Saudelli manages to incorporate bare feet, high heels and foot bondage at every opportunity as The Blonde shows off her rope tricks in these light-hearted tales. His style is smooth but naturalistic, and his love of the female form shines through. Although he regularly draws from life and uses photos to work unusual angles and compositions into his strips, unlike many artists his end result looks neither stiff nor disjointed. 'Twelve Pearls' as never concluded.~FJ

Recommended: 'Double Cross' 1-3

BLOOD: A Tale

Marvel/Epic: *4 issue miniseries 1988**
DC/Vertigo: *4 issue miniseries 1996*

Laboured, tedious necroporn about the trials of a young vampire man, with incestuous overtones and something to offend everybody, if they can force their way past J.M. DeMatteis' purple prose and the wispy, arty semi-nudity. Not PC, and sadly not VG either, despite a superficial overripe prettiness courtesy of Kent Williams' art. A cop-out reincarnation non-ending destroys whatever shreds of patience remain. The Vertigo issues reprint the four Epic issues, with new covers but, sadly, no added coherence.~HS

BLOOD AND SHADOWS

DC/Vertigo: *4 issue miniseries 1996*

Another tale of the walking (and frankly rather tedious) undead from the pen of Joe Lansdale. Chet Daly is hired to find a missing person and ends up trekking through realities as he fights The God of the Razor, a terrifying monster that slaughters its victims and wears parts of their skin, never able to completely destroy it. Unappealingly drawn by Mark Nelson, there are some grotesque elements that qualify this as a modern horror story but ultimately it's too derivative to be at all compelling.~NF

BLOOD BROTHERS

Eternity: *4 issue miniseries 1989*

A continuation of the story from *Bloodwing*, this slightly more cohesive tale explains the origin of the mysterious avenger known as Bloodwing: A genetiform (clone) possessed by the God of an alien race. Told against the backdrop of the Church of the New Flesh's attempt to subvert the Genetics Rights movement and seize control of Starbridge, and with the hero rushing about in a half-hearted imitation of someone actually doing something, it still fails to engender even the mildest thrill.~WW

BLOOD CLUB

Kitchen Sink: *One-shot 1992*

There's no current artist able to breach the mental barrier erected to withhold childhood fears in the manner of Charles Burns. His characters populate a twilight 1950s oozing sleaze or wholesomeness with little middleground, and there's always the lurking threat of the uncanny. *Blood Club* is an extrapolation on a children's campfire horror tale given the Burns twist and rendered in his thick lined and shaded style. As ever in his Big Baby tales, there's the clash of innocence and sordid reality. Nice. Confusingly for a one-shot, this is numbered 2 on the cover, being part of a uniform reprinting of Burns' Big Baby works, continuing from *Curse Of The Molemen* and preceding *Teen Plague*.~WJ

Recommended

BLOOD FEAST

Eternity: *2 issue microseries 1991*

Sub-standard adaptation of the Herschell Gordon Lewis film, which has been dubbed 'the first American splatter movie'. There's lots of poorly-drawn decapitation and buckets of blood as Ramses Faud, a deranged caterer, wantonly slaughters, usually nubile women in various states of undress. He takes a single body part from each corpse in his quest to re-enact an ancient Egyptian ritual. It fails to enthral, and even if you love gore, you'll hate this.~WW

BLOOD IS THE HARVEST

Eclipse: *4 issue miniseries 1992*

Marylynne Joseph's journalist brother is killed while investigating Lavia International. When she begins asking questions the company is revealed as a front for corporate vampires, but luckily she's saved by two vampire killers. This doesn't take itself seriously, thank goodness, but even a tongue-in-cheek approach doesn't compensate for minimal plot and unattractive art (which a change of artists fails to rectify).~WJ

BLOOD LEGACY The Story of Ryan

Image/Top Cow: *4 issue miniseries 2000*

Kerri Hawkins' tale of a 700 year old immortal has to surmount the drawback of three pencillers and no less than nine inkers over four issues abbreviating her long novel. It starts promisingly with a corpse being delivered to the care of medical research Dr Susan Ryerson and making a remarkable recovery. Thereafter, though, it's all downhill with a grating pomposity about the dour immortal Ryan, and the series sinks into gratuitous titillation as more of her past is revealed. A novelised version was later releashed.~WJ

BLOOD OF DRACULA

Apple: *Series one 19 issues 1987-1990, series two 2 issues 1991*

Three takes on Dracula are combined in the one title. The lead story in most issues occurs in 19th-century Bukovia and has the stale smell of Hammer Horror about it. 'Death Dreams of Dracula' is an abstract feature allowing for stories involving Drac only peripherally and at any time. Most segments are very slight, seemingly no more than an opportunity to engage a guest artist, with the best being Pat Boyette's Milton Caniff tribute in 7. This slim idea was later extended to a four-issue miniseries. Most interesting of the three is 'Dracula 2199'. Revived in a technologically advanced age that refuses to concede his existence, Dracula strives to reclaim his world. 15 comes with a flexi-disc, and 16-19 replace 'Death Dreams' with Berni Wrightson's Frankenstein illustrations. Ultimately the three-features format is an unsatisfactory mix, never allowing enough space in any issue for writer Rickey Shanklin to develop ideas. The second series is titled *Big Bad Blood of Dracula*, and actually features very little Dracula.~FP

BLOOD OF THE INNOCENT

Warp: *4 issue miniseries 1986*

Interesting and well researched telling of the Jack the Ripper story rather let down by shoehorning Dracula into the mix.~FP

BLOOD ON THE MOON

Last Gasp: *One-shot 1978*

This is the comics equivalent of a PBS documentary, an early work from Jack Jackson that he would later expand into his graphic novel *Comanche Moon*. It's the story of the final Comanche Chief Quanah Parker and his ultimately fruitless attempt to prevent white settlers dominating the southern states. It's odd to see Jackson leavening his dry style with gags and anachronistic language, while his always admirable art is far tighter and more detailed than the style he would eventually evolve.~WJ

BLOOD PACK

DC: *4 issue miniseries 1995*

An ill-conceived and ill-executed mess which concerns the soporific all-fighting antics of a group of what one hesitates to call characters who are recruited for a 'real world' type TV show by some naughty 'Producers' who are, surprise, out to control the world. Some of them look like X-persons and some of them look like toys. They all look awful.~GK

THE BLOOD SWORD

Jademan: *53 issues 1988-1992*

The Blood Sword clocks in at a generous sixty or so pages an issue, which is just as well because kung-fu sequences can occupy anything up to three quarters of them on a regular basis. And for the true aficionado the various moves are labelled! Martial arts combat is generally stilted in comics, with only a rare artist able to depict the poetry of action. Sadly, the primary artist Wing Shing Ma isn't of that calibre, although he is very good, and improves throughout the run. By the final dozen issues he's developed a finer line and better storytelling, and some pages are stunning.

The story starts with the conveniently named Hero searching out a mentor to retrieve a family heirloom, the blood sword, which considering it's the title sees little use during the run. 1-8 detail the attempts to free an enslaved mining community complete with Gene Colan Dracula swipes in 4 and 5. After developing a *Magnificent Seven*-like cast few make it through to the gang warfare in Chicago storyline that follows to 18. The action is frenetic as an ever more strangely named selection of characters pit themselves against Hero. One wonders why none ever just try to shoot him, mind. Tragic events precede Hero arriving in China (25), then returning to Chicago where a resolution of sorts occurs in 29. That issue also inexplicably switches focus to Kim Hung, the son Hero believes dead, now a precociously talented teenager. Father and son are reunited in 32 with rather a neat twist, under deceptive circumstances, although the truth comes out the following issue. If you've ever wanted to see Boy George as a kung-fu villain don't miss 36-38. 41 and 42 are as good samples as any, starring some villains who manage kung-fu in armour, and the best of the supporting characters, the armless Ghost Server. With the repetition of plot paramount, a couple of issues can be fun, but there's no depth of character to induce anyone to come back for more.~FP

BLOOD SWORD DYNASTY

Jademan: *41 issues 1989-1993*

Featuring the characters from Blood Sword, this continues the story of Kim Hung (Hero's son) as he becomes entangled in a struggle for the leadership of Hell Clan. The three factions (Elders, Bloods and Crips) are all choosing a champion, with various fighters challenging others in order to prove themselves worthy of consideration. Initially, Kim is simply a bystander, drawn into fights that threaten his friends (1-9), but a duel with Ask-Me-Not sees his new wife, Cher and Ask-Me-Not's girlfriend, Grace, caught in the middle and apparently lost (10-17). Kim now accepts the nomination of the Bloods and prepares for the competition between champions, only to be as surprised as Ask-Me-Not when the latter's expected nomination by the Elders is given to another (18-25). With the Clan leadership decided, the focus shifts to Hero, who's marked for assassination by Fiery Bird, and finds himself in the middle of a family feud on Fiery Bird Island (26-35). The final issues re-unite Hero and Kim, only for the Hell Clan to launch an attack on the island. This is beautifully drawn by Wing Shing Ma, but does suffer from the fact that most of the characterisation exists only through the endless kung-fu contests. There is, however, some romance and as the series progresses, a growing intensity, so that the outcome of these fights becomes more significant.~NF

BLOOD SYNDICATE

Milestone: *35 issues 1993-1996*

The experimental 'tear gas' used by the authorities to disperse the 'Big Bang', a huge gang battle, killed almost every gang member present. Those who survived gained strange, often disfiguring, powers, and banded together to establish themselves as Dakota City's toughest gang ever. As you can surmise from the premise, the Blood Syndicate are not nice people. They finance themselves by violence and theft, admittedly against other criminals, but still illegal, and don't hold back from maiming or killing opponents. They include crack addicts, racists, sexists, homophobes and other unpleasant types amongst their members. But being assembled from several fragmented gangs, which included women, gay men and various races, they are forced to get along, to mutually exploit each other's power. From this forced alliance a sense of family arises, of clan, which is intriguing to watch develop.

Blood Syndicate isn't a 'Big Event' title. The characters don't stagger from one crisis to another. Rather, the tension, in between the fight scenes, of which there are many, lies with the questions that arise between the protagonists. Will Brickhouse and Third Rail consummate their burgeoning relationship? Can they, since she now seems to be made entirely of stone? Will Fade blurt out the truth about Masquerade's gender before Masq reveals the truth about Fade's gender preference? Is DMZ really a 'brother from another planet'? It's these, and other questions, the human questions, that keep you coming back for more. Ivan Velez Jr, who writes thirty-two of the thirty-five issues, tugs on the heartstrings intelligently and deftly, creating an engrossing and poignant narrative that avoids overt sentimentality. CrissCross, the regular artist for most of the run until 30 (after a début issue drawn by Trevor Von Eeden), handles both drama and the bitter, bleak comedy of the characters well. Where the series is let down is by the colouring – and this is a criticism levelled, without exception, at the entire Milestone line. Much fuss was made of their 'Milestone 100' colouring process, but all it seems to do is enable them to colour in a hundred shades of grey, beige and mud. It makes their comics look dull and uninviting, which is a shame, as they're a generally well written line with much to offer.~HS

Recommended: 1-10

Cabbot: BLOODHUNTER

Maximum: *1 issue 1997*

Cabbot is a big angry brute, one of several such specimens who populated the wretched Bloodstryke title, adopting the titular name himself. As such expectations for the quality of a solo series were low, but this is an occasion where expectations are confounded. While sticking well within the parameters of brutal mayhem, writer and artist Rick Veitch adds inventive (and positively sadistic) touches as Cabbot takes another trip through the wringer. It's not the Sistine Chapel of comics, but within its limitations it was far better than might have been expected. It was continued, although never concluded, in Supreme 45-47.~FP

BLOODLINES

Aircel: *1 issue 1987*
Blackburn: *2 issues (2-3) 1987*
Vortex: *4 issues (4-7) 1987-1988*

A complicated thriller with symbolic undertones, written and drawn in a clipped, hard-to-follow style by writer and artist Rob Walton, assisted by Rick Taylor. Rival leather gangs battle for control of the streets and the drug trade that goes with them. This, however, masks "a full scale war of undisclosed divine importance", to quote Walton. Deborah Judges, an enforcer for one of the gangs, and fellow member Church Boy, face a crisis of conscience over the deaths their work involves. With cast members such as the horse-like Manasseh, Treblinka and police officers Maxine Daley and Thomas Pilate, you're left in little doubt as to each character's metaphorical function. Sadly 7's summing up seems to be a desertion before the plot has run its course, presumably not Walton's choice.~SW

BLOODLUST

Slave Labor: *1 issue 1990*

The opening chapter of a story about a war between two factions of vampires and a vamp caught in the middle. The art is far from the finished article, and despite some nice ideas, that this was just the set-up, and that story was never completed renders *Bloodlust* irrelevant.~FP

A bunch of trainees for the Youngblood team set up on their own after the Youngblood funding is cut. The ideas and dialogue are feeble, the storytelling and artwork atrocious. That's all you need to know.~FC

BLOODSCENT

Comico: *One-shot 1988*

Utterly pointless and predictable horror tale about a serial killer who in turn finds himself stalked. Dean Allen Schreck's captioned prose is accompanied by Gene Colan artwork reproduced from his pencilling, and although long adept at depicting moody horror, here he's given little to do beyond illustrating what's already in the captions. A more successful combination is provided by the prose back-up strip with Bernie Mireault illustrations, but the story is as dull as dishwater, an apt metaphor in this particular instance.~FP

BLOODSEED

Marvel UK: *2 issues 1993*

A mighty-thewed barbarian roams the frozen wastes, and, courtesy of artist Liam Sharp, encounters an equally startlingly endowed woman following the usual fantasy rule of "The colder it is, the less you wear". One of Marvel UK's Vertigo wannabe Frontier line, this takes advantage of the "Mature Readers" to present nudity and implicit nomping, but otherwise remains barbarians by numbers.~HS

BLOODSHOT

Valiant: *52 issues (0-51), 1 Yearbook 1993-1996*
Acclaim: *16 issues 1997-1998*

A Mafia hitman is set-up, disgraced, jailed, abducted, has his blood replaced by nanites and is left amnesiac. Some days it isn't worth getting up, is it? It's not all bad news, though. The nanites are able to repair body tissue almost instantly and they allow Bloodshot to control machinery. With that and armed to the max he's able to work for the British secret service as James Bond played by Rambo. He comes, he sees, he blows away, unless he's suckered, in which case he sees and blows away. 1-28 are dull, but with more challenging adversaries and better art matters improve slightly with 29. So what does it take to make Bloodshot a decent comic? Simple really: Kevin Van Hook's replacement as writer by Mark Moretti. Already-in-place artist Sean Chen produces dynamic action art, and Moretti's interesting plots and crisp dialogue make 40-48 worth a glance.

The Acclaim reworking of the premise is certainly visually more interesting – thank you Sal Velluto – but Len Kaminski's plot stretches the search for Bloodshot's identity far too long. Once concluded Bloodshot wanders around poking his gun barrel here and there with the lack of any supporting cast emphasising the plot deficiency. The defining characteristics of this series, though, are Kaminski's truly appalling narrative captions, gloriously failed attempts at terse soundbites. Fans of wretched writing should spare no effort to locate issues. Here's a sample from 13, by which time he's really hit form: "More than two decades later the heart of the mystery still beats; jackhammer muscle engine driving the haemorrhaging of reality"! And there's plenty more where that came from.~WJ

* Available in a collected edition

BLOODSTONE

Marvel: *4 issue miniseries 2001-2002*

Eighteen-year old, Elsa Bloodstone arrives in America and accidentally finds herself taking on the monster hunter mantle of her dead father, Ulysses. Before long, she's meeting Dracula and the Living Mummy whilst trying to keep her new occupation a secret from her mother. Dan Abnett and Andy Lanning can tell a good story but the series is let down by the dull, un-atmospheric artwork.~NF

BLOODSTRYKE

Image/Extreme: *Series one 23 issues (1-22, 25) 1993-1995, series two 4 issues (0-3) 1995*

A team of dead characters is quite a novelty, but in the appalling first few issues they're indistinguishable from any other Rob Liefeld creations. *Bloodstryke* has large splash pages, fight scenes, all kinds of misproportioned superheroes, more fight scenes, characters almost crushed by badly placed word balloons filled with expository dialogue, and some more fight scenes. When they're not beating villains up, they're beating each other up. With all that in each and every issue it would be simply churlish to request a plot as well. Replacing one set of crazy guys with a bunch of new characters, one of whom inherits the title's name, doesn't change anything. Did I mention the fight scenes?

The second series, *Bloodstryke Assassin*, takes the singular Bloodstryke for more of the same, pin-ups, fights and crazy sound effects. In 3 alone there's BROOSH!, BRAKKA BRAKKA BRAKKA, BUDDA! BUDDA! BUDDA!, VOOSH!, PTANG!, PCHOW!, and CHOOM! And that's only the first five pages!~FP

BLOODWING

Eternity: *5 issue miniseries 1988*

Twelve hundred years from now, Starbridge, a huge space station, is being fought over by four rival mega-corporations. It's the usual blend of high-tech nonsense as *Casablanca* meets *Blade Runner* and the few honest cops and administrators battle to keep a semblance of order in a corrupt and corrupting society. Into this mess comes Bloodwing, a mysterious avenger who helps and harms with no discernible motivation. There is a baffling array of sub-plots that go nowhere, including a subversive movement called 'Back To Earth', the Genetic Rights activists and various power cabals all jockeying for position, but none of it really makes much sense. This was compounded by Eternity publishing episode three in issue 2 and the second part of the story in issue 3. It came to an abrupt conclusion, declaring itself a miniseries with the last issue and the story continued in *Blood Brothers*.~WW

BLOODWULF

Image/Extreme: *4 issue miniseries, 1 Special 1995*

One of Rob Liefeld's, let's be polite, 'derivative' characters unexpectedly comes up trumps in the hands of writer Andy Mangels and artist Daerick Gross. On a quest to find his kidnapped mother, Image's Lobo clone proves much funnier than his spiritual parent ever was, in a pot-pourri of atrocious puns, sight gags, gratuitous violence (but funny gratuitous violence!) and wholesome family life. Lightweight, but great fun. The special is by a different creative team, and dismissable.~HS

BLOODY MARY

DC/Helix: *4 issue miniseries 1996, 4 issue miniseries ('Lady Liberty') 1997*

Written by Garth Ennis and beautifully drawn by Carlos Ezquerra, these are stories of a world at war, not so very far in the future, with Britain and the US fighting mainland Europe. Bloody Mary is the middle-aged survivor of a crack fighting team who, in 1, must find and kill her old commander before he sells a secret to the Europeans that will ensure their victory. In 'Lady Liberty' Mary is sent to stop a cult that has taken over New York and whose leader has vowed to impregnate 144,000 women. A very dark satire on the UK's current failing relationship with the rest of the world, Ennis' scripts are brutal, but witty. Each series is well executed and redeemed by its humour.~NF

BLUE

Image: *2 issues 1999*

This had the makings of a good series. The orphaned Blue lives with her Uncle, whose job is retrieving rogue robots illegally produced by the military in preparation for war. When Blue encounters one, she destroys it with ease, and makes the acquaintance of a mysterious hooded benefactor. She also has a normal school life to contrast the extracurricular excitement. The art is lovely in places, but inconsistent, probably due to being credited to three people, and some of the colouring is ghastly. Nevertheless, an intriguing comic that died too early.~WJ

BLUE BEETLE

Charlton: *Series one 4 issues 1955, series two 11 issues (1-5, 50-55) 1964-1966, series three 5 issues 1967-1968*

After a long and largely undistinguished career at Fox Comics throughout the 1940s, Blue Beetle was acquired by Charlton for a very poor four-issue run in 1955. Mind you, the 1964 series was no better: with infantile stories (one, embarrassingly, by a young Roy Thomas) and breathtakingly inept art from basement hacks Bill Faccio and Tony Tallarico the comic struggled to reach the dizzy heights of mediocrity. Still, with 'great' villains such as Mr Thunderbolt and Praying Mantis Man, and a hero whose physique resembled the Pillsbury doughboy, there's sniggers aplenty to be had here. The peculiar numbering, by the way, was unique to Charlton, who wouldn't think twice about cancelling a recently introduced series to continue the numbering of a completely unrelated title. In this instance it was mediocre horror comic *Ghostly Tales*.

Charlton's last attempt at reviving the character was a different kettle of fish entirely. It premiered as the back-up strip in *Captain Atom* 83-86: archaeologist Dan Garrett was gone, and in his place was scientist Ted Kord, with a new costume, a nifty flying vehicle, the bug, and a new artist, Steve Ditko. The new series had all the action and excitement of the strip Ditko had just left, *Amazing Spider-Man*, but lacked Stan Lee's ear for dialogue. Still, two particularly notable issues are 2 and 3. The first told how a dying Dan Garrett passed on the mantle of the Blue Beetle to Kord, and the latter featured outlandish villains The Madmen, surely prototypes for Ditko's DC creation The Creeper.

Another Ditko creation, The Question, ran as a back-up strip in each issue, contrasting with the light-hearted Blue Beetle strip. The Question was Vic Sage, a somewhat acerbic and sanctimonious TV newsman, whose Question alter ego (basically Sage with a blank mask covering his face) was frighteningly uncompromising. For some reason, although he wrote both series, Ditko credited them to D.C. Glanzman, who worked in Charlton's production department. 5, the best issue, reeks of Ditko, as both strips feature stories mercilessly attacking modern art and liberal values. The feverish intensity is breathtaking, though it's doubtful anyone will actually agree with his seething invective. A sixth issue, drawn by Ditko, wasn't printed at the time, but its Blue Beetle strip appeared in the now rare *Charlton Portfolio*. The Question strip, a continued story intended to run over four parts, and almost completed at the time of cancellation, was later published as *Mysterious Suspense*.~DAR

Recommended: Series three 1-5

BLUE BEETLE

DC: *24 issues 1986-1988*

The first issue could be the template for the traditional superhero comic. Blue Beetle comes out of retirement to kick the issue off, and his alter ego millionaire chemist Ted Kord is on top of the world, in demand and popular, with an efficient secretary, cute lab-researcher girlfriend and an Asian-American former college buddy. In addition to the firestarting villain, though, there's the foreshadowing: a lab assistant up to no good, a surly type rummaging around an island tying in to the Beetle's origin and the police about to re-open the investigation into the death of his predecessor. Len Wein and Paris Cullins follow through with all plots for a pleasingly good-natured, if unsophisticated, superhero series. Early villains include a welcome return for the Madmen in 3 from Blue Beetle's Charlton days, followed by a bunch of DC's more colourful old villains such as Dr Alchemy, Chronos and the Calculator. The latter's appearance in 8 is the best sampler, telling a complete story in the one issue. The Question guest-stars in 5-7, the Teen Titans grace 11-13, Ross Andru pencils from 15 and everything comes to a satisfactory conclusion with the final issue. What more could you want? Maybe Steve Ditko.~FP

BLUE BULLETEER

AC: *One-shot 1989, one-shot 1996*

Cheesy World War II adventures of a Bulletman and Bulletgirl knock-off. Poorly executed graduate from Fem Force. One for the fanboys only.~WW

BLUE DEVIL

DC: *31 issues, 1 Annual 1984-1986*

Stuntman Dan Cassidy encounters an escaped demon and finds himself merged with his B-movie stunt suit, leaving him big and blue with horns. Cassidy comes to terms with his new identity, moves into a house connected with other dimensions, and also appears to act as a 'weirdness magnet'. With a CV like that *Blue Devil* was never going to be gut-wrenching melodrama, and fun is the watchword for writers Gary Cohn and Dan Mishkin. Unfortunately they straddle a thin line, resulting in slapstick comics some of the time, albeit slapstick comics drawn by Paris Cullins and Gary Martin and later Alan Kupperberg and Rick Magyar (then Bill Collins) in an excellent flowing style. Sometimes, though, the silliest ideas work well, as with the introduction of Kid Devil in 14. For a flavour try the annual, guest-starring a selection of DC's stranger heroes, or 25, the St Patrick's Day special.~WJ

BLUE EYES

White Lightning: *5 issue miniseries 2001-2002*

Maria returns to school in Japan after several years in England, immediately turning to old flame Tatsuya, who remembers that at their last meeting she promised him sex on her return. Maria, however, proves to be only the first girl who wants to prove her love for Tatsuya. Fans of top heavy women may well be delighted with this otherwise undistinguished hardcore. A second miniseries is scheduled for 2003.~NF

BLUE HOLE

Christine Shields: *2 issues 1995-1997*

The main features are about how a shape-shifting dog, Cotton, meets Ruby and the Kerosene Boy, and follows their surreal adventures (including pirates and Tony Millionaire), plus the dreams of Violeta Francesca and her wilful refusal to follow a pre-ordained script. There's a Kerosene Boy tale in 2, about two recently dead souls. Both issues have occasional pages telling true stories (a naked man swimming with dolphins, a couple shot in the local park). Christine Shields has a similar approach to storytelling (dreams, facts and non-sequiteurs) as Dame Darcy, but uses more open and varied cartooning styles.~NF

BLUE LILY

Dark Horse: *2 issues 1993*

An Angus McKie creation based on Dave Weir's short story. Rusty Spade – metallic, semi-sentient, cigar-smoking, philosophising, robotic private dick – is hired on an ostensible missing-persons case that subsequently proves to be the tip of an iceberg. This dense read is lovingly littered with complex and subtle puns, but the relentless, metaphysical dialogue turns from fresh and challenging to overbearing. The non-publication of the final two issues of this projected four-issue miniseries delivers unfulfilment.~APS

BLUE LOCO

Kitchen Sink: *1 issue 1998*

Mark Landman came to prominence via some terrific short strips in *Snarf*, and this was the first solo outing for his computer generated artwork. Visually a treat, with all manner of surreal cartoons and psychedelic effects, compared to earlier strips the shock value is diluted when spread over an entire comic. That said, for those of you dying to read a strip called 'Fetal Elvis' reprinted from *Buzz*, or 'The Misadventures of Spud-X' (Popeye reborn as a potato) this is the comic for you.~DAR

BLUE MONDAY

Oni Press: *3 issue miniseries ('The Kids Are Alright') 2000*, 4 issue miniseries ('Absolute Beginners') 2001*, one-shot ('Love Cats') 2002, one-shot ('Dead Man's Party') 2002*

Bleu Finnegan, blue-haired Adam Ant fan and her friends Clover and Erin have to enjoy (endure) typical high school antics, romances and substitute teachers. 'The Kids Are Alright' concerns Bleu's attempts to acquire tickets for an Adam Ant concert, while in 'Absolute Beginners', attempts to recover a compromising videotape require her to accept a date from one of the boys who filmed it. A budding romance creates plenty of misunderstanding before a Valentine's Day dance in 'Love Cats' and a Halloween party, cut-short by bad weather causes those remaining to indulge in some amusing, parody-horror story telling, in 'Dead Man's Party'. This last is amusing, but doesn't engage with the characters as well as previous issues.

With its well-observed dialogue littered with references to British music, mostly from the 1980s, its manga-influenced expressions and its generally stylish storytelling, this is an amusing and very entertaining tale of modern American youth from creator, Chynna Clugston-Major. The collection of 'The Kids Are Alright' also contains all of the Blue Monday stories from previous appearances in *Dark Horse Presents*, *Action Girl* and *Oni Double Feature*.~NF

Recommended: 'The Kids Are Alright' 1-3, 'Absolute Beginners' 1-4, 'Love Cats'

BLUE MOON

Mu Press: *5 issue miniseries 1992-1993*, one-shot ('A One and A Two') 1995*

Lyssa Strada is thirty-two and seems unable to assert herself, either at work or in deciding whether to go out with a housemate, Mac, who has a crush on her. Another housemate, Eleanor, is working on a discombobulationotron, which somehow means that Lyssa can step through a door and find herself living the life of a pirate in a world populated by familiar looking characters as well as young Miranda and her boyfriend, Caliban, a big green demon. Essentially a comic romance, this is wittily and pleasantly drawn by Charlie Wise in a style similar to that of Phil Foglio. The one-shot actually reprints 1-2, while the whole is available in a 1998 collection from Morgan Publishing Inc.~NF

BLUE RIBBON COMICS

Red Circle: *4 issues 1983-1984*
Archie: *10 issues (5-14) 1984*

A showcase series to support Red Circle's re-introduction of Golden Age characters as stars of their own books during the early 80s. On the whole *Blue Ribbon Comics* suffered from changes in editorship and direction but did produce some interesting material. Two issues (1 & 10) reprint Fly material by Joe Simon and Jack Kirby and Al Williamson and there's more Kirby in 5, which contains reprints of Lancelot Strong: The Shield. New stories feature the following characters: Mr Justice (2); The Fox (6,7); Black Hood (11), Agents of Atlantis (9); Jaguar and The Web (14).

There are two worthwhile pieces: the Steel Sterling story in 3, a delirious romp through themes that have always motivated scripter Robert Kanigher's characters (in which a cute puppy bears the same relationship to Steel as 'my brother' the wolf does to Enemy Ace); and issue 8,

---

* Available in a collected edition

a Black Hood special featuring stories drawn by Gray Morrow, Al McWilliams and Neal Adams with Dick Giordano on inks. And a Toth pin-up. Classic stuff.~NF
Recommended: 3, 8

BLUEBEARD

A dark and disturbing story about a man who adds to his wealth by marrying and murdering lonely rich women. Interesting storytelling from James Robinson, using a different character as the narrative voice for each chapter, and artwork from Phil Elliott, successfully adapting his open, clean style to a darker mood to match the tale.~FP
Recommended: 1-3

BLUEBERRY

Epic/Titan: *5 Graphic Novels 1989-1990, Lieutenant Blueberry 3 Graphic Novels 1991, Marshal Blueberry 1 Graphic Novel 1991*
Mojo Press: *1 volume (The Blueberry Saga 'Confederate Gold') 1996*

Charlier and Giraud's *Blueberry* is one of the best-loved and best-received Western series in the history of comics, running to some twenty-three volumes (plus several *Young Blueberry* volumes) following the career of Mike Blueberry during the most turbulent years of America's history. It starts with the Civil War, the building of the railroads and destruction of the Indian Nations to the onset of 'civilisation' that killed off the life of soldiering, tracking and hunting that Blueberry and his friends enjoyed.

Epic begin their reprints towards the end of the saga, with one of the most complex and harrowing series of graphic novels reprinted in five colour volumes. They were later reprinted (poorly) in a single black and white edition by Mojo Press. The mature Blueberry, in the army and on patrol near the turbulent Mexican border, intercepts a message for President Grant, concerning a shipment of Confederate gold that went missing in the final days of the War. Blueberry is sent to look for it, but to give him cover government agents arrange for him to be courtmartialled and escape with a price on his head. When he finds that the gold has disappeared from its hiding place he becomes a wanted man in earnest. The *Blueberry* graphic novels, starting with Chihuahua Pearl, see the hero imprisoned, embroiled in a plot to assassinate the President, hiding out with the Apaches during "The Long March" and facing a Mexican firing squad. Everyone and his brother wants that gold, and most of them believe Blueberry knows where it is.

The three, slimmer Lieutenant Blueberry volumes and single Marshal Blueberry volume come from an earlier period, around the time of the construction of the Atlantic-to-Pacific railroad, when two companies were vying to see who would get furthest into the American heartland (claiming land rights as they went). Charlier's scripts are particularly good at interweaving history and fiction, with Blueberry playing an interesting, but not significant, role in many historical events. The art, by Jean Giraud (better known as Moebius), is realistic but splendidly wrought, full of vibrant detail but very smoothly paced and fast-moving, despite quite a wordy script. Excellent throughout.~FJ
Recommended: Blueberry 1-5, Lieutenant Blueberry 1-2, Marshall Blueberry 1

BOB MARLEY: Tale of the Tuff Gong

Marvel Music: *1 issue 1994*

Charles E. Hall scripts a eulogistic recounting of the life of reggae legend Marley, illustrated by Gene Colan. Peter Kuper provides maps and spot illustrations and there's also a brief illustrated history of Rastafarianism. Pretty, but lightweight.~WW

BOB THE GALACTIC BUM

DC: *4 issue miniseries 1995*

John Wagner and Alan Grant treat the American comic-reading public to the sort of inventive whimsical and humorous science-fiction series they've written so adeptly in the pages of 2000AD over the years, accompanied by long-time cohort, artist Carlos Ezquerra. Or at least that was the idea. Bob is transparently W.C. Fields attempting to finagle favour with the idiot heir to five galaxies stranded in space with him. Lobo, heavily cover-featured for commercial purposes, limits his contributions throughout, and overall there are not enough jokes packed in to compensate for a paucity of plot. The repeated jokes about the blind axemen consistently raise a smile, though.~FP

BOBA FETT

Dark Horse: *3 issue miniseries 1995-1996, one-shot ('Battle of the Bounty Hunters') 1996, one-shot ('Twin Engines of Destruction') 1997, 4 issue miniseries '(Enemy of the Empire') 1999*, one-shot ('Agent of Doom') 2000*

Three one-shots comprise the first miniseries. In 'Bounty on Bar-Kooda', the bounty hunter is hired by Gorga The Hutt to kill the eponymous space pirate to ingratiate himself with his future Hutt father-in-law, whilst in the follow-up, 'When The Fat Lady Swings', Gorga's new bride is kidnapped and Boba Fett has to rescue her whilst avoiding Bar-Kooda's revenge-mad big brother, Ry-Kooda. The third story, 'Murder Most Foul', has Ry-Kooda even more anxious to get our hero, smarting from his humiliation at the end of the previous episode. It's all well-written and painted by John Wagner and Cam Kennedy, but it's nowhere near their usual high standard.

In 'Battle of the Bounty Hunters', Fett must compete with IG-88 to deliver Han Solo's carbonised carcass to Jabba The Hutt in a Pop-Up hardcover. 'Twin Engines of Destruction' has Fett fighting an imposter intent on stealing his reputation as the Galaxy's greatest Bounty hunter in a plodding and predictable tale. 'Enemy of the Empire' restores much-needed humour to leaven the usual brutality. John Wagner and Ian Gibson tell the story of Fett's first meeting with Darth Vader as the Bounty Hunter is hired to track down an Imperial deserter and a mysterious chest, in a solid adventure romp, lavishly illustrated. 'Agent of Doom', by John Ostrander and Cam Kennedy is a superficial yarn outlining the hunt for xenophobic genocidal alien killers. Strictly for the dedicated.~WW
Recommended: Enemy of the Empire1-4

BODY BAGS

Dark Horse: *4 issue miniseries 1996-1997**

Mack is a giant of a man who wears a satanic smiley-face mask when he goes about his business, which is bounty-killing. On his uppers with a dying father, the last thing he needs is for his cocky and resourceful 14-year-old daughter Panda turning up and wanting to join the family business. Cute and stacked, she can also handle herself, and isn't about to take 'no' for an answer. Writer and artist Jason Pearson sets Body Bags a few years in the future, and has realised a convincing society with some amusing throwaway extrapolations on today. The seemingly over-the-top nature of Mack's behaviour, particularly when confronting a drug dealer in the first issue, will possibly outrage some readers. Suitably warned, however, delight in the imaginative characters, settings and dynamic art.~FP
Recommended: 1-4

BODY DOUBLES

DC: *One-shot 1998, 4 issue miniseries 1999-2000*

The voluptuous contract killers from *Resurrection Man* were given a solo tryout as part of the *New Year's Evil* series facing off against their fellow assassins. It's a light and sometimes amusing read from Dan Abnett and Andy Lanning, with Joe Phillips' pencils accentuating the girls' finer points. The miniseries by the same team stretches the joke too thin.~FP

BODYCOUNT

Image: *4 issue miniseries 1996**

Originally advertised as Casey Jones and Raphael, bar room brawler and Teenage Mutant Ninja Turtle become involved in a running gun-battle between mercenaries, siding with Midnight, an extremely pneumatic Elektra look-alike. Her adversary is Johnny Woo-Woo, who works for Dong from Hong Kong. This might sound funny until you see how many goons, cops and bystanders are smeared by automatic weapons, collisions and explosions, with a surfeit of blood and violent death depicted throughout. An article in the collection relates how Kevin Eastman wrote and laid out the story before Simon Bisley re-drew it. Considering how much effort went into the artwork and colour, the lettering is squashed and amateurish. Some dialogue is corny enough to convince that this is supposed to be satire, but the repeated relish with which the carnage is shown shouts "double standards".~SW

BOG: Swamp Demon

Hall of Heroes: *4 issues 1996-1997*

Bog is the demon, Bauggroth, escapee from Hell, planning a new, non-evil, life on Earth. Both Heaven and Hell seem opposed to this plan, sending Mogog and Etherial respectively to kill Bog, who's befriended a young woman, Stephanie and a priest, Father Renault. At the point where the three of them appear to be linked to the fate of the whole human race, the series ends, though there is an out of continuity story in the *Hall of Horrors* anthology. The series isn't sure whether it wants to be a horror or superhero title while the covers by Steve Bissette promise much more than the interiors can deliver.~NF

BOGEYMAN

San Francisco: *2 issues 1969-1970*
Company and Sons: *1 issue (3) 1970*

Rory Hayes was a deeply troubled artist whose crude, childlike style had a powerful intensity. *Bogeyman* was his horror title, and its material was uniformly disturbing, primarily for the insight it appeared to give into Hayes' psyche. It's also of great historical importance as one of the first underground horror comics, and by the second issue it had attracted a number of underground stars. Jay Lynch (2, 3), Jim Osbourne (2) and Greg Irons (3) are among those weighing in with significant contributions, but it remained very much Hayes' title.~DAR

The BOGIE MAN

Fat Man Press: *4 issue miniseries 1989-1990**
Tundra: *1 issue 1992*
Atomeka: *4 issue miniseries ('Chinatoon') 1993*

Francis Clunie is possessed of a personality disorder through which he's convinced he's Humphrey Bogart in *Maltese Falcon* mode. The first series has him causing chaos in Glasgow, and comes complete with a glossary. John Wagner and Alan Grant's hilarious scripts are adroitly rendered in totally deadpan fashion by Robin Smith, making them even funnier. Removing Clunie to the USA for the one-shot results in a diluted Bogie Man, although not without funny moments. That the concept withstands a repeat performance is demonstrated by Clunie's return to Glasgow and to form for 'Chinatoon'. Paradox issued a second collection of the first series in their pocketbook format.~FP

Recommended: Fat Man Press 1-4, Atomeka 1-4

BOHOS

Image/Flypaper Press: *3 issue miniseries 1998*

Dissatisfied teens try to cope with daily life, attend a movie and a music festival, and cop attitudes. The women are far too smart and witty to be realistic, but not smart enough to see how daft psuedo-aviator shades look. The guy needs no accessories to be dumb, while the art strives to be cute, and is given an oddly stained glass effect by unappealingly vivid colouring. It's all meant to be funny, but isn't except in the most earnest manner, leading to expectations of a laughter track every time a page is turned. The most interesting aspects of the comics are the essays by real teenage girls on the editorial pages, but that's undermined by the blatantly sexist ads for other Image titles that follow. For friends of the creators only.~FP

BOLD ADVENTURE

Pacific: *3 issues 1983-1984*

A showcase for the scripts of Bill Dubay, *Bold Adventure* featured an eclectic mix of SF/Fantasy and adventure serials. 'Time Force' (1-3), illustrated by Rudy Nebres, is about how good Armageddon will be. 'The Weirdling' (1-2), drawn by Trevor Von Eeden, features an amnesiac who seems to be able to turn into a shadow. Alex Niño illustrates a story about mercenaries (2-3) and John Severin draws the first part of 'Spitfire' (3). Though all four artists mentioned are generally worth a look, these stories don't inspire their best work.~NF

BOMBA the Jungle Boy

DC: *7 issues 1967-1968*

Based on a TV series, this was a worthy try at the jungle hero theme. Following a poor start the series steadily improved under the talents of Denny O'Neil and Jack Sparling. But nothing really to beat your chest about.~HY

BONE

Cartoon Books: *20 issues 1992-1995**
Image: *6 issues (21-27) 1995-1997**
Cartoon Books: *23 issues + (28-50) 1997 to date*

Three cousins of indeterminate species, Fone, Phoney and Smiley Bone, are run out of their community by outraged townspeople, and become separated and lost in the desert. By different circuitous routes, they find their way to a forested valley, and are forced to rebuild their lives amongst wonderful and terrifying creatures, not the least of which are the human townspeople. Though owing more than a slight debt to Walt Kelly's *Pogo*, Jeff Smith successfully created a charming and intricate fantasy world, with memorable antagonists (the quiche-eating rat creatures), and occasional hilariously surreal moments (The Great Cow Race 10). Given this level of creativity and imagination, Smith's revelation about his heroine Thorn's past fell particularly flat. Not wishing to divulge a major plot twist, "oldest fantasy cliché about a character's parentage", will let you work it out. Yawn. I mean Y*A*W*N. This misjudgement irritated many people to the point of giving up the series. Smith's endearing characters rallied from this error on their creator's part for a time, and the series remains a solid, meticulously crafted read. It's just a shame that as the plot veers away from the character-based humour and poignancy of the first dozen issues, and more into (someone has to say it) bog-standard fantasy quests and battles, the Bone cousins look increasingly out of place in what's ostensibly their own comic. It should be noted that early issues have multiple printings, and that Image, during the short time they took over publication of the series, also reissued 1-20 with new covers, and Cartoon Books have since reissued the Image issues just to cause further bewilderment. Check the interiors before buying. In addition to keeping the individual comics in print, there are numerous collections.~HS

BONESHAKER

Caliber: *One-shot 1994*

Phil Hester's surreal Euro-style science fiction thriller of a hulking and unlikely hero trying to return to his home world. Intriguing, but works better as a serial, as in its original outing in *Negative Burn* 11-15 where it ran as 'Adventures on the Planet of Exile'.~WW

BONEYARD

NBM: *8 issues + 2001 to date*

A young man, Michael Paris, decides to check out in person the small plot of land he's inherited from his grandfather before finalising its sale to the town council. Reaching the small town of Raven's Hollow, Paris is astonished to be greeted by the populace as a local hero. It turns out his inheritance is the local graveyard, and whom the townsfolk wish to evict the strange and disturbing monsters who inhabit it. These include the gorgeous vampire Abbey and a terrifyingly friendly lady sea monster with a jealous husband. Torn between the Mayor and the townsfolk on one side, and Abbey, Nessie and the denizens of the Boneyard on the other, Paris takes his stand, and overcomes the greater evil, only to face the spectre of a still greater one – the Internal Revenue Service! Writer/Artist Richard Moore has created a delicious confection, a modern-day Addams Family, but this time a chosen family rather than a nuclear one; Paris bonds with the endearing monsters against the duplicitous 'normal' world, and his halting relationships with them are a charming and compelling read. A collection of 1-4 is available.~HS

Assorted deserving cases (including the critic in 1) receive their come-uppance in a series of short stories from Aragonés and Mark Evanier. Their characteristic wry observations about humanity are present and correct in diverting tales that would be very dark indeed if not for Aragonés' humourous cartooning. The covers join nicely into one large illustration.~WJ

PI: THE BOOK OF ANTS

Artisan: one-shot 1998

Written by Darren Aronofsky, this is a pared-down, in many ways more accessible, version of his own film. Max Cohen is a mathematician searching for the hidden numerical pattern that will lay the secrets of the stock market open to him. Barely able to function outside the apartment in which he's built an elaborate computer, he struggles with headaches and an infestation of ants. The crosshatched artwork of Edward Ross Flynn perfectly captures the downward spiral of Max's existence.~NF

Recommended

BOOK OF BALLADS AND SAGAS

Green Man Press: *4 issues 1996-1997**

Fey, self-published title from Charles Vess, who prettily illustrates traditional folk tales interpreted by his writer mates, including the ever-popular Neil Gaiman and, strangely, the acidly-observant detective novelist Sharyn McCrumb. Some original ideas from the writers are balanced by Vess' traditional approach to illustration. 1 starts badly with two reprints, and although Vess reprints the ballads and discusses folk literature, his strips add no commentary; they illustrate, for those lacking in imagination, but that's all. Pretty package; pretty insubstantial too.~FJ

BOOK OF FATE

DC: *12 issues 1997-1998*

Follow-up to Fate featuring the same anti-hero, Jared Stevens, a tomb-robbing Indiana Jones wannabe specialising in mystic artefacts, who unwillingly becomes the new Doctor Fate. Composed of exactly the same amount of Order and Chaos, he rejects both, spending his time whining and running from a variety of mystic menaces. Avoiding the warring Lords of Order and Chaos, the Four Horsemen of the Apocalypse and even Amethyst, Princess of Gemworld, he goes on a drinking binge to oblivion with his new pal Lobo. Creators Keith Giffen, Ron Randall and Alan Grant produce the most uninspired work of their careers.~WW

Charles Vess' BOOK OF NIGHT

Dark Horse: *3 issue miniseries 1987*

Mostly a series collecting Charles Vess' work for *Epic Illustrated*, it also contains some early and obscure pieces that hadn't seen print before. In this latter category are 'Bug Tales' (1), 'Morrigan's Tale' (1) and 'Priest' (2). 'Legend' (2) and 'Spirit' (3) are short self-contained fantasy pieces while 'Jack Tales' (2, 3) are two magical adventures of a young man whose companions are small flying robots. The longest piece is 'Children Of The Stars' (1-3, from Epic Illustrated 8-10), which is another fantasy piece about a young woman's quest to destroy the demon lord who wiped out the People of the Stars, leaving her and her brother the only survivors. 'Legend' and 'Spirit' are both written by Laurie Sutton but the rest of the material is all by Vess. His delicate, sinewy and detailed pen and ink work is always a pleasure to read despite the often light and insubstantial stories.~NF

BOOK OF THE DEAD

Marvel: *4 issue miniseries 1993-1994*

Aptly-named reprint comic featuring the earliest appearances of Man-Thing in stories from *Savage Tales* 1-2, *Astonishing Tales* 12 and *Fear* 10 onwards. Alongside are reprints of *The Frankenstein Monster* and some choice 1950s horror reprints. The Man Thing stories by Gerry Conway and Gray Morrow, Neil Adams, Jim Starlin and co. are expensive collector's items, so make this a well-planned reprint. Man Thing sits well with Mike Ploog and Gary Friedrich's customised account of the modern legend of Frankenstein.~SW

The BOOKS OF FAERIE

DC/Vertigo: *3 issue miniseries 1997*, 3 issue miniseries ('Auberon's Tale') 1998*, 4 issue miniseries ('Molly's Story') 1999*

The first two of these *Books of Magic* spin-off miniseries, by Bronwyn Carlton and Peter Gross, concern the machinations of Lord Amadan. This is firstly in explaining the secrets of Queen Titania and Tim Hunter's parentage, secondly in a prequel that explores the nature of power in Faerie and sets the scene for a royal downfall. These are visually appealing without being cutesy, but 'Auberon's Tale' is far more interesting, not needing to toe any line about the dull Hunter.

'Molly's Story' sees Molly, ex-girlfriend of Hunter, cursed by Queen Titania not to be able to touch the ground, involved in a confrontation between Faerie, the demon, Barbatos and the witch, Briar Rose. John Ney Rieber's smug, unsympathetic script fortunately doesn't detract from the engaging character of Molly, but the jarringly distorted artwork of Hermann Mejia (1-3) is off-putting.~NF

The BOOKS OF MAGIC

DC/Vertigo: *4 issue miniseries 1990-1991*, one-shot (Arcana Annual) 1994, 75 issues, 2 Annuals 1994-2000*

Thirteen-year-old Tim Hunter is the designated heir to the power of magic in the DC Universe, and four supernatural experts – the Phantom Stranger, John Constantine, Dr Occult, and Mr.E – must determine whether he can be allowed to attain that power, or whether he must be destroyed to save humanity. Neil Gaiman writes the miniseries, with four different artists, respectively John Bolton, Scott Hampton, Charles Vess and Paul Johnson, each sumptuously illustrating one of the episodes. The star turn is Vess' lavish and intricate portrayal of the Realm of Faerie in 3. Following this success, the one-off *Arcana Annual* formed part of the *Children's Crusade* crossover, and reintroduced Tim to the comics world, setting him up for his own title. *The Books of Magic* ongoing series, written by John Ney Rieber and drawn, mostly, by Peter Snejbjerg, follows young Tim as he struggles through adolescence, a tricky enough minefield for anyone, let alone someone of his potential power. Compared to the epic and dazzling miniseries, a lot of people find the ongoing series a tad subdued, but it's merely working with a subtler canvas. Aware of the monster that he may still become in the future, searching for the truth behind his parentage, and coping with hormonal barrages, Tim keeps his perspective through all these upheavals with a hard core of common sense and a refreshingly mordant sense of humour which is a pleasure to behold.

With 51 Peter Gross takes over as writer and artist, and takes the series in a different, but equally intriguing direction. There are occasional stylistic misfires (the initial penchant of Gross for doing bait'n'switch 'deaths' of his leading characters – or are they? – gets old *very* quickly) but he shows invention in refreshing the series. The Other, the new nemesis of this run, is chillingly effective, and in a storyline that is even more densely-plotted than previously Tim faces loss, bereavements, and other major life changes. His transfer to boarding school in 53 not only cues up some major dramatic plot threads, but also generates very funny misunderstandings.

Books of Magic is probably one of the least 'new reader friendly' series around; despite its undoubted quality, which is much more consistent than the acclaimed but highly variable *Sandman*. The involved narrative and general lack of pyrotechnics prevents it from drawing in punters. No doubt this led to its eventual demise, as the inevitable falling-off in readership was not replaced. Nevertheless, although far better read in the collected complete story arcs than in the original monthly instalments, *Books of Magic* is a quiet treasure, greatly underestimated.

Mention must also be made of the superlative cover illustrations by Mike Kaluta throughout most of the series, intriguing scenes that attract without misleading readers as to the content. Given the general fondness of Vertigo's editors for muddy soft-focus artwank in various shades of grey or beige as their covers of choice, the clarity, detail and quality of Kaluta's work is a pleasant relief~HS
Recommended: Miniseries 1-4, 1-75

BOOM BOOM

Aeon Press: *4 issues 1994-1995*

An admirable diversity of subject matter and artistic styles from David Lasky over four issues is counterpointed by a tendency to meander. This means the issues don't always reward, but more than merit investigation. 2's recounting of the manner in which James Joyce came to write *Ulysses* is unusual enough for comics, but by drawing in faux Kirby style Lasky shunts it well into uncharted territory for the best of the run.~FP

BOONDOGGLE

Knight Press: *4 issues 1995-1996*
Tapestry: *One-shot ('Special') 1996, 2 issues 1997*

Bumper (Beauregard McGillicuddy) is an attention deficit suffering six year old, living at the Hossenfeffer Boarding House with his guardian, Aristotle (a rabbit), Flea (Bumper's dog), Potpre (a pig). Roxanne is Bumper's long-lost sister, looking for her brother in the town of Boondoggle, where she runs across Barbados Salinger, who is the resident slacker and leader of the 'Slack Pack'. The running joke is that Bumper causes chaos wherever he is (a bus, a concert, a waffle house, and a 7-11 – the latter admittedly during a robbery). Steve Stegelin has an interesting premise and the comedy dialogue and large cast are well handled, but his artwork for the Knight Press issues is cleaner and easier on the eye than on later issues.~NF

BOOSTER GOLD

DC: *25 issues 1986-1988*

Dan Jurgens' creation was perhaps the least altruistic hero ever to hold down a mainstream title. Michael Jon 'Booster' Carter was a promising 25th-century sportsman who threw away the chance of a stellar career by fixing games for a quick buck. Ruined by the allegations, he ended up a cleaner in a superhero museum, where it occurred to him that if he nicked a time-machine he could travel back to the past with future technology that would give him relative superpowers. And a quick check on the late 20th-century movements of the stock exchange could net him a small fortune while he was at it. While this could have made for an unsympathetic character, Jurgens made him a loveable rogue, throwing in numerous red herrings and sly hints about his mysterious background before the full truth came out in 6. Surprisingly, the revelation did harm sales – leading to an interesting letters-page debate – and Booster was soon packed off (along with his strong supporting cast) back to the future to suffer a little for his crimes, before it was revealed that everything he'd done had been leading to a destiny which had to be fulfilled. He returned to the present A Better Person, but the series never really found its way again, lost in guest stars and crossovers until it petered out in the middle of the cross-company multi-parter, *Millennium*. The character moved into, various incarnations of the Justice League. Issue 6 is notable for the first appearance of the post-*Crisis* Superman.~JC.
Recommended: 1-9, 13-15

BOP

Kitchen Sink: *1 issue 1982*

A great John Pound cover depicting dancing jukeboxes gives a false impression of a largely disappointing attempt to merge music and comics. That the articles outshine most of the strips sings volumes. Page after page of dull material is finally vindicated by the brilliant Alex Toth, managing to convey more life and rhythm in five pages than in the entirety of the previous forty-nine.~FP

BORDERWORLDS

Kitchen Sink: *7 issues 1986-1987, one-shot ('Marooned') 1990*

Intelligent science-fiction series written and drawn by Don Simpson. On a deteriorating artificial world, political renegades and pirates cross paths and try to avoid the attention of the authorities. Strong characterisation and a willingness to develop the situation slowly mean that the individual issues never seem to have a great deal of action but everything suggests that this would have been a classic if it had ever been completed.~NF
Recommended: 1-7, 'Marooned'

BORIS' ADVENTURE MAGAZINE

Nicotat: *3 issues 1988 (1), 1996 (2-3)*

The 1988 issue was a rather pointless Rocketeer parody issued alongside the regular comic when it would have fitted there just as well. The 1996 continuation is an altogether different beast. The cute, cuddly Boris still occupies the lead strip with comic parodies (Punisher in 1, Captain America in 2), but there are also two back-ups. Bikini Beach Patrol is a parody of *Baywatch* style tit'n'arse TV and there's an un-named science-fiction strip with even more cute cuddly animals. All very nicely drawn, but following a well trodden path.~FP

BORIS KARLOFF TALES OF MYSTERY

Gold Key: *97 issues 1962-1980*

Titled *Boris Karloff Thriller* for the first two issues (which were 80-page giants), this was the first Gold Key anthology title, and the early issues contain some fine artwork. You can't go wrong with the likes of Crandall, McWilliams, Orlando, Torres, Williamson, Wood and Jeff Jones (in 21). The stories are initially competent too, if uncredited. After the first twenty or so issues the quality dropped and the later trend for Filipino artists at Gold Key meant that if you've seen one 1970s issue you've seen them all, although McWilliams still appears occasionally.~SW

BORIS THE BEAR

Dark Horse: *12 issues 1986-1987*
Nicotat: *22 issues (13-34) 1987-1992*

Starting as a parody with a cute robot teddy bear beating up characters starring in other titles, creator James Dean Smith moved beyond to social humour as he began self-publishing with 13. Smith's appealing artwork is a strongpoint of the title, which otherwise has largely one-dimensional characters and repeated jokes. This works for *Groo*, but Smith and collaborator Steve Mattson aren't quite up to making recurring encounters with the neighbour's cat funny. The series isn't without charm, though, and typical of the run are 9 and 10's defection of G.I. Joseph or 15's day in the life of Boris. If you like them you'll probably enjoy the others. 32 and 33 are different, stepping out from the fiction into 'reality'. 1-3 were reprinted in colour by Dark Horse as *Boris' Instant Color Classics*, and Boris returns in *Dark Horse Presents* 64, then in *Boris' Adventure Magazine*.~WJ

---

* Available in a collected edition

BORN TO BE WILD

Eclipse: *One-shot 1991*

Benefit book for PETA (People for the Ethical Treatment of Animals). Worthy and sporting many big names like McFarlane, Moebius, Morrison and Starlin, but with the exception of the Neil Gaiman story not very interesting.~HS

BORN TO KILL

Aircel: *3 issue miniseries 1991*

Art seemingly aimed at the paedophile and script that veers between sixth form pretension and tough guy bollocks makes for an altogether very disturbing comic. Thankfully long forgotten, but certainly not forgiven, you'll be soiled just by touching an issue.~FP

BOSTON BOMBERS

Caliber: *6 issues 1990*

A superior action thriller set on an alternate Earth, Indra Devine is a secret agent for the League of Nations, formed after World War I, whose credo "Peace Through Strength" prevented World War II from occurring. Devine is a kind of female Doc Savage, and since on this earth, Christ was a woman, as is the Pope (who is Jewish), she's treated with a lot more respect than you'd think likely. The main antagonist is The Roman Empire, which never converted to Christianity and now resides in South Africa. In a world devoid of advanced technology (the fastest transport available is a prop plane and everything has the cool retro look of 1940s action movies) the series boils down Devine's choice of rescuing a friend or saving the planet. Despite the seeming vacuous familiarity of the plot, *Boston Bombers* rattles along at great pace and with such style and panache (courtesy of writer Ron Fortier and artists Chris Jones and Gary Kato) that you can't help but enjoy it.~WW

Star Wars BOUNTY HUNTERS

Dark Horse: *One Shot ('Aurra Sing') 1999, one-shot ('Scoundrel's Wages') 1999, one-shot ('Kenix Kil') 1999*

Three bounty hunters are spotlighted at various stages in the Star Wars timeline, (and the Titan collected edition adds a Boba Fett story). By virtue of Tim Truman art, *Aurra Sing* is the best of them. *Scoundrel's Wages* explains Lando Calrissian's location in *The Empire Strikes Back*, and *Kenix Kil* occurs just prior to the *Crimson Empire* stories. None are bad, but none are particularly good either. A collection reprints all three issues.~WJ

Alex Robinson's BOX OFFICE POISON

Antarctic: *21 issues, 2 Specials 1996-2000**

Originating as a minicomic, *Box Office Poison* began with Kyle Baker as inspiration. While not possessing Baker's facility for witty dialogue, his late 1980s/early 1990s art style is apparent in the early issues, but Robinson rapidly embraces his own style thereafter. His is confident and expressive cartooning that rarely lapses into the overly twee.

From an early hesitancy *Box Office Poison* develops into an intelligent contemporary soap opera. There's a broad, mainly likeable cast, from whom Robinson largely remains detached enough to combine trauma with comfort. Short chapters are punctuated by well considered pages of questions put to the cast ("If you could change one thing about yourself..." etc), and Robinson fires off knowing barbs about the comics industry with a continuing plot concerning a crusty old artist ripped off decades previously. If soap opera character quirks were its only strength this would merely be *Strangers In Paradise*, but what makes it far superior is Robinson's exceptional talent for comedy and for inspired elements of characterisation. When he has the old comic artist meet his character, the encounter is surprising, somewhat surreal and entirely hilarious. Better still, the scene works on its own in 18, but later revelations twist the meaning 180 degrees. Foreshadowing is a device Robinson masters early and uses throughout.

The best way to appreciate *Box Office Poison* is with Top Shelf's value for money collection of the entire series. Being black and white, though, it omits the *Kolor Karnival* special, almost the only stressful period for contented couple Steven and Jane, which is also worth seeking out. The other special, numbered zero, reprints Robinson's first minicomics later incorporated into both collections.~FP

Recommended: 4-8, 11-21

BOY COMMANDOS

DC: *2 issues 1973*

One of DC's short-lived experiments with a reprint line, these two comics re-present some classic Joe Simon and Jack Kirby stories from the 1940s, in which four boys – from America, France, the Netherlands and Britain – take on the Axis in World War II. A silly premise, but hugely popular in its day, and Simon and Kirby's work still crackles with energy over the decades. Further reprints also graced *Mister Miracle* 4-8.~HS

BOYS

Highwater Books: *One-shot 2000*

This is a collection of autobiographical, single-page strips, written by Joan Reidy and drawn by Ron Rege Jr. In each, Reidy describes, briefly, but explicitly, various sexual experiences with the unnamed boys of the title. Rege draws each in a nine-panel grid, ornamenting the strip in different ways and sometimes overlaying patterns over the page as a whole. Despite the simplistic cartooning, the combination is effective, creating a resonance for the otherwise uncomplicated stories, and making the whole attractive.~NF

BOYS' RANCH

Harvey: *6 issues 1950-1951**

In his long career Jack Kirby dropped many milestones, and despite its brevity, this is rightfully considered one of them. It was one last hurrah for the kid gang comics so popular in the 1940s, and among the best. When a ranch owner dies protecting his property he bequeaths it to Clay Duncan and three youngsters who helped him out. Dandy is the upstanding young gentleman, Wabash the country boy with smarts, and Angel the blonde-haired wild child. Kirby and Joe Simon collaborated on all aspects of the comic, running three solid stories every issue, along with a few tips and features pages and some spectacular double page pin-ups. The best story in the run is 'Mother Delilah' in 3, in which a saloon owner manipulates Angel causing him to question his self-worth, but, typically, this strong dramatic effort is backed up with a comedy tale about Wabash's Grandpa. The original issues command extortionate prices now, but the early 1990s hardback collection is easily obtained.~WJ

Recommended: 1-6

Larry Harmon's BOZO

Dell: *4 issues 1962*

Blackthorne: *2 issues ('in 3-D') 1987-1988*

Innovation: *One-shot ('The World's Most Famous Clown') 1992*

Bozo was introduced on a children's record before starring in his first television show in 1949. In 1956 Larry Harmon, bought the franchise rights and a new show made him something of a phenomenon, with over a hundred Bozos in America, Germany, France and Japan. Dell published four Bozo issues as part of its *Four Color* series (285, 464, 551 and 594), before publishing four issues of his own title under the Larry Harmon banner. Blackthorne's 3-D issues, by Hal Lane and Andy Ice, have Bozo disappear for twenty years and then, when scientifically reconstituted

* Available in a collected edition

by his friend Butch (albeit temporarily shorter than when he went), have his mind switched with a dinosaur's while running for President. It's nowhere near as funny as it sounds. The main story in the Innovation issue is a reprint of Dell's *Four Color* 285 from 1957, in which Bozo and a new friend, a boy called Sparky, discover some tar creatures after being kicked out of the circus for being too nice. Other strips involve a talking lion and a human cannonball.~NF

THE BOZZ CHRONICLES

Marvel/Epic: *6 issue miniseries 1985-1986*

I say, I say, I say, what do you get if you cross a big yellow blancmange with *Sherlock Holmes*? A very poor series attempting to put a twist on the ET theme by having a blubbery alien investigating mysteries in Victorian England. Unfortunately, not a joke.~FJ

B. P. R. D.

Dark Horse: *3 issue miniseries 2002**

A spin-off from Mike Mignola's *Hellboy* series, the Bureau for Paranormal Research and Defence sends a team of field agents to rescue Elizabeth Sherman from the mystical city of Agartha. There, descendants of the first humans, who are spiritually connected to a pre-human super race, are being used to re-establish its dominance over Earth. Fish-man, Abe Sapien, homunculus, Roger and new recruit, Johann Kraus, a spirit without a body, take part in this fun, pulp adventure, co-written by Mignola, Christopher Golden and Tom Sniegoski. For the artwork, Ryan Sook adapts his style to an approximation of Mignola's own, but that's no bad thing.~NF

THE BRADLEYS

Fantagraphics: *6 issue miniseries 1999**

Largely resized reprints of the Bradleys stories from *Neat Stuff*, themselves worth reading, this also collects Bradleys material from elsewhere. Later issues also feature new material, particularly 4, which contains strips reporting on a comedy festival, a collaboration with rock journalist Everett True, and Buddy Bradley by a German cartoonist (also in 5).~WJ

BRAIN BOMB

Behemoth Books: *1 volume 1999*

This anthology features the work of twenty-five cartoonists as part of a national program, 'Cartoonists in the Classroom', aiming to teach and encourage children to draw comics and promote reading. Several creators supply new episodes of their regular series, including Scott Roberts (*Patty Cake*), Jay Hosler (*Clan Apis*), Rachel Hartman (*Amy Unbounded*) and Chris Yambar (*Mr. Beat*). Others of note include J. Torres, Scott Morse, Jenni Gregory, Mike Manley and Harold Buchholz. There is perhaps too great a proportion of fantasy and superhero strips, though that might be a deliberate attempt to engage the proposed readers' imaginations. Bonus features describing how to create a comic, how to draw, and how teachers can incorporate *Brain Bomb* into their lessons are all well presented and informative.~NF

BRAIN BOY

Dell: *6 issues 1962-1963*

The adventures of teenager Matt Price, who has potent mental powers including telepathy, telekinesis and auto-suggestion. Matt is used as an agent by a government undercover agency and wages a secret war on other, less moral, ESP-ers. The first issue is drawn by Gil Kane, although the inker does his best to disguise the fact. An interesting idea, but a poor series.~SW

BRAIN CAPERS

Fantagraphics: *1 issue 1993*

Mario Hernandez is a decent loose illustrator with a sympathetic eye for a story, and this collection pulls assorted work from anthologies between the covers of one comic. Looking at relationships is a favourite topic, but while not dull neither do his strips spark. There's also a Richard Sala parody, and the best of the bunch, a selection of 'Fake Foreign Funnies', which are just what the title indicates, with odd goings-on accompanied by indecipherable word balloons.~FP

BRAINBANX

DC/Helix: *6 issue miniseries 1997*

A science fiction story written by Elaine Lee with art by Temujin. Orc Research raises animals for organ transplants, but employee Ellis Shepherd thinks there's something else going on, and he barely escaped with his life when he tried to investigate. He can't return, so the regulators have sent in a special kind of spy: Anna Elysian, a telepath linked to Shepherd, giving us two minds in one body. The story starts as a thriller (and continues as a fairly solid one), but is soon dominated by the mind-stretching science fiction aspects, which are strong, ambitious, and well-handled. There are occasional attempts to make you interested in the characters but these are mercifully brief, and you can go back to enjoying the story as an absorbing intellectual exercise; this gives it the feel of a Philip K. Dick story, in its weaknesses as well as its strengths. The details of the artwork are crude, but it tells the story well and conveys some difficult ideas very effectively.~FC

BRAINSTORM COMIX

Alchemy Publications: *6 issues 1975-1978*

Quite the confusing title to chronicle, as the issue cover-numbered 3 is actually, if you consult the indicia, 4, with 3 bearing the logo Mixed Bunch. Furthermore 5 is *Brainstorm Fantasy Comics* 1. Twenty years on, that's irrelevant to all but completists, and what's of note is *Brainstorm* being the first sustained underground comic in the UK, and the early work of major contributor Bryan Talbot, whose strips are collected under the same title. They largely star "psychedelic alchemist" Chester P. Hackenbush, a sort of psylocibin-fueled Dr Strange. At this early stage in his career Talbot was already producing imaginative visuals, with 4 quite stunning, but storytelling was a secondary concern. For *Mixed Bunch's* early Luther Arkwright strip Talbot did rein in, and while a glimpse of what he would develop with the character, it's largely peripheral to it. That issue also features early work from Hunt Emerson, and there's a well-received John Higgins cover on 5. 6, titled *Amazing Rock'n'Roll Adventures*, is almost all Talbot's exaggerated fantasy about mass-produced pop music, elements of which have come to pass in the intervening years. Talbot would improve still further over the years, but discipline would offer only rare opportunities for the type of full-on illustrations on view in Brainstorm.~FP

BRASS

Image: *3 issue miniseries 1996*
WildStorm: *6 issue miniseries 2000-2001*

A janitor finds out he has cancer, becomes a murder suspect and, when chased by the police into the New York sewers, is infected by the Brass virus, which mutates his body into that of a metallic fighting machine. Though scripted by Aron Wiesenfeld, this is really Richard Bennett's book. It's a showcase for his Manga-influenced, incredibly detailed artwork. The use of zippatone gives it an edge and there are some good dramatic panels, but there's also too much reliance on odd panel shapes which have a tendency to make the story over-dynamic. An oversize version of the first issue in black and white has also been published. Don't expect too much new work from Bennett (this was in the works from 1993) but, with time, expectations of quality should be high. The second miniseries, unfortunately, written by John Arcudi, heads off into science fiction-land, as Brass was, it seems, created in order to help some pacifistic aliens defend their planet. Volunteer alien fighters, who are therefore outcast from their race, ensure a whining tone. Bennett and Carlos D'Anda ensure that it all looks pretty, though.~NF

---

* Available in a collected edition

BRAT PACK

Tundra: *5 issue miniseries 1990-1991**

In the wake of the Maximortal's disappearance, the city of Slumburg has fallen into the hands of a new breed of 'protectors': venal, psychotic, dissipated, they exacerbate the city's troubles. Even though these brutal 'heroes' need no help, they all keep a young 'assistant' in their stable, and, when these sidekicks perish in the line of duty, make seeking out a replacement their first priority. What's the hidden agenda? Rick Veitch, fresh from his ejection from *Swamp Thing*, gives the old kid-sidekick cliché a new twist with this savage and repulsive, but horribly compelling, exploration of why grown men and women would run around the rooftops with spandex-clad teenagers. And yes, in at least one case, it is exactly what you're thinking, but there's a great deal more to it than that. If you can find the collection, read that rather than the miniseries, since it has new material, better editing and proofreading, and a rewritten ending that's much more coherent than the original.~HS

BRATS BIZARRE

Marvel/Epic: *4 issue miniseries 1994*

Superpowered juvenile delinquents rebel against a repressive future regime. After three issues of pointless fighting, the 'good' paranormals (agents of said regime) are converted to the Brats' side and everyone settles down to partying, crude sex and terrorising normals. Sadly less interesting than it sounds.~HS

THE BRAVE AND THE BOLD

DC: *200 issues, 1 Special 1955-1983, 6 issue miniseries ('The Best of...) 1988-1989, 6 issue miniseries 1991-1992, 6 issue miniseries 1999-2000, 80-Page Giant Annual 2001*

The Brave and the Bold began, as the title suggests, as a historical adventure comic, and the Robert Kanigher and Joe Kubert Viking Prince strips (1-24) are still fondly recalled today. The Silent Knight, a medieval mystery man who fought crime without speaking so no one would recognise his voice in 1-22, doesn't quite have the same appeal, having the disadvantage of not being drawn by Kubert. The Golden Gladiator in the first half dozen issues isn't remembered at all, with good reason.

25 introduced a second editorial phase, a series of three issue tryout runs for prospective new titles. While not quite as influential as its companion title *Showcase* in introducing lasting new concepts to DC's line, *The Brave and the Bold* certainly had its share of successes, hitting gold with its second feature, The Justice League of America (28-30) by Gardner Fox and Mike Sekowsky. This team bought together DC's most popular heroes of the time – Flash, Green Lantern, Wonder Woman, Aquaman, the Martian Manhunter – and in minor roles due to editorial conflicts, Batman and Superman. Superhero team-ups were much the novelty in the early 1960s, and the JLA moved almost directly into their own title. The Mission Impossible style escapades of Suicide Squad (25-27, 37-39) and explorer Cave Carson (31-33, 40, 41) didn't catch on, although the former's title prompted a decent quality run for another idea in the 1980s. The other success of the tryout period was Hawkman. This was elegantly drawn by Joe Kubert in the 1940s, and the artist returned to illustrate a new Hawkman in 34-36* and 42-44*, this time an alien policeman from the planet Thanagar. In a first for comics, he was joined by his superhero wife, Hawkgirl, who was very much his equal. They fought crime using Thanagarian science and ancient Earth weapons. Strange Sports Stories, while drawn impeccably by Carmine Infantino in 45-49, failed to find an audience as a solo feature, although they were similar to material that had been appearing in DC's science fiction comics in smaller doses for years.

It was with 50 that *The Brave and the Bold* premiered the idea that would, with a few modifications, see out the remainder of the run: team-ups. The first was a nice attempt featuring two of the Justice League's lesser lights, the Martian Manhunter and Green Arrow. Assorted odd teamings continued until 65 (including a memorable teaming of Flash and Atom illustrated by Alex Toth in 53), but spliced by two further features that would progress to greater success. The conception of the Teen Titans was 54, with the teen sidekicks – Robin, Kid Flash and Wonder Girl (later joined by Aqualad) – uniting to defeat the diabolical Mr Twister, the first of a succession of inane villains to plague the 1960s Titans. They returned in 60, while 57 and 58 introduced Metamorpho, who had had the ability to transform his body into any element. He teamed with other oddball heroes The Metal Men in 66 before moving into his own title. 61 and 62 return two further 1940s superheroes, Starman and Black Canary, in a pair of decent stories by Gardner Fox, beautifully illustrated by Murphy Anderson. In 67 Batman teamed with the Flash, and remained a fixture of the title until cancellation. He'd already appeared in 59 and 64, and for years had teamed with Superman in *World's Finest*, but in the mid-1960s, with a TV series running, there was no doubt which of the pair was the more popular. Having Batman star in another title made perfect sense. His early run of team-ups was workmanlike, but undistinguished, and it took the arrival of artist Neal Adams to breathe some life into the title from 79's teaming with Deadman. Drawing the title regularly until 86, then 93's trip into the *House of Mystery*, and contributing to 100, his remained the best art seen on the series. His most notable issue is 85, which beefed up Green Arrow considerably, introducing his new look. The writer of the title by this point was Bob Haney. Although never a favourite with continuity obsessed fans, Haney was consistently inventive, delivering suspenseful plots, intriguing mysteries and generally packing a lot of story into a single issue. His run is also distinguished for its unusual co-stars, with far from obvious selections such as Metal Men, Plastic Man and Sgt Rock recurring. Post-Adams Nick Cardy, and more commonly Jim Aparo, at his peak, were the regular artists for a run of entertaining and tightly plotted stories, and most issues between 86 and 110 are decent material. 100 in particular stands out, with a poisoned Batman sending Robin, Green Arrow and Black Canary on a desperate search for an antidote. 112-117 were hundred page issues, offering an odd selection of reprints in addition to the lead feature. However, with the exception of 124's spirited and odd teaming of Batman and Sgt Rock the title was in a slow decline.

There was never really a recovery. Haney struggled on, never matching former glories, until 157, at which point an editorial decision was made to run with stories from an assortment of writers, most frequently Mike Barr. Aparo remained to draw most issues, with the occasional break, his looser style no longer showing a hint of Adams. Marv Wolfman and Dave Cockrum teaming Batman with ace flyers the Blackhawks during World War II in 167 was interesting, Martin Pasko had a trial run for his revival of Swamp Thing in 176, and the Metal Men finally discover what happened to one of their number, Nameless, in 187. The best writer of the later issues was Alan Brennert. His contributions were limited, but each is memorable. 181 returns Hawk and Dove, giving them some historical context as 1960s throwbacks, 182 teams Batman with the twenty-something Robin of an alternate Earth, and 197 has the older Batman of that Earth marrying Catwoman. The latter, drawn by Joe Staton and George Freeman, is a gem. Also of note is the back-up series running between 167 and 193's full length teaming with Batman: Cary Burkett and Dan Spiegle provide generally imaginative stories of Nemesis, a master of disguise. The series finale in 200 is written by Mike Barr and illustrated by Dave Gibbons, teaming Batman with his alternate Earth counterpart. It was a nice epitaph to both an era and a series, The Brave and the Bold having been cast aside to release Barr and Aparo for *Batman and the Outsiders*.

The Best of the Brave and the Bold represented the Neal Adams drawn classics from 80-83, 85 and 93, along with a Viking Prince strip in each issue. Green Arrow, the

Question and the Butcher feature in a convoluted plot involving IRA gunrunners and Native Americans in the 1991 miniseries. Somewhere there's a message about ecology, but writers Mike Grell and Mike Baron fail to keep the interest up, while artist Shea Anton Pensa needed a lot more practice on his storytelling. The most recent miniseries is a decent tribute to the Barry Allen and Hal Jordan versions of Flash and Green Lantern. Written by Mark Waid and Tom Peyer, and illustrated by Barry Kitson, each issue looks at a different period during their long association. It's a fun nostalgic read with many guest-stars including Green Arrow, and the 1940s Flash and Green Lantern. The 80-Page Giant Annual shows us what it might have looked like if printed in 1969. The Green Arrow/Martian Manhunter, Batman/Flash reprints make sense, but a 1940s Boy Commandos/Newsboy Legion story, great as it is by Joe Simon and Jack Kirby is stretching it a bit. So is a tale starring Captain Atom and Nightshade (drawn by Steve Ditko) originally published by Charlton! Mustn't moan though, as it's a great effort.~HY
Recommended: 28-30, 34-36, 42-44, 57, 58, 61, 62, 65, 79-86, 100, 102, 181, 182, 197

BRAVE OLD WORLD

DC/Vertigo: *4 issue miniseries 2000*

Toying with the idea that the world's computers would crash as the year hit 2000, Bill Messner-Loebs sparks his plot via some technobabble that sends a disparate group of Cornell University researchers back to 1900. Some die on arrival, and with no apparent means of return given the technology of the day, others adapt to the new era the best they can. One determines to create a computer from the materials available. From that point the story plays out in unpredictable and engaging fashion. Guy Davis apparently had something to do with the good art, although you wouldn't know it under Phil Hester's finishes.~WJ
Recommended: 1-4

BREAK-THRU

Malibu: *2 issues 1993-1994*

A flashy Ultraverse title, efficiently illustrated by George Pérez, book-ending an arc through eleven different regular series. The first issue is bitty as it has to set up stories told elsewhere about the many members of the enormous cast, but 2 is a pretty good high-blood-pressure all-in bout in space fit to excite any bred-in-the-bone superhero buff.~GK

BREAKFAST AFTER NOON

Oni Press: *6 issue miniseries 2000*

When the Midland manufacturing company, Windsor Potteries, faces its last days, many of its employees are made redundant. Rob and Louise, an engaged couple, are forced to rethink the planned direction of their lives, with results that bring their relationship to a crisis point. Artist/writer Andi Watson focuses on the minutiae of everyday life with this simple, but resonant story. He doesn't hesitate to bring out the worst aspects of his protagonists: Rob's an egocentric, self-deluding wastrel, Louise is a short-tempered, nagging snob, and neither of them like their supposed best friends much! Watson still manages to invest them with enough appeal that you can understand their mutual attraction, and care about the outcome of their story. And what this man can do to suggest subtle and complex emotional states, with a few deceptively simple pen strokes, has to be seen to be believed. An unprepossessing subject, presented with clarity, empathy and warmth.~HS.
Recommended: 1-6

BREAKNECK BLVD.

MotioN Comics: *3 issues (0-2) 1994*
Slave Labor: *6 issues 1995-1996*

Nineteen year-old, Frank Dunkard, frustrated by his overbearing mother and lazy brother, heads for a club on the sleazy, Bentley Boulevard, where he quickly loses his clothes to hustler Blu-J. Fortunately, he's befriended by kind-hearted stripper, Scarlett Dee, who has sex with him and introduces him to the gay, philosophical, Pall Blighter (whose story is told in 5). Together with they track down Blu-J and, despite taking a good beating Frank recovers his belongings. Thereafter, he finds himself drawn back to the locally named, Breakneck Boulevard, where he continues to be way out of his depth amongst its street-hardened inhabitants. His new friends' motto is "Better Dead Than Bored", but it's Frank's ignorance that drives his adventures in a riot, in pursuit of a handbag thief, in helping an old school friend score drugs and on a date with Scarlett's best friend. Timothy Markin's script is sharp and his characters realistic, if hardly charismatic, but the series is let down by the technically-limited and never fluent artwork.~NF

BREATHTAKER

DC: *4 issue miniseries 1990**

An outstanding tale by writer Mark Wheatley and artist Marc Hempel. This modern-day version of the succubus myth features a strong female lead, Chase Darrow, a genetically engineered beauty who prematurely ages her infatuated lovers, including government superhero The Man. Hempel's deceptively simple style captures the necro-kinkiness of Wheatley's surreal script, which neatly balances humour and pathos. The rather unsatisfying ending was revised for the graphic novel collection.~AL
Recommended: Collected Edition

'BREED

Jim Starlin returns to his overused themes as Ray Stoner, Vietnam veteran and half-breed demon-son is drawn into a war with his father's species who have been raiding Earth for decades preparatory to a full scale invasion. All the while whining that he just wants to be left alone, Stoner learns to be the best demon fighter in the world and gets into fight after fight after fight. The series folded before any real conclusion, or event, occurred. Created on autopilot.~WW

BRICKMAN

Harrier: *One-shot 1986*

Batman parodies are commonplace, but it's rare to find one that's actually funny. Brickman is. With its protagonist driving around in his brickmobile, throwing brickarangs (bricks) at criminals like the Man-Brick, and having a clockwork Houdini in his utility belt to help him escape deathtraps, Lew Stringer's *Brickman* is very silly laugh-a-panel stuff, and his cartooning is excellent.~FP

BRIGADE

Image/Extreme: *4 issue miniseries 1992-1993, 23 issues (1-22, 25) 1993-1996,*

Mindless and poorly drawn superhero team that fights its way through outer space, the bottom of the sea, and just about anywhere they go. Chief steroid case Battlestone and an annoyingly interchangeable cast of characters (the heroes and villains all look the same and sometimes speak each others' dialogue) pose unconvincingly, declaim badly and hit each other constantly. Even the late arrival of veteran comics writer Marv Wolfman and frantic roster changes couldn't save this turkey. When your parents said comics were bad for you they meant this one.~WW

A BRIGHT SUNNY DAY

Desert Island Comics: *One-shot 2001*

John Cocopiazo is better known for his minicomics, but here steps up a notch to present a day in the life of the shallow John Victory. He awakens with a hangover and co-worker in his bed, and over the next few hours fragments of his previous night's behaviour come back to him. Well drawn and written, the killer page is the final one revealing the future of the cast and the truth behind the story.~FP

* Available in a collected edition

BRINKE OF DESTRUCTION

Chaos!: *One-shot (Brinke of Eternity) 1994*
BV Books: *One-shot 1994*
High Top: *3 issue miniseries 1995-1996*

The vanity project of model and co-author Brinke Stevens, here casting herself as the half human daughter of an alien warrior, The Fallen Angel. With her pal Alex she's in conflict with her evil half sister Arcana. Mankind's ecological excesses have led to cosmic judgement, and appointed guardian of the Earth by Gaia, Brinke defeats Earth's aggressors but then finds herself banished by the President for speaking out against the administration. The mono one-shot sees her on another world seeing off a planetary invasion, and the last panel returns her to Earth. Bob Hanon's artwork is dismissive but handles the flashbacks to Brinke's exile well. In the High Top series Brinke goes through a rite of passage involving Gaia and the legacies of her parents. She and Alex have to save the Earth from the machinations of Arcana and her Armageddon Chamber. Mike Holliman's artwork is barely competent and the colour makes it look like the contents of a school exercise book. Still, the diminutive Brinke is portrayed as being seven feet tall, so it has no doubt served its purpose.~SW

BRIT-CIT BABES

Fleetway: *One-shot 1993*

A below par *Cagney and Lacey* rip-off from the normally excellent John Wagner as the Vice Squad of the British Mega-City try to stop a white slavery ring from smuggling bimbos off world. Reprinted from the UK *Judge Dredd: Megazine*, but the static and bland art from Steve Sampson and high cliché content don't explain why.~WW

BROID

Eternity: *4 issue miniseries 1990, 4 issue miniseries (Shatterpoint) 1991*

Two generations after his disappearance, war-bot engineer and pilot Broid emerges into a new world that desperately requires his talents. The giant robot battles are subordinate to the characterisation, although they're obviously what creator Tim Eldred most enjoys drawing, making for unusual depth in such a comic. He also gives time to the villains of the piece, explaining their motivations, and in the boldest stroke of all, reveals the final act on the first page, confident it won't matter. A decent adventure comic.~WJ

BROKEN HEROES

Sirius: *12 issue limited series 1998-1999*

Captain Freebird is a lascivious, freewheeling Vietnam veteran whose look comprises cowboy boots, flared jeans, stars and stripes coat and front tooth, dirty shirt, star rimmed sunglasses, overhanging moustache and a long clump of straight, tow-coloured hair. Cap's hippy-go-lucky outlook leads to a series of semi-adventures where Freebird helps various old friends as the FBI gradually tighten their net. They consider Freebird to be a dangerous subversive. Memorable cast members include Cap's nemesis Agent Koontz, his old Mexican wrestling partner Fernando in 4, his cosmonaut buddy Ivan in 3 and then 7-8's Laughing Bear, his estranged son George in 9 and the Marlboro Man in 12. The Fillbach Brothers tell a loose story that looks like Rick Geary drew it with his left hand. Whilst the artwork is an acquired taste the comic is script driven and their anachronistic protagonist is a memorable one. Rock lyrics, TV quotations and characters like sporting goods salesman Tom Wolfe resonate with the times Freebird has come from and add to the comic's light-hearted feel.~SW

BRONX

Eternity: *3 issue miniseries 1991*

Argentinian creator, Alberto Saichann, offers two bleak, cynical vignettes per issue. His characters, including a boxer, a musician, an actor and a barfly are down on their luck, sometimes obsessive – like Jordi Bernet meeting Jack Davis on skid row.~NF

BROOKLYN DREAMS

Paradox Press: *4 issue miniseries 1995**

There have seemingly always been autobiographical insertions into the work of J.M. DeMatteis, and they've seemingly always been weighed down by the desire or necessity to tell a story unconnected with those events. Here there's no such wall, and although they hide behind a created identity, the rambling recollections have the ring of authenticity. Narrated with knowing hindsight, the bulk of the story told concerns adolescent experiences of Brooklyn in the early 1970s, with detours back through a childhood punctuated by explosive parental disagreements and forward to parental communication and judgement as an adult. The woolly mysticism that often renders DeMatteis' writing unpalatable is absent, replaced by a fair dose of philosophical pondering, and plenty of the humour he rarely injects into serious material.

To hang the success of the project entirely on DeMatteis, though, is to undervalue the contribution of artist Glenn Barr. He switches effortlessly, and effectively, from skimpy cartooning, through glorious wash work and into detailed pen and ink sketches, conveying every necessary mood and nuance. A less talented and adaptable artist would have made a right hash of the imaginative exaggerations that characterise the story, and he stamps his own personality on *Brooklyn Dreams* as much as DeMatteis does. In four paperback-size volumes *Brooklyn Dreams* places the work of the majority of the autobiographical comics creators in the shade. It's great.~FP
Recommended: 1-4

BROOKS ROBINSON

Magnum: *1 issue 1992*

If you want the career of possibly the best ever third baseman encapsulated from birth to first World Series in 1966, this is the painless version written and drawn by Joe Orsak with inks from Joe Sinnott. The back-up features a biography of 1950s Pirate Frank Thomas. This doesn't quite achieve the standard of Magnum's Mickey Mantle comic, but should appeal to fans of Robinson. It was planned to run three issues, but stalled at first.~FP

BROTHERMAN: Dictator of Discipline

Big City Comics: *10 issues 1990-1994*

Engaging adventures of Antonio Valor, go-getting young lawyer who also practices his own brand of Affirmative Action as the ultra-funky Superhero, Brotherman. Set in the Harlem-like Big City, it's an effective blend of urban ethnic comedy, adventure and social polemic that sets its sights squarely on the modern African-American situation, and creators Jason, Guy and David Sims manage the difficult trick of making it palatable to mainstream white audiences also. Sharp dialogue, good plots, intriguing villains and great art – in the style of Mort Drucker – make this series well worth a look.~WW
Recommended: 1-2, 4-6

THE BROTHERHOOD

Marvel: *9 issues 2001-2002*

As the series starts high school senior Mikey Asher is unaware he is about to develop mutant abilities, but is contacted by The Brotherhood, who know of his condition. The Brotherhood is a cadre of terrorists striking back against the persecution mutants suffer on a daily basis, and their gloomy worldview is well reflected in stylish pencils from Essad Ribic (1-3), Leonardo Manco (4-6), and Sean Phillips (7-9) with Kent Williams inking throughout. The most bizarre aspect is an editorial one, choosing to credit the writing to "X", in the belief that no comic written by Howard Mackie would sell. He's turned out rubbish in his time, but this bleak contemporary treatment of a problem dating back to Marvel's earliest days isn't among it. It's downhill from the opening segment, and from the disturbing high school, to the revolutionary rhetoric, Mackie's sources are obvious, but for six issues he weaves a fair story from them, only to descend into melodrama by the end.~WJ

BROTHERS OF THE SPEAR

Gold Key: *17 issues 1972-1976*
Whitman: *1 issue (18) 1982*

The strip created by Gaylord DuBois had been the back-up in Tarzan for twenty years drawn by Jesse Marsh and Russ Manning. It finally moved into its own title when Gold Key lost the rights to publish *Tarzan*. Unfortunately the adventures of the two young primitives, one black, one white, were drawn by Jesse Santos' Filipino studio, who did nothing other than prove they were back-up material through and through. The Whitman issue reprints the second Gold Key story.~SW

The Twisted Tales of BRUCE JONES

Eclipse: *4 issue miniseries 1986*

Bruce Jones can be talented both as writer and artist, but you'd be hard pressed to realise it from these feeble twist-ending horror and science-fiction stories. Largely reprinted from late 1960s and early 1970s Warren magazines, they do Jones no favours, and I would suspect earned few royalties, despite the excess, and gratuitous, female nudity.~WJ

Boof and the BRUISE CREW

Image: *6 issues 1994*

Spun-off from Boof's own title, clear and amusing cartooning from Tim Harkins is a plus for this comedy of errors about a greedy homunculus and his space-hopping idiot chums. Particularly well coloured, but the script is full of in-jokes and not funny enough.~GK

THE BRUTE

Atlas: *3 issues 1975*

A frozen giant caveman was defrosted in 1975, and, quel surprise!, was prone to mindless rampages through civilisation. Poorly written and poorly drawn.~FP

BRUTE FORCE

Marvel: *4 issue miniseries 1990*

Odd eco-themed comic developed in the hope of attracting TV cartoon interest. Members of endangered species put on exo-skeletons to become avengers of the environment. Routine stuff.~HS

The Craptacular B-SIDES

Marvel: *3 issue miniseries 2002*

In Raven's Perch, New Jersey, three high-school graduates are invited to form a local superhero team by a down-at-heel entrepreneur. Their first adventure leads to a meeting with the Fantastic Four and some Skrulls. This proves to be a mistake by writer, Brian David-Marshall, as the small-town feel and camaraderie is sacrificed for the sake of a team-up and a chance to deliver a few digs at the Fantastic Four's age and conservatism. A backup in 1 that explains how their friend, Feeva, left them to enrol at the Pegasus Institute, a superhero school, is much better. This is also helped by the artwork of Chris Cross, whose cleaner lines are much more appealing than the washed-out style of Brett Weldele.~NF

BUBBLEGUM CRISIS Grand Mal

Dark Horse: *4 issue miniseries 1994**

Big global company. Evil, bad, nasty. But, hey, lighten up, don't worry, because the Knight Saber can save MegaTokyo. Who're they? Four ineffably cute women. But don't get the idea they're bimbos. Oh no. One of them runs a lingerie shop, and another is a rock star. *Bubblegum Crisis* is every bit as daft as sounds, and presumably intentionally so. Adam Warren has obviously watched way too many Japanese animations, and successfully subsumes any elements of his own art style to make this seem genuine manga. One could ask why, when there's plenty of similar material already out there, not least *Dirty Pair*, which Warren also drew.~FP

BUCK GODOT: Zap Gun for Hire

Donning/Starblaze: *2 Graphic Novels 1986-1987*
Palliard Press: *6 issues 1993-1995*

Phil Foglio and Barb Kaalberg's pleasant, cartoony artwork might lead you to conclude that Buck Godot is a comedy science-fiction strip about a 'zany' private eye. In fact it's an extremely convoluted space opera with hardly a chuckle in sight. Creator and writer Foglio overcrowds his storyline with alien religions, interplanetary alliances and cosmos-threatening conspiracies, while neglecting to develop his rather one-dimensional title character. The story remained incomplete.~AL

BUCKY O'HARE

Continuity: *5 issues 1986, 1 Graphic Novel 1986*

As written by Larry Hama and drawn by Michael Golden, the Toad Empire is plundering the universe right, left and centre, and the United Animals Security Council has responded by setting up a defensive fleet: three used frigates and one combination orbital dry-dock and snack bar. Bucky O'Hare is the captain of one of the frigates (the 'Righteous Indignation') and the UASC paperwork is something brutal. It's a very funny comic, with great dialogue and no cuteness. Well, apart from the Toads, who are endearing villains with their compulsive honesty about their fear of Betelguesian Berserker Baboons (they even mention it in their battle song). Read and enjoy, and forget about the cutesy cartoon series that followed.~FC

Recommended: Graphic Novel

BUDDHA ON THE ROAD

Aeon: *6 issues 1996-1998*

Biting, black satire from Colin Upton in the shape of Norman, a Canadian soldier newly returned from a tour as a peacekeeper in Bosnia. He discovers that God and the Devil are real and that moreover, Satan has chosen him to be the Lord Anti-Christ and lead the hordes of hell in final battle against the Heavenly Host. The sex and violence of the strip are subverted by the cartoony style that gives the material a real punch. Well worth a look.~WW

BUFFALO WINGS

Antarctic: *2 issue microseries 1993*

In isolation these college soap opera snippets dressed up in funny animal skins elicit a shrug of the shoulders. If you've come to know and love the cast through their appearances in *Wild Life* you may take something from these prototypes, but otherwise it's only worth noting John Nunnemacher's improving cartooning over a variety of styles.~WJ

BUFFY THE VAMPIRE SLAYER

Dark Horse: *52 issues +, 1 Annual 1999 to date*

As is the case with most properties licensed by Dark Horse for comics, fans of the original material can come to *Buffy* comics confident they're buying a well produced product faithful to the source. Poor issues are rare, and ironically written by TV writers in most cases, and while it took until 13 before the art team of penciller Cliff Richards and inker Joe Pimentel arrived, their talent for likenesses and mood ensures the comic looks good. Andi Watson (1-19) has a light touch, writing the cast interaction with ease, and capturing the whimsical charm of the TV show. Don't be put off by the length of 'Bad Blood' running from 9 to 19. The continuing thread concerns a female vampire wanting to be transformed by a plastic surgeon, creating her own vampires, and culminating in a duplicate Buffy, but most individual issues have another focus and make sense. Christopher Golden is more at home with the darker side of Buffy's world. His 'Blood Of Carthage' story in 21-26 is a good effort, uniting several cast members against a seemingly unbeatable foe while throwing in some nice character touches to boot. Golden also writes 29-30, which cross over with *Angel* 15-16. The writing team of Tom Fassbender and Jim Pascoe take over with 31, as the issues correspond to the end of the fourth TV season, and produce more conveniently collected four issue story arcs. They begin slowly, although their characterisation hits the right note from the off, but by their second story, starting in 35, they've achieved the correct blend. Their issues to 46 are the best approximation of the TV show to date, even solving a continuing problem for the comics concerning action sequences that would use five minutes of screen time occupying a third to a half of the comic. Their best effort is 35-38 in which a missing slayer returns in unexpected fashion. Scott Lobdell and Fabian Nicieza share the writing from 47, and follow a deliberate editorial agenda to divorce the comic from the TV series, producing stories about the cast that no longer tie-in to set continuity. 47-50 have a neat twist ending, but getting there is hard, and from 51 the clock turns back to the days just after Buffy realised she was a slayer.

---

* Available in a collected edition

Dark Horse offer each issue with either a photo cover or the more traditional illustration and for those concerned about a timeline, the early issues roughly correspond with the second TV season and the series moves forward from there. More detailed information can be found on the Buffy page of the Dark Horse website. Knowledge of the TV show isn't essential to enjoyment of the comic, but surely few read it without watching the show, and editor Scott Allie is to be congratulated for maintaining an involved and thought-provoking letters page. Those wanting to dip their toes into Buffy, so to speak, could seek out 8, Richards' tryout as artist and Watson's best single issue story. There's more Buffy in *Dark Horse Presents* 141, an all-Buffy issue, 150, the 1998-2000 annuals, and all Buffy stories are available in collections.~FP

Recommended: 35-38

BUFFY THE VAMPIRE SLAYER Miniseries and One-shots

Dark Horse: *Graphic Novel ('The Dust Waltz') 1998, 3 issue miniseries ('The Origin') 1999*, one-shot ('Spike and Dru') 1999, one-shot ('Spike and Dru: The Queen of Hearts') 1999, one-shot ('Giles') 2000, one-shot ('Spike and Dru: All's Fair') 2000, one-shot ('Jonathan') 2001, one-shot ('Lovers Walk') 2001, one-shot ('Willow & Tara'*) 2001, 3 issue miniseries ('Oz') 2001*, 4 issue miniseries ('Haunted') 2001-2002*, one-shot ('Lost and Found') 2002, one-shot ('Reunion') 2002, 2 issue microseries ('Willow and Tara') 2002*, one-shot ('Tales of the Slayers') 2002*

If there's an easy way to separate the wheat from the chaff here, it's to avoid anything written by Christopher Golden. He's not bad, dropping in the requisite amount of monsters and managing to have the dialogue sounding right, but there's little imagination or humour and none of the surprises or emotional content marking a superior writer. Golden's best is the nasty Spike and Dru short in 'Lover's Walk', collected in the trade paperback along with the one-shots. To avoid other Golden, though, means missing Terry Moore's art on the first 'Willow and Tara' and Ryan Sook's work on the first two Spike and Dru one-shots. Thankfully there's 'Ring of Fire' in which Sook's Mignola influenced art gives a dark horror gloss to a script from TV writer Doug Petrie (who also wrote the moody *Buffy* 19). It features all the characters one reasonably might like to see from second season *Buffy*, and better still gives them all a purpose for being there. By contrast 'The Dust Waltz' is *Buffy* by numbers, and 'The Origin', adapted from *Buffy* creator Joss Whedon's original film script, is very traditional and predictable for a property that would come to redefine horror TV.

TV writer Jane Espenson writes 'Haunted', and ' Reunion', the latter speculation among Buffy's friends about what happened between her and Angel during TV season six. 'Haunted' is far better, though, set just after season three with Buffy facing a recurring foe and elements leading into that season's TV revelations. Well drawn by Cliff Richards and Julio Ferrera, most Buffy fans should enjoy it. Both Jeff Matsuda and Gene Colan draw portions of 'Tales of the Slayers', which reads like two short stories slapped together, and while both artists are good, the contrasting styles jar. It's worth noting that, as with the regular series, most issues come with the choice of photo or illustration cover, and actor James Marsters co-writes the first Spike and Dru one-shot with Golden, while the latter collaborates with Amber Benson on all Willow and Tara comics.~WJ

Recommended: 'Ring of Fire'

BUG

Marvel: *One-shot 1997*

Although starting off well, this comedic tale featuring the insectoid warrior from *The Micronauts* deteriorates. He battles Annihilus and jump-starts the Marvel universe, but there's only one gag which is repeated ad infinitum. Ho ho-hum.~WW

THE BUG HUNTERS

Trident: *One-shot 1990*

Giant rampaging robots working for the law handled with some wit. Originally devised in four page segments copyrighted 1986, there's not enough variety in this format, but artist (and in this instance writer) Jerry Paris is one of comics' great lost talents.~FP

BUGBOY

Image: *One-shot 1998*

Beginning with the idea of presenting a child who actually has all the adventures children fantasise, Mark Lewis turns out a beautifully drawn cartoon style adventure. That it was completed over seven years and there are differences between the early pages and later ones matters not a jot. The downside is that there's not enough plot to sustain the charm over forty pages, and the story drags long before the end.~WJ

BUGHOUSE

Cat-Head: *5 issues 1995-1996*

Top Shelf: *1 volume 2000*

Anthropomorphic allegory using cartoon insects as variously disguised icons from the world of popular jazz music. Jimmy Watts was just your average Catholic kid, horny, self-absorbed, rebellious and plagued by unnecessary guilt. Then his folks got him a saxophone. His life takes a whole new turn, even to the point of having semi-mystical visions. He has a destiny. He's going to Bugtown to be a musician. He wins a scholarship to the City Music College where he meets young pianist Slim Watkins and they discover shared tastes for fine, loose women, getting drunk and playing jazz. Their rise in the boozy, druggy world of popular music, where their slow, seemingly inevitable descent into drug addiction mirrors their meteoric success with their band Bughouse draws heavily on the history and legends of America's semi-mythic Jazz Age. It also comments on the pressures of creativity, the dumb things talented people do to cope with it, and ultimately how some survive and others simply don't.

Steve Lafler crafts a deceptively compelling little gem whose strength lies in fresh characterisation over an archetypal plot. The series has been collected twice with substantial revisions both times. The 1996 version reprints 1-4 with supplemental pages and a twenty page prequel, whilst the 2000 edition expands to 192 pages with substantially more extra material. In each case, though, the spiritually downbeat 5, which deals with the aftermath of the drug-related death of one of the major characters and how his friends cope with his loss is omitted and replaced with a different "ending". The *Baja* graphic novel revisits the characters. Compulsive reading for anyone with an open mind.~WW

Recommended: 5, 2000 collection

BUGS BUNNY

DC: *3 issues 1990*

Reasonable Chuck Fiala artwork fails to lift this from the ranks of third-rate parody. A quest for magical busts of Elmer Fudd sends Bugs and Daffy Duck around the world. En route they meet most of the major Warner Bros stars, throwing in references to recent movies or other studios' characters along the way. Nowhere near enough of the anarchic surrealism that illuminates the best cartoons; and nowhere near enough of Bugs Bunny himself.~NF

BULLETPROOF MONK

Image: *3 issue miniseries 1999**

Bulletproof Monk was a hero in China during the 1940s. Lung Kai Yun, known to everyone in present-day San Francisco as Kar, wears an amulet with the Monk's name on it. Against his guardian Uncle's advice he falls in with local gangster Boss Wei's daughter. On inheriting control of the gang she abruptly shuts Kar out of her life. Meanwhile a Chinese agency has sent Flower Soldier to find The Bulletproof Monk. Everyone knows Kar is the key in this rite of passage drama – even Kar himself. This is only the opening chapter of a much longer saga – possibly involving the rising and advancing of a spirit. Creators Brett Lewis and Michael Avon-Oeming get off to a strong if crammed start before R. A. Jones replaces Lewis as scripter in 2, allowing the pages to breathe. The artwork, inked by Jason Baumgartner, is imaginative, stylish and takes colour well. There will be inevitable comparisons with Bastard Samurai where Oeming's need for illustrative realism has eroded even further. Kar's amoral approach to the material world makes for a memorable protagonist.~SW

BUM WAD

Yahoo: *1 issue 1971*

It's very rare that underground comics were printed in colour, which makes it a shame that the colour used here is hideous, and largely pointless. That, though, places it tune with the remainder of the comic featuring ugly art, and feeble jokes, although fifteen years later Richie Retch could have slotted straight into the U.K's *Viz* comic. They'd have done a better job, mind.~WJ

BURGLAR BILL

Trident: *1 issue 1990*

Why Paul Grist hasn't been elevated to the ranks of cartooning greats is an unexplained mystery to be brought to the attention of Arthur C. Clarke. All the elements characterising his work are present and correct in this early piece. The simple, clear and adaptable art is delightful, and the writing well observed and insightful. Burglar Bill's appearance is merely a cameo in a story concentrating on how the childhood fantasies of first-week-on-the-beat policeman Stephen Hill contrast with reality. A gem.~FP

Recommended

Bram Stoker's BURIAL OF THE RATS

Cosmic Comics: *3 issue miniseries 1995*

This lesser known Bram Stoker story was adapted for film by Roger Corman, so it made sense for his comic company to issue a tie-in. It's absolute nonsense about Stoker himself becoming involved with a community of independent women who worship rats. The b-movie sexuality is blatant, but it's nicely drawn by the unique combination of Francisco Solano Lopez and Val Mayerik. Look out for the particularly mad cover on 3.~WJ

BURIED TREASURE

Pure Imagination: *3 issues 1986-1987*
Caliber: *5 issues 1990*

Interesting selection of lovingly reconstructed 1940s stories from Greg Theakston's Pure Imagination studio. Western, funny animal, supernatural, romance and 'true life' stories sit side by side, making an odd mixture, but with many stellar names from comics' earliest days represented (Kirby, Simon, Cole, Frazetta, Kubert, Wood, Toth, Briefer, Williamson) they packed a lot into eight issues.~HS

BURNING CIRCLE

Tusk Entertainment: *One-shot 2001*

David Boller revives his *Kaos Moon* character to promote his vision of a personal multimedia entertainment website. All but the last of three well drawn short stories are rather insubstantial, and it's a shame the website address printed so prominently on the cover doesn't exist anymore. For more of Boller's work (and that of Mary Hildebrandt) go to www.tuskentertainment.com.~WJ

BUSHIDO

Eternity: *4 issues 1988-1989*

Miki Matsumoto's family are amongst the leaders of a corporation, all of whose members have telekinetic powers, that covertly aids the police against the Yakuza. After assassinating the American Vice President, her brother hires the Yakuza to kill Miki and their parents. This was a promising thriller from Bruce Balfour and Ben Dunn (Lea Hernandez pencils roughly half of 3), but has not been finished.~NF

BUSHWHACKED

Eros: *One-shot 1996*

Ann and Marsha go camping. Ann is a nature lover and finds the stud of her dreams, after first of course initiating Marsha into the joys of outdoor sex, whilst Marsha hates everything to do with the Great Outdoors – except possibly sex with Ann – and therefore almost gets raped by the lusty yokels. That's really all there is to this, apart from some fairly average drawing by writer/artist Tayyar Ozkan, both of the countryside and of sex.~WW

BUTCHER

DC: *5 issues 1990*

Butcher than who, exactly? Oh well. This tale of an eco-terrorist occupies an odd position in DC's continuity, being set firmly in the DC Universe but still being creator-owned. It set a precedent for later series such as *Sovereign Seven*, for which no one thanks it, but has little intrinsic interest.~HS

BUTCHER KNIGHT

Image: *4 issues 2000-2001*

OK. Lancelot is turned into a super-gargoyle by Merlin for having an affair with Guinivere, and sent to a hell dimension. Next stop: present day, where we find Lancelot has sworn allegiance to some witch babe in return for his freedom and his help against Merlin, who is also still around. Dwayne Turner's art is very slick, but the plot and script are pure nonsense and begs the question: who is Charles Holland related to?~DB

BUTT BISCUIT

Fantagraphics: *3 issues 1992-1993*

File under "experimental to the point of nauseating". Dean Williams and Ted Couldron pool their talents to produce this series of stories about a cripple being mistreated. It's likely that many people will find this offensive for one reason or another, which doesn't mean you shouldn't try it.~FJ

BUTTERSCOTCH

Eros: *3 issue miniseries 1991**

Originally released in English as an NBM collection, Manara's *Butterscotch* short stories are uneasily voyeuristic pieces about an invisible man who is in love with another woman, who persecutes a young woman, stripping and arousing her in public, making her look like a whore. How the situation comes about is not explained, but there are flashes of Manara working towards the kind of meta-fictional relationship between reader and creator he explores at great length in his *Guiseppe Bergman* series of graphic novels.~FJ

BUZ SAWYER

Dragon Lady Press: *3 issues 1986-1987*
Pioneer: *5 issues 1988*

Over the decades almost all the most influential comic artists have received due recognition in the form of lavish reprintings of their best work. For some mystifying reason this acclaim has eluded Roy Crane, regarded among the top rank by his newspaper strip contemporaries and a major influence on a generation of cartoonists whose career began in the decade after World War II. Many consider Crane's *Captain Easy* Sunday strips from the 1930s to be his career peak, their mixture of bold design, and well-cartooned action sequences an obvious influence on Alex Toth to name but one. A brief sequence of this and a longer sequence of his *Wash Tubbs* daily strips are reprinted in *The Smithsonian Collection of Newspaper Comics* (along with much other fine material). In 1943 Crane wanted to work on his own feature, and created Buz Sawyer, all action wartime pilot with an eye for the ladies. It debuted in November that year.

---

* Available in a collected edition

The Dragon Lady Press magazines are the best reprinting of *Buz Sawyer* to date, with good reproduction on clean paper. Their *Classic Adventure Strips* 7 had run a Buz Sawyer sequence from 1944 to 1945, and the first issue picks the daily adventure strip up from August 1945, at first omitting its more humourous, and less successful, Sunday editions. The superb draughtsmanship and fine characterisation are still fresh after fifty years. Sadly, this short run only briefly extends into the post war years, and while the stories are well-plotted and exciting, particularly in 3, as proved by *Classic Adventure Strips* 4 reprinting a sequence from 1949, the best was yet to come. Some stories from the 1940s were also reprinted in 1948 and 1949 in three issues of a Standard Comics series.

The Pioneer comics are shoddy product, but the easiest way of obtaining much material from 1943 and 1944, starting a month into the strip. Unfortunately, the editors chose not to reprint the strips faithfully, but to re-work them by enlarging or stretching some panels, to a full page on occasion, and cutting others in order that the whole read more like a traditional comic. It's testament to Crane's genius that despite this butchering his storytelling and meticulous graphic realism shines through, although best displayed on the panels sized somewhere close to the original printed dimensions. The writing is less spectacular, although certainly matching contemporary standards, as Buz fights the Japanese occupying some small islands. In the absence of any decently produced reprints, any true lover of comic art should seek these comics out. Pioneer additionally butchered *Mandrake, Modesty Blaise, Prince Valiant, Rip Kirby and Secret Agent*, all of which have received better treatment elsewhere.~FP

Recommended: Dragon Lady Press 1-3

BUZZ

Kitchen Sink: *3 issues 1990-1991*

Twisted anthology of top-notch material, edited by Mark Landman, who contributes computer-generated strips of his own including the demented Fetal Elvis in issue 3. Although short-lived the title featured work by Richard Sala, Charles Burns, Daniel Clowes, Jim Woodring and Jeremy Eaton. Issue 2 reprints a Basil Wolverton story, 'Supersonic Sammy'. Highlights include Charles Burns' "Naked Snack" in 2-3 and Mack White's *The Mutant Book Of The Dead* in 3.~NF

The BUZZ

Marvel: *3 issue miniseries 2000*

Spin-off from the alternate Marvel Universe of Spider-Girl where the grandson of J. Jonah Jameson steals/rescues a super-suit that gives him the powers of a human fly. As bad as it sounds.~WW

Aragonés BUZZ & BELL SPACE CADETS

Platinum Editions: *1 volume 1991*

Sergio Aragonés produces a European style album for global syndication, and as all the strips are silent there's nothing to lose by shipping a few copies to the USA. The theme is space exploration through the life of an astronaut and his chimp companion. Which is Buzz and which is Bell is up to you. Aragonés' cartooning is exemplary, and anyone who likes his work will be happy with this collection of one page gags.~WJ

BUZZ BUZZ Comics Magazine

Horse Press: *One-shot 1996*

This treasury-sized magazine contains a number of articles on comics (including appreciations of Moebius and Hugo Pratt) and music, interviews with publisher Paul Pope, Steve Bissette and Jeff Smith, as well as three strips by Pope and one by Moebius. The latter, 'Remembrances', in French, debuts here, while Pope's thirty-three page 'Smoke Navigator' is described as a work-in-progress, setting the scene for a longer story. Jay Stephens collaborates with Pope on 'Super Gag Comics' in which the two artists, with their characters Big Bang and H. R. Watson, compete in a wrestling match, and Pope's final strip, 'Pistachio', insists that three is a magic number. Essential reading for Pope fans, but others may want to wait for 'Smoke Navigator' to be completed.~NF

BUZZARD

Cat-Head Comics: *20 issues 1993-1998*

Eclectic, not to say erratic avant-garde cartoon magazine of humour and criticism from Steve Lafler and Stephen Beaupre. Contributors, although not always at their best, include R. L. Crabb, Lloyd Dangle, Julie Doucet, Mary Fleener, Phoebe Gloeckner, Mario Hernandez, James Kochalka, Mark Martin, and J. R. Williams. While many alternative features are given guest outings, such as Lafler's Bughouse (9) and Dog Boy (11), this is never more than an okay read.~WW

BUZZBOY

Sky Dog Press: *4 issue miniseries 1998-1999*

John Gallagher whips up a cool and impressive yarn set on a world where a Superman-like hero prevents World War II only to gradually become power crazed and take control of society. As the story starts Lord Ultra has declared martial law and his police are violently suppressing the populace when his long vanished sidekick Buzzboy returns after a fifteen year absence to make things right. All the iconic paraphernalia of Silver Age comics is there in abundance, wedded to a good story and a complete lack of grim melodramatics. Great Fun.~WW

Joe Lansdale's BY BIZARRE HANDS

Dark Horse: *3 issue miniseries 1994*

Adaptations of Joe Lansdale's short stories that, frankly, weren't all that good in the first place. Often disgusting and gross, seldom disturbing.~HS

BY THE TIME I GET TO WAGGA WAGGA

Harrier: *One-shot 1987*

Good on Harrier for recognising Eddie Campbell's talent and pumping out one-shots and series in the late 80s, despite sales figures rarely looking promising. By The Time...'s rationale is provided by a six-page Campbell/Trevs Phoenix strip contrasting travel now and in the future, a thin concept at best. Much better is the 'In The Days of The Ace Rock and Roll Club' reprint, some of Campbell's earliest work, where the crudeness of the drawing, especially of figures, is more than balanced by the astute observation, both of body language and of human behaviour.~FJ

CABLE

Marvel: *2 issue microseries ('Blood and Metal') 1992, 107 issues, 2 Annuals 1993-2002*

Cable, who first appeared in *New Mutants* 87, is the quintessential Rob Liefeld big-gun-toting character, who, despite having immense telekinetic powers, would rather shoot people. And yet it's not always as bad as it sounds. In amongst the ultra-violence, the convoluted *X-Men* continuity (Cable is the son of Cyclops and Madelyne Prior, sent to the future to become the ultimate warrior, then returned to the past to...never mind), blood and bullets there are some decent plots. Cable has a vulnerable side: he might have a destiny to save the world from Apocalypse, but that doesn't mean he has to like it. His entire life has been filled with suffering, pain and the death of anyone he let close to him. He's more violent than the X-Men but, along with his partner/lover Domino and his protégés X-Force, he also gets the job done – the job being making sure the Apocalyptic future he grew up in never occurs.

The original miniseries and 1-10 of the ongoing title are readable (provided you've acquired a taste for the big-guns genre), but the series really takes off with the arrival of Jeph Loeb as writer. Starting in 15, with a night-on-the-town date for Cable and Domino, Loeb strikes a good balance between soap, action and future-mythology that merges the mixed aspects of Cable's character, aided by lovely Ian Churchill art beginning in 20. The issues around this period play heavily on Cable's heritage, his awkward relationship with his father and how he fits into the X-Men's world. Such themes provide a fascinating read for those who enjoy the complicated and multilayered continuity involved, but can equally turn off anyone not steeped in the necessary background knowledge. This makes *Cable* an acquired taste, but well worth it if you're prepared to put in the effort. The introduction of Blaquesmith, a mentor from Cable's future and an important link to it; the building of relationships with his 'sister' Rachel and counterpart Nate 'X-Man' Grey; and explorations of his ties to the future cult of the Askani all make for an interesting exploration of Cable's uniqueness: his displacement in time and destiny to fulfil various prophecies. Loeb makes the most of this aspect of the character and pushes its potential to the limit.

Loeb and Churchill depart with 39, and the next issue of note is 44 with the arrival of writer James Robinson. He immediately finds his feet with a touching tale of Cable and his mother, Madelyne Prior, and especially with the addition of Jose Ladronn on pencils from 47 (plus 46 cover), inked by Juan Vlasco. Ladronn's art is a precocious combination of Jack Kirby and Moebius, and combines with Robinson's ability to see the potential in the most tired concepts to bring a vibrant new dynamism. Ladronn is never credited as having any story input, but a sudden shift to grandiose, Kirbyesque epics redolent of the Fourth World can hardly be coincidence, especially as they remain long after Robinson is replaced by Joe Casey. Tellingly, the numerous fill-in issues during this period by different artists but the regular writers are markedly inferior. Ladronn's issues of *Cable* are by far the best.

Rob Liefeld returns to his creation in 71. His issues are worth a look, but an inability to meet deadlines means that he only manages alternate issues, leaving poor co-plotter Joe Pruett to pick up the pieces, which he does competently until 78. Thereafter the previously covered themes are re-run. A new direction was needed, but David Tischman's approach from 97 would be laughable if its sheer ignorant stupidity didn't make it so offensive. Cable sets off on a world tour, solving problems such as the Shining Path and even the IRA by preaching philosophy and telling small children how to live together in peace. It was a sad end to what had been at times a refreshingly different and unique book, but its cancellation (to be restarted as Soldier X) can only be described as a mercy killing.

Cable was, from beginning to end, 100% a 1990s comic. The heir apparent of the big guns, gritty uber-violence and style-over-substance legacy Liefeld left the industry, it nonetheless survived its humble roots to be something better than it ought to be: rarely a run-of-the-mill superhero comic, never quite able to escape the overblown continuity that was its blessing and its curse. It was certainly never for those stuck in the safe simplicity of the 1960s. It was, undoubtedly, the best of its kind: a comic that defined a much maligned period of the genre but sadly wasn't able to outlive it. It doesn't deserve to be forgotten. Nathan Summers continued in *Solider X*.~JC

CADILLACS AND DINOSAURS

Marvel/Epic: *6 issue miniseries 1990-1991*
Topps: *9 issues 1994*

The Epic miniseries reprints Mark Schultz' *Xenozoic Tales* stories in colour. As he was having difficulty putting out issues in the early 1990s he licensed the concept to Topps to produce new colour stories. They continue the adventures of 26th-century mechanic Jack Tenrec and his co-adventuress and love interest, the feisty Hannah Dundee. In a future where dinosaurs roam and small tribes of human survivors face a harsh fight for survival – although the way the pair romp around relishing their run-ins with sundry scaly monsters you'd be hard pressed to sympathise.

Roy Thomas writes a trio of three issue stories competently, bringing in plenty of new, commercial characters, but accompanying artwork is variable, and the colour harsh. Dick Giordano draws 1-3 in a bit of a hurry, in which someone seems to be trying to take control of the City In The Sea's governing council, with back-ups by Rich Buckler. Jean-Claude St Aubin handles the art on 4-6, and has obviously studied the same sources as Schultz (Wood, Wood again, and maybe a pinch of Williamson). The final tale, in which Jack encounters a rapacious motorbike girl, is disastrously drawn by Esteban Maroto, who tightens up his loose, open style but still looks extremely unsuited to the title. Overall, *Cadillacs and Dinosaurs* only serves to emphasise how reliant on the quality of Schultz' art the success of the concept is.~FJ

CAFFEINE

Slave Labor: *10 issues 1996-1999*

Anthology vehicle for the bizarre stories and exceptional drawing styles of cartoonist Jim Hall featuring such diverse luminaries as Fred Kincaid Alice, Carson, The Plaid Bastards, Checkered Chick-Force and even Satan and the Big Booty Demon Hoes. Hard to describe and a joy to read.~WW

Recommended: 3, 6

CAGE

Marvel: *20 issues 1992-1993*
Max: *5 issue miniseries 2002**

Power Man returns without Iron Fist (who turns up in 12) as Luke Cage moves to Chicago and becomes associated with a campaigning newspaper and Dakota North, private detective, star of her own failed series. Cage trusts no-one and is now merely out to earn a living supporting causes he approves of. When persuaded that Dakota knows something about his supposedly dead father he sticks around to help her against villains like The Untouchables (Kick-Back, Nitro and Tombstone, 2-4). Guests are used to help boost the title's profile from the start, Punisher in 3-4, West Coast Avengers in 5-8 and the Hulk in 9-10. The main storyline, however, up to 14, concerns Cage's past and his attempts to prove himself innocent of all the crimes he's been charged with over the years. A six-part crossover with *Silver Sable* and *Terror Inc.* (15-16) is followed by an *Infinity Crusade* tie-in before the final story creates Dark Cage. Written by Marc McLaurin throughout, it's all hard-nosed superheroics with no room for subtlety or anything beyond the bare minimum of characterisation. Dwayne Turner's artwork is dynamic, but ragged and unattractive (1-10). Scott Benefiel (from 15) has a more open, flowing style, but is stifled by the colouring.

The miniseries sees Cage adopting a hard-boiled investigator role, accepting the request of a mother to find out who killed her child during a drive-by shooting. This puts him in the middle of the rivalry between a street gang and the mob, with corrupt police officers thrown in for good measure. The would-be-tough script and macho-posturing in Brian Azzarello's writing are hardly convincing, and Cage might as well be a completely different character, but the smart artwork by Richard Corben offers some consolation.~NF

CAGES

Tundra: *10 issues 1991-1993**

Cages is the series by which you will judge whether Dave McKean is a gifted creator of comics or a painter who happens to have wandered into the world of the cartoon. Gone are all the scratchy overlays, multiple layers, photographs and collages, but Cages remains a work that examines the role of the artist and the function of art as a creative process. Just as many artists exhibit work in progress and preparatory material alongside their finished creations, so McKean begins the series with several pages called 'Scaffolding' in which he displays his initial thoughts and explains his purpose. He launches into accounts of ur-myths of creation and death which are a bit embarrassing in their simplicity. They're best skipped: after all, artists don't stand by their paintings telling you what they think they're doing on the canvas, do they? The unkind may decide that *Cages*, with its obsessions with art and jazz, is actually about McKean and his own creative process. However self-centred, though, the construction of the comic remains interesting.

Creation comes up again and again in the series of grey, thematically interlinked plotlines in which nothing much happens, but which contain a lot of thinking and saying. The protagonist arrives at a house, already inhabited by several artists, particularly Sabarsky, the painter looking for inspiration in solitude, and Angel, the jazz pianist. McKean gradually gathers them together, examining their lives, and reveals his greater purpose, although less patient readers will tire of the wait. The opening to the first chapter spends several pages observing a cat (beautifully, admittedly). It's pretty much the *Magnificent Ambersons* of comics story telling. His artwork is extraordinarily restrained at the start but soon degenerates into bursts of different styles, rather showily laid out for us, although along the way there are some wonderful, loose character studies.

The story in *Cages* becomes much more interesting when McKean turns away from the artistic inhabitants of the house, having delivered his messages about himself as creator, and puts the spotlight on more ordinary characters, such as Mrs Featherskill in 6. The whole issue, a careful unpeeling of the layers of her life, told via her ramblings and dreams, is McKean at his best.~FJ

CAIN

Harris: *4 issue miniseries 1993*

Cyborg super-soldier gone renegade becomes involved with some iron curtain leftover troops, one of whom used to be his wife, and a confused telepath. A few workable ideas are largely buried in a confusing morass of superfluous commentary and increasingly rushed art.~WJ

A CALIBER CHRISTMAS

Caliber: *One-shot 1998*

A Christmas themed sampler of the features Caliber was publishing in 1998, plus *The Jam*, which had finally sunk at Caliber two years earlier. The sentimental episode of The Apparition tugs at the heartstrings, while *Lifequest* and *Saint Germaine* are also good. Beyond that, though, the likes of *Pakkins' Land*, *Kilroy*, and *Little White Mouse* fill the pages without spark.~WJ

CALIBER CORE

Caliber: *1 issue (0) 1998*

Source book with background information on the characters that make up the Caliber Core universe plus a St Germaine short strip.~WW

CALIBER PRESENTS

Caliber: *23 issues 1989-1992*

Caliber's original showcase title is the curious mélange of all such beasts, offering few delights, but numerous different perspectives and a very catholic editorial policy. For all that, there were few successful graduates, the best known being James O'Barr, whose *Crow* strip first appears in 1. Always more about mood than talent, it's basic stuff, as is Tim Vigil's appalling slash-and-sex alter ego strip in most issues to 8. If the size of the character and his weapon is inversely proportioned to the creator and his, Tim Vigil is a midget lacking a penis. More respectable in the early issues is 'Faerie Tails', a funny-animal fantasy by Dave McKinnon and James Dean Smith, drawn in Smith's appealing open style, but 5 is the best of the first flush. For starters there's no Vigil, with the overriding theme being maternal and tragic love, but there is a poignant tale of an old lady being robbed, and a decent prose piece from Mark Perry. Many issues contain illustrated prose, but it's largely mundane. Another early feature is previews of the more popular Caliber titles such as *Deadworld* (2, 9), *The Realm* (3), *Fringe* (8) and most effectively *Baker Street* in 4, with an original 'Baker Street' story in 9. That issue, the best overall, also features a *Jazz Age Chronicles* short, and two very different, well written stories from Rafael Nieves. The cover claims it introduces 'Street Shadows', which has to wait an issue, but it's a generally fine selection of stories concerning life in the city, with 20's 'The Caretakers', about garbage collectors, and 12's tale of a retiring diner-owner standouts.

Of other semi-regular strips, the meandering and tedious 'Orlak' was somehow popular enough to warrant two comics collecting his escapades, while the far superior 'Taken Under' was also collected. By Debra Rodia and Michael Lark, it's an odd and mood-driven story about a guy whose father ran a funeral parlour and sold his soul to the devil. 'Mack The Knife' is almost underground cartoony, while there are too many strips seemingly progressing without a conclusion in mind, 'The Fugitive' foremost among them. Originally a novel idea of a killer being chased through various TV dramas and comedies, the joke is stretched way too far. 'Eyes of the Hero' takes the innovative (for comics) idea of depicting exactly what the crimefighter is seeing for every panel, and departs with a decent conclusion after three instalments. Beyond the fact that there's a decent 'Silencers' short in the final issue and O'Barr returns in 5, there's little else worth noting. The missing ingredient ensuring greater popularity of the similarly conceived Negative Burn was the addition of more personal works by already highly regarded creators.~FP

CALIBRATIONS

Caliber: *One-shot 1992, 5 issues 1996*

Originally intended as a summer special, this featured short stories of Caliber's early hits including *Airwaves*, *Baker Street*, *Fringe* and *Deadworld*, and returning three years later as a loss-leader, published at a discount price to showcase some of their better titles. All new material included *War of the Worlds*, *Rust*, *Count Orlak*, *The Lost*, (the further adventures of Peter Pan characters set in contemporary New York) and held together by Warren Ellis and Ken Meyer Jr.'s 'Atmospherics' serial. Excellent.~WW

Recommended: One-shot

CALIFORNIA COMICS

Bob Sidebottom: *3 issues 1974-1977*

Largely trivial sex-and-trips material is occasionally redeemed by the appealing cartooning of Ed Watson, although Scott Shaw and Will Meugniot are also on display in the first issue. Of perhaps more lasting interest is the comprehensive A-Z listing of underground comix begun in 2, and sadly never finished.~FP

CALIFORNIA GIRLS

Eclipse: *8 issues 1987-1988*

Trina Robbins writes and draws the adventures of Max and Mo, twin sisters and teenage models. Light, fluffy, fun and with some surprising high-profile names among the 'guest fashion designers'.~HS

CALL ME PRINCESS

CPM: *6 issue miniseries 1999**

Gentle romance about schoolgirl Makoto's dream to be treated like a princess, based on her adulation of her elder sister's husband, whose younger brother, Ryu comes to stay with her family. Tomoko Taniguchi's strip has charm and a certain cuteness, but lacks depth.~NF

THE CALL OF DUTY

Marvel: *6 issue miniseries ('The Brotherhood') 2002-2003*, 5 issue miniseries ('The Precinct') 2002-2003, 4 issue miniseries ('The Wagon') 2002-2003*

In the wake of heightened public respect for the emergency services, Marvel issued these miniseries highlighting respectively firemen, police and paramedics. The opportunity was there to provide respectful tributes that might appeal to a wide audience, but Marvel blew it, although they start very well indeed. Featuring different creative teams, there's a unity to the stories provided by the lead character in each series having seen a mysterious young girl in danger providing warnings of disaster. Her first appearance to fireman Lt James MacDonald is quite chilling, but later revelations as to her identity and purpose are anomalous cheap manipulation in otherwise real-world comics. So are spontaneously combusting drug addicts, cementing these as Marvel comics with a constant reminder that Spider-Man could swing in and save the day. Further problems are that while 'The Precinct' by Bruce Jones and Tom Mandrake can be read in isolation, purchase of both the Chuck Austen written titles is required to follow the plot, and anyone not reading them in the order of publication is going to be thoroughly confused. That these are such major blocks is a shame, as there is much to enjoy, particularly the art of Dave Finch and Art Thibert on 'The Brotherhood', and the well researched real-life situations in all comics before fantasy predominates.~FP

CAMBION

Slave Labor: *2 issues 1995-1996*
Moonstone: *5 issues 1996-1998*

Eccentric tales of a rock musician who has a mental breakdown only to be comprehensively abused by the psychiatrist in whose care he is placed. When released he's unable to speak, except in snatches from other people's songs, and cursed with a kind of ambivalent precognition. He constantly envisages alternate outcomes to confrontational situations, yet is drawn to interfere in squabbles, usually couples arguing, and compelled to attack one or other with fatal results. He fascinates Brandy, who wants to help him, and his crimes obsess Jimmy the Cop, whose career suffers as Cambion's rampages continue. There's also his deadly pet rabbit and a bar-hopping penguin that plays pool to contend with. Joe Gentile writes a readable tale but spends too much time making it uncategorisable, and not enough dealing with the nuts and bolts of storytelling. The vague dissatisfaction is exacerbated by numerous and inconsistent artists.~WW

CAMELOT ETERNAL

Caliber: *8 issues 1990-1991*

Ponderous continuation of the Arthurian legend, although the illustration more resembles traditional biblical imagery.~WJ

CAMELOT 3000

DC: *12 issue limited series 1982-1985**

Brought back from centuries of slumber to fight evil alien invaders, King Arthur, Merlin and the rest of the Round Table make for an unlikely superhero team in Mike W. Barr and Brian Bolland's popular *Camelot 3000*. Writer Barr – 'continuing legends chronicled by Sir Thomas Malory', apparently – wastes no time in reviving the love triangle between Arthur, Queen Guinevere and Lancelot, reincarnates Sir Tristan as a woman, turns Sir Perceval into a monstrous 'Neo-Man' and has Arthur's wicked half-sister Morgan LeFay leading the baddies. Bolland's typically refined pencils occasionally suffer at the hands of inkers Bruce Patterson, Dick Giordano and even Terry Austin, but this remains a highly professional piece of enjoyable old tosh.~AL

CANCERMAN

Edge: *1 issue 1994*

Some excellent Kurtzmanesque cartooning on the part of the mysterious 'Sherm' provides value throughout. His first strip considers the real effects of radiation on the creation of superheroes as Irwin Meek, at first delighted with his new X-ray vision, develops a bloated, tumour-riddled body. A tame attempt at a newspaper gag strip precedes the preposterous Wotta Woman, whose breasts grow to massive proportions, stopping criminals in their tracks. There was lost promise here.~WJ

CANNIBAL PORN

Eros: *3 issue miniseries 1994-1995*

A decidedly odd beast, with the title, which is lived up to, and scratchy stylised art surely putting off regular Eros purchasers. There's plenty of sex, most of it quite sordid and dubiously violent, laced with a very black sense of humour (one hopes), in what is the first published work of Rich Tommaso. While not carrying the depth of his later material, in many ways it's a pointer as to what a sex comic should be. The sex isn't an excuse to excise all plot, and while the plot is daft there's a film noir feel about the whole. Not for all tastes, but not to be dismissed out of hand as your average stroke comic.~WJ

CANNIBAL ROMANCE

Last Gasp: *One-shot 1986*

A late underground anthology that celebrates all forms of flesh digestion, *Cannibal Romance* includes the work of Kristine Kryttre, Carol Lay, Paul Mavrides, Dori Seda and Japanese cartoonist 'Mr Tero'. The highlight is a deliciously obscene collaboration between Lydia Lunch and the late Mike Matthews entitled 'Portrait of an American Princess', featuring the finest head-up-an-arse moment in all comics history.~AL

CANNON

Wallace Wood: *4 issues 1979-1980**
Eros: *8 issue limited series 1994*

The original publications were lavish oversized black and white collections of Wally Wood's armed-forces newspaper strips. *Cannon* was a heady mix of brutal violence, cold war rhetoric and copious nudity that most right-thinking people will find enormously offensive. On the other hand, it was also a lot of fun, and Wood's art is always a pleasure to look at, even if saddled to some very dubious writing. The Eros series reprints the series in traditional comic size, but is faithful to the artwork by spreading each oversize page over two comic pages.~DAR

CANNON GOD EXAXXION

Dark Horse: *12 issues + 2001 to date*

Under guise of friendship, the Rifaldians infiltrate Earth society at all levels, passing out their superior technology as a gift over a decade, before assuming control of the planet. High school loner Hoichi's grandfather is the one person to have seen the Rifaldians for what they are, and has secretly developed a battlesuit for Hoichi to fight them. Crucially, as well as providing protection, secrecy and weapons, it uses no contemporary Rifaldian technology, so remains immune to their manipulation. He's aided by a large breasted android, also of his grandfather's devising, who can transform herself into an air bike for Hoichi, and eventually discovers that's just part of his resources, which include possibly the biggest battle robot ever seen in Japanese comics. Kenichi Sonada is an accomplished artist, and adept at creating sympathetic characters and scenarios, with Hoichi's appalling grandfather a triumph. 1-8 ('Stage 1') are little more than set-up, and in 9-12 Hoichi realises he's the world's hope. He must avoid revealing himself to the Rifaldians, who've prioritised capturing the battlesuit, and protect his friends. What makes this better than average, though, is Sonada presenting the broader picture, treating this as an ensemble story with some Rifaldian characters getting as much time as Hoichi. It's a very promising start that twists adeptly away from expectations.~FP

---

* Available in a collected edition

CANVAS

Black Velvet Studios: *2 Issues 2000-2001*

Anthology of superhero, fantasy and science fiction strips including Eric Canete's 'Citizen' (1-2). Tim Divar's 'Planet Fighter' is a fight between giant robots that reads like manga, but has US style artwork, and 'Backspace' (1-2) by Axel Ortiz concerns the cyberspace adventures of message carrier, Delgado. It's cleanly drawn, but ends poorly. Overall this shows promise, but is of mixed quality.~NF

CAPE CITY

Dimension X: *3 issues 1993*

But for a quirk of evolution we'd all be lizards, and but for a quirk of fate Chuck Spratlin would be reaping the acclaim and rewards of *Powers*, because that's what *Cape City* is. There's the same scenario of human investigators in a city of superheroes, an equally engaging cast, and it's well written. The major difference is that Spratlin's art isn't the finished article. The attractive Wendy and precocious Stu work for a detective agency. They're funny and capable, and it helps that Stu is seemingly indestructible. In the published issues there are more than enough pointers towards plots to come, indicating a thoroughly conceived world. The entire set is still available via Coldcut Distribution and if you can't get enough Powers you could do far worse than have your dealer order these from them.~WJ

CAP'N QUICK & A FOOZLE

Eclipse: *3 issue miniseries 1984-1985*

Cap'n Quick is a super-fast kid in dungarees and a flying helmet. A foozle is a birdlike creature with huge green human feet in spats and a removable proboscis that's halfway between a nose and a bill. The weird, dreamlike adventures of the Cap'n and his shiny black pal Klonsbon are continued from the pages of *Eclipse Monthly*. Marshall Rogers' funny fantasy has great charm and is rich with visual jokes like the Bob Dobbs bartender in 1 and the parody Judge Dwedd in 2. The script is credited to Chris Goldberg but it's clearly Rogers' show. 3 is simply titled The Foozle.~SW

CAPSULE

Dreadfully Slick Developments: *1 issue 2000*

A would-be comedy with an annoying narrative voice. Jex, the Black Imp escapes from Hell and possesses Paulie, who promptly chops off the two peoples' heads. Elsewhere, an unnamed mortal has found a dimensional key and is told by a talking bird that they'll be coming for him. Iceberg Slick (Emmett Gates) produces simple drawings on mixed media backgrounds that are too dark to see clearly.~NF

CAPTAIN ACTION

DC: *5 issues 1968-1969*

DC beat Marvel by a decade in adapting an action-toy into a comic, when Captain Action briefly became embedded in the DC Universe. Archaeologist Prof. Clive Arno found ancient coins which, when held, gave the holder the power of the god portrayed on the coin. Arno became Captain Action, and his son, Action Boy. Creative talents included Jim Shooter, Wally Wood, and especially Gil Kane, who produced some of his best-ever material, story and art by his own reckoning. The only let-down was the awful costume. A peaked officer's hat and skintight costume made the good Captain a natural to sing with the Village People. Still, a well produced series that deserved a longer run.~HY

CAPTAIN AMERICA

Marvel: *Series one 355 issues (100- 454), 13 Annuals 1968-1996, 1 Giant-Size 1975, series two 13 issues 1996-1997, series three 50 issues, 3 Annuals 1998-2002, series four 5 issues+ 2002 to date*

Taking over the numbering of *Tales of Suspense* (shared with Iron Man since 59) *Captain America* kicks off with a recapped origin and the conclusion of his fight with a bogus Baron Zemo before thundering through a string of visually stunning but uninspired Lee/Kirby action-fests. Jim Steranko then illustrates one of the most inexplicably memorable epics in the character's career as Cap takes a new youthful partner and fakes his own death to regain the anonymity of a secret identity. This is in 110-111 and 113 (with Kirby returning in 112 to draw a capsule history of the supposedly deceased hero) as the Hulk and Madame Hydra nearly destroy New York. So confused was the outcome that eventual *Captain America* scripter Steve Englehart took it upon himself to clear it all up in *The Avengers* (106-108), explaining that everyone on earth was under the influence of alien hypnosis. It must be said, though, that Cap was never drawn so well as in those issues.

A procession of artists followed before Gene Colan signed on just in time to co-create the Falcon, a black social worker/sidekick who would eventually replace the boy heroes that had been Cap's previous assistants (117). Although artistic stability had been achieved, storywise Cap was floundering, vacillating between superspy, urban avenger, and in the increasingly dissident 1960s, symbol without a cause. Occasionally the mix would gel into an excellent issue such as 127, inked by Wally Wood, 128, wherein Steve Rogers embarks on his own Easy Rider style bike quest across America, or 135-136, inked by Tom Palmer and Bill Everett respectively, but generally the work is uninspired. It's almost timid, as if the creators were unsure of how to handle a patriotic icon selling to a youth market becoming increasingly intolerant of patriotic dogma.

Even after Lee relinquished scripting to young rebels Gary Friedrich and Gerry Conway, Cap meandered along, fighting spies, supervillains and aliens, in tales less than ever in tune with the character or the times. Then Roy Thomas brought in Steve Englehart to script over his plot for the return of the Captain America and Bucky from the Eisenhower era. In a rare blend of allegory and action Cap and Falcon defeat and supplant Republican Americanism and solidly reposition and redefine the Star Spangled Avenger for the worldly-wise youth oriented 1970s (153-156). With Sal Buscema providing simple, uncluttered art, Englehart began a run of adventures that played to the hero's strengths. Whether fighting arch-villains like the Yellow Claw, reassessing the role of covert agencies in a free society, or coming to terms with the legacy of Vietnam, Cap's intellect and heart worked in tandem with his fists. The high point was a sequence where he is framed for murder, and must deal with losing the faith of the American people. This tale paralleled and incorporated the Watergate crisis, culminating in Captain America rejecting his role as a symbol and becoming Nomad, the man without a country (169-176).

His inevitable return was in response to a slaughter spree by the Red Skull, genuinely impressive for the first time since the Simon and Kirby days of the 1940s, and chillingly depicted by veteran newspaper cartoonist Frank Robbins. Sadly, with Englehart's departure (186) the quality plummeted once again, and even the singular vision and thrill-a-minute pacing of Jack Kirby, who returned as writer and artist (193-214, Annuals 3-4) could not revive flagging interest. The parade of mediocrity shambled on until Roger Stern and John Byrne signed on with 247 to produce a string of superb action tales including Cap's 'campaign' to become President (250) and a retooling of the origin combined with a World War II adventure to celebrate his 40th Anniversary as their swansong (255).

In 259 Mike Zeck began a long run as artist, with J.M. DeMatteis joining in 261, to produce a consistent run of better than average stories concentrating on Steve Rogers, the man behind the mask, and a growing supporting cast of ordinary people, a resource sadly lacking throughout Cap's career. Although competent, the run is peculiarly unsatisfactory, with DeMatteis' inclination to lyricism and dark introspection at odds with the clean cut, square-jawed traditionalism of America's idealistic Sentinel of Liberty. In 281 Jack Monroe, the de-programmed, ex-racist Bucky from the 1950s returns, becoming the new Nomad in the next issue, and much of the focus shifts. Monroe has awoken decades after his own time, much like Cap himself twenty years previously, and this gives DeMatteis the chance to analyse the experience in the context of the 1980s. Nomad becomes his new partner. Paul Neary takes over the art for DeMatteis' overlong final tale (292-300) pitting the hero against his spiritual and ideological antithesis, The Red Skull. Neary continues as a shuffling of writers eventually results in Mark Gruenwald writing from 307.

As "Cap's greatest fan" he embarked on a personal crusade to elevate him to the top rank of Marvel's publications, resulting in some strong plots and some equally dire ones. Of note are Scourge, an assassin who murders supervillains (320), and a long running storyline (332-350) which sees Steve Rogers replaced as Captain America by order of the US government. Much of the material to avoid occurs after he reassumes the mantle, as Gruenwald seems to lose interest, or at least inspiration, after 350 and the stories take on an air of treading water, with gimmicks replacing plotting. The serum that turned Cap into the perfect human being is removed from his bloodstream as the Star Spangled Avenger adopts a "Just Say No" policy to all drugs, gets turned into a teenager (355), a woman (391), and a werewolf (405). Gruenwald's run ends with a long serial (425-443) that details the deterioration of the serum that created Cap, weakening, paralysing and eventually killing him. It's a last ditch attempt to revitalise a flagging title with all stops pulled out. At one stage the hero even dons Star Spangled Armour – a kind of combat iron lung, but it just doesn't work.

When Gruenwald relinquished control with 443, Mark Waid and Ron Garney created a pocket of excellence to close the first series. There's strong plotting, fast pacing and superb dialogue, with Cap brought back from the dead by his greatest foe to save the world in 'Operation Rebirth'. The exploration of his role as symbol and patriot when he is convicted of treason in 'Exile' made the end a high point, and only served to emphasise the travesty to follow.

Series two was part of Marvel's Heroes Reborn sub-franchise, wherein a number of the company's mainstays were hived off into a separate universe and retrofitted for the 1990s. Rob Liefeld was given custody to produce a catastrophic jumble of nonsense that has Cap as a government agent kept in storage, and decanted every time a crisis occurs, with his memories adjusted at the end of each mission. When the Red Skull returns, Cap throws off his Federal shackles and sorts it all out with the aid of Bucky – a hip teen chick, and the Falcon, before turning his attention to the Sons of the Serpent. Scripter Jeph Loeb and Liefeld are replaced but the damage is irreparable. Even James Robinson can inject little sense into the muddled tales as Nick Fury is first revealed to be the supremacist Supreme Serpent, then not Fury at all. As the Heroes Reborn titles gear up to return to the Marvel Universe all four titles link in crossover fever, teaming up to tackle Galactus, Dr Doom and the end of the world. Captain America is all but lost in the morass of confused spandex. Good riddance.

Series Three begins with another high point reuniting Mark Waid and Ron Garney (1-6) as Cap fights Japanese Isolationists seeking to remove American cultural influences, before embarking on a campaign to eradicate the evil Hydra organisation. The decline is gradual. Under Waid and artist Andy Kubert, Cap once again becomes a blend of crime-buster and superspy, with adventures in the savage land, against other super-soldiers, and the inevitable returning villains. They produce pretty, if facile stories until Dan Jurgens takes over (25), first scripting, and eventually drawing more glossy, unremarkable adventures with the symbol of Liberty reduced once again to just another guy in a mask. Fans will be happy, but the stories don't travel well outside their own arena. The series ended with a cliffhanger, followed by another, seemingly unrelated miniseries, whilst the contemporary Star-Spangled Avenger prepared for yet another reboot.

The fourth volume resumes with no reference to previous incarnations and concentrates fully on Cap's role as Defender of Liberty. Co-opting the horror of the World Trade Towers' destruction, John Ney Rieber and John Cassaday have Steve Rogers doggedly digging for survivors in the rubble before being assigned to capture the terrorists responsible, who are now threatening to murder an entire American town which they have taken hostage. Under the title 'Enemy' Ney Rieber examines the Sentinel of Liberty's place and efficacy in modern society. The histrionics, patriotism, fear and outrage following the bombing of Pearl Harbor are back in full force, and he has Captain America ask whether the thinking and responses of sixty years ago are relevant or even desirable in the post-millennial USA. Worth a look.~WW

Recommended: 127-128, 135-136, 153-156, 169-186, 247-255, 444-454, series three 1-3, series four 1-3

CAPTAIN AMERICA COMICS

Timely: *78 issues 1941-1950 (1-75), 1954 (76-78)*

Not the first patriotic hero, being predated by The Shield, but certainly the best. Steve Rogers, too puny to otherwise serve his country during wartime, volunteers for a dangerous experiment to become a prototype supersoldier. The experiment succeeds, but enemy saboteurs ensure Rogers is the first and last of his kind. Donning the star-spangled garb of Captain America, he sets out to embody the ideals of liberty, gaining a sidekick Bucky when his army camp's teen mascot discovers his identity and, well, blackmails Rogers into letting him tag along! Gee, that's not very American.

Created by the legendary team of Jack Kirby and Joe Simon, the superpatriot smashed through Nazis, home-front saboteurs and plain exotic villains with equal verve and gusto, in dynamic and atmospheric stories that redefined the limits of the comics page. They only produced 1-10*, but the momentum of their legacy, including Cap's nemesis the Red Skull, one of comics' most vivid villains, carried the title through the post-war years in less talented hands. Sales only began to drop in the late 1940s, when reader interest in superheroes was fading and the entire medium was coming under attack by various groups of concerned mothers. Bucky was replaced by the strip's Lois Lane-alike Betty Ross, who became Golden Girl in 66, and story focus moved to either true crime or human interest, then to an increasing emphasis on horror. These tactics failed to stem the tide of departing readers, and the series ended with the ignominiously titled Captain America's Weird Tales, a horror anthology in which Cap himself didn't appear. The 1954 revival was risibly subtitled 'Commie Smasher'. Although it featured some nice art, including work by a fledgling John Romita, the resulting simple-minded stories hooked no one and Cap and Bucky fell back into limbo until the 1960s.~HS

CAPTAIN AMERICA Miniseries and One-shots

Marvel: *One-shot ('Bicentennial Battles') 1976, 4 issue miniseries (The Adventures of Captain America: Sentinel of Liberty) 1991-1992, one-shot ('The Movie Special') 1992, one-shot ('The Medusa Effect') 1994, one-shot ('Marvels Comics: Captain America') 2000, one-shot ('The Otherworld War') 2001, 3 issue miniseries ('Dead Men Running') 2002, one-shot ('Red, White & Blue') 2002*

Malibu: *One-shot ('Prime') 1996*

'Bicentennial Battles' was published to celebrate the USA's bi-centenary, and features Jack Kirby's paean to the ideas that make America as Captain America is tricked by Mister

---

* Available in a collected edition

Buda into a whirlwind trip through time and space, examining various aspects of American life as he goes. Big (it's a treasury-sized issue), bold and with a wealth of guest inkers, including Barry Windsor-Smith, this is occasionally frustrating, but a delight nonetheless.

'Sentinel of Liberty' is a terrific retelling of Captain America's origin and first adventure, including meeting Bucky and the Red Skull. It adds details about Steve Rogers' life before trying to enlist, during training and the secrets behind the super-soldier serum. It's written by Fabian Nicieza and largely drawn by Kevin Maguire. Stan Lee and Bob Hall have a stab at 'The Movie Special', in which Captain America's creation and hibernation are all part of his first adventure, as he stops an Italian Red Skull from destroying the White House. On his resurrection, Steve Rogers has trouble adjusting to modern life, while the Red Skull and his daughter plot his death and to control the mind of the President. This almost works as a spy thriller, action adventure, but the active participation of the President seems overtly propagandist.

Through the use of Nicholas Tesla and locations such as Madrid, 'The Medusa Effect' is an informative and thoughtful World War II story served up by Roy Thomas. Baron Zemo and Master Man, with Baroness Zemo and her son, Helmut, are the focus of a story as much about family as about the super weapons they're trying to use. With pencils by Rich Buckler and M. C. Wyman, it's unfortunately not that appealing visually. The 'Marvels Comics' one-shot is part of a series that pretends to be publishing the adventures of various characters from within the Marvel Universe. In this, Rick Jones travels back in time to play Bucky for a final battle with Baron Zemo and the Red Skull, but not even Peter David can rescue this senseless issue. 'The Otherworld War', by Peter Hogan and Leonardo Manco, teams Captain America with Sergeant Fury set in the unfamiliar territory of Dormammu's Dark Dimension. The action is predictable, but the scenes where they meet Clea are fun and it's well drawn, though too darkly coloured. Surprisingly, Darko Macan and Daniel Zezelj's 'Dead Men Running' is a taut thriller, that uses Captain America himself sparingly, concentrating on the group of soldiers that he arrives to help as they flee from members of a cocaine mafia with a number of children. All is not as it seems, however, allowing for some good, emotional scenes. Even Zezelj's blocky, unrealistic artwork is effective in this context.

'Red, White & Blue' is an excellent collection of new and reprinted material including a two-page career synopsis from Paul Dini and Alex Ross, Tony Salmons on the Red Skull, and Paul Pope with Nick Bertozzi on the Red Skull's teaching methods. Max Allen Collins and Vatche Mavlian tell a tale of 1950s McCarthyism, Yann Lepennetier and Philippe Berthet provide a very funny story of Captain America against the communist Red Bra, Karl Bollers and Dean Haspiel offer a blaxploitation version, while Paul Storrie and David Lloyd address racism. There are also strips from Bruce Jones with Richard Piers-Rayner, Darko Macan with Bruce Timm, Peter Kuper, Jeff Jensen with Frank Quitely, Jensen with Mike Deodato, and Evan Dorkin. The reprints include the origin of the Red Skull by Stan Lee and Jack Kirby, alongside strips by Jim Steranko, Frank Miller, and John Cassaday (the last of which is the only bum note in this collection). 'Prime' has Captain America in the Ultraverse, where he teams up with Prime. Even drawn by regular Prime penciller, Norm Breyfogle, this is a real stinker.~NF

Recommended: The Adventures of Captain America 1-4, 'Bicentennial Battles', 'Red, White & Blue'

CAPTAIN AMERICA, Sentinel of Liberty

Marvel: *12 issues 1998-1999*

Conceived as a regular title depicting 'snapshots' from various points in the Captain's long career, this failed to catch the public imagination despite a reasonably high level of quality. Perhaps being so determinedly 'set aside' from the regular title's continuity, readers decided it was just as easy to set aside the whole thing and not bother about it. 1 was a contemporary story looking back at the Captain America/Sharon Carter relationship, by Mark Waid and Ron Garney, who had just relaunched Cap's ongoing series; Waid stayed aboard for most of the rest of the run, with rotating guest artists after Garney left with 6. Other interesting stories involved World War II and the Invaders, the best tale of the run (2-4), the Falcon and civil unrest (8, 9), and a spotlight on Bucky (the double-sized 12). Standout for worst issue is 10, by fill-in writer James Felder, where a hallucinogenic account set at the time of the Kennedy assassination completely misses the point both of the series and the character. Most issues, 10 excepted, weren't rubbish, but they were very far from essential reading.~HS

CAPTAIN ATOM

Charlton: *12 issues (78-89) 1965-1967*

The triumphant return of Charlton's space-age hero in his own title, after three issues of reprints in Strange Suspense Stories, from which the numbering continued, had signalled the demand for new material. US test pilot Captain Adam is trapped inside a test-detonated nuclear missile, but instead of dying manages to reintegrate his body by sheer force of will. Given a costume to inhibit the harmful radiation he now emits, he functions as the guardian of Earth and the enemy of Cold War communism. 78-83 feature the original Captain Atom in all his nuclear-powered splendour, then, in 84, his powers are drastically reduced and his costume altered in order that he more readily fit the Charlton 'Action Heroes' line. In the meantime a female sidekick, Nightshade, and an arch villain, the Ghost, joined flight engineer Gunner Goslin as the regular supporting cast. Dave Kaler's scripts have a bizarre mixture of camp inventiveness and inexperience that rarely totally satisfy. Art was from the inimitable Steve Ditko, who also handled the superb Blue Beetle back-up strip in 83-86. Nightshade had her own strip drawn by Jim Aparo in 87-89. A story remaining unpublished as the title was cancelled was eventually printed in the 1970s *Charlton Bullseye* 1 and 2.~SW

CAPTAIN ATOM

DC: *57 issues, 2 Annuals 1987-1991*

DC's modified version of Captain Atom was incorporated squarely within the mainstream of their universe, and was the longest running of their Charlton acquisitions. Long presumed dead after a nuclear explosion in 1968, Captain Nathaniel Adam re-emerges eighteen years later complete with incredible abilities. Covertly working for air force intelligence (under duress), he's heavily promoted to the public with a fabricated past, incorporating aspects of the Charlton series. Writer Cary Bates (1-50, with Greg Weisman co-plotting from 10 and gradually assuming the major portion of the work) weaves decent character driven plots. In General Wade Eiling he creates an appalling specimen of military pigheadedness who can justify every iniquitous piece of behaviour under the blanket of national security. The series as a whole is a decent superhero run, without ever having the essential extra spark. Representative early samples are 9 as Captain Atom investigates his framing for treason in 1968 and 14's Christmas story (followed up in 29), neither with a super-villain in sight. Adam's past is a constant background to the series. 26-28 reveal the secrets of the treason conspiracy, incorporating a fine ending, but repercussions and affiliated events provide plot devices that outlive their welcome.

Other supporting characters flow in and out of the series. Most prominent is Major Force, introduced in 12 and the first annual. He's the gung-ho result of an attempt to duplicate Captain Atom's creation, and he becomes an uncontrollable mirror image. Also present almost throughout are Adam's children from the 1960s, now adults and, in a nice twist, the step-children of Eiling, scientific genius Dr Megala, very much Dr Strangelove, and Martin Allard, an army officer who's tragically manipulated in 45. Later issues see the softening of former villain Plastique and old JLA readers may or may not welcome the return of the Red Tornado, a character whose appeal has always polarised the readership.

Fans of the 1990s *Sandman* cast might want to pick up 42 for Death's appearance, but it's hardly an engrossing read.

Artistically the series has few highlights, but remains adequate throughout. Pat Broderick and Bob Smith handle most of 1-28, and Rafael Kayanan and Romeo Tanghal are a marginal improvement to 51. Tanghal continues to ink Michael Adams, who'd been contributing fill-in issues, until the series ends. Post 50 Captain Atom sees a succession of writers on the way to his destiny in the Armageddon series and later Extreme Justice. He was to have been the villain of the former piece, but early leaks to the fan press forced a change of plan. By default the best issue of the run is a fill-in, 51's story by Kelly Puckett, Colleen Doran and Terry Austin depicting how Captain Atom's action in 50 inspires someone else.~FP

CAPTAIN CANUCK

CKR Productions: *14 issues, 1 Special 1975-1977 (1-3), 1979-1981 (4-14)*
Semple: *3 issues (0-2) ('Reborn') 1993-1994*

As the title suggests, Captain Canuck was conceived as a rejoinder to the nationalism of the major US superhero publishers. Fiercely Canadian in outlook, the series was innovative and even eccentric in the hands of writer and original artist, Richard Comely. Set in a then future 1990s, Captain Canuck is Tom Evans accidental recipient of super powers during an alien abduction. After initially fighting spies, terrorists and drug barons, there is a showdown (11-13) with the unnamed aliens who plan to use Earth as a breeding ground for a controllable race of warriors. During this story the Captain does some time travelling, leading to his being stranded in 1980 in the final issue, written solely by George Freeman. For 'Reborn', Comely starts with a new character, Darren Oak, inspired by *Captain Canuck* comics to put on a similar costume in hopes of protecting his identity while he tries to expose a political conspiracy against the Canadian government.

There are decent ideas here that could have supported a few more issues, but the quality of the artwork, by Comely himself, doesn't match the scripting. The highlight of this series is the attractive artwork of Freeman (reminiscent of Joe Staton as inked by P. Craig Russell) who began inking 3 before pencilling 4 and becoming regular artist from 7. In addition to the lead story, most issues contain backup strips: 'Jonn' (science fiction in 1-3, 7, 8), 'Catman' (superhero in 4, 6), 'Chaos Corps' (parody in 5) and 'Beyond' (sword and sorcery in 9-12, 14). The latter, written by Comely and drawn by Jean-Claude St. Aubin, is the most accomplished. For completists Gene Day and Dave Sim produce the 'Beavers' strip in 4.~NF

CAPTAIN CARROT and his Amazing Zoo Crew

DC: *20 issues 1982-1983*

The Zoo Crew was a funny animal superteam written by Roy Thomas, with excellent cartooning from Scott Shaw. Led by a rabbit powered up from eating a radioactive carrot, and returning old DC funny animal character Peter Porkchops in the guise of Pig Iron, it's amusing in places, though Thomas concentrates too much on lampooning contemporary comics and films for this to have much to offer readers in the 1990s. Those wanting a complete collection shouldn't miss the début in *New Teen Titans* 16, or Changeling from the Titans dropping by in 20 to close the series out. Captain Carrot and friends later returned for the surreal *Oz-Wonderland War*.~FP

CAPTAIN CONFEDERACY

Steeldragon: *12 issues 1986-1987*
Marvel/Epic: *4 issue miniseries 1991-1992*

With the first twelve self-published issues writer Will Shetterley set up a carefully crafted alternate universe in which the Confederacy seceded and the USA never came to pass. Although one of the changes he envisions is that the South would have more readily renounced slavery of their own choice, the Confederate States of America is a nation where the races are far from equal.

Jeremy Gray, a superserum-enhanced WASP actor of little talent and intellect to match, is Captain Confederacy, the star of propaganda films presented to the public as reality in which he fights Blacksnake, a black villain. According to his superiors this sets a good example as the Captain is a role model for whites while it teaches black kids that crime doesn't pay. When the black actors question their roles the authorities kill them. The remainder of the series presents a complex and engaging political plot as Gray becomes a valuable pawn to all parties, and has to make his own decisions about whether to keep quiet, go public or fight the system from the inside. By the end of the series Gray's wife Kate has taken over the mantle.

Unfortunately the miniseries forgoes much of the politics in favour of a more colourful, but less intelligent international superhero conference, with the world's powers plotting how best to manipulate the North American nations. Although more polished, the Epic issues lack the edge of the originals, and are noteworthy mainly for Kate spending the entire run eight months pregnant. Like the original run, the series has long and engaging letters pages in which fans swap their ideas of what an alternate world should be like, and detailed biographies of Confederate alternate-world characters.~JC

CAPTAIN DINGLEBERRY

Underhanded Comics: *4 issues 1998*
Slave Labor: *2 issues (5-6) 1999*

Whatever else you might say about *Captain Dingleberry* – namely, that it's an awesomely unfunny superhero parody which outstays its welcome by at least 5 issues – it at least lives up (or down) to the spirit of its toilet gag title. Artist and co-writer Rick Remender obviously thinks that an endless succession of puns on the word 'anus', and characters with names like 'The Four Cornsmen of the Apocashits', are the very height of good humour. He forgets, however, that if you wallow in shit for long enough it does tend to stick.~AL

CAPTAIN ELECTRON

BCSI: *1 issue 1986*

A distinct oddity that has 1940s/1950s artist Jay Disbrow lured out of retirement to extol the virtues of computer technology. The publication date indicates the level of said technology, so Disbrow's art isn't the only archaic factor. A brief explanatory strip charts the progress of computers, then Captain Electron has to rescue the director of The Brick Science Institute, who published this, from a gang of villains who plan to use his expertise for their own evil ends! It's all very silly apart from the chilling human computer Disbrow's created: a face on the screen, arms extending from it, legs beneath it, and with bow tie, top hat and cane as accoutrements. It probably scared a generation away from computers.~FP

CAPTAIN GRAVITY

Penny-Farthing Press: *4 issue miniseries 1998-1999, one-shot ('One True Hero') 1999*

The miniseries is basically an Indiana Jones story with Indy replaced by costumed adventurer Captain Gravity as a Hollywood film crew in South America cross paths with Nazis in search of a mystical secret. The one-shot sees the costumed character owned by a rival film studio turn up in misguided fashion. In the manner of the films it emulates, *Captain Gravity* is an enjoyable well produced romp, but no more.~WJ

CAPTAIN HARLOCK

Eternity: *13 issues 1989-1990, 6 issue miniseries ('Deathshadow Rising') 1991, 4 issue miniseries ('Fall of the Empire') 1992, One-shot ('Christmas Special') 1992, 4 issue miniseries ('The Machine People') 1993*

Captain Harlock is an American interpretation of Leiji Matsumoto's classic anime hero. Harlock is an ex-starship commander who refuses to lay down his arms when Earth surrenders to an alien invasion fleet. The first series concerns Harlock's past associations and current attempts to liberate

Earth from the Illumidas occupation force, and re-instil a sense of worth in the physically and spiritually defeated human population. Although working under licence from the Japanese creators, writer Robert Gibson and artist Ben Dunn are not successful in attempting to retrofit the concept for the more action-oriented US market, but it maintains the flavour of sentimentality and the philosophy of the original creation. A major theme resonating through the entirety of the canon is that as long as the Tree of Freedom has strong roots, no matter how far they spread, liberty will bloom again. The supporting cast includes Emeraldas the pirate Queen, who becomes embroiled in the war against the Illumidas, Baron Darghund, Harlock's boyhood friend and rival, and Alexander Nevich, finishing construction of the Deathshadow, a ship that will obliterate Harlock's Arcadia. Both the latter are collaborating with the invaders, but have their own agendas.

Gibson and new artist Tim Eldred then produced, in rapid-fire succession, a better than average run of good old-fashioned space opera stories beginning with 'Deathshadow Rising'. It's particularly disturbing for its portrayal of father-son relationships as Nevich's five year old son is bullied and groomed for his future role as King of Earth. The Christmas Special is a fairly standard seasonal aside, whilst in 'Fall of the Empire' the Illumidas are driven from Earth, but at great and unsuspected cost. In The Machine People cyborgs from Earth's unconquered colonies insinuate themselves into Earth's Reconstruction government, with bloody consequences. The series end rather abruptly as the Japanese owners, despite the successful sales, chose to withdraw the licence, which is a pity as competent work was starting to lift Harlock from the mire of US manga knock-offs. Devotees should see also the *Emeraldas The Pirate Queen* miniseries.~WW

Jughead as CAPTAIN HERO

Archie: *7 issues 1966-1967*

At the same time as they were producing their cluelessly camp superheroes for the Mighty Comics imprint, the company creators were turning out the same kind of story for this and Archie's *Pureheart* title. The result is hardly stunning, but as Jughead material is intended as comedy the approach works a little better.~WJ

The Adventures of CAPTAIN JACK

Fantagraphics: *12 issues 1986-1989, 1 Special 1991*

Mike Kazaleh attempts to marry the slapstick storylines of a Tom & Jerry cartoon with outer-space romance. Captain Jack, his crew Adam the Android and Herman Feldman (and Herman's unruly personal devil, Beelzebub), try to earn a living shipping freight from one star system to another but end up penniless after each trip. 5 introduces Herman's girlfriend Janet, and their developing relationship is the backdrop for the rest of the story. Captain Jack quickly outgrew its funny animal, science-fiction setting and showed potential to reach the emotional sophistication of *Omaha The Cat Dancer*. The A*K*Q*J special retold Herman and Janet's romance in the form of a fairy story, and the cast reappear in *Critters* 42.~NF

CAPTAIN JOHNER & THE ALIENS

Gold Key: *One-shot 1967*

Valiant: *1 issue 1995*

Created by Russ Manning as a series of four-page strips to back-up his *Magnus Robot Fighter* stories, these ran in 1-28 of that title. The Valiant issue collects the first seven episodes while the earlier Gold Key reprint omits the second and fifth chapters, but includes episodes eight, nine and ten. It matters little, as a sample is all you really need. An Earth spaceship encounters an alien vessel. Each unable to outmatch the other, it's agreed both will return home carrying fifty percent of the other's crew. Incidents along the way slow their returns. Manning's art is, as always, impeccable, while his plots are thoughtful and intelligent, presenting a generally optimistic view of the future.~FP

CAPTAIN JUSTICE

Marvel: *2 issues 1988*

The popularity of comic hero Captain Justice is fading. Luckily, blessed with extra-dimensional awareness, he realises it's due to lack of inspiration on the part of his creator, and travels to the real world to resolve the situation. Along the way he turns a lad from a life of crime and Philip Marlowe comes along to save the kid's mother from a lifetime of local-newspaper drudgery. Adapting the TV pilot *Once A Hero*, this is sentimental tosh, but deftly handled sentimental tosh can push the right buttons, and this does so.~FP

CAPTAIN MARVEL

MF Enterprises: *4 issues 1966, 2 issues (Captain Marvel Presents The Terrible 5) 1966-1967*

A little-known camp classic. The copyright on the instantly recognisable name of a once popular comics character had lapsed, so in stepped MF with a humanoid robot whose bodily parts flew in all directions when he shouted 'Split'. The series is every bit as ludicrous as the premise. Apparent success prompted a companion title *Captain Marvel Presents The Terrible 5*, which differs little from the parent (the Terrible 5 referring to the number of daft villains in the comics) and lasted two issues. Quoting the villain in one story as he returns to Earth conveys the prevailing quality far better than any review: "Wahoo! Am I happy I failed to destroy [Earth]. Now I've a place to rest, even though I can't see too well inside the Earth's atmosphere without my glasses." Quite.~FP

CAPTAIN MARVEL

Marvel: *62 issues, 1 Giant-Size 1968-1979, Graphic Novel 1982, 3 issue miniseries ('Untold Legend of Captain Marvel') 1997*

Captain Marvel's first two appearances in *Marvel Super-Heroes* 12-13 swiftly led to his own title. Early issues saw this Kree alien-with-a-conscience concoct unconvincing ruses to disobey his superiors' orders to perform lethal experiments on us earthlings. A better-designed red and blue costume was introduced in 17, and writer Roy Thomas couldn't resist a homage to the original 1940s Captain Marvel (see *Shazam!*) by merging his Kree successor with the company's all-purpose teenager Rick Jones. Henceforth the Kree Captain Mar-Vell hung about in limbo until summoned by Jones clashing his 'Nega-bands' together. After two brief cancellations, a shaky restart was swept aside by the glorious 'Thanos War' in 25-33*, all plotted and drawn by Jim Starlin. This run defined 'cosmic' and displayed considerably more mood and awe than his later regurgitations of the same concept. It was later reprinted as a series called *The Life of Captain Marvel*. Steve Englehart and Al Milgrom maintained a high standard in succeeding issues. Notably, 36-39 portrayed the Watcher's trial by his own race for interference in affairs on Earth and the oft-times hallucinogenic 41-46 revealed the Kree Supreme Intelligence's long-dormant scheme against our planet. This latter story-line explained some of the inconsistencies and contradictions of earlier issues. A new direction spluttered from 47 until Doug Moench and Pat Broderick provided a pickup with their Titan plot-lines in 58-62. This story concluded in Marvel Spotlight (second series) 1 and 2.

After sporadic guest appearances following his *Marvel Spotlight* run, Jim Starlin finally closed the book on the Kree warrior's adventures in the first Marvel graphic novel, *The Death of Captain Marvel*. There is no death at the hands of some arch-enemy for Mar-Vell. He succumbs to cancer caused by the toxic nerve gas to which he was exposed in 34. There are no battles of any consequence in this book, aside from the efforts to cure his affliction. The serenity of his passing conveys a staggering emotional impact as the story deftly treads the fine line between the trivial and the over-dramatised. Expressive pencils and inks by Starlin at his peak contribute to one of the finest superhero comics ever produced.

More 1990s retro-fitting surfaces in the miniseries with a tale set immediately prior to Mar-Vell's first mission on

Earth. No holds are barred as the Skrulls, Shi'ar and Brood all wade in and supporting characters from the first eighteen issues of the regular title feature prominently. Although not outstanding, the story refreshingly complements rather than tinkers with ancient history.~APS
Recommended: 25-33, Graphic Novel

CAPTAIN MARVEL

Marvel: *One-shot 1989, one-shot ('Speaking Without Concern') 1994*

These star Monica Rambeau, the second Captain Marvel at Marvel. She was popular during her tenure in *The Avengers*, and potentially one of Marvel's most powerful characters, possessing the ability to transform into any form of energy, limited only by her understanding and imagination. Needless to say, the House of Sexist Ideas couldn't handle that. The first inept, barely articulate one-shot was seemingly created solely to reduce and downgrade her powers to a more manageable level. Bet they don't do that to the Silver Surfer. The second one-shot has the black Captain Marvel speaking out about prejudice in a heavy-handed but well-intentioned story. Unfortunately one of Marvel's more likeable creations has been shoved aside in favour of Captain Mar-Vell Jnr. Sigh.~HS

CAPTAIN MARVEL

Marvel: *6 issue miniseries 1995-1996, series one 35 issues 2000-2002, series two 2 issues + 2002 to date*

The miniseries revealed the Kree version of Captain Marvel had fathered a son, Genis, now a cosmic powered teenager. He stomps about the universe alternately mouthing off or wringing his hands in despair. Of course, he was tricked into activating a bomb that killed 2000 people. In 4 he deals with the manipulator (and guess what, it's the son of his father's greatest enemy!), and matters improve, but it's too late. Some might suggest the trademark on the title was up for renewal, and God forbid it should return to DC and the first and most famous character to bear the name.

The ongoing series stars a reworking of the character spun off from *Avengers Forever*, where he merged with Rick Jones in the manner of his father. It possesses the considerable twin benefits of slick dialogue from Peter David and slick pencilling from Chriscross. David treats the title as ensemble piece, populating it with assorted characters who play well off the leads: the arrogant Moondragon, the retarded Destroyer, Jones' ex-wife the glamourous Marla and the ghost that haunts her, and numerous guest stars besides. It eventually reaches the point where you start to forget whose name is on the cover. Unless you really care, though, this entertains, with David injecting more humour than is customary for a Marvel superhero comic. Try 20 in which Genis has a revelation, a prematurely aged Rick Jones is miserable, Moondragon is her charmless best and there's a good joke about comic fans at the end. Not aimed at you, naturally.

Fans of the 1970s *Captain Marvel* should look out for 11, 17 and 18 for the art team of Jim Starlin and Al Milgrom, with David including characters associated with the Starlin titles of the 1970s, another of whom turns up in 33. The assorted elements combine most successfully in 27-30, largely set in 2099, and featuring characters from two other series David has written. An attempt to boost sales saw the title cancelled and relaunched with considerable publicity. This time it concentrates on Captain Marvel, who begins to understand the curse of cosmic awareness, with harsh personal consequences leading him to seek out The Punisher in 2 to learn discipline. To mark the occasion Chriscross' pencils are painted by Chris Sotomayor for a more polished look.~WJ

CAPTAIN MARVEL Adventures

Fawcett: *150 issues 1941-1953*

Orphaned newsboy Billy Batson, peddling papers one evening, is approached by a shadowy figure who lures him down an abandoned subway tunnel to a mysterious underground chamber, where, amongst statues representing the Seven Deadly Sins, the enigmatic man reveals himself as the ancient wizard Shazam. In search of a champion pure in heart, he has selected Billy Batson to receive great powers, and fight for justice in the world. All Billy has to do is speak his name. With that one magic word, 'Shazam!' Billy magically transforms into Captain Marvel, a mighty red & gold clad figure with the powers of Solomon, Hercules, Atlas, Zeus, Achilles and Mercury, and a heroic legend began.

Beginning as the lead feature in *Whiz Comics* during 1940, Captain Marvel single-handedly turned around Fawcett's fortunes, despite a protracted lawsuit from DC, who claimed that he was a direct imitation of Superman. Although certainly inspired by Superman – which super-heroes weren't? – the Captain's adventures took place on a different plane from the grim, confrontational style favoured by the Man of Steel. The first issue of Cap's own series was drawn by the legendary Jack Kirby, but the open, benign art style of C.C. Beck, co-creator and primary artist on the series, invited the readers into adventures in which the early-teens Billy Batson, not his superpowered alter ego, was the protagonist. The Captain himself was used sparingly, and thus to greater effect.

Each issue carried featured at least three stories (four or more being the standard up until 1945) with a diversity of theme. Cap would battle Nazis, fight his arch-nemesis Dr. Sivana, discover a ghost, build a robot, etc. with a carefully calculated mixture of levels of appeal. This range ensured a broad-based popularity, from little kids to young adults, which prompts one to think that the claimed circulation figures of 1,000,000+ copies per issue during the peak years weren't just hyperbole. Unlike the aloof and unapproachable early Superman, Captain Marvel was the Everyman of the comics world, capable, despite his vast powers and wisdom, of being hoodwinked because of his trusting nature and good-willed naivete. Stories frequently focussed on his friends and supporting cast at Mrs. Wagner's boarding house, creating a Rockwellesque picture of America that is unashamedly sentimental, but quite charming. Captain Marvel was as frequently seen in mundane or even embarrassing situations on the comic's covers as he was in the traditional heroic poses. Driving a buggy, filling out paperwork, or acting as a dog catcher gave greater identification to the young reader, intriguing them and inviting them to pick up the issue. A cunning ploy on the part of the publishers was to send Cap to real-life towns on a mission. By bannering the locale and including actual local personalities in the story, they could be guaranteed great publicity and a big sales spike.

Although generally regarded as a lightweight series compared to *Superman*, the Captain certainly had his grimmer, heroic side, brought forward in the Monster Society of Evil storyline, a protracted serial in issues 22-46*, gathering some of his vilest villains together in a mammoth conspiracy to conquer the world. This serial introduced Mr. Mind, possibly Cap's greatest enemy, who was... a worm. Not even a giant worm, mind you. But Mr. Mind's formidable and Machiavellian intellect was nearly the undoing of the World's Mightiest Mortal on several occasions. In 18, a third member of the Marvel Family (Captain Marvel Jr. had already been introduced in *Master Comics*) made her debut. Mary Batson Bromfield, Cap's long-lost sister, was discovered, kidnapped, rescued, and revealed to possess the power of a pantheon of goddesses herself, all in the space of 13 pages! Mary also appeared in 19 before spinning off into a lead position in *Wow Comics*, and, eventually, her own series.

Although Fawcett eventually won the lawsuit initiated by DC, the protracted, decade-long struggle, and the diminishing readership in the face of the 'Comics cause juvenile delinquency' movement, caused them to cease publishing in 1953. And what menace did the Big Red Cheese, as he was affectionately nicknamed, face in his final issue? No, it wasn't Mr. Mind, Dr. Sivana, or the Monster Society of Evil that did him in. On the cover of the final issue, our hero faced the ultimate horror: 'Captain Marvel's Wedding!'

---

* Available in a collected edition

After his demise, Cap remained a fondly remembered legend amongst comics fans, often talked about, but a revival generally being regarded as impossible. However, in 1972, DC announced the publication of *Shazam!* (Marvel having inconveniently shoplifted the 'Captain Marvel' name in 1968), and he, Mary and Junior have, for better or worse, been firmly established in the DC heroic pantheon ever since. ~HS

Recommended: 18, 19, 22-46, 84, 105, 133, 150

CAPTAIN NICE

Gold Key: *1 issue 1967*

Alleged superhero parody based on the short-run TV show. The worst of four uncredited stories features a villain called The Rooster, cursed with a compulsion to crow about his crimes as the sun rose, and captured when a spotlight is shone on him in darkness.~FP

CAPTAIN OBLIVION

Harrier: *1 issue 1987*

Odd mixture of hokey old science fiction (giant ants in the moon) and a superhero with a waning relationship. All very enjoyable if you're not expecting straight superhero action from Glenn Dakin. Captain Oblivion, or at least Abe Rat, his civilian counterpart, was also a regular in *Gag*.~WJ

CAPTAIN PARAGON

AC: *4 issues 1983-1984*

CAPTAIN RESCUE

Pigeon Press: *One-shot 1993*

Extremely attractive cartoony art, strongly reminiscent of *'Mazing Man*, doesn't stop these would-be charming stories of a vigilante crimestopper being banal and pedestrian. Sorry. These are the further adventures of a character introduced in another Pigeon Press one-shot, 1992's magazine sized *Rescue Comics*, which defied common sense by achieving a second printing in comic format. Nothing further has been heard of the Captain or his team of rivals, the Sudden Disaster Stoppers, and there's many a dry eye as a result.~HS

CAPTAIN SATAN

Millennium: *2 issue microseries 1994*

This very ordinary Punisher clone won't count among the highlights of Steven Seagle's writing career. He's first framed for a crime he didn't commit, then transformed into gruesome avenger who brands his prey. Don't bother.~FP

CAPTAIN SAVAGE & HIS LEATHERNECK RAIDERS

Marvel: *19 issues 1968-1971*

Captain Simon Savage commands a unit of U.S. Marines (Yakkety Yates, Frenchy LaRoque, Jay Little Bear, Lee Baker and Blarney Stone) on missions and manouevres that are interchangeable with those of Sgt Fury, whose success this was an attempt at repeating. The wartime origins of H.Y.D.R.A., the evil spy network featured in Marvel's present-day S.H.I.E.L.D. strip, are revealed in 2-4, while Ben Grimm, later of The Fantastic Four features as a wartime airman in 7, guaranteed to make any continuity buff want to sweep it under the carpet! The perjorative "Leatherneck" in the title is replaced with 'Battlefield' from 9 onwards, just in time for Savage to shave off his distinctive beard. The death of Pvt Baker in 11 confirms further efforts to make the contents resemble *Sgt Fury*. The main penciller is Dick Ayers before 13-16 benefit from a brief stay by scripter Arnold Drake and penciller Don Heck, including a rare teaming with inker John Severin in 16. 1-8 and 13-15 effect a grimy consistency due to Syd Shores' finishes before *Fury* inker Severin is installed. Archie Goodwin's writing on 7 and Drake's issues are eminently readable whilst Gary Friedrich's scripts remain pedestrian at best throughout although many plot elements, including Savage's wife leaving him in 18, are impressive.~SW

Bernie Wrightson's CAPTAIN STERNN Running Out of Time

Kitchen Sink: *5 issue miniseries 1993-1994*

Captain Sternn is Wrightson's large, square-jawed rogue, and the series begins with him escaping from jail for crimes committed when last seen in *Heavy Metal*. He's soon back on the track of a vast amount of money he stole from Fillmore Coffers, head of Cosmic Coola Industries. It's been taken back into pre-history by his partner Hanover Fist, conveniently able to transform into a giant brute of a man to deal with the indigenous saurian life. Back in the present, or Sternn's future, to be precise, the population are gradually transforming into shambling zombies for some reason. Wrightson's reputation is as a fine illustrator of horror material, but this denies an obvious talent for comedy. While not as detailed or shadowy as his more familiar style, this appears to be one of the few projects he's cared about since the 1970s. He deftly manipulates his comedic cast, provides plenty of twists to his plot, and throws in some excellent jokes. All in all very satisfactory.~WJ

Recommended: 1-5

CAPTAIN STORM

"Skipper, your leg's being blasted", cries out one of the marines on the cover of the first issue. "It's only wood", replies the title's namesake; "I'll get another". Real teeth-clenched action characterises Captain Storm, a PT-boat skipper with a wooden leg! Average war stories, based in the Pacific fighting the Japanese. Captain Storm eventually turned up with The Losers (in *Our Fighting Forces*), once the rot set in and his title was cancelled.~HY

CAPTAIN THUNDER and BLUE BOLT

Hero: *10 issues 1987-1988*

The eponymous Captain and his son perform heroic deeds with an electrical bias. One of the few Hero titles that didn't strongly emphasise the tits-and-ass angle, having no recurring female characters, and consequently one of the shortest-lived of that line. After all, nobody bought Hero books for the story.~HS

CAPTAIN VICTORY and the Galactic Rangers

Pacific: *14 issues 1981-1984*

Written and pencilled by Jack Kirby. They patrol the galaxy, saving us from the Insectons and Paranex the Fighting Fetus, and uttering lines such as "He's reacting to monumental surges of anti-death!" and "Finarkin kills with a devious brain!!" Utterly stupid and a barrel of laughs, but sampling an issue or two at random is probably quite enough for most of us. That is unless you're a Kirby completist, since later issues drop hints as to how Kirby would have concluded New Gods had he been allowed to let it run a natural course.~FC

CAR WARRIORS

Marvel/Epic: *4 issue miniseries 1991*

Adapting a role-playing game to comics was never likely to stimulate the creative juices, and the resulting mess merges *Wacky Races* with *Mad Max*. Scripting by Chuck Dixon on autopilot is only occasionally redeemed by the unusual art team of Steve Dillon and Phil Winslade.~FP

CARAVAN KIDD

Dark Horse: *Series one 10 issues 1992-1993*, series two 10 issues 1993-1994*, series three 8 issues 1994**

Science-fiction comedy epic from Johji Manabe, translated from the Japanese by Dana Lewis and Toren Smith. Mian Toris has a mission to single-handedly destroy the expansionist ambitions of the Helgebard Empire. She is accompanied by two black marketeers, the dim but lovable Wataru and the venal Babo. Babo is of the Akogi race, whose only interest is profit. Wataru provides the romantic interest for Mian though they spend most of the series fighting each other as well as the Empire. However, nothing is what it seems in Manabe's clever script, which pulls the rug out from under the reader with each new revelation about Mian's origins and the history of the 'Empire' against which she's supposed to be rebelling. Manabe's artwork is extremely well-paced, particularly suited to telling a story combining humour with adventure, but it's the twists and turns of plot and character that will keep you reading the series.~NF

CARDCAPTOR SAKURA

Tokyopop: *30 issues 1998-2002**

Cute little Sakura Kinomoto finds a magic book in her father's library. It's a kind of Infernal Stickerbook, empty of course, and a demon imprisoned in the book reveals to her that unless all the cards are returned to the book they will come to life and wreak havoc. Kerberos, the Demon of the Seal makes the little girl a Cardcaptor and together they, and her school chums set about a series of woefully predictable adventures. Tedious and insipid cash-in on the Pokemon phenomenon aimed at the shojo, or young girl market, from a studio wisely using the pseudonym 'Clamp'. There's an ongoing series of collections as well.~WW

CAREER GIRL ROMANCES

Charlton: *55 issues (24-78) 1964-1973*

Previously the much missed *Three Nurses*, hence the numbering, this was a typical Charlton romance title except that, surprise surprise, our heroines all had jobs (as air hostesses or models usually). As a rule those picking up 1960s issues are likely to be confronted by vast quantities of Vince Colletta artwork, while the 1970s issues are largely drawn by Charle Nicholas and Vince Alascia, the bywords in comics for bland and uninteresting, or South Americans. The anonymous, though probably by Jack Gill, stories are by and large poor, although there's much fun to be had with the odd period piece like 'Nobody Loves A Go-Go Girl' (in 35, almost worth getting for its gorgeous Dick Giordano cover alone). Art enthusiasts should try for 71, which features an early appearance by José Luis Garcia-Lopez that is absolutely lovely.~DAR

Where In The World Is CARMEN SANDIEGO?

DC: *5 issues 1996-1997*

Carmen Sandiego is the master criminal in a computer game, where the object is to trap her. The same scenario is transferred to comics with a games champion being brought in to do the job. Aimed squarely at the younger end of the market with appealing cartoony artwork, and wacky scripts echoing the game, it entertains and informs.~WJ

CARNAGE

Marvel: *One-shot ('Mind Bomb') 1996, one-shot ('It's A Wonderful Life') 1996*

There's a decent, if unpleasant, story in 'Mind Bomb', with writer Warren Ellis taking a pointed jibe at the slim nature of previous Carnage appearances. Safely jailed, Carnage is visited by a ghastly egocentric psychiatrist for a revelations session. Kyle Hotz conveys the claustrophobic and gloomy surroundings of the containment facility excellently, having obviously studied his Berni Wrightson, most likely via Kelley Jones. He's back for the dismal second one-shot. Here writer David Quinn passes off a surreal trip into Carnage's mind as a plot, keeping the punters happy with a gore overdose. It's crap.~WJ

CARNOSAUR CARNAGE

Atomeka: *One-shot 1993*

Anthology with dinosaurs as a theme. The best of a good bunch is lead strip 'Skin Of The Hadrosaurs', gorgeously painted by Kev Walker, and also worth noting is 'Gomra', in which a Godzilla-like monster has to renegotiate his film contract. Both are written by Dan Abnett, and there's also a wacky cavemen vs dinosaurs strip by Nick Abadzis and John McCrea.~FP

Larry Gonick's CARTOON HISTORY OF THE UNIVERSE

Rip-Off: *13 issues 1978-1994**

Everyone thinks it's a joke title. The cartoon history of the universe? Who would want it, and how would you go about doing it? The answer to the latter question is "Exactly like any editor would if asked to write a single-volume history of anything, even such a big topic as this, by carefully paring down facts and then working out how to present them in a clear and appealing fashion". As to who would want it: anyone with a sense of humour, of course. Underground veteran Gonick, whose approach to factual comics with a sense of humour is reminiscent of Hunt Emerson, creates a work that is inventive and informative, witty and wryly observed throughout. He's also responsible for a similar-quality one-off 380-page volume detailing *The Cartoon History of the United States*, published by Doubleday.~FJ

Recommended: 1-13

CARTOON NETWORK

DC: *Series one 24 issues (Cartoon Network Presents…), 1 Special 1997-1999, series two 18 issues (Cartoon Network Starring…) 1999-2001, series three (Cartoon Cartoons) 14 issues 2001-2002*

DC's anthology *Cartoon Network* publication aimed specifically at the younger end of the comics market and possibly due to its permanently changing cast list, it fails to live up to the quality of its companion titles. Usually consisting of a lead story and a short backup, there is little room to develop a storyline and the gags are simplistic even for kids. Older readers may find themselves nostalgic with the appearances of Space Ghost, The Herculoids and Birdman, and there are always the staid kiddie favourites such as Top Cat and Yogi Bear. The on screen energy and brash vitality of contemporary successes such as Cow and Chicken, Dial M for Monkey or Dexter's Laboratory are tellingly missed in the comic versions. The Special is a promotional giveaway reprinting one story from *The Flintstones and the Jetsons, Scooby Doo* and this comic.

The retooled anthology started with the Powerpuff Girls, who immediately graduated to their own title, before settling again into a round-robin routine, concentrating this time on short tales featuring the newer characters then winning audience share on the airwaves. Johnny Bravo debuted in 2, reappearing in 8, 11, 14 and 17 with Space Ghost Coast-to-Coast in 12, 15, and 18. Other issues include starring appearances for other contemporary headliners such as Cow and Chicken and IM Weasel, but parents will find their own childhood faves conspicuously absent this time. There's also a notable drop in story quality that feels suspiciously like dumbing down. Generally disappointing apart from the first issue.

Cartoon Cartoons continues the anthology format of showcasing contemporary Warner Brothers TV shows, but now with three or more stars per issue in complete stories. The line-up includes Ed, Edd 'n' Eddy, IM Weasel, Johnny Bravo, Courage the Cowardly Dog, Sheep in the Big City and Cow and Chicken, but the tales seem muddled and are poorly executed. Every third issue is a feature length Space Ghost Coast-to-Coast special and the most recent, in 13, almost makes up for the previous weak showing with its sprightly story of the Cosmic Phantom's lucky penny. 14 premiers Grim & Evil and Evil Con Carne, and also features a preview section for Kids Next Door, a Cartoon Network Show that hadn't screened yet at the time of publication, surely a healthy indication that TV producers still consider comics a valuable part of their overall output and not simply a slowly dying weak sister. Sadly though in all other aspects this comic series is pretty impenetrable to anybody over seven years old.~WW

THE CARTOONIST

Dog Star Press: *1 issue 1997*

This collects cartoons very gently ridiculing comics characters of the mid to late 1980s, and originally appeared in fan magazine *Amazing Heroes*. Time and lack of relevance has diminished the little charm they had, and Teri Wood produced better work elsewhere.~WJ

CARVERS

Image/Flypaper Press: *2 issues 1998-1999*

Pleasant drivel about bitchy champion snowboarders disappearing through a dimensional portal in the mountains leading to more mountains where they must battle invasion-bent Yetis. It's chiefly notable for scripter Robert Loren Fleming's startling and unprecedentedly heavy use of the words "wank", "wanker" and, a new one on me, "wankzilla".~GK

CASANOVA

Aircel: *10 issues 1991*

Translated from the French, artist Ricard produces a perfunctory re-telling of Casanova's alleged exploits, concentrating on his sexual encounters. The original forty-six page stories are split over two issues apiece. It's nicely drawn, but there's no substance. Each issue comes under an extra cover bearing the message "censored for display purposes", possibly to suggest more than the relatively tame content, or possibly to permit Aircel to get away with only changing the cover beneath every second issue.~FP

CASEY JONES

Mirage: *2 issue microseries 1994*

The street vigilante from the *Teenage Mutant Ninja Turtles* is given a solo outing to encounter some lobstermen from Neptune, who, oddly seem very Charles Burns designed. Kevin Eastman (plot and inks) and Rick Veitch (script and pencils) have some fun producing a B-movie in comics, but there's nothing of consequence. A widely advertised Casey Jones and Raphael miniseries was never published as such, being reworked into *Body Count*.~FP

THE CASTAWAYS

Absence of Ink: *One-shot 2002*

It's always a joy to discover a comic from previously unknown creators carrying through a unique vision. Set in the 1920s, Tucker Freeman's family move into their father's sister's home when his father doesn't return from one of his trips. A harsh woman, she ejects Tucker aged 13, claiming she can no longer afford to feed him, and Tucker is fortunate to hook up with kindly hobo Elijah. Rob Vollmar's story about coming of age has more than a few similarities with *Kings in Disguise*, but offers a greater warmth and faith in basic human decency as it draws on the memories of his family. Artist Pablo G. Callejo isn't yet the finished article, having a few problems with proportion and perspective, but his style and storytelling are already very accomplished. The choice of illustrating in greytones with grey pages and word balloons adds to a well-created atmosphere. Anyone interested in a good story well told should look this out.~WJ

CASTLE WAITING

Olio: *7 issues 1997-1999*
Cartoon Books: *4 issues (Vol.2 1-4) 2000-2001*
Olio: *4 issues + (12-15) 2002 to date*

On a dark night, Lady Jain flees her home and wanders in search of the legendary refuge, Castle Waiting, where she encounters a variety of sprites, goblins, and figures from nursery rhymes and folklore. There, among these strange friends, she gives birth to her child (the father of whom was the victim of an evil spell) and discovers a sense of family and community that she believed lost to her. Linda Medley, artist and writer, has invested *Castle Waiting* with a warmth and humour rare in contemporary comics. Despite the fantasy characters, there are no quests in evidence other than Jain's quest for sanctuary, handily resolved by the second issue. Neither are there sword fighting, nor sorcery, and there's a blessed dearth of mighty-thewed warriors and brass-bra'd bimbos. Okay, there's one mighty-thewed warrior, but he has a horse's head and doesn't sport a loincloth, so we'll let him live. The art is meticulously detailed and fascinating, with acknowledged influences including Arthur Rackham and Heath Robinson, but more than a suspicion of Roger Langridge in there as well. A slow building saga, it may take a few issues of *Castle Waiting* for the average reader to get into the series, but it rewards persistence. After 7, the series was suspended, but an unnumbered "hiatus" issue of sketches and character notes was pushed out in the interval. At the behest of a new publisher, the series was relaunched with a new first issue and a new storyline, as Jain is told by Sister Peace about her younger days in the Sisters of St. Wilgeforte, the order of bearded nuns. After four issues, however, Medley resumed self-publishing and reverted to the original numbering (so just view the Cartoon Books issues as the 'real' 8-11) and brought the account back to the present, continuing her interrupted laconic, delightful narrative.~HS

CASUAL HEROES

Image: *1 issue 1996*

Intended to be the first of a continued series, only one issue of *Casual Heroes* saw the light of day. Behind a beautiful Steve Rude cover, the comic, about a group of slightly off beat hedonistic young superheroes, has a naïve charm, looking more like a glossy colour fanzine than an Image comic. Writer/artist Kevin McCarthy has an unpolished skill which, while far from being mainstream professional, promises much for the future. It would be a shame if this is all we ever see.~JC

Claws of the CAT

Marvel: *4 issues 1972-1973*

Young widow Greer Nelson becomes the research assistant of Dr Tumolo, who uses her knowledge to raise Greer's physical and psychic abilities to their fullest potential. Linda Fite's script combines a solid, traditional Marvel origin with simple but sound feminist ideas in a sincere attempt to put a new spin on superheroics. The first issue also had glorious Marie Severin and Wally Wood art. Unfortunately, Marvel's 1970s women's comics line wasn't given much creative support or time to prove itself, and the strip became an ordinary superhero series with the very next issue. Increasingly lame matches against Marvel villains coupled with slapdash and inappropriate art killed the comic very swiftly. Shame. One can't help but feel that Marvel had something, but pissed it away. The character mutated into Tigra the Were-Woman and forged a third-banana career in various *Avengers* titles.~HS

CAT AND MOUSE

Aircel: *18 issues 1990-1991*

A well-conceived series that established the writing skills of Roland Mann. Artist Mitch Byrd was considerably better by the end of the run, but retains a consistent look throughout, despite having a different inker on practically every issue. The story concerns a policeman who puts on a mask to become Cat, an ex-con who becomes his partner, Mouse, and a vet called Keith who happens to be a dog-like demon. Fortunately there's not much by the way of supernatural happenings (apart from a sub-plot about an evil cult); instead the plot centres on the gangland battle for control of the city between the Yakuza and the Mafia. While Cat and Mouse struggle to clear themselves of a murder charge the Yakuza send their own costumed fighters to kill policemen who're on the Mafia payroll. A sub-plot featuring the romance between Mouse and Keith rounds out a decent adventure thriller. 1-4 are collected.~NF

CAT CLAW

Eternity: *9 issues 1990-1991*

Translated from the Serbo-Croat, Bane Kerac's sexy superheroine fights monsters, mad scientists and supervillains with names like The Caterminator. The series is mostly played for laughs, with lots of knowing references to other strips and movies. Cat Claw usually manages to lose what is already a very skimpy costume in the course of each adventure. Very much an 'adult', European take on superheroes, similar to *XXX-Women*, *Cat Claw* is undemanding fun if not exactly politically correct.~NF

CATALAN Graphic Novels

Catalan Communications specialised in translating European graphic novels, primarily from France and Italy, for the American market and as such their list revolved around the work of several accessible illustrators like Milo Manara, Vittorio Giardino and Enki Bilal, and around lighthearted erotica. When Catalan ceased trading in 1993 NBM picked up many of their sex titles and a handful of other books, and more are now returning to print via Humanoids. Anything that ran to three or more books is dealt with in a separate entry.

Generally the work reprinted wasn't particularly challenging, although a number of individual volumes are intellectually stimulating. *The Magician's Wife* (1988), by American crime writer Jerome Charyn and French artist François Boucq, is a complex fabulation about the obsessive relationship between a young girl and her ageing mother's lover, a magician, who is the eldest son in the creepy, fantasy-filled house where her mother works as a maid. They run away and gradually the girl supplants her mother both as his assistant in a magic act and in his bed. *Billy Budd, KGB* (1991), by Charyn and Boucq, is about a loner who's recruited by the KGB and sent to the USA as a spy. Charyn examines the idea of belonging through Budd, who feels out of place in his native Ukraine from the start, using a film noir plot to continue the sense of alienation. Of less interest is *Pioneers of the Human Adventure* (1989), a collection of solo stories by Boucq centred around peculiar juxtapositions and out-of-place objects, where the art runs away with the story. Boucq's complex, layered style, full of shifting outlines and soft, pastel lines, is particularly suited to depicting fantastic elements in everyday settings.

Lorenzo Mattotti's *Fires* (1989) is a richly painted fable relying heavily on the art to tell the story. *Hurricane* (*Stella Norris* vol 1, 1991), by Canossa and Baldazzini, is also dominated by its striking art, reminiscent of a stiff Charles Burns. It tells the story of a group of people, all with something to hide, stranded in a small-town hotel in America by an impending hurricane. As the winds get more violent so does the mood inside, in a story reminiscent of a Douglas Sirk melodrama. Catalan published two volumes by Philippe Paringaux and Jacques de Loustal: *Love Shots*, a collection of pointed shorts, and *Hearts of Sand*, a carefully constructed examination of the dynamics of relationships that unites French Legionnaires and mysterious women in North Africa in the 1920s. Loustal illustrates with curiously flat but effective, haunting images of people who are all trying to hide something. If these appeal, you'll also like Max Cabanes' *Heartthrobs*, an award-winning series of stories about the pangs of growing up, drawn in a broad, pastel style that shows the influence of both Loustal and Prado. Fleetway's Expresso list issued this as their only UK graphic novel. Also important is the first part of François Bourgeon's *Companions of the Dusk* series set in Medieval France. *In the Spell of the Misty Forest* magic mixes with history as two children are led into a sinister forest by a faceless knight and are taken over by goblins. Bourgeon's strange fantasy is not only immaculately researched, it's beautifully drawn in the detailed but flowing style peculiar to European history comics.

Finally, some quality oddments that don't really fit in. To prove Guido Crepax draws something other than S&M and Gothic horror, *The Man From Harlem* (1987) is an aching evocation of the post-World War II jazz scene, strangely coloured as though the pages are bruised. Less successful is his *Dr Jekyll and Mr Hyde* (1988), a dull version of the Stevenson classic with extraneous dirty bits added, which do nothing to illuminate the original. Another oddity was *Joe's Bar* by Muñoz and Sampayo, which features many of the characters from their *Sinner* series. A series of connected short stories, about the regulars at a run-down New York bar, it's beautifully drawn in Muñoz' trademark heavy black style, the tales effortlessly dovetailed together by Sampayo. Also by Sampayo, this time with artist F. Solano Lopez, better known for his period erotica, is the corruption thriller *Deep City*. Lopez's art is a little heavy-handed, but looks effectively threatening. And finally in the oddments section, *Goodbye and Other Stories* by Yoshihiro Tatsuni. It's a pity it didn't sell well, as it could have popularised some of the different approaches found in Japanese comics with US audiences at a time when action/adventure Manga were only just getting a grip on the market. Goodbye is a series of gekiga ('realistic stories') about the loneliness and isolation of life in post-war Japan. They centre on troubled relationships and social pressures and visually are a far cry from the slickly-drawn, wide-eyed image we have of Japanese comics. Quite where the work of Mattioli fits into all this is anyone's guess. He draws like a Disney animator on crack, creating vicious parodies of famous cartoon characters in *Superwest* (1987).

One of Catalan's earliest graphic novels, Nazario's *Anarcoma* (1983), is an ugly but sharply observed story about a streetwise transvestite detective reprinted from *El Vibora*. The over-detailed but naïve art has a very underground feel, with packed pages that don't worry much about the conventions of storytelling. Better known for *Torpedo* (see elsewhere) Jordi Bernet and Sanchez Abuli's *Dark Tales* is a series of murderous but sexy stories. Later Catalan also published Bernet's collaboration with Trillo, *Light and Bold*, a peculiar love story between a woman conditioned to feel no pain and a huge thug who keeps accidentally hurting her. There's something not quite right about the way violence towards women is excused in the story but it's very attractively drawn by Bernet in his Bettie Page style.

Catalan achieved early success with *Click!* by Milo Manara (see separate entry), which was quickly followed by his other sexy romps such as *Butterscotch* (1987), about an invisible man who chases a young woman, *Hidden Camera* (1990), about a film crew trying to persuade women to show their pussies in public who film something they shouldn't and decide to investigate, and *Shorts* (1989), a series of light, voyeuristic meditations. Catalan also translated the first three volumes of Manara's more heavyweight series about Güiseppe Bergman and his mentor, HP. Based on Manara and his old friend Hugo Pratt, *The Great Adventure* (1988), *An Author in Search of Six Characters* (1989) and *Dies Irae* (1990) are meandering adventure stories in which symbol and reality blend. This continually plays with expectations, with characters addressing the readers and haranguing them about what should happen next. In a similar vein is *Trip To Tulum*, Manara's collaboration with Italian cinematic auteur Federico Fellini, the cement on a late friendship that began when Manara created a series of drawings based around Fellini's most famous films. Although many considered Fellini a spent creative force by this stage in his career, the collaboration is of interest.

Other Manara translations are his comedy Western, *The Paper Man* (1986), and a reprint of the *Heavy Metal* translation of *The Ape*, written by Silverio Pisu, a version of Wu Ch'en Eng's 'Monkey' legends adapted to become a political satire about Communism. There's also *The Snow Man*, written by Castelli, about an explorer who discovers a race of transcendent monks, and is probably the only Manara not to feature a naked woman of some sort, although he gets a couple of naked men in there. However, the best work by Manara that Catalan brought us was *Indian Summer*, written by Hugo Pratt, a huge, sumptuous reworking of *The Scarlet Letter*. It's a masterpiece that paints a complex portrait of the relationship between the Pilgrim Fathers and local Indians. Immaculately researched and beautifully drawn, it's only slightly marred by the translation, which, in common with that of much of Manara's oeuvre, erred on the casual side. Indian Summer is now in print from NBM.

Another impressive creator whose back catalogue Catalan raided was Enki Bilal. They published his solo series about strange, animal-headed 'gods' returning to a near-future earth and the impact their return has on everyone from governments to the individuals they choose to use as their agents (*Gods in Chaos* 1988, *The Woman Trap* 1989). Beautifully drawn and coloured in almost iridescent fashion, they are complicated and playful science fiction. Rather more challenging is the Modern Legends series that Bilal produced from Pierre Christin's scripts. Catalan published two of the four books, the urban fantasy *The Town That Didn't Exist* (1989) and *Ranks of the Black Order* (1989), an excellent examination of how people mature in the form of a mystery surrounding a phalanx of freedom fighters who, in old age, find their past is coming back to haunt them. Frank Wynne's translation of a conceptual and wordy work must be commended. A pity he didn't get his hands on the final Christin/Bilal collaboration, *The Hunting Party* (1990), although Elizabeth Bell does a dependable job. Set in 1983, it has a similar theme and structure to *Ranks*. High-ranking Communist officials are taking a hunting trip together, during which they will remember many moments, acts and betrayals that shaped not only their own lives but the history of their country. Christin mixes a taut thriller plot with a haunting sense of nostalgia. Catalan also published another Bilal collaboration, Exterminator 17, a futuristic adventure written by Jean Paul Dionnet, better known as an artist in his own right (1988). There were British editions of most Bilal volumes available from Titan Books, and they've since been reissued by Humanoids.

The other creator who proved popular with Catalan's audiences was Vittorio Giardino, who draws in a very measured style using even lines and putting in lots of detail. Again, easily accessible art and story formats characterised the earliest translations, two substantial but sophisticated detective stories set in the 1930s, *Hungarian Rhapsody* (1986) and *Orient Gateway* (1987), both featuring his calm and collected detective Max Friedman. They were followed by the harder-edged *Sam Pezzo PI* (1987), a more violent, noirish story. Then there were two volumes of erotica, the whimsical but not very horny *Little Ego* (1989), a Windsor McCay parody, and *Deadly Dalliance* (1991), a series of linked tales in which couples seeking thrills via holiday affairs often find they end up looking down the barrel of a gun. Nicely done, but again, not very sexy. More thrilling, in every sense of the word, was Alex Varenne's *Erma Jaguar* (2 vols). Varenne is one of the classiest pornographers Europe has to offer, creating clever, referential tableaux with succinct lines. Erma Jaguar has an unusually coherent story about a rapacious sexual adventuress on the road, who sucks passers-by into her highly charged world. *Black Squares On White Pieces* is more typical, a collection of stories featuring dream women in a variety of situations. Varenne's work has a distinct fifties feel about it, even going back to great femme fatale artists like Milt Caniff. Similarly referential, although much more European in look, is Daniel Torres' work. His *Rocco Vargas* series – *Triton*, 1986 (reprinting the Heavy Metal translation), *The Whisper Mystery*, 1990, and Saxon, 1991 – feature a slick interplanetary investigator up against a galaxy-wide drug network.

There's a lot of prettily drawn, mild erotica, about the best of which is Silvio Cadelo's *The Romantic Flower*. It's a piece of nonsense about a gardener who gives his pubescent daughter a mysterious seed for her birthday, which turns out to be a nymphomaniac plant from outer space. Two-tendrilled action all the way. Also by Cadelo is *Mark of the Dog*, a rather more ambitious collection of four stories about a mysterious masked man who drifts through a futuristic Paris uncovering murders, which is reminiscent of the atmosphere of early Christin and Bilal collaborations. *The Love Machine*, drawn in soft detail by Altuna to Trillo's uninspired script, is one of those erotic what-ifs: what if the 'women' in a video machine came to life? At least it's attractively drawn, which is more than you can say for *Dorm Girls*, by Galiano, Marta and Pons, a piece of fluff that has no redeeming features. Paul Gillon is a straightforward artist and storyteller working in great detailed softly pencilled, with lots of pencil hatching and rounded forms. His *Survivor* series (2 vols) concerns a pretty young woman who survives a nuclear apocalypse that had wiped out mankind by getting stuck in a cave while deep-sea diving. Making her way to Paris she finds the robotic remains of civilisation as much a hindrance as a help in finding other survivors, and that the few remaining officials who sheltered in nuclear bunkers have turned into flesh-eating zombies.

They also printed erotic work by Guido Crepax, much of it taken over by NBM when Catalan ceased trading (see NBM listing for full details). *Venus in Furs*, Crepax' adaptation of Leopold von Sacher-Masoch's groundbreaking masochistic novel about Severin, a man who becomes obsessed with the beautiful but uncaring Wanda, is easily the classiest and most interesting piece of erotica they reprinted. Crepax, unusually, adds little to the plot, drawing in a large-panelled, open way with body shapes and page layouts echoing the movement of a whip. They also finally got around to releasing his version of *Justine* (1 vol), by de Sade. Again there's little addition. In fact Crepax goes through the original text like a scythe, pruning out a lot of interesting discourse, but keeping the heart of the book's argument, as well as the plot. His by now fine-lined, scratchy style fits the mood of de Sade's satirical reflection of the moralistic novels of his day. Readers looking for sexy stuff should be warned that Crepax's *Justine* is just as unerotic as the novel it's based on. Just because it's about sex doesn't mean it's sexy. Magnus' *Specialist* series, about a hitman, didn't go down so well, and only one volume (*Full Moon in Dendera*) was published. Much more surprising, though, is Peter Pank, a punk re-working of the J.M. Barrie kids' story drawn in a highly stylised manner by Spanish cartoonist Max. The sex is rough but funny and the line work beautifully executed. Equally stylised, although reminiscent of woodcuts and Russian workers' art, is Igort's *Dulled Feelings*.

Straightforward adventure books are rare in the Catalan line-up. Ortiz and Segura's *Burton and Cyb* is the exception; a futuristic shoot-'em-up that's well drawn in a style reminiscent of a more traditional Liberatore (they published his collection of colour shorts, *Video Clips*, but it's nowhere near as exciting as *RanXerox* or its sequel). Fantasy was represented by two volumes of Frank Thorne's wide-eyed barbarienne *Ghita of Alizarr*, and by Fernando Fernandez' dire *Zora and the Hibernauts* is an over-coloured adventure with plenty of cheesy t&a and little else. And speaking of t&a, there's plenty in Richard Corben's *The Bodyssey*, yet another interplanetary romance story full of rippling muscles. Rod Kierkegaard Jr's *Shooting Stars* features stiff but accurate drawings of famous popsters (some, like Madonna, still enduring, others, like Boy George, largely forgotten). It's poor, but not as tedious as John Findley's *Tex Arcana*, or Paul Kirchner's Realms, both whimsy at its worst. Notably all of these rather dull offerings are culled from the pages of *Heavy Metal*.

Humour is equally lightly represented. Ralf Konig's *The Killer Condom*, subtitled "Just when you thought it was safe to have sex", is a madcap and rather bloody murder comedy which looks like it's been drawn by *Wicked Willy* creator Gray Joliff. Baciliero's *The Talking Head*, even more predictably, is about the (mis)adventures of a man who, to his horror, finds his dick talking back to him one day.~FJ

Recommended: *The Great Adventure, Gods in Chaos, Goodbye and Other Stories, Heartthrobs, The Hunting Party, Indian Summer, Joe's Bar, The Magician's Wife, The Man From Harlem, Peter Pank, The Ranks of the Black Order, The Spell of the Misty Forest, Super West*

CATALYST: Agents of Change

Dark Horse: *7 issues 1994-1995*

Introduced in *Comics Greatest World*, Catalyst is the band of superheroes controlled by Amazing Grace, benign autocratic ruler of Golden City. Events stemming from her decision to secede from the USA occupy 1-3, and the aftermath of *Will to Power* takes up the final two issues. 5 is giant gorilla story, leaving 4 as the best of a slightly above average bunch as Grace has to take on Titan, the most powerful member of her team. Plots continue in *Agents of Law*.~WJ

CATFIGHT

Dog Soup: *1 issue 1995*

A collection of the 'Zero Hour' strips by Patty Leidy (often seen in Action Girl) from the Atlanta, Georgia newspaper, Highpoint. The central characters are P.J. and her roommate Ant (Antoinette), two girls with not enough time and way too many obsessions. Agreeable stuff, occasionally surprisingly edgy, but the reproduction, presumably reduced from their original size, and hurried lettering make a hard read. The four page new story, in which Leidy tells of her own dealings with DC when they issued their *Zero Hour* miniseries, is the funniest item.~HS

Deity II CATSEYE

Hyperwerks: *4 issue miniseries 1999*

The supporting cast from *Deity* return sheltering II, who is one of many people searching for the catseye, the object that empowered the machinery of creation. As you'd assume, that means plenty of women with perfect globes for breasts running around with guns. Well drawn within its limitations, this is fast-moving, hollow nonsense.~FP

CATWOMAN

DC: *4 issue miniseries 1989*, series one 95 issues (0-94), 4 Annuals, 1 Graphic Novel, 2 issue microseries ('Guardian of Gotham') 1993-2001, series two 12 issues +, 1 Graphic Novel, 1 Secret Files, 2002 to date*

Mindy Newell and J.J. Birch's miniseries chronicles Catwoman's origin, a dark, bitter affair of her sister nun, her pimp and her early life as a prostitute. Her motivations for donning the cat costume are all too self-evident and the Stygian artwork complements the mood perfectly. The story intertwines shrewdly with Frank Miller's 'Batman Year One' tale in *Batman* 404-407.

Over fifty years after her first appearance, Batman's femme fatale finally earned her own ongoing series after scattered outings in her *Action Comics* (when weekly) miniseries, the *Catwoman Defiant* graphic novel and *Showcase* '93. Villains have frequently fared poorly in their own titles but Mary Jo Duffy gave Catwoman a flying start by defining her supporting characters, morals and life outside her skin. However, to load readers on board, a plague of Bat crossovers (6, 7, 12, 13) cursed the first year and sadly stunted her development. 14 is a delightful, carefree *Zero Hour* tie-in which laughs at the concept's pomposity. Chuck Dixon assumed plotting from 15 and whilst main storylines are adequate, he threw away Selina Kyle's personal life, continuing supporting cast and sub-plots, much to the title's loss. 15-19 are collected as *Catfight*. Not until 28-30 did some desperately needed character interaction finally surface. An infestation of multi-title crossovers (26, 27, 31-36) weakened the series' stature – needlessly so since this villainess has now proved quite capable of landing on her own four feet.

Issues 0 (childhood), Annual 2 ('Year One') and 38-40 ('Year Two') catalogue a reworked origin of Catwoman inconsistent with Newell's vision. Arguments as to the merits of these versions have raged through the letters pages, but despite the bleak, sordid nature of the earlier tale, there is little doubt that it lends a far more powerful and convincing motivation for Selina assuming the mantle of the cat than Doug Moench and Jordan Gorfinkel's watered-down retake. Subsequent Moench issues are more action-oriented, sometimes portraying Catwoman as a renegade James Bond complete with her own crooked version of 'M'. The romantic interest, Moreland McShane, is a welcome contrast but the resolution of this subplot in Moench's final issues (52, 53) is far too convenient. Devin Grayson writes from 54, mixing lightweight and well constructed stories, albeit with few drum rolls. Her best offering is 66-71 in which Selina Kyle runs for mayor of New York City, a sequence providing some relief from the repetition of over used burglary stories. John Ostrander writes one story ('No Man's Land' in 72-77) in his six issue stint. Jim Balent departs with him after 77 issues of top-notch artistic consistency.

The Great Catwoman Breast Debate has reached the fan press, letters pages and Internet as the preposterous pair of massive mammaries receives silicon injections by the issue. This submission to the Bad Girl art fad lends little credibility to her acrobatic exploits and unfortunately detracts from the series' most superlative feature: the artwork. Jim Balent draws every issue to 77 bar Annuals 1 and 3, both imaginary stories. No little credit should go to colourist Buzz Setzer who bows out with 57. A temporary blip in quality occurred for a few issues from 21, when DC switched to slicker paper stock before coming to terms with the artistic techniques it demanded. Many issues are worth the admission price for Balent's covers alone (10, 15, 18, 29, 36), and his clean lines, attention to detail, facial expressions (e.g. issue 20 page 13) and good humour (dig the squirrel in the oxygen mask in 30) produced a near faultless first 40. Ensuing issues show signs of complacency and John Stanisci's harsh inking from 51 does not assist. Bronwyn Carlton and Staz Johnson's stint from 78 requires no warm-up as Catwoman is captured, unmasked and sent to jail inside their first two issues. The change in tempo is abrupt and Catwoman's personality change is unsettling. The confused storyline loses direction as the first series meanders aimlessly to its finale.

Before the launch of the second series incumbent writer Ed Brubaker delivered a prequel in *Detective Comics* 759-762*. Selina undergoes soul searching and character reformation whilst rotating pencillers supply the new retro look, and possibly the first practical costume Catwoman has ever worn. The emphasis leans heavily toward detective fiction with 6-9 the pick. No superheroes. Minimal fight scenes. What are mainstream comics coming to?

Darwyn Cooke uses the length of the 85 story pages in the 2002 graphic novel 'Selina's Big Score' to excellent effect in a fine thriller made difficult to follow by his muddy, unfinished-looking artwork. Secret Files & Origins is a rather ineffectual one-shot recapping Catwoman's new outlook on life as depicted in series two.~APS

Recommended: Miniseries 1-4, series one 1-4, 14, 28-30, series two 6-9

CATWOMAN AND VAMPIRELLA: The Furies

DC/Harris: *One-shot 1997*

Pitifully hackneyed team-up story as Vampirella, on her mission to wipe out all supernatural monsters, arrives in Gotham City as a mysterious catlike creature is making headlines assaulting art collectors and stealing their cat-themed art treasures. After the obligatory mistaken identity misunderstanding provides yet another catfight, they join forces to track down the real culprit. Pantha, a shape-changing private detective bimbo, is working to recover the art treasures for the original owners, whilst the Penguin is taking advantage of her abilities for his own ends. Total rubbish from Chuck Dixon, Jim Balent and Ray McCarthy.~WW

CATWOMAN/WILDCAT

DC: *4 issue miniseries 1998*

The feline femme fatale and the Justice Society of America's premier pugilist are brought together in Las Vegas for an uninspired match against the mob. A subplot attempts to generate romantic heat between the characters, but writers Chuck Dixon and Beau Smith don't seem convinced, so how can we be? Sergio Cariello's lumpy and unappetizing art gives two characters who should be lithe and athletic all the grace and agility of a bag of spanners.~HS.

---

* Available in a collected edition

CAULDRON

Real Comics: *1 issue 1995*

Ambitious if unoriginal fantasy tale from Steven Patrick Brown telling of the last desperate struggle by a bunch of magic-users to save their world by opening a portal to another world. This just happens to be New York in the vicinity of a misunderstood comic artist. Competent but incomplete.~WW

CAVE BANG

Eros: *One-shot 1996*

As the title suggests, this is a caveman fantasy, and artist Tayyar Ozkan is very much in European mode. Hints of Manara, Moebius and Crepax are all present in a decently drawn comic, which alone places it near the top of the Eros offerings.~WJ

CAVEWOMAN

Basement Comics: *6 issues 1994-1996**

Caliber: *8 issue limited series ('Rain') 1996-1997*, one-shot ('Odyssey') 1999*

Basement Comics: *One-shot (Cavewoman Meets Explorers) 1997, 4 issue miniseries ('Missing Link') 1997-1998*, one-shot (Jungle Tales Of Cavewoman) 1998, 5 issue miniseries (0-4 – 'Pangean Sea') 2001-2002*

Through events explained in 3 of the first series, Meriem grows to adulthood seventy million years in the past, having gained the strength to cope among dinosaurs via increased molecular density during her journey back in time. Eleven years later her whole town makes the trip back for the b-movie gorefest that is the first series. Civilisation seriously deteriorates during the rainy season in 'Rain', which has a very similar scenario to the first series, but creator Budd Root's art has improved. By *Jungle Tales* an Art Adams influence is very apparent, and this day in the life story makes for the best sample. 'Missing Link' has Meriem's giant gorilla interacting with a female sasquatch, and while over-long at four issues, is a different approach from writer Bradley Walton and artist Jim Schumaker. *The Explorers* creators join with Root to good effect, with the story dropping hints as to Cavewoman's entire predicament, while 'Pangean Sea' transfers Cavewoman to New York. Beyond the basic premise there's little imagination, and while the diverse influences on Root's art have fused into a nice naturalistic style, it's still far too sloppy in places.~FP

CECIL KUNKLE

Renegade: *One-shot 1986, 2 issues, 1 Special 1987-1988*

Continuation of a comic strip that ran interminably and to no purpose in *The Comics Buyer's Guide*, a feeble domestic comedy with occasional comics references, execrably drawn. Why this was given four issues, let alone one, is inexplicable.~HS

CELESTIAL MECHANIC

Innovation: *3 issue miniseries 1990-1991*

Wilhelmina Jones decides to go into the space exploration business and compete against the all powerful Halplex corporation. There's an appealing light science fiction touch, and some creative plot twists that paste over the sometimes amateur art.~WJ

CELESTINE

Image/Extreme: *2 issues 1996*

Continuing the story of the angel Celestine from the pages of *Violator/Badrock*, in which she had her heart torn out, died and went to Hell. Chronologically this story takes place before the *Angela/Glory* series as a scientist tries to resurrect her, hindered by a demon and some angels who don't want her back. Blackly amusing tale by Warren Ellis (the Devil is a woman, Celestine is a murderer), drawn with some panache by Patrick Lee (though the inking on 2 is poor). As entertaining as Liefeld's obsession with angels and demons is likely to get.~NF

CELL

Antarctic: *3 issues 1996-1997*

A very promising debut from Derek Kirk concerning a bleak future in which engineer Annie stops thugs from beating a naked man clutching a mysterious device. Then there's a sinister corporation, a jealous boyfriend, some excellent dialogue, and a bizarre clown. Kirk is an instinctive storyteller, and his fine-lined art, while perfectly acceptable here, should evolve into something wonderful. 1-3 are more than just promising, though, and it's very unfortunate that Kirk decided that *Cell* "was like a premature baby, not ready to come out yet" and stopped the series. Also of note are the confessional back-up strips by Kirk's brother Brent. While far more light hearted and at first drawn functionally rather than elegantly, they all entertain, and his art evolves throughout, eventually attaining a Joe Matt-like fluidity.~WJ

Recommended: 1-3

CENTRIFUGAL BUMBLEPUPPY

Fantagraphics: *8 issues 1987-1988*

Why did Fantagraphics follow the not particularly successful *Honk!* with an even more obtuse humour anthology? Joe Sacco edits, but doesn't induce the best from contributors, many of whose names will be familiar. J.R. Williams delivers, and the Callahan strip that kicks off issue 2 is worth seeking out, but by and large the standard is disappointing. Several name artists, including Beto Hernandez, tread water, and too many strips suffer from amateur execution or lack of pacing. Still others suffer from humour so obscure it's virtually non-existent.~FJ

CENTURIONS

DC: *4 issue miniseries 1987*

Boy, did the DC licensing execs see these folk coming. If you had a TV cartoon series and toy line to promote would you demand to have Bob Rozakis and Don Heck producing your comic? Perhaps by that stage this cartoon-by-numbers was already beyond redemption.~FP

CENTURY Distant Sons

Marvel: *One-shot 1996*

Origin for the mysterious alien from *Force Works*. Sadly, Century's mystery is his only real attraction and this comic neither enhances our understanding of his abilities and personality, nor tells a particularly interesting story. It's nicely pencilled by J. Calafiore, but that's not really enough.~NF

THE CEREAL KILLINGS

Fantagraphics: *8 issue limited series 1992-1995*

From a good pun, James Sturm weaves a haunting mystery about the disappearance of former cereal box icons. The narrative switches between their heyday, when the frog, rabbit, elephant and chimp all had long contracts and endorsements aplenty for sugary cereals, and the present, when they're washed up, and often bitter. Carbunkle, their agent, is experiencing apparitions involving dead colleagues, but has plans to launch a new cereal based on a short-run 1950s product represented by a scarecrow. Attempts to contact him lead to recollections of his behaviour questioning the ethics of what he represented, and revelations about the past of the other cereal celebrities. Giving reality to cheery cartoon icons has a disturbing effect, but the seemingly rushed and wishy-washy conclusion is a disappointment. 8 is cover blurbed "Chapter nine" (which indeed it is).~FP

CEREBUS The Aardvark

Aardvark-Vanaheim: *285 issues + 1977 to date*

When writer/artist Dave Sim began *Cerebus* in 1977 his was one of only a handful of titles whose creators had rejected (or been rejected by) mainstream publishing, but felt confident enough in their creations to publish them themselves. *First Kingdom* and *Elfquest* are other examples from the period. *Cerebus* started out as a parody of *Conan the Barbarian*, down to Sim's appropriation of Barry Windsor-Smith's art style and his Howardesque definition of Cerebus' world, both geographically (it wasn't long before a map became a staple of the text page) and politically. The latter was the far more wide-reaching element of the stories. It would be a couple of years before Sim announced that he had Cerebus' story mapped out to issue 300. No longer a simple monthly fix, the title now demanded a staying power never before attempted by a North American comic creator, nor demanded from an audience.

Cerebus initially and temperamentally is a barbarian, albeit one of only three aardvarks in this world, wandering around using his sword to get what he wants. At the heart of the series is the humour, and Sim's parodies are an important aspect of his storytelling. He hurls them at the reader in the early issues, but they're built upon throughout, or new targets are found. The level of humour depends on the target, from homage (The Marx Brothers) to cruel (Margaret Thatcher, Hemingway). The subjects are taken from many sources: other comics (Red Sonia, the various guises of The Roach, Neil Gaiman's Sandman); literature (Moorcock, F. Scott Fitzgerald); film (Woody Allen, The Three Stooges); music (Mick Jagger, Keith Richards, the Beatles) or politics (Mrs Thatcher).

The humour drives and predominates throughout 1-25, but with the introduction of Lord Julius in 'The Walls of Palnu' there's a real sense that Sim has a plan for the characters and that rather than just one-off parodies, we are actually reading a story that just happens to have had a funny start. Lord Julius is Groucho Marx, mad bureaucrat and arch-politician, whose ministers are given completely misleading titles in an effort to keep everyone off balance. These twenty-five issues introduce almost all the major characters who will be the stars of the next 125 including Sophia, Elrod, Julius, Jaka (6, Cerebus' true love) and Weisshaupt, master-conspirator. The Roach is variously the Cockroach, Captain Cockroach and, in later issues, Moon-Roach and WolveRoach amongst others. Bran Mak Muffin (5) is leader of the Pigts, who worship a statue that looks remarkably like Cerebus, the explanation for which would come almost 200 issues later. A parody of the film *The Beguiled*, leading into a meeting between Woman-Thing and Sump-Thing (parodies of Marvel and DC's swamp characters), concludes the first phase of the narrative.

'High Society' begins in 26 and marks a milestone. Cerebus arrives in the city of Iest, puts up at the Regency Hotel and finds himself an important guest due to his past employment by Lord Julius. The latter's ex-wife, Astoria, shows up with the Moon-Roach and manages Cerebus' candidacy for the post of Prime Minister, a title he wins. He promptly tries to enrich himself by invading his neighbours. It all goes terribly wrong, however, when the Eastern and Western Churches unite to force him out of office and out of Iest. In 'High Society', almost every character from the previous issues is revealed as part of the bigger picture, though their true roles may not be explained for a long time. His social and intellectual superiors manipulate Cerebus, but ultimately they can't control him as he lacks an understanding of anything but personal gain.

52 starts 'Church and State', to date the longest story, running to 111 and concentrating thematically on the effects of faith and power. Weisshaupt engineers Cerebus' return to Iest as Prime Minister (having tricked him into marriage with Sophia), but his political and religious enemies undermine his control over Cerebus by electing him Pope. Unfortunately for everyone, Cerebus decides that, as Pope, he can do anything he wants, and demands all true believers hand over all their money. The plotting behind his back comes to naught when it is Cerebus who ascends to what he expects to be godhood, but which instead turns out to be a history lesson on the Moon. Sim here intimates, as did R.E. Howard, that this fictional world is merely Earth's distant past. He returns to Earth to find that the religious leader Cirin (also an aardvark) has conquered Iest and taken all his wealth. 'Jaka's Story' in 114-136 is the best and most well rounded part of the continuing novel so far. Oscar Wilde writes a book about Jaka's childhood as told to him by her husband, Rick. Jaka is earning the household's money by dancing in a local tavern whose owner, Pud, is in love/lust with her. Cerebus is given refuge by Jaka and Rick, and is convinced she can be persuaded to leave with him. Jaka's story itself is told in illustrated prose alongside the contemporary narrative. To the Cirinists, women are the most important people and amongst them the mothers have the greatest respect, but men are second class citizens, tolerated purely for their part in the childbearing process. Whilst this is a love story, it's also about the nature of art, whether it be dancing or writing, both of which are done for their own sake, both of which are illegal in Cirinist society.

In 'Melmoth' (139-150), Cerebus is even more of a bystander. He's in shock after the arrest of Jaka, incapable of speech as he sits outside a bar holding a child's rag-doll while a waitress serves him and talks at him. The real story here is Sim's depiction of the death of Oscar Wilde. Seemingly out of place within the narrative framework, it pursues the themes of liberty, death and art as displayed in the life of the great outsider/artist/criminal, finally ground down by society. These themes are integral to the process by which Cerebus' personality is expanded and are picked up again in 'Reads'.

'Mother and Daughters' begins with the battle between Cirin and Astoria and their different philosophies. It comes down to which of them is strong enough to ascend to godhood, if Cerebus doesn't beat them to it. It draws many of the long-standing plot threads together and paves the way for a new direction in 201. Along the way Sim himself becomes more intrusive into the story, particularly in the chapters collected as 'Reads' (175-186), in which artists speak out against publishers and the nature of editorial decisions. More controversially, there's also an extended diatribe on the nature of the relationship between men and women in which feminism takes a battering – woman is the Void, opposite of Light. 'Guys' (201-219) is something of a return to the humour of the first issues with plenty of drinking and male bonding as Cerebus tries to find oblivion after the revelations at the conclusion of 'Mother and Daughters'. There are new characters (including one based on Marty Feldman) and even guest appearances by other self-publishers and their characters.

'Rick's Story' (220-231) returns the focus to Cerebus' relationship with Jaka, albeit, initially, through the reappearance of Rick, examining the effect on his psyche of the break-up of his marriage. With 'Going Home' (232-250), Sim introduced a commentary, explaining his references and expanding on the ideas presented. In it, Jaka and Cerebus are travelling together, eventually boarding a Southbound ship, where they meet Sim's latest literary character, F. Stop Kennedy (F. Scott Fitzgerald), whose latest writings, 'Pleasure's Simple Life', become part of the book's narrative. This is followed, during the couple's continuing travels towards Cerebus' birthplace, by the introduction and dismissal of Ham Ernestway, during the intense 'Form and Void' (251-265). The Three Wise Fellows, bearing an uncanny resemblance to the Three Stooges, pop in for the final storyline, 'Latter Days'. After being imprisoned briefly, Cerebus breaks his leg, dresses up as demon-king Spore to judge the righteousness or otherwise of women, and then meets Konigsberg, who's based on Woody Allen.

Artistically, from the primitive, but witty, Windsor-Smith copies, Sim developed quickly with a highly individual style that retained a lot of Windsor-Smith's attention to detail, but added a smoother, more rounded finish. Throughout the series he's continued to experiment with his storytelling techniques via printing sideways, including prose sections, or writing himself into the story. His use of language and literary pretensions has grown as the scope of the series has grown. Since early issues of 'Church and State' he's been more than ably assisted by Gerhard, responsible for the backgrounds, often elaborate and always entirely in keeping with Sim's own contributions. Sim has continued to champion the cause of the self-publisher both by providing space in Cerebus for previews of other titles and by offering to print "single-pages" in the Bi-Weekly reprint series. His work has been compromised in some eyes because of his views (on women in particular), but Cerebus is an evolving (and involving) series that defies instant judgement. With only fifteen issues still to come, it's clearly a significant achievement, though its scope, ambition and complexity make sampling difficult. It's designed as a massive novel, and although it's at an early stage, readers wanting to sample are best advised to begin with one of the later *Swords of Cerebus* collections.

The Cerebus Bi-Weekly (followed by 'High Society' and 'Church and State') series reprinted issues in order from 1 with additional (non-*Cerebus*-related) material in the form of single pages by a wide variety of creators. *Swords of Cerebus* reprinted the series in four-issue batches with new short stories by the likes of Marshall Rogers and Barry Windsor-Smith. These shorts were themselves collected in *Cerebus World Tour Book '95*. *Cerebus Zero* (1993) reprints the issues between books that are missing from the collections, which include up to 265.~NF

Recommended: Cerebus 5, 6, 26-138, 251-265

CEREBUS JAM

Aardvark-Vanaheim: *One-shot 1985*

Cerebus Jam was the result of Dave Sim's search for back-up strips for his first reprint series, *Swords of Cerebus*. An excellent cover by Bill Sienkiewicz precedes four stories by the usual team of Sim and Gerhard, with contributions of varying degrees from Scott and Bo Hampton, Murphy Anderson, Terry Austin and Will Eisner, who variously pencil and ink different parts. The strips themselves are designed to fit into Cerebus' continuity as part of Sim's 'Young Cerebus' series. Perhaps too much of a novelty to be really indispensable, but each strip is interesting, especially Terry Austin's Popeye homage and Eisner's Spirit tale.~NF

CERES CELESTIAL LEGEND

Viz: *6 issue miniseries ('Part 1') 2001*, 6 issue miniseries (Part 2) 2001-2002, 4 issue miniseries (Part 3) 2001-2002, 3 issues (Part 4) 2002*

Cute and feisty Aya Mikage and her twin brother Aki are not the typical teenagers they appear. On their sixteenth birthday they're summoned before their grandfather and the assembled family for a test. When shown a mummified hand Aya feels a strange energy within her and Aki's body erupts in a welter of bleeding wounds. The grandfather declares that the boy should be taken into protective custody, but Aya must be killed. She escapes, and survives a number of attempts on her life by her family, thanks to the hunky but mysterious Tôya. She discovers that she is the direct physical descendant of Ceres, the Celestial Maiden – a powerful figure from mythology – and finds allies in the form of other indirect descendants. As her life spirals out of control, her father murdered and her mother drugged and brainwashed into trying to kill her, Aya transforms into an enraged Goddess before being pacified and regressed by her friend and self appointed guardian Yuhi with a kiss. When Aki finally escapes and is reunited with Aya she transforms again, accusing him of being the one who shamed her and stole her Celestial robes, threatening to destroy all the Mikages. Once again Yuhi kisses her, banishing the Celestial threat. Now they must all work to solve the mystery of the Robes, defeat her murderous family, and placate Ceres before tragedy destroys them all. Convoluted but entertaining Shoujo (girl's story) tale from Yû Watase.~WW

CERTIFIED COOL

Moordam Comics/Slap Happy Comics: *One-shot 2000*

This is a precursor to Comic Library International, featuring many of the creators and some of the characters that would become the mainstay of that series. George Broderick Jr has Courageous Man and his sidekick, Spunky the Effervescent Prepubescent meet Flamenco Hombre in what was originally intended as 4 in his own series. Similarly, 'Magic Inkwell Comic Strip Theatre', Cayetano Garza's Krazy Kat homage, should have been 2 and the Craybaby episode by Art Baltazar, Levi Krause and Chris Yambar was due to be World's Funnest 2 and 3. Other CLI regulars include Chris Yambar (Mr. Beat, The Fire Breathing Pope), Mike Bocianowski (Chuck the Ugly *American*), and Jamie Cosley (Boy and Dog). Of the others, Kevin Thomas' The Spy Girls duel with Dr Vertigo, and Scott Roberts offers a strip about the cartoon show in Patty Cake, Birdy as well as an episode of his Miep and Patches in 'Comic Book Defenders'. These are all enjoyable enough, in a light-hearted, undemanding way.~NF

CHA CHA Graphic Novels

The Cha Cha graphic novel line differs from other lists of sex books in concentrating exclusively on period erotica. The period may be the future, as in Pourbet's portrait of a jaded porn film stud, *Sam Marlowe*, the least successful of the line, but is generally the past, even the relatively recent past of Communist Eastern Europe. Hugdebert's *Love, Eastern European Style* is three stories with a tad more subtlety than the title, featuring trademark detailed art. Nordhal's *The Damned of Mallande* concerns a peasant witnessing a ritual murder among the aristocracy leading to plenty full-frontal hammer horror. It's decently worked, as is Morale Stramaglia's *The Divine*, wherein a libidinous World War I spy and her assistant work their way across Europe to Turkey, which is delicately drawn with a grey wash.

The best work offered by Cha Cha is by Rotundo, although there's very much a detached quality to his cold narrative. Two volumes of *Ex Libris Eroticis* detail every form of sexual activity most could want to see, all rendered in a fine line that deliberately approximates Beardsley's stark black and white contrasts. A third volume was published by NBM. There are also two collaborations between Georges Levis and Francois Leroi, *Coco* dealing with a teenage girl growing up in a bordello in occupied Paris during World War II, and *Pearls of Love*, set in British occupied India. Levis' work is lovingly rendered without a line out of place, but curiously old-fashioned, and both stories suffer from jumps in the narrative.

There's a very traditional editorial outlook to the Cha Cha line, demanding a story incorporating the sex scenes rather than nothing but. In this manner it reflects the attitude of the European porn film as opposed to its American counterpart. Almost every book meets the target criteria, so you can shop with confidence.~WJ

CHAIN GANG WAR

DC: *12 issues 1993-1994*

One of the oddest ideas to have hit mainstream comics, and one can imagine writer John Wagner chuckling all the way through. Starting with the viewpoint that wealth enables too many criminals to evade justice, those criminals are abducted to be kept in dungeons for an indefinite period. The perpetrators come to be known as the Chain Gang. Action is prioritised, and the tension in the title comes from their abductions, the threat of discovery, holding a DC celebrity from 5, the ill-advised escape attempt and Batman dropping by (11). Occasionally the eccentric elements intrude too far into what's been established as a gritty title – the street gang that talks in rhyme – but overall it's a better than average read.~FP

Rex Miller CHAINGANG

Northstar: *2 issues 1990*

In 2 horror writer Rex Miller has a lot of famous novelists providing gushing praise for issue 1. He's either a forger on a grand scale, or possesses an impressive set of blackmail negatives. This is poorly plotted and paced material about a five hundred pound serial killer, given an extra dimension of offensiveness by virtue of the sloppy, but explicitly violent, art of Joe and Tim Vigil.~WJ

CHAINS OF CHAOS

Harris: *3 issue miniseries 1994-1995*

Extremely amateur effort at creating a unified universe for Harris' assorted characters. The Rook and Vampirella are the major players as chaos is personified to enslave a possible future Earth. It's badly drawn, poorly written and not worth anyone's time.~FP

CHAINSAW VIGILANTE

NEC: *3 issues 1994**

Spinning off from The Tick, the hero is a young man who has defeated all the other superheroes and forced them to retire, just as an overwhelming giant threat called the Tumour, quite literally, hits town. Stylish and a lot of fun but the series folded before any real momentum could be gained.~WW

CHALLENGERS OF THE UNKNOWN

DC: *Series one 87 issues 1958-1971 (1-77), 1973 (78-80), 1977-1978 (81-87), 8 issue limited series 1991, series two 18 issues 1997-1998*

After four tryouts in *Showcase* (6, 7, 11, 12), Jack Kirby's first 1950s group were promoted into their own title. The Challengers were four men: 'Ace' Morgan, pilot and astronaut, 'Prof.' Haley, a playboy scientist, 'Red' Ryan, adventurer and acrobat, and 'Rocky' Davis, an ex-Olympic wrestler. All had survived terrible accidents and saw themselves as living on borrowed time, so banded together to fight injustice in whatever guise it appeared.

This was Kirby's last major series before co-creating the *Fantastic Four*, and with the wonderful Wally Wood inking his pencils you can see Kirby's Marvel style emerging. Aliens ('Prisoners of Robot Planet' in 8), sorcery ('The Sorcerers of Forbidden Valley!' in 6), time-travel ('The Wizard of Time!' in 4) and the like were all strongly featured in 1-8. Kirby really was in his element here, as the concept gave his prodigious imagination full scope with a wide range of genres in which to set his stories, but alas, his destiny lay elsewhere. The artist most associated with the Challengers was his replacement, the much underrated Bob Brown, who drew skilful, action-packed stories. The writing was by Arnold Drake and Ed 'France' Herron, and later Bill Finger, all of whom forgot the adventure origins and tried to have the Challengers compete with superhero titles. The 1960s were the heyday of the Challengers. They were given new, brighter costumes, a supporting cast (including Cosmo, their space-pet!) and a bunch of recurring villains. It was these silly looking villains that anchored the series in its second-rate position. There was Multi-Man, a pint-sized adversary with pointed ears and an enlarged head; his creation Multi-Woman, a giant female robot; Kra, an alien robot; and Volcano Man, a tower of living lava. Yes, well, definitely different. These and others comprised the League of Challenger-Haters, and were usually imprisoned in the Challengers' own jail, with the team making supply trips once a month! So much for human rights! Given the superhero direction, the success of such series largely depends on imaginative adversaries (where would the *Batman* TV series be without those colourful characters?), and unbelievably the Challengers foes became ever more feeble. Along came Villo, Brainex and the Sponge-Man, all among the worst DC had to offer. Sadly, they all fitted well within the context of the stories. Of a poor bunch Drake wrote the best of the post-Kirby adventures, particularly 48's crossover with the *Doom Patrol* 102.

Towards the end of the 1960s mystery comics were slowly increasing in popularity, and with falling sales the Challengers were quick to change tack: from 70 they dealt mainly with the occult. The most notable issue is a Neal Adams drawn Deadman guest appearance in 74. The final three issues reprinted Jack Kirby material, as did the 1973 revival. Seek these out as they're much cheaper than the originals.

A successful revival in *Super-Team Family* 8-10 returned the Challengers to their title. The Challengers went back to their roots, with Steve Skeates and Gerry Conway producing interesting plots. There was nice artwork too, from Mike Nasser and Joe Rubinstein (reminiscent of Neal Adams' stint on the title), later replaced by the young Keith Giffen. This short run managed to squeeze in guest appearances from Swamp Thing (82-87), Deadman (84-87), and even Rip Hunter, Time Master (86), tying up lots of loose ends. You can't keep a good idea down, however, and the 1991 miniseries was very impressive. It took the angle that Challengers folklore was now a money-spinning venture. The Challengers lived in their headquarters in Challengers Mountain (introduced in the early 1960s) and a whole town, Challengerville, had been built nearby as a tourist attraction. Their quiet lives are shattered by one of Prof's experiments apparently gone disastrously wrong, exploding the mountain, killing Prof and his companion of many years, June Robbins, and half the town with them. The surviving Challengers go their separate ways. Ace becomes a mystical guru and journeys to the Amazon to seek a forgotten tribe; Red develops a blood thirst, becoming a vigilante and then a mercenary; while Rocky becomes a movie star and an alcoholic to boot. Their lives are still intricately connected, though, and the catalysts for their reuniting are a reporter, Harold Moffet, and a supernatural presence unleashing itself into the world, causing horrific acts. The cause of the latter disappoints, but otherwise writer Jeph Loeb triumphs with his characterisation. While the cast always had distinctive personalities, Loeb makes them very human and believable, which was no mean feat. Artist Tim Sale is also to be credited for giving each of the Challengers an individual look, whereas previously they all resembled musclebound heroes. A follow-up to this series from the same creative team was promised, but never materialised.

Nevertheless, the 1997 series was another good effort. Written by Steven Grant and Len Kaminski, the more prominent pencillers included John Paul Leon, George Freeman, and Mike Zeck. A new, more diverse, team of Challengers is introduced: Marlon Corbett a pilot, Clay Brody a race car driver, Brenda Ruskin a theoretical physicist (we're definitely in the modern era here) and Kenn Kawa a computer software designer (yep). There's an obvious *X-Files* influence, as the balance of nature is changing with lots of bizarre phenomena occurring, and mind monsters and zombies turning up, although it's not as clichéd as you would think. An origin is presented in 4, and 5 heralds the return of the original Challenger Rocky Davis, who becomes a regular supporting character, while the rest of the old gang return for 'Last Days' in 7-9. They also star in decent retro story in 16. With a few exceptions the moody colouring captured the right feel, but the series didn't fit well with the mainstream DC universe (despite Batman appearing in 11-12). Perhaps harsher storylines under a Vertigo label may have offered more success. Nevertheless this is an intelligent series, which did well to last 18 issues.~HY

Recommended: 1-8, 48, 74, Limited series 1-8

CHAMBER

Marvel: *4 issue miniseries 2002*

Generation X-er and X-Man Chamber takes leave of his genetically enhanced compatriots to join a normal university, only to become embroiled in a seeming hate crime when a campus pro-Mutant tolerance group is fire-bombed. Tolerable mystery yarn that is a little different from the usual X-fare.~WW

CHAMBER OF CHILLS

Marvel: *25 issues 1972-1976*

Beginning with originated material, most notably 'Brak the Barbarian', by 8 this had become yet another home for 1950s reprint shorts well past their sell-by date.~FP

CHAMBER OF DARKNESS

Marvel: *8 issues, 1 Annual 1969-1970*

Instead of shunting out their 1950s reprints, Marvel commissioned new stories in the same style from their then current freelancers, with often interesting results. Roy Thomas and Barry Smith's 'Sword and Sorcerers' in 4 was the first Marvel Conan strip in all but name, and you'll find Neal Adams writing for Marie Severin in 2. Reprints started creeping in with 6, and 8 only contained one new story. The title switched to *Monsters on the Prowl* with 9.~WJ

CHAMPION SPORTS

DC: *3 issues 1973-1974*

An obvious attempt to make a fast buck out of the sporty holiday seasons. Was it really worth the effort? A waste of Joe Simon and Jerry Grandenetti's abilities. Read *Prez* instead.~HY

---

* Available in a collected edition

CHAMPIONS

Marvel: *17 issues 1975-1978*

The somewhat unlikely union of Angel, Iceman, Ghost Rider, Hercules and Black Widow was formed after they foiled one of Pluto's more obscure schemes, attacking the University of California in Los Angeles to capture Venus and Hercules. Marvel's first West Coast supergroup was established, in theory, as 'The super-team to help the common man'. In practice this rarely transpired. Tony Isabella's insipid seven-issue stint was overturned by Bill Mantlo on the scripting reins from 8 and John Byrne on pencils from 11. Their solid superhero fare was rudely interrupted by cancellation with 17. The dissolution of the Champions was tidied up in *Spectacular Spider-Man* 17-18.~APS

CHAMPIONS

Eclipse: *6 issues 1986-1987*

Taken from the role-playing game of the same name, this simple-minded superhero adventure is more interesting for two ancillary points than for anything actually contained in the story. Firstly it introduced the work of Carol Lay to a mainstream audience, and secondly Marvel initiated a lawsuit against the publishers for use of the term 'Champions', which they eventually lost.~HS

CHANGE COMMANDER GOKU

Antarctic: *5 issue miniseries 1993, 4 issue miniseries 1996-1997*

This is the tale of Gokuru, a teenage orphan whose parents died in a suspicious plane crash. When his girlfriend is attacked by mysterious dark warriors the collar he's worn around his neck since the accident takes control and drags him to his father's secret lab where he finds a super powered battlesuit that transforms him into Commander Goku. In the second miniseries all pretence of a story devolves into meaningless, if mercifully brief fights, and cheesy humour: he hooks up the battlesuit to a microwave to give it time-travel capacity, there are "accidental" nude peaks of Goku's sister Hani in the shower, and silly gags about cyborgs and Japanese fandom. Mediocre manga action from Ippongi Bang.~WW

CHANNEL ZERO

Image: *5 issues 1997-1998*, one-shot ('Dupe') 1999*

Brian Wood's unrelenting exploration of a US society enslaved by its media. Jennie 2.5's pirate TV station seeks to inflame and reinform the people of a totalitarian, Christian, right-wing state, where apathy is the greatest enemy. Can video anarchy succeed in a struggle where the very act of fighting the system makes you a part of the system, and where anti-status quo broadcasts have the highest viewing figures and therefore are those most sought after by the commercial infrastructure for their ad spots? Genuinely challenging and intriguing, with an inspired use of typography to augment the multi-media theme of the story. Although paced slowly, and with a tendency towards pomposity, it's still very readable. 4, originally intended as a special, is seen through the eyes of a Cleaner, one of the State morality police, and 5 tells of Jennie 2.5's world travels after the surprise ending of the first story-arc. 'Dupe' is a collection of short pieces about some of the not-so-ordinary people that inhabit the underclass of the New America. Clever stuff. AIT/Planet Lar publish the collection along with a 'design book' titled *Public Domain*.~WW

THE CHAOS EFFECT

Valiant: *4 issue miniseries 1994-1995*

A peculiar numbering system provides issues signified by alpha and omega symbols, which are the bookends to this Valiant Universe crossover. It begins when Solar starts to fade away and only Dr Mirage can restore his power before villains Master Darque or Caldone and Noir can take it for themselves. The two issues designated Epilogue 1 and 2 concern a Magnus lost in time attempting to find his mother, who's in hiding from the Harbinger foundation. Appalling drivel.~NF

CHAOS! Quarterly

Chaos!: *One-shot (Chaos! Bible) 1995, 3 issues 1995-1996, one-shot (Chaos! Chronicles) 2000*

The *Chaos! Quarterly* anthology provided space for new or minor Chaos! characters and told stories that filled-in gaps or acted as preludes to upcoming series. Cremator is the only character in all three issues, others include Lady Death (1), Purgatori (1), Lady Demon (2) and Crippler (3). Most of the strips are written by Brian Pulido, with artwork from Steven Hughes (1, 2), Paul Pelletier (1, 3), Leonardo Jimenez (2, 3), Mike Okamoto (2) and Steven Butler (3) amongst others. There's a fun tale of two demons ending up at the wrong debutante ball and causing a massacre amongst the mob attendees in 2, but overall this is a title for already dedicated fans of the Chaos! universe. A Chaos Bible has character biographies, a checklist and two short strips featuring Evil Ernie and Lucifer, whilst *Chaos Chronicles* contains a particularly useful history of the Chaos! universe explaining the links between different Chaos! titles and checklists of series and appearances.~NF

CHAPEL

Image/Extreme: *2 issue microseries 1995, 7 issues 1995-1996*
Awesome: *1 issue 1997*

Those expecting a pious Presbyterian character are liable to be disappointed by this big brute, as are those expecting any attempt at a plot. A rambunctious type, Chapel has been returned from the dead to bash heads, and does so incessantly. The microseries relates how Chapel was the first Spawn, but don't be fooled, both that and Spawn's guest appearances in 5-6 are dreadful. The Awesome issue is no better.~WJ

CHARLEMAGNE

Defiant: *5 issues 1994*

In 1973, 13-year-old Charlie Smith hitch-hikes to Vietnam to search for his older brother, who is missing in action. Two years later, against all odds, he finds him, but as a tragic after-effect of their meeting, Charlie spends eighteen years in a coma, and awakens in 1993 with strength beyond that of mortal men. Ignoring the silly origin and the religious overtones, there's little to commend this series beyond some early Adam Pollina artwork.~HS

CHARLEY'S WAR

Titan: *2 Volumes 1983, 1986*

Given the brief of creating a World War I strip for British adventure comic *Battle*, Pat Mills wanted it reality-based, but without relying on officers' accounts, feeling they were too distanced from the horrors experienced by the ordinary soldier. Researching the idea he only found four memoirs written by troops who'd survived the trenches, and based *Charley's War* on these. In doing so he created the most evocative anti-war strip ever seen in British comics, more used to over-the-top Jerry-bashers. Artist Joe Colquhoun was very much from the old school, providing clear, detailed, expressive and well researched art in three-page segments. Charley begins as a naïve teenager arriving on the Somme, and Mills' chosen method of narration is the trivialities of his cheery correspondence to and from home – hoping the garden fence will be fixed – contrasted with illustrations of his day-to-day existence. It's a horrific coupling as the genial Charley gradually becomes aware of the realities of trench warfare, yet disguises the ghastly events he witnesses from his parents. In the hands of lesser creators this could all be very worthy but dull, but Mills writes involving stories, and Charley's personality is very engaging. It's a shame the remainder of the strip, with an older and wiser Charley experiencing World War II, is uncollected, as subversive history lessons have rarely been so well produced.~FP

The Legion of CHARLIES

Last Gasp: *One-shot 1971*

One of the most demented comics of all time, Tom Veitch and Greg Irons' powerful mix of the My Lai massacre and

* Available in a collected edition

the Manson Family killings was extreme, even by underground standards. The spirit of Charles Manson takes over the minds of Vietnam vets, who become cannibals and eventually take over the world, digesting the likes of Spiro Agnew, Chairman Mao, The Pope and George Harrison along the way. Any comic that ends with Richard Nixon trying to eat the head Charlie deserves a place in any collection, although it should go without saying that some may be offended.~DAR
Recommended

CHARLTON BULLSEYE

Charlton: *Series one 5 issues 1975-1976, series two 10 issues 1981-1982*

The first incarnation of *Charlton Bullseye* was a black and white house magazine, which featured news and articles about Charlton's comics, as well as unpublished strips from their archives. Other than an average kung-fu strip in 3 there were terrific Captain Atom stories by Steve Ditko in 1 and 2, a Jeff Jones short in 1, John Byrne's 'Doomsday + 1' in 4 and 5, E-Man in 4, and, best of all, The Question by Alex Toth in 5.

The second series was a catch-all anthology title that ran everything from superheroes (1) and funny animals (2, 6) to horror and sword-and-sorcery. The twist was that these were by and large drawn by fans for no money, so the quality was enormously variable. Of the run, the fantasy / science fiction-themed 3 is the best, its highlight being a strip by the largely unknown Ian Carr. The only features to move on to greater success were *Neil the Horse* (2) and *Thunderbunny* (6, 10).~DAR
Recommended: Series one 1, 2, 4, 5

CHARLTON PREMIERE

Charlton: *1 issue (19) 1967, 4 issues 1967-1968*

Charlton were without a doubt the most conservative comic publishing company of the 1950s and 1960s, chugging along on their identikit romance, war, mystery and hot-rod titles. Oddly, though, their concepts for a try-out title were far more imaginative than anything from other companies, except in 4, whose 'Unlikely Tales' could have slotted into any of the Charlton mystery comics. 1 introduces two new heroes and a very ordinary kid gang, the Tyro Team. Far better was The Shape by Grass Green, off-the-wall humour capturing the spirit of the original Plastic Man more convincingly than DC's 1960s series. The issue is rounded out with Pat Boyette's Spookman, in which a moonstone transforms archaeologist Aaron Piper into a vengeful puritan time-traveller. It's mad. 3's Sinestro, Boy Fiend is even nuttier, a satanic child who battles Charlton headliners Blue Beetle and the Peacemaker. The standout issue, though, is 2's 'Children of Doom'. Through circumstances detailed in the letters page Denny O'Neil (as Sergius O'Shaughnessy) wrote the story on an extremely short deadline, and came up with an inventive tale of a doomsday device constructed to trigger and destroy Earth on detecting atomic power. It's intended to hold the planet to ransom and deliver a new age of peace, but conventional warfare instead devastates the planet, transforming humanity. Pat Boyette is the artist, using a startlingly effective mixture of toned black and white art and colour for some sequences, again a process determined by the short deadline. Disjointed and rushed, it's nonetheless a fascinating story with a point to make, which holds up after thirty-five years. The preceding single issue 19 continued the numbering and content of Marine War Heroes, but was re-titled for reasons best known to Charlton.~FP

CHARM SCHOOL

Slave Labor: *8 issues + 2000 to date*

On the edges of everyday life lies the twilight town of Little Salem, where Bunny Baker, a teenage witch of great potential power, resides. The attempts of Bunny's well-meaning aunts to set her up with a nice young warlock are derailed when she meets Dean, a vampire lesbian drag-king biker, and falls deeply in love for the first time in her life. Dean and Bunny seem set to ride off into the moonset for a happy-ever-after, when along sashays Fairer Than, a girl who stands out from the crowd even in Little Salem; half-faerie, half-dragon, and, it would appear, almost totally irresistible. Is it love, or enchantment, that draws Bunny to Fairer Than? If the latter, will her own powers be strong enough to resist the lure? And what is Dean going to do about it? Elizabeth Watasin has created a delightful series. Emphatically not an 'Adults Only' book, it's a sweet romantic triangle with a wry twist that most readers – assuming they don't have issues with same-sex flirtation – will enjoy. Little substance, but bags of style.~HS
Recommended: 1-8

CHASE

DC: *10 issues (1-9 + 1,000,000) 1998*

A first reaction is, "oh, the old government agent working on cases involving costumed heroes plot". Not so, though. The special agent is Cameron Chase, who has no time for heroes in tights, yet she herself seems to be developing powers. Chase isn't a sympathetic character; cool, calculating and doesn't give a damn. The series works despite this because D. Curtis Johnson's plots are novel and intriguing, and the moody artwork by J. H. Williams III and Mick Gray captures exactly the right tone. Extra points of enjoyment for regular DC readers are many references to and appearances by characters both major (Batman in 7-8) and minor (Suicide Squad in 2-3). It's a shame DC weren't prepared to recognise quality over initially slow sales for a series that had all the ingredients to make it a fan-favourite with a little push.~HY
Recommended: 1-3

CHASSIS

Millennium: *2 issues 1996-1997*
Hurricane: *Series one 1 issue 1998, series two 4 issues (1-3, 0) 1998-1999*
Image: *5 issues 1999-2000*

Artist William O'Neil has endured a stop/start career with this look at the life of rocket-car racer Chassis in an advanced alternate 1940s. There's a strong cast of characters involved in behind the scenes machinations in what amounts to glamourous soap opera, albeit drawn in an appealing cartoon style. Joshua Dysart writing from the start of the second Hurricane series ups the quality and brings a diversity to the storytelling and some imaginative ideas – Adolf Hitler as comic artist anyone? He also realises the difficulty of conveying the excitement of car races in comics, so his stories are more character driven. Issue 0 is a who's who with a story set before the regular run, and the first Hurricane issue concludes the story begun at Millennium.~WJ
Recommended: Image 1-4

THE CHECKERED DEMON

Last Gasp: *3 issues 1977-1979*

S. Clay Wilson saw out the 1970s the same way he started them, continuing his apparent crusade to offend anyone who came into contact with his comics. Insulting racist caricatures abound, and for Wilson sex seems inextricably linked with degradation or violence beyond a point where it can feasibly be defended as ironic. For some this will be of no concern, and for them the pint-sized Checkered Demon fights and fucks slavers, bikers and aliens. Oddly, 1 and 3 are printed in landscape fashion, while 2 is the traditional comic format.~FP

CHECKMATE

DC: *33 issues 1988-1991*

Begun as a feature in *Action Comics* during 1987, this is sister to the long underwear agency Suicide Squad, and there are also links with Vigilante where we first met Harry Stein and the mysterious woman known as Black Thorn. Stein and his assistant Harvey Bullock are ex Gotham cops running an agency under review after the failure and excesses of Adrian Chase and Christopher Smith, better known as Vigilante and

---

* Available in a collected edition

Peacemaker. The agents are organised in ranks corresponding to chess pieces: bishops like Bullock are executives, rooks run missions, knights are active operatives whilst pawns provide support. The distinctive knights' uniforms tend to erase the personalities of the individual knights making the suit the star. Adversaries include a Ninja cult called The Blackadders, a rogue battle-suited Bishop, Andre Mazarin and Victor Cypher. Several other established characters make regular appearances including Sarge Steel and Valentina Vostock. 'The Janus Directive' occupies 15-19 and runs though numbered chapters of *Suicide Squad* and *Manhunter*, with all working together against the threat of world domination by Kobra. Later continued stories are 21-22, which features Black Thorn's long-awaited application to join Checkmate, 'Peaceful Knights' guest-starring Peacemaker in 23-24 and the swansong 'Patriotic Knights' in 31-33.

If Paul Kupperberg's plot-constipated scripts aren't enough to put you off, the crowded pages are drawn by Steve Erwin with inker Al Vey, for most of the run. There's a motley roster of fill-in artists among which the short pieces by Don Heck in 4, James Fry in 5 plus Tod Smith, Paris Cullins and Eduardo Barreto in 14 are luxuries. Most of 1-20 feature fine covers by Gil Kane, but the insides belong in the bottom of a birdcage.~SW

The Complete CHEECH WIZARD

Rip-Off: *4 issues 1986-1987*

To some people Vaughn Bodé was the misunderstood genius of the underground comics scene, using gentle humour to point out the evils of the world. To others he was that spaced-out cartoonist most notable for auto-asphyxiating himself while pulling on his pork. If you like his squat, truncated anatomy and doe-eyed women you'll probably want to get your hands on these druggy collections reprinting the original *National Lampoon* strips and collecting various underground newspaper appearances and colour strips, plus some new material. Cheech Wizard looks like a mage's hat on legs who, assisted by his bumbling and easily tricked toad apprentice, dedicates his life to doing nothing much. If you don't find his cutesy characters appealing you may be less enthusiastic.~FJ

CHEERLEADERS FROM HELL

Caliber: *One-shot 1989*

There's innovation in the production of this B-movie pastiche by preceding it with cinema posters advertising other Caliber titles and including an intermission for the full cinematic experience. Then there are ninjas, demons, and plenty of buxom beauties. To be read with a bucket of popcorn by your side and bucket of coke (either variety) on your lap, but not to be taken seriously.~WJ

THE CHEQUE, MATE

Fantagraphics: *One-shot 1992*

Collection of out-and-out funny stuff from Eddie Campbell, drawn in a wonderfully loose way, with thick lines and bold scribbles. Highlights include Professor Bean's attempts to demonstrate the principles of comedy to a loutish audience and the 'Great Wasters From History Not Counting Dave Sim' series of one-pagers.~FJ

Recommended

CHERRY

Last Gasp: *22 issues + 1987 to date*

Titled *Cherry Poptart* for its first two issues until an injunction from Kelloggs dissuaded writer/artist Larry Welz, this title is deliberately drawn in a style imitating the innocuous *Archie* comics line. Don't be fooled. Cherry is a very different kettle of flesh altogether. Eternally 'just 18', her voracious sexual appetites – and those of her divorcee mother and various nubile friends – are explicitly depicted in numerous encounters from the mildly salacious to the outright bizarre. An isolated issue of *Cherry* is fun; it is, after all, kind of a head-trip to see what appears to be the squeaky-clean *Archie* gang having it off in various ways. After a while, though, its perky bone-headedness becomes irritating, and reading multiple issues will make your brains dribble out of your ears. There are four issues of a companion title, *Cherry's Jubilee*, launched in the late 1980s. It's very much more of the same, except largely by creators other than Welz.~HS

CHERYL BLOSSOM

Archie: *3 issue miniseries 1995, 3 issue miniseries 1996, 1 Special ('Goes Hollywood') 1996, 3 issue miniseries 1996-1997), 37 issues (1997-2001)*

Flame-haired Cheryl and her twin brother Jason were created by Dan DeCarlo to stir up trouble in the *Archie* comics in 1981, as time and familiarity had mellowed the series' resident "bad kids" – Reggie and Veronica – to the point where they weren't generating enough conflict. What with trying to persuade Archie to drink, or, in Cheryl's case, an attempt at topless sunbathing, the Blossom kids certainly did create a stir, and after a dozen or so appearances, were withdrawn from the stories following complaints from parents.

However, when Betty and Veronica were deemed to need a third rival for Archie's affections in 1993's 'Love Showdown' storyline, Cheryl was returned, and this time she caught on. Maybe times had changed, or maybe the parents were all looking the other way. Following three miniseries featuring Cheryl's thespian aspirations, she was rewarded with her own title, brother Jason in tow. Things went swimmingly until Dan DeCarlo took legal action claiming ownership of certain characters, Cheryl and Jason among them, whom he claimed to never have received proper credit or payment for. The other bones of contention, Sabrina and Josie, were longer-established, and the subjects of high profile media deals at the time, but Cheryl could be – and was – easily excised from the Archie 'universe'. Her comic was cancelled, she was depicted "leaving Riverdale forever", and as the final insult, her solo stories were rewritten and redrawn, in the digest reprints, to star somebody called "Ginger Lopez" instead, just, it seems, to prevent the now deceased DeCarlo's estate having any further claim on the royalties. Which is a pity, because Cheryl's self-obsession, vanity and peevishness were a pleasantly tart counterpoint to the lovey-dovey Archie ambience.~HS

CHESTY SANCHEZ

Antarctic: *2 issues 1995-1996, one-shot ('96 Page Super Special') 1999*

A kitsch adventure starring fictitious Mexican wrestling legend Maria 'Chesty' Sanchez. She is talked into coming out of retirement to do good deeds in the name of her sponsor The Frijoles Del Oro Company and teams with Pedro 'Torpedo' Alvarez who's learned to use flatulence as a weapon. The incomplete story was concluded in the 1999 special. An expert on masked wrestling in Mexico, Steve Ross's scripts aren't great on pacing but the jokes and plot work well within the bounds of the comic's mondo style. The initial artwork by Scott Michaud is close to underground standard, and the finishing by Jayne Wu improves page by page, although the final chapter looks rushed by comparison.~SW

CHEVAL NOIR

Dark Horse: *50 issues 1989-1994*

Long-running black and white anthology that was instrumental in introducing several important European creators to an English-speaking audience. *Cheval Noir* mixed familiar names such as Moebius ('Man From Ciguri' 26-37*) with unknown stylists like Didier Comes ('Tree Heart', a symbolic folk-tale-like narrative illustrated in a cursive style relying on heavy blacks and decorative mark-making, 24-31). The stories were run in chapters, with up to seven different narratives in the early issues, although later on the book switched to larger chunks of three or even two. *Cheval Noir* travelled far from *Heavy Metal*'s science-fiction and adventure remit, and included detective, fantasy and, for want of a better term, mainstream stories.

Important creators who received exposure include: Matthias Schuiten (on his own for Fever in 'Urbicand' in 1-6 and with long-time collaborator Peeters on the extraordinary, visionary architectural tale 'The Tower' in 9-14); Jacques Tardi, with his blunt-lined detective tales staring the single-minded Adele Blanc-Sec ('Adele and the Beast' 1-4, 'Demon of the Eiffel Tower' 5-8, 'The Mad Scientist' 14-18, 'Mummies On Parade' 19-23 and 'Adieu Brindavoine' 24-27), plus his superb evocation of New York, 'The Roach Killer' (10-12); and Cosey, whose complex 'Voyage To Italy' appeared in 13-27, followed by 'In Search of Peter Pan' in 31-39. Phil Elliott's mildly humourous 'Post-Apocalypse' strips (most issues from 12) about two soldiers wandering the wasteland after a war were later reprinted as a Slave Labor one-shot. Although compromised by the quality of the paper and the squashing and stretching necessary to reproduce the artwork on comic-book-sized pages, *Cheval Noir* features much fine work.~FJ

Recommended: 1, 10-12, 24-31

Star Wars CHEWBACCA

Dark Horse: *4 issue miniseries 2000**

Two or three well-drawn eulogistic anecdotes about the brave Wookiee per issue, framed as interviews with his intimates by 'droids Threepio and Artoo. Could've been fun if it had been mostly grunting roaring and whimpering, but unfortunately, much is "translated from Shyriiwook". Pompous sentimental muck well worthy of George Lucas himself. For Warsies only.~GK

CHEYENNE KID

Charlton: *92 issues (8-99) 1957-1973*

The first seven issues went under the title *Wild Frontier*, and despite the Al Williamson art in some very early issues and John Severin (at his most unimaginative), this was a wholly undistinguished title. The one notable feature was the 'Wander' back-up strip in 66-87. It featured a galactic merchant from Sirius 5 stranded in Earth's Wild West. It was written by Denny 'Sergius O'Shaughnessy' O'Neil and drawn by Jim Aparo, who both had their tongues firmly planted in their cheeks. It's the best Western satire this side of *Bat Lash*.~SW

CHIAROSCURO

DC/Vertigo: *10 issue limited series 1995-1996*

A beautiful but duplicitous artist's model, Salai, vamps his way through Renaissance Italy ruining the lives of Leonardo DaVinci, Isabella D'Este and sundry others. Tawdry but readable series reduces the life of one of the greatest artists to the level of a made-for-TV movie, but it's the guys who have the pouty lips and big hair.~HS

CHIAROSCURO

Meanwhile Studios: *4 issues 2001-2002*

It might be imagined that anyone motivated enough to publish their own comic has something to say. Wrong. If anything this is about lack of motivation, but even the decent cartooning can't support almost zero plot.~FP

CHICAGO

Viz: *1 volume ('Book of Self') + 2002 to date*

In a futuristic Tokyo, the bay has been landfilled to create more living room. During the biggest earthquake for more than a century, the new terrain liquefies and the emergency services go in. When Rei and Uozumi's rescue squad discovers a deadly secret in the ruins, it leads to the whole unit's destruction and the two survivors on the run and desperate to fight back, but the only clue and hope they have is the South-Shinjuku bar called Chicago. Collected from Amimerica Extra, Shojo (Girls comics) creator Yumi Tamura's tale of deadly conspiracy is an above average thriller that shows great potential.~WW

A CHILD'S LIFE

Frog, Ltd: *1 volume 1998*

This collects the comic strips of Phoebe Gloeckner seen in various anthologies from the mid-1970s, together with a large quantity of new material. When the reprinted strips are removed from isolation and placed into context, they form a horrifying document of an abused childhood leading to later problems. With Gloeckner's cherubic people and easy on the eye illustrations, this seems an easy read, but it's very much the sugar-coated pill. Horrors lurk on most pages and any rational reader will wish they could reach back into the past to batter some of the people whose abuse is detailed. There are moments of poignancy and humour, but few are the occasions when a smile isn't followed by shock. From a purely artistic point of view, it's interesting to see Gloeckner's art develop to the point where there are strips lacking flourishes, and fleshed out via tones. The book also includes poster illustrations, and amusing medical cutaways of sexual situations. Some people will be offended by the high sexual content, but they'd be better focussing their anger on the atrocities. Don't be put off by the back-cover copy, which makes an eminently readable book sound a pretentious indulgence.

If you've read *A Child's Life*, much of the same ground is covered less effectively, but in greater detail in the illustrated novel *The Diary of a Teenage Girl*. The approach of combining text, illustrations and comic strips is a successful experiment, and while incorporating some of her earliest work, the new strips, and particularly illustrations, produced for this volume are very good indeed. To avoid repetition, though, read one or the other.~WJ

Recommended

CHILD'S PLAY

Innovation: *3 issue miniseries 1990*, 3 issue miniseries (Child's Play II) 1991*, 3 issue miniseries (Child's Play III) 1991*, 5 issue miniseries (Child's Play: The Series) 1991-1992*

Uninventive and inattentive adaptations of the controversial movies starring Chuckie, everyone's favourite killer doll. The fourth series is original (using the term pretty damn loosely) horror tales. Gore galore, but little imagination.~HS

CHILDHOOD'S END

Image: *1 issue 1997*

Planned as five issues, only one appeared chronicling an hour in a playground, and its lack of focus in isolation means it's not worth picking up now. Unless, that is, you want to see some fine, if occasionally stiff, naturalistic art from J. Calafiore.~WJ

CHILDREN OF FIRE

Fantagor: *3 issue miniseries 1988*

An odd science-fiction tale from Richard Corben tying in to his Den universe eventually but which is not representative of Corben at his best. For completists only.~NF

CHILDREN WITH GLUE

Blackbird: *1 volume 1991*

A ninety-eight page black and white paperback collection of Shannon Wheeler's allegedly "nationally acclaimed" strip 'Tooth And Justice' and single panel 'Calaboose' gags from *The Daily Californian* newspaper, and a few longer strips in the back. There are several hundred in all, and all presumably meant to be funny. About four are. Unless perhaps one has never been or met a student, or taken drugs (or too much coffee) or met people who do, or been in an unsuccessful relationship, and cannot tell bad drawing that never gets any better from good. Despite what it says on the back, this is one of the least weird, profound, and humourous works ever published.~GK

The CHILDREN'S CRUSADE

DC/Vertigo: *2 issues 1993*

The children of the village of Flaxdown have gone missing, and Rowland and Paine, dead schoolboy detectives, are hired by the sister of one of the missing children. Writer Neil Gaiman weaves in the historical Children's Crusade, the legends of the Pied Piper, and an intriguing potpourri of myths, legends and nursery rhymes to lead us into Vertigo's first and only Annual crossover. Succeeding chapters take place in *Black Orchid* Annual 1, *Animal Man* Annual 1, *Swamp Thing* Annual 7, *Doom Patrol* Annual 2, and *Arcana* Annual 1, featuring the young heroes or supporting characters of those titles, as they discover the Free Country, where children rule, before concluding in *Children's Crusade* 2. Chris Bachalo and Mike Barreiro provide lavish detailed opening-chapter artwork, and the opening scenes in Flaxdown convey a fine sense of unease. Unfortunately, the inferior quality of some of the in-between chapters means the whole crossover cannot be recommended.~HS

---

* Available in a collected edition

CHILI

Marvel: *26 issues, 1 Annual 1969-1973*

Millie The Model's redhead rival gets her own title, which looks eerily like Millie's – not surprisingly, since the stories were pulled from the same inventory. Early issues show off Ms Storm at her motor-mouthed bitchy best and are quite fun, but the comic rapidly becomes all reprint from 12.~HS

CHILLER

Marvel/Epic: *2 issue microseries 1993**

Brian Marx is a practitioner of chaos magic using everyday objects like coins, biros and playing cards to activate spells. He's hired by a consortium to capture an escaped demon Xcron, but soon begins to question his employers' motives. Enter TV anchor-woman Tracy King who finds herself reluctantly assisting Marx. Her personality regresses back to evil 18th century magician Aldo Roth, the man who originally imprisoned Xcron. It all proves to be a game with Marx playing the many untrustworthy players against each other. Author James Hudnall's idea of characters in street clothes fighting evil with a keyring is about as exciting as waiting for an overdue bus, and Roth's disgust at finding himself in a black woman's body is tasteless to say the least. John Ridgway applies his usual articulate linework to the tale but the colour is flat and fittingly unimaginative. After 122 pages that bus still hasn't come. Marx was later incorporated into Hudnall's *Espers*.~SW

Giant-Size CHILLERS

Marvel: *One-shot 1974, 3 issues 1975*

The first series was retitled *Giant-Size Dracula* from 2 onwards. This second series mainly reprints 1950s horror shorts. 3 has more recent reprints with art by Barry Smith and Berni Wrightson.~APS

Disney's CHIP 'N' DALE Rescue Rangers

Disney: *19 issues 1990-1991*

Chip 'n' Dale are chipmunks created in 1943 as a foil for Mickey Mouse's dog, Pluto and came to trouble Donald Duck as well. To tie-in with a TV series they renounced their mischievous ways and decided to make the world a better place for other animals. 1-2 adapt the TV special explaining how the Rescue Rangers came to be, as Chip 'n' Dale try to help detective Drake and his dog framed for a theft by Aldrin Klordane and Fat Cat (a cat). Along the way, they team up with Monterey Jack (a cheese hunter and mouse), Zipper (a housefly) and Gadget (an inventive female mouse), who remain their companions for the rest of the series. 3-6 have Pi-Rats, shipwrecks, a mysterious island and the return of Fat Cat, who's the subject of two of the three short stories in 7. In 8-12 they attempt to return home, having adventures in Florida, Hollywood and the Pacific Northwest on the way.

To this point, most stories have been written by Scott Saavedra (except 7) and drawn, except 9, by Argentinian artist Hector Saavedra (no relation). New writers, Tom and Mary Bierbaum, provide torrential rains and kidnapped cats and dogs for 13 and a trip to the Swiss Alps to meet Jacques de Brie, Continental Mouse of Mystery in 17, both drawn by Saavedra. Both Saavedras are back for the introduction of three new crime-fighting groups in 15-16, while 18-19 is set in a haunted Scottish castle, concealing funds stolen from an orphanage. 14 stands alone as it features three strips reprinted from *Le Journal de Mickey*, by Francois Corteggiani and Maximino. This is a fun, if unexceptional, series, with a sense of continuity and some hints of romance to offset the comedy antics.~NF

CHIRALITY

CPM: *18 issues 1997-1998**

In the near future, mankind has been ravaged by a parasite that turns humans into machines. A group of survivors attempt to restore Earth's Gaia mainframe, which can destroy the mechanical virus. Ostensibly a straightforward science fiction adventure, Satoshi Urushihara's storytelling is suffused with elements of Shojo manga, making this as much a romance as anything else. In this respect it suffers from the overused symbolism supplanting characterisation, but the two attractively drawn female leads (often naked, it must be said), help make for an enjoyable romp.~NF

C.H.I.X.

Image: *One-shot 1998, one-shot ('That Time Forgot') 1998*

When Good Girl's pet Piguana is apparently kidnapped she sets out to save him by retrieving four pieces of a device (the bomb) that he's been attached to, even though it turns out that's she's actually building the bomb as she goes along. The second issue has her accidentally rounding up superheroines from the past when her aged mentor sends her back in time, supposedly to prevent the bomb going off. This is a sort of 'round robin' comic with chapters written and illustrated separately by Terry Dodson, Matt Haley, Aaron Lopresti, Ron Randall and Adam Warren amongst others. It's little more than an excuse to draw superheroines in a good-girl style although it has a modicum of panache and wit. Though at least a third issue was expected, this joins the long list of incomplete Image titles.~NF

CHLOE

Chrome Fetus: *1 Graphic Novel 2002*

Seventeen year old Chloe is an introverted loner, shunned by her classmates, largely incommunicative, yet with precocious eccentricities such as a love of cigars. When her dog goes missing she stumbles into circumstances that she doesn't understand, but that lead to her transformation and fulfillment. Hans Rickheit's story is profoundly disturbing, dragging the reader into areas they'd probably rather not visit, and containing extremely unsettling sexual imagery. It has the dreamlike quality of Jim Woodring's comics, but with little of the comfort, and stands apart as something almost unique and very memorable. Rickheit's previous minicomics work is also disquieting, and can be found at www.chromefetus.com.~FP

Recommended

CHOICES

Angry Isis: *One-shot 1990*

Pro-choice benefit book intended to combat anti-abortion legislation in the USA. Over fifty contributors, including Howard Cruse, Roberta Gregory, Ramona Fradon, Reed Waller and Kate Worley. The New Adventures of CHOLLY AND FLYTRAP

Marvel/Epic: *3 issue miniseries 1990-1991*

Cholly is a humanoid of indistinct persuasion behind his airman goggles and jacket, and Flytrap is a giant, mute, obese albino of enormous strength. They roam a rough fantasy world and do what they must to survive. This series has the pair caught between two warring mobs, one of whom has captured Flytrap for training as a boxer. Arthur Suydam's art has progressed since the *Epic Illustrated* shorts that introduced the pair (and which are collected in graphic novel form). Sadly it isn't good enough to recommend what is basically one long shaggy dog story with inventive visual asides.~WJ

CHOPPER Earth, Wind & Fire

Fleetway/Quality: *2 issue microseries 1991*

The skysurfer Chopper was popular enough in Judge Dredd tales to spin off into a solo series, presented here by Dredd

(and Chopper) creator John Wagner and artist John McCrea. Now living in Australia, Chopper's peaceful existence is threatened by large-company shenanigans. Wagner has some fun parodying the laid-back Australian attitude to life, and McCrea's painted art is a far cry from his Hitman style, although equally good. It all adds up to a diverting read, with the benefit of sharp reproduction.~FP

THE CHOSEN ONE: Legend of the Raven
Troma: *One-shot 1997*

Troma were infamous for churning out a string of no budget cult movies in the 1980s and 1990s, but whereas the studio's trashy films were occasionally enlivened by the odd flash of wit, this abysmal spin-off strip is entirely without redeeming features. It's derived from a mystical conspiracy movie and features lots of poorly drawn tits and ass from artist Michael Duggan, an amateurish script credited to four different authors, and a two-line introduction from Stan Lee, who is apparently a close personal friend of Troma chief Lloyd Kaufman.~AL

The Adventures of CHRISSIE CLAUS
Hero: *One-shot 1991*

Targetted at the usual Hero market of hormone-popping adolescent boys by cover featuring Flare, refunds were surely in order when the contents were seemingly written for five year olds. There's nice Tim Burgard art on the second story of Santa's daughter, but not nice enough to make this worth searching out now.~WJ

CHRISTIAN
Maximum Press: *1 issue 1996*

Christian is your standard warrior-bimbo, on a lucrative assignment as bodyguard to Jelly Baxter (a leaden parody of Michael Jackson). Thanks to Robert Loren Fleming, some of the dialogue is quite snappy, and the ending has a certain style, but that parody is so clumsy and relentless, you'll come away feeling you've been bludgeoned.~FC

Walt Disney's CHRISTMAS PARADE
Gladstone: *2 issues 1988-1989*

Dell commissioned Christmas stories for a series of specials starring Disney characters published annually between 1949 and 1958, with Gold Key continuing the tradition in the 1960s with slimmer or reprint volumes. When Gladstone acquired the Disney licence they revived the Christmas specials, populating these 100-pagers with the best from previous volumes and other stories with a Yuletide theme (*Uncle Scrooge* 47 in 2). Both contain meaty chunks of Carl Barks material, but there's plenty to recommend them beyond that, with Al Hubbard's *Three Little Kittens* in 1 and Paul Murry's strips in 2 particularly delightful.~FP
Recommended: 1, 2

CHRISTMAS WITH THE SUPER-HEROES
DC: *2 issues, 1988-1989*

The first issue reprints a selection of special Christmas-themed stories from years ago. It proved such a hit that the following year DC issued all new stories, with an all-star line-up of creators and characters. There's Batman by Dave Gibbons and Gray Morrow, Superman by Paul Chadwick, Wonder Woman by Eric Shanower, Enemy Ace (he's a superhero?) by John Byrne, the 1960s Flash and Green Lantern teamed up by Bill Loebs and Colleen Doran, and Deadman by Alan Brennert and Dick Giordano. An Olympic-class medley of festive sentimentality, with not a turkey in the lot!~HS

CHROME
Hot: *3 issues 1986-1987*

This is a tantalisingly solid start to an unfinished series, written by Peter Gillis and pencilled by Kelley Jones. Two astronauts, one American and one Russian, are the guinea-pigs for a new technology intended to replace bulky spacesuits. They were completely covered in a flexible metal coating that blocked off their normal senses but conducted electrical signals so they could 'see' via video cameras, etc. Their shuttle crashed on re-entry, and there was only one survivor – but the coating won't come off, and no one's sure which man it is, and each side is insisting on their claim to him. It's original, intriguing and intelligent, as you'd expect from Gillis. Any chance of an ending?~FC
Recommended: 1-3

CHRONOS
DC: *11 issues 1998-1999*

Walker Gabriel develops the means to travel through time based on notes provided by DC's old villain, Chronos. With the technology he has a career in industrial theft, but discovers there are rules and setbacks to travelling through time. John Francis Moore creates a fallible, likeable and vulnerable hero, haunted by the death of his mother, and has the imagination to use the possibilities of time-travel without ever confusing. Paul Guinan and Steve Leialoha provide the art, proving equal to any time zone. That this intelligent comic never found a market when published shouldn't dissuade people from picking up the back issues.~FP
Recommended: 1-3, 5, 6, 9

CHRONOWAR
Dark Horse: *9 issue limited series 1996-1997*

When a communications satellite falls on a Tokyo apartment block, the lives of three people are transformed by what appear to be alien life forms. They attach themselves to a housewife, detective and murder suspect, who all begin to move a hundred thousand times faster than normal. An extended battle between the three, both physical and psychological, then takes place with the future of Earth at stake. Creator Kazumasa Takayama makes this interesting if not compelling. His artwork's reminiscent of Otomo's but his blending of flesh and machine is heading into Giger territory.~NF

CHUCK The Ugly American
Comic Library International: *3 Volumes (0-2) 2000-2002*

1 covers Chuck's adventures in Hell, where he meets Betty, Satan's wife. She falls in love with him and helps him escape, then sends him her pet, whose path of destruction has to be faced by his Townburg neighbours. Chuck, essentially, is big, ugly and hates everything. After killing Satan in the garden of Eden, however, he's also immortal. In 2, Redhat Industries hires Chuck and his mates to bring back toads from Peru to breed for their hallucinogenic properties. Local Incas try to sacrifice them, Betty, and mercenary Lana. Chuck mostly just complains until a neighbour, Lynda, is threatened at the end. 0 is a collection of stories from various anthologies, including a couple with Mr. Beat, one against a fly and in another, he's shrunken. Mike Bocianowski's stories are amusing, with occasional serious undertones, but essentially they're just slapstick fun.~NF

CHYNA
Chaos!: *One-shot 2000, one-shot ('II') 2001*

Stephen Grant and Mike Deodato produce competent action-adventures as the WWF fight queen embarks on a new career as a bodyguard for hire. Tolerable eye-candy.~WW

CINDER AND ASHE
DC: *4 issue miniseries 1988*

A superior action page-turner by Gerry Conway and José Luis Garcia-Lopez, rather lost in the shuffle when originally published. Certainly out of step with the contemporary DC line, there was no Vertigo imprint to see it reached the audience it deserves. Ashe is a Cajun vet complete with irritating accent, and Cinder is the result of a mixed marriage in Vietnam. They're now partners in a New Orleans problem-solving agency. Garcia-Lopez, rarely less than excellent, is at his peak for *Cinder and Ashe*. The art is warm and meticulous, and his flawless storytelling, flow and anatomy are a joy to see when distorted figures and pin-up pages are considered state of the art. The transitions between past and present are masterful and no matter what he's called on to illustrate, he does so in convincing fashion. Conway's also on top form, presenting intriguing characters and proceeding to fill them out and reveal their pasts during an investigation into pressure being placed on a local farmer. Lurking in the background there's the deadly and manipulative presence of a man believed dead for over a decade, and with a grudge against Cinder and Ashe. Excellent.~WJ

Caliber Presents CINDERELLA ON FIRE

Caliber: *One-shot 1994*

A young man's life is re-examined as he relates the journey from rejection to acceptance as a part of the gay scene. There's the obligatory queer-bashing Christians, although these are skinheaded, swastika'd Bible-misquoting Christians, and the equally obligatory "I Found My People"scenes, as Paris (our hero) exclaims "God, it's good to be young, black and queer in America!" On the whole it's jumbled and muddled and the spelling is so poor that the writer actually manages to twist the entire meaning of the story by declaiming that his spiritual home is an EXcepting rather than ACcepting place. It's all very worthy but has been done many times before and much, much better.~WW

CITIES OF THE FANTASTIC

NBM: *5 Volumes (The Great Walls of Samaris, Fever In Urbicand, The Tower, Brusel, The Invisible Frontier Volume 1) 1983-2002*

Francois Schuiten and Benoit Peeters produce fantasies unlike any other comic strips. They centre on the world of architecture, examine the notions of structure, how man reflects elements of himself in the buildings he erects. Pattern, diagram and symbolism play very important parts in the stories, which all feature fantastic cities or bizarre structures. Far more than in most strips, the pictures tell the story – in some senses they are the story, and many of the narratives are designed to explore both the landscape and concepts, rather than have a plot. The best entry point is probably *The Tower*, in which a man who looks after one section of a gigantic structure known only as The Tower decides to leave his appointed sector and explore the rest of his vertical world. There's something very medieval both about the thought processes and the worldview presented here, but others in the series, such as *Brusel*, are futuristic. Dense, multi-layered and crammed with detail, the Cities series repays serious study and repels casual readers.~FJ

Recommended: *The Tower, Brusel*

CITIZEN V and the V Battalion

Marvel: *3 issue miniseries 2000, 4 issue miniseries ('The Everlasting') 2002*

Fabian Nicieza stakes his claim as the new Jerry Ordway as he spins *Thunderbolts'* Golden Age supporting characters off into their own series. Citizen V, the grandson of the original, and his octogenarian cohorts spend most of their time acting like any other pensioners – moaning about how the world's not as good as it used to be (they fought in the war for us, you know!) and how better things would be if they were in charge. Considering they have the technology to achieve that end, moral dilemmas a-go-go abound as Nicieza weaves more of the grey area ethics and conspiracy intrigue that has won him many fans on *Thunderbolts*. The first series deals with V and co mopping up the mind-controlling nanites from their parent title, the second sees them further sticking their noses into other people's business around the world.~JC

Paul Auster's CITY OF GLASS

Avon Books: *1 Volume 1994*

Daniel Quinn writes detective novels about Max Work, under the penname William Wilson. One night he's contacted by someone who calls him Paul Auster and asks for his help. Intrigued, and already losing himself in his three current identities, he agrees to see Peter Stillman, nine years of whose childhood was spent locked in a darkened apartment as his father, also Peter, sought to prove his theories about the biblical fall of mankind and language. Now his father is due to be released from an asylum and Peter and his wife are afraid that he means them harm. Quinn/Auster stakes out Stillman when he arrives, trailing him around New York, as his walks form patterns that Quinn believes are linked to his theories. Then Stillman disappears and Quinn turns to the 'real' Paul Auster, in the belief that he's the detective that the Stillmans meant to hire instead of him.

Perhaps rather deceitfully labelled crime fiction, this is more an examination of language and identity, drawing on the literary games of Cervantes, with a tone taken from Chandler, Hammett and Cain, but no real aspirations towards a resolution of good versus evil. There are only broken characters revealed here on the lonely streets. Auster's tale, however, adapted by Paul Karasik and David Mazzucchelli, is stunningly realised by Mazzucchelli, in a style between his work on Batman and the increasingly abstract *Rubber Blanket*. Ultimately too calculated and detached, this is still impressive comics. Intended as the first of a series under the Neon Lit banner, only Barry Gifford's Perdita Durango followed.~NF

CITY OF SILENCE

Image: *3 issues 2000*

Every cyberpunk cliché is present and correct in this painfully 'hip' piece of futuristic tosh from writer Warren Ellis and artist Gary Erskine. The series is set in Stealth, a dystopian city "that survives on silence", where a trio of kinky, semi-naked bisex goth babes get called in to solve a case of "Satanic computer abuse". There's plenty of cynical dialogue, wearisome pop culture references and a bit of the old ultraviolence for those that like such things, but the comic's desperate need to appear cutting edge already makes it seem well past its sell-by-date.~AL

CLAN APIS

Active Synapse: *5 issue miniseries 1999**

Biologist Jay Hosler uses the familiar shorthand of comedy and adventure comics to provide an educational miniseries detailing the life cycle, anatomy, social structure and existence of a bee from birth to death. All bee life is here, rendered in an entertaining and accessible fashion, but if you have no inherent interest in learning about bees the charm of the comic will remain elusive. The collection also includes a short story about Hosler being stung by a bee for the first time (after completing the comic), and realising he was allergic to bee stings.~FP

CLANDESTINE

Marvel: *12 issues 1994-1995, 2 issue microseries (Clandestine Vs The X-Men) 1996*

A sadly truncated superhero epic created, written and pencilled by Alan Davis, ClanDestine tells the story of the Destine family, a centuries-old clan of superbeings who are forced to emerge from hiding after a number of their members are mysteriously murdered. Despite some occasionally clunky dialogue, Davis' wit, invention and meticulous artwork make this a pleasingly old-fashioned read. He sets up numerous tantalising sub-plots, introduces a number of well defined new heroes and villains, and slyly insinuates *ClanDestine* within the Marvel Universe. After creative differences caused Davis to quit the series with 8, new writer Glenn Dakin and artist Bryan Hitch totally lost the plot. Davis returned to tie up some of the loose ends in a rather ho-hum two-issue team-up with the X-Men in 1996. All the Davis issues are collected.~AL

Recommended: 1-8

CLASH

DC: *3 issue miniseries 1991*

Uncovering a machine that endows him with an ancient power, Joe McLash goes rampaging through a politically unstable Middle Eastern state, and when the superpowers sit up and take notice he ensures there'll be no further remonstrations. It's another of Tom Veitch's treatises on the corrupting consequences of absolute power, very nicely drawn by Adam Kubert, but saying very little in a loud voice.~WJ

CLASSIC X-MEN

Marvel: *110 issues 1986-1995*

Reprints of the enormously popular *Uncanny X-Men* from (an edited version of) *Giant Size X-Men* 1 (the first appearance of the new team) to 206. Short back-ups, initially by John Bolton, develop characters or throw a new perspective on events featured in the main story, ran until 44 and the title changed to *X-Men Classics* with 46. Much cheaper than buying the 'real thing'.~JC

CLASSICS ILLUSTRATED

Gilberton: *167 issues 1941-1962, 2 issues 1969*

Devised by Albert Kanter, who set up his Gilberton imprint in 1941 for the sole purpose of producing strip versions of popular classic literature, 1-34 were titled *Classic Comics*. When a new logo was sought in 1947 the title evolved to the more mature-sounding *Classics Illustrated*, but the adaptations still ran 68 pages, which wasn't much room for an entire novel. Gilberton's policy was to keep the majority of their titles in print, but sadly increasing paper costs led to a drop of twelve pages, and existing editions had pages excised or chopped up and re-pasted. The original linework covers became the opening splash pages of later editions, making way for painted covers and cutting the page count even further. First printings are often the only complete versions of these comics and are the most sought after. The earlier issues were assembled by whatever freelancers hadn't been drafted in 1941 but from 23 in 1945 the adaptations were edited and packaged by Jerry Iger and Ruth Roche's shop. The scripters included Antonia 'Toni' Blum and future EC editor and writer Al Feldstein, and there was a relatively limited selection of artists. Fifty of the ninety Iger produced Classics were drawn by either Alex Blum or H.F. Kiefer. Other artists included Maurice DelBourgo, August Froelich, Rudy Palais, Matt Baker, Ann Brewster, Bill Bossert and Bob Webb. The Iger shop often used more than one artist on a strip so sometimes just checking the bylines at the start of the strip can be misleading. A new editorial team lead by Len Cole took over packaging from 114 in 1954, and commissioned redrawn adaptations of earlier issues that had become nonsensical due to page reductions. 1954's introduction of the Comics Code Authority coincided with many big publishers closing, so there was plenty of willing talent available for the redrawn editions. Some are worth looking at, even if 1948's reduction to forty-eight page stories had made the scripts even harder to take seriously. Artists included Reed Crandall, George Evans, Gray Morrow, Gerald McCann, Lou Cameron, and Joe Orlando. A significant portion of Gilberton's sales were direct through schools, so the loss of a 2nd class mailing permit in 1962 was a major factor in their decline. The company had great difficulty staying afloat and could only issue reprints, while several completed stories were put on permanent hold. When the series ended they'd published 197 different Classic adaptations if one includes those redrawn.

1969's attempt to revive the series with 'In Freedom's Cause' and 'Negro Americans: The Early Years' flopped, and the title languished in relative obscurity until revived by First Comics. Its success can be measured, however, by the numerous copies of the idea by various publishers over the years. Issues of note include Lorna Doone in 32 by Matt Baker, the revised version of 35's *The Last Days of Pompeii* by Jack Kirby, *The Adventures of Cellini* in 38 by Froelich, the second version of *Julius Caesar* by Evans and Crandall in 68, *Green Mansions* in 90 by Blum, Graham Ingels drawing *Waterloo* in 135, *The First Men in the Moon* in 144 by George Woodbridge and chums, *The Conquest of Mexico* in 156 by Bruno Premiani, and two Gray Morrow adaptations, *The Octopus* (159) and *The Queen's Necklace* (165). *Classics Illustrated* may be an acquired taste, but there are plenty of American and British editions, as well as translations in 25 other languages, still in circulation thanks to Gilberton's reprint policy.~SW

CLASSICS ILLUSTRATED

Berkley/First: *27 issues 1990-1991*
Dark Horse: *2 issues (Dark Horse Classics) 1992*

This followed the established format in adapting literary classics for comics, acknowledging they aren't substitutes for reading originals, particularly as a shortened text is required in most cases. The poems of Poe illustrated by Gahan Wilson, the short stories of O. Henry and Ambrose Bierce and *The Rime of the Ancient Mariner* survive relatively unedited. It's with the hefty out of copyright 19th-century novels that there are problems. With no fluctuation from the uniform 44 pages, some works are more sympathetically abridged than others, and attempts to remain faithful to the source mean that many artists do little more than illustrate a text caption. Visual impressions being paramount, Classics Illustrated stand or fall largely on the quality of the art, and artists are generally well matched with their subject matter. Particular triumphs are Rick Geary's portrayal of Victorian England for *Great Expectations* and *Wuthering Heights*, and Peter Kuper's depiction of the industrial turmoil and tragedy of Upton Sinclair's *The Jungle*. Mike Ploog's rendition of *Tom Sawyer* is superb. Given the restrictions, most adaptations are of a reasonable standard, and some much better than could be expected. An appallingly drawn *Hamlet* and uninspired *Rip Van Winkle* are to be avoided, and while Bill Sienkiewicz's stunning art conveys the density of *Moby Dick*, it's not very accessible, surely contradicting an intention of the series.

First ceasing publication scuppered the project. Already completed adaptations of *Last of the Mohicans* by Gary Gianni and Jack Jackson's *20,000 Leagues Under the Sea* were published as *Dark Horse Classics* in 1992, but the advertised *Kidnapped* and *Around the World In 80 Days* never appeared. Although numbered in solicitations, there's no numbering on the covers of *Classics Illustrated*, hence recommended issues are listed by title.~FP

Recommended: *A Christmas Carol, The Fall of the House of Usher, The Gift of the Magi, Great Expectations, The Jungle, Through the Looking Glass, Tom Sawyer, 20,000 Leagues Under the Sea, Wuthering Heights*

CLASSICS PENETRATED

Aeon Press: *One-shot, 1996*

This sexually-orientated anthology has little to recommend it. No story is outstanding and all fail in their attempts to be either poignant or funny while talking about sex. Very much a comic for the creators' friends and family.~DB

CLAW the Unconquered

DC: *12 issues 1975-1978*

Like his contemporary Iron Jaw, DC's Conan wannabe had a gimmick to distinguish him from the numerous other beetle-browed barbarians littering the publishing schedules of the time, in this case a demon hand which, like Elric's runesword Stormbringer, acts to protect its owner whether he likes it or not. Otherwise Claw is an identikit character inhabiting a world that looks and feels just like Conan's, which is unsurprising with practised Conan artist Ernie Chua working on issues 1-7. Writer David Michelinie trots out all manner of monsters for Claw to conquer and throws in some eye-watering self-mutilation scenes for good measure, but the series remains undistinguished.~FJ

CLERKS:The Comic Book

Oni Press: *One-shot 1998, one-shot ('Holiday Special') 1998, one-shot ('The Lost Scene') 1999*

The continued exploits of the heroes from Kevin Smith's 1994 film *Clerks*, after a run-out in *Oni Double Feature* 1. Randal Grave runs a video rental business next door to Quick Stop, the late-night grocery run by his cousin Dante

Hicks. In the first comic the evildoers from Toast Comics berate Randal over the success of their Star Wars merchandise. Determined to get his own back, Randal reveals an underworld of monopolised toy stock to his cousin (who's just been paid). Lovable drug dealers Jay and Silent Bob manage to undermine whole scam, but not before Randall has exacted his revenge on Toast by playing the system. The Holiday Special features Randal's hallucinatory encounter with a down to earth Santa and his depraved helpers. Meanwhile Dante visits his catatonic ex-girlfriend Caitlin and acts on some of Randal's advice that does for candy canes what *Last Tango in Paris* did for butter. 'The Lost Scene' is one excised from the *Clerks* shooting script. The guys attend the viewing of a dead high school conquest at a funeral parlour. Randal's unease translates into him saying all the wrong things on Dante's behalf. The first two stories are chock-full of in-jokes courtesy of artist Jim Mahfood, while the third is drawn in a more realistic style by Phil Hester and Ande Parks, all over Smith's incredibly funny scripts. All three are collected as a paperback.~SW

Recommended: One-shot, 'Holiday Special', 'The Lost Scene'

CLICK!

Catalan: *2 volumes 1985-1992*
NBM: *4 volumes 1994-2002*

These are the adventures of the sexually inhibited Claudia Cristiani, a frigid woman whose husband implants her with a device to control her arousal operated by remote control. Or so it seems. When the control is stolen by infatuated surgeon, Dr Fez, Claudia's increasingly public sexual displays cause her husband to try to hide her in various out of the way destinations around the world, but Fez is always close behind her. The second volume is more explicit as the transmitter falls into the hands of Faust, who plays havoc with Claudia's life as a television presenter. In the third volume, Faust follows Claudia to the Amazon, where she is investigating a cult led by the Thaumaturgist, who, unnervingly, also acts as part of an extended metaphor about the exploitation of the Rain Forest. Dr Fez sells a second device to Deva Boralevi in the fourth volume. Deva's father is a victim suing for compensation from a chemical firm that Claudia's husband represents, but the subsequent bizarre plot takes in the fixing of a football match and the Convent of the Divine Spasm! Milo Manara's artwork is developed with each volume, as he experiments with line weight, inks and colour, but it's always beautiful to read. The stories themselves are mostly not to be taken seriously, often culminating in Benny Hill style chases, and Manara seems constantly to be trying to confound the expectations for eroticism. NBM reprinted the Catalan volumes in colour and also published a single volume collection of the first three.~NF

CLOAK AND DAGGER

Marvel: *4 issue miniseries 1983-1984, series one 11 issues, 2 Graphic Novels 1985-1987, series two 19 issues 1988-1991*

She's white, he's black, and they were runaways in New York when snatched from the street to be test subjects for narcotic substances. The pair escape, but they are oddly changed: he has acquired an enveloping, madness-inducing darkness (hence 'Cloak'), and she can emit cleansing, dazzling white light, and throw light-knives (hence 'Dagger'). Starting a mission to protect other runaways attracts the attention of Detective Bridget O'Reilly, who has no time for vigilantes. The miniseries portrays an interesting depiction of the early stages of a partnership, and although the characterisation is too thin to allow for any sustained or consistent arguments, writer Bill Mantlo gives it a good try. The artwork by Rick Leonardi and Terry Austin tells the story well, and supports the script in making the detective the most convincing and vibrant character.

The ongoing title picks up immediately after the miniseries, and the pair still have teething troubles, though there's barely a runaway child in sight. No, Cloak and Dagger have elected to help runaways indirectly, by fighting the drug trade, which means they never have to meet the brats, and they travel the world from 7 onwards. This change of direction takes away most of the comic's character, and it rapidly hops to the shelf marked 'Superhero Team (Generic)'. Bill Mantlo writes and Terry Austin inks throughout. Rick Leonardi pencils most of the early issues (1-6), but thereafter it's a different penciller every issue, including Mike Mignola (8) and Art Adams (9), a good choice for the story in that issue.

Bridging their first and second ongoing series, Cloak and Dagger starred in *Strange Tales*, where it was revealed that they owed their powers to their mutant natures. The new series has the title *The Mutant Misadventures of Cloak and Dagger*, and jumps into the middle of a storyline from *Strange Tales*, with Dagger on the side of the bad guys. 1-13 are written by Terry Austin and show a greater sense of humour than previously, with many storylines played solely for laughs. Austin's writing makes for a more entertaining read, but the characters are now very far removed from those two runaways, and surely the shelf marked 'Mutant Superheroes (Generic)' is crowded enough already? Marvel must have been asking the same question, since 14 brought an abrupt change of direction, with the first page giving a statement of their 'sworn' mission to protect others, and Detective O'Reilly is back (almost) as before. It's a relief to be back on track, thanks to writing from Steve Gerber and Terry Kavanagh, though by 17 the story is derailed and wildly out of control (goodbye, runaways – hello, demons). The final issue is a reinterpretation of Cloak and Dagger's origin story, which works well. There were many changes of art team throughout the series. The longest runs were Mike Vosburg in various capacities (3-11), and Rick Leonardi as penciller (12-16).~FC

CLOCK!

Zoo Arsonist Press: *2 issues 1997*
Top Shelf: *1 issue (3) 1998*

Collections of pieces of Paul Sharar, some single-pagers, with others of four pages or more. Mostly, it's a festival of misanthropy – a fast-paced, frequently inventive parade of cruelty, numbness and degradation. This makes the exceptions particularly striking, such as 'Yugoslavia' in 2, in which a Californian of Yugoslavian descent describes the images he's built up of a place he's never seen, making an unusual and vivid account of the processes of memory and immigration.~FC

Recommended: 2

CLONEZONE

Dark Horse: *One-shot 1989*

A spin-off from *Nexus*. Mike Baron scripts a tale of the reptile Hilariator (that's a crocodile stand-up comedian to you and me) as he attempts to regain his big time status by hosting a telethon for back zits. Neil Vokes and Jim Bradbury produce sound black and white illustrations for a very particular kind of humour strip. Enjoyable enough as long as you find coprophilia, women and doctors funny.~WW

CLOWN WITH A GUN

Caliber: *One-shot 1991*

Clown with a gun wanders about talking rubbish and feeling sorry for himself. Not an activity you'd think merits a comic.~DB

THE CLOWNS

Dark Horse: *One-shot 1998*

P. Craig Russell adapts Leoncavallo's opera *I Pagliacci* (The Clowns), although he departs from previous form by providing layouts for Galen Showman's pencils. It's a powerful tale of life imitating art as the wife of the lead performer in a travelling troupe is having an affair, mirroring the play they perform. The latter is all the more effective for concealing brutal emotion beneath clown make-up. This atmospheric adaptation won't meet all tastes, the chasm between opera and comics being too vast, but it's excellently considered and produced.~FP

Recommended

COBALT BLUE

Innovation: *One-shot 1989*

An old prospector uncovers a long-buried alien city containing the last survivor of an alien race. On the other side of town another city rises containing the last survivor of another alien race, mortal enemy of the first; and events take their course. For a story Mike Gustovich claims he waited ten years to tell, it's all rather silly and pointless.~WJ

COBALT 60

Tundra: *4 issues 1992**

Vaughn Bodé created endearing stories about a cartoon character wandering a post-atomic wasteland and having to fight for his survival at every turn. Twenty years later Vaughn's son Mark and Larry Todd continue the story, adding a complexity absent from the original. As the original stories are reprinted alongside it makes for an uneasy mixture.~FP

COBRA

Viz: *12 issues 1990-1991*

Cigar-smoking, superpowered outlaw Cobra criss-crosses the galaxy in search of a legendary treasure that turns out to be the ultimate weapon. The action never stops as Cobra is pursued by agents of The Guild, eager to claim this new weapon for themselves. Buichi Terasawa's original Manga (translated by Marv Wolfman!) is a lot of fun but never really transcends its space-opera conventions.~NF

COCAINE COMIX

Last Gasp: *4 issues 1975-1982*

Before Leonardo DiCaprio was born his dad George started Cocaine Comix, extolling the virtues of rich man's speed. The highlight of 1, and indeed the run, is the art of Brent Boates, although like almost everything else published here, the story is slim. Five years elapsed between 1 and 2, to which, retroactively, Jim Valentino is a surprise contributor. The best issue overall is 4, by virtue of the variety, with well drawn strips from Carol Lay and Curtis Cim, neither having much to do with the topic at hand, and Scott Shaw.~FP

CODE BLUE

Image: *1 issue 1998*

The story is set at Highland ER, a small Hospital run by Jayeen 'Chicken' Michaels and her staff who have to deal with the results of an inner city bombing. Author Jimmie Robinson's artwork and story are very accomplished. The layouts (4 horizontal panels per page) suggest that this may have begun life as a TV or film storyboard. Good characterisation, consistency and flow in both the art and writing go a long way to making the somewhat mundane subject matter appealing. One wished for more, even if the blurb on the back cover describes the pages as 'beautifully illustrated in stunning water color' when they obviously had their tones applied with grey markers.~SW

CODE OF HONOR

Marvel: *4 issue miniseries 1997*

An attempt at a sequel to *Marvels*, this series follows the career of a cop in the Marvel Universe, and his perception of the strange and mysterious super-beings who live in his world. Chuck Dixon's script isn't strong enough to make us care about the protagonist, and the multiple artists, most of whom are still in the "I'm in love with Photoshop" stage of their careers at this point, deliver an inconsistent, washed-out mess.~HS

CODENAME: DANGER

Lodestone: *4 issues 1985-1986*

There are some interesting creators involved in this superhero/spy series but it's not their best work by any stretch of the imagination. Kyle Baker (2), Paul Smith (3) and Paul Gulacy (4) never really manage to raise any sparks from the scripts, dialogue at least being provided by Robert Loren Fleming in all issues.~NF

CODENAME: KNOCKOUT

DC/Vertigo: *24 issues (0-23) 2001-2003*

Hmmm... what a delicious cocktail (shaken of course) of espionage and sex. Novelist Robert Rodi goes over the top with this wonderful satire of the spy genre. A knockout? You betcha! Ahh...poor Angela St.Grace/Devlin has to divide her loyalties between her mother who heads G.O.O.D and her father who leads E.V.I.L, aided and abetted by her outrageous gay sidekick, Go-Go Fiasco. Don't you just love the subtlety? The series begins with 0, which sets the mood as Angela rescues a bound Go-Go, but the action starts in earnest in 1-3 as Angela gets to grip with her parentage. Will she be G.O.O.D or E.V.I.L? Before we find out, 4 flashbacks to how our sexy bundle of joy came about, spotlighting her super-spy parents, and more family secrets are revealed in 15. On a similar theme 13 offers a gem of a story set in 1932 featuring Angela's grandmother, and yet another enjoyable flashback in 8 offers a glimpse of Angela's somewhat unorthodox Swiss finishing school. The things those girls have to learn! Keeping with international settings our dynamic duo head off to Africa (6-7), and it's off to Siberia in a sex-slave-trade episode in 10-12. England gets the Rodi treatment in 14, introducing yet another organisation, H.E.A.V.E.N, and two of their operatives who bear remarkably similar attributes to Angela and Go-Go. Also bearing similar attributes are various clones and dark family secrets. Don't just expect silly stories with a spy theme, though as Rodi is clearly having a ball casting characters and creating situations that lift this beyond just simple satire. The series is also blessed with wide, varied and wonderful art by the likes of Louis Small, Mark Farmer, Yanick Paquette, Amanda Conner, Jimmy Palmiotti, Ed Benes and John Lucas. They all know how to draw a gorgeous body – oh, forgot to mention all the gratuitous nudity – both male and female. No sign of genitalia, but never mind.~HY

Recommended: 0-4, 8, 13, 14

Antarctic: *4 issue miniseries 1997*

Some attractive linework by Essad Ribic is wasted on a dystopia in which Scorpio is a renegade policeman who sides with humans left behind on Earth to serve as the organ bank for an orbiting Council. Ribic's mix of pencilled and fully inked artwork doesn't always work and Miki Horvatic leaves too little space for plot developments between the action scenes.~NF

CODENAME: STRYKEFORCE

Image/Top Cow: *15 issues (0-14) 1994-1995*

Taking their name from their leader, Stryker, who was also a member of Cyberforce for the duration of this series, Strykeforce was a team of mercenaries that also included Kill Razor, Black Anvil, Bloodbow and Tempest. Created and written by Marc Silvestri and drawn by Brandon Peterson, the first two story-lines provide the team with a base in an ex-Russian nuclear submarine and see them join Stormwatch in battle against invading aliens, the Shu'rii. The series takes an unusual turn here as Bloodbow is killed and replaced by one of the aliens, who betrays her own kind to help the team. It is the revelation of this secret that precipitates the break-up of the group in *Cyberforce, Strykeforce:* 'Opposing Forces'.

The creative team is a little unsettled after 8, but 10 sees Steve Gerber take over the scripts and Billy Tan Mung Khoy the artwork. With well-thought-out stories that were really just beginning to explore the characters, Strykeforce never quite got things right. The series wavered between humour and seriousness but was always entertaining. 0, the team's origin, actually appeared after 14.~NF

COFFIN

Oni Press: *4 issue miniseries 2000-2001*

Dr Ashad Ahmad is a researcher into after-life phenomena who builds a device to categorically disprove the concept of the soul. Imagine how he feels when he's murdered and wakes inside his own device, which he calls The Coffin. He embarks on a quest to atone for all the evil he's done when alive and also prevent his family from becoming victims of the immortality obsessed millionaire who killed him. Compelling metaphysical drama from Phil Hester and Mike Huddleston.~WW

---

* Available in a collected edition

COLD BOOM

Caliber: *One-shot 1997*

The peculiar descent of Marilyn, sensitive to the point of telepathy as her obsessive fascination with Adolph Hitler draws her into his world, into his dreams and perhaps into his grip. She knows what he loved, she sees what he saw as the bullet entered his head. Will she experience the last thing the Furrier felt... the Cold Boom? Chilling science fantasy from Jon Proctor.~WW

COLLIER'S

Fantagraphics: *4 issues 1991-1994 (1-3), 1998 (4)*
Drawn & Quarterly: *1 issue + 2001 to date*

With initially limited cartooning skills, David Collier provides extended slice of life stories in 1-3 that largely fail to engage or stimulate. The best of them is 3, recounting the life of Native American chief Grey Owl, who has a more complicated history than at first seems to be the case and was later the subject of a David Attenborough film. The fourth issue, though, is a big step forward, a charming and affectionate scattershot biography of Collier's grandfather. The art has greatly improved, and don't be put off by the largely inappropriate Ditkoesque cover. The first Drawn & Quarterly issue a is warm tribute to a troubled friend, and one-time mentor, displaying the contradictions and complexities of his character.~FP

COLONIA

Colonia Press: *8 issues + 1998 to date*

Captain Cinnabar and his pirates rescue Jack and his uncles, Peter and Richard, fresh out of Massachusetts, from a shipwreck. Then Jack meets Adarro, the old man-of-fish, a talking duck called Lucy, and a mermaid, and realises that he's not in his own world anymore. Jack's ability to communicate with these creatures sets him apart, but remains a mystery. Amongst other differences explored by Jeff Nicholson's alternative history, are the facts that there were no Native Americans before the continent's discovery and that Drake didn't stop the Spanish Armada. To save their lives, the trio manage to convince Cinnabar and more pirates, Anne Reed and Bonnie O'Malley, that they can lead them all to the treasure of Colonia Norte. 1-5* set the scene before the group set out to explore mainland America. Nicholson's artwork is weak on facial expressions, but his storytelling is compelling and the world he's created offers many pleasures.~NF

COLOR

Print Mint: *One-shot 1971*

Conceived as storyboards for an unmade film, this has the distinction of being the first colour underground comic. As one would expect from noted psychedelic poster artist Victor Moscoso, this digest-sized comic looks ravishing, but is rarely troubled by anything approaching a story.~DAR

COLORS IN BLACK

Dark Horse: *4 issues 1995*

An agreement with film-maker Spike Lee resulted in this affirmative-action title giving new creators the chance at a wider audience. Resolutely uncommercial covers and the odd title probably dissuaded many people from sampling this anthology, which is a shame as there's plenty of good material. Each issue is loosely themed, with 3's examination of crime being the best, and if the writing occasionally hammers a point home in obvious fashion, there's also depth, subtlety and warmth. Sarah Byam and Gil Ashby's 'Larry Can't Wash It Off' in 2 is a fine, understated exploration of personal identity, and one has to wonder why Ashby's engaging watercoloured pencils and artists of the calibre of Greg Simanson haven't been seen before or since.~FP

Recommended: 2, 3

COLOSSUS

Marvel: *One-shot 1997*

The ex-X-Man who can turn himself into steel teams up with *Excalibur*'s Meggan for a light-hearted adventure in a thinly-disguised Disneyland Paris. Old enemy Arcade – a hitman who uses games and theme parks as his weapons – runs them through a gauntlet which is by no means deadly in a predictable and thrill-free ride. Excellent artwork by Bryan Hitch and Paul Neary fails to offset Ben Raab's soporific script.~WW

COLUMBUS

Dark Horse: *One-shot 1992*

An unflinching biography of Christopher Columbus, written by Starlen Baxter and illustrated by Jack Jackson. The script deals primarily with Columbus' genocidal governorship of Haiti and insane beliefs about his divine mission on Earth. Jackson's artwork is detailed and brings the often harrowing events to life. Though not written by Jackson, here as in other examples of Jackson's work, the concentration on the bare narrative can leave the reader aware of the facts but without any wider understanding of their relevance.~NF

COLVILLE

King Rat: *1 issue 1997*

A short story by Steven Gilbert, set among high school kids in Colville, Ontario, and apparently based on fact. David is an aspiring comics creator who has already had one close encounter with the law, but the next job that's suggested seems so trivial, and the thousand bucks would be so useful, especially since he has plans for self-publishing... The artwork looks crude at first, but shows its strengths as we see more of the characters, since Gilbert is very good at conveying personality and emotions. It's an atmospheric, chilly story that's short on surprises, but effective.~FC

COMBAT

Image/Extreme: *2 issue microseries 1996*

A menace that apparently terrorised the universe for millennia, eventually killing the old Gods, is defeated by Youngblood's alien bezerker and a female F.B.I. agent who electrocute it in Las Vegas. Someone didn't put on their thinking cap.~WJ

COMBAT KELLY

Marvel: *9 issues 1972-1973*

Combat Kelly was a relatively successful title for Marvel's early 1950s incarnation, lasting 44 issues. This revival of the World War II platoon of ex-cons, led by the Combat Kelly of the title, is notable for the addition of a female member. It doesn't get any more interesting than that except for the final issue, in which Marvel, giving a nod to the realism of combat, killed the lot of them.~WJ

COMCAT Graphic Novels

Although they were intended as the junior arm of Catalan Communications graphic-novel enterprises, many adult readers will find some Comcat graphic novels of interest. Their output consisted of four series – *Young Blueberry*, *Code XIII*, *Yoko*, *Vic and Bob*, and *The Magic Crystal*, plus the first volume in an intended series, *Kogaratsu*.

The three *Young Blueberry* graphic novels ('Blueberry's Secret', 'A Yankee Named Blueberry' and 'The Blue Coats') were produced in 1969 and 1970 by Charlier and Giraud at great speed while working on the regular *Blueberry* strips, and tell the story of how Blueberry became a hard-bitten sergeant in the army. A certain simplicity in plotting and use of open pen work (as opposed to the usual brush detail Giraud employed for the regular strip) gives them a hurried feel. If you like Blueberry you'll get something out of these, although they're appallingly coloured.

Code XIII is a series of thrillers by J. Van Hamme and W.

* Available in a collected edition

Vance that show no sign of being produced for children. The first volume sets the tone for the later pair: a man is washed up half-dead, unable to remember who he is or how he got there. Befriended by a young couple, he has to flee when people start trying to kill him. With no clues to his identity but a tattoo on his shoulder reading 13 and the address on the back of a photo he doesn't recognise, he sets off to discover his identity. Whoever he is he knows a lot about killing, as evinced by the way he polishes off various agents of the mysterious Mongoose. The art's extremely tight and detailed, and the scripts are highly competent thrillers.

The three-volume *Magic Crystal* saga ('The Magic Crystal', 'Island of the Unicorn' and 'Aurelys' Secret') by Moebius and Marc Bati is a fantasy based on philosophical principles shared by the two creators, and drawn in a simplified version of their styles. Another series that was actually created for children is the adventures of *Yoko, Vic and Bob* by Roger Leloup. Two volumes appeared, 'Vulcan's Forge' and 'Three Suns of Vina', both cheerful juvenile adventures in the Jules Verne mould. The first features a mysterious undersea race and 'Three Suns' sees them battling an evil scientist and his robots on a distant planet.

Finally *Kogaratsu:* 'The Bloody Lotus' (1990) is a historical drama set in feudal Japan, written by Bosmans and drawn in a cod-Japanese print style by Michetz. Real Manga, fresh and dynamic, made the series rather pointless and it was not picked up when Catalan stopped publishing.~FJ

COME OUT COMIX

Portland Women's Resource Centre: *1 issue 1974*

As the title suggests, this is an autobiographical comic about coming out by Mary Wings. While the art is undeniably crude, the story remains gripping and eminently readable.~DAR

Recommended

The COMET

DC/!mpact: *18 issues 1991-1992*

This Mark Waid-scripted revival of the silly old Mighty Comics superhero started off with jolly stories about carefree orphan Rob Connors' youthful attempts to fit the novelty of superheroics in with his journalist girlfriend and his ambition to make a career in baseball. It's all rather reminiscent of early Spider-Man stories. The series gradually became more serious as it revealed that the Comet's corny 'electrical charge' origin wasn't true and hid a nasty tale of alien experimentation. Unusually, the story has a very firm conclusion in the last issue and makes some curious moral points on the way about blood ties, selfishness versus selflessness, and corrupt sex-partners. The Comet is also a focus of *Crucible*, the series tying up all loose ends of the !mpact titles.~GK

Recommended: *7*

COMET MAN

Marvel: *6 issue miniseries 1987*

An astronaut is destroyed by a comet, but reincarnated with amazing powers. Returning to Earth he faces the duplicity of his best friend, the abduction of his son and the death of his wife. Graced with striking Bill Sienkiewicz covers and strikingly bad interior art by a neophyte Kelley Jones, this was the attempt of actors Bill Mumy and Miguel Ferrer to add to the Marvel Universe. Never mind.~HS

COMIC BOOK

Comics Conspiracy: *9 issues + 2001 to date*

A surprisingly successful and sustained joke about a generic earnest superhero under simple (different) one colour covers bearing only the title, issue number and price. Doug Miers' scripts are witty pastiches, and penciller Amilton Santos is good enough to be drawing the real thing. Try 3's encounter with a scantily-clad female villain, or the collection of 1-5.~FP

Spümco COMIC BOOK

Marvel: *1 issue 1995*

Dark Horse: *2 issues 1996*

There's always a problem with John Kricfalusi's animated shows, the most famous being *Ren and Stimpy*. While magnificently designed and animated, some are gut-bustingly funny, while others leave one scratching one's head going "Wha..?". If the latter permit the former the ratio is high enough that it's fair exchange, and so it is with the *Spümco Comic Book*. The comic uses the same contrasts as Kricfalusi's animation, switching from line drawings to painted panels for effect, and with madcap illustration from Kricfalusi, Mike Fontanelli and Jim Smith on the oversize format (12" x 9") it looks great. The main characters are Jimmy The Idiot, a slavering retard, and the redneck good ol' boy George, a man's man, and the best place to start is with Jimmy's gut-busting chase for an elusive quarter in the second Dark Horse issue. Rarely is the spirit of animation so successfully transferred to comics. While the portrayal of Jimmy is bound to offend some, others will find the depiction of bodily functions gross, so be warned. In a fine show of moral hypocrisy, Marvel, the company that publishes superheroes willing to eviscerate or kill on a monthly basis, apparently decided Kricfalusi's work was too distasteful, prompting the move to Dark Horse. It worked out better for all concerned, with a $1 reduction in cover price and better paper to boot.~WJ

Recommended: Marvel 1, Dark Horse 1-2

COMIC LIBRARY INTERNATIONAL

Comic Library International: *10 volumes 1999-2002*

George Broderick's solution to a comics industry slump was to publish all-ages trade paperback anthologies in the hope of reaching areas not serviced by standard comics. Ten volumes indicates success. Despite good cartooning, the early issues have too much whimsy and too little substance, with a generous page count merely encouraging contributors to extend meagre plots with big figures in big panels. Happily there are exceptions. Broderick's own work is always welcome, and there's plenty of it in each issue. In 1-5 it's funny silent strips about superhero Stardust and his dog Thor, which are now collected in a single volume. There is the impression of Scott Roberts also plotting by the seat of his pants, but he's good enough that his story of a former movie star and a stuntwoman engages throughout (1-5). Chris Yambar's strips have their moments, from 3 Wes Alexander's 'Stormfield' has a real professional polish as a newspaper gag strip about two kids, and the work of Derek Drymon from 4 is also very good.

From 6 editorially imposed themes encourage more discipline, and the individual volumes are titled, respectively *Giant-Size Itsy-Bitsy Comics* (funny animal), *Big Space Comics*, *Wild Adventure Comics*, *World's Greatest Christmas Comics* and *Off the Wall Adventures*. Mr Beat is present from the start and is joined from 6 by other strips familiar from elsewhere including Chuck *The Ugly American*, *The Hoon*, *Roswell*, and *Astounding Space Thrills*, the latter two in 7 only. Broderick and Yambar team-up on the very funny adventures of El Mucho Grande, a legendary mysterious masked Mexican wrestler in 7-9, and there are two charming restored Walt Kelly Christmas strips in 9. Scott Roberts contributes three absolute gems to 10, one of them a Spirit pastiche, but it's otherwise a weaker issue. Overall there's little thought-provoking, but from 4 on the entertaining material generally outweighs the disappointing. After 10 the decision was made to cancel this series and instead focus efforts on the production of volumes spotlighting particular characters.~FP

COMICO CHRISTMAS SPECIAL

Recommended

Tex Avery's COMICS AND STORIES

Dark Horse: *4 issue miniseries 1996*

One of four Dark Horse titles featuring Tex Avery characters, *Comics and Stories* has writers like Scott Shaw and Mark Martin, but neither seem to be inspired by the antics of Bad Luck Blackie or Meathead and Screwball Squirrel. Jay Stephens comes closest to matching the appearance of the cartoons (see, for example, 'Son Of King Size Canary' in 3) but overall the title's nowhere near as interesting as a video of the cartoons themselves.~NF

COMICS' GREATEST WORLD

Dark Horse: *12 issue limited series 1993*

Dark Horse introduce a new line of superheroes in this action-packed tour guide to four areas of their new world. Steel Harbour is the best observed, a run-down industrial city home to Barb Wire, The Machine and Motorhead, all of whom graduated into their own series (and Wolf Pack, who didn't). Golden City is clean and safe the way cities used to be, run by Amazing Grace and her team of superpowered agents including Mecha, Rebel and Titan. Arcadia's administration is corrupt to the core and home to X, Ghost and the lesser known Pit Bulls and Monster. Aliens observe in each four-issue arc (one per location) before homing in on the desert area of Cinnibar Flats, finding Division 13, humans who've been mutated through exposure to something emanating from The Vortex. It's the Vortex that's the crux of the slim plot uniting the stories, and *Out of the Vortex* continues the mystery. There's some excellent artwork, particularly Chris Warner on X, Adam Hughes on *Ghost* and Paul Chadwick's *King Tiger*.~WJ

THE COMICS JOURNAL Special Edition

Fantagraphics: *2 volumes + 2002 to date*

After twenty-five years *The Comics Journal* is a precious institution that publishes the most insightful reviews and probing interviews to be found concerning English language comics. Pugnacious and tempestuous, it vigourously pursues excellence, according all else short shrift. This offends many whose work is deemed below par, but if the occasional misguided enthusiasm and sometimes gratuitous baiting are the prices paid for the remainder, it's an equitable trade. In 2002 the *Journal* began publishing broadly themed anthology coffee-table books. The second volume is more satisfying overall, the first containing as much polemic as interviews and essays. In 2 more so than 1 the latter are accompanied by generous helpings of vintage comic strips along with appreciation, recalling Fantagraphics' old Nemo magazine. The new work covers cartoonists (1) and music (2). Space restrictions don't permit a complete contributors' listing, particularly as only Linda Medley and Kim Deitch, both in 1, and Ho Che Anderson supply over three pages, and most restrict themselves to one or two. There is a group of creators that the publisher draws on, and suffice to say, all expectations are met, yet there are some surprising submissions. It's nice, for instance, to see Dave Sim contributing an appreciation of Alex Raymond and Gary Panter's detailed doodling in 1, while P. Craig Russell produces a three page biography of the neglected composer Korngold for 2. The music issue is the more varied, with contributors talking about music, musicians, being musicians, meeting musicians (Carol Lay), fantasies about musicians and the effect of music. The cleverly constructed rhyming couplets of Ted Jouflas accompanied by his distorted paintings are a highlight, while there's a good story from Justin Green in 1, in which Phoebe Gloeckner's rant contains some truths. Special mention must be made of the covers from interview subjects Joe Sacco and Jim Woodring. Neither has much relevance to the theme, but they're both stunning pieces. A 2003 volume spotlights patriotism.~FP

Recommended: 2

COMICS LIT

NBM: *12 issues 1995-1996*

This serialised and previewed NBM's graphic novels and story collections. It's all black and white, so some of the strips painted for colour book publication come out looking rather murky. Particularly badly affected are Bo Hampton's watery nineteenth-century vampire nonsense 'Verdilak' (1-6) and David Wenzel's charming 'Snow White' (3-5). P. Craig Russell's adaptation from *The Jungle Book*, 'The Spring Running' (6-8), has some very pretty Mowglis, but to read it you need to be able to stand Rudyard Kipling's absurd prose. Extracts from Rob Maisch's 'Confessions Of A Cereal Eater' (1, 2) tend to contradict the publisher's claims that Maisch has had an amazing life, and Jacques Tardi's hilarious Adele Blanc-Sec story 'The Two Headed Corpse' (10-12) is unfinished by the last issue. Andreas's occult 'Rork' (10-12) and Miguelanxo Prado's pretentious quasi-porno power struggles in 'Tangents' (8-10) are both well worth avoiding. Most issues (4-11) have an amusing couple of Ted Rall's vox pops 'The Worst Thing I've Ever Done' but the best strip is Andre Juillard's 'The Blue Notebook' (2-9*), an elegant and complicated modern thriller full of romantic obsession, betrayal, and coincidences.~GK

Recommended: 2-9

COMICULTURE

Mad Science Media: *1 issue + 2002 to date*

A group of former Marvel creators banded together to produce this *Heavy Metal*-lite style anthology. There's an admirable diversity of genres covered, and no-one lets the side down. On the other hand, assessing the strips presented so far, there's nothing compelling either, although as further chapters appear (and a second issue is three months overdue as of writing) this could change. Don Hudson draws a decent western strip, and Steve Buccellato showcases an admirable diversity on two very different strips, but top of the class so far due to a novel approach and great cartooning is Jessica Wolk-Stanley's eccentric autobiographical piece.~FP

COMIX BOOK

Curtis: *3 issues 1974-1975*
Kitchen Sink: *2 issues (4-5) 1975*

A bizarre idea. Superhero publishers Marvel note the popularity of underground comix five years after everyone else, so decide to produce one of their own. But hey, just in case those crazy underground cartoonists include sex and drug use in their work why not put it out under another imprint? Despite the warped logic of wanting to absorb something successful, but only if it can conform to their corporate standards, *Comix Book* manages to entice a fair number of the underground greats over five issues. It's a patchy anthology, though, with only Howard Cruse, John Pound, Sharon Rudahl and Skip Williamson consistently approaching top form, although Art Spiegelman previews *Maus* in 2. The marriage between Marvel and the underground appears to have ended over the matter of creators' rights, so Kitchen Sink published material already commissioned for the following issues. Ironically and entirely coincidentally they're the best of the run, with 5 a real quality package. In addition to Cruse, Pound, Rudahl and Williamson there's good stuff from Bob Armstrong, Leslie Cabarga, Gary Hallgren, Richards and Murphy; and Justin Green finishes the very odd 'We Fellow Traveleers' started in the first issue.~FP

Recommended: 5

COMIX INTERNATIONAL

Warren: *5 issues 1974-1977*

These are collections of the colour stories from Warren's regular horror titles (*Creepy, Eerie, Vampirella, Spirit*). In 1 all the artwork is by Rich Corben, whose style and colours are lush to the point of claustrophobia and can induce queasiness with the most innocuous scene, let alone when he's depicting a face pecked raw by gulls (grisly photo-realism in 5). From 2 onwards, there's a mixture of artists, and the variety is welcome. The writing is always competent, and the artwork well above average, but few of the stories really stick in the mind. The best is Berni Wrightson's 'Muck Monster' from 2. It's yet another version of *Frankenstein*, but beautifully done.~FC

Recommended: 2

THE COMIX OF TWO CITIES

Aeon Press: *6 issue miniseries 1996*

Abstruse strips by Matt Howarth, largely concerning the inhabitants of a planet where the population developed into two distinct species. These beings were created by members of the equally abstruse rock band The Residents, and prods at the music industry are a feature throughout, as are the beings slipping into characters from old American situation comedies, and Howarth's inventive alien life forms. This makes the comic sound far more interesting than it actually is, and the average reader's patience will have worn thin far before the end of the first issue.~FP

COMIX 2000

L'Association: *1 volume 1999*

A truly grand gesture to celebrate the millennium, the two thousand-page *Comix 2000* contains the work of three hundred and twenty-four authors from twenty-nine countries. The brief was that the strips must have no dialogue and so be universal, though many use pictorial dialogue, with a general theme of the 20th Century. An initial problem with this is the almost overwhelming use of surrealistic and dream imagery instead of narrative storytelling. Creators like Max Andersson, Edmond Baudoin, Mariana Chiesa Mateos, Julie Doucet & Max, Kazuishi Hanawa and Michel Pirus may do this in an interesting manner, but there's a distinct sense that the prescription against dialogue has made for a limited choice of storytelling techniques, with only one attempt at a biographical approach, for instance. Apart from these largely symbolic visions, humour is the most common aim of the strips, though many contain a mix of several elements. Despite this, there are many examples of historical or political analysis (Jean-Francois Caritte, Eric Drooker and Kakouwo are among the best), horror (including the ever reliable Hideshi Hino), slice of life (Julie Graux) and others. Two other highpoints amongst all this: Lewis Trondheim managing to squeeze one hundred and seventy-one panels into his two pages and Zou telling a story with brand names as dialogue. The introduction suggests that the final contents were selected from seven thousand pages, but the absence of many better-known creators is notable. Clearly, this was always going to be about the 'independent' creators (there are no superheroes and few straight genre pieces), but perhaps it should have been two thousand creators rather than two thousand pages. This is not to say that Comix 2000 is a failure. There are a large number of terrifically illustrated strips in almost every cartooning style, from clear line to punk scrawl. It's just that it's probably best to borrow a copy first before deciding to buy one.~NF

COMMIES FROM MARS

Last Gasp: *6 issues 1982-1987*

Largely second-rate underground title produced periodically by Tim Boxell. The name comes from a repeated satirical strand in which Martians have invaded earth and are trying to spread their Communist ideals among an unwitting populace. Each issue also had a separate theme (passion and romance in 4, crime in 5). Later issues contain excellent work by Hunt Emerson and Peter Kuper.~NF

Lee Marrs discourses not only about farting, but also sweat, zits, snot, earwax, menstruation, dandruff, semen and urine, in an hilarious fake-educational guide to secretions, emissions and excretions, whose charm and wit belies its coarse subject matter. Neither the topic nor Marrs' rounded, earthy style will appeal to all, but broad-minded readers will forgive the gross-out humour because, over all else, it's bloody funny!~HS

COMPLETELY BAD BOYS

Fantagraphics: *1 issue 1992*

A collection of J.R. Williams' *Bad Boys* strips, as the recalcitrant youths taunt and torment their playmate Fatty and generally get up to no good. At times they can be hilarious, but as the strips spread over eight years from their first appearance there's a wide difference in tone, with the sanitised version prepared for possible newspaper syndication totally disembowelled. Williams' goofy cartooning is brilliant throughout, though.~WJ

CONAN the Adventurer

Marvel: *14 issues 1994-1995*

A short-lived *Conan* title, set in his youth, to tie in with the animated TV series of the same name. Roy Thomas churned out reliable but slight single-issue stories, drawn by Rafael Kayanan, who seemed to have picked up on a lot of superficial rendering schticks from Barry Smith's work on the character in the 1970s. Sadly this is without the necessary accompanying design and storytelling skills.~GK

CONAN the Barbarian

Marvel: *294 issues, 12 Annuals, 5 Giant-Size, 1 Treasury 1970-1993*

For many years almost any issue of Conan provided reliable entertainment, but it never quite matched its enormous early promise and certainly hobbled along in a horribly drawn-out decline during most of its final decade. Conan was created in 1932 by pulp-magazine writer Robert E. Howard and is the most famous sword-and-sorcery character, a genre almost unknown in the comic format before this successful attempt. The genre consists, very basically, of simple heroes wandering about primitive civilisations battling supernatural enemies such as monsters and wizards, usually winning through using a combination of brute strength, bloody violence and dumb luck.

The character presented in comics by Roy Thomas and the young British artist Barry Smith (now Windsor-Smith) didn't match one's idea of a typical barbarian. With his nice long hair and clean bare chest the lithe young Conan looked like no one so much as Jim Morrison of The Doors before his dissipation. The art on the first half-dozen issues, like all Smith's early comics, is notable only for its huge debt to Jack Kirby's work, but he soon began to experiment with sets of congruent frames in which each picture differed only slightly from the last. This quasi-cinematic technique, often emphasised by the absence of word balloons or captions, is derived from the work of the EC artist Bernard Krigstein, probably, in Smith's case, via Jim Steranko's 1960s Marvel work. Simultaneously, Smith, aping his favourite painters, started packing his panels with ornate detail. Thomas, who is rarely less than competent, responded with increasingly ambitious prose, and even some of Howard's atrocious poetry. Such obviously carefully crafted dramatic comics had not appeared in the USA since the heyday of EC in the early 1950s.

Smith drew 1-24 (apart from 17-18, by Gil Kane). Many won industry awards and are widely regarded as classics. 11's 'Rogues in the House' is a good representative story. Conan is jailed thanks to his treacherous girlfriend Jenna. He swaps his freedom, stopping only to do something quite appalling to Jenna, for a hit job on a corrupt priest whose house has been taken over by his King Kong-like friend. Ultraviolence ensues. 'The Song of Red Sonja' in 24 shows the style taken right over the top. All inquisitive readers will want to try these early Conans, though they may find Smith's figures stiff and over-decorated and Thomas's captions florid and pompous, if not unfaithful to Howard. The team's best work on the character was the 'Red Nails' sequence, originally published in black and white magazines but reissued in colour in the 1980s *Conan Special Edition* and, to great advantage, at very large size in Marvel Treasury Edition 4 (1975), which also includes 'Rogues in the House'.

Thomas decided from the start that each year of the comic would cover a year in Conan's life, which caused the comic, while he was writing it, to be sometimes crammed with decent stories, as in the first twenty issues, and at other times rather short of them. There were some good ideas for filling gaps Howard had left, such as teaming Conan with Michael Moorcock's Elric of Melnibone in 14-15. Unable to use Howard's often superior stories of the older Conan and lacking the rights to the books written by other authors, Thomas later resorted to adapting *Kothar the Barbarian* novellas by Gardner Fox, who was better suited to science fiction.

John Buscema took over the art from 25. He'd been the original choice of artist, but Marvel were unwilling to match his page rate on an untried title where extra expenditure was already being incurred in paying for rights. Once aboard, though, he drew most of the next 165 issues. His Conan was much brawnier than Smith's, looking for the first time as though he really could lift and swing the heavy swords and axes he needed so often. Buscema was consistently good, usually inked by the reliable Filipino artist Ernie Chua (later known as Chan), though he couldn't help looking rather plain after Smith's baroque excesses. Most issues from 25 to 56 are unexceptional, though 37, gruesomely violent in places, is a good Howard adaptation by Gil Kane and Neal Adams, reprinted from the black and white magazine *Savage Sword of Conan*. Conan's only interests are sex and violence and he doesn't much like conversation, so the stories require good supporting characters other than the procession of cruel kings, mad wizards, grasping merchants and treacherous whores. They don't often get them, though. The introduction of Red Sonja in 23, lifted and rejigged by Thomas from one of Howard's non-*Conan* stories, was popular. She persistently refuses Conan's advances, reflecting the early 1970s atmosphere of female liberation. Tara, the tomboy acrobat who appears in 52-57, is also not a bad character. These issues reintroduce 11's crooked nobleman Murilo, now turned mercenary. 57 is beautifully drawn, in his slightly cute style, by Mike Ploog, and events therein force Conan to leave the comforts of the city for a while.

58-100 are among the most interesting of the run. Derived, remarkably, from a single Howard short story, they cover the three years Conan spent in what was, for him, a relatively mature relationship with Belit, Queen of the Black Coast, leader of the Black Corsair pirates. These issues differ from most others in having a long running supporting character, and in deviating from the usual Western-derived Conan settings of dusty plain, wooded riverside and tavern in the town, by being largely set on sailing ships. Belit is a much more convincing cast member than the silly Red Sonja (who, for contrast, also appears), and issues from this period are a refreshing read. Buscema continued to draw most, inked at first by the excellent Steve Gan, and from 70, by Ernie Chan again.

The 'Black Coast' story was marred by many fill-ins, though the two stories reprinted from *Savage Sword* (in 78 & 87) are good. The first is a classic pairing with Red Sonja, notable for some of Buscema's best art. Beware 79-81, drawn by a young Howard Chaykin. There are some curious things in later chapters, such as big blue lions and men riding on eagles, but the conclusion in the double-sized 100 is touching and quite eerie. Thomas was unable to match this standard before leaving with 115 in 1981. J.M. DeMatteis took over the writing, introducing a couple of clownish kid sidekicks, which doesn't make for good reading. Gil Kane was back as artist from 127, a sad tale that he also inked, notably, as in the remainder of his issues to 134 he's saddled with poor inkers and Bruce Jones' scripts are riddled with inappropriate wise-cracking dialogue. Buscema returned to the art with 135, but seemed to have lost interest unless able to ink his pencils himself. The stories became formulaic and there was no overall direction.

146 is a pleasant exception, written by Mary Jo Duffy. A drunken Conan is teamed up with three young wizardesses with personalities like Josie & The Pussycats. Reader reaction was polarised. Michael Fleisher, who wrote from 150, simply rehashed old single-issue story ideas, though everything improved for 155-159 as John Buscema plotted the comic, endowing a flavour of the Thomas years. Fleisher then reverted to the formula of having Conan, riding alone, perhaps talking to his horse, alerted by cries and rescuing a string of witless female characters from various gangs of evildoers. In 172 Jim Owsley introduced Tetra, a new, and continuing, resourceful female character who turned out to be a witch-queen, and she seemed to inspire Buscema's drawing. Owsley wrote a good story full of twists and political intrigue, and some excellent dialogue, some of which was about Conan not saying certain things. Buscema's final issue was 190, and he was replaced by Val Semeiks, who tried initially a little too hard to be like Barry Smith. The now multi-charactered story climaxed well in 200. After Owsley's departure *Conan* became chaotic in the hands of various old hacks until 232, which, with a cover pastiching that of the first issue, returned to Conan's youth in the frozen north. The nine issues set there look very rough by contrast with the first few from 1970.

Roy Thomas returned with 241 and wrote off all the stories since he'd left as a busy but inconsequential couple of years for Conan. The rapidly improving, and soon superb, Mike Docherty was the most expressive artist since Buscema, and, with a Falstaffian foil for Conan called Hobb providing light relief, the comic was an above-average read until cancellation. A great many of the first ten years' Conan stories were reprinted in ninety-eight issues of the excellent black and white magazine Conan Saga, with annotations and some new Smith covers, published from 1987 onwards.~GK

CONAN Graphic Novels, miniseries and one-shots

Marvel: *2 issue microseries ('The Movie') 1982, 2 issue microseries (Conan The Destroyer) 1985, Graphic Novel ('The Witch Queen of Acheron') 1985, graphic novel (Conan The Reaver) 1987, graphic novel ('The Horn of Azoth') 1990, graphic novel ('The Ravagers of Time) 1992, one-shot (Conan vs Rune) 1995, 3 issue miniseries ('The Usurper') 1997-1998, 3 issue miniseries ('The Lord of the Spiders') 1998, 3 issue miniseries ('River of Blood') 1998, 3 issue miniseries ('Return of Styrm') 1998, 3 issue miniseries ('Scarlet Sword') 1998-1999, 3 issue miniseries ('Death Covered In Gold') 1999, 3 issue miniseries ('Flame and the Fiend') 2000*

By the middle of the 1980s Conan was a rather tired character and concept, but that didn't stop Marvel issuing four graphic novels devoted to Robert E. Howard's barbarian hero. All but one are no more or less deserving of the 'deluxe' format than any other Conan comic. However, Conan the Reaver, written by Don Krarr, gives us a rare chance to sample the commanding artwork of comics great John Severin in an extended format with better printing, and for that reason alone is worth acquiring. Two Conan movie adaptations are very ordinary, with definitive Conan penciller John Buscema drawing.

The monthly *Conan the Barbarian* comic finally ceased publication in 1993, but the hardcore Conan audience was still willing to pay for more of the same old-same old so a new monthly Conan title arrived in 1995. At first written by Larry Hama and drawn Barry Crain, it featured possibly the worst creative work ever seen on this character, and boy is THAT saying something. 10 is notable for the art of Alcatena, but after two further issues it was cancelled, to be followed by a succession of miniseries, beginning with 'The Usurper'. By this point, there was almost nothing new to say about Conan as character, icon, or genre archetype, so most of the creative teams involved settled for comfortable, professional mediocrity. Roy Thomas returned to pen 'The Lord of the Spiders' and 'Scarlet Sword', both pencilled by the ho-hum Stefano Raffaele, and 'Flame and the Fiend', the last of these miniseries to date. 'Death Covered In Gold' turned out to be the final Conan collaboration between Thomas and the late John Buscema, neither of them sadly at their best.

To end on a high note, *Conan vs. Rune* marked the first time that original Conan artist Barry Windsor-Smith had drawn the character in a comic since the early 1970s, and his artwork had improved in the interim. Windsor-Smith's wry script pitches the barbarian up against his new tortured vampire anti-hero, and includes an astonishing amount of gorgeously rendered blood'n'guts.~AL

Recommended: *Conan the Reaver, Conan vs Rune*

CONAN THE KING

Marvel: *55 issues 1980-1989*

Known as *King Conan* for 1-19, this double-length comic delineated the mighty barbarian's late middle age after he had become King of Aquilonia and taken the harem girl Zenobia as his bride, a period not covered by his creator, Robert E. Howard. Their son, Prince Conn, was showcased, either behaving recklessly, requiring rescue action from Dad, or inquisitively requesting from old buffers tales of his father's past bold strokes.

1-4 adapt L. Sprague deCamp and Lin Carter's *Conan of Aquilonia* stories and 5-8 Sprague de Camp and Bjorn Nyberg's novel *Conan the Avenger*. These eight, by Roy Thomas and John Buscema, are all good, if a little dense. Other seemingly less interested creators, including writers Doug Moench and Don Kraar and artists Mike Docherty (not doing his best work) and Geof Isherwood, slogged on but there is not an interesting issue in the rest of the run. This is not the place to start with this character. Try *Conan The Barbarian* instead.~GK

CONAN THE SAVAGE

Marvel: *10 issues 1995-1996*

Marvel cancelled *Savage Sword of Conan* and swiftly replaced it with this, also a black and white magazine, featuring rather similar stories to those that would have appeared in its forerunner. It includes contributions from the likes of Roy Thomas and John Buscema, although the work of both seems rather weary after so many years producing Conan stories, Chuck Dixon and Rudy Nebres. There doesn't seem to be any discernible difference between the two titles. So, if you liked *Savage Sword of Conan*...~FJ

CONCRETE

Dark Horse: *10 issues, 1 Special 1987-1989*, one-shot ('Earth Day Special') 1990, 4 issue miniseries ('Fragile Creature') 1991-1992*, 2 issue microseries ('Eclectica') 1993, 4 issue miniseries ('Killer Smile') 1994*, 6 issue miniseries ('Think Like a Mountain')1996*, 5 issue miniseries ('Strange Armour') 1997-1998**

Paul Chadwick is hardly the world's most prolific cartoonist, but each of his *Concrete* stories is well thought out, gripping, and has a point. Although some may find the eco-sensitivity of his later books annoying, he points out both sides of the argument and presents enough information to allow readers to make their own minds up, in an action-packed format. His artwork is precise but flowing, centred around meticulous hatching and modulated use of heavy and fine line. His occasional weakness for cosmic splash pages is more than balanced by the simple, but expressive way he draws his central character, who has all the visual charm of a boulder.

Having débuted in early issues of *Dark Horse Presents*, by the solo series, Concrete had evolved into a comic about character. Its first thought is: How does Ron Lithgow, his brain transplanted into a huge, alien cyborg, feel about being near-invulnerable but trapped in a body he doesn't understand, unable to touch, unable to have sex, but capable of walking along the sea bed for an hour or climbing Everest unaided? Throughout the series, Concrete is finding out more about himself both in terms of physiognomy and emotions. Scientist Maureen Vonnegut, who's been assigned to carry out continual testing on his body and whom he soon falls in love with, is key to both channels of exploration. Concrete sets out both to earn a living and to do things ordinary men cannot. In the 1989 colour special he is hoaxed by two artists into thinking the aliens who created him have returned. In 'Fragile Creature', he takes a job on a fantasy film to defray the increasing costs of being a huge rock monster living in a fragile world. 'Killer Smile' is a change of pace as Larry Monroe, his aide-de-camp, is kidnapped by a couple of psychotic teenagers on the run. Chadwick's answer to *Natural Born Killers*, it's both funny and insightful, getting behind the romance of killing. The 'Earth Day Special' introduces a number of devices Chadwick routinely employs in later series, such as drawing landscapes showing what's beneath the ground as well as above it. His stories are more monologues on preserving the earth, while Charles Vess contributes some illustrations to random selections of Thoreau and Moebius turns in a long, wordless tale of two explorers encountering a new, alien civilisation. In 'Think Like a Mountain' Concrete is involved with an Earth First! expedition to save virgin forests in Washington State, at first as an observer and then, comically, as a fake Bigfoot. Each 'Eclectica' contains a couple of short, humorous strips and a series of watercolour paintings, done as commissions, in which the influence of Moebius shows strongly. Finally, in 'Strange Armour' Chadwick revisits Concrete's origin to retell in detail what we're already familiar with. Pleasant, but not earth-shattering.~FJ

Recommended: 1-6, 'Fragile Creatures' 1-4

CONCRETE JUNGLE The Legend of the Black Lion

Acclaim: *1 issue 1998*

Terry Smalls is the son of a hero of the Black Panther Movement, but he's as corrupt as his father was. In fact the premise of this tale is that everybody is on the take, which makes for some excellent writing from Christopher Priest, as the likeable community activist becomes the focus of attention of the Cult of the Black Lion. An intriguing beginning for this spin-off from *Quantum and Woody*, sadly curtailed by the closure of Acclaim's publishing division.~WW

CONFESSIONS OF A CEREAL EATER

NBM: *Graphic Novel 1995, 4 issues + 2000 to date*

A good rule of thumb with autobiographical comics is: if you're going to talk the talk, you have to have walked the walk. The problem with 'Cereal Eater' Rob Maisch is that he possibly has not lived enough. The choice material, tales of high-school, B-movie has-beens and *Star Trek* conventions, is used up in the graphic novel, which boasts very handsome artwork by the Hampton Brothers, Rand Holmes, and the ever wonderful Sandy Plunkett. The comics dwell on anecdotes rather than stories, and suffer accordingly. With art by Scott Hampton's talented but raw art students, it is a less satisfying read.~DAR

THE CONFESSOR

Dark Matter Press: *1 issue 1996*

There are standard horror elements to this, but primary creator C.D. Regan was obviously setting his sights a lot higher, with some subtlety and characterisation accompanying the horrific events. Thrown into the mix are a small girl who's witnessed a black magic sacrifice, a tortured child psychologist and a lunatic fundamentalist christian who believes he has a mission to repel demons from Earth. The art is too dark, and shaky in places, but this was nonetheless a promising, but stillborn, debut.~WJ

CONGO BILL

DC: *7 issues 1954-1955*

Various stories, typically two or three per issue, featuring "ace adventurer" Congo Bill and his sidekick Janu the Jungle Boy. It's a shame they're such boring, pompous characters since work has clearly gone into this comic. The Nick Cardy art is clean and attractive, and the stories involve plots rather than just a succession of fight scenes. Admittedly, they're not compelling plots and they usually hinge on some piece of jungle lore that Congo Bill reveals only at the end, and in that smug, plonking way that makes you want to thump him. The most interesting aspect of the comic is probably the large number of stories involving film-making. They appear in nearly every issue and make it clear that *Congo Bill* grew out of the Saturday serials. Was the comic consciously trying to convince people that *Tarzan* was shot in the Congo and not in California?~FC

CONGORILLA

DC: *4 issue miniseries 1992-1993*

Starting in *Action Comics* from 248 in the late 1950s, Congorilla was a means of attracting interest to the near moribund Congo Bill strip. Jungle explorer Bill acquired the ability to transfer his consciousness into a giant golden gorilla, while being tied tightly to a tree by a scantily clad jungle boy. The latter part was essential to the ritual as the gorilla transferred its consciousness into Bill, leading to much hijinks and boffo yocks. This fine concept was revived in *Swamp Thing* Annual 3 's guest appearance, handled there with as straight a face as possible. Sadly thereafter the Golden Ape of the Jungle was revived for a grim'n'gritty miniseries. Incoherent where it wasn't merely stupid: the resultant mess proves that not every old character can be successfully spin-doctored.~HS

CONJURORS

DC: *3 issue miniseries 1999*

In this Elseworlds tale, the Phantom Stranger, having stolen the powers of magic from ancient demons at the dawn of mankind, may now be all that stands in the way of their return. Variations on some of DC's supernatural heroes, plus the Challengers of the Unknown and Ted Kord, man of science, are on hand to help. Chuck Dixon's depiction of a world that runs on magic is not entirely convincing, but he's good at this sort of action adventure and Eduardo Barreto's artwork has the right period feel.~NF

CONQUEROR

Harrier: *9 issues, 1984-1985, 1 Special 1987*

Initially a gag twist-ending strip in the fanzine *Bem, Conqueror* was extended to a full-length strip as Harrier Comics spun-off from *Bem*. After an initially favourable response, the suspiciously familiar adventures of the spaceship 'Conqueror' and her motley crew had a certain musty charm, helped considerably by the sedate artwork of Dave Harwood, whose renderings gave a very 1950s, *Boy's Own Paper* look to the series. There was also one issue of a companion title, Conqueror Universe, which was stretching the idea a little too thin.~HS

CONQUEROR OF THE BARREN EARTH

DC: *4 issue miniseries 1985*

Once humanity has colonised the universe attentions are turned back to the home planet. By this time Earth is a ravaged wasteland populated by assorted human mutations. Cadet Jinal is assigned to recover the planet wearing folded down thigh boots and a nice blue short skirt in an ordinary sword-and-sorcery romp with a dubious moral subtext. The series débuted in *Warlord* 63.~FP

CONSPIRACY

Marvel: *2 issue microseries 1998*

X-Files meets *Marvels*, as reporter Mark Ewing is given information that seems to indicate that all the founding heroes of the Marvel Dynasty gained their powers as the result of a massive conspiracy by a military, corporate and scientific cabal. An intelligent story by Dan Abnett that leaves matters just open enough for questioning, and grotesque, but appropriately so, painted artwork by Igor Kordey, with a perceptive use of colour to suggest the various time periods involved.~HS

CONSTRUCT

Caliber: *6 issue miniseries 1996*

Verbose yet obscure story of a future dystopia larded with *Brave New World* riffs and haunted by ethereal victims of a faulty teleportation system. Paul Jenkins would do better at Marvel.~HS

CONTEST OF CHAMPIONS

Marvel: *3 issue miniseries (Marvel Superhero Contest of Champions) 1982*, 5 issue miniseries (Contest of Champions II)1999**

In 1982 two competing squads of superheroes had to locate a golden globe. The Collector will be returned to life should Grand Master's team win. They don't, but neither the editor nor any of the omnipotents present notices and it's welcome back, Collector. It's a very ordinary precursor to the crossover titles that were to strangle Marvel for a decade. The return was altogether more logical and satisfactory, with dynamic pencils from Oscar Jimenez (1-3, 5) and Michael Ryan (4, 5), and a better plot, if wordy script, from Chris Claremont in which all Marvel superheroes are abducted, mentally adjusted by nanites and forced to battle each other. An interactive element permitted fans to decide some outcomes, and the fights are well contrasted with Iron Man's role as the sole hero to deduce the truth and his efforts to mount a resistance.~WJ

COOCHY COOTY Men's Comics

Print Mint: *1 issue 1970*

To date this is still the only solo title by Zap regular Robert Williams, and it contains some of the most obsessively detailed artwork and truly bizarre subject-matter ever seen on the printed page. The fact that the lead story is titled 'Coochy Cooty and the Gorilla Women of the Third Reich' speaks volumes. This is not a comic for everyone, but for a certain type of reader it's an absolutely essential purchase.~DAR
Recommended

COPS

DC: *15 issues 1988-1989*

Doug Moench does his best to instil some sort of sophistication into a comic developed to showcase yet another toy at a time when, in place of the bar code, comics sold through comic shops got "DC Comics aren't just for kids!". The Central Organization of Police Specialists consists of different law-enforcement stereotypes with big guns fighting against villains with names like The Big Boss, Dr Badvibes, Buttons McBoomboom and 'Junior' Berserko. Pat Broderick's unrealistic style doesn't help much. The Bart Sears issues (3 and 4) are a better attempt at humanising the plastic policemen.~NF

COPYBOOK TALES

Slave Labor: *6 issues 1996-1997**

Jamie and Thatcher are aspiring comics creators hoping to make it big with their property, "Maskman", but Jamie keeps finding himself distracted by his teenage journals – his copybooks – in which he recorded the day-to-day lives of himself and his friends. Eventually, he decides to try an autobiographical comic inspired by these diaries. Switching the narrative between the present day and the 1980s, writer J. Torres invokes a sense of nostalgia and naïveté that, while touching and endearing, is ultimately depressing, as Jamie becomes preoccupied by his wrong decisions and missed opportunities. Tim Levins' art is very good at conveying emotion, but his practice of drawing everyone with round, childlike features makes it occasionally difficult to immediately distinguish between the 'then' and 'now' segments. This is particularly the case when Torres has tried a clever-clogs Alan Moore-esque transition with someone starting a sentence 'then' and a similar phrase ending 'now'. It's not a major drawback, but it is a definite speed-bump in the reader's enjoyment. Read them, by all means; they're bloody good. But be prepared then to waste half a day in melancholy reflections of your own roads not taken.~HS
Recommended: 1-6

Sandman Presents THE CORINTHIAN

DC/Vertigo: *3 issue miniseries 2001-2002*

The setting is the grandeur of 1920s Venice just before the annual carnival. You've got a lead character who's trying to become a serial killer, and whose eyes are small pairs of teeth. So, how dull can it be? Sadly, extremely. When the start of issue precis has to explain the significance of what you've just read in the previous issue, someone's not doing their job properly. Ponderous and pretentious, the king is in the altogether.~WJ

CORMAC MAC ART

Dark Horse: *4 issue miniseries 1990*

Uninspired Roy Thomas adaptation of four of Robert E. Howard's *Cormac Mac Art* stories. Tying them into one storyline may have seemed like a good idea to avoid repetition but there's too much plot to get a decent feel for the character. E.R. Cruz's artwork is static and lacks any real sense of atmosphere. If you must know, the late 5th-century warrior fights druids, Picts, monsters and gods when hired to find the kidnapped daughter of a British chieftain.~NF

CORN FED Comics

Cartoonists Co-Op: *2 issues 1972-1973*

An early solo title from the inimitable Kim Deitch, *Corn Fed* features his 'usual' mixture of midgets, aliens and 'America's favourite psychic detective' Miles Mycroft. The stories frequently revolve around a nostalgia for the 1920s and 1930s and old entertainers of various sorts. Deitch was to go on to greater things, but there's certainly much to enjoy here.~DAR

Recommended: 2

CORNY'S FETISH

Dark Horse: *One-shot 1998*

Corny lives with his small dog. Attracted to the sadness of his neighbour, whose husband he watches die in a garden accident, he tries to communicate with her, building a tableau from a stuffed bird, modelling clay and papier-mâché, and sending her a hand-made chocolate squirrel (from his shop, 'Corny's Chocolate Universe'). The tableau takes shape and direction from vivid dreams of his neighbour and own dead wife, but he neglects his shop and keeps missing his son's visits, his obsession growing. Renée French's simple, yet precise, drawings beautifully evoke the simple desperations of loneliness, and the whole is suffused with melancholy and compassion.~NF

Recommended

CORPORATE CRIME COMICS

Kitchen Sink: *2 issues 1977-1979*

A good mixture of contemporary and historical corporate-sponsored injustices, union-bashing, swindling and tragic lack of concern for basic employee safety. Some, like the case of Karen Silkwood, have since become well publicised, others have been forgotten. Sadly, the message conveyed is that those with enough money can get away with anything.~FP

CORTEZ and the fall of the Aztecs

Tome: *2 issue microseries 1993*

Cortez led the Conquistadors who conquered most of South America on behalf of Spain in the 15th century. The comic itself is interesting, and obviously a labour of love, but feels like an educational tool rather than fun, mainly due to the detail and pages of background text.~DB

CORTO MALTESE

NBM: *8 volumes 1986-1990, 7 issue limited series ('Ballad of the Salt Sea') 1997-1998*

The Harvill Press: *2 volumes 1996*

Hugo Pratt's *Corto Maltese* books, originally published in Europe, are among the most gripping adventure yarns ever told in the comic format. They're the adventures of a mysterious Maltese sailor who seems to wash up wherever history is being made in the early years of this century, from the Easter Rising in Ireland to the Russian Revolution. What distinguishes them from even the best American adventure strips like *Terry and the Pirates* is a philosophical depth and a sense of creative exploration. Corto exists in a world full of fantastic possibilities, and doesn't question meeting Oberon and his fairies in Ireland or having mystical experiences among the cabalistic courtyards of old Venice. But while *A Midwinter Morning's Dream* has its whimsical fairies, it also successfully explores a difficult issue like the founding of Sinn Fein in a way rarely seen in popular literature.

Corto also exists very much in a 'real' world, full of accurate detail, meeting historical characters in books like *Corto in Africa*, a complex exploration of the breakdown of empire in North Africa, full of Lawrence-like agitators, foreign spies, hard-pressed British soldiers and independence-minded natives. By propelling Corto into the centre of the conflict, Pratt can explore the various viewpoints using significant characters such as the mercurial young warrior Cush. Pratt was a great traveller, and based many of the details of his stories around his own experiences, producing hundreds of sketches on his journeys that would later bring his strips to life, commenting sagaciously on the cultures he was presenting in his introductions (sadly omitted from these editions). Corto travels the world in the last possible days of true adventure, before World War II destroyed the glamour, beginning in 'Ballad of the Salt Sea', which NBM only released as a series (UK publisher, The Harvill Press, however, published this and The Celts). Pratt never explains him, never reveals all the secrets. His agenda is often inexplicable, selfless heroism followed by self-seeking machinations. Is he hero or anti-hero? His behaviour is generally better than the extraordinary cast of characters he becomes involved with, but that's not saying much. Throughout the series, from which there are a lot of longer stories still un-translated, Pratt is refining his cartooning style in the same way that Alex Toth pared his down over the years – from pretty basic to complete minimalism. Influenced by the broad brushwork of Caniff and Roy Crane, among many others, there is a rough edge to Pratt's artwork even at its most polished. By *Corto in Siberia*, a long and extremely rewarding chase across Russia by train in search of a hoard of smuggled gold, there is a vast gulf between the foreground figures, drawn by Pratt, and the background details (cars and trains) by his assistants. They almost look as if they've been cut out of a book and pasted in. *Fable of Venice* is the first Corto story in his mature style, expressionistic, ornately patterned, with form often reduced to vague shapes. It also reflects a change in approach to plotting in which actions become even more oblique and the exploration of ideas comes to the fore rather than sitting within a plot-driven structure. But it's also a cracking Masonic mystery in which Pratt draws upon childhood memories of visiting Venice's Jewish quarter to conjure up atmospheric alleyways, hidden gateways guarded by magical symbols and secret societies within societies. Read *Corto Maltese* and you're reading the work of a master storyteller, magnificent in his confidence.~FJ

Recommended: *Corto in Africa, Corto in Siberia, Fable of Venice, A Midwinter Morning's Dream*

Michael Moorcock's The Chronicles of CORUM

First: *12 issue limited series 1987-1988*

Corum is one aspect of Michael Moorcock's 'Eternal Champion' series: the sole survivor of an elder race, he doesn't escape his encounter with the Mabden unscathed. Luckily, he's given a replacement eye able to see into other dimensions, and a replacement demon's hand, which prove both boon and curse. Adapting *The Knight of the Swords* and its two successors at four issues apiece, Mike Baron's scripts never really humanise Corum in any fashion, and the feeling is that those who've not read the original novels might be left scratching their heads. It doesn't stand in the way of a good story, though. The highlight of the run is the magnificent Mike Mignola artwork, particularly as inked by Kelley Jones in 3-6. Although Jones remains to ink succeeding pencillers Jackson Guice, Ken Hooper and Jill Thompson, none match the elegance of Mignola's finely rendered pages.~WJ

Recommended: 3-6

THE COSMIC BOOK

Ace: *1 issue 1986*

After long careers of producing comics for others, Pat Boyette and Fred Himes decided to produce their own. Despite printing what are probably the last two pages of science fiction art Wally Wood produced, and a three page Alex Toth rant on UFOs, it's Boyette's art that shines here, dramatic and full of life, with a stunning pirates centrespread. Himes' story is the best, though, about the perversion of a world, with the first two pages the best use of colour in an otherwise very poorly coloured comic.~FP

COSMIC BOY

DC: *4 issue miniseries 1986-1987*

Legion of Super-Heroes co-founder Cosmic Boy and his significant other Night Girl become trapped in the twentieth century. They have an inconclusive scuffle with the Time Trapper, and find their way home with the plot continued in *Legion of Super-Heroes*. Cos comes across as an amazingly liberated guy who's not threatened by his girl-friend's vastly superior strength, but that's the sole, and accidental, interesting aspect.~HS

COSMIC ODYSSEY

DC: *4 issue miniseries 1988-1989**

Complete gobbledygook in terms of what's meant to be happening, but Jim Starlin's characterisation makes for a surprisingly successful read, and Mike Mignola's artwork (after early reminders of Walt Simonson) is splendidly appropriate. The Anti-Life Equation is discovered to have sentience and a desire to return to the universe that contains Earth, New Genesis and Apokolips. Darkseid and High Father decide to recruit a band of superheroes to battle the four aspects of the Equation that are threatening four planets – Earth, Rann, Thangor and Xanshi – the destruction of any two of which will cause a cosmic upheaval which will destroy the galaxy. Why this will happen is nonsense, and Starlin wilfully disregards what is already known about Jack Kirby's Fourth World, let alone facts about characters as diverse as The Demon, Dr Fate, Orion and John Stewart. Mignola's efforts deserved better.~NF

COSMIC POWERS

Marvel: *6 issue miniseries 1994*

Oddly structured limited series essentially comprising solo tales of various cosmic entities. A framing sequence dictated by Thanos links all the stories and takes centre stage in the first and last issues as he pulls strings around Terrax, Jack of Hearts, Ganymede, Legacy, Morg and Tyrant. Ron Marz writes and Various Artists pencil forty pages of story per issue with as much substance and reading-time as a regular twenty-page comic, owing to the profusion of double-page spreads and single-page panels. Exceptional artwork would merit the format. This doesn't. Plots go through the motions. 4 starring Legacy, the 1990s Captain Marvel, is the pick.~APS

COSMIC POWERS UNLIMITED starring Silver Surfer

Marvel: *5 issues 1995-1996*

Thick, glossy, sixty-four page mothers weighing in at a hundred grams apiece. Each issue anthologises two or three cosmic tales, many spotlighting the newer generation of cosmic heroes: Kismet, Sundragon, Ganymede and Xenith. More established entities such as Silver Surfer, Quasar and Beta Ray Bill ensure a blue-chip feel. The largely unconnected stories are scripted by Many Writers and pencilled by Even More Artists. It is a sad reflection on the series that the traditional Silver Surfer, Thanos and Captain Marvel openers in 1 stand head and shoulders above the subsequent newer concepts. Describing these as ordinary would be unwarranted flattery and the Lunatik short in 3 leaps out as an appallingly blatant *Hitch-Hiker's Guide to the Galaxy* rip-off.~APS

COSMIC RAY

Image: *2 issues 1999*

The only seemingly original idea in this unably drawn pompous and feeble hodgepodge of private eye and science fiction clichés is that of North and South Dakota united as one state. Please pardon uncontrollable excitement.~GK

THE COUGAR

Atlas: *2 issues 1975*

Dull genre title about a stuntman who sees off a vampire, then a werewolf. The blurb for issue 3 promised "the most devastatingly different superhero of all time", and for once there might have been truth to the claim since the Cougar broke his spine in 2. Alas, the third issue was never published.~FP

COUNTDOWN

WildStorm: *8 issue limited series 2000-2001*

Countdown begins intriguingly enough with a group of flawed humans given super-powers seemingly at random. There is a point and purpose, though, but a left turn into space-opera halfway through while good for team bonding, loses the few unique qualities the title has. This is by no means a bad series, and plenty will enjoy it, but there are many better.~WJ

COUNTER-PARTS

Tundra: *3 issue miniseries 1993*

A wealth of interesting concepts and a surfeit of alliterative dialogue characterise this strange story about a future where personalities can be switched and replaced. When composite body parts from an experiment gone wrong assume their own agenda, allying themselves with rebels, the social structure begins to collapse. Obviously not to be taken seriously, there are amusing moments but by and large *Counter-Parts* is too clever for its own good, sacrificing coherency and structure for each opportunity to include another pun or whimsical thought.~FP

A COUPLE OF WINOS

Fantagraphics: *One-shot 1991*

Adapted from one of the autobiographical short stories collected in *South Of No North*, Charles Bukowski's low-key slice of dirty realism really is about a couple of winos – two unnamed drifters who get work laying railway tracks, before blowing their meagre wages on whores and booze. The Moebius-influenced line-style of German artist Matthias Schultheiss perfectly captures Bukowski's bleak view of human nature.~AL

Recommended

THE COURAGEOUS PRINCESS

Antarctic: *One-shot 2000*

There's great delicacy and charm to this traditional-style fairy tale concocted by Rod Espinosa. The Princess Mabelrose grows up loved and happy in a small kingdom, discovers the pretensions of the city are not for her, is captured by a dragon and escapes. The bare bones of this plot are delightfully filled in by Espinosa, using the standbys of the genre, and this is a rare comic with appeal to all ages (apart from teenagers).~WJ

COURTNEY CRUMRIN AND THE NIGHT THINGS

Oni Press: *4 issue miniseries 2002**

Ignored by her shallow parents and spurned by her classmates, Courtney develops her own company while showing an interest in her allegedly infirm Uncle, a wizard. She also has an affinity for goblins, demons and other such creatures. Ted Naifeh's magical fantasy has elements in common with both *Scary Godmother* and the works of Roman Dirge in its whimsical look at the supernatural, but the most obvious touchstone is the dark children's tales of Edward Gorey. Every issue is self-contained, and likely to have broad appeal to anyone out of their teens or not quite there yet.~WJ

Recommended: 1-4

COUSCOUS EXPRESS

AIT/Planer Lar: *Graphic Novel 2002*

Couscous Express is the name of the award-winning restaurant run by motormouth sixteen year old Olive's parents. When it looks as if they're being shaken down she has her petty criminal boyfriend intervene. Brian Wood writes a very good slice of urban adventure with a distinct narrative voice, that would transfer very well to film, which makes it a shame that Brett Weldele's sparse art sucks so much of the life from it. Muddy panels, sketchy features, and flat effects combine to distract from the story. Take a flick through, and if you can live with the art you'll be rewarded.~FP

COUTOO

Dark Horse: *One-shot 1994*

Collected from its appearances in *Cheval Noir* (8-11), *Coutoo* is a strange thriller about a murderer who's been killed but whose spirit keeps moving on. A detective whose father killed Coutoo (meaning 'knife') is assigned to the latest slayings and begins to find odd clues to the real nature of the killer and his father's recent illness. Illustrated and written by Andreas in a style that's looser and more experimental than his *Rork* stories, this is atmospheric and nicely done but, in the end, lacks depth.~NF

COVEN

Awesome: *6 issues 1997-1998, one-shot ('Fantom Special') 1998, one-shot ('Black & White') 1998, series two 3 issues 1999, one-shot ('Dark Origins') 1999*

Avatar: *2 issues (½-1) ('Spellcaster') 2001, 3 issues (½-2) ('Dark Sister') 2001, 2 issues (½-1) ('Tooth & Nail') 2002*

The Coven consists of Fantom (half-human vampiress), Scratch (Catholic priest possessed by a demon) and Blackmass (leader, descendent of Cain). 1-4 deal with the recruitment of Spellcaster (white witch with owl familiar) and Phenomena (can tell when trouble's coming) and the attempt by the villainous Pentad to resurrect Cain using five Christ-held objects. A story set in New Orleans featuring Fantom's brothel and a race of goblins follows, but isn't concluded. The 'Fantom Special' introduces Fantom's werewolf brother, Kristophe. 'Black & White' showcases Fantom, Phenomena and Scratch in short stories, while the second series begins guest starring Supreme. 'Dark Origins' is a badly coloured version of two thirds of 'Black & White'. The Avatar issues effectively ignore Blackmass and Phenomena, as 'Spellcaster' and 'Dark Sister' concentrate on Spellcaster's fight for her mother's soul and against her sister. In 'Tooth and Nail', Kristophe tries to kill Spellcaster leading into the origin of Fantom. Created by Ian Churchill, who drew and co-wrote the Awesome series with Jeph Loeb, there's a strong sense in the first series that the characters have purpose and that there's an interesting world being laid out in the stories. The tone can be both light-hearted and horrific, while Churchill clearly enjoys drawing scantily clad people. Unfortunately, this is frittered away in subsequent issues and at Avatar different artists, including Al Rio, all ensure a lot of female posing at the expense of a decent story. Avatar's treatment is exemplified by the fact that they've published seven comics in sixty-two different editions.~NF

COVEN 13

No Mercy: *1 issue 1997*

Drummer with poodle-mulleted rockers Poison, Rikki Rockett (possibly not his birth name) wrote this story and added "color effects". Three alluring modern-day witches discover an illegal trade in kidnapping pets for sale to science labs, but are arrested by the police, from whom they escape by flashing their assets. Not much plot for twenty-four pages, and while Matt Busch's heavily photo-referenced painting is good, it's also static and doesn't tell a story.~WJ

COVENTRY

Fantagraphics: *3 issues 1996-1997*

A great cover of a small frog heralds Bill Willingham's series. The title, which is the only other item on the cover, refers to an American state very similar to Oregon, except that it's also a nexus for magic, with assorted supernatural visitations and occurrences affecting day-to-day life. Claudia Nevermore is the person to call when you want something sorted out. The first issue gives little away, but introduces several eccentric characters and lots of frogs, all extremely nicely drawn by Willingham. A rather appalling demon is introduced in 2, and the series was moving along nicely when Willingham pulled the plug for reasons best known to himself.~FP

COVER-UP LOWDOWN

Rip Off: *1 issue 1977*

Flip-book pocket-sized compendium of every conspiracy theory going from Jay Kinney and Paul Mavrides. Amongst other pieces it includes such gems as 'Lee Harvey Oswald: Robot or Rastafarian?' and 'You Killed Kennedy and Here's the Proof!', but the undoubted highlight is an inspired self-assemble Moebius-strip flow-chart of conspiracies, linking the Vatican to Will Eisner and the Beach Boys to Satan.~DAR

COVERED IN GLORY The 26th North Carolina at Gettysburg

The Heritage Collection: *One-shot 1996*

The second of a series imparting the history of the American Civil War. This is far more successful than its predecessor, Shiloh, in presenting a decisive battle, working because it doesn't attempt to show the entire battle from numerous aspects. Wayne Vansant's art is stiff, but adequate, and his approach of humanising the conflict by focusing on ordinary troops as well as the top ranks makes for an enjoyable history lesson.~FP

COW-BOY

Ogre Press: *One-shot 1997*

Having run as a strip in *Comics Buyer's Guide* for a few years, this was Cow-Boy's first solo outing. Anyone failing to work their way through the very dry and over-long first strip will have missed out on a good-natured, silly and amusing superhero parody. Cow-Boy has the speed and agility of a cow, and has constructed a battle udder to help him fight crime. There are elements, including the punchline to one strip, that won't have the same impact for someone not well versed in comics, but then presumably superhero parodies will have no appeal for the uninitiated anyway. Jay Hosler is an adaptable cartoonist and presumably progressed to better paying work than self-published comics.~WJ

COWBOY BEBOP

Tokyopop: *4 issue miniseries 2002, 3 volumes 2002*

Bounty Hunters, Spike Spiegel, Faye Valentine and Jet Black, along with computer expert, Ed (female) and intelligent dog, Ein, are more often than not hungry, because they never seem to have much luck with the rewards of their profession. This is either through bad luck or because the job turns out to have some hidden catch or even because they're just too kind-hearted.

In the miniseries, they all turn up to arrest different criminals at the same restaurant (1) and Spike has to go to prison to break out their target (2). In 3, Faye chases a loser in love who's put out a bounty on himself (but only women are allowed to collect it) and Jet's past in the Inter Solar Systems Police comes back to haunt him in a tale of corruption in 4. The volumes begin with a reprint of the miniseries and then continue with further humorous misadventures.

This manga captures much of the spirit and humour of the anime series on which it's based, thanks to the writing of Hajime Yadate, but, with Yutaka Nanten's lacklustre artwork, misses out on the cartoon's impressive style, to which the musical soundtrack and kinetic animation add a great deal.~NF

THE COWBOY WALLY SHOW

Doubleday: *Graphic Novel 1988*

Presented as if the reader were watching a documentary, this is the story of Cowboy Wally's enduring popularity. Beginning with his start in children's television as a result of the (implied) blackmail of a studio boss, he's quickly moved to prime time after parental complaints about inappropriate content. The running joke then is that his shows never last more than two weeks; even his own network, for which he only appears in half of the shows, runs into financial and then legal trouble as Wally's gambling debts force him to promote the mob, allegedly. The second chapter is the running of 'The Sands of Blood', his first film with actor and writer Lenny Walsh, whose melancholy suffuses a tale of despair in the French Foreign Legion – though Wally does rewrite the ending. Directing his own, day-in-the-life, documentary, which takes up chapter three, Wally attends a meal with some filmmaking friends and is asked to make them a film before the end of the tax year. Lenny jokingly suggests Hamlet, which Wally then has only a week to make, from prison, as he and Lenny are arrested after leaving the restaurant. The final chapter covers the first episode of Wally's talk show, on which one old friend (enemy) tries to kill him and another decides to kill himself.

Wally is big, loud and his own biggest fan. Lenny is sensitive and 'cranky'. Yet, through their dialogue, Kyle Baker makes all of his characters believable. The artwork is very good indeed, as Baker's fine line creates some rich textures. Baker's satire on television and film is funny, sometimes laugh-out-loud hilarious, often witty, but mostly very subtle. A real pleasure.~NF

COYOTE

Marvel/Epic: *16 issues 1983-1986*

Returning from a self-imposed exile from mainstream comics, hot 1970s writer Steve Englehart, with artist Marshall Rogers, originally presented Coyote in 2-8* of the black and white Eclipse anthology title. This material was then coloured and collected in the 1984 'I Am Coyote' graphic novel. At Epic Englehart and new artist Steve Leialoha continued the story of Sly Santangelo, shape-changing superhero educated in "the ways of the were-world". For purely personal reasons Sly, as Coyote, is waging a war against "an international conclave of unknown dimensions, dedicated to toppling the North American Governments", called The Shadow Cabinet. Leialoha's fine artwork on 1-2, beautifully coloured by the artist and Steve Oliff, is ideally suited to Englehart's ambitious combination of South American mysticism, Arab/Israeli conflict and security-service conspiracy. Sadly deadline problems forced Leialoha off the title.

He was replaced by the inexperienced Chas Truog, whose slapdash pencils brought the flaws in Englehart's scripting into sharper relief. His headstrong, arrogant central character was difficult to warm to, the sub-Castaneda waffle quickly became tiresome, and the conflict between Coyote and The Shadow Cabinet mutated into a mundane alien-invasion plot. Finding an inker for the crude, and apparently unpopular, Truog also proved problematic. Bob Wiacek, Richard Howell and Frank Springer all tried their hand, with varying degrees of success. 7-10 also featured back-up strip The Djinn, an entertaining Middle Eastern adventure written by Englehart and drawn by Steve Ditko, one of this legendary creator's most satisfying late works. The first part, inked by Steve Leialoha, is especially fine, and shows how good artwork brings out the best in Englehart's writing.~AL

CRACKED

Major Magazines: *213 issues 1958-1985*
Globe Communications: *126 issues (214-339) 1985-1999*
American Media: *19 issues (340-358) 2000-2001*

If Mad was number one in a field of hundreds, then *Cracked* was a very honourable second. For 1-10 men's magazine publisher Bob Sproul appointed Sol Brodsky as editor, and he in turn brought his pals from the recently imploded Atlas bullpen. While there's no disguising that *Cracked*'s look and subject matter was shamelessly cribbed right down to its nebbish janitor mascot Sylvester T. Smythe, it was undeniably a handsome piece of work. The line-up of talent that included Carl Burgos, Bill Everett, Russ Heath, Joe Maneely, Gray Morrow, John Severin, Syd Shores, and Angelo Torres (with Bill Elder in 5, 6 and 10 and two pages of Basil Wolverton also in 10), it was undeniably a very handsome piece of work. Brodksy left after a year, accompanied by his artists with the very important exception of John Severin who would become the principal artist for the rest of the run.

Under new editor Paul Laikin *Cracked* settled into the mix of TV and Movie satire spoofs and humour features that would define it. Laikin and his editorial successors and Bob Sproul crafted decent enough scripts (with contributions from future underground star Jay Lynch between 1963 and 1966), but it was Severin who gave this title its real quality. From his beautifully painted covers to his varied approaches to gags and strips and his incredible gift for likenesses, a match even for *Mad*'s Mort Drucker, Severin was a class act and well worth the price of admission.

In several of the post-Brodsky issues Severin was joined by an on-form Jack Davis (11-17, 24, 40, 80), but as the 1960s progressed, the magazine built up a varied roster of its own cartoonists. These including Vic Martin, Don Orehek and pin-up king Bill Ward, who'd contributed to the earliest issues. By the 1970s they were joined by the savage pen of Charles Rodrigues and the slicker than slick Howard Nostrand, with scripts by Joe Catalano and George Gladir. With sales at this point over 400,000 an issue this was certainly the commercial heyday. Never one to miss a trick, Sproul augmented the monthly magazine with a seemingly endless array of reprint specials and paperbacks, even instituting a British edition.

The 1980s saw *Cracked* acquired by Globe Communications and a new editor in the left-field Mort Todd. Under Todd, and later Michael Delle-Femine, the comic sought to reposition itself as a more adventurous cutting-edge magazine, and consequently he brought in such talents as Dan Clowes, Rick Altergott and Evan Dorkin. Todd also pulled off the coup of the decade in 1987 by poaching Don Martin (from 234 to 287) when Martin tired of *Mad*'s policy of not returning artwork. Other veterans who contributed to *Cracked* in the 1980s included Steve Ditko (218, 223, 225, 226, 231) and Pat Boyette (244, 248). If the 1970s was the commercial highpoint, this was a creative period during which Cracked generally outshone the staid *Mad*, regularly beating them to A-list topics for parody, and bettering the *Mad* versions to boot. This was all done under adverse conditions as well, with institutions realising the credibility of a *Mad* parody and providing advance materials, but generally not aware of *Cracked*. Delle-Femine's replacement as editor was Jerry DeFuccio, whose years at Mad resulted in a more conservative style, and by the 1990s, Cracked had become increasingly marginalised despite the ever-present Severin and a new generation of cartoonists, including Tom Richmond on more recent parodies. When new publishers American Media inherited *Cracked* by default, after a period of maintaining the status quo, they slashed contributor rates, thereby shunting out Severin, and a new edition hasn't been seen in almost two years.

For collectors, the truth is that no-one needs the entire run, but it's a title warranting an occasional glance if for nothing more than Severin's glorious artwork.~DAR

CRAP

Fantagraphics: *7 issues 1993-1995*

J.R. Williams, who writes and draws *Crap*, is a very funny and accomplished underground cartoonist. Much of his early work, including brilliantly inventive and anarchic wordless minicomics such as *Mr. Artistic* and *Mr. Badd*, entirely in silhouette, is collected in *Fun House* (published by Starhead in 1993).

Crap presents more conventional, albeit mature, work. Most of the lead strips concern the tribulations of an old Williams character, Milt the Mutation, his socially inept housemates, and their various addictive behaviours. Sadly, Williams' drawing style seems to have relaxed too much and there are fewer panels, and they're larger and more repetitive. It's all a little lame and predictable, rather like a television sitcom. The characters, a cowardly aspiring writer who drinks too much, a fragile recovering bulimic, an extreme feminist, a jock and a nerd, are too like real boring and pathetic people to be very funny. The dry, perhaps would-be educational tone is maintained in autobiographical work such as 'My Bad Trip' in 6.

It's not all disappointing, though. 'Milt The Mutation

* Available in a collected edition

Goes To Heaven' in 7 is marvellously bleak, as is 'The Junkeez', a violent fantasy about consumerism gone wrong, and 'Sheep', in 5, is a self-mocking piece about non-conformist ranting. Williams remains an interesting talent well worth investigating.~GK

The Incredible CRASH DUMMIES

Harvey: *2 issues 1993-1994*

CRASH RYAN

Marvel/Epic: *4 issue miniseries 1984-1985*

Writer and artist Ron Harris revives the classic adventure strip with 1930s flyer Crash Ryan having to face a pulp villain called The Doom. Sadly, talent doesn't match ambition, and while the plot is fine adventure, Harris' artwork falls short of the folk he's trying to emulate, particularly in a rushed issue 4. Crash re-appears in *Dark Horse Presents* 44-46.~WJ

CRAZY

Marvel: *94 issues, 1 Special 1973-1983*

Crazy was one of many shameless rip-offs of *Mad*, and it's only surprising feature was its longevity. Like *Mad* it was a mixture of film and TV spoofs, text, and, in this case borrowing from *National Lampoon*, photo strips. Sadly, what it lacked was a sense of humour. In its favour the first few issues boasted some top-flight artists: Mike Ploog (1, 4, 7), Neal Adams (2) and Ralph Reese (2, 3) in addition to the inevitable Marie Severin. The magazine soon became dominated by lesser talents, though, many of them shameless Mort Drucker clones, and most issues have little of interest. Towards the end of its run *Crazy* revived Howard The Duck for a number of very poor short strips and introduced the world to the wretched Obnoxio The Clown. Avoid.~DAR

CRAZYMAN

Continuity: *Series one 3 issues 1992, series two 4 issues 1993-1994*

Typical for a Continuity production, Crazyman mixed decent artwork with absolutely unintelligible writing, in this case applied to one of comics' most repellent characters. Despite principal artist Dan Barry's best efforts the title is more likely to be remembered for the stupid gimmick of the second-series première: yes, each and every one of the pages is cut in the shape of Crazyman's head. Under no circumstances should this be considered a recommendation, however.~DAR

CREATURE

Antarctic: *2 issues 1997*

Yakuza, gargoyles, demons, aliens, female ninja warriors and rampaging tax investigators – this comic has it all! Unfortunately, it doesn't have a clue what to do with any of it! People stayed away from the resultant mess in hordes, resulting in a second-issue drop to black & white from colour, then an abrupt cancellation.~HS

CREATURE COMMANDOS

DC: *8 issue limited series 2000*

Tim Truman, Scot Eaton and Ray Kryssing reboot the old series from Weird War Tales. It's the same basic premise as before, with the US military turning humans into versions of classic monsters such as a Frankenstein construct, a werewolf, a vampire and even an undead cyborg. Rather than sticking it to the Japs and the Hun, though, this time only an invading extra-dimensional horde are threat enough to need such grisly opposition. Mindless rubbish but oddly satisfying.~WW

CREATURES OF THE ID

Caliber: *1 issue 1990*

A beautiful black and white anthology, this forerunner to *Graphique Musique/Grafik Musik* contains the first appearance of Michael Allred's Frank Einstein, the character who will eventually become Madman, in a real gem of a tale. The other two stories, both illustrated by Allred, are written by Jeffrey Lang.~JC
Recommended

CREATURES ON THE LOOSE

Marvel: *28 issues (10-37) 1971-1975*

Numeration continues from *Tower of Shadows*. 10 features Marvel's first King Kull strip. 11-15 reprint weird/horror short stories. Gullivar Jones and Thongor occupy 16-21 and 22-29 respectively. The former is an early version of John Carter, concerning a man teleported to Mars to engage in heroic fantasy battles. Created by Lin Carter, Thongor is a Conan clone in all respects bar quality, which is abominable.

In *Amazing Spider-Man* 124-125, J. Jonah Jameson's astronaut son John was revealed to have discovered a weird gem on the moon which embodied the essence of an alien intelligence and transformed him into a werewolf at night. Man Wolf won his own series from issue 30, limply scripted by Doug Moench and Tony Isabella until Dave Kraft and George Pérez evolved his storyline into a gem of a tale from 33. Pérez's first full published stories in comics were cancelled in a most intriguing situation which eventually saw conclusion three years later in *Marvel Premiere* 45-46.~APS
Recommended: 33-37

The CREECH

Image: *3 issue miniseries 1997*, 3 issue miniseries ('Out For Blood') 2001*

Spawn artist Greg Capullo, in his first attempt at writing, cooks up a version of Frankenstein via Man-Thing, involving Roswell Incident aliens, aborted foetus tissue, cloning, religious fundamentalists and Christ-like sacrifice It's all rather too much for 75 pages of comics. Capullo's art is fine, though, and the big Creech (short for creature) himself, with his hair of metal snakes and his skateboarder's kneepads, is comically impressive. The literary abuses throughout scarcely prepare the reader for Capullo's exceptionally self-aggrandizing and semi-literate text features, though, and, unsurprisingly, no editor is mentioned anywhere. In the second series each issue is twice as long, making room for the hero's ex-girlfriend, a nauseating interfering long curly-haired buxom psychiatrist, whose violent exit is not the only trick Capullo has borrowed from Frank Miller, but it's all well done again.~GK

CREED

Hall of Heroes: *2 issues 1994-1995*
Lightning: *One-shot 1995, Two 3 issues 1995, 3 issue miniseries ('Cranial Disorder') 1996, one-shot ('The Good Ship and the Journey Home') 1997*
Avatar: *2 issue microseries ('Use Your Delusion') 1998*
Gearbox Press: *2 issue microseries ('Mechanical Evolution') 2000, 2 issue microseries ('Apple Tree') 2000-2001*
Image: *4 issue miniseries ('Utopiate') 2002*

Schoolboy Mark Farley is The CreeD, a kind of garbage disposal unit for the realm of dreams. With his friend and mentor CJ, the talking, shape-changing frog has to periodically pop into dreamland to beat the stuffings out of various menaces, when all he really wants to do is impress his classmate, Mary. It has a sort of rough charm, but very little actually differentiates one story from another. The exception is 'The Good Ship and the Journey Home', which feels a touch more personal, perhaps because Trent Kaniuga chose to retire the series (temporarily it seems) with that issue. What followed was rushed microseries that dwell on the increasing "leakage" of dreamland phenomena into the real world. It's as if Kaniuga wants to stay true to his original concept of the disaffected teen and the disorientation of the jump to adulthood, whilst keeping the stories commercial. He reveals to his best friend Walter just who and what he is.

---

* Available in a collected edition

There's a subplot where Walter runs away from home to live on CreeD's roof. CreeD even gets a new 'costume' but the series flounders until 'Utopiate'. No longer simply content to bounce between worlds and classrooms, and presumably due to the advent of Christina Z as scripter, Mark is allowed to grow a little. He meets a girl who may be the same kind of being he is, only to fall under the influence of a real world sorcerer who may be able to reveal the true nature of the universe. The first Lightning Comics issue is a compilation reprint of the Hall of Heroes series.~WW

Beware The CREEPER

DC: *Series one 6 issues 1968-1969, series two 12 issues (1-11, 1,000,000) 1997-1998*

In his initial appearance in *Showcase* 73 maverick newscaster Jack Ryder attended a costume party wearing a green wig, curly scarlet cape and yellow body paint, very similar to artist Steve Ditko's earlier Madmen from *Blue Beetle* 3. Whilst there he rescued Professor Yatz an imprisoned scientist. The grateful Yatz injected him with strength-enhancing chemicals and also implanted a small device that enabled Ryder to instantly appear as The Creeper and vice versa – a completely secure secret identity was a major theme in Ditko's work in the late 1960s. Striking fear into the hearts of wrongdoers with his maniacal laughter and scary turn of phrase, The Creeper is Ditko's major contribution to DC's characters, one sadly doomed to guest appearances and back-ups. The first run features escalating appearances by arch-enemy Proteus, a criminal with a white, featureless face that can be moulded into any human likeness. Scripter Denny O'Neil, who shared scripting credits with his own pseudonym Sergius O'Shaughnessy, was pulling in a different direction to Ditko and this produced a well-balanced start to the series. When, however, O'Neil's dialogue altered plots, seemingly with the approval of editor Dick Giordano, Ditko's departure was inevitable. Many hands are discernible on the disappointing swansong including inker Mike Peppe, Giordano and a final section drawn by Jack Sparling. Ditko's Creeper soloed again in *First Issue Special* 7 before appearing as back-up in *Adventure Comics* 445-447, *Flash* 318-323, and *Worlds Finest* 249-255, only in the latter written and drawn by Ditko.

The revival of the Creeper in his own title was by writer Len Kaminski. The Creeper is portrayed as being driven mad by his dual personalities, and his insane laughter is identified as a paralysing super-power. His cape moves like plant tendrils at his command, and his body heals so fast that guns don't stop him. Kaminski's revisionist origin spanned 1-4, and a journalist's job along with the beginnings of a supporting cast arrived with 5. As long as you can stand Kaminski's enthusiasm for crazy dialogue this is a surprisingly rewarding new start, despite the severity of the revisions. The stylish art team of Shawn Martinbrough inked by Sal Buscema, tastefully coloured by Sheri Van Valkenburgh, hardly put a foot wrong in what is a good example of a readable modern superhero comic.~SW

CREEPS

Image: *4 issue miniseries 2001-2002*

Guardians of a city beset by corruption that stems from corporate giant The Genesys Corporation, The Creeps are led by a blind empath called Eyeball. They include a mountain of saggy flesh named Gelulite, a two-headed woman called Debs, a fountain of mucus known as Booger, a half skinny/half muscular man named Breaker, a terrifying aggregation of insects called Chitter. Unnamed misfits including a cannibal armed with a knife and fork and a porcelain masked girl as well as Mrs Skank who is a pheromonally manipulative bag lady. Genesys executive Mr G tries to cover up their interference in public affairs but The Creeps lead a crowd of citizens in protest. Yes, that's right – the heroes in this book really are revolting! Dan Mishkin writes a well-woven conspiracy whilst artist Tom Mandrake misses no opportunity to outrage the reader with The Creeps' stomach turning behaviour. This needs to be looked at as a mixture of black humour and drama to dispel the suspicion that it may simply be the authors slipping you an emetic.~SW

CREEPY

Warren: *145 issues, 5 Yearbooks 1965-1985*
Harris: *1 issue 1985*

Spawning a host of imitators over twenty years, *Creepy* was a black and white magazine-sized anthology title in the tradition of EC's horror comics. As with any anthology the contents were inevitably variable in both subject matter and quality, but *Creepy* was blessed with two periods of consistent excellence.

For the earlier issues publisher Jim Warren managed to reassemble almost all the major EC horror artists, and in editor/writer Archie Goodwin he had the ideal man to bring out the best in them. Artists like Reed Crandall, Angelo Torres, Alex Toth, Gray Morrow and Johnny Craig were all on top of their form and produced far too many notable stories to list in detail here. A few, however, deserve particular mention, like 'Werewolf' in 1, regular cover painter Frank Frazetta's last comic strip; 'Success Story', also in 1, by Al Williamson, in which a conniving cartoonist is killed by his assistants (ironically reflecting the much-assisted Williamson's own work patterns); and 'Collector's Edition', by Steve Ditko, in 10. Perhaps the best art of this period was to be found in 14's glorious 'Curse of the Vampire' by the young Neal Adams. Sadly, by 17 almost all the Warren artists and, vitally, Goodwin had suddenly left.

Between 17 and 34 *Creepy* was a sorry mixture of reprints and dross, only occasionally enlivened by the odd Tom Sutton strip. With the exception of 32, containing the Harlan Ellison and Neal Adams collaboration 'Rock God', these issues are best avoided, and it was only with the return of Archie Goodwin in 35 that things improved. Creepy briefly became a showcase for fresh talent, introducing the likes of Richard Corben (36), Frank Brunner (39), Dave Cockrum (39), Don McGregor (40) and Bruce Jones (41) to a wider audience. Goodwin also enticed Wally Wood back for two memorable science-fiction and fantasy epics in 38 and 40. More significant, however, was the discovery of Spanish artists, first featured in 42, who came to dominate the title. An early triumph was Lynn Marron's 'Spellbound', breathtakingly illustrated by José Luis Garcia-Lopez, though strips by the likes of Felix Mas, Esteban Maroto and José Béa were also highly impressive. The Spaniards brought a unique illustrative flair to their work and were technically far in advance of their American counterparts.

Creepy's second golden age began with 50 and the appointment of Bill Dubay as editor. Whereas Goodwin's stories had been largely sting-in-the-tail material, Dubay's stable of writers (Jim Stenstrum, Budd Lewis, Steve Skeates, Jack Butterworth, Gerry Boudreau and Rich Margopoulos) favoured more psychological subjects and denser scripts. *Creepy* was soon crammed with excellent stories and there's something of interest in every issue between 50 and 90. Along with top-flight Spaniards like José Ortiz and Luis Bermejo, Dubay enticed back Alex Toth (75-80) and John Severin while Richard Corben was a regular (54, 56-64, 66-70, 73, 77, 83, 84). The best artist of the period was Berni Wrightson, who produced a number of memorable strips in 62, 63, 87 and 95, often with Warren's top writer Bruce Jones. Other stories of note from this period are 'Creeps', by Goodwin, Wood and Severin, and 'Unreal', a silent-movie tribute by Alex Toth, both in 78, and the horrifying shark story 'In Deep' by Jones and Corben in 83. Undoubtedly the best story in this or any other Warren comic was 'Thrillkill' in 75, by Jim Stenstrum and Neal Adams, a deeply troubling story of a rooftop sniper, which epitomises the literate approach of the Dubay era.

Dubay also introduced the notion of theme issues, an idea continued under his successor, from 79, Louise Jones. Notable themes were Edgar Allan Poe (69, 70), sports (84, 93), monsters (85), Mars (87) and sharks (101). Early Jones issues were largely indistinguishable from Dubay's, but as time went on she increasingly turned to American artists instead of Spaniards, built up her own stable of writers and played down the sex and violence that had begun to creep into the comic. Highlights of her editorship were the strips by Russ Heath (79, 83, 92, 100, 105) and Alex Niño (94, 96, 97, 100, 101, 104, 105, 108, 112). Issues after 100 are far less consistent than earlier ones and, although not without merit, many later issues lack the inspiration of the comic's glory years, a situation the returning Bill Dubay in 117 failed to rectify. The last few years saw increasing gore and reprints. On the plus side Dubay did bring back his favourite writers and Spanish artists, although the best art of the period came from little-known Filipinos Anton Caravana (125, 126) and Noly Panaligan (127, 128, 131). It was clear, however, that the comic had lost direction and it was no surprise when Creepy was cancelled.

The early *Creepy* Yearbooks reprinted the best of the magazine's strips and when they ceased the tradition was continued in the regular title (48, 55, 65, 74, 82, 91 103), with later issues concentrating on the work of a particular artist. Wrightson (113), Nino (119), Severin (121), Corben (132), Williamson (137), Toth (139) and Torres (142) were collected, and for casual readers would be the ideal introduction. In 1985 Harris published a low print run issue consisting of some new material and choice reprints, but a series failed to materialise and copies are now almost impossible to find. Harris later published a paperback featuring a good selection of stories from 1-17.~DAR

CREEPY

Harris: *4 issue miniseries 1992*

Although using the same logo and host, this bears little relation to the Warren title. On a dark and stormy night eight people arrive at a mysterious house to be confronted with their past and the consequences thereof. Main writer Peter David toys with familiar clichés, but is adept enough to sidestep them while keeping the reader interested to the end. A selection of fine artists including Dave Cockrum, Gene Colan, Carmine Infantino, Jim Mooney and Tom Sutton contribute.~WJ

CRIME AND PUNISHMENT

Lev Gleason: *74 issues 1948-1955*

Anthology comic relating 'true stories' of the inevitable downfall of gangsters and hoodlums. A companion title and very much weak sister to the groundbreaking *Crime Does Not Pay*, the stories never quite seemed to match the quality of its forerunner, often substituting over the top histrionics and sensationalism for the well-paced procedural pieces that made CDNP such a commercial and critical hit. The art however is consistently of the very highest standard. Incidentally, the title is reputedly taken from a 1935 film and not the classic novel.~WW

Recommended: 13, 31, 39, 45, 57, 66-72

CRIME CHRONICLES

Tome: *2 issues 1992*

True Crime exposés in an anthology format featuring illustrated examinations of such famous cases as the Errol Flynn rape case, Sinatra's mob connections and the Kray Twins. Turgid, and uninspiring.~WW

CRIME CLASSICS

Eternity: *8 issues 1988-1989*

These reprinted vintage newspaper daily strips of the Shadow have stories that are weak and tedious, when they are comprehensible, and unimaginative stilted art by Vernon Greene. If you like femme fatales by the yard and racial stereotypes, though, then step right up. Thoroughly unrecommended.~GK

The CRIME CLINIC

Slave Labor: *2 issues 1995*

Dylan Williams' attempt to revive the crime comics genre all but killed off by the Comics Code Authority in the mid-1950s. Beginning with a hilarious and possibly slanderous exposé of Charlton Comics, Williams also relates the biographies of mobsters Kid Sly Fox (in 1) and Dillinger (in 2). It's real two-barrelled action with a blackly humorous narrative voice.~WJ

CRIME DOES NOT PAY

Lev Gleason/Comics House: *104 issues (22-126)1942-1955*

Generally regarded as the first and best crime comic in America. Previous publications had featured crime (*Detective Comics* 1-26 and beyond, for example), but *Crime Does Not Pay* created a genre by concentrating solely on true crime cases researched from police ledgers and history books. It then applied writer/editor Charles Biro's phenomenal scripting abilities to produce strong humanistic stories, usually in an unrelenting nine-panel grid art format that did much to add to the documentary feel of the material. With co-editor Bob Wood and his regular stable of artists, supplemented by the best freelance talent in the industry, Biro published work that was ground-breaking. Steeped in the philosophy of the period, and with a tendency to moralise, the tales were never as patronising as the seemingly endless string of imitators they spawned. The usual payment for criminals tended to be death, yet most of the stories are fresh and entertaining, seldom repetitious. During the latter part of the 1940s, some variations in the drawing structure allowed artists of the calibre of Dan Barry, Norm Maurer, Joe Kubert and even Frank Frazetta to create some fine work, but generally the stars of the magazine are the scripts.

Crime Does Not Pay started life as *Silver Streak Comics* (1-21), a popular superhero title, and it must have come as quite a surprise when Charles Biro became editor in 1942 and immediately dropped all regular features in favour of what he termed 'Popular Illustories'. The tactic paid off and sales soared. Within three issues, he'd created another comics first with the introduction of the spectral Mr Crime, a ghostly, ghastly narrator who acted as Greek chorus, cheering on the criminals in their dastardly acts, remonstrating with their eventual 'big mistake' and lamenting their inevitable downfall. The title was an anthology throughout its run, although some regular features were included from the late 1940s onwards, notably 'Officer Common Sense'. There was also Fred Guardineer's 'Who Dunnit', real crimes presented in the format of mysteries wherein the reader is provided with all the facts and challenged to deduce the perpetrator. Rarely equalled and never surpassed in the flooded field of crime comics, it was the top selling publication (closely followed by *Daredevil Comics* and *Boy Comics*, also produced by Charles Biro) for most of the US early post-war period. It was also one of the main targets of the Senate hearings on comics in 1954, having been singled out by both Dr Frederick Wertham in *Seduction of the Innocent* and Geoffrey Wagner in *Parade of Pleasure*. They felt it contributed to the glamorisation of crime and the illiteracy of children, charges that are almost indefensible if the comics are actually scrutinised. Although the work was seldom gratuitous and never sleazy, the adoption of the Comics Code Authority meant its end, and the magazine lasted only six issues (142-147) thereafter before cancellation.

From 1944 to 1953 there was an annual 'Best Of' issued, which bound together four issues from that year's publications.~WW

CRIME PATROL

EC: *10 issues (7-16) 1948-1950*

Gemstone: *10 issues 2000-2001**

With crime comics all the rage, EC jumped into the patrol car. This, though, was the nascent EC, still feeling their way around. There are usually three rather than four stories to an issue, for instance. Later EC mainstays Johnny Craig and

Al Feldstein are regular contributors, with Graham Ingels illustrating a story in 13, but there's a reason later EC material is held in very high regard, and why Gemstone waited until all that had been reprinted before reissuing this. It's competent, occasionally gruesome, largely uninspired, but the editorial decision to drop the likes of stories concerning a frozen giant octopus being released for murderous purposes (9) didn't come soon enough.~FP

CRIME SUSPENSTORIES

EC: *27 issues 1950-1955**
Gemstone: *27 issues 1993-1997**

By the beginning of the 1950s William M. Gaines had transformed his ailing company Educational Comics – publishers of such bland fare as *Animal Fables* and *Fat and Slat* – into the much racier Entertaining Comics, responsible for the legendary anthology titles *Tales from fhe Crypt*, *Frontline Combat* and *Weird Science*. Gaines, and his talented roster of artists, editors and writers, quickly broke free of the polite restraints crippling the American newsstand comic by offering "a new trend in magazines". Using such commercial genres as horror, science fiction and crime, EC comics mixed beautiful artwork from the likes of Harvey Kurtzman, Wally Wood, Bernie Krigstein and Al Williamson with florid, literate scripts inspired by radio shows, B-movies, pulp fiction and the whole atmosphere of 1950s USA. The proudly paternalistic Gaines showcased his artists, allowed his creators a great deal of freedom (within the admittedly constraining limits of the EC 'twist ending' formula) and developed brand loyalty through witty editorials appealing to 'EC Fan-Addicts'.

Soon notorious for their extreme gore and dark black humour, EC titles also contained a fair measure of socio-political satire, liberal sermonising and cultural critique, more than enough to offend "the powers that be". Latching onto Dr Fredric Wertham's bizarre "exposé" of the link between comics and juvenile crime (*Seduction of the Innocent* in 1954), Senator Estes Kefauver convened outraged Congressional hearings with a flippant, benzedrine-fuelled Gaines as chief victim. In the wake of falling sales and outraged public opinion, many of the major comic-book companies formed the Comics Code Authority, a voluntary body designed to reassure anxious distributors and parents that any titles with the Code seal on had met 'the high standards of morality and decency required'. It also effectively put Gaines out of business, although salvation was at hand in the shape of the phenomenal Mad Magazine, created by Kurtzman for EC in 1952.

Crime Suspenstories was the fourth 'New Trend' title launched by Entertaining Comics, and followed on from their 'Pre-Trend' crime titles *Crime Patrol* and *War Against Crime*. Before Crime Suspenstories, comics in this genre, like Lev Gleason's best-selling *Crime Does Not Pay*, revolved around the victory of law and order over vicious gangster killers. Now Gaines and editor Al Feldstein turned away from detective heroes, and concentrated instead on 'ordinary' men and women caught up in tawdry crimes of passion.

Early, rather uncertain issues of *Crime* featured such inappropriate artists as Kurtzman (in numbers 1 and 3) and Graham 'Ghastly' Ingels, but soon settled down to the inspired roster of George Evans, Reed Crandall, Jack Kamen, Jack Davis and the perpetually underrated Johnny Craig. A painfully slow writer and artist, Craig drew the vast majority of *Crime*'s shatteringly lurid covers and provided the lead strip for most of its run. His sweating, hysterical, atmospheric artwork, reminiscent of Will Eisner and Milton Caniff, defined *Crime*'s obsession with human corruption and despair, marking it out as the comic-strip equivalent of film noir, or the work of writer James M. Cain. In stories like 21's superb 'Understudies' or 'When The Cat's Away...' (15), Craig's adulterous lovers plot to bump off unwanted spouses, their murderous desires motivated as much by money or power as by love or lust, their fates inevitably tragic and absurd. Other highlights include three exquisitely experimental strips from Bernie Krigstein: 'Monotony', 'More Blessed To Give...' and 'Key Chain' in 22, 24 and 25 respectively.

Although the strips in *Crime* were required to end on ludicrous plot twists that often made nonsense of the establishing narrative, read in small doses many of the stories still offer a pleasingly sick blend of dark social realism and over-the-top revenge fantasies. As with all anthology titles, individual issues are highly variable, and although towards the end of the run one senses a certain tiredness and timidity setting in, *Crime Suspenstories* remains one of EC's most consistent and entertaining achievements. The Gemstone editions are facsimiles of the originals, and were collected four issues to an annual, and a luxury box set is also available.~AL

Recommended: 5, 15-17, 21-25

CRIME WAVE

Caliber: *One-shot 1999*

Flip-comic featuring leftover tales from previous Caliber publications. The Detective is a hard-boiled strip relating the search by a contemporary reporter into the fate of legendary post-war gumshoe Max Faccioni. Untouchables occurs in a parallel world where prohibition never ended and Elliot Ness's 'incorruptible' team of gang-busters return, albeit under new leadership, and somewhat less noble in character. Inadequate and insubstantial.~WW

CRIMSON

Image/Cliffhanger: *7 issues 1998-1999**
Cliffhanger: *17 issues (8-24) 1999-2001**

Scripted by Brian Augustyn, co-created and drawn by Humberto Ramos, *Crimson* tells of spoilt yuppie brat Alex Elder, whose nose is firmly smacked by the rolled-up newspaper of life when a night-time jaunt with his friends leaves them terminally shredded, and himself turned into a vampire. Rescued from the tender mercies of Rose de Puppet, the voracious vamp-gang leaderene, by the mysterious Ekimus. Possessed of abilities far beyond the average vampire, Alex is trained by Ekimus to fulfil his 'chosen' destiny, as the next, and last evolution of the species. In his quest to discover his true purpose, he is reluctantly assisted by the nubile wolf-mistress Scarlet X, a novitiate in the demon-hunting Order of the Red Moon, who of course wear fishnet body stockings because it's such a practical outfit in which to do their holy work.

A bunch of disgruntled manifest angels are series regulars, and St. George, a former mounted police officer now inhabited by the spirit of the ancient Christian warrior, is also embroiled under the guidance of the Temple Knights. The cast assembled, it's eyes down for Sacred Wars A Go-Go, as we build up to an apocalyptic battle with a malevolent species from legend. Not very original, but stylish and slick, a perfectly acceptable entry in the angst-ridden teenage-vampire genre so popular in the last decade of the Twentieth Century. It's just a pity that our protagonist rather too often gets lost in the crowd of his supporting cast. For a sampler, try the rather clever 7, a convocation of celestial beings in a big city diner, reminiscent, admittedly, of Neil Gaiman's similar scene in *Sandman*, but enjoyable nonetheless.~HS

CRIMSON AVENGER

DC: *4 issue miniseries 1988.*

The oldest DC costumed adventurer, predating Batman, the Avenger premiered in *Detective Comics* 20, in 1938. Originally a masked vigilante similar to the pulps' Shadow, he later switched to red tights and enjoyed a second career as a superhero. This series by Roy Thomas and artist Greg Brooks takes him back to his 1930s roots, in an amiable, if unexceptional, B-movieish tale of love and death.~HS

Star Wars: CRIMSON EMPIRE

Dark Horse: *6 issue miniseries 1997-1998*, 6 issue miniseries ('Council of Blood') 1999**

For first series Mike Richardson and Randy Stradley craft an above average tale of the *Star Wars* Universe set after the death of the evil Emperor Palpatine and featuring Kir Kanis.

He's a fanatically loyal Imperial Guard tracking down the bodyguard who murdered the Emperor and took his place. Paul Gulacy's occasionally stiff artwork benefits from the inks of P. Craig Russell, resulting in an excellent read. The sequel disappoints. Kir, still avenging the death of his emperor, is embroiled in the machinations of the ruling council as they scheme to take over the Empire. It's confused and meandering, with Gulacy's development of a more cartoony drawing style ill-suited to the melodrama.~WW

Recommended: First miniseries 1-6

THE CRIMSON NUN

Antarctic: *4 issue miniseries 1997*

Set in the late 1930s/early 1940s, this is a martial arts/superhero fantasy rather than a period piece. The idea that a woman in a tightly laced judo outfit with a red-lined hood constitutes a 'nun' is a good indication as to how much leeway the reader has to give the authors. Despite that and the generic hardware and location shots this is an extremely attractive comic. The script by Brian Farrens is suitably unintrusive and Bobby Diaz's big-faced artwork is surprisingly effective. The production standards are excellent, as are the inks and colouring. Since this spins-off from Ben Dunn's *Warrior Nun Areala*, that would probably be a sensible place to familiarise yourself with the characters and the stylised setting.~SW

CRIMSON PLAGUE

Event: *1 issue 1997*
Image/Gorilla: *2 issues 2000*

George Pérez' science fiction horror series began well with an intelligent script and his usual meticulously detailed artwork. Dina Simmons' blood is the plague of the title, causing flesh to disintegrate on contact and the first issues begin to explain how she came to exist. The first Image issue reprints the Event issue with additional pages. Perhaps in another few years, Pérez will reward his loyal readers with a third issue.~NF

CRISIS on Infinite Earths

DC: *12 issue limited series 1985-1986*, one-shot 1999*

In the late 1950s DC started creating new superheroes based on 1940s characters, such as Flash, Green Lantern and Hawkman. Eventually it was decided to reintroduce the 1940s versions, explaining that they existed in a parallel dimension, christened Earth Two, while the newer heroes lived on Earth One. Over the years more other-dimensional Earths arrived, housing various doppelgängers (on Earth Three, the Earth One superhero counterparts were villains, and Earth C housed DC's funny animal creations). The DC worlds expanded to the point where it was deemed that all these parallel universes with similar characters were confusing readers. Nonsense, of course, as it was this multiverse that made the DC's universe such an interesting tapestry. If a ten-year-old could understand the dual universes of Earth One and Earth Two during the 1960s, why should a ten-year-old in the 1980s find it confusing? Nevertheless, it was decided to merge all parallel universes into one new definite DC Universe.

Over twelve issues, writer Marv Wolfman, with artists George Pérez, Dick Giordano and Jerry Ordway, expertly wove an intricate plot featuring virtually every DC hero from the Stone Age to the far future. Earths started to disappear and characters were displaced through time by an entity known as the Anti-Monitor who was slowly destroying the multiverse. After an inter-dimensional struggle, the heroes manage to destroy the Anti-Monitor, but not until the surviving Earths, One and Two, are merged. Characters in action during both the Golden and the Silver Age (such as Superman, Wonder Woman and Robin), and thus existing as two versions, had their older incarnation removed. New characters were created (female versions of Dr Light and Wildcat), and many minor (Aquagirl, the Dove, Immortal – apparently not – Man) and major characters were killed. In 7 Supergirl dies gallantly, still able to bring a lump to the throat, while 8 contains the final fate of the Silver Age Flash.

As a series, *Crisis* was a magnificent effort and a true delight for any DC fan, but ultimately the exercise failed. The whole point was to clean up the DC Universe, but over the years it in fact complicated matters more. The Crisis was used as an excuse to reboot features (sometimes years after the event) such as Superman and Hawkman, thereby contradicting the series. Only in recent times has the DC Universe settled into a cohesive timeline. Still, that shouldn't stop you enjoying this fine effort, which shows what a varied and wonderful place the DC Universe is, or was.

The one-shot special as part of the *Legends of the DC Universe* was an untold story set after 4, again written by Wolfman, but alas no Pérez. Still Paul Ryan does his best. The story involves a bunch of Earth One heroes, led by Barry (Flash) Allen to help save Earth D and its multi racial version of the Justice League from destruction. Entertaining, but pointless in the grand scheme of things.~HY

Recommended: 1-12

CRITICAL ERROR

Dark Horse: *One-shot 1995*

One begins to wonder just how many times John Byrne can recycle this simple wordless story of an astronaut crash-landing on an idyllic world. Run in the back of his *Art of John Byrne* book and in *Epic Illustrated*, it's now new-coloured, with the naked female's pubes neatly airbrushed out for the prudish 1990s audience. Any kids who want to know how babies are made should pick this up, but otherwise inessential.~WJ

CRITICAL MASS, A Shadowline Saga

Marvel/ Epic: *7 issue limited series 1989-1990*

This squarebound series concludes the plots from Epic's cancelled superhero titles *Doctor Zero, Powerline* and *Saint George* in fine fashion. Good plots from Dan Chichester and Margaret Clark are allied to decent artwork from the likes of Gray Morrow, Kev O'Neill, Jorge Zaffino and pre-Image and appallingly coloured Jim Lee (in 4). The thread running through two stories per issue is the coming apocalypse organised by Henry Clerk, who's so grateful for the restoration of his memory that he intends to set off nuclear explosions across the USA as thanks. As he plans, Doctor Zero continues to manipulate everyone, the Order of St George want Zero brought down and Powerline need him as an ally.~FP

CRITTERS

Fantagraphics: *50 issues, 1 Special 1986-1990*

There are very few anthologies that leave one feeling that every strip deserves its place. *Critters* almost manages it in that, even if there are some strips that you don't enjoy, Kim Thompson's editorial selection is of a consistently high quality so that you can admire the craft if not the result.

Critters proved to be a valuable showcase for both new and established creators, though only Stan Sakai's and Cathy Hill's creations continue to be published in the U.S. Funny animal strips had seen a resurgence of interest in the mid 1980s (with *Omaha, Albedo* and *Neil the Horse* leading the way alongside the longer established *Cerebus* and *Maus*), and Thompson provides space for practically everyone of note in the field, including Sam Kieth (7, 11, 12, 23), Ty Templeton (8, 11, 23 – including a song on the free flexi-disc – and 50), Mark Armstrong (7, 8, 11, 13, 23), Steve Lafler (9,11), J. Holland and Ron Wilber (11, 17, 19, 21, 23, 24, 29, 31, 32), Jim Engel (18, 50), Steve Purcell (19, 50), Mark Martin (30, 50), Stephen DeStefano (32, 38, 50), Donna Barr (38), Arn Saba (50), Tim Fuller (15, 18, 22, 28, 31, 34, 38, 44, 50), Cathy Hill (50), Doug Gray (50), Joshua Quagmire (1, 50) and Sergio Aragonés (50).

Stan Sakai's excellent samurai tale *Usagi Yojimbo* appears in 1, 3, 6, 7, 10, 11, 14, 23, 38 and 50, while the Groo-like 'Adventures of Nilson Groundthumper and Hermy' features in 5, 16, 27 and the whole of the *Critters Special* (1988). From the same source (*Albedo*), Steve Gallacci's

---

* Available in a collected edition

Birthright is a furtherance of the science-fiction series 'Erma Felda', which began in that title (1-6, 12-17 and 47-49).

Translated from the Danish by Thompson himself, 'Family Gnuff' by Freddy Milton is the heavily Barks-influenced story of a family of dragons. Light-hearted and good-humoured, the strength of this strip serves as the cornerstone for much of the title's run (2-5, 7, 9-11, 13-16, 19-26, 30-34, 40). 2 contains a preview of the just-released *Captain Jack* series by Mike Kazaleh, who contributed a number of other strips to Critters, though his best work remains that on *Captain Jack* (42, 50). J.P. Morgan's 'Fission Chicken' and Tom Stazer's 'Lionheart' are both parody strips, the former of superheroes, the latter of hard-boiled detectives. Well presented, they only occasionally hit all the right points but are generally good fun.

William Van Horn's 'Ambrose' and 'Angst' series, however, are definitely worth looking out for. The former is a Krazy Kat-inspired frog (22, 25, 26, 30, 33, 38), the latter has a couple of small-time crooks waxing philosophical about their lot (20, 45, 50). Another series inspired by a great newspaper strip is Kyle Rothweiler's Duck 'Bill' Platypus. Taking Pogo as a starting point, this is much more manic and surreal (34-37, 41).

From 39, each issue contained a single character title featured in hopes of improving sales, to the point of 47-49 being titled Birthright, with no mention of *Critters* on the cover, but the series ended with 50. It was on a high, though, with an eighty-four-page issue. Cathy Hill's 'Raccoons' strip had previously appeared in *The Dreamery* while Doug Gray's *The Eye of Mongombo* was a short-lived but excellent title about an intrepid explorer who was turned into a duck. Reed Waller and Kate Worley's 'Speakingstone' (12, 20) was unfortunately never finished.~NF

CRITTURS: Hairballs From Hell

Mu: *1 issue 1992*

Humour title consisting of one-page skits about creatures called the Critturs, who are shapeless blobs sharing a house together. Not funny, badly drawn and without any sense of focus or purpose.~DB

CROMWELL STONE

Dark Horse: *One-shot 1992*

Presented in comic size, rather than the traditional European graphic novel format, Andreas' Lovecraftian mystery tale was published without fanfare or explanation, though Dark Horse were printing his Rork series in *Cheval Noir* at the same time. Beautifully rendered in black and white, Andreas' artwork is too clinical for some, but he combines the influence of Gustave Doré and Escher to create stunning pages. The story's much what you'd expect: strange buildings, weird 'dreams', hidden worlds and a limp hero who stumbles around, just managing to keep one step ahead of whatever dark lump is after him.~NF

Andrew Vachss' CROSS

Dark Horse: *6 issue miniseries 1995-1996*

Despite the prominence of his name on the cover, crime-fiction writer Andrew Vachss only appears to have co-plotted these stories. They're uncompromising material, featuring the former inmate of a Chicago young offenders institution during the 1960s, Marlon Cross. Already tough on arrival, the years there hardened him, and supplied him with his lifelong companions. In the present day they're a respected, if offbeat, crew who'll move beyond the law to kill for a price. The proviso is that it's a case Cross wants to take, and he has no qualms about turning down pleas from close friends. After the first issue's background run-through Cross targets a particularly unsavoury gang distributing videos they film of brutal assaults and rapes. The narrative captions are disjointed and often superfluous, and the cast is sometimes just too contrived, but if you're looking for a well-drawn, fast-paced thriller there's plenty worse than this.~FP

CROSSFIRE

Eclipse: *26 issues, 4 issue miniseries (Crossfire and Rainbow) 1984-1988*

Antarctic: *1 issue 1994*

A textbook example of how to produce an entertaining mainstream comic. First pretend it's not a detective comic by having the lead costumed, then situate in Hollywood and populate with has-beens, wannabes, never-wills, sleazy execs and celebs all clawing for that golden opportunity. Mark Evanier's witty scripts ensure *Crossfire* reads like a superior TV drama, matched by great artwork from the adaptable and woefully underrated Dan Spiegle.

Bail bondsman Jay Endicott inherits the trademark costume of now deceased industrial spy and burglar Crossfire. He trades on Crossfire's reputation and contacts to appease his sense of right by helping those who can't afford any other justice. Fallible and generous, Endicott's a likeable soft-boiled detective, and a further strength is the detail afforded supporting characters, even if they're only present for a single issue. Endicott's relationship with the DNAgents' Rainbow means she often features, with her superpowers sometimes providing all-too-convenient get-out-of-jail-free solutions to seemingly insurmountable problems. A temporary hiatus in publication between 17 and 18 is filled by the four-part *Crossfire and Rainbow* series, stories that would have occupied Crossfire 18-21. From 18 the title becomes black and white, although not to its detriment, and 24 concludes the *Whodunnit* series, which starred Endicott sans costume.

Promoting an already excellent package to higher level are the text pages, in which Evanier recounts experiences as a TV writer, a sort of *Adventures in the Small Screen Trade.* There's not a bad issue in the run, with 15, featuring Howard Hughes and both Crossfires, a good sampler. The putative revival in 1994 didn't come about, although in addition to Crossfire and the DNAgents the package includes another excellent essay, about attempting to develop the latter as a TV series.~FP

Recommended: 5-7, 10-13, 15-22, Crossfire and Rainbow 3, 4

CROSSGEN CHRONICLES

CrossGen: *8 issues 2000-2002*

1 promotes the first batch of CrossGen titles, with The First, not fully introduced until later, monitoring the acquisition of powers by assorted individuals on different worlds. These are snippets of the origin stories presented in *Meridian*, *Mystic*, *Scion* and *Sigil.* Thereafter George Pérez draws four individual stories of the worlds or lead characters featured in the above titles during a time before they were empowered. 3's glimpse into Meridian's world is the standout, as Barbara Kesel reveals the story of how Sephie's parents met. The next best issue is 7, drawn by Rudy Nebres and dealing with the military career of *Negation*'s Obregon Kaine, which is not all it seems. 6 and 8 deal with characters from *The First,* and *Crux* respectively. Each issue also presents background material on forthcoming titles, or the title spotlighted.~WJ

Recommended: 3

CROSSROADS

First: *5 issue miniseries 1988*

A series of one-off teamings of First's most popular titles, if not characters. Jon Sable and Whisper retrieve the abducted son of a big-time mobster in 1, from which Sable goes on to pair with The Badger in 2, an uninspired tale of CIA spooks and vengeful Vietnamese. 3 has the time displaced Badger meeting American Flagg's robot sidekick, Luther Ironheart, to battle a demon, and 4 reunites Grimjack and Judah the Hammer in a hunt to destroy a Slaver. The final team-up features Nexus (who is compelled to execute mass-murderers by an omniscient alien) battling Dreadstar (who began his career by destroying the Milky Way Galaxy) as Grimjack and Judah try to explain that the latter is a good mass murderer, really. Mediocre at best.~WW

THE CROW

Caliber: *4 issues 1989**
Tundra: *3 issue miniseries 1992**
Kitchen Sink: *3 issue miniseries ('Dead Time') 1996, 3 issue miniseries ('City of Angels') 1996, 3 issue miniseries ('Flesh and Blood') 1996, 3 issue miniseries ('Wild Justice') 1996, 4 issue miniseries ('Waking Nightmares') 1997-1998*
London Night Studios: *5 issue miniseries (1-4, 0 The Crow/Razor: Kill the Pain) 1998, one-shot ('The Lost Chapter') 1998*
Image: *10 issues 1999, 1 magazine 2000*

Débuting in *Caliber Presents* 1, James O'Barr's bleak vigilante thriller has a sort of poetry to its vision of violent city streets contrasted with the beauty of love. Eric Draven and his girlfriend are killed by thugs, high on drugs. Resurrected as a spirit of vengeance, Eric becomes the Crow, who wreaks bloody revenge on those responsible, plus anyone else in the criminal chain that leads back to the drug lords. O'Barr's artwork is influenced by Will Eisner, among others, but changes wildly according to the prevailing emotional winds. It becomes more accomplished as the series progresses, but faces remain a weakness throughout.

The Tundra series reprints the Caliber issues before continuing Draven's quest. For 'Dead Time' O'Barr hands over to John Wagner and Alexander Maleev for a story about a different Crow. This one was murdered with his family during the American Civil War and is resurrected in the present to exact revenge on the reincarnations of his killers. Wagner returns for the adaptation of the second Crow film, *City of Angels*, illustrated by Dean Ormston. It's very much a re-run of the original, down to the villain finding a way to restore the Crow mortality for the final showdown. Ormston's artwork owes much to Ted McKeever but doesn't really impress. 'Flesh and Blood' features the first female Crow. James Vance introduces an environmental plotline and tries to heighten the emotional tension by playing off her unborn (now dead) child with the villain's large family. Maleev's artwork is promising, but too reliant on illustration and lacking basic storytelling abilities.

'Wild Justice' returns to the original premise as the Crow resurrects Michael Korby, killed with his wife by car thieves. Charlie Adlard's artwork is suitably dark in his scratchy and impressionistic style, but Jerry Prosser's story can't work new life from the old plot. 'Waking Nightmares' takes a new approach as a murdered policeman becomes the Crow, and tries to balance his sense of justice against his need for vengeance as the Crow. Christopher Golden tries hard with the script and Phillip Hester's artwork is always a pleasure, but overall it doesn't rise above its origins.

The London Night issues form an almost completely inarticulate tale teaming our heroes against a demon that's killed some of their relatives (possibly). The 0 issue actually ends the series while 'The Lost Chapter' provides illustrations for series writer, Everette Hartsoe's 'lyrics'. Most of the art is by Jerry Beck and it's competent – pity about the storytelling, though. For the Image series, Jon J. Muth (alone and then with John Kuramoto from 5) retells the Eric Draven story in 1-3 and then takes it forward as the Crow runs into more evil men (and one woman, and a shark). This is really dire, overwritten pretentiousness. Jamie Tolagson's artwork on 1-3 and 9 is the best of a bad bunch. The magazine has some movie articles and reprints 1 and 2 of the Image series, presumably intending to complete the story in a second issue that never appeared.~NF

CROW OF THE BEAR CLAN

Blackthorne: *6 issues 1987*

One of the best anthropomorphic animal series to come out of the black and white self-publishing boom of the mid-1980s, but one which sadly folded in the backlash. Crow is a barbarian wanderer in the Conan or *Last of the Mohicans* mould, just struggling to survive in a hostile world. The adventures are deceptively mature for a cute fuzzy bear with a feather in his ear. Solid writing, well drawn.~WW

Recommended: 1-6

CRUCIAL FICTION

Fantagraphics: *3 issues 1992*

The off-kilter strips of Julian Lawrence tackle a variety of strange topics without particularly illuminating or offering a new insight. There's some nice cartooning, but 2's story of Pope Joan is as good as this gets.~WJ

CRUCIBLE

DC/!mpact: *6 issue miniseries 1993*

Tying up all the loose ends from DC's failed !mpact line of titles, *Crucible* works well independently. A group of would-be global rulers have a device offering glimpses of the future, showing that Nate Cray (Black Hood) is somehow an important part of what is to come. Attempts to capture Cray are complicated by the return of the Comet, and by the story's end most !mpact characters are back. Fast-paced scripts from Brian Augustyn and Mark Waid and complementary art from Quesada, Wojtkiewicz and Palmiotti make for an engaging series.~FP

CRUEL AND UNUSUAL

DC/Vertigo: *4 issue miniseries 1999*

Satire dealing with the American prison system, and the death penalty in particular. Disgusted by the corruption and cruelty at the prison she takes over, a new governor decides to broadcast events live, with consequences that are both thought-provoking and darkly funny. Or at least, that's probably what writers Jamie Delano and Tom Peyer said when they submitted the proposal. Unfortunately, what we actually get is pointless and crass, and on no level funny, which is rather a failure in something intended as satire.~DB

Dennis Worden's CRUEL AND UNUSUAL PUNISHMENT

Starhead: *1 issue 1993*

Ivan Brunetti is the standout contributor and sets the tone for this jaw-droppingly repugnant anthology, edited by Worden, and containing promising early work from Sam Henderson. Brunetti's strips work because there's substance beyond a desire to shock, lacking in the remaining content. For strong stomachs only, and a bucket nearby is advised.~WJ

CRUEL WORLD

Teat Horn Entertainment Network: *One-shot 1993*

Magazine-sized compilation of work from Jim Blanchard with contents as varied as 'Attack of the Fifty Foot Hippie', the execution of Carl Jung, crime strips and psychedelic pin-ups. It is all very uneven and, while Blanchard is an excellent inker, he is a less accomplished penciller and so this is all less substantial than it should be.~DAR

CRUSADERS

Jack Chick: *17 issues 1974-1980*

Originally produced during the 1970s, *The Crusaders* is still available in speciality religious-themed bookshops, along with the equally amusing (and well drawn) smaller pamphlets from the same organisation. The series begins relatively well, with wholesome church troubleshooters Jim and Tim sorting out problems around the world. Whether performing an exorcism in India or inducing vomiting in some devil-worshipping Druids at home, a few prayers will do the trick. This is a world where God always comes through. If money is needed for a flight to India there'll be a mysterious donation. If a potential teenage suicide requires some convincing life's worth living, a few biblical quotations and a light show are just the answer, and she's turned on to God quicker than you can say Sodom and Gomorrah. Generally well plotted, 1-8 are a desperate attempt to appeal to the kids with contemporary fashions and hip language. It's all excellently drawn by Fred Carter, a commercial artist whose only comic work is for Jack Chick publications. With 9 *Crusaders* becomes completely mad, promoting text-heavy conspiracy mania pertaining to the Vatican's alleged global manipulation through the centuries, and its agenda to subvert God and promote Satan. 13 has some particularly graphically rendered Spanish Inquisition tortures. Each comic has a different title, with the series name appearing in the top right corner. These are narrow-minded in their version of the One True Way, and appallingly intolerant: just remember that if there were a God there'd never have been a Birdie Song.~FP

---

* Available in a collected edition

CRUSADERS

DC/!mpact: *8 issues 1992*

Following the *!mpact Winter Special*, which saw these heroes team for the first time, a crossover story running through all !mpact titles resulted in this ongoing team comic. Named for The American Crusaders, an earlier group of heroes who disappeared, these five set out to discover what happened to their predecessors, only to be distracted along the way by various and sundry menaces. Light, boppy, fun superheroics, abruptly terminated by the collapse of !mpact following disappointing sales results. The ultimate fate of the Crusaders was revealed in the final !mpact series, *Crucible*.~HS

The CRUSADES

DC/Vertigo: *One-shot ('Urban Decree') 2001, 20 issues 2001-2002*

In San Francisco, an armoured knight, on horseback, is seen attacking criminals on the streets. Talk-radio host, Anton Marx, considers the knight his key to fame and fortune. He takes advantage of his girlfriend and researcher, Venus Kostopikas, who has a photographic memory (presenting the opportunity for lots of trivia when Venus needs information or is remembering facts relevant to her situation) and a nose for a good mystery. Detective Petronas finds his job on the line, if he can't stop the knight and prevent a war between the Pope and his Russian mob rivals. Cela is a blind child kept in the knight's underground lair, whom Venus takes home to her visiting mother, whose fondest wish is that Venus settle down with the lovesick Petronas. 1-5 deal with the First Crusade over a children's home, 6-12 with the Second over the mob's use of a fake knight, 13-17 with the Third as someone starts killing gays. In the Fourth (18-20), Venus sets about putting her life in order, from romantic entanglements to journalistic career, with a bit of swashbuckling on the side. With compelling storytelling and artwork, Steven T. Seagle and Kelley Jones have produced a violent thriller that nevertheless challenges the reader's moral perceptions, and can be very humorous too.~NF

Recommended: 'Urban Decree', 1-20

CRUSH

Aeon Press: *4 issues 1995-1996*

Neil has had bolt threads fitted into his frontal lobes. He works at an automated food counter where he's constantly bugged by a dimbulb roller-skating waitress he calls Jellbean. Neil gets involved with Diane whose marriage to Benjamin is seriously threatened by his writer's block.

Its all very expressive but perverse in its opacity. Author Stephen 'Burpo' Debonrepos' combination of cod surrealism with a cast of utterly unsympathetic characters fails to convey anything concrete enough to satisfy the reader.~SW

THE CRUSH

Image: *5 issue miniseries 1996*

Psychiatrist turned judge, jury and executioner struggles manfully against the all-pervading clichés. There's no current trend or street language too ridiculous for inclusion here. Funny now, expect it to be hilarious in ten years, particularly the Irish gang in 4.~WJ

CRUSHER JOE

Ironcat: *6 issue miniseries 1999**

Trouble-shooter, Joe and his crew, Alfin, Ricky, cyborg Taros and robot, Dongo, compete with pirates to find a freighter lost in space three years previously that now makes ghost-like appearances, close to where it disappeared. Then they're asked by a dying scientist to destroy his new energy source, which he fears his employers will misuse, but the only clue to its location is with his young daughter. This is undemanding science fiction adventure, but very agreeably drawn.~NF

CRUX

CrossGen: *21 issues + 2001 to date*

Over 400,000 years ago, whilst humanity is still banging rocks together an advanced race called Atlanteans are in the midst of a cultural crisis. Most feel they have evolved enough to move to the next level of existence whilst a goodly proportion feel they should remain corporeal to shepherd the slowly evolving Homo Sapiens. Because they're civilised they agree to differ and the ceremony takes place without the dissenters. Over 1,100 Atlanteans take to stasis tubes until the event concludes, but something goes wrong and the ritual triggers a catastrophe which drowns the continent and causes the tubes to malfunction. An unspecified amount of time later a mysterious stranger wakes seven of the slumbering Atlanteans who find themselves in a confusing and apparently deserted world of vastly disparate cities infested with vicious giant bugs. Gradually they discover that in the millennia since the disaster mankind progressed to the stage where they colonised space. Then, one day, after thousands of years of expansion, the home planet broke all contact with its colonies. When they investigated, the colonials found that Earth's entire population had vanished, literally overnight. No explanation was ever discovered and after a couple of centuries an off-world corporation called Terra Cognito took possession and sculpted the planet into a huge museum theme park dedicated to the Earth's past history. And then came the invading giant insectoids, The Negation. The Atlanteans happen upon the last humans just as they're evacuating their base. In a savage battle with the bugs they link up with Geromi, a history technician left behind in the scramble.

This saga sits squarely at the science fiction end of the superhero genre. The Atlanteans use their mighty powers to unravel the mysteries of the missing planetary population, fend off the increasingly more devastating attacks of the Negation and find a way to revive their sleeping compatriots and restore Atlantis. There's even the now mandatory huge helping of soap opera pathos with brothers Galvan and Gammid dueling for the affections of Zephyre and leader Capricia's incessant internal carping about her own worthiness. All in all though, a competent and entertaining yarn from writer Mark Waid to 12 and Chuck Dixon thereafter and penciller Steve Epting.~WW

CRY FOR DAWN

CFD: *9 issues 1989-1992*

An anthology considered synonymous with gratuitous gore actually has plenty of redeeming features, not least the constantly improving black and white wash artwork of Joseph Michael Linsner. Linsner and writing partner Joe Monks appear to have been damned by their first issue, featuring stories associating sex with violence and an ill-advised examination of abortion. Both Monks and Linsner are prone to florid prose, but they can also write genuinely bleak and shocking stories like 'Birthmarks' in 2 or 'Dropping Anchor' in 6. Sadly, Frank Forte excepted, other contributing artists are a shoddy bunch. *Angry Christ Comics* collects Linsner's solo work.~FP

CRYBABY

Exiled Studios: *1 issue 1999*

Mediocre and rushed spin-off from hero team The Exiled as leggy bimbo crybaby attempts to kickstart a messianic revolution against a backdrop of the end of the world. A big disappointment from Scott Lobdell and Greg LaRoque.~WW

CRYING FREEMAN

Viz: *8 issue limited series 1989-1990*, 9 issue limited series 1990-1991*, 10 issue limited series 1991-1992*, 8 issue limited series 1992*, 11 issue limited series 1992-1993**

Despite its frequent and explosive violence, *Crying Freeman* has a lot to recommend it to female readers. Its violence is almost balletic, its plot quasi-mythical, its storyline centred around romance: the central characters' love for each other, and the reader's infatuation with beautiful gangsters. The origin in series one immediately confronts us with the duality of the title. Crying Freeman is a sensitive potter forced to become an assassin, who kills impassively but with tears streaming down his face. The first story concerns the young artist Emu, who will eventually become his wife, who witnesses him in action, and is convinced he will return to kill her. Everyone accepts what happens to them as though it were fated. Freeman becomes leader of one of the most powerful and ancient secret societies and proceeds to defend his position against genetic mutations, Amazons and supersoldiers as a matter of honour. Emu unquestioningly marries him, and starts to learn the art of fighting, eventually receiving a magical sword; they swan around in a submarine tricked out to look like a dragon and have adventures that are halfway between *James Bond* and the *Twelve Labours of Hercules* in their romantic inevitability.

Ryoichi Ikegami's delicate linework and dry-brush shading produce images of extraordinary impact and elegance. The pace of the story allows for lots of splash pages, long, loving delineations of exceptionally violent fights, and really very beautiful sex scenes. Exciting but simplistic, *Crying Freeman*'s heady blend of martial arts, steamy sex, blood, doomed criminals and tattoos is an addictive mix.~FJ

Recommended: Series one 1-8

CRYPT

Image/Extreme: *2 issue microseries 1995*

Prophet is a superhero who has returned from the dead, and Crypt is his future self who has come back to the present, and possessed a Prophet clone that was just lying around. Meanwhile, a group of warrior monks called the beholders are wandering about with their own agenda. The tale is told through the actions of a winged girl who is/was/will be the ward of Prophet when he becomes Absolution just before he becomes Crypt. The inability to use flashbacks properly just adds to the confusion. Don't make this part of your future.~WW

THE CRYPT OF CUM

Eros: *One-shot 1999*

Masquerading as "DeMentia" artist Tom Sutton turned out a trio of EC horror comic parodies starring preposterously breasted women and plenty of ejaculate. He spent more time on this than Vault of Whores or Weird Sex, but it's difficult to imagine who'd find it either arousing or more than briefly amusing.~FP

CRYPT OF SHADOWS

Marvel: *21 issues 1973-1975*

Reprints 1950s weird and horror shorts, with a Basil Wolverton strip in the first issue of note.~APS

CRYPT OF TERROR

EC: *3 issues (17-19) 1950**

Continuing the numbering from *Crime Patrol*, *Crypt of Terror* was the first EC horror comic, and the template for all that was to follow. The formula and artwork haven't hit their peak here, but there's a curiosity in seeing Harvey Kurtzman illustrate the typical O. Henry-style horror tale and future successful science-fiction author, Harry Harrison, also trying his hand. With 20 the title changed to *Tales from the Crypt*, and immortality was assured. The issues are collected with Tales.~FP

The Saga of CRYSTAR Crystal Warrior

Marvel: *11 issues 1983-1985*

Fantasy by numbers, created by committee, with wizards, feuding sibling princes, half-naked women, dragons, prophecies and pacts, but without any real heart. As if acknowledging the creative redundancy, Marvel superheroes begin appearing from 3.~WJ

Jim Lee's C-23

Image: *8 issues 1998*

An enjoyable, cliché-ridden space romp in which Corbin – war hero and general leader-in-waiting – discovers that he is in fact one of the bug people he has been fighting his whole life. Lots of pointless fighting and hammy dialogue, but with the exception of 1, it's all very fast paced and raises a smile. And by the way, C-23 is a chromosome that the bug people's royal family carry.~DB

CSI: Crime Scene Investigation

IDW: *1 issue + 2003 to date*

Planned as a five issue miniseries based on the TV show, Max Allen Collins is an old hand at detective material, and comes up with a viable plot here. The art is little more problematical. If you're going to use likenesses they should be spot on, and these aren't all the time, with Grissom never really captured.~WJ

CUCKOO

Green Door Studios: *12 issues 1996-2001*

In 1992 Madison Clell began experiencing the first symptoms of multiple personality disorder (or dissociative identity disorder). It manifests in adult life when repressed memories of severe childhood trauma, usually abuse, begin to surface. *Cuckoo* is Clell's commentary on what happened to her before and after 1992. It starts as a fragmentary experience, with snippets of life under assorted personalities, and even after a linear narrative is employed from 5 it never becomes an easy read. The disturbing topics are compounded by a loose, scratchy style of art. Anyone working through it, though, should come away with a better sympathy for and understanding of an appalling condition to live with. The series was never completed, although thankfully the final issue published announced Clell's therapy at an end.~FP

CUD Comics

Fantagraphics: *8 issues 1992-1994*
Dark Horse: *8 issues 1995-1997*

Written and drawn by Terry LaBan, *Cud* eschews the confessional mode of many 'alternative' comics in favour of broad, adult, character-driven satire. LaBan is confident and accomplished enough to get laughs whatever the genre or situation, be it exotic adventure (with occasional character Muktuk Wolfsbreath, Hard-Boiled Shaman), rude Archie parody, 'The Primitives', or a Jewish parable, 'Ben Dordia's Confession' – respectively in the fourth issues of the first and second series.

Each issue of the Fantagraphics *Cud* features 'You Can't Spank the Monkey if he's on Your Back', a strip about the rise and fall of absurd performance artist Bob Cudd, one of the stars of LaBan's previous comic, *Unsupervised Existence.* Although he's a vaguely sympathetic lead, Bob is also a terrible phoney, and LaBan uses this extended story-line to take some hilarious, if rather easy, potshots at numerous 'radical' lifestyles. The Dark Horse series features archetypal slacker couple Eno and Plum, in a series of inventive, raunchy domestic vignettes bound to appeal to readers of Peter Bagge's Hate. 2's story 'Virtual Anxiety', where Eno dons a virtual reality headset and lands up in a brutal prison, is a particularly effective example of LaBan's ability to sidestep the often limiting realism of many strips bound up with grunge culture. The Eno and Plum stories are collected.

In the superbly smutty porn fantasy 'Class Action' (series one, 2) LaBan calls himself "Just another lame 'alternative' cartoonist with a ponytail", which, as with his other satirical observations, is a harsh but not wholly inaccurate judgement. LaBan always draws 'The Author' as a spindly, thirty-something hippy, and one often gets the impression that Cud's creator is a detached, bemused observer rather than a fully fledged participant hangin' with The Kids. Cud's superb, broad-brush artwork reinforces the sense of deceptive professionalism and personal detachment that

---

* Available in a collected edition

further characterises all of LaBan's non-mainstream work. Sadly, LaBan decided to end the Dark Horse series with 8, but quality was maintained to the end. The last issue contains a poignant text piece about 'the author's' struggle to emulate the achievements of his underground comix heroes, particularly R. Crumb, but LaBan needn't have worried, *Cud* more than holds its own in such elevated company.~AL
Recommended: Series one 1-8, series two 1-8

CUDA

Avatar: *5 issues (0-4) 1998-1999*

Tim Vigil's usual blend of ornate drawing and mindless, exploitative sex and violence is on show in this sword and sorcery tale of the barbarian Cuda. If you like that stuff, you'll love this stuff.~WW

CUIRASS

Harrier: *1 issue 1988*

It's hard to credit that anything as piss-poor as Harrier's indescribably unerotic bondage fantasy *Barbarienne* could warrant a cash-in; however, the evidence is before us, sadly.~FJ

Batman:THE CULT

DC: *4 issue miniseries 1988**

Despite the big star names, Jim Starlin and Berni Wrightson, this was a best-selling disaster. After Frank Miller's Dark Knight Returns DC were obviously looking for another critical and commercial success. Starlin, despite having done little of note since leaving Marvel several years previously, still had a good reputation that promised much, and tempting Wrightson back to comics was another coup for DC. Neither creator was up to the task, though. Wrightson's artwork was far too loose for the ponderous script. Starlin's premise that Bruce Wayne's motivation for becoming The Batman was fear and the much-flaunted 'first time Batman is broken' story-line are entirely unconvincing. The series is representative of the failure of DC to understand how to handle Bruce Wayne, pretty much ignoring his character in favour of an emotionless Batman who's only allowed to interact with Robin and Alfred.~NF

CURSE OF THE MOLEMEN

Kitchen Sink: *One-shot 1991*

Charles Burns combines domestic brutality, childish curiosity and a smidgen of the inexplicable in 1960s-TV small-town USA. Originally issued by *Raw* in black and white, it's simple stuff given atmosphere by Burns' expressive and disturbing art.~FP

CURSE OF THE WEIRD

Marvel: *4 issues 1993-1994*

Together with *Monster Menace*, an attempt by Marvel to revive its mystery line by reprinting classic stories lovingly selected and presented. *Curse of the Weird* was definitely the more fun of the two, focusing on the loopier side of things with disembodied brains, floating eyeballs, amnesiac ghosts and literal roadhogs! Very mondo bizarro. In their native 1950s these demented ideas were the result of too many benzedrine-soaked nights trying to grind out fodder for the company's two dozen mystery titles; now they can be appreciated for the nostalgic trash classics they are.~HS
Recommended: 1-4

CUSP

Alternative Comics: *1 issue + 2003 to date*

Let's start with the good: Thomas Herpich is a brilliant cartoonist. His sparse illustrations, some seemingly produced freehand directly in ink, drip with talent and expression. He can manage a naturalistic style and produce flights of the imagination to boot. The tragedy is that he has absolutely nothing to say. Over forty pages there's not a shred of interest to the narrative or dialogue. The strips are optimistically described as "lyrical" and "exotic" by the publisher, who instead of trying to patch the deficiencies might suggest collaborating with a writer.~FP

Army Surplus Comics Featuring CUTEY BUNNY

Army Surplus: *7 issues 1982-1986*

Rather poor risqué anthropomorphic title, written and drawn by Joshua Quagmire, whose rough and ready approach to inking squeezed out what little eroticism there might have been in the unlovely original pencils. Comes over as vulgar and adolescent, rather than as a spirited and irreverent underground, which one supposes what it was aiming to be.~FJ

CUTIE HONEY '90

Ironcat: *6 issue miniseries ('Volume 1') 1997-1998, 6 issue miniseries ('Volume 2') 1998*

In this sequel to his 1973 *Cutie Honey* series, Go Nagai reintroduces the criminal organisation, Panther Claw and its leader, Sister Jill. Investigating a murder, detective Todoroki meets "The Warrior of Love", Cutie Honey, a super android, who defeated Jill thirty years previously. She tells him that Jill is a demon from a different dimension, preparing an invasion force. The story progresses with Jill turning naked women into demons to fight Cutie (usually with plenty of flesh on display and to violent, gruesome endings), trying to recruit new followers, or, eventually, just deciding to destroy the world. Utterly preposterous, Nagai's irreverent storytelling just about carries it off.~NF

CY-GOR

Image: *6 issues 1999*

Introduced in *Spawn* 38, Cy-Gor is a contraction of cybernetic gorilla, which is what he is, the result of covert experimentation. Of course, mess with a gorilla in the city and when he gets loose there's going to be trouble. With the gorilla's communication limited, there is a well crafted cast, particularly the amoral government operatives, but overall confusion is the order of the day, with too many voices muddying the plot.~WJ

CYBER CITY

CPM: *2 issue microseries 1995, 2 issue microseries 1995, 2 issue microseries 1995-1996*

Its AD2808 in Oedo City and the Cyber Police are former criminals controlled with explosive collars by boss, Hasegawa. Familiar themes mixing the supernatural and scientific form the backdrop for these tales of bad-boy cops. Based on the Japanese animations, they're drawn by Tim Eldred in a competent, clean-lined style but there's nothing compelling about any of it.~NF

CYBER CRUSH Robots In Revolt

Fleetway/Quality: *14 issues 1990-1991*

Reprints of early *2000AD* stories with covers bearing no relation to the contents. Ironically for a comic selling itself on the idea of robots, it's the humanity of the robots within that makes the strips work. 'Ro-Busters' is a *Thunderbirds*-style rescue squad wherein the team revolt against their masters. There's nice Mike McMahon on some chapters, but little worth noting otherwise until 14, which has an Alan Moore and Steve Dillon tale. Better by far are the earliest Robo-Hunter stories, finally reproduced sympathetically in colour. John Wagner (under the alias of T.B. Grover) and Alan Grant write hilarious scripts, matched by Ian Gibson's whimsical, detailed art. 1-8 have Sam Slade accompanied by a foul-mouthed, cigar-chomping pilot regressed to childhood on a planet where robots are eliminating humans, and the even funnier 'Day of the Droids' in 9-14 has all of the city's leaders replaced by robot duplicates.~WJ

Shuhoi Tahashi's CYBER 7

Eclipse: *8 issue limited series 1989, 10 issue limited series 1989-1990*

Two teens become aware, as you do, that they're extra-dimensional aliens who've been exiled on Earth, although they're the rightful heirs to the throne of a faraway world. There are, naturally, those who want to prevent their return, among them a giant rabbit called Cunningham. Luckily, they

* Available in a collected edition

have allies in the form of the Cyber 7, a mixture of sprite and miniature robot. Excellent art and considerable charm combine for a decent first run, set on Earth as the strange events unfold. The second series, sub-titled 'Rockland', is more fantasy-oriented as our crew start travelling home through the dimensions with their path blocked by enemies.~FP

CYBERAD

Continuity: *Series one 7 issues 1991-1992, series two 3 issues 1993*

Unique among Continuity titles for keeping the same creative team (Peter Stone and Richard Bennett) for its entire run, *Cyberad* was best known for its inspired enhancements, from holograms to stickers and gatefold pages. Artistically Bennett's pages were a strange mixture of Neal Adams figurework and obsessive mangaesque detail, but ultimately the frantic pace and muddled story adds up to little. The second series was three chapters of the cross-company 'Deathwatch 2000' story.~DAR

CYBERELLA

DC/Helix: *12 issues 1996-1997*

Howard Chaykin, who's always had a retro love affair with the future, joins forces with animator Don Cameron to give us a boldly drawn, info-heavy version of the future. The Karoshi-Macrocorp run just about everything, thanks to their Cyberella system, personified as a cute virtual woman. Our heroine, Sunny Winston, is being questioned by computer because she's beginning to question the system when, due to a power surge, she's sucked into Cyberella itself. As ever Chaykin's grasp of recent social history adds interest, and saves the series from being just another cyberpunk comic.~FJ

CYBERFORCE

Image/Top Cow: *4 issue miniseries 1992-1993*, one-shot (0) 1993, 35 issues, 2 Annuals 1993-1997*

Marc Silvestri's glistening costumed group consists of wholesome leader Heatwave, American native Ripclaw, the truck-sized Impact, four-armed cyborg assassin Stryker and the beautiful Cyblade. The team have links with the prequel series *Codename: Strykeforce* via Stryker. In addition there's a teenaged computer whiz named Chip and his kid android Timmie. The miniseries starts with Carin, the super-fast Velocity, rescued and welcomed into Cyberforce, and there's also the matter of some key software stolen from Megasoft by Wyldfire and her partners who have guest star Pitt sleeping on their couch. The evil Cyberdata Technologies' pursuit troops turn out to be commanded by Carin's super-assassin sister Ballistic. Everything culminates in a showdown with prime-mover Mother May-i whose shocking identity is revealed in 4. We get more backgound information on Cyberdata's relationship with Cyberforce in 0, written and drawn by Walt Simonson. There's a prolonged crossover with *WildC.A.T.S* in 1-3's 'Killer Instinct' with mind manipulator Misery and Ripclaw's history with Warblade at the heart of things. 'Assault With A Deadly Woman' in 4-7 sees Ballistic's loyalties finally switch to her little sister's team. Silvestri provides the plot, leaving his brother Eric to script, and some spectacular art for the initial miniseries and these issues, with Scott Williams and other assistants gradually taking more of the weight. Todd McFarlane is 8's guest penciller. From Silvestri's plot Chris Claremont scripts 9-11 showcasing his new hero The Huntsman. 13-15 take Cyblade and Chip back to 15th Century France and introduce the contemporary schemes of Emil Zadroc. An epic story arc is then launched centreing on Zadroc, The Kraken and master planner Kimata's attempts to supercede Cyberdata in 17-25, resulting in casualties on both sides. Brian Holguin improves on Eric Silvestri's uniformly uninteresting scripts from 19, with most issues between 15 and 31 drawn by David Finch, inked by Jason Gorder to 24 and then by Joe Weems Scott Lee's art in 30 is to be avoided at all costs. 26-27 cross over with Ash and Heatwave is driven to suicide in 29 as a prologue to *The Devils Reign* starting in 30 and continuing in a series of one-shots teaming Marvel and Top Cow characters. Heatwave's funeral at the close of 31 is the real end to the series. The 'Royal Blood' story arc in 32-35 amounts to a Cyblade story set in Europe. Overall, this is a series where the early Image tenet of artist is boss leads to a complete lack of direction where hackneyed plots plus crowds of detail and information is supposed to equal story.~SW

CYBERFORCE ORIGINS

Image: *3 issue miniseries 1995*

Individually dealing with Cyblade, Stryker and Impact, there may be some interest in Randy Queen's pencilling 2 and portions of 3, the rest of which is by Michael Turner. None of it is very good, though. The one-shot *Misery* and the *Velocity* miniseries are both far better.~FP

CYBERFORCE, STRYKEFORCE: Opposing Forces

Image: *2 issue microseries 1995*

Following Codename: Strykeforce 14, this series sees Cyberforce and Strykeforce joining forces against the return of the Shu'rii, out to kill Sh'rrunn/Bloodbow for betraying her race. Leaving the future of the characters pretty much up in the air, Steve Gerber tells an engaging tale that wraps up most of the Strykeforce plotlines.~NF

CYBERFROG

Hall of Heroes: *2 issues 1994*

Harris: *4 issue miniseries 1996, 2 issue microseries ('Reservoir Frog') 1996, 2 issue microseries ('3rd Anniversary Special') 1997, one-shot (Cyberfrog vs Creed) 1997*

Future *X-Men* artist Ethan Van Sciver started with this tale of a creature part frog, part machine, and little explanation. Cyberfrog is out there maiming, mutilating and murdering ne'er-do-wells. As ideas go there are far worse, and with that concept it's hardly going to be angst-ridden soul-searching all the way. The Hall of Heroes issues are reprinted for the third Harris series and redrawn for the first, with Van Sciver's art already much improved. It takes another leap for 'Reservoir Frog', which, until the end, covers much the same ground. Van Sciver's obviously having a ball, but the smug captions irritate. While the dubious morality and celebration of gratuitous violence may offend some there's an equal crowd to be attracted by the art and often very funny dialogue.~WJ

CYBERNARY

Image/WildStorm: *5 issues 1995-1996*

WildStorm: *6 issue miniseries (Cybenary 2.0) 2001-2002*

Cybernary is the fusion of a freedom fighter and the daughter of Kaizen Gamorra, ruler of Gamorra Island. His head scientist, trying to please his master, decides to improve his daughter, Yumiko, but neither she nor Kaizen are exactly overjoyed by the end result, especially when the freedom fighter part of her wants to join the rebels in their attempts to free Gamorra from her father's rule. Written by Steve Gerber and drawn by Jeff Rebner, *Cybernary* is an entertaining series that sheds light on a particular aspect of the WildStorm Universe and partially sets the scene for the 'Fire From Heaven' crossover.

Picking up from events in *The Authority*, the apparent death of Kaizen Gamorra has led to political leadership squabbles. In Cybernary 2.0 one faction decides to find Yumiko and rule through her and cyborg rebels who want to assert their own claims to citizenship are also seeking her. Joe Harris' script seems at times wilfully obtuse, but the artwork by Eric Canete and Juan Vlasco is distinctive, if occasionally confusing.~NF

CYBERPUNK

Innovation: *2 issue microseries 1989-1990*, 2 issue microseries ('Book Two') 1990*, two issue microseries ('The Seraphim Files') 1990**

A lesson that should have filtered through to Innovation very early in their existence was that painted art doesn't necessarily mean good art. Here we have shocking anatomy placed on blurred backgrounds in stories about teens jacked into cyberspace via neck implants. Good ideas, weak stories, bad art. 'The Seraphim Files' continues from *Seraphim* 1.~FP

CYBERPUNX

Image/Extreme: *3 issue miniseries 1996*

It's heartbreaking to see Robert Loren Fleming, the man who wrote the magnificent *Thriller*, eking out a living by scripting nonsense like this for Rob Liefeld, even if he does manage to insert a few digs about the concept into the script. Computers control the world, and the remaining humans can be digitised and transferred about the place. That's not enough, though, and the Cyberlords want to eradicate humanity. It's not a bad idea, but unfortunately, having conceived it, Rob's more interested in people duffing each other up.~WJ

CYBERSUIT ARKADYNE

Ianus Publications: *3 issues 1992*

Beset by pirate raids in the asteroid belt, the Earth administration of 2052 eventually realises these are the first skirmishes of an alien invasion. Cue the latest battlesuit technology courtesy of inventor Dr Ann Gabel. The suit pilot is young Glenn Taback who is haunted by visions of his own death that seem far more like premonitions. The appearance of another battlesuit in 1 and evidence of an ancient alien outpost on Earth's moon in 2 complicate things further. During a test run Taback realises the alien carvings relate directly to visual aspects of the suit's gravitic drive. Creator and artist Tim Eldred's collaboration with scripter and "futurist" Jonathan Jarrard is only a technical success, their debt to innumerable Japanese battlesuit series is obvious. Characterisation is flat and poorly portayed next to the meticulously realised hardware. So – not much page turning impetus but enough hard detail and plot to keep fans of this genre happy. Planned as six issues, only three were published.~SW

CYBLADE/SHI

Image/Crusade: *2-issue microseries 1995*

Steamin' babe-on-babe action from comics' hottest heroines. Nah, only kidding. It's actually a pompous allegory about creative little guys fighting against a huge evil out to destroy their individuality and, with it, the land of wonder. The creators' hearts were in the right place, but the whole thing's a terrible mish-mash, written by William Tucci and Gary Cohn and drawn by Tucci, Nelson Asencio and Jimmy Palmiotti. Shi and Cyblade don't even do much. Along the way Cerebus, Fone Bone, Mr Spook and a host of other characters from better independent comics turn up.~FJ

CYBRID

Maximum Press: *1 issue 1995*

A cyborg has escaped from his creators, and they want him back. He, on the other hand, has no intention of returning. Hardly an original plot, but there are some interesting ideas and interludes. Unfortunately every time these occur they're curtailed by some bog standard fight scenes and pin-up pages.~WJ

CYCLOPS

Marvel: *4 issue miniseries 2001*

There's nothing to distinguish this disjointed miniseries in any fashion. Cyclops goes on vacation, meets some old enemies employed by a new one with a grudge against him, drops into the Savage Land and returns home to settle everything, having filled eighty-eight pages along the way. For hardcore X-fans only~FP

The Adventures of CYCLOPS AND PHOENIX

Marvel: *4 issue miniseries 1995, 4 issue miniseries 1996*

Just to further complicate the already impenetrable *X-Men* continuity, Cyclops and Phoenix are snatched from their honeymoon and thrust into the dark, distant future. They're tasked with raising the child who will be Cable, doing all they can to ensure that a prophecy about the future stays on-line despite knowing the pain and anguish the future will hold for all of them. The artwork, by Gene Ha, is finely detailed and has almost fairy-tale qualities amid the usual big guns and helicopters of the X-comics house style, while Scott Lobdell's story puts flesh on the bones of a future mythology which has been hinted at but never before fully explored. The second series, written by Peter Milligan, has them thrust into the past of Victorian England to witness the origin of their arch-nemesis, Mr Sinister. Essential for *X-Men* aficionados but be warned: the complicated continuity may well be incomprehensible to the casual reader.~JC

CYCOPS

Comics Interview: *3 issues 1988*

Cybernetically enhanced policemen strive to uncover an assassination plot. Notable for the début of artist Brian Stelfreeze, it's nonetheless very ordinary science fiction.~WJ

CYNICAL GIRL

Mortco: *1 issue 2000*

Unfunny woman dons costume to shout at people who annoy her. Creative team seem to lack understanding of the word 'cynical'.~DB

DADAVILLE

Caliber: *1 issue 1991*

The idea of a surrealist comic must have sounded a very funny idea late one night in the bar. Unfortunately not only did the creators wake up the next morning and start producing it, Caliber published it. Not for long, though.~DB

DAEMONSTORM

Caliber: *One-shot 1997*

In another time and place the galactic civilisation of Numenia was on the verge of collapse as the fallout from their sole energy source, Magic, caused Daemonstorms. These amount to seismic instability, negation of all laws of physics, and the creation of hideous monsters. To fight these problems the Stormwalkers were founded. Now, an indeterminate time later, the last Stormwalker is summoned from exile as the Daemonstorms begin again. It's a prequel to a larger story, crossing over into a number of Caliber titles, but on the strength of this it's not worth waiting for.~WW

DAGAR the Invincible

Gold Key: *18 issues 1972-1976*
Whitman: *1 issue (19) 1982*

Gold Key's slide from grace was precipitous during the early 1970s. While rarely reaching great heights, their titles had always attained a level of professional competence, and their distinguishing painted covers (repeated as pin-ups on the back cover without logo and cover text) were always a treat. This is almost plotless sword-and-sorcery drawn by Jesse Santos. Why on earth Whitman (who dropped the Gold Key imprint in the early 1980s) would imagine a reprint might revive an interest is beyond all speculation.~WJ

DAI KAMIKAZE

Now: *12 issues 1988-1989*

A giant battle robot is named after the title, with the initial involvement of Brian Augustyn, Len Strazewski and Mark McKenna very early in their professional careers. The robot is Earth's last hope in fighting off an opposing faction of humans who departed two millennia previously and now want to return. It's all just about competent material despite the constantly changing creative staff, but there's no reason anyone should be remotely interested now.~FP

DAILY BUGLE

Marvel: *3 issue miniseries 1996-1997*

Gritty Paul Grist story accompanied by gritty Karl Kerschl black and white artwork of the life and times of New York City's premier newspaper. Corrupt landlords and money-laundering rear ugly heads as this Spider-Man institution fails to have everything its own way. The gritty script is fine. The gritty pencils spurn the opportunity to depict a single recognisable character.~APS

DAKOTA NORTH Investigations

Marvel: *5 issues 1986-1987*

Nominally a thriller featuring spies on the Orient Express and corporate double-dealing in the world of high fashion. In reality, a piece of soft porn through which Ms North struts in stilettos and tight black leather, displaying her delectable rear as often as possible. This is more often in issue 1 than in any other, but the story doesn't improve to compensate for the loss, and it's a relief to discover at the end of 5 that there will be no more.~FC

DALGODA

Fantagraphics: *8 issues 1984-1986*

Dalgoda's a classic science-fiction tale set in a war-ravaged future where spending on space development means Earth technology is no more advanced than in the 1950s. Earth has made contact with one spacefaring race, the dog-like Canidans; both are threatened by a mysterious race of destructive spacefarers called The Nimp. Writer Jan Strnad builds a believable background of political manoeuvring against which his lead characters struggle to survive: Dalgoda, a Canidan spaceman sent to Earth when his own planet is about to be destroyed; Posy, a disgraced ex-Spacer who's on hand when Dalgoda's ship crashes; and Hathaway, Posy's ballsy sometime-lover, a mechanic with the space fleet.

It is in the development of characters that *Dalgoda* distinguishes itself as an adult story. By the end of the series you'll care about their futures so thoroughly that the ending will both shock and touch you. It's pretty inconclusive, however, clearly cobbled together when the series was curtailed early. Dennis Fujitake's art mixes equal parts Moebius and manga to give a gorgeous, rounded, clear-line style. In later issues the colouring (subtly suggesting a different future in its use of purple, orange and green where primary colours would normally be employed) suffered due to the downgrading of paper stock.

Dalgoda was also blessed with a superb back-up strip in issues 2-6. Written by Strnad, atmospherically illustrated by Kevin Nowlan, 'Grimwood's Daughter' is a tart antidote to sugary elf comics with its surly, often frightening heroes who are preparing for their final battle with man. As in the main strip he resists writing an easy, happy ending.~FJ

Recommended: 5, 8

DAMAGE

DC: *21 issues (0-20) 1994-1996*

Teenager Grant Emerson discovers latent superpowers on the same day he's attacked at school by Metallo, and finds out that his parents are not who he'd always believed. Talk about your bad days... Despite the determined efforts of the creators (who shall remain nameless) to link Damage to DC history by connecting his true parentage with iconic DC heroes, this is utterly mundane and unimaginative superheroics. One for Vandal Savage completists only.~HS

DAMAGE CONTROL

Marvel: *4 issue miniseries 1988-1989, 4 issue miniseries 1989-1990, 4 issue miniseries 1991*

What to do when the Masters of Evil trash downtown Manhattan in an all-out, no holds barred battle with the Avengers, for the third time this week and it's only Tuesday? Send for Damage Control! A massive repairs and renovations business, they specialise in cleaning up the mess after superbattles. A charming and logical idea, handled with a sense of humour by writer Dwayne McDuffie and penciller Ernie Colón, but sufficiently serious that it integrates smoothly into the Marvel Universe. For a while, we were treated to *Damage Control* miniseries on an annual basis, and it looked like it was going to become a regular feature. No such luck, which is a pity. Series one features a tie-in with the *X-Men*'s 'Inferno' story-line, series two are all 'Acts of Vengeance' crossovers, but with enough story that they can be read independently. Series three goes cosmic with the Silver Surfer. Guest appearances by the Marvel heroes and villains abound.~HS

Recommended: Miniseries one 1-4, miniseries two 1-4, miniseries three 1-4

DAMNATION

Fantagraphics: *One-shot 1994*

A collection of assorted J.R. Williams strips, including a 1985 collaboration with Peter Bagge, sadly not much cop. Williams never raises less than a smile, but at times veers dangerously close to the conventions of vapid latter-day newspaper cartoons. Strangely, though, his apparent attempt at creating such material, Barfo the Clown, would provoke apoplexy across middle America. It's all the better for this. Other highlights include a few 'Bad Boys' strips, the work for which Williams is best known, a riotous adaptation of 2 Live Crew's *Get The Fuck Out Of My House*, and a great portfolio of different dreams. There's too much filler for unqualified recommendation, but anyone who's enjoyed Williams' work elsewhere will find many ribs tickled here.~FP

DAMNED

Homage: *4 issue miniseries 1997**

When Mick Thorne is released from prison he carries a secret, passed on by a dying friend. He's promised to get in touch with the dead man's sister but King Silver's after $15 million that was stolen from him and believes Mick knows where it is. Steven Grant's not written much to equal this hard-boiled thriller. There's nothing particularly new about the layers of intrigue and murder but the tale's well told and both Mick and his replacement Parole Officer, Charlotte Dahl are interesting characters. Perhaps the real revelation of the series, however, is Mike Zeck's reinvention of his art style. Part Frank Miller, part Jose Munoz and Denis Rodier's inking is significant but it's well worth a look.~NF

Recommended: 1-4

DAN O'NEILL'S COMICS AND STORIES

Company and Sons: *3 issues 1971*
Comics and Comix: *2 issues 1975*

O'Neill's 'Odd Bodkins' newspaper strip was collected from the underground paper *The Chronicle*. Visually O'Neill manages a beautifully loose evocation of the turn-of-the-century cartoonists, which is what one would expect from the founder of the Air Pirates group, whose style was based on the pioneers. Unfortunately the writing is completely mad, featuring characters like Billie The Giant Space Bunny, Micky Mouse and Jabberwocky. It sounds great, of course, but is frankly unreadable. Far, far too many drugs...~DAR

DAN TURNER HOLLYWOOD DETECTIVE

Malibu: *One-shot ('Lights! Camera! Murder!') 1990*
Eternity: *One-shot ('Dark Star of Death') 1991, one-shot ('Ace in the Hole') 1991, one-shot ('Homicide Hunch') 1991, one-shot ('Star Chamber') 1991*

Hard-boiled *Dan Turner* ran an impressive seventeen years in pulp magazines from 1934, starting a parallel career in comics in the 1940s, all written by Robert Leslie Bellem. The squarebound Malibu one-shot reprints examples of both, while the Eternity issues have John Wooley, the writer of a 1990 *Dan Turner* movie, adapting pulp stories. He's never a few steps from violence, and there's a rough and ready fast-talking attitude to Turner, as there was to many of his contemporaries, but time has diminished his personality to cliché, and the plots aren't sophisticated enough to overcome that. Presumably writing at speed and paid by the word, Bellem's stories follow a strict formula that juggles dames and corpses with a final page revelation. Artists Kevin Tuma and Gary Dumm aren't up to the evocation of 1940s Hollywood that added atmosphere to the original stories, and their stuff figures are put to shame by the reprinted 1940s back-ups drawn by one Adolphe Barreaux. Comics have served up plenty of better detection stories.~FP

DANCES WITH DEMONS

Marvel UK/Frontier: *4 issue miniseries 1993*

A Native American college student, discovers his dying grandfather is a spiritual guardian known as The Ghost Dancer. His investiture as the new Ghost Dancer involves ordeals and confrontations with demons. Simon Jowett delivers a solid rites-of-passage thriller, ably abetted by Charlie Adlard whose style adapts well to both campus life and the supernatural. The peachy colour work from Tony Lee is also an asset as is Ed Perryman's out-there costume design. A mainstream Marvel title with intercourse as part of its contents certainly makes it a conversation piece, if only in terms of editorial laissez-faire.~SW

DANCING WITH YOUR EYES CLOSED

Iconografix: *One-shot 1992*

A lonely guy in a new city joins an improvisational dance group that opens him to alternative ideas, but he eventually finds them as hidebound as conventional acquaintances. An admirable attempt by Joe Zabel to try something different, to be filed under "worthy but dull".~WJ

DANGER GIRL

Image/Cliffhanger: *4 issues 1998*
Cliffhanger: *3 issues (5-7), 1 Special 1999-2001, 2 issue miniseries ('Kamikaze') 2001*

Perpetrated mainly by J. Scott Campbell, 'Danger Girl' is not a person, but an organisation, a top-secret force of elite female operatives, who are, of course, told what to do by a man. By sheerest coincidence, all of them are shapely and gorgeous and, while competent, assertive and independent, keep having adventures that cause them to wear skimpy fetish outfits, or lose their clothes altogether. Protagonist Abbey Chase, an archaeologist and adventurer newly recruited to the team, tries hard to be Lara Croft, but comes across more like Kenny Everett's Cupid Stunt. Talk about having your cheesecake and eating it too. The first issues were a huge success, with prices skyrocketing (particularly on the chromium and tabloid 'Danger Sized' variants), but the aeons-long gap between issues caused much of its initial audience to drift away to newer, bustier titles. The Special was a flip-cover package with a fantasy 'TV Pilot' for the series on one side, and a dream sequence for junior member Silicon Valerie on the other. It's notable for guest artists Joe Chiodo and Arthur Adams, but virtually content-free. To keep the franchise alive, 'Kamikaze' was released with Tommy Yune writing and drawing. It manages to be a bit less sexist than the original.~HS

DANGER TRAIL

DC: *5 issues 1950-1951, 4 issue miniseries 1993*

The 1950s issues feature superspy King Faraday in adventures with agents of the Iron Curtain. Lovely art by Alex Toth and Sy Barry doesn't disguise the fact that they're unexceptional espionage tales, sought after today only because of their rarity. The 1993 miniseries, garnished with Paul Gulacy covers, sets Faraday and the lovely Natalia against the agents of Kobra. Written by Len Wein, drawn by Carmine Infantino, it's even duller than the originals.~HS

DANGER UNLIMITED

Dark Horse: *4 issue miniseries 1994**

Depending on your point of view, this is either a homage, pastiche or bare-faced rip-off of Marvel's long-running *Fantastic Four*. Written and drawn by John Byrne (who enjoyed a long, critically acclaimed, run on the FF during the 1980s), the story deals with the experiences of Calvin Carson, aka Thermal, who wakes up after seventy-five years of suspended animation to learn that his team-mates and family are dead and that the Earth is ruled by alien invaders. Events yo-yo between flashbacks to the original team and the formation of a new one in Calvin's present, giving us precious little of either before the series ends. All four issues have back-up stories featuring the Torch of Liberty, a character owing as much of a debt to Captain America as Danger Unlimited do to the FF. The promised further adventures never materialised.~JC

DANGLE

Cat Head: *1 issue 1991*
Drawn & Quarterly: *4 issues 1993-1994*

Lloyd Dangle's strips, broadly speaking, fall into the category of autobiographical comics, and as such he has substantially less of interest to relate than many others, and takes a long time to tell it, particularly with a strip about domestic conflict in 3. His scratchy style of cartooning often appears unformed, and the gag effects he attempts just don't really have the power they should. The Cat Head issue is reprinted as the first Drawn & Quarterly comic.~WJ

D'ARC TANGENT

ffantasy ffactory: *1 issue 1982*

Only issue of a projected sixteen part series, this is a science fiction fantasy tale that sets itself some epic targets. When a surveyor is killed without reason, his mate is ordered to report to an agent on the only other planet where such an incident has occurred: Earth (17th century

France to be precise). There she is discovered by the superstitious natives and will be burned at the stake unless her ship's computer can program an Arc Tangent unit to save her. Created by Phil Foglio and Freff and drawn in a more realistic style than Foglio has since become associated with, the magazine-sized issue can be read and enjoyed in its own right but its an introduction that really does make you wish there were more to follow.~NF

DARE:The Controversial Memoir of Dan Dare

Monster Comics: *4 issue miniseries 1991-1992**

It's a mystery why *Dare*, reprinted from British anthology *Revolver*, was issued under Fantagraphics' short-lived Monster Comics banner. Grant Morrison and Rian Hughes' radical re-think of the Pilot of the Future probably upset a lot of fans as a prime example of what happens when the desire to make all superheroes 'adult' runs riot. The future is once again grim, with food riots, Space Fleet HQ being turned into yuppie flats, and a crippled Dan Dare returning from retirement as a propaganda tool for the unpopular right-wing government. Rian Hughes draws in an ironic Jetsons style as Dare begins to smell a rat while investigating Jocelyn Peabody's supposed suicide. Morrison relies on simplistic politicking to give the strip an edge, alongside shock revelations about Dare's previous behaviour. Involving, but leaves a nasty taste in the mouth.~FJ

DARE the Impossible

Fleetway/Quality: *15 issues 1990-1991*

Reprinting the Dan Dare stories from British science-fiction anthology comic *2000AD*, *Dare the Impossible* introduced American audiences to some of the earliest work produced by artist Dave Gibbons, who made his name on the other side of the Atlantic with Watchmen. Reviving the old Eagle comic character in little more than name, the Dan Dare of the title was a descendant of the original, and has his adventures in the further-flung future. Often violent, but always fast-paced and entertaining, with clones, big monsters, aliens and, of course, the Mekon, it's worth picking up from the cheap boxes if you can find it.~JC

DAREDEVIL

Marvel: *Series one 380 issues, 11 Annuals, 1 Giant-Size 1964-1998, series two 40 issues + 1998 to date*

Daredevil was the final spurt of Marvel's initial creative orgasm. It was also the least original, applying the name of Lev Gleason's defunct character to the costumed identity adopted by blind Matt Murdock as a surrogate Batman. When blinded as a child, Murdock's other senses increase and his agility multiplies thanks to the accident responsible for his loss of sight involving a nebulous radioactive cocktail. Stan Lee collaborated with Bill Everett on 1, then Joe Orlando before Wally Wood arrived with 5 to provide Daredevil with the distinctive horned red bodysuit he's traded in almost ever since. These stories establish Daredevil as New York's urban crime-fighter, and someone who overcame the impoverishment and surroundings of his upbringing to become a noted lawyer. His partner Foggy Nelson and secretary Karen Page provide a soap opera cast. The best issues of the first year have a courageous Daredevil outclassed facing the Sub-Mariner in 7, and 10-11, written by Wood, but with Bob Powell heavily involved in the art, introducing the Ani-Men, a silly team of villains who recur over the years. Disagreements over these issues led to Wood's departure.

Then primarily known for romance comics, John Romita claims he lacked the technique to illustrate a superhero, and needed uncredited Jack Kirby layouts on 12. He was a quick learner, and graduated to *Spider-Man* leaving Gene Colan as penciller with 20. The stories? Well, they filled the pages as *Daredevil* increasingly looked the runt of Marvel's litter. Stan Lee plotting and scripting eight monthly titles in addition to acting as managing editor was an extraordinary output, and as praise was lavished on Marvel he expended more effort on the winners. Daredevil was treated very much as a second rate Spider-Man, fighting more and more super-powered villains. The prevailing inanity is exemplified by Murdock creating a new identity to fool his suspicious colleagues in 25, masquerading as his confident brother Mike, who must later pretend to be blind also. While Colan's fine-lined flowing pencils are never less than gorgeous, Lee only serves up the thrills for the final third of his run, by which time he'd relinquished several other titles. Daredevil and Dr Doom are both surprised in 36-38, Mike Murdock departs in 42, there's a sprightly encounter with the Jester in 44-46, and 47 is a decent stab at contemporary social problems. It concerns a Vietnam vet who's run up debts with the mob, and while not exactly subtle, Lee's heart was in the right place. In 50-52 pre-Windsor Barry Smith drops by with his early Jack Kirby imitations, not very good and unsuited to a character requiring grace and athleticism, and so does the Black Panther, as Roy Thomas writes 51-71.

Thomas' high point is dispensing with superhero convention by having Murdock reveal his other identity to Karen Page (57), causing their relationship to fracture, and her eventual departure to try her luck in Hollywood. It's an unpredictable and well handled piece of soap opera amid standard superheroics. Colan's art, meanwhile is hitting peaks and troughs under assorted inkers, George Klein from 46 (good), Syd Shores from 55 (um, well...) and Tom Palmer from 76 cementing a classic 1970s art partnership. After Thomas there are few high points for several years. In 81 Daredevil begins sharing his life and comic with the Black Widow, who is title featured on 92-107. It's an interesting idea that rarely gels, although the pair are gorgeously drawn by Al Weiss and Bill Everett in 83. They move to San Francisco in 87, but a few establishing shots and splash pages apart, there seems little point. Some life returns with writer Steve Gerber's arrival on 98, and his introduction of a memorable villain in the hallucination inducing Angar the Screamer. Colan and Palmer are away by this point, and Gerber's longest running penciller is the very ordinary Bob Brown from 107. Oddly, though, it's with Brown's arrival that Gerber makes a breakthrough, continuing plots from the short lived *Shanna the She-Devil* comic and an audacious pair of villains to 112 for his best issues. It's a brief blip in the general indifference, though, as numerous following creators go through the motions. Marv Wolfman does supply moments, but never a completely good story from first page to last. The introduction of family man hero The Torpedo leads to good portions of 126, 127 and 134, and without credits you'd assume the strangely poignant 128 to be a Gerber effort. An astronaut creates solid light steps to the stars, while Daredevil battles a villain called Death Stalker (introduced in 114) whose touch kills. 129 characterises the previously ludicrous Man-Bull while getting him into a china shop. Wolfman should also be given credit for hanging a plot with the Jester on the basis of video manipulation, technology then still a decade away, in a story pencilled by John Buscema in 136 and 137. 131 introduces Bullseye, the lethal assassin who'd have a lasting effect on the title, but it's a mediocre comic. As is almost everything else until Jim Shooter arrives to write with 144.

In the wake of succeeding material, issues between 144 and 158 have been unjustly forgotten. By this point Daredevil was hovering on the verge of cancellation, and Shooter's start is shaky, but when Gil Kane arrives to pencil 146 he takes off, with Kane co-plotting later issues he pencils (147, 148, 151). The run starts with a simple, but well crafted story of Daredevil, bereft of his heightened senses, facing Bullseye, and he's then involved in the machinations of an old villain. Killgrave the Purple Man was as daft a piece of whimsy as he sounds, yet able to control others with their having no memory of it. This ability is put to excellent use over the following issues, which also introduce a charming mercenary Paladin (150), and the ongoing threat of Death Stalker. It's with the soap opera elements that Shooter, and his successor Roger McKenzie from 152, excel. Murdock is courting another secretary, Heather Glenn, whose father appears a complete rogue. She discovers the truth of Daredevil, while well-plotted circumstances lead to a schism between Foggy Nelson and Murdock. The tension is cranked up issue by issue until an excellently worked finale with several villains in 154, by which time the comforting slanted panels and confident pencils of Gene Colan are back. A collection is long overdue. 155-158 solve the mystery of Death Stalker, return both the Ani-Men and Black Widow, and guest star the Avengers, but aren't as memorable. 159-161, 163 and 164 are best sampled via the 'Marked For Death' collection, as the paper Marvel used for their comics at the time was almost transparent, and their printing muddy. They include the best Bullseye effort to that point, and Daredevil facing off against the Hulk, another of those stories where he's hopelessly out of his depth it would seem, but excellently handled. Almost as good are battles against standard Marvel villains Dr Octopus in 165 and Gladiator in 166. A fill-in takes us up to the landmark 168.

---

* Available in a collected edition

Despite the number of top rank creators who've provided *Daredevil* material there's one whose name is indelibly stamped all over the first series. Frank Miller contributed to less than ten percent of the run, starting by drawing McKenzie's stories in 158 and co-plotting from 165, yet his effect on both the title and the wider sphere of superhero comics was immense. Artistically he was strongly influenced by Gil Kane, but developed a grittier style played up by the accomplished inking of Klaus Janson. Miller wrote alone from 168, introducing mysterious female assassin Elektra, revealed via continuity implant, to have been Matt Murdock's college love. Miller kept returning to Daredevil's earlier days, explaining away illogical aspects of his emergence via the introduction of surly mentor Stick, but most prominently in re-establishing him as a street level superhero dealing with thugs and gangsters. Gang boss The Kingpin, his assorted minions, Bullseye and Elektra all play through a story broken into chapters, but essentially occupying 169 to a glorious conclusion in the justly renowned 181, with a coda in 182. Bullseye had been transformed by Shooter, but Miller unleashes the full potential of a callous killer able to turn any object into a lethal weapon. He also transforms the previously forgettable Kingpin into a formidable opponent who rarely dirties his own hands, takes relish in tormenting Heather Glenn, and creates middle-aged reporter Ben Urich who discovers Murdock's secret and has to live with that knowledge. The 1990s reprint collections of this material rather callously scythed through and separated stories, but the current series of *Daredevil* books bearing Miller's name restores the chronological order.

183-184* is a teaming with The Punisher written by Miller two years previously, when spotlighting drugs in schools was considered too controversial for publication. Miller had upped the ante considerably since then. With his plots pulled together Miller drifts for a little, filling the comic with ninjas, and Klaus Janson is promoted to pencilling Miller's layouts. The next major plot runs to 190, but there's a nagging feeling of recycling until Miller ends his run with the top notch 191 featuring a very different encounter with Bullseye. Janson stays to 197, with 192, a forgotten gem written by Alan Brennert in which Ben Urich deals with the moral implications of his career.

Former *Batman* writer and *Daredevil* editor Denny O'Neil was a logical choice for the next writer, but despite his reputation and experience, sandwiched between two runs of Frank Miller's writing he's second best. He doesn't shy from controversial issues, and while his dabbling with Irish politics is ill-advised, O'Neil has moments of note. The final appearance of Heather Glenn in 220 being one, although the story descends into silly Venetian villains from there. The best aspect of O'Neil's issues is the gradual emergence of David Mazzucchelli into the top tier of comic artists. Starting as a strong action artist in 209, he merges the fluidity and grace of Colan with Kane's instinctive storytelling, incorporating many of Miller's visual standbys. He's extremely adept at producing interesting panels just using figures on a white background, and his sepia-toned Two-Gun Kid sequence in 215 is stunning. It looks even better in the collection 'Love's Labor's Lost' incorporating all non-crossover issues between 215 and 226. Miller writes the passable 219 and 226, but 227 on was a different proposition. Karen Page's Hollywood dreams disintegrated into an existence as a crack whore, and through her the Kingpin learns Daredevil's identity. Collected as 'Born Again', other elements of the story include Catholicism, an insane patriot, a great teaming with Captain America, and the introduction of Matt Murdock's mother. Mazzucchelli, now inking his own work, deliberately modifies his style to ape Miller's art, and both depart after 233.

Oddly, it's Mazzucchelli who's initially missed the more, with a succession of artists illustrating Ann Nocenti's stories from 235. Until the arrival of John Romita Jr on 250 the only art of note is from Barry Windsor-Smith in 236 and Todd McFarlane in 241. Nocenti attempts to move Daredevil on a little, relentlessly hammering broad themes such as redemption, and the empowerment of the self, and expands on Miller's introduction of Catholicism. These are murky grounds, though, and Nocenti's scripts descend into muddled philosophy and belly-flop far more often than they succeed. A mistake is restoring the relationship between Murdock and Karen Page only to rehash in protracted fashion the same issues Thomas dealt with concisely twenty years previously. Of course, it's unlikely they shared many readers. Another mistake is seizing on people referring to Daredevil as "Devil" as an excuse for strained investigations of satanic connections and motivations, leading to Daredevil wandering through hell. Nocenti is better in more straightforward costumed adventurer territory, introducing the schizoid killer Typhoid Mary in 254, and turning in a comic battle with The Blob for 269. Her relentless moralising wears very thin, with a script in 288-290 attempting to contrast Daredevil and Bullseye as two peas from the same pod a step too far. Her last few issues, though, introduce another good new artist in Lee Weeks, helped by inker Al Williamson, in place since 248.

Dan Chichester is an intelligent writer, but the quality of his stories varies. He's in place until 332, but never tops 'Last Rites' in 297-300*, ending, for some considerable while, the Kingpin's stature as an untouchable crimelord. It's a powerful and affecting story, well drawn by Weeks and Williamson. 304 is a decent night in the life tale, but thereafter Chichester concentrates on devising clever methods to tell a story, relegating clarity to an afterthought. He's best remembered for 'Fall From Grace' in 319-325*, but this is an overblown failure. By now Chichester has found his artistic match in Scott McDaniel, who prioritises visual innovation over telling the story. At the end Daredevil has a new armoured costume, and the wider world believes Matt Murdock dead. Chichester's departure highlights that at least he attempted to avoid retreading the familiar paths, as Daredevil sinks back into the morass of ho-hum comics, although if you want to see how bad Warren Ellis once was, try 343. Matt Murdock returns. The red costume returns. Even Gene Colan returns (in 363, 366-368, 370). The best return is Murdock and Nelson's law firm, a dramatic springboard unique in superhero comics, now with an added twist of a formidable new senior partner. The best art in later issues is from Cary Nord and Matt Ryan (most of 348-365), depicting Murdock very much in the Wally Wood style, and at least he finally comes clean about his other identity to Foggy Nelson, killing one old plot stone dead. The first series ends disappointingly with Chichester and Weeks returning for a humdrum final issue.

It's a damning comment on the creators involved with the assorted annuals that the first in 1967 by Stan Lee and Gene Colan has never been topped. It's an enjoyable romp that has Electro gathering Daredevil's then most prominent villains, every one of them stupid, to gang-up on him. Second best is Joe Kelly and Bernard Chang's teaming with eccentric mercenary Deadpool in 1997. This run is well-served by

* Available in a collected edition

collections, with two *Marvel Masterworks* editions covering 1-21, while the cheaper black and white *Essential* paperback runs to 25. All Miller's issues are available, and many since.

Notwithstanding reservations about negating a historic run for the few extra readers who'd sample a new number one issue, the second series has largely been a triumph, presenting the best *Daredevil* seen in fifteen years. In 1-8* Kevin Smith writes a top class page-turner that pushes all the right buttons. It finally resolves the Karen Page problem in controversial fashion, lands Daredevil with a baby, and redefines him for a new generation through a manipulative old villain, mysterious for much of the story. The art is dazzling, the best since Mazzucchelli, as Joe Quesada and Jimmy Palmiotti pull Daredevil out of the darkness, and they even write a perfectly acceptable fill-in to cover someone blowing a deadline between 11 and 13. At this point David Mack is writing, and he delivers a viable, if prolonged story pitting a deaf assassin against the blind Daredevil, which works better than it sounds, and delving into the Kingpin's background while he's on trial. The ending leaves the Kingpin with his own disability. Mack makes a good fine artist, but a wretched comic artist on 16-19, stubbornly refusing to compromise his art for the benefit of the story. A shame, because new writer Brian Michael Bendis hits the ground running, focussing on Ben Urich's assignment being to cover the Kingpin's trial, while his instincts pull him back to the psychiatric treatment of the son of an old villain.

Bob Gale with pencillers Phil Winslade (drawing on Colan) and David Ross, produce the excellent 20-25. Part courtroom drama, part mystery, Matt Murdock is asked to prosecute Daredevil for criminal damage. He knows he's innocent, yet takes the case to investigate further as he also knows his accuser is telling the truth. The tension is superbly played, and the eventual revelations match it. Bendis has written every issue since, easily adapting the type of crime dramas he was known for to *Daredevil*. He stretches his plots, but at the heart they generally contain interesting moral dilemmas, and his penchant for entertaining, yet naturalistic dialogue, via Tarantino films, goes a long way. 26-37 play on a rising gangster discovering the Kingpin knows Daredevil's true identity, yet hasn't dealt with Murdock, leading to that knowledge being splashed across the newspapers, while in 38-40 Murdock must defend a fellow superhero accused of murder. Alex Maleev's stylised art might not be to all tastes, being dark and scratchy, but the occasional problem with storytelling apart, he is very good, and with high expectations for the Daredevil movie in 2003, the parent comic is in good shape.~WJ

Recommended: 37, 38, 44-46, 147, 151, 160, 161, 163, 165, 166, 168-173, 179-182, 191, 192, 227-233, 297-300, series two 1-8, 20-26, 32, 36, 38-41

DAREDEVIL COMICS

Lev Gleason: *134 issues 1941-1956*

First *Daredevil Battles Hitler*, this title received a more orthodox name after its debut issue, in which all the heroes from *Silver Streak Comics* teamed against the Leader of the Reich. Daredevil himself was Bart Hill, orphaned in infancy when his parents were slaughtered by rogue aborigines (!), Bart was raised by 'the savages', and developed expert skills with the boomerang. The adult Bart wins, in combat, the title of chief of the tribe, and the distinctive, red & blue quartered costume it entails. By a series of contrivances too ludicrous to be detailed, he travels to civilisation, discovers that his evil uncle was behind the attack on his parents, avenges their deaths, and decides to stay on an use his newly-inherited fortune, boomerang skills and funny costume to fight for justice!

Although *Daredevil Comics* was initially an anthology, with several lesser heroes – Nightro, Pat Patriot, 13 and Jinx – sharing with the eponymous hero, the lesser features rapidly fell away to leave Daredevil as a solo feature. Daredevil, like most heroes of the 1940's, acquired a sidekick early in his career... in his case, four. In 13, he encountered a kid gang, 'The Little Wise Guys', Pee Wee, Scarecrow, Meatball and Jock. No sooner does DD take them under his wing, than in the very next issue, Meatball dies. Hardly an auspicious beginning. Nonetheless, the Wise Guys, with the luckless Meatball promptly replaced by Curly, proved a huge hit; not the first kid gang in comics, but certainly the most successful, they rapidly made Daredevil a supporting character in what was his own title. By 42, after an unscrupulous newspaperman exposed his identity, Bart Hill ditched the costume briefly, solving the dilemma by faking his own demise so that a 'new' Daredevil could appear. His role in the story dwindled, however, and by 69 he was completely gone, leaving the Little Wise Guys in charge. Under Charles Biro and Norm Maurer, the Wise Guys' morality-play stories, an amalgam of the traditional boy's adventure tale and the crime stories with which Gleason were making their fortunes, were hugely popular at the time, but, despite an appealing art style, look very dated today.~HS

DAREDEVIL Miniseries and One-shots

Marvel: *Graphic Novel ('Love and War') 1986, 5 issue miniseries (Man Without Fear) 1993-1994*, one-shot (Daredevil/Black Widow) 1995, one-shot (Daredevil/Batman) 1997, 2 issue microseries (Daredevil/Shi) 1997, one-shot (Daredevil/Ka-Zar) 1998, 3 issue miniseries ('Ninja') 2000, 4 issue miniseries (Daredevil/Spider-Man) 2001, 6 issue miniseries ('Yellow') 2001-2002*, 1 issue + (Daredevil Bullseye) 2003 to date*

Despite a rich tradition extending back to the early days of Marvel, Daredevil took a while to get in on the miniseries act. The earliest excursion from the monthly title is the oversized graphic novel 'Love and War' by Frank Miller and Bill Sienkiewicz. Very much a product of its time, its painted art by then-darling of the fans Sienkiewicz shows off how printing technology could now deal with something more than traditional linework and flat colours. Its plot, dealing with 'adult' themes of abuse and violence as Daredevil rescues a helpless woman from a perverted sadist, verges too close to voyerism in places to be comfortable. Daredevil/Black Widow: 'Abattoir' by Jim Starlin and Joe Chiodo has the title characters on the trail of a serial abuser. It's an example of structured storytelling and the need to actually be able to tell what's going on in the art coming a poor second to style as Marvel try to convince the masses that graphic novels aren't for kids.

Many of the miniseries are simply gratuitous cross-company team-ups. Neither the pairing with Elektra-alike ninja babe Shi (second issue published as Shi/Daredevil), and DC's fellow urban roof-and-alley worrier Batman add anything to either character. Team-ups with Marvel's own characters have been better. His romp with Spider-Man by Paul Jenkins and Phil Winslade made the most of the two heroes' long friendship, shared history and equal dislike of the Kingpin. It was, though, like its near-contemporary 'Ninja' a weak attempt to divert attention from the fact that the regular title was going through a three year stretch in which it was woefully incapable of hitting anything like a regular schedule. *Daredevil/Ka-Zar* on the other hand, works as well as you'd expect it to.

The best of the bunch have been the miniseries that aimed to expand and flesh out Daredevil's past. *Man Without Fear* is by Frank Miller and John Romita Jr, both of whom presided over long and important runs on the regular title. Miller uses the series to expand on some themes he introduced to the character during his tenure on the title, including Daredevil's links with ninja tradition, and especially his relationship with his Miller-created mentor Stick and the nature of his powers. Romita Jr's art is never the same again, taking on an obvious debt to Miller that no doubt came from working with him so closely. 'Yellow' is by fellow retro-continuity maestroes Jeph Loeb and Tim Sale. The latter's narrative trick of telling the story of DD's early years through diary entries written to his recently deceased lover Karen Page makes for a particularly nice insight into a long ago, more innocent period. It's an ideal read for long-term readers of the character and those completely new to the mythos.~JC

Recommended: Man Without Fear 1-5, 'Yellow' 1-6

DARING ESCAPES

Image: *4 issues 1998*

Houdini, now that he's dead, bases himself in a place called The Overlap. He transforms a demon into a decorative bust made out of a substance called hellite, which corrupts morally the same way plutonium does physically. This mistake earns Houdini a mission of retrieval from his boss "9". What follows includes time travel, his card-playing pal Judas, Pope Cesare Borgia and a cute trainee angel named Kimiel. If this sounds at all incoherent, please bear in mind this is a spin-off from *Spawn* 19-20. Writers Tom Orzechowski and Andy Grossberg indulge their inexperience with over-writing. Their peppering of period characters' speech with contemporary idioms is particularly clumsy. The artwork by Alan Weiss is lush and beautifully rendered by Art Nichols in 1 and Jim Fern in 2-3. Utter codswallop.~SW

DARK AGES

Alternate Concepts: *1 issue 1998*

A mixed bag of burly barbarian tales with the humorous back-up strips outshining the lead. 'Swords of Charahad' is dull and meandering with word balloons obscuring literally entire pages of art, whilst pages with no words at all are so poorly designed that there is no idea of what's happening. Not recommended.~WW

Phoenix Resurrection: DARK ANGEL

Image: *4 issue miniseries 2000-2001*

More of the Dark Angel mythos from creator Kia Asamiya. Kyo and Sekiha are winged Spirit Guides to Junior Saints Dark Yokuo and Susa Saiga respectively. The junior saints aspire to being the next Phantom Saint of the Red Phoenix, currently their master Sou-Sama. When Dark is promoted he is set the task of travelling across the land of Toi with Kyo. They encounter Toi's ruler Leen, The Phantom Saint of Blue Dragon, and her Spirit Guide Shiki who recognises Kyo. A mighty conflict ensues despite combat between Saints being forbidden. The first two issues really crawl and Asamiya's script, full of challenges and exposition, is dull – something lost in translation perhaps. The lovely colour work by Jonathan D. Smith lends considerable body to this slight package.~SW

DARK BLUE

Avatar: *4 issue miniseries 2001**

Frank Christchurch is a cop who has truly gone over the edge. Savage, compulsive and psychotic, Frank hunts for a murderer in a world that doesn't seem to care. A bleak and twisted take on an old, old story from Warren Ellis and Jacen Burrows with the now mandatory Ellis twist in the tail. An acquired taste.~WW

Strange Tales DARK CORNERS

Marvel: *One-shot 1998*

Inconsequential anthology of three features under Marvel's short lived *Strange Tales* horror imprint. Cloak and Dagger retread familiar ground. Morbius wallows in reminiscences of his fiancée prior to his vampiric affliction. An elemental goddess provides a morose Gargoyle with a purpose in a prelude to *Silver Surfer* 139. All three stories suffer from insufficient space to permit any substance.~APS

DARK CROSSINGS

Image/Top Cow: *One-shot ('Dark Clouds Rising') 2000, one-shot ('Dark Clouds Overhead') 2000*

Teaming of Top Cow's mainstays Tomb Raider Lara Croft, Witchblade Sara Pezzini and Jackie Estacado who controls The Darkness. Serving largely as a way of introducing short-run series Butcher Knight, also previewed in both issues, it's a shoddy, incoherent story stretching the ages. More fool anyone who paid $5.95 per issue for this rubbish.~WJ

DARK DOMINION

Defiant: *10 issues 1993-1994*

Michael Alexander has learned how to shift to the "Quantum Field", where he fights demons that feed off the fear that permeates New York. An idea with potential, and a good evocation of urban paranoia, but the rules governing the Field and the demons are never spelled out, reducing the fights to random splatterings. Sometimes the demons are used well as metaphors for madness or interior struggle, but too often they're treated as entirely external, so that Alexander can make someone happier simply by shooing off their anxiety-demon, and this makes a nonsense of any characterisation.~FC

DARK FANTASY

Apple: *1 issue 1992*

Three horror stories by Kevin Schnaper. If they have any merit, it's as tribute to pulp science fiction, but taken on their own, they're feeble ideas, poorly told.~FC

DARK GUARD

Marvel UK: *3 issue miniseries 1993*

The more popular of Marvel UK's early 1990s superheroes are pulled out of time and united to fight a threat to the future. Death's Head, Killpower, Motormouth and Dark Guard all feature, but apart from the occasional piece of nice art from Carlos Pacheco it's poor stuff.~FP

DARK HORSE COMICS

Dark Horse: *25 issues 1992-1994*

This anthology title from Dark Horse contains serialised tales of licensed properties alongside features owned by Dark Horse. Robocop, Predator, Indiana Jones, Aliens, Star Wars and James Bond share the pages with the lacklustre Time Cop (1-3), the introduction of X (and consequently *Comics Greatest World*) in 8-10, and other Dark Horse heroes.

Predator and Aliens features come to dominate the title; best of the Aliens tales is 'Horror Show' by Sarah Byam and David Roach in 3-5. The Predators generally come off better, switching times and locations. A group of paintballers get theirs in the prelude to Bad Blood in 12-14, there's a good Chuck Dixon and Alcatena tale in 10-12 and Howard Cobb's art in 21-22 is excellent. From 19 -24 there are segments of Comics Greatest World characters each issue. Reducing from four to three features per issue with 12 is an improvement, but there's still a real feeling of inconsequential filler material throughout. From 20 it's two features per issue, but the final issues are the worst of the run, with a very poor Mecha effort, an over-the-top cartoon-style Aliens and a daft James Bond story.~WJ

DARK HORSE Graphic Novels

This review covers material published by Dark Horse either as a new graphic novel for the American market or as a differently formatted edition of material published elsewhere. Text and illustration books are not covered, nor are straight collections of stories serialised elsewhere. In the second category, *Art Adams' Creature Features* collects his 'Creature from the Black Lagoon' one-shot (part of the *Universal Monsters* series), the *Godzilla Color Special* and a couple of short stories, including one featuring Monkeyman and O'Brien. *The Collected Short Stories of P. Craig Russell* samples work from throughout Russell's career, including early pieces like 'Dance on the Razor's Edge' and 'The Starship Remembrance', and his more recent adaptations of H.P. Lovecraft's 'From Beyond' and O. Henry's 'Gift of the Magi' *Al Williamson: Hidden Lands* reprints strips he produced during the 1950s for Atlas, Charlton, Dell and E.C., most of which have not been reprinted before, plus sketches and photographs from Williamson's scrapbooks.

Flood! (reprinted in 2002), was originally published in 1992 by Eric Drooker, whose artwork, in black, white and blue, has a non-realistic style, blocky almost like woodcuts, varying from stunning single image pages to ones containing sixty-four and even one-hundred-and-twenty-eight panels. Such as it is, the story is an examination of life in New York, through dream logic, from its simple pleasures to its inhumanity, drawing ever closer to an apocalyptic ending. Somewhat lacking in substance, this is nonetheless, visually impressive. The two volume *Little Annie Fanny* is a collection of the Harvey Kurtzman and Will Elder strip from *Playboy* (with additional artistic contributions from Jack Davis, Frank Frazetta, Russ Heath, Arnold Roth, Al Jaffe, William Stout and Sarah Downs and additional writig from Larry Siegel). The strip is a social and political satire of America between 1962 and 1988, presented through the adventures of the sexy, eponymous heroine, whose adventures in the film industry provide the plots (such as they are). The humour has dated somewhat, but there's still a great deal of pleasure to be had here. *Mac Raboy's Flash Gordon* begins a reprint of the artist's run on the *Flash Gordon* newspaper strip, and fans of his work will not be disappointed.

Dark Horse issued two volumes collecting Moebius strips, many of which first appeared in English in *Heavy Metal*. Exotics (including 'The Horny Goof') and *H. P.'s Rock City* (including 'The Long Tomorrow') are tidy colour editions, nearer paperback than comic, and though the artwork has been reduced in size, the print quality is excellent. A third volume collects 'Madwoman of the Sacred Heart' from *Dark Horse Presents* whilst also completing the series. Though none of these strips can be described as major, Moebius' imagination and the beautiful artwork are captivating. *Rocco Vargas* collects four stories about the square-jawed science fiction adventurer into one volume, three of which were previously been published by Catalan. A fifth album, 'The Dark Forest' was then published separately. Daniel Torres' style changes through the series with the early tales more stylised and reminiscent of Joost Swarte, but later adding heavier lines, bearing some comparison to Charles Burns. There are two *Aquablue* volumes by Olivier Vatine and Thierry Cailleteau, the story of Tumu-Nao, who, as a baby, was the only survivor, apart from a robot nanny, of a collision with asteroids. After eight years in space, he lands on Aquablue, a planet that is ninety-seven percent water. The first volume covers his coming of age and first clash with representatives of Unitec, which plans to exploit the planet, leaving it uninhabitable. In the second volume, Tumu-Nao travels to Earth to claim an inheritance that may help save the planet. Unfortunately, although Aquablue is visually impressive, writer, Cailleteau fails to make Tumu-Nao an engaging character.

Dark Horse also picked up the U.S. rights to five 'adult' graphic novels, first published by Victor Gollancz in the U.K. *Kling Klang Klatch* is a hardboiled, cyberpunk, anthropomorphic tale in which Inspector McBear, antagonistic towards the sentient machines around him, tries to unravel the mystery of the death of a pregnant Panda, encountering racism and other socially corrupt forces along the way. Ian McDonald and David Lyttleton's otherwise telling, black comedy is marred by the latter's distorted figures and confused storytelling. After suffering a beating at the hands of thugs while living on the streets, Banshee is rescued by a young woman, Etty, who takes him in and gives him a book she wrote as a child. This starts *The Minotaur's Tale* by Al Davison, and Etty's book re-tells the myth of the Minotaur in terms of deformity and social outcasts, giving Banshee hope and a different perception of his own worth. This is a terrific album, fiercely composed and rendered in a number of styles by Davison. In *The Luck in the Head*, poet Ardwick Crome is inspired by dreams of a ritual of the same name that involves women chasing a lamb. The woman with the insect's head gives him a sword and tells him he must kill Mammy Vooley, queen of the city. It's written by John M. Harrison, based on his own short story from *Viriconium Nights*, about a decadent and ever-shifting fantasy world. Individually, some of the panels and pages are interesting, even beautiful, but otherwise Ian Miller's artwork is an incoherent mess. *Signal to Noise*, by Neil Gaiman and Dave McKean and *A Small Killing* by Alan Moore and Oscar Zarate garnered critical approval, but neither are high points in their writer's career and in both cases are let down by the hollow, unsympathetic artwork. The former concerns a dying director's final movie about the Apocalypse as feared by villagers at the end of 999, initially composed only in his head. Gaiman's story is poignant and philosophical and McKean provides some fine illustrations, even narrative in places, but deliberately or not, too much of what McKean does is 'noise', obscuring the slight story, reminiscences and film-making. The latter is a heavy-handed condemnation of the advertising industry as Timothy Hole suffers a slow mental breakdown because of the compromises made during his life.

Cyberantics is ostensibly a children's book about ants, in which a cybernetic ant, Ari, is sent to investigate an ant's nest by author, Stanislaw Mayakovsky (a.k.a. Jerry Prosser), and saves its workers from subjugation by a rival species, as well as finding a new queen to ensure the nest's survival. With illustrations by Rick Geary, it's well produced and informative, though not compelling. Story elements were used later in Prosser's *Aliens* 'Hive' series. Dead To Rights, by Mike Kennedy and Francisco Paronzini (with Randy Emberlin inks), is based on a video game blending action cinema and film noir. The graphic novel provides some background to the game, whilst remaining essentially separate as the lead character, Jack Slate, remains unseen. It's a twisted tale of death and treachery, with good artwork similar in style to that of Eduardo Risso. Released from Mad magazine, *Don Martin's Droll Book* contains single page gag-strips as well as several longer stories, including 'The Nutheads' (in newspaper strip format) and a story featuring private eye, Fester Bestertester. Martin's humorous-in-themselves, large-footed characters with their elongated chins and droopy noses are much in evidence and this is a lot of fun.

In *Fax From Sarajevo*, Joe Kubert illustrates the events told in faxes from Ervin Rustemagic, trapped in war-torn Bosnia during the conflict that began in 1992. The novel describes how Rustemagic and his family lose their home and eventually come to escape the city with the help of his foreign friends, interspersed with the stories brought to them by friends, family and strangers of the horrors visited upon the Bosnians by the Serbs. This is a vividly illustrated, moving account of the real nature of war and of courage and desperation in the face of everyday danger. Will Eisner's *Last Day In Vietnam* contains five short stories of reminiscences from his days in Vietnam, each told by a different soldier he met. Eisner captures a sense of fear despite the bravado behind each story, while perfectly illustrating each as comedy or tragedy. Murder Mysteries is the adaptation of a Neil Gaiman story by P. Craig Russell. It's a beautifully rendered, but ultimately illogical and unfulfilling fantasy, its narrative set in Heaven, with the angels assigned to designing such things as 'love' and 'death', involved in a murder.

Happy Endings is a 2002 replacement for the annual *Dark Horse Maverick* one-shot. Editor Diana Schutz asked contributors to follow the theme of the title. Of the fifteen strips, few are particularly praiseworthy, the best coming from Bernie Mireault (funny story about rescuing a cat from the vet), Katie and Mike Mignola (odd, well-drawn story by Mignola's seven-year-old daughter about a magician whose best friend is a snake), Jim Mahfood (his Grrl Scouts have just another day in the city), Tony Millionaire (Sock Monkey learns about home) and Frank Miller (mad panels and single-page strips, very blackly humorous). *Tales of the Slayers* is based on *Buffy the Vampire Slayer* and is a history of sorts of the various Slayers, beginning and ending with chapters by creator, Joss Whedon, featuring the first and last (so far) Slayer. The chapters in between are written by Amber Benson (revolutionary France), Jane Espenson (Regency England), David Fury (wild west), Rebecca Rand Kirshner (Nazi Germany) and Doug Petrie. In such contexts, these have been turned into thoughtful and agreeable tales, with good artwork from Leinil Francis Yu, Ted Naifeh, Steve Lieber, Mira Friedmann and Karl Moline and standout work by Tim Sale, P. Craig Russell and Gene Colan.

Pete and Moe Visit Professor Swizzle's Robots by Vincent Giarrano, is pretty much what the title says, other than an accidental minor rampage by a runaway giant robot. Short and slight, it's aimed at younger readers, but does have some charm. In the year 2020, Freeman Jackson is given the power of truth by Those B4 (including Geronimo and Bruce Lee), who want him to fight Toxen, the spirit of racism in America. Racist organisations such as Original Man, the National Church of the Holy Originators, the Indigenous Revolutionary Party, the Asian Persuasion Coalition and the White Right Militia are led by puppets of Those in Power, the true corporate rules of America. *The Truth*, by Jimmy R. Smith and Nolan Woodard, is therefore a somewhat simplistic, wish-fulfilment, superhero tale, though it does manage to pass on the message that racial divisions serve only those who want to exploit them for money or power. It comes with a CD soundtrack.

Finally, 'Vampires' is a collection of pin-ups and short strips about vampires, by a variety of American and European creators. The finest illustrations come from David Lloyd, Bryan Talbot and Claire Wendling, but the best story is by Yoann and Sfar, whose 'Nosferatu meets Super-Bat', is a very funny pastiche on the differences (or similarities) of life for vampires and superheroes.~NF

DARK HORSE MAVERICK 2000

Dark Horse: *One-shot 2000, one-shot 2001*

Annual one-shots showcasing the talents of Dark Horse's Maverick imprint. This includes Paul Chadwick, Will Eisner, Frank Miller and Matt Wagner, but despite the dream team line-up, no-one turns in anything that's the slightest bit memorable. Don't be fooled by the names: these comics are not worth your money.~DB

DARK HORSE PRESENTS

Dark Horse: *157 issues (1-152, 5 x 100), 4 Annuals, 1 Special 1986-2000*

Randy Stradley, editor until 87, worked hard to create an anthology that was both willing to be experimental, but also capable of drawing on the work of established creators. At first it previewed new series like *Boris the Bear* or *Trekker* (although the only real success of this period was Concrete) or published an eclectic mix of series that were unlikely to fit elsewhere. They included 'Mindwalk', by Stradley himself (1-4, 20), Roma by John Workman (5, 6, 8, 9, 11) and the forerunner to The Mask, The Masque by Mark Badger (10-15, 18-21). Later previews include Aliens (24, 34, 42, 43, 56, 101, 102), Predator (35, 46, 67-69), Aliens vs. Predator (36), Next Men (54-57), Monkeyman and O'Brien (80, 100-5), Hellboy (88-91,100-102, 151, Annuals 1998 & 1999), Too Much Coffee Man (92-95) and *Cud*'s Eno and Plum (93-95). Homeless creations such as Roachmill (17, 28, 139), Kings In Disguise (42), Crash Ryan (44-46), Mr. Monster (14, 20, 28, 33) and Alien Fire (57-59) were given the opportunity to gain a new audience when their own titles failed.

Throughout, Stradley tried to match known quantities with more difficult or less populist work such as that of Rick Geary (19, 20, 22-24, 44, 53, 56, 57, 59, 60, 82, 87, 92, 100-104, 109), Leopoldo Duranona's 'Race of Scorpions' (23-27, 30-34), Gary Davis' 'Paleolove' (16, 20, 21, 25, 26, 32, 36-39, 43, 68-70, 77-79, 88), Matt Wagner's 'Aerialist' (40, 45), Jodorowsky and Moebius' 'Madwoman of the Sacred Heart' (70-76), Robert Boyd and F. Solano Lopez' 'Buoy' (77, 81-84), Harvey Pekar and Joe Sacco (99, 100-1, 100-3, 100-4, 101,102, 104) and Ivan Brunetti (100-3).

Though the concentration was primarily on writer/artists, teams of creators weren't unknown. John Arcudi's 'Homicide' and 'Creep' employed a number of artists including Gray Morrow (53-55), and other artists of note include Stefano Gaudiano on 'Harlequin' (48-51) and 'Here and Now' (96-98), Jo Duffy's Manga-influenced 'Nestrobber' with Maya Sakamoto (67-69) or the sublimely detailed artwork of Frank Quitely (91-93).

Several longer-running series deserve special mention, whether confined to the title, continuations of other series or preludes to greater things. 'Bob The Alien' by Rich Rice (18-20, 29-32, 39, 40) is a delightfully downbeat series of episodes of an alien adapting himself to big city life. Eddie Campbell's brilliant Bacchus, later self-published, proved itself to a US audience here (32, 37, 40, 44, 46, 52, 57, 71, 76-84, 94-99), while 'Picture of Doreen Grey' (66-70) and 100-2 gave space to his semi-autobiographical Alec. Frank Miller's noir 'Sin City' first appeared in the Fifth Anniversary special and continued in 50-61, with 62 being entirely devoted to it. Dave Cooper produced short stories in 98 and 106 before Dan & Larry's very weird, sweaty, semi-anthropomorphic antics popped up in 128-132. Paul Pope's quirky science fiction saga 'The One-Trick Rip-Off' (101-112*) was an example of the title's urge to promote newer talent and its willingness to give it plenty of space. Steve Niles and Casey Jones' Cal McDonald Monster Mystery, 'Hairball' (102-105), is a sharp, cynical, well-drawn horror story, later released as a one-shot, and Ed Brubaker and Jason Lutes teamed up for 'The Fall' (131-135), a more traditional, murder mystery later collected by Drawn & Quarterly.

Bob Schreck became editor with 88, promoting a higher proportion of less well known creators: Jim Alexander and Robert McCallum's 'Baden' (93-95), Renee French (100-1, 107-112), Jon Lewis (100-1, 124), Robert Loren Fleming and Bill Wray's 'Big Blown Baby' (106), Jack Pollock (100-2, 107-109), mixed in with only slightly better known ones with their own titles (Roberta Gregory, Shannon Wheeler, Terry LaBan, Evan Dorkin, Jason Lutes, Andi Watson, Chynna Clugston-Major). Of particular note, Steven Weissman's 'Bookshelf Phantom' appears in 126, 130 and Annual 1998, Gilbert Hernandez' 'Girl Crazy' in 131 and Stan Sakai's Usagi Yojimbo in 140.

By 124 new editor Jamie S. Rich was attempting to attract to new readers with established characters such as Predator (124, 137), Dan Brereton's Nocturnals (125-127), Kelley Jones' The Hammer (129), Adam Warren's The Dirty Pair (132-134), The Mask (134), Terminator (138) and Aliens (140). Stradley returned to edit with 136, emphasising some self-contained stories each time, but a brief attempt at themed issues (Buffy the Vampire Slayer in 141, H.P. Lovecraft in 142 and Tarzan in 143), left the editorial direction largely unchanged as sales obviously continued to fall. From 140, the Dark Horse Presents title was smaller than that of whichever strip was being promoted. Ghost appeared in 145-147 while Aliens vs. Predator was wheeled out again for 146-147 and even Xena got to visit (148). Buffy the Vampire Slayer, Concrete and Fish Police were the main attractions of the forty-eight page 150 and Angel of 153-155.

20, 32 and 56 are sixty-four page annuals after which the annual became a separate issue. The 1997 annual includes Jason Pearson's Body Bags, Aliens (drawn by Gray Morrow), Jay Stephens and Mike Allred on 'The Stiff', and 'Four Cats' by Paul Pope. Annual 1998 features the first comics appearance of Buffy the Vampire Slayer. Annual 1999's theme is stories of youth including Xena, Hellboy, Usagi Yojimbo, Ghost, Groo, Concrete, Luke Skywalker and the Mask. 'Girls Rule' in the 2000 annual with Buffy the Vampire Slayer and supporting characters from Xena, Ghost, Spyboy and Star Wars. The Fifth Anniversary Special was over a hundred pages of Give Me Liberty, Concrete, Aliens, The American, Roachmill, Black Cross, The Aerialist and Sin City amongst others. So much material was gathered for Issue 100 that it spread over five issues, numbered 100-1 on. Few anthologies lasted as long, fewer still could boast such a large proportion of high quality creators.~NF

Batman: Legends of the DARK KNIGHT

DC: *160 issues +, 8 Annuals, 3 Specials 1989 to date*

This was conceived as a vehicle for Batman stories without creators having to compromise by adherence to the continuity of regular Batman comics. It's since also become a home for individual artistic interpretation of the character. It's impossible to conceive Mike McMahon's brilliant, almost cubist, styling in 55-57 gracing a regular Batman title, yet that it appeared one issue after Arthur Ranson's near-photo-realism speaks volumes for editorial catholicity.

1-20 comprise four stories of five chapters apiece set early in Batman's career, each available collected. Opening with the type of decent but unmemorable Batman story Denny

O'Neil can probably write in his sleep, the best of the early quartet is by Grant Morrison and Klaus Janson. More than fulfilling its title, 'Gothic' (6-10*) is a disturbing brew of public-school brutality, mad monks and compacts with the devil, showing the début of the bat-signal along the way. The O'Neil written 'Venom' in 16-20* initially portrays a Batman out of control, having sampled powerful steroids, but the conclusion doesn't live up to the premise. Doug Moench and Paul Gulacy provide 'Prey' in 11-15, and follow it up in 137-141, but while not bad, they don't approach the highspots of the series. After 20 it would be over a hundred issues until another story longer than four issues, and the first single instalment was 27, establishing a look for Gotham City based on stunning illustrations by Anton Furst (included), and concluding in *Detective Comics* 641.

'Faces' by Matt Wagner in 28-30* is a dense, complex tale of freaks, freedom and finance, and among the best stories to have appeared here. Other contenders are James Robinson and Tim Sale's 'Blades' (32-34*), introducing a new defender for Gotham, and 'Masks', written and drawn by Bryan Talbot in 39-40*, with an utterly convincing portrayal of Bruce Wayne as a deluded alcoholic with a costumed fantasy life. By contrast 'Turf', by Steven Grant and Shawn McManus, in 44-45 falls just short, yet is still a compelling story, taking the video footage of Rodney King as inspiration. Grant and Mike Zeck's 'Criminals' in 69-70 is another fine effort.

There have been few really poor issues, and plenty of artistic legends work on well-crafted stories, including Gil Kane (24-26), P. Craig Russell (42-43*), Russ Heath (46-49), Mike Mignola (54) and Scott Hampton (76-78). Steve Englehart tackles the Riddler, a major Batman villain omitted from his acclaimed 1970s *Detective Comics* run in 109-111, but Dusty Abell's art is blocky and unappealling. The best of the single issue stories are 'Mercy' (37) by Dan Abnett, Andy Lanning and Colin MacNeil, Alan Grant and Kev O'Neill's hallucinogenic return of Bat-Mite in 38*, 'Storm' by Graham Brand, Andrew Donkin and John Higgins (58), and Chris Bachalo and Mark Pennington illustrating Jamie Delano's bleak 'Terminus' in 64 (although it's not as depressing as 'Engines' by Ted McKeever in 74-75). Also worthy of mention is Michael Gilbert's 94, a fond recollection of and homage to past Batman stories. The best annuals are 2, with Commissioner Gordon's unconventional wedding, and the 'Elseworlds' (alternate non-canonical Batman) story in 4, with remarkable art from the team of Joe Staton and Horacio Ottolini. Staton also illustrates J.M. DeMatteis' look into the Joker's psyche in 65-68. Believing he's killed Batman, the Joker settles into an ordinary life and relationship. Also of note, and often forgotten, is James Vance's deftly plotted 'Idols' in 80-82, with good action art from Dougie Braithwaite and Sean Hardy. Set early in Batman's career, a serial killer arrives in Gotham at the same time as a Batman fad hits the city; an intense FBI agent is also on hand to complicate the nascent relationship between Commissioner Gordon and Batman.

83 begins a run of British writers monopolising the title, with almost all falling well short of their best work elsewhere. Of the better efforts Anthony Williams is surprisingly good illustrating an engrossing Dan Abnett and Andy Lanning story in 95-97 and James Robinson's overlong locked room murder mystery in 102-104 is well drawn by Paul Johnson. Robinson turns in a far better tale in the noteworthy 7th annual with good art from Steve Yeowell and Russ Heath, but the artistic highlight of this period is Quique Alcatena's stunningly drawn origin of Clayface in 89-90, after which his 6th annual disappoints. A dull 100th issue largely concentrates on Robin.

Editor to 115, Archie Goodwin maintained the unique nature of *Legends* by resisting crossovers with other Batman titles. With his departure, though, the sanctity was breached. Between 116 and 126 'No Man's Land' treated ongoing *Batman* comics as a single title published weekly, so stories are started here, continued here or concluded here, with under half complete in the issue. The best by far is little but an air-clearing conversation between Batman and Police Commissioner Gordon in 125. As individual chapters 'No Man's Land' rarely shines, and while it works as a whole, a ludicrous amount of money was required to discover this. Presumably people didn't bother, as the previous editorial policy was reinstated with 127, and if to emphasise it *Legends* ran mainly four or five part stories until 153 starting with a sprightly teaming of Batman with Green Arrow by Denny O'Neil and Sergio Cariello. It's not a patch, though, on 'Siege' in 132-136, plotted by Archie Goodwin, and largely scripted by James Robinson after Goodwin's death. It's a dense thriller revealing the Wayne family history, returning Bruce Wayne's most effective love interest, and involving a plan to loot Gotham City. Marshall Rogers' art prioritises style over technique, but the addition of Dannyl Vozzo's well-chosen colours makes for an appealing combination. 'Siege' is as good a story as the title's seen.

There are interesting moments in Doug Moench's psychological study of human nature in 146-148, and a decent concluding issue, but overall the necessary discussion meshes awkwardly with the remainder. 156-161, though are very entertaining. The first three have Dwayne McDuffie concocting a fine, almost Eisneresque, gimmick about a man who can see through the eyes of others, a good plot to hang it round, and then cranking up the tension. The art by Val Semeiks showcases very small bat-ears, but his storytelling is great. John Ostrander's story of James Gordon's past among the crooked police in Chicago returning in spades is also good, and has a part for his niece Barbara as well.

The specials are all by Jeph Loeb and Tim Sale, preceding their *Long Halloween* series, but all with a Halloween theme. They're all good, with Frank Miller an obvious stylistic influence on the art and storytelling, but also more subtly on the writing. It's the first, 'Fears', that's the best, with Bruce Wayne falling in love, and the Scarecrow on the loose to terrorise the city. Sale imbues his frankly stupid costume with a gaunt terror, and this is perhaps the only occasion he appears the master of fear he's supposed to be. The Mad Hatter's appearance the next year falls short, but the psychological profiling of Batman introduced here predominates the third in which Bruce Wayne is visited by ghosts of past, present and future.~FP

THE DARK KNIGHT RETURNS

DC: *4 issue miniseries 1986*, 3 issue miniseries (DK2) 2001-2002**

The Dark Knight Returns is a pivotal series responsible for several key developments in American comics, although at the time DC were taking a chance. Lauded for his Daredevil, Frank Miller's succeeding project *Ronin* had received a lukewarm reception. It took a confident editor (Denny O'Neil) to say "Okay" when given a proposal for a wholesale and uncharacteristic reworking of the company's most popular character in a pricey and untested format. Miller repaid the faith by turning in what remains a career peak. From the well-considered title pun to the extraordinary subtle, unusual and effective colouring of Lynn Varley, *The Dark Knight Returns* is stunning.

It's set ten years after Batman has last been sighted in public. Commissioner Gordon is due to retire and Gotham is plagued by marauding gangs pillaging at will. Batman's old enemy Two-Face has been released, seemingly a reformed man, and certainly a repaired one thanks to plastic surgery, and resumes his former legal career. Events reach a point where Batman can no longer remain a bystander, but this is a different Batman. He's in tune with the times, realising that to deal with society's ills at his age extreme measures are required. That alone is interesting, but Miller counterpoints the re-emergence of Batman and his actions with incessant flashes of public opinion and commentary through TV (a narrative technique pioneered by Howard Chaykin in *American Flagg*), making for an extremely dense read. The use of numerous small panels on each page jumping to a full-page illustration emphasises the iconic effect of the character, and when fellow-icons Superman and The Joker turn up for the second half of the series they receive similar resonant treatment. Miller explores all kinds of opinions pertaining to the concept of the vigilante without reaching a conclusion, but still providing food for thought fifteen years on. Plot, dialogue and art are all well considered, effective and top notch.

It's astonishingly rare that a legitimate claim can be made that anyone has changed the face of their artform, but consider what followed in the wake of *The Dark Knight Returns*. There was a plethora of 'radical' reworkings of established characters, some more successful than others. The miniseries had been popularised and *Dark Knight* had proved that there was a market for a high-priced package. Designers became key personnel at leading publishers, more talented creators were given greater freedom with regard to individual interpretations of characters and concepts, and the collected edition seeped into wider public consciousness. Most important was the return of respect for the creator. Tangentially it also wiped away the final vestiges of the 1960s *Batman* TV show, re-establishing the property as a desirable licensing option. That all of these can be attributed to a single series is remarkable, and that there was a serious and rapid dilution of its strengths and influence shouldn't detract from the achievement. None of the above could ever have been foreseen by Miller, though, who set out to produce a thought-provoking superhero story and succeeded beyond his wildest dreams. In addition to the expected collections, Longmeadow Press produced rather a nice vinyl hardbound edition that also includes Miller's *Batman: Year One* and the story he turned out for the *DC Super-Star Holiday Spectacular*.

In 1986 the expectation line was raised, and DC got what they paid for in 2001: a dashed-off sequel from an uninterested Miller who, after fifteen years, was seemingly finally offered a sum he couldn't turn down. The few moments of wit and style might pass muster from someone else, but Miller is capable of so much more. His spartan and blocky art is at times plain ugly, lacking grace and backgrounds, and the story amounts to Batman, a barely seen manipulative figure, organising the Justice League to battle Lex Luthor, and a farcical conclusion. With dollar signs lighting up the eyes of everyone at DC, Miller forgot the Spider-Man adage that with great power comes great responsibility, and with reader expectation high he failed to deliver.~WJ

Recommended: 1-4

DARK MANSION OF FORBIDDEN LOVE

DC: *4 issues 1971-1972*

One of several experiments with Gothic romance comics, this featured lengthy stories best remembered for their artwork. Typically the writing, by the likes of Dorothy Manning and Jack Oleck, leant more heavily on the romance than the mystery, with the horror element usually confined to creepy-looking houses. Artistically, Tony DeZuniga excelled in the first two issues, with 3 and 4 pencilled less impressively by Ernie Chua. In some respects, though, the comic's visual highpoint was its beautiful painted covers. From 5 the comic was renamed *Forbidden Tales of Dark Mansion*.~DAR

DARK REALM

Image: *3 issues 2000-2001*

Detective Shannon discovers that she is the chosen one of the Dark Realm. Only a rebel lord of hell stands between her and her terrible fate. OK read, all the plot devices used are well-worn so one wonders why they bothered. Buyers probably thought the same, and the series was never concluded.~DB

DARK SHADOWS

Gold Key: *35 issues 1969-1976*

The arcane atmosphere of the cult TV series is reduced to trite soap opera and supernatural clichés at the hands of journeymen creators. The saving grace is the occasional nice cover painting.~FP

DARK SHADOWS

Innovation: *4 issue miniseries 1992-1993, 4 issue miniseries 1993, one-shot 1993*

Based on the 1991 TV series, itself a spin-off from the long-running 1960s series, *Dark Shadows* is primarily the story of the vampire Barnabas Collins and his relationship with Victoria Winters. More psychological than physical horror, the painted artwork, heavily photo-referenced, makes the whole thing seem very wooden and lifeless.~NF

DARK SHRINE

Antarctic: *2 issues 1999*

The title and a glance at the horribly misproportioned woman on the covers reveals everything about what's on offer here. Inside it's all poorly drawn pin-up pages instead of storytelling, and what story exists is ridiculous. 1 was mistakenly run without credits, and most would have considered it better that way, but Shelby Robertson takes the blame in 2. His only excuse would be as a pre-pubescent prodigy, but one suspects he wasn't.~FP

The Pirates of DARK WATER

Marvel: *6 issue miniseries 1991-1992*

Dwight Zimmerman, Bruce Zick and Rick Magyar produce creditable adaptations from the children's fantasy-cartoon adventure series. Elf-like Ren has to locate the thirteen treasures of Rule, but it wouldn't be any kind of quest if he could pick them up in Tesco, would it? So pirate king Bloth is there to complicate matters.~WJ

DARK WOLF

Malibu: *4 issue miniseries 1987**
Malibu/Eternity: *14 issues, 1 Annual 1988-1989*
Comax: *One-shot ('Halloween Special') 1991*

The miniseries introduces Father Michael Tremaine, who unknowingly takes on the role of Dark Wolf at night, hunting down the evil Lords of Life and their leader, Abraxis. The origin of their conflict lies a thousand years in the past as Abraxis sought eternal life at the expense of werewolf, Wulfgar and his girlfriend, Dhyana, whose spirits now possess Tremaine. In the continuing series, Tremaine becomes aware of his role as Dark Wolf while his battles include aliens (4-5), the IRA (7-9), the murder of a mime (10) and Satanic child abuse (13-14). In the annual, a witch and novelist, Diana Tregarde, seeks Dark Wolf's aid in tracking down a she-demon that has been killing men across the city. Writer, R. A. Jones, starts well, but loses direction once the regular series starts, with little context and few supporting characters, despite defining Tremaine's family in 11. Here Butch Burcham's artwork is noticeably cruder and the 'Halloween Special' is Burcham on his own, with Dark Wolf seemingly back to his roots, tracking down and killing minions of the Evil One.~NF

DARKCHYLDE

Maximum Press: *3 issues 1996*
Image: *2 issues (4-5) 1997*, 3 issue miniseries ('Remastered') 1997, one-shot ('The Diary') 1997*
Image/Homage: *One-shot ('Swimsuit Illustrated') 1998, one-shot ('0') 1998, one-shot ('Preview Special') 1998*
Image/WildStorm: *2 issues ('The Legacy') 1998*
WildStorm: *1 issue (3) ('The Legacy') 1998, one-shot ('Summer Swimsuit Spectacular') 1998*
Darkchylde Entertainment: *6 issue miniseries ('Dreams of the...') 2000-2001, one-shot ('0 Remastered') 2001, 2 issues ('Redemption') 2001, one-shot ('Last Issue Special') 2002*

Ariel Chylde is a young woman who reacts instinctively to an assault by her father, killing him and burning the house down. She's actually been transformed into a nightmare demon, which, when she returns to human form, is now loose in the world. This appears to be at the instigation of Kauldron, who is attempting to use her to extract all of nightmare's demons for his own ends. At the end of the miniseries, the threat of Kauldron is over, but Ariel leaves Salem in the company of friendly monsters Piece and War, longing for a way to cure herself.

* Available in a collected edition

'Remastered' reprints the three Maximum Press issues. The 'Swimsuit' issues are collections of pin-ups, while 'The Diary' differs only in having captions about Ariel's past in the form of a diary. The '0' issue is drawn by Keu Cha, but is simply one long conversation between Ariel, Piece and War on her eighteenth birthday. The two previews contain sketches and discussion about 'The Legacy' series, in which Ariel is attacked by Pennance and joins a Carnival to pay off the costs of the destruction caused by their battle. 'Redemption' picks up from the unfinished 'The Legacy', but is itself unfinished. 'Dreams of the Darkchylde' starts promisingly with art by Brandon Peterson and Richard Bennett (1), but goes downhill from there, with a story set in Ariel's nightmares.

Creator Randy Queen overwrites all Ariel's stories and though his artwork can be detailed and tightly inked, the frequent shots of Ariel bursting out of her clothes along with a tendency towards full page illustrations are off-putting and severely limit any real storytelling.~NF

DARKER IMAGE

Image: *1 issue 1993*

This was supposed to be a series but was inexplicably discontinued. It was intended as a showcase for new ideas, which should have automatically disqualified Rob Liefeld's contribution, Bloodwulf – a Lobo look-a-like with a big gun. Much more interesting are the first appearances of The Maxx by Sam Kieth and Deathblow by Brandon Choi and Jim Lee, the latter doing his best Frank Miller impersonation. All three characters were promoted into their own titles though the Deathblow story wasn't completed until *Deathblow* 0.~NF

DARKHAWK

Marvel: *50 issues 1991-1995*

Sticking religiously to the Marvel template of a teenager unexpectedly receiving mysterious superpowers that constantly complicate their social life, *Darkhawk* confirms the principles of diminishing returns. Acknowledging creative redundancy, Marvel pump guest appearances by Spider-Man, Daredevil, Captain America and the Punisher into the first nine issues, but even characters with a following can't transform this into anything above mediocre. Ironically, issues where Darkhawk carries the comic on his own are marginally better. The mystery behind the power amulet found in the first issue is strung out to 25, and 42 makes a good sample with Chris Powell intending to reveal his other identity to his parents.~FP

DARKHOLD

Marvel: *16 issues 1992-1993*

Individual pages from The Darkhold, an ancient book of incredible evil, are offered to people who, once they read the mystic incantations thereon, set off demonic forces beyond their control. A group calling themselves The Redeemers seek to put matters right. Old hero/villain Modred is a regular and guest-stars aplenty seek to boost sales, but serve only to further confuse already muddled plots. Much was made of one of the characters being lesbian. Of course, she's a male fantasy figure. If you must read more, *Marvel Comics Presents* 146 concludes their story.~WJ

DARKLIGHT Prelude

Sirius: *3 issue miniseries 2000*

Two sisters, escaping the confines of their family, rent a house recently vacant after the death of Samual, son of the immortal Clairese. She's planning her suicide, causing much anguish to her friend and her werewolf, Devon. Teri Sue Wood's themes are the mysteries of life and death, and she intends *Darklight* to be a scary read. Perhaps this is true of the main series to come rather than here because this is charming, funny and pleasingly drawn.~NF

DARKLON The Mystic

Pacific: *One-shot 1983*

Sword-and-sorcery by Jim Starlin reprinted from *Eerie*. A peculiar tale, almost deliberately handicapped by the choice of claustrophobic small panels and the decision to relate most of the story as first-person flashback narrative. It all seems an experiment, and doesn't gel at all, with the supposedly mystical Darklon manifesting little in the way of arcane talent.~FP

DARKMAN

Marvel: *One-shot 1990, 3 issue miniseries 1990, 6 issue miniseries 1993*

Darkman originated as by the numbers movie revenge hokum updating *The Phantom of the Opera*. A disfigured scientist manufactures accurate flesh disguises, the drawback being they're only stable for 99 minutes. Cue plenty of face melting scenes. The one-shot and first series are different format presentations of the same mundane adaptation. There's a tad more dynamism about the art of Javier Saltares and Andrew Pepoy for the second attempt, but writer Kurt Busiek hardly stretches himself. There are innumerable scenes of self-pitying introspection for Darkman among bizarre whimsy such as the city's chief of police being the reincarnation of a 17th century witchfinder who likes to bring his past personality into the present. For Darkman completists only, should such a beast exist.~WJ

DARKMINDS

Image: *8 issue limited series 1998-1999*, one-shot (1/2) 1999, 11 issue limited series (1-10, 0) 2000-2001, one-shot (Darkminds Witchblade) 2000, 2 issues ('Macropolis') 2002*
Dreamwave: *2 issues + (3-4) 2002 to date*

Clueless about a serial killer, Agent Nagawa is introduced to his new partner, the cybernetically enhanced Nakiko. She's the thrust of the first story, a thriller set in 2032, the year permitting technological trickery. There are predictable elements, but this is an extremely confident work from youthful creators, writer Adrian Tsang and particularly artist Pat Lee, who also created the series. His application of traditional American storytelling to anime sensibilities is assured and successful, and while overly fond of shades of green, the colours establish a mood and a distinct look for the city. *Neon Cyber*, set before this series, offers further background on some characters.

The first one-shot is largely preparatory sketches, accompanied by a brief glance at Nakiko immediately prior to the events of volume 1. Lee only co-plots volume 2 in the company of writer Ken Siu-Chong and penciller Omar Dogan. Cyborg technology is again to the forefront when the pattern of serial murders is repeated, although this is lighter in tone and heavier on the action. New character Mia is engaging, and while falling a little short of its predecessor, it's an altogether decent follow-up. *Darkminds/Witchblade* is thankfully more the former than the latter, so there's a story. It concentrates on Nakiko, as drawn and co-plotted by Lee and written by David Wohl. As crossovers go, it's better than most with Witchblade. 'Macropolis' concerns two races against time, with Nagawa taunted by a particularly unpleasant killer and Nakiko discovering she has an inbuilt obsolescence. Written by Chris Sarracini and drawn by sisters Jo and Christina Chen, the transition is seamless, and tension high. The only problem is the rate of release.~FP

The DARKNESS

Image/Top Cow: *Series one 41 issues (½, 1-40), 1 special 1996-2001, one-shot ('Infinity') 2001, series two 1 issue + 2002 to date*

Creator Marc Silvestri claimed he'd been pondering the idea behind The Darkness for months, years even. A glance at the first couple of issues will tell you something about the quality of his thought processes. Fortunately he swiftly brought in Garth Ennis to flesh out his creation. A bit. Unfortunately Ennis jumps ship periodically, leaving with 6, returning on 11 to co-script with Malachy Coney, and finally turning over the writing chores to Coney alone with 15, then to Scott Lobdell with 23. So sometimes the strip is pretty mind candy under Ennis' light touch, and at other times it's ponderous drek, but the writing hoopla is nothing compared to the many changes in pencillers and inkers. Silvestri does some of the pencilling some of the time and Joe Benitez does quite a bit, but it's rare for there to be less than three or four pencillers and inkers involved in an issue. So it's no wonder the story rarely seems to advance. There is lots of narrative, lots of stuff going on, but very little actual plot.

---

* Available in a collected edition

Ah yes, the plot. Jackie's a pretty young Mafioso hitman who discovers, on his 21st birthday, that he's the heir to (drum roll and thunderous organ music) The Darkness! The Darkness is an all-consuming force that allows him to do very nasty things to people, but only in the dark, so he can be rendered helpless by opening the curtains or turning on the light. Opposing The Darkness is The Angelus, a sexy babe in not very much. Who's the good guy... well that's the big gimmick, you're not really sure. Jackie's very sweet, but he did have this habit of offing people without a second thought even before his heritage caught up with him. They attack each other a lot, do a bit of sexy torture, he kills her, she gets reborn, he learns about some family secrets, she takes over a member of the family and turns the mafia against him, he kills a lot of mafia guys... and so on. Oh, and Hitler and his Spear of Destiny turn up in 15 for those excited by Nazi mysticism.

After the first series ended the story continued in *Witchblade*. It's started again, but so far Paul Jenkins and Dale Keown have concentrated on recapping what's gone before and have already become bogged down. Any sensible scripter could have summed up what's gone before in three or four pages because fundamentally nothing changes.~FJ

Tales of the DARKNESS

Image/Top Cow: *4 issues 1998, one-shot (1/2) 2001*

This spin-off offers a view of other characters powered by the Darkness. An emperor in the far future toys with Sela, on a mission to kill him and avenge her mother, all the while being manipulated by his own servant, Vassal (1-2). An ancestor of Jackie Estacado facing the Spanish Inquisition provides an alternate version of Don Quixote in 3-4, but the story is left incomplete. Neither is particularly worthwhile though Malachy Coney is obviously having fun with his Cervantes turn, and Whilce Portacio pencils 1-2. The one-shot includes an introduction to the character by Garth Ennis, a second strip by Coney and some pinups, but it's very tedious.~NF

DARKSIDE

Maximum Press: *One-shot 1996*

Infantile Halloween crossover tripe as hot 'n' busty semi-clad, sword-toting amazon Avengelyne squares off against masked 'n' bloodthirsty gangster-slaughtering vigilante, Priest. Don't be tricked, this is no treat.~WW

DARKSEID VS GALACTUS: THE HUNGER

DC/Marvel: *One-shot 1995*

It's no secret that John Byrne loves Jack Kirby characters. Here he pits Marvel's world devourer, Galactus, against DC's despot dictator of Apokolips, Darkseid. Galactus is feeling peckish so what more could satisfy his hunger pains than the fiery pits of Apokolips? Besides seeing these two demi-gods battle it out, we're also treated to a punch-up with Galactus' herald, the Silver Surfer (still full of angst) and Darkseid's wayward son, Orion (still full of angst). Nice idea, nicely done.~HY

Recommended

DARKSTARS

DC: *39 issues (0-38) 1992-1996*

Offshoot of Green Lantern continuity as the professional rivals of the intergalactic peacekeeping force, created by a dissident faction of the Guardians of the Universe move to fill the vacuum left by the destruction of the GL Corps. Maverick Darkstar Colos is assigned to earth where he promptly recruits human deputies to help him police the planet with or without our consent. Chockful of guest stars, tightly written by Michael Jan Friedman and illustrated by Larry Stroman (1-3), Travis Charest (4-8) and latterly Mike Collins, it presents an entertaining blend of procedural crime drama, hard science fiction and super heroics.~WW

Recommended: 1-8

DARQUE PASSAGES

Acclaim: *4 issue miniseries 1997*

Embedded deeply in the continuity of the Acclaim Universe, this follows the events of the Master Darque and Man of the Atom: Revelations one-shots, as the mystical favour-broker becomes embroiled in the imminent destruction of the world. The enigmatic Roses is a psychiatrist who has infiltrated Sandria Darque's debauched circle of friends and clients in an attempt to get close to the man of mystery. She is in fact a pawn of the Epoch twins who plan to hasten the end of the world by destroying Darque and stealing the souls he has embezzled, and which give him his powers. After an anti-climactic battle, Darque's ever-wilder attempts to re-empower himself result in his becoming a soul addict. As alliances are made and broken, moment by moment, Alexandre Darque finds himself in the novel position of fighting to save the world. A distressingly confused story stylishly illustrated by Leonardo Manco.~WW

DART

Image: *3 issue miniseries 1996*

In a prequel story to her *Savage Dragon* and *Freak Force* appearances, our novice heroine meets the appalling Kill-Cat for the first time and is embroiled with rogue toy manufacturers who try to steal her likeness for commercial exploitation, and their superpowered minions. A peculiar tale with some interesting plot elements, dreadful script, and weird art by Joseph Szekeres, who from the evidence here has the desire, but not the skill, to be a fetish artist when he grows up.~HS

Star Wars DARTH MAUL

Dark Horse: *4 issue miniseries 2000**

This above average *Star Wars* item is a single issue Phantom Menace prequel stretched to fill four by Ron Marz's no more than adequate script, but Jan Duursema's able art, excellently coloured by Dave McCaig, whips you through the ample sabre play. The funny names are well up to the usual Lucas standard e.g. Vigo Whee Tillatch or Mon Calamari and the whole thing benefits from this massacring Maul blighter favouring action over words.~GK

DATE WITH DEBBI

DC: *18 issues 1969-1972.*

This freckle-faced, red-haired teenage klutz looks even more like a female clone of Archie than Archie's own distaff counterpart Josie did. Stories inevitably revolved around love-hungry Debbi's social and physical clumsiness ruining her chances for happiness, with allegedly hilarious results. Briefly popular, a spin-off, *Debbi's Dates*, ran for eleven issues from 1969 to 1971.~HS

DAVID CHELSEA IN LOVE

Eclipse: *4 issue miniseries 1990**

This is presented as an accurate reflection of the author's life, but it's so well-rounded, so circular in plot, so ironically well-structured that it reads more like a Woody Allen film, minus the screamingly funny slapstick humour part. New York illustrator 'David Chelsea' falls, headlong and hopelessly, for the gawky, polygamous, indecisive Minnie on a visit to his family in Portland, Oregon. Author David Chelsea carefully analyses every euphoric up and pathetic down of his obsession, including the many many false starts of other relationships. He draws in a variety of styles, each one differently mannered and too twinky for some tastes. There are many aspects of the book that you may find annoying, but Chelsea can undoubtedly write and draw to a high standard. If his filtering of experience is a little too neat for some, others will find it strikes a neurotic chord.~FJ

DAWN

Sirius: *6 issues ('Lucifer's Halo') 1995-1997*, 4 issue miniseries ('Return of the Goddess') 1999-2000**

In an alternative New York, Darrian Ashoka meets an enigmatic woman during the regular Times Square Battle To The Death. An aspect of the Goddess of Death and Rebirth, she involves him in her quest to steal Lucifer's halo. It's a gift from God, which, after a lover's spat, God wants back. Artist and writer Joseph Michael Linsner has something going on here. It's all very wispy and irritatingly mysterious, and there are certainly too many panels of our resident goddess strutting and posing in lingerie, but there's still a creeping suspicion that there's an actual plot somewhere. And it's awful pretty to look at. Taking two years to loiter to a conclusion, the ending was unsatisfactory, but if you encounter it cheap, it's worth a read. The second series has a stronger plot, and makes some telling, if occasionally naively expressed, points about prejudice, media manipulation, and the ultimate futility of romance and orthodox religion. In befriending and protecting Mary, a young witch and single mother, Dawn exposes her to a world, and a set of dangers, far beyond her comprehension. The artwork is quite stunning, with a lush, decorative style that some dismiss as 'chocolate-boxey' and incongruous, but which is equally capable of depicting horror and squalor as the story demands. Linsner's greatest work is still in his future. Given the time it takes him to complete a project, one can only hope he makes it. These two series, steps along the way to that destination, while not justifying an unqualified recommendation, are still worthy of attention.~HS

DAY BROTHERS PRESENT

Caliber: *4 issue miniseries 1990*

A continuation of sorts for the Renegade anthology, *Black Zeppelin*, that showcased the work of Gene Day posthumously. Mostly short stories written by Gene and illustrated by brothers Dan or David, there's an interesting mix of war and science fiction strips, densely illustrated and though not to all tastes, a tribute to the skills of all the Day brothers.~NF

DAY OF JUDGEMENT

DC: *5 issue miniseries, 1 Secret Files 1999*

After the last Spectre, who'd been doing the job since the 1940s, had popped off to heaven for some peace and quiet, DC needed a replacement. The catalyst for this story has the Spectre, the physical manifestation of God's vengeance, bound with an unsuitable host: in this case, a fallen angel who wishes ill on humanity. Superheroes, both magical and not, join forces to stop him. This is enjoyable stuff, with genuine tension between the main players, and a real story taking place rather than the usual superhero non-event get-together. Matt Smith's good art has a Mike Mignola feel to it, while Geoff Johns' writing here shows why he is one of comics' rising stars. The Secret Files, on the other hand, mainly features other writers and artists in what seems to be some sort of pad-athon. Only for completists.~DB

Recommended: 1-5

DAYDREAMERS

Marvel: *3 issue miniseries 1997*

Escaping from a story in *Generation X*, Franklin Richards, Leech, Artie Maddicks, Tana Nile, Man-Thing and Howard the Duck find themselves lost between dimensions after entering the Nexus of All Realities through Man-Thing. Narrated like a fairy tale, it would initially seem aimed to appeal to younger readers as there's no consistency of characterisation in any of the last three named above. Then again, the in-jokes and Dr Seuss references would seem to be aimed at older readers. Plotted by Marc DeMatteis, scripted by various and prettily drawn by Martin Egeland (everything smooth, rounded and cute) this is really horrible.~NF

DAYS OF DARKNESS

Apple: *6 issue miniseries 1992-1993**

Wayne Vansant tells the story of the extended Cahill family and their involvement in aspects of World War II, beginning with the Japanese bombing of Pearl Harbour. It's an odd comic, attempting to merge TV-style generational fiction sagas with war action. Although meticulously researched and drawn, it falls short because Vansant is seemingly far more interested in the battles than the family. Characterisation has never been Vansant's strongpoint, but here it matters for once, and there's little point in introducing a large cast only to sideline most of them. That said, there are portions of the series that are powerful and affecting, particularly the first half of issue 5. It depicts the brutality of the Japanese towards captured Filipinos (ironically duplicating American behaviour forty-five years previously) and the conditions endured by captured Americans. If you like pages of authentic-looking, lovingly depicted air and naval battles, only George Evans betters *Days of Darkness*, but for a story try elsewhere.~FP

DAYS OF WRATH

Apple: *4 issues 1993-1994*

Wayne Vansant continues his saga of the Cahill family during World War II, showing battles through the eyes of ordinary American conscripts. Always excellent art from Vansant can't compensate for his very dry storytelling methods. It was planned as a six-issue series, but the final two issues were never published.~WJ

DAZZLER

Marvel: *42 issues 1981-1986, Graphic Novel 1984*

Originally conceived as The Disco Dazzler, a rapid re-think was in order as the disco backlash hit with full force. Instead of scrapping the idea of a mutant disco singer able to generate light blasts as too late to cash in on a passing fad, Marvel flew in the face of fashion to publish a total turkey listing no less than eleven people in the credits of the first issue. That enough people bought this to keep it going over three years is astounding. Ironically, cancellation came as then writer Archie Goodwin, from 38, was actually injecting some life into issues drawn, probably to his eternal shame, by Paul Chadwick, who was to go on to better things. Dazzler later ended up in *X-Men* (where she'd made her début in 130).~FP

DC CHALLENGE

DC: *12 issue limited series 1985-1986*

A mystery starring dozens of characters was set up in 1, and had to be solved and concluded in 12. Each issue had a different set of creators, who ended their segment on a cliffhanger for the next creative team to solve. A nice idea, with lots of good creators and characters, but proving to be a fundamentally flawed, fussy fable that festered and failed to impress with force-fed plots. The whole thing turned into a feeble mess – a flamboyant fraud that flaked at the seams. Fundamentally, a farce. The finale was a godsend. A fatwa on the instigator! So are there any more words beginning with 'f' to describe this series? Why, yes... ~HY

DC COMICS PRESENTS

DC: *97 issues, 4 Annuals 1978-1986*

Well, Batman had a monthly team-up title introduced when he was DC's most popular hero in the 1960s, so with the Superman films having elevated him to that position in the late 1970s it was only fair he also got a team-up title. As one might expect, there's a lot of average stuff punctuating the occasional good issues, but the series began well with José Luis Garcia-Lopez drawing 1-4, teaming Superman with Flash, Adam Strange and the Metal Men. The next story that really stands out is in 26-29: Len Wein with Jim Starlin art featuring team-ups with Martian Manhunter, Supergirl and the Spectre in a connected story introducing Mongul, who'd later play a devastating part in Green Lantern's history. 26 is also of note for a free insert introducing DC's hit of the early 1980s, *New Teen Titans*. Roy Thomas returned the unlikely Hoppy The Marvel Bunny from limbo in 33-34, teaming Superman with Captain Marvel and his extended family, and in 36 Paul Levitz concluded the Starman feature that had been running in *Adventure Comics*, again with Jim Starlin art. Martin Pasko and Joe Staton offered a very unusual Plastic Man team-up in 39, and 41 contained the first sighting of Roy Thomas' 1982 revising of Wonder Woman. 1982's first annual featured the unlikely teaming of Superman and Superman (from an alternate Earth) combating their evil counterpart from yet another Earth.

---

* Available in a collected edition

Paul Levitz and Keith Giffen produced two very stylised team-ups featuring the Doom Patrol in 52, and the Legion of Substitute Heroes in 59. The latter failed to take the second - string legionnaires seriously at all, and launched a period of ridicule for them as foul-ups in the Legion's own title. The second annual is a charming, quirky time-travel story of the type DC once managed so easily, introducing the long-since-forgotten Superwoman, conceived by Elliot Maggin. She returns in the fourth annual, nicely drawn by Eduardo Barreto, but repetition dulls the charm. 65-67 are notable for their art with, respectively, Gray Morrow drawing a Madame Xanadu team-up, Joe Kubert illustrating the Demon, and the classic 1960s Superman art team of Curt Swan and Murphy Anderson drawing a teaming with Santa Claus!

77's 'Forgotten Heroes' revives and teams a number of obscurities, of whom Animal Man went on to greater glories, and 78's 'Forgotten Villains' brings back even more recondite characters. Keith Giffen returns for a quirky Ambush Bug story in 81, and 85 has Alan Moore delivering a Swamp Thing team-up. It's a highlight of the run, but doesn't match Moore's work on Swamp Thing's own title, but then he was writing for a different audience. 87 is the interesting idea of Superman arriving as a baby on our Earth, and growing to adolescence as the only superhero on the planet. If that sounds creatively redundant, it towers over the final few issues, after which point the title was cancelled to make way for John Byrne's revision of Superman.

A back-up feature asking 'Whatever Happened To...' débuted in 26, and continued in most issues until 42, the best of them spotlighting Star Hawkins (33), Rex The Wonder Dog (drawn by Gil Kane in 35) and The Crimson Avenger (38).~HY

Recommended: 26-29, 37, 39, 52, 59, 66, 85, annual 2

DC 1ST

DC: *4 One-shots 2002*

Four tellings, or retellings of first encounters or occurrences in DC characters' history. The best is the first race between the original Flash and Superman, a contemporary story tying into the continuity of the regular Flash title and featuring a fine treatment of perennial villain Abra Kadabra by Geoff Johns and Rick Burchett. Bill Sienkiewicz and Terry Moore contribute pencils to the first encounter of both Batgirls with The Joker, but it's the Kevin Nowlan cover that's the highlight. The first meeting of Superman and Lobo is decently enough handled by Keith Giffen and Cliff Rathburn, while the first meeting of the 1940s and 1960s Green Lanterns is the weakest of the quartet.~WJ

DC GRAPHIC NOVELS

DC's graphic novels can be divided into four categories: stories based on established comics characters; good science fiction stories; bad or indifferent science fiction stories; and *Tell Me Dark*. The two stories dealing with established comics characters are not compulsive reading. Viking Glory is about the problems and adventures that the young *Viking Prince* has when he leaves his clan to be married. It could have been interesting but the delivery is deadening. *Hunger Dogs* concludes Jack Kirby's New Gods, written and pencilled by Kirby ten years on. The panels seem to be taken from ten different stories, mixed at random – not so much bad, as baffling.

On to the good science fiction stories. *Frost and Fire* is an adaptation of a Ray Bradbury story about the survivors of a crash on a planet with a brutal, quickly-changing climate. Their metabolism is accelerated so that they managed to survive, but their lifecycle was reduced to eight days. Sim is convinced that he can win himself enough time to escape. Fascinating, and beautifully done. *Merchants of Venus* is a good, old-fashioned prospectors' yarn, but with a setting of Venus instead of Alaska. The ending is weak, but it's still worth a look. The Robert Silverberg adaptation *Nightwings* is set in a future society that has reverted to a medieval technology and social structure. The narrator is a member of the Guild of Watchers, who scan the skies to give warning of the predicted alien invasion. A rich, absorbing story, with exceptionally complex characterisation, and not even the perfunctory artwork can break the mood. *Space Clusters* has the art-lover on the run as a murder suspect, pursued for a hundred years by the art-censor turned cop. A refreshingly tongue-in-cheek start, and then the two of them fall into a black hole and it's non-stop psychedelia right to the end. A romp. Finally, *Warlords*, in which Dwayne, the resourceful troll, becomes embroiled in the conflicts between four Warlord brothers. Told with a light touch, and with careful, affectionate artwork.

The bad or indifferent science-fiction stories make for a longer list. *Demon with a Glass Hand* features Trent, who appeared in the city ten days previously devoid of memories, and wonders who he is, and why all these men are trying to kill him – very ordinary. *Generation Zero* is set after a nuclear war, and Juan Falcon and two friends are given a mission: to fly around the world and contact other groups of survivors. The ideas just aren't there, and the writing is leaden. *Hell on Earth* concerns a horror writer who is involved in an experiment to summon the devil, and it becomes grindingly predictable within pages. *The Magic Goes Away* is set in a sword-and-sorcery world in which the magic is nearly exhausted, with a group on a last-chance mission to replenish the supply. Memorable for incoherent story-telling that leaves you flicking back and forth wondering if the pages are in the wrong order. *Me and Joe Priest* is set in a future where all men have become sterile, yet one man (who happens to be a priest, and the son of a priest) is on a divine mission to reseed the planet. It's witless. *The Medusa Chain*...well, who knows what Ernie Colón thought he was producing here? Space-going prison drama, or romance, or corporate conspiracy, or war story? It's a mess. *Metalzoic* is an African wildlife documentary with fearsomely-armed robots instead of animals, and with the traditional struggle for leadership of the tribe. Great imagination from both writer Pat Mills and artist Kevin O'Neill in the details and atmosphere of the machine-based ecology, but with some clumsy dialogue and near-incomprehensible fight scenes. *Sandkings* is an adaptation of George R.R.Martin's simple but powerful morality tale, and you'd do better to read the non-graphic version since the illustrator here seems to have missed the point of the story completely. Last and least, Star Raiders, which has a bunch of freedom fighters up against the Zylon hive-mind – many flashes and bangs and funny kid-animals, and not a story in sight.

In a category of its own is *Tell Me Dark*. According to the jacket-blurb, the genre is Femme Fatale Story, and as such the words and the painted artwork combine for an unusually good example of the genre. But need the story be taken literally? Is it actually about a man having a nervous breakdown far from home? Or about the torment of being emotionally involved with someone who's far from sane? Or simply about the end of an affair? The story (maybe despite itself?) allows all of these readings, and more.

Since the early 1990s DC have largely forsaken graphic novels unless they star the top of the line characters, preferring instead to tailor the content of their monthly comics into stories easily repackaged as collections, and to mine their extensive history. There have been exceptions, though. When the bankruptcy of Kitchen Sink reverted the rights of Will Eisner's graphic novels back to him, DC lost no time coming to an arrangement. While still dealt with under the Kitchen Sink entry, most are now available via DC, who also now publish his new work. *The Name of the Game* is an excellent character study of a family and associates over three generations. The themes are how snobbery and sustaining an appearance over-rides all practical considerations for some, the hollow centre of what's perceived to be a good name point, and how a desire for social acceptance is a motivating force. The central character, stockbroker Conrad Arnheim is a monstrous creation, a selfish monolith towering over the story. With this work Eisner can finally lay to rest the (minor) criticism of being unable to produce work not spliced with a broad sentimental centre. Those seeking ammunition for that comment need look no further than *Minor Miracles,* four entertaining stories, the first of which provides a comic treatment of the ideas in *The Name of the Game.* While Eisner grounds his work in Jewish culture, it's successful because when the trappings are swept away it's essentially about the perennials of human nature.

Bizarro Comics is fa antastic idea: giving accomplished creators who've selected not to work with superhero material, or entirely unsuited to it, one chance in the DC playground without compromising their styles. Those with entrenched views of how DC superheroes should be portrayed won't like this, but many whose fondness for Superman and Batman departed with their youth should dive in. The most prominent inclusion is Kyle Baker's notorious, and funny, story of the infant Superman's babysitter, allegedly deemed unsuitable for a mainstream DC comic, and an editorial misjudgement resulting in the entire run of the Elseworlds 80-Page Giant being pulped. While not everything is an unqualified success, highlights include Chris Perry and Stephen DeStefano's hilarious sixty-page framing sequence, contributions throughout from Evan Dorkin, and Bob Fingerman and Dave Cooper's Wonder Woman story. It's available as a paperback or a beautifully designed, hardcover.~FC/WJ

Recommended: *Bizarro Comics, Frost and Fire, Minor Miracles, The Name of the Game, Nightwings, Space Clusters, Tell Me Dark*

DC ONE MILLION

DC: *4 issue miniseries 1998, 80-Page Giant 1999*

Well...the covers were nicely designed. When will DC get the message and give up on these messy crossover failures? Below par writer Grant Morrison wasn't helped by below par storytelling from penciller Val Semeiks. The plot involves the future version of the JLA in the 853rd Century – Justice Legion A, who travel back to the 20th Century to ask the JLA to help celebrate the return to Earth of the first Superman. DC's immortal bad-guy, Vandal Savage and a tyrant sentient sun, Solaris plan to spoil the party. The 80-page giant is much better, with more interesting and well drawn tales featuring 853rd Century characters by various creators, such as Morrison (now on form), Chuck Dixon, Dusty Abell, and Norm Breyfoyle. Mark Schultz gives us Krypto-9, whose ancestor was of course a member of the legendary Legion of Super-Pets making this a must-have for any DC old-fart fan.~HY

Recommended: 80-Page Giant

DC SPECIAL

DC: *29 issues 1968-1971 (1-15), 1975-1977 (16-29)*

This began life as an oversized reprint title and over the course of the second run gradually switched to all new material. Archivists will be interested in 3's Black Canary and Wonder Woman stories, produced in the 1940s, but never previously published, and other highlights of the initial run were entire issues devoted to the art of Carmine Infantino (1) and Joe Kubert (5). Towering above the run, though, is issue 15, offering one of the few relatively cheap opportunities to sample the comedic genius of Jack Cole's Plastic Man strips. They're so off the wall that the term 'wacky' doesn't begin to do them justice: Cole was way ahead of his time with this stretchable superhero. Despite nicely drawn Gil Kane Green Lantern reprints in 20, the second run is largely lacklustre, with the only standout being the final issue. In 29 Paul Levitz and Joe Staton construct a marvellous story explaining exactly why the Justice Society Of America were unable to win World War II on their own.~HY

DC SUPER-STAR HOLIDAY SPECIAL

DC: *One-shot 1980*

This Christmas Special contains stories from across DC's range. A House of Mystery story features DC horror-title hosts of the period and a Legion of Superheroes tale has the advantage of José Luis Garcia-Lopez pencils inked by Dick Giordano, but is a hopelessly sentimental tale of alien races working in harmony. Robert Kanigher's Sgt Rock is a simple parable in which the horror of war is contrasted with the hopefulness of little children, but Dick Ayers and Romeo Tanghal art does it no favours. They also illustrate the Michael Fleisher's Jonah Hex story in which Hex helps a poor family find food for Christmas Day, his reasons explained in a flashback to his childhood. Finally Denny O'Neil provides another Christmas Batman story, drawn by Frank Miller. Hardly essential, Miller completists may want to track this down.~NF

DC SUPERSTARS

DC: *18 issues 1976-1978*

1-11 are reprints, largely from the 1960s, and largely unmemorable, although there's Infantino Flash in 5, and Legion of Super-Heroes in 3. From 12, though, it's all new material, starting with Superboy. Sergio Aragonés providing a wealth of short strips is the focus of 13, then not as well known to comic readers in general, but none the less talented for that. The Star Hunters débuted in 16 before moving into their own title, and Paul Levitz and Joe Staton supply the origin of the Huntress in her first appearance in 17, an issue also reprinting Green Arrow's origin and the first recorded case of The Legion of Super-Heroes. The series bows out with a teaming of Deadman and the Phantom Stranger.~HY

DC versus MARVEL/MARVEL versus DC

DC/Marvel: *4 issue miniseries 1996*

The involved collaboration uniting the Marvel and DC superheroes is inevitably contrived and cosmically scaled, yet is still superior to previous crossovers. This time, rationale for the meeting of their universes is supplied as dozens of cross-company heroes and villains clash. The *Green Lantern/Silver Surfer:* 'Unholy Alliances' one-shot serves as a prequel (not required reading) and the Amalgam universe spins off from the conclusion. Light, tender moments of character development preserve us from an endless barrage of brain battering and although no lasting effects on each universe linger, genuine suspense is generated by having five major battles decided by readers' votes. Thus one company wins. Writers Ron Marz and Peter David are to be commended for their handiwork considering the daunting constraints; Claudio Castellini and Dan Jurgens ably assist on pencils. A great series if you're 14.~APS

DCU Holiday Bash

DC: *One-shot ('1997'), 1997, one-shot ('1998') 1998, one-shot ('1999') 1999*

A successor to *Christmas with the Super-Heroes,* these anthologies feature festive vignettes, which, given the theme, tend inexorably towards the maudlin and soft-centred. Ty Templeton's two-page humour contributions, to 1997 starring the Demon, and 1998 starring Darkseid are inventive and amusing, and Mark Waid and Brian Augustyn's Flash story from 1997, rises above the mediocre as a charming relationship story that steers clear of being too cloying. 1998 also has gorgeous Russ Heath art on a dialogue-free Sgt. Rock story, and 'I Left My Heart at the Justice Society Canteen' by Howard Chaykin and Rick Burchett, a WWII homefront set piece disclosing a previously unknown episode in the life of a supporting cast member. Fun, festive and heart-warming, it's a standout in a melee of well-intentioned tales that regrettably tend to sag under their own syrup.~HS

DEAD AGAIN

DC: *5 issue miniseries 2001*

In a story that serves as a prelude to a new *Deadman* series, Steve Vance re-tells Deadman's origin whilst revisiting the deaths of other DC heroes. The Flash, Robin, Superman, Green Lantern and the Spectre guest star as Deadman seeks to stop Neron capturing their souls and altering time. Vance's script is largely uninteresting and has nothing new to say about Deadman. With Leonard Kirk on the art for 1, 3 and 5, Jim Aparo guests on 2 and M.D. Bright on 4, working against any sense of consistency or atmosphere and only Aparo does anything like a good job.~NF

The Sandman Presents THE DEAD BOY DETECTIVES

DC/Vertigo: *4 issue miniseries 2001*

These two pre-pubescent boys first appeared in *Sandman* 24. Their appearances since have been sparing, and with good reason. They originally enabled Neil Gaiman to make a few jokes about public school education within a whimsical story. Transplanted into modern society and shovelled together with other characters of Gaiman's devising they lack the depth to sustain Ed Brubaker's already weak plot. There is the benefit of art from Bryan Talbot and Steve Leialoha, but neither would consider this a career highlight.~FP

DEAD CLOWN

Malibu: *3 issue miniseries 1993-1994*

Imagine *The Mask* crossed with *The Tick*, along with an extra side-order of Lobo style violence on the side. That's the idea, but it doesn't begin to approach any of the above.~WJ

THE DEAD HEAT

All-American: *1 issue 1990*

Big eyes, speed lines, exaggerated reactions, shorthand global crises, young girls in improbable jobs... Yes, it's all the conventions of Japanese kids comics making an early trip across the Pacific. Worthy of a footnote as an early appropriation of the manga style, but otherwise unremarkable.~WJ

DEAD IN THE WEST

Dark Horse: *2 issue microseries 1994*

Joe R. Lansdale, best known for horror fiction, almost single-handedly reinvented the Western comic with this and his work on *Jonah Hex*. Whether that's a good thing or not depends on your appreciation of what is, in effect, a zombie story in a Western setting. Adapted by Neal Barrett Jr from Lansdale's novel, *Dead in the West* is the story of a dying man's curse on the town that killed him. With an incestuous preacher as a hero and the sense that the townspeople only get what they deserve, there's more than a nod to *Pale Rider* and *High Plains Drifter*. With artwork by Jack Jackson (Jaxon) and covers by Tim Truman, Dark Horse managed to bring together the best of the new Western creators for this story.~NF

DEAD KILLER

Caliber: *One-shot 1992*

Collected episodes of a zombie-hunter originally seen in Deadworld 19-21 under a new cover. Ron McCain's moody artwork is full of the energy of immediacy and is superficially influenced by Bill Sienkiewicz, but the stretched common factors lead to recognition becoming detective work. Meanwhile Kyle Garrett's pretentious script litters the pages in easily skipped captions. Rot.~SW

DEAD KING

Chaos!: *4 issue miniseries 1998*

Rick Young, killed by Evil Ernie, is reborn as the ghoul, Homicide. In the Pentagon, General Powell plots with the Council of Six, to whom he's planning to sacrifice thousands of souls in return for world control. Powell decides Homicide would make a good leader for an army of the undead and sets about capturing and training him – with predictably deadly results (for Powell and some Israeli commandos that happen to be in the area). Written by Hart Fisher and drawn by David Brewer, this is an extremely violent and gory story that almost pulls off the trick of being a horrific read, except that the artwork is too loose to be realistic, blunting the effect.~NF

THE DEAD MUSE

Fantagraphics: *One-shot 1990*

Don't read this when you're feeling down. Ostensibly a collection, edited by Eddie Campbell, of various Australian comic talents, it's actually a series of annoying short stories that interrupt Campbell's gripping account of one of the most depressing periods in his life, interspersed with how he met various of the contributors. Actually the stories aren't that bad – Phil Bentley and M. Pena adapt an amusing episode from 'The Wilder Shores Of Love', and Kupe's piece is rough but charming – only they become less memorable when faced with the editorial itself, tragic yet funny, brooding dolefully on the short life of the Tenth Muse, the muse of comics.~FJ

DEAD OF NIGHT

Marvel: *11 issues 1973-1975*

Staple reprint diet of 1950's weird/horror shorts. 11 contains the only original feature, the first appearance of the supernatural Scarecrow by Scott Edelman. The subject of a painting forming a gateway to a demoniacal dimension, Scarecrow came to life to combat demon worshippers on Earth. Uninspired, as were subsequent roles in *Marvel Spotlight* (first series) 26 and *Marvel Two-In-One* 18.~APS

DEAD OR ALIVE A Cyberpunk Western

Dark Horse: *4 issue miniseries 1998*

A baby butcher, a psychotic clown, aliens, samurais, an old movie style tribe of red indians, a giant fire-breathing monster, busty babes on bikes, a chainsaw, guns galore and tons of gore. Sounds interesting, no? And the whole lot's drawn by Alberto Ponticelli ripping off Bisley from the days when he used to give a damn, complete with artistic asides and amazing detail. And the story is... Doh! While stoned it'll be amazing.~WJ

DEADBEATS

Claypool: *54 issues + 1993 to date*

Four centuries old, but seemingly youthful, vampires terrorise a small American town. Opposing them are a rag-tag-and-bobtail bunch of townies and, separately, a local youth whom the self-styled Deadbeats converted to vampirism and set up as a puppet leader. Now with an agenda of his own, he's their deadliest enemy. Decadence, an underlying perverse sensuality and loquaciousness are the keynotes of the title. All of writer/artist Richard Howell's characters, good or evil, are oratorical to a degree seldom seen in today's comics, and that's not a complaint. A particularly pleasing aspect is that moral values – of the genuine sort, not the twisted and bigoted evangelical type – are presented in a positive and affirming way. It's ironic that this eerie and horrific merger of grand opera and soap opera also presents virtually the only cool and sane Christians ever seen in comics, side by side with a degree of nudity and sensuality unknown in most pure adventure series. Howell has gone on record that he'd much rather draw bodies than clothes, and several tastefully salacious covers (19, 27, 33, 40) amply demonstrate this preference.

1-25 comprised an extended story that was sexy, spooky and able to keep the reader genuinely off balance and disturbed. After that, the series fell into a bit of rut, most issues being entertaining enough, but the underlying text to art ratio becoming a little crowded even given the skills of the creators. In addition, there were a couple of serious misfires: 28, in which the two female Deadbeats carry a deceased comrade around town looking for a way to dispose of him, is tasteless and repetitive rather than funny, and 34, where some of our heroes encounter a bunch of Cockney Wild-Boy vamps in Quainte Olde Englande, is notable chiefly for its truly arse-puckering interpretation of British accents. If anyone ever offers that issue as a sample, flee in terror! Run! Hide! Nevertheless, generally it remains a good read, and there are hopeful signs in recent issues that the old vigour is returning.~HS

Recommended: 1-25

DEADENDERS

DC/Vertigo: *16 issues 2000-2001*

Ed Brubaker and Warren Pleece tell the tale of Beezer, a disaffected teen in a post-cataclysmic city. A mysterious event created a nuclear winter, and the human race divided into the rich, who occupy the central sectors of the metropolis, complete with all mod cons, including artificial weather, and the rest, who scrabble for existence in the twilit outer sectors. It's a dystopian soap-opera and mystery tale as drug-dealer Beezer tries to eke out the best life he can whilst plagued by time-warping hallucinations and on the run from sector police and outworld criminals. An intriguing concept looking like a cross between *Quadrophenia* and *Blade Runner* that starts well but loses itself by trying to be too clever. Superficial and unsatisfying. 1-4 are collected.~WW

DEADFACE

Harrier: *8 issues 1987-1988**

Dark Horse: *3 issue miniseries (Doing the Islands with Bacchus) 1991*, 4 issue miniseries ('Earth, Water, Air and Fire') 1992**

If you were 4000 years old and suffering from a lifetime of dissolution, wine, women and song, mightn't you look a bit battered? The Greek god Bacchus now spends his time in bars spinning tales of the old days, accompanied by faithful companion Simpson, and a few dog-eared Maenads. Joe Theseus, however, has reason to fear Bacchus and sends a hitman after him, but finds himself pursued by The Eyeball Kid, who stole his father Zeus' thunderbolt and killed most of the gods of Olympus. The Kid wants to know the whereabouts of Poseidon's skull, which grants longevity. Together Theseus and the Kid return to pick up the pieces of Joe's criminal empire but find themselves the target of some other mythological throwbacks, Chalcon, Chryson and Argyson, the Telchines. The Eyeball Kid's powers are sucked away by the Stygian Leech and although Theseus saves him they are forced to retreat. This is the plot in simple terms, but Eddie Campbell's strip is much more than a simple adventure fantasy. His carefully researched retelling of myths complements the action and his artwork, rough and scratchy but always expressive and textural, is full of life and imagination.

Doing the Islands with Bacchus is actually a collection of sixteen short stories that appeared in a number of different anthologies for a variety of publishers. Bacchus strikes out from the Deadface storyline to wander around the Aegean Islands, telling a different, suitable story on each. These issues are pure Campbell magic, thoughtful, playful scripts that aren't afraid of the darker side of mythology, and are matched by delicate artwork. In 'Earth, Water, Air and Fire', Theseus is tempted back into human affairs with a bargain that would gain him 'The Eye of Fate' which once belonged to the Eyeball Kid. Seduced by his own daughter, he finds himself in the middle of a Mob war and his troubles are compounded when the Kid comes looking for his lost orb. All this and police violence too. Though there's humour in Campbell's stories there's also an understanding of the nature of mythology and oral storytelling patterns.~NF

Recommended: *Doing the Islands* 1-3

DEADFISH BEDEVILED

All-American: *1 issue 1990*

Writer David Gomien's private detective Harry Carlson finds himself involved in a case of demonic posession that spans two decades. The subject is old friend and psychologist Salamander Deadfish. In the course of the investigation we also meet the doctor's former lover Alicia Swann and a cult headed by corporate executive D. Howard Damone. The art is fair, if unspectacular, and would be greatly improved by colour. A promising introduction to a series that never happened.~SW

DEADFORCE

Antarctic: *2 issues 1999*

A promising first effort from Roy Burdine, featuring a giant creature whose touch kills, targeting the criminal community, sometimes in the company of Joker-alike vigilante Crazyface. It's influenced throughout by Frank Miller, but is nonetheless entertaining for being derivative.~FP

DEADLANDS

Image: *One-shot 1999*

Truly wretchedly written horror-western based on a role-playing card game. Bizarrely the art has a Saturday morning adventure cartoon gloss, but it's not so good it's worth anyone's while picking this up, particularly not at $6.95.~WJ

DEADLINE

Marvel: *4 issue miniseries 2002**

Good solid mystery yarn as rookie reporter Kat Farrell goes about her job, and dreams of the big break that will promote her from the *Daily Bugle*'s worst position, covering the local superhero news. She wants to be a real journalist and handle "real people" stories but becomes enmeshed in a seeming mystery as a succession of minor supervillains turn up dead of what looks like natural causes. A very palatable blend of journalistic thriller and murder mystery set up on the fringes of the Marvel Universe. A treat worth sampling from Bill Roseman and Guy Davis.~WW

Recommended: 1-4

DEADLINE U.S.A.

Dark Horse: *Series one 3 issues 1991-1992, series two 8 issues 1992-1993*

British anthology comic *Deadline* was a late 1980s success story, combining irreverent self-indulgence with genuine innovation and talent. The most successful graduate was Jamie Hewlett and Alan Martin's Tank Girl, but it wasn't the only good strip, and there are enough good reprints from the British edition to make each issue worth a glance. The likes of Philip Bond's 'Wired World' (*Love and Rockets* in Clapham), Pete Milligan and Brett Ewins' hard-boiled Johnny Nemo, Evan Dorkin's Milk and Cheese, and Beryl the Bitch from Julie Hollings shine, and a fine supporting line-up includes strips from Nick Abadzis, Rachael Ball and D'Israeli. Dark Horse did make the mistake of adding new strips by off-beat American creators like Richard Sala and Alec Stevens, whose po-faced introspection misses the point entirely. The second run halves the page-count and loses Tank Girl (moved to her own title), but gets better as it progresses, phasing out Sala and Stevens with new US contributors Dave Cooper and Scott Musgrove mixing more easily. There's always some utter tosh in *Deadline*, but there's always some essential reading as well.~FP

Recommended: Series two 8

Image: *4 issue miniseries 1994, 4 issue miniseries 1995*

Comedy superheroics from Erik Larson's universe. A thick time-traveller, Kid Avenger, teams up with Kill Cat and the two get into some scrapes, usually involving lots of fighting. Don't expect subtlety but it is better amusement than most parody titles. Issue 3 of the second series features a guest appearance by Grunge of Gen^{13}.~NF

DEADLY HANDS OF KUNG-FU

Marvel: *33 issues 1974-1977*

Marvel put a lot of effort into its black and white magazines in the 1970s. Unfortunately they didn't always have the talent to go with it. *Deadly Hands* sells itself as a general martial arts magazine with articles on Bruce Lee, the *Kung-Fu* TV series and the many martial arts. The two regular comic strips suffered from fluctuating standards in artwork (usually the inking). The Shang-Chi strip runs parallel to his own series and has the advantage of Doug Moench scripts, but Mike Vosburg (inked by Al Milgrom and Jack Abel) is seriously unsuited to an action strip of this kind, while Rudy Nebres' artwork is fluid during the fights but terribly stiff otherwise. 'The Sons of the Tiger', running throughout the series, is a deadly dull story, though Bill Mantlo does try to redeem it with characters like The White Tiger and Jack of Hearts. Iron Fist replaced Shang-Chi for 19-24, bringing with him his regular writer Chris Claremont, with artwork again by Nebres. A multi-part story-line featuring all of the above ran from 29-31 after a Bruce Lee special in 28. For completists only.~NF

DEADMAN

DC: *4 issue miniseries 1985-1986, 2 issue microseries ('Love After Death') 1989*, 2 issue microseries ('Exorcism') 1992*, 7 issue limited series 1995, 9 issues 2002*

Introduced in the 1970s with runs in *Strange Adventures* and *The Brave and the Bold*, reprinted as the limited series, Boston Brand is Deadman, a ghost returned to Earth able to temporarily possess the bodies of others. Andy Helfer and José Luis Garcia-Lopez's miniseries attempts to redefine the character after the guest appearances and short stories since his run in Strange Adventures. Tying up the loose ends of the original storyline that saw Boston's killer still head of the League of Assassins, Helfer kills a few characters and sets Deadman up as a hero with a mission. Lopez's artwork bears similarities to Adams, or Ross Andru, but has a European influence that keeps it fresh and a delight to read. Mike Baron presents a more traditional horror story in 'Love After Death', as Brand meets an undead circus troupe. Kelley Jones, a knobbly Berni Wrightson, provides suitably atmospheric artwork but the whole is a characterless affair. The sequel by Baron and Jones has an insane Deadman confronting various denizens of hell, aided by the Phantom Stranger, and the stories are collected as 'Lost Souls'. Whilst tying in with DC's attempt to create a more 'mature' set of horror characters, the shifts in personality and behaviour are forced. The 2002 series picks up where *Dead Again* leaves off, with Deadman on a mission to recapture escaped evil souls. Using detective Max Loomis as a supporting character gives Deadman a relationship with the normal world, and the fact that he can't possess the bodies of the escapees does make the adventures more demanding, but the best issues are a two-part mystery (5-6), drawn by Garcia-Lopez. Deadman romances the ghost of a murdered woman, delaying his investigation into her death. The artwork by Shawn McManus (7-9) helps makes the final storyline more interesting, but the quick cancellation can't have been a surprise.~NF

DEADPOOL

Marvel: *4 issue miniseries ('The Circle Chase') 1993*, 4 issue miniseries ('Sins of the Past') 1994, 70 issues (0, 1-69), 2 Annuals, 2 one-shots 1997-2002*

Introduced in the dying days of the *New Mutants* (98), Deadpool, the indestructible assassin, was first dry-runned in two miniseries. Both are tolerable, but unexceptional adventures involving leftover members of the X-Men cast; Black Tom and his non-romantic life-partner, the Juggernaut, and Banshee and his daughter, Siryn. The only character or plotline held over from the minis to the ongoing series was Siryn and Deadpool's mutual, if seemingly doomed, attraction. Joe Kelly introduced a different take on Deadpool with the first issue of the ongoing title. Repentant of his past life, and striving to make amends in his own demented way, our anti-hero surrounds himself with a bizarre supporting cast and seeks redemption. Of course, given his skewed perspective on the world, he has to kill a lot of people along the way.

Deadpool's... awfully hard to describe. He's an agent for Landau, Luckman and Lake, an international dimension-spanning evil organisation with vast resources and power, who for some reason entrust their most crucial operations to a deranged assassin, a skinless psychic and a woman in skintight latex with a serious stick up her arse. Deadpool's trying to atone for his past, but keeps a blind old lady prisoner and tortures her periodically. Other Marvel characters visit frequently, but rather than the cynical, money-spinning team-ups in other series, the po-faced do-gooders are often caught with their metaphorical pants down. It's grim, hilarious, occasionally scary, and often more than slightly oblique. You wonder who Kelly had help from, since he hasn't achieved anything resembling this quality since. Check out 10-11, introducing the Lightning Rods (the artists formerly known as the Great Lakes Avengers), and sending Deadpool back into the past to interact, Forrest Gump like, with the actual reprinted pages from Amazing Spider-Man 47. If you don't like that story, then you just won't 'get' any of the series, and should pass it by. Ed McGuinness and then Walter McDaniel pencil most Kelly issues, both adept at big cartoony figures, and both shirkers when it comes to backgrounds. December 1998 was designated "Deadpool Month" and two one-shots were released in the hope of attracting new readers. *Deadpool and Widdle Wade*, pitting him against a miniature Japanese clone, is unlikely to have appealed to anyone new (or many regular readers, one suspects), but with assorted artists parodying children's books and features, Baby's First *Deadpool Book* is very much Kelly on form. There was also the text based Encyclopaedia Deadpoolica providing detailed summaries of all issues to 22.

With 34, Christopher Priest took over the scripting, and did... well, much of the same thing. For someone who, ordinarily, is one of the more creative scripters, his run on Deadpool, though amusing, showed little actual invention. Jimmy Palmiotti wrote 46-56, and despite making the tone of the book a whole lot grimmer, he did introduce Kid Deadpool, the son of someone Deadpool inadvertently killed, as our hero's kid sidekick, for which he should be appropriately thanked. 57-60 were labelled 'Agent of Weapon X' 1-4, and 61-64 'Funeral for a Freak' 1-4, faux miniseries scripted by Frank Tieri to trick new readers into picking up the comic. Resuming with 65, Gail Simone (scripter) and Udon Studio (art) involved Deadpool's gradual loss of his abilities – and possibly his life – while throwing third-string marvel characters like Dazzler and the Rhino into the mix. By now, however, the riffs were tired. The comic's comparative originality, the very thing that had given it appeal, was working against the series as most replacement writers tried to ring variations on the same theme, and, although doing much inventive work, rapidly found themselves in a tighter straitjacket than expected. Most issues of *Deadpool* are at least mildly amusing, but you need to go to the first 33 for 'the real deal'; anything else is a dilution and repetition of the concept. After cancellation Simone, Udon, and some variation of the character went straight into *Agent X*.~HS

DEADSHOT

DC: *4 issue miniseries 1988-1989*

Batman foe Deadshot was a core member of Suicide Squad, and has been diagnosed as a hitman with a death wish. While Floyd Lawton attempts to locate his kidnapped son, his therapist, harbouring feelings for Lawton, checks into his past. It's a gloomy, depressing story of a fractured family from the team of John Ostrander, Kim Yale and artist Luke McDonnell, but excellently plotted and executed. Deadshot's fatalism and the desperate optimism of therapist Marnie Herrs are well contrasted, particularly in an epilogue scene. Not a laugh to be had, and all the better for it.~FP

Recommended: 1-4

DEADSIDE

Acclaim: *3 issues 1999*

A half-hearted attempt to jumpstart Acclaim's comic line for the launch of the *Shadowman* computer game, Deadside is the place where all the dead people go. There are Heavens and Hells within, but mostly it involves the dead just standing in mud, being bored or screaming or trying to escape. If they do Shadowman kills them again. Some more. Whatever. Paul Jenkins, Ashley Wood and Dennis Calero flounder with the concept, trying for everyday tales of the departed but it lacks a central narrative to drive it. The planned fourth issue was never published.~WW

DEADWORLD

Arrow: *9 issues 1986-1988*

Caliber: *Series one 17 issues (10-26) 1988-1992, series two 15 issues 1993-1995*

Off-putting, gratuitously gory covers disguise this initially quite enjoyable Troma-style romp (although Arrow wised up and provided retailer-friendly alternative covers from 6). A black- magic ceremony gone wrong turns almost the entire population into zombies. The few survivors, initially a group of typical Troma teenagers, struggle in a world gone very wrong. Stuart Kerr and Vincent Locke produced the original issues (reprinted in the collections and as Deadworld Archives 1-3), and after they left it all began to go pear-shaped. The humour disappeared and grim and gory was the order of the day. A Punisher-style character called Deadkiller is introduced in 19, and that and the two succeeding issues are also available as a reprint one-shot titled Deadkiller. 1-16 are collected over two volumes.

A miniseries titled *To Kill a King* separates the first and second Caliber series. Dead Killer decides it's time to finish King Zombie, who's able to unite the otherwise mindless dead under his control. By series two the cast had grown to massive proportions, and there are myriad sub-plots, but they're competently handled, which makes it a shame the artwork is never more than mediocre, with 6-11 appalling. 12 and 13 are flip-books doubling up as *The Realm* 9 and *Beck and Caul* 6 respectively. Storyines conclude in disappointing fashion with 15, as further issues are promised.~FP

DEAR JULIA

Black Eye: *4 issue miniseries 1996-1998**

Boyd Soloman stands on a window ledge about to throw himself off in an attempt to fly. How he arrived there is related in largely epistolary fashion, reviewing past events to explain his present situation. The first impression of *Dear Julia* is unsettling, with Brian Biggs' art imparting loneliness and isolation, and although the pace is occasionally only a notch above static there's enough atmosphere to compensate. The works of David Lynch come to mind in comparison, with significant detail concealed in small moments, and as such *Dear Julia* is best read via the Top Shelf collection.~WJ

DEATH

DC/Vertigo: *3 issue miniseries ('The High Cost of Living') 1993*, 3 issue miniseries ('The Time of your Life') 1996*, 4 issue miniseries ('The Girl Who Would Be Death') 1998-1999*

As introduced in Sandman 8, Death is whimsically personified as a pallid young woman in a black vest and tight black trousers. Although largely sympathetic and somewhat capricious, Death was never particularly strongly characterised in Sandman, and her popularity would seem to lie in her appealing appearance.

For her first miniseries Death remains somewhat the cipher, tossing out Zen remarks as a reactive rather than instigative presence. 'The High Cost of Living' takes as its premise that once every century Death becomes human for a single day in order to retain a feeling for humanity. In 1993 she appears in New York to alter the life of Sexton Furnival, precocious, self-absorbed and self-pitying teenager, unwittingly involving him in a search for a missing heart and an encounter with a demon. This slim plot works as Furnival's perceptions of life are subtly altered through experience, and Death holding a mirror to him. Writer Neil Gaiman's particularly good ear for naturalistic dialogue and skilful humorous touches go a long way. There's the odd twee moment, particularly the song lyrics in 2 (pandering to a perceived audience, one hopes), but overall 'The High Cost of Living' is a triumph.

'The Time of Your Life' is even better, with Death's participation minimal and enigmatic, as the story concentrates on lesbian couple Foxglove and Hazel. Since their début in *Sandman* 32 (and cameo in the previous Death series) they have a child and Foxglove has become a successful singer on a global scale. All is well, so it would seem, but that's not the case. By the end of the third issue both have learned something about themselves on a journey that's had plenty of surprises along the way.

Of course, good comics writing is forever jeopardised by unsympathetic artists, but penciller Chris Bachalo is distinguished at conveying small moments of characterisation, while smart enough to ensure dialogue-heavy sequences remain visually interesting. When he departs midway through the second issue of the second series, former inker Mark Buckingham seamlessly continues, proving equally adept. The irritating fantasy stylings that occasionally prompt groans of disbelief in *Sandman* are largely missing here, so those who find that title too mannered should still enjoy the *Death* stories. Those who love *Sandman* will enjoy them anyway, and those who've never read either ought to sample.

The third series concerns the romantic attraction of death, with its personification but a hovering presence. Untouched by previous contributors, it falls far short of their efforts, as shallow characters populate a grim narrative lacking any redeeming self-mocking qualities. The jagged art of Dean Ormston is impressively bleak, and serves well in further distancing readers. Alienated teenagers will be seduced, but adults should stay clear. Those who do enjoy it, though, might want to investigate the sequel in *The Dreaming* 36-38.~WJ

Recommended: 'The High Cost of Living' 1-3, 'The Time of Your Life' 1-3

DEATH & CANDY

Fantagraphics: *3 issues + 1999 to date*

Max Andersson is a Swedish creator whose surreal tales have a punk sensibility, reminiscent of Chester Brown's *Yummy Fur* and stylistically similar to Julie Doucet in his decorative inking. These issues feature separate strips about Death on the road with Candy and six kids, as well as Car-Boy, Wreck-Boy and Tractor-Girl, and a continuing strip about what appears to be a young man's nightmare relationship with his parents (possibly autobiographical). Another continuing story, 'Bosnian Flat Dogs' (from 2), is written by Lars Sjunnesson, featuring himself and Max on an adventure in Sarajevo.~NF

DEATH BY CHOCOLATE

Sleeping Giant: *2 issues 1996*

Very silly for the first few pages, as a chocolate-shop owner is transformed into living chocolate by an alien enslaved in a chocolate factory. David Yurkovich's captions are a tortured first-person narrative, heightening the ridiculous situation, and his pages are drawn in deadpan, starkly contrasting black and white with no hint of parody, giving the entire comic a *Twilight Zone* feel. Unfortunately, what would have been a good short story is dragged on through a standard mad-scientist plot. The second issue, subtitled 'The Metabolators', sees our man return to his home town and transform everything and everyone into chocolate. Luckily the authorities have the Metabolators on hand. Yurkovich later learned how not to flog an idea to death.~FP

DEATH DEALER

Verotik: *4 issue miniseries 1997*

Goth metal screamer Glenn Danzig wrote and published this tawdry adult barbarian comic, 'inspired' by a Frank Frazetta painting. Danzig's puerile script merely provides an excuse for artists Simon Bisley and Liam Sharp to draw endless, anatomically exaggerated pin-ups of either naked Amazonian warriors or the gut-ripping, axe-wielding Death Dealer, who seeks bloody revenge against a bunch of evil lords and kings. The rather tired sword and sorcery genre certainly needs refreshing and updating, but this silly piece of gory trash only adds extra metalhead 'outrage' to the usual generic hokum.~AL

DEATH METAL Vs GENETIX

Marvel UK: *4 issue miniseries 1993*

Robotic psycho-killer desperate to end murderous sprees tries to dupe superteens into offing him. A bit more plot than most Marvel UK stuff.~HS

DEATH RACE 2020

Cosmic Comics: *8 issues 1995-1996*

It's always nice to see Pat Mills and Kev O'Neill working together, even if the script does have a 'helping hand' from the less talented Tony Skinner. 1-3, if not completely satisfying, are an enjoyable and bloody romp. Based on the cult movie *Death Race 2000*, the strip continues the story of Frankenstein, the genetically altered driver who becomes President of the US after killing the incumbent during the violent cross-continental race. In the early issues Frankenstein, who's banned the Death Race, despairs of a populace who've made death into a religion and calls a free election. When he loses he returns to the race and the strip becomes nothing but a formularised carnage, which coincides with O'Neill bowing out and handing the art chores to Trevor Goring. Goring does his best, but the less angular, less exciting art, and the predictability of the plot, make the rest of the series lacklustre.~FJ

---

* Available in a collected edition

DEATH RATTLE

Kitchen Sink: *Series one 18 issues 1985-1988, series two 5 issues 1995-1996*

The freshest thing about *Death Rattle* is its experimental covers. Many don't work, but at least it shows there's a spark of life in the old corpse yet. It's the comic-book equivalent of *Friday the 13th*, a vaguely competent horror anthology tending towards figurative art and straightforward narrative, frequently in the EC mould but told with less economy. Don't look to this title for subtlety because you'll be sorely disappointed. A number of good people have turned up in its pages (Mark Schultz's popular *Xenozoic Tales* previewed in 8, and indeed he produced the lead story for the second-series opener), but rarely at their best. Jaxon fans will delight in Bulto, his long-winded tale of morally-soured monks vs Indians and squidgy Cuthulu-type monsters in 17th-century Central America; the rest of us will find it interminable and be forced to skip large chunks of issues where it constitutes the main attraction.

If you don't like predictable gore, look at issue 18. Behind a pedestrian Frank Miller cover is a neat Gerard Jones-scripted story, probably the most clever piece of writing the title's ever seen. 'When I Grow Up', illustrated by Doug Potter, concerns a little girl who, out playing with her friends, wishes she could find out what becomes of them. They proceed to act out all the everyday traumas and tragedies of adulthood. Potter's drawings of pre-pubescent children kissing, getting pissed, rowing etc. make particularly unsettling images. Also of note are a couple of early Charles Burns stories and some Basil Wolverton reprints.~FJ

DEATH'S HEAD

Marvel UK: *10 issues 1989*

An eccentric cyborg starts a career as a "freelance peacekeeper". The peculiarly homemade look of the title character gives the strip a certain visual charm, but the joke quickly wears thin. If you must sample go for the Dr Who guest appearance in 8, which was quite fun. With the popularity of Death's Head's successor this series was reprinted and completed as *The Incomplete Death's Head* in 1993.~HS

DEATH'S HEAD II

Marvel UK: *4 issue miniseries 1992, 16 issues 1992-1994*

This is new, improved, sleekly redesigned version of the original Death's Head, complete with a multi-morphing weapons arm. This was fleetingly popular in the early 1990s, and served as springboard for artist Liam Sharp to more lucrative gigs. His art aside, it's all carnage by numbers, and he left after issue 4 of the ongoing series, which then rapidly followed the usual Marvel UK path of decline into rotating creators and pointless mutant guest stars.~HS

DEATH'S HEAD II & The Origin of Die Cut

Marvel UK: *2 issue microseries 1993*

Well now, it's the origin of Die Cut and it's got Death's Head II in it. John Royle's art is quite nice. That's all.~HS

DEATHBLOW

Image/WildStorm: *30 issues (1-29, 0) 1993-1996, 2 issue microseries (Deathblow and Wolverine) 1996-1997*, one-shot ('Wild Times') 1999, 3 issue miniseries ('Byblows') 1999-2000*

Deathblow is Michael Cray, a government operative, part of the original Team 7, except that he hasn't manifested super powers like the others. 1-12* form a single non-stop action thriller concerning an attempt to awaken Lucifer and bring Hell to Earth. Believing he's dying of cancer, Deathblow is aided by his ex-wife, Gaby, the Order of the Cross and various members of Team 7. In 13 Deathblow takes employment with Executive Protection Services running into some werewolves and a vampire on his first job (13-14). Apart from the *WildStorm Rising* crossover (16), the rest of the series is in effect a single story leading to Deathblow's funeral in 29. He teams with Gen^{13} (20-21) and individual members of Team 7 against Kaizen Gamorra and Miles Craven who want to steal the team's powers before everyone is caught in WildStorm's 'Fire From Heaven' crossover (26-28). Created by Brandon Choi and Jim Lee, the latter only manages two issues before handing over the art to Tim Sale (3-12) who continues to use Lee's 'homage to Frank Miller' style for a while before lapsing into his own. Trevor Scott is then the major penciller (13-14, 20-22, 25-29), initially aping Lee but, like Sale, soon just being himself. Choi manages to stick with the series until the end, but by then Tom Joyner's been co-plotting and scripting (from 21). Despite all the action, Choi works hard to characterise Deathblow as a man driven to avenge the death of his parents, aware of the contradictions in his acceptance of orders to kill, guilty over the loss of his wife and other friends and afraid that he's not good enough to defeat the enemy. The quality isn't consistent, but the series succeeds in being more than a simple showcase for big guns and violent action. *Deathblow* 0 was published in 1996, finally completing the story begun in *Darker Image* by Choi and Lee (with Scott doing most of the finishing on the artwork).

In 'Byblows', Alan Moore and Jim Baikie tell the story of Geneveive Cray, one of many clones of Michael Cray who have been left to kill one another until only the best is left alive. It's less wordy than almost anything else Moore's written, but very enjoyable. Deathblow saves Wolverine from an attack by ninjas and then has to help him prevent the dead souls in an ancient urn from being released. Set in San Francisco while Wolverine is still a member of Department H, Aron Wiesenfeld's story has less time for Deathblow, but the detailed artwork, by Wiesenfeld and Richard Bennett with washed-out colours by Monica Bennett keeps it interesting.~NF

DEATH HAWK

Adventure: *3 issues 1998*

"He's got a beautiful girl in one hand, a really big gun in the other and an intelligent blob of goo for a best friend." This was the slogan for the comic and tells you all you really need to know, except for the fact that Death Hawk is a space adventurer for hire, and that 1 has early pencils by Adam Hughes.~DB

DEATHLOK

Marvel: *4 issue miniseries 1990, 34 issues, 2 Annuals 1991-1994*

Despite appearances, this doesn't follow on from the cybernetic psychopath's mid-1970s adventures in *Astonishing Tales*. Instead of soldier Luther Manning, the new Deathlok is a pacifist scientist who believed he was working on developing cybernetic limbs for the disabled but was in fact creating a killing machine, into which his brain is placed and programmed to kill. Oh, the angst and irony. Writer Dwayne McDuffie takes him through cyborg conspiracy adventures and team-ups with everyone from Misty Knight to Doctor Doom a little too often for the series' own good. In between all the guest stars there's not quite enough space left for Deathlok himself, although overall it's not too bad a read. 31-34 try to tie up the continuity between the 1970s series and the later ones, which pretty much boils down to alternate worlds and time paradoxes that could have been left to the simple explanation of "it's a new series, it doesn't have to be the same guy". To make it even more complicated, the original Deathlok turns up in a Captain America short story in the first issue of the 1996 Marvel Fanfare (having hung around with him in the late 280s of his own comic) and it seems as if the Dwayne McDuffie issues have been forgotten completely. Even if it is all explained somewhere, you don't really want to know.~JC

DEATHLOK

Marvel: *11 issues 1999-2000*

Deathlok was pulled off the shelf, dusted down and reworked as part of Marvel's 'Tech' line, and certainly never looked better than when drawn by Leonardo Manco. This time S.H.I.E.L.D. agent Jack Truman is transformed into a cyborg as the only means of saving his life after he sustains horrific injuries. Written by Joe Casey, almost the entire series pits Deathlok against the previously lightweight Clown from the Circus of Crime, and former allies, now convincingly depicted as viable threats. There are moments that could have been trimmed, and the fill-in artist on 4 and 7 is disappointing, but overall it's a decent stab at the idea.~WJ

DEATHMATE

Valiant/Image: *6 issues (Prologue, Yellow, Black, Blue, Red, Epilogue) 1993-1994*

Shoddy and inept teaming of the Valiant and Image comics characters that sees energy being Solar merge with the equally non-corporeal Void from *WildC.A.T.s* to create a warped and foredoomed blending of their respective universes. Only one hero from each Earth knows the truth and together they must go back in time to prevent the cosmic union from occurring before all reality is destroyed. What story there is only occurs in the Prologue and Epilogue issues whilst the series itself concentrates on improbable pairings of heroes and villains with plenty of gratuitous and irrelevant slaughter. Mindless rubbish.~WW

DEATHSTROKE THE TERMINATOR

DC: *60 issues, 4 Annuals 1991-1995*

Marv Wolfman created this villain, a mildly interesting assassin with a conscience, for his successful *New Teen Titans* in the early 1980s. In the aftermath of the Punisher phenomenon, there was clearly potential in a Deathstroke comic, and Wolfman started shoehorning Slade Wilson into the *Titans* at every opportunity, as antagonist, as reluctant ally, and most conspicuously as father of Jericho. DC were eventually bludgeoned into publishing a *Deathstroke* title, but almost from day one it was a serious misfire, oscillating between espionage plotlines, superhero stories and 'Men's Sweat' adventure tales, while uneasy in all genres. 1-5 were collected. 10 introduced the new female holder of the Vigilante title, a rehash of a similar character Wolfman had already spun off from *Titans*, who became a semi-regular supporting cast member and romantic interest. 13 is the second half of a crossover from Superman 68, and 14-16 tie in with the 'Total Chaos' story in *New Titans* and *Team Titans*. The series kept trying to break away from guest appearances and stand on its own, but clearly sales flagged every time, and the bulk of the readers, one suspects, were simply *Titans* completists who bought the title grudgingly. It eventually staggered to a close a year or so before Wolfman finally wore out his welcome on *Titans* itself.~HS

DEATHWATCH

Harrier: *One-shot 1987*

A collection of short stories from Art Wetherell featuring an immortal being created to destroy the monsters that prey on humanity. Enjoyable enough but by no means special.~WW

DEATHWISH

Milestone: *4 issue miniseries 1995*

A series of murders with transsexuals the victims is investigated by a detective who is herself transsexual. This oddball premise could have been interesting, but strayed and rambled, eventually stuttering to the inevitable halt.~HS

DEATHWRECK

Marvel UK: *2 issues 1994*

The inventor of Death's Head II, short of a few spare parts, cobbles together yet another cyborg assassin, this one composed in equal parts of an old motor car, a wino and an armoury. The resultant mess then falls through a time gap and starts shooting up and drinking dry various bits of history. Pathetic and embarrassing.~WW

A DECADE OF DARK HORSE

Dark Horse: *4 issue miniseries 1996**

A something-for-everyone collection of ten years of Dark Horse comics, with new material from their most successful publications. The best is rather obvious but consists of Frank Miller's 'Sin City' (1), Matt Wagner's Grendel (1), Eric Luke and Scott Benefiel on Ghost (2), Mike Baron and Steve Rude's Nexus (3), Paul Chadwick's Concrete (4) and Masamune Shirow's 'Exon Depot' (4). The other features are either good examples of the series – Predator (1) by Henry Gilroy and Igor Kordey, Trekker (2) by Ron Randall and Chris Warner's 'Black Cross' (3), or competent if unappealing, Star Wars (2), Aliens (3), Outlanders sketches (3), The Mask (3), Godzilla (4).~NF

Recommended: 1, 4

THE DECEPTION featuring Jordan Risk

Image: *3 issue miniseries 1999*

Jordan Risk, maverick magician, comes out of early retirement to perform at his best buddy's new casino. Sounds nice, except on opening night, one of the showgirls dies on stage and Risk is the main suspect. Unsurprisingly, he sets out to solve the mystery using his wits and stage magic. OK yarn, but unengaging, with Risk, who we are meant to believe is an exciting daredevil, seeming dull and flat.~DB

DECOY

Penny Farthing: *4 issue miniseries 2001*, 4 issue miniseries ('Storm of the Century') 2002*

The first miniseries is a readable yarn with an old plot as Dolphin City rookie cop Bobby Luck encounters and bonds with an alien entity marooned on Earth when the other E.T.s in his hunting party have a falling out. Its an unchallenging piece of fluff which grows more readable when taken in context of the second outing when Luck, his partner Moreno, and Decoy the shape-changing alien find themselves opposing a mysteriously antagonistic police department whilst hunting for monsters in the sewers.~WW

DEE VEE

DeeVee: *14 issues 1996-2000, one-shot (2001) 2001*

An Australian anthology title that had the good sense to find a place for immigrant Eddie Campbell, as his strips are by far the best items on offer. Returning to his alter-ego Alec, Campbell details the growth of the British small press comics publishing during the 1980s, the parallel blossoming of the relationship with his wife, and the rise of the graphic novel. As ever, he proffers philosophical insights amid the usual Campbell mixture of arrogance, wonder and insecurity, occasionally throwing in diversions (discussing the history of comedy in art in 6). In short segments these strips aren't enough to recommend *Dee Vee* alone, but they're a master at work, collected as *Alec: How To Be An Artist*, heartily commended. Sadly the remaining content, although sometimes amusing, falls well behind. Other noteworthy items include the art of Christopher Brunton and Pete Mullins, the strips of Bruce Mutard (1, 8, 12), and Linzee Arnold in 6 is always welcome, but it's puzzling how the hollow pontifications of co-editor Michael Evans induce such letters page praise. The best issue is the 2001 one-shot. Evans reins in his pretensions for a brilliantly written appreciation of Francis Bacon, Campbell and Daren White provide an amusing character dissection, and Amber Carvan details her nightmare school year in Switzerland. Additionally Gary

Chaloner turns in an odd story about Jack Cole and Mutard provides another of his glimpses of Hitler as an art student. Why weren't all the issues this good?~FP

DEFCON 4

Image: *4 issue miniseries 1996*

The Patron has sent four assassins back through time to prevent his past self from creating the technology that he now feels has ruined the future. Unfortunately for his plans, the assassins choose to complete their mission by killing him. The four assassins have not been transported through time physically but in essence, into bodies chosen to match their abilities. Well written and drawn by Matt Broome and Jeff Mariotte, this is a fast-paced science-fiction story that creates an intriguing situation but spends too much time on fight scenes instead of exploring either the Patron's future or his present. Intended to be ongoing, the first part ends with the assassins free but having to regroup after failing in their first attempt to kill the Patron. There's no indication when it will restart.~NF

The DEFENDERS

Marvel: *152 issues, 1 Annual, 5 Giant-Size 1972-1986, series two 12 issues 2001-2002*

The Defenders first appeared as a try-out in *Marvel Feature* 1-3. Their raison d'être, in contrast to the Avengers, was a loosely knit band of heroes with no permanent members and no formal structure who rallied when necessary. They were often referred to as a 'non-team' in view of their reluctant, uneasy bonding. The team experienced two distinct incarnations, separated by issue 125. During the first phase the most lasting participants were Dr Strange, Sub-Mariner, Hulk, Valkyrie, Nighthawk and Hellcat. Lesser roles were played by Silver Surfer, Son of Satan, Gargoyle and Beast. *The Defenders* never found a comfortable niche. Dr Strange fitted poorly with the more conventional heroes owing to his ability to whisk rabbits out of hats whenever the plot was stuck for a device.

Steve Englehart, Len Wein and Sal Buscema crafted a respectable nineteen issues with 8-11* chronicling half of the 'Avengers-Defenders War'. Steve Gerber's reign from 20-41 produced the most consistently excellent run. The Sons of the Serpent story in 22-25 explores social and racial problems, delivering a thesis strong on message albeit short on subtlety. The final issue's shrewd revelation produces a shock for Nighthawk. This was in addition to the trauma of Giant-Size 4, a delightful single issue story sporting fine Don Heck art. 26-29 co-star the Guardians of the Galaxy and introduce intriguing new character Starhawk in an involved plotline wherein the Defenders to the Guardians' future. The pace and weirdness step up a gear with Gerber's Headmen saga (31-40, Annual 1); wonderfully bizarre yet contrasting with the touchingly realistic sub-plot detailing Valkyrie's quest to discover the past of her human host Barbara Norriss. Brain and mind transplants abound, Nebulon the Celestial Man instigates a programme of mass mind control, the Red Guardian is introduced, Valkyrie endures a spell in prison and hosts of guest stars and villains combine to great effect. With 35 Klaus Janson replaced Jim Mooney inking Sal Buscema's pencils, imparting a grittier look to the title, which continued all the way to the finale (Annual 1) in which the team must deal with four separate threats simultaneously.

Dave Kraft took over and soon hit form with the 'Who Remembers Scorpio?' tale in 46-51. His character study of this morose, introspective villain recommends these issues to any collection. Keith Giffen aided and abetted with quality pencilling in a title admittedly well short of artistic highlights. Kraft maintained solidity until 61, but fell into a decline, which was accelerated by Ed Hannigan until Marc DeMatteis assumed penmanship from 92. Don Perlin ousted the musical artists and pencilled on to the final issue. DeMatteis' frustrating run comprised interesting, well-knitted plots encompassed in patchily written stories. His most notable issue is 111, delving into Hellcat's past.

The Defenders' second incarnation manifests in 124-125, in which the Beast reforms the team as himself, Angel, Iceman, Valkyrie, Gargoyle, Moondragon and Cloud (from 127). They gain a recognised structure and headquarters in Angel's Rocky Mountain retreat. These issues also resolve the sub-plot of the enigmatic Elf, who first appeared a hundred issues earlier, and supply a lame rationale as to why the old Defenders had to disband. 125 also heralds the title change to *New Defenders* and classy covers abound through to 152.

Peter Gillis' scripts from 131 mainly revolve around Moondragon's battles against the limits on her powers imposed by Odin. Inevitably, she is thrown into conflict with most of the rest of the team. In an inappropriate cosmic finale, she contests a nebulous entity, The Dragon of the Moon. All the Defenders bar the ex-X-Men apparently die, with Angel, Iceman and Beast subsequently forming X-Factor.

'"The Worst Comic Ever Produced" — Comics International ' proclaims the cover to second series 8. And it's not far wrong. Marketing strategies have changed a touch since the 1960s. Kurt Busiek and Erik Larsen go back to basics from 1 as the mainstays (Dr Strange, Sub-Mariner, Silver Surfer, Hulk) fight Yandroth, the villain they battled in their first appearance in 1971. The problem is that the big four have no intention of forming a team. The plot device enabling them to appear together every month is to have Yandroth curse them into having no choice about it. Plot strings dangle from thin air as both story and art deteriorate into infantile farce whilst the creators play the comic for laughs. Fill-in pencils in 8 and 9 by Ron Frenz look good in comparison to Larsen. The storyline continues in *The Order*.~APS
Recommended: 31-40, 46-51, Annual 1, Giant-Size 4

DEFIANCE

Image: *5 issues + 2002 to date*

Two factions are fighting for control of Hell, with a task on Earth of great strategic importance. All the imagination here is within the artwork of Kanno Kang and Zack Suh. Seemingly a computer enhanced airbrush story, there's considerable style without the technique overwhelming the talent.~WJ

DEITY

Hyperwerks: *6 issue miniseries 1997-1998**
Awesome: *5 issue miniseries ('Darkness and Light') 1998**
Image: *4 issue miniseries ('Revelations') 1999*

Deity charts the progress of Jamie, destined from birth in 2010 to become an interplanetary saviour. What works well is the contrast between the day to day preoccupations of teenage Jamie with the fallout from an intergalactic conflict occurring around her (in the first series without her knowledge), a theme common to manga. The characters are far better conceived than most manga, though, possibly the work of co-writer Robert Napton. Japanese influence is also visible in Karl Altstaetter's pencils, but combined with a modern Image style. It's a flashy, and likeable mix. Oh yes, and Altstaetter wins a hypocrisy gold medal for his editorial comment that content is worth any amount of gimmickry. This is from a man who's managed to issue 15 comics under 34 different covers without even counting foil stamped variants. Deity is next seen in *Saint Angel*.~WJ

Richard Moore's DÉJÀ VU

Radio Comix: *2 issue microseries 2000-2001, one-shot ('The Pond') 2001*

"Post-modern vampire slut, isn't it" says it all nearly. That and "inept". Similar to, but nowhere near as good as, Moore's *Far West*.~GK

DELERIUM

Metro: *2 issues 1987*

Mixed bag anthology title with Keith Giffen and Robert Loren Fleming's alternate Ambush Bug March Hare in 2 being the standout. There's also nice art from the undersung Chuck Roblin in 1, but otherwise ordinary is the watchword.~FP

DEMENTED: Scorpion Child

DMF Comics: *5 issue miniseries 2000-2001*

Under arrest for the murder of Red Thunder, McVain is helped to escape after his arraignment, triggering riots between heroes and villains. He's pursued by the remaining members of Red's team, the Justice Keepers, as well as Victor, who had been training to kill Red himself, and now feels that he needs to kill McVain. This is violent and brutal, but colourful, superheroics, with wildly inconsistent artwork.~NF

The DEMON

DC: *Series one 16 issues 1972-1974, 4 issue miniseries 1987, series two 59 issues (0-58), 2 Annuals 1990-1995*

At first this looked a poor replacement for Jack Kirby's cancelled *New Gods* saga, but Kirby came though, taking the legend of Camelot one stage further. The opening pages of Demon 1 resemble nothing so much as a space battle set in medieval Britain. Merlin summons Etrigan the Demon to do his bidding and protect Camelot from the clutches of the evil Morgaine Le Fey, but to no avail. After the fall of Camelot, Etrigan is given human form, and is left to wander the world for aeons. In modern-day Gotham, we're introduced to Jason Blood, Demonologist, who is unaware that he's the human guise of the demon. Not for long, though, as the ageing Morgaine Le Fey drops by looking for Merlin and the scene is set for supernatural encounters in true Kirby spirit. The supporting cast played a major role. There was Randu Singh, a turbanned telepathic UN delegate, the cigar-smoking advertising executive Harry Mathews, and the lovely Glenda Mark, Jason's romantic interest. The most endearing of the many unusual adversaries was Klarion the Witch Boy, a young fugitive sorcerer from another dimension, who was up to a lot of mischief in 7, and caused more havoc in 14-15, accompanied by his cat Teekl, who could turn into a beautiful human female. *The Demon* isn't Kirby's greatest achievement, with a few stories stretched beyond interest, but his imagery was flawless.

The character survived as a guest star in various titles, particularly *Swamp Thing*, which inspired the Matt Wagner miniseries. This has a very positive role for Glenda Mark trying to cure exorcise Jason Blood, and is steeped in rituals and mysticism rather than superheroics. We meet Etrigan's father and learn more about his relationship to Merlin. It's well executed, but Wagner tries to stress the eldritch mood of the series too strongly, which makes for laborious reading at times, particularly as Etrigan's speech patterns all rhyme.

The fate of Harry Mathews, only hinted at in the Wagner series, sets the mood for the next ongoing series, written by Alan Grant. Mathews is now a seat cushion. His face is there, but he lacks a soul. Tongue firmly in cheek best describes the mood, with the Demon now more a character of mirth and mischief. There's much demonic imagery from artist Val Semeiks, with a ghastly Hell, and some really outrageous scenes of black humour, well conceived by Grant. When not in Hell, the setting is Gotham, so a few Batman appearances were to be expected, but it's guest stars galore in 9-15. These involve Klarion, who's out to destroy Etrigan, the Phantom Stranger and Lobo, the mad hitman hired to drop a nuclear bomb. It's a frantic tale nicely produced. 19 offers the secret origin of Etrigan (and a free Lobo poster), while Matt Wagner returns to write and illustrate 22. Kirby villain The Howler returns in 23-24, also starring Batman and Robin with a gruesome ending initiated by the usually passive Glenda. Superman takes on Etrigan in 'Political Asylum' (26-29), in which the Demon runs for President. 31-37 has a janitor finding Merlin's long-lost Eternity Book, with unusual consequences and lots of fun and games with Wonder Woman and Lobo, who Grant can't keep away from this title.

Possessing a warped imagination equal to Grant's, Garth Ennis wrote from 40, along with ace illustrator John McCrea. Ennis' Etrigan was just as mischievous, but more brutal. 41 offers a one-off by Kevin Altieri about the Crusades, and 42-45 features Hitman (introduced in Annual 2) as Etrigan hires the assassin to see off fellow-demon Asteroth. Meanwhile Jason and Glenda are going through bad patch, even though she's carrying his child. 50 is an extra-long, amusing pirate tale, but there's nothing funny about issue 0, where Jason Blood's memory of the last thousand years is restored. It seems he's not the innocent he thought he was, which leads well into the story of Glenda giving birth and Etrigan kidnapping the child. Appalled by his past, Jason Blood hires Hitman to destroy Etrigan and be rid of his curse. Overall this run is a thoroughly entertaining series that does justice to the Kirby character. if you like your humour silly or black, you can't go wrong. Both annuals are also well done. The first had Klarion possessed by the evil Eclipso, while 2 introduces Hitman, the most successful character to emerge from the annuals introducing new heroes that year.~HY

Recommended: Series one 1, 2, 7, 14-16, series two 0, 9-15, 19, 23, 24, 40-44, Annual 2

DEMON DREAMS

Pacific: *2 issue microseries 1984*

Short stories by Arthur Suydam reprinted from various sources. The first issue contains a couple of good horror stories, 'Christmas Carol' and 'Bad Breath' while the second has more of a fantasy tone with 'The Toll Bridge', 'Mudwog', 'Heads', 'Mama's Place' and 'Food for the Children'. The latter are more self-indulgent but show a greater maturity while the horror strips take a more serious approach to storytelling. All are drawn in Suydam's fluid style, which is influenced by Frazetta but like a cross between Michael Ploog and Bernie Wrightson.~NF

DEMON DREAMS OF DOCTOR DREW

Horror House: *1 issue 1994*

Reprints of Jerry Grandenetti's 1950s strips. Lovely Eisner-style artwork, but the stories have a disregard for logic and consistency to rival the dumbest porn 'plot'.~FC

DEMON HUNTER

Atlas: *1 issue 1975*

Rich Buckler turned out one of the better Atlas comics with his story of Demon Hunter preventing the birth of a demon race on Earth. Buckler later re-named the character Devil Slayer and the story was concluded at Marvel in *Defenders* 58-60.~FP

DEMONGATE

Sirius: *10 issues 1996-1997*

A substandard fantasy adventure peopled with a cast of off-the-peg characters such as cute kids, a sexy chick and an old professor who stumble from crisis to crisis in the land beyond the Demongate. Complete rubbish.~WW

DEMONIC TOYS

Eternity: *4 issue miniseries 1992*

As this adapts a straight to video horror cheapie film, award nominations were few. The plot is basically *Toy Story* gone wrong, following all the horror clichés, but lacking any wit or real scary moments.~WJ

DEMONSLAYER

Image: *3 issue miniseries 1999*, 3 issue miniseries ('Into Hell') 2000**
Avatar: *One-shot 2000 ('Prophecy'), one-shot ('Rave') 2001, two issue microseries ('Vengeance') 2001*

Marat Mychaels is seemingly so concerned with drawing tits, arse and monsters, the first two badly, that the possibilities of his plot to move beyond completely elude him. This is a witless product of little imagination harkening back to the worst of the early Image material. Each issue comes with a variety of covers to bilk the suckers.~WJ

DEN

Fantagor: *10 issues 1988-1989*

Richard Corben's first two Den stories, 'Neverwhere' and 'Muvovum', appeared in *Heavy Metal*. Den is an Earthman who finds himself stranded on a barbaric fantasy world full of monsters and wizards. This self-published series presents part three of the Den saga, which runs through to 7. In it Den searches for his missing lover, Kath, meeting characters from the previous stories in a tale which also encompasses a parallel quest for magical stones of power owned by an evil wizard. There's an almost photographic feel to Corben's drawing, which is strangely at odds with the grotesques that populate his strips. The strong colouring and lettering styles play an important role, producing an unsettling overall effect on the artwork. His scripts, however, often fail to impress. Apart from Den itself there is usually at least one back-up strip, including interesting examples of Corben's early work, short horror strips by Bruce Jones (6-8) and two collaborations between Jan Strnad and Alex Niño (9, 10).~NF

Doug Potter's DENIZENS Of Deep City

Kitchen Sink: *8 issues 1988-1990*

A spotlight shone on the citizens of Deep City, spread over all levels of the community. The first issue, with its obsessions about the trivialities of life, paints rather a false picture of the series, although the full regular quotient of charm and despair is present. Later issues encase the capricious aspects more fully in a rounded story, but all suffer somewhat from being bitty, due in part to the ambitious scope of the series, and occasionally difficult to follow. Doug Potter's art is consistently appealing in an Eisneresque fashion, and when he successfully combines the whimsy with a strong narrative the effect is heart-warming. The best sampler is 5, which recaps the characters featured to date, focuses on the kid gang, and ends with a reclusive figure once able to be anywhere just by wishing it so.~WJ

The DESERT PEACH

Thoughts & Images: *3 issues 1988-1990*
MU Press: *15 issues (4-18) 1990-1992*
Aeon: *7 issues (19-25) 1993-1996*
A Fine Line: *5 issues + (26-30) 1997 to date*

Donna Barr's most famous creation owes his existence to a chance remark made by one of her former fellow-employees following the repainting of a file room. According to Barr, the all-female staff, unnerved by the nameless, effeminate colour, try to identify it: "It's not really pink, is it?" "No, sort of a peachy orange tan." "Desert tan." "Desert Peach?" The obvious pun on 'Desert Fox', Erwin Rommel, World War II's famous Field-Marshal, bloomed full-blown from her Barr's root-bound mind.

The Desert Fox's (fictitious) gay younger brother, Pfirsich Rommel, commands the 469th Support and Gravedigging Battalion, a ragged-arsed accumulation of dregs and misfits unsuitable for combat, in Africa during World War II. Initially a one-note joke character, and never without humour, the Peach and his associates – long-suffering batman Udo Schmidt, Pfirsich's dashing but shallow fiancé Rosen Kavalier, and the battalion under Pfirsich's command – swiftly evolved into multifaceted and often disturbing characters. Politically astute, and gleefully politically incorrect, Barr's work is characterised by a delight in shaking the reader's complacency and a splendid indifference to "what the neighbours will think". Most issues are good self-contained introductions to the series, though the first three, concentrating mainly on the comedy aspects, aren't a true taste of the title's sweet-and-sour sharpness.

Two paperbacks should be distinguished from the run reprinting the series; *Peach Slices* presents older but unpublished or small-circulation Peach stories, while *The Ersatz Peach* is not reprints from the series, but features interpretations of the character by creators other than Barr, some of which are very true to form, while others make you wonder if the people concerned had ever actually read an issue before contributing!~HS

DESERT STORM JOURNAL

Apple: *8 issues 1991-1992*

Scott 'Journal' Neithammer, the journalist hero of Don Lomax's previous war comic *Vietnam Journal*, here emerges from retirement to cover the Gulf War, after learning that his estranged daughter is living in a threatened Israeli kibbutz. This is a curiously schizophrenic series, perhaps foreshadowed by the variant covers to the first issue, one featuring Norman Schwarzkopf, the other Saddam Hussein. The action divides between thoughtful human interludes, where mouthpiece characters 'explain' some of the background to the conflict, and page after page of military hardware fetishism. Tellingly, Vietnam vet Lomax is better at drawing tanks than he is at human beings, and although he's honest enough to admit that "EVERYTHING in the Middle East has to do with oil" his sympathies obviously belong with the American military – the 82nd Airborne are "the best of the best", while anti-war protesters "recycle tired slogans". Dismayingly, the comics themselves are full of ads for books and videos called things like 'Battles and Weapons of War!' and 'Vietnam Home Movies'.~AL

DESERT STORM: SEND HUSSAIN TO HELL

Innovation: *1 issue 1991*

Never let it be said that Innovation weren't behind our boys in the Gulf War. Oh no, they did their bit by grubbing around the depths of their warehouse to pull out some festering unsold comics that they then rebound under a new cover, adding a short new piece of jingoistic claptrap. Strangely, there's no record of anyone at Innovation receiving a medal of honor for their patriotic services. With war against Iraq looming once again, and this unlikely to have sold any better than the comics it rebound, perhaps the warehouse is due another visit.~FP

DESIREE

Millennium: *1 issue 1997*

One of the more distressing trends of 1990s comics has been the repeated association of sexual allure with violence through a succession of scantily clad female assassins. Desiree is another. Writer and artist Naser Subashi will probably improve his promising art, but here it's the interspersed pages by Rudy Nebres that save the comic from being totally without merit. As for the plot, you've read it a dozen times before and Subashi has no new wrinkles.~WJ

Plunge into the Depths of DESPAIR

Print Mint: *1 issue 1969*

As the cover legend has it, 'Plunge into the depths of despair' with R. Crumb at his inventive best. The lead strip, 'It's Really Too Bad', is a nihilistic masterpiece and about as far from the hippy idealism of Crumb's earlier material as you could get.~DAR

DESPERADOES

Image/Homage: *5 issue miniseries 1997-1998**
Homage: *One-shot ('Epidemic!') 1999, 5 issue miniseries ('Quiet of the Grave') 2001**

The Desperadoes are Race Kennedy, Gideon Brood, Jerome Alexander Betts and Abby Degrazia. Kennedy is initially a Pinkerton detective on the trail of the other three, but they are themselves tracking a supernaturally-powered serial killer, Leander Peik who murdered Brood's wife and son amongst others. 1-4 comprise the story of Peik and explain how the four come to be on the wrong side of the law. 5 is a gruesome ghost story centring on the Civil War memories of a dying man. 'Epidemic' sees the group trapped in a quarantined town with a demon-summoning priest. In 'Quiet of the Grave', Brood seems about to leave the others, but is drawn back by a vengeance-seeking zombie. Jeff Mariotte's scripts gives the title an authentic western feel, building on the reinvention of the genre in comics by such as Joe R. Lansdale. This is closer to a traditional western series with just enough of a horror backdrop to make the plots different from what has gone before, and 'Quiet of the Grave' is as concerned with the dynamics of the group as with the gunfights. The artwork by John Cassaday stands out on the first miniseries, but he's reduced to layouts (for John Lucas) on the one-shot and replaced by John Severin for the second miniseries.~NF

DESPERATE TIMES

Image: *4 issues 1998*

Aaaargh Comics/After Hours Press: *4 issues + 2000 to date*

Savage Dragon 42 began a selection of four panel gag strips by letterer Chris Eliopoulos. Given the chance to expand, he increases the panel size, but not the pacing, leading to a particularly stilted first issue lacking in substance beneath a deliberately misleading cover. One hopes Eliopoulos' excellent cartooning retained buyers since subsequent issues contain a high proportion of good gags, and are all worth investigating. Toad and Marty are your average slobby guys, Marty's sister Linda has a troubled romantic life, with occasional boyfriend Doofus perpetually in his theme park mascot costume, and there's the troublesome drunken sloth Kennedy. A collection includes the strips from Savage Dragon and 11 pages of new material.~FP

DESTINY: A Chronicle of Deaths Foretold

DC/Vertigo: *3 issue miniseries 1997*

A mysterious stranger arriving in one of the small pockets of humanity that has survived a global plague provides the framing sequence for three stories of strong women surmounting their circumstances in days gone by. There is a classical romanticism to Alisa Kwitney's scripts, but also an emotional detachment that fails to engage. Kent Williams' ugly paintings provide the framing sequences with Michael Zulli and Scott Hampton drawing the remainder of 1 and 2, and making Rebecca Guay look very out of her depth in such company for 3.~WJ

DESTROY!

Eclipse: One-shot *1986, one-shot 1987*

Scott McCloud produces a treasury-size one-shot featuring two musclebound superheroes beating the crap out of each other and inadvertently invents Extreme Studios comics six years early. *Destroy!* was created with tongue positively glued to cheek (there's a route map of the destruction in the back), and the artwork is great. It was reissued in 3-D a year later.~FP

Recommended

THE DESTROYER

Marvel: *10 issues 1989-1990, One-shot 1991*

The series adapts the best-selling stories of Remo Williams, the ironically named Destroyer who's a reluctant extra-legal problem solver for a top-secret government department. The real star character, though, is Williams' irascible Korean teacher Chiun, master of the ancient bodily ideal of sinanju. Mainly written by Will Murray, the stories capture the tongue-in-cheek flavour of the novels. The first series is a black and white magazine, 1-3 of which are collected, while the one-shot is a traditional comic.~WJ

DESTROYER DUCK

Pacific: *7 issues 1982-1984*

Begun as a benefit comic to raise funds for Steve Gerber's court case against Marvel concerning ownership of Howard the Duck, the polemic soon becomes tiresome, but Gerber mistakenly believed there was life beyond a one-shot for this G.I.Duck. Illustrated for five issues by Jack Kirby, also with a legitimate axe to grind concerning Marvel, there's a great irony in that the first issue's back-up feature became more successful than either fowl. Sergio Aragonés' Groo began his wandering here.~FP

THE DESTRUCTOR

Atlas: *4 issues 1975*

Writer Archie Goodwin is working from the Spider-Man template of teenager suddenly acquiring powers beyond his dreams, so it helps to have Steve Ditko aboard as pencil artist (inked by Wally Wood in 1 and 2, and inking himself in 3). The twist is that teenager Jay Hunter was a budding gangster before seeing the error of his ways. Not a masterpiece, but certainly one of the better Atlas titles.~WJ

DETECTIVE COMICS

DC: *775 issues +, 10 Annuals 1937 to date*

As the longest-running ongoing American comic and the title from which DC takes its name, early issues are almost impossible to find and command prices concomitant with their rarity. An anthology with a theme, it featured characters called Slam Bradley, Speed Saunders and Larry Steele, hard men with hard names, and it can be taken for granted that the early content is as crude as most of its contemporaries, although Sven Elven's Cosmo The Phantom of Disguise in 1-37 displays some style. The Crimson Avenger, a masked and strongly pulp-influenced hero, arrived in 20, and is now seen as DC's oldest superhero, despite not actually putting on a costume until 44. *Detective* would probably be long dead by now had it not been for the 1939 début of Batman in 27. Showcased amid the company of Slam Bradley and his ilk, it's small surprise he captured the reading public's imagination in a way only Superman had before. A grim and silent crimebuster, the visual impact of the character is there from the beginning, and it took just over a year for Batman to edge all other features off the cover.

By today's standards the initial Batman stories are crudely illustrated and written, by Bob Kane and Bill Finger. Jerry Robinson's gradual elevation from assistant to pencil artist over the first three years instituted greater fluidity in the art, and after the first year Batman is developing a personality, albeit a slim one. The emphasis of the early strips is detection, with most adversaries meeting a brutal demise. Robin's arrival in 38 initiates a lighter tone, but he's often merely a convenient infiltrator of groups playboy Bruce Wayne is too prominent to join. An early landmark is 43, when Batman combats his first 'dealer of habit forming drugs'. By this point plots are acquiring a veneer of sophistication, and colourful foes are escaping to plague Batman another day. The Penguin débuts in 58, and with Clayface (40), Hugo Strange (36) and most importantly the Joker (*Batman* 1) already introduced, exotic recurring villains become the norm. Despite his appearance the Joker was originally merely a gang boss and thief, his characterisation as a madman developing in the 1970s. His *Detective* début is 45, and he's a frequent foe throughout the 1940s, with his best appearance being 64, when he's actually electrocuted in gruesome fashion. He's not given an origin, though, until 168. Two-Face débuts in 66, and returns in 68 for an uncharacteristically touching story as he attempts to repair his relationship with his girlfriend.

Batman saw out World War II in good shape, with nary a nod to the Nazis. Pulp writer Don Cameron was the best of the regular writing staff, submitting scripts a cut above the norm, with decent gimmicks, and from 84 artist Dick Sprang began developing a distinctive look for Batman. The Batman stories to 119 are available in five hardbound editions of *Batman Archives*. Sprang's became the definitive style for almost two decades, but it coincided with the humanising of Batman. By the 1950s the once grim and feared dark knight had been reduced to an all-round genial guy who starred in largely light-hearted adventures and fought on giant typewriters. And that was the good stuff. There were also ill-advised science-fiction elements, encounters with robots and a plethora of inane Bat-associates and accessories. The 1950s were not classic years for Batman either here or in his own title, although he was well drawn by Sprang, Sheldon Moldoff and Lew Sayre among others (although only Kane was ever credited).

Oddly, given the success of Batman, Detective remained relatively free of other costumed types populating the back-up features, although they certainly proliferated elsewhere. Slam Bradley, created by a pre-Superman Siegel and Shuster, had astonishing longevity, only surrendering his slot in 152 to dull TV detective Roy Raymond (often nicely illustrated by Ruben Moreira). Air Wave had a long and ordinary run between 60 and 137 before being replaced by the only slightly more engaging Robotman, a human brain in a robot body. Both he and Native American detective Pow Wow Smith (patronising name but nice Infantino art) bowed out with 202. The best early back-up was Boy Commandos from 64, a multinational kid gang overseen by Captain Rip Carter. They foiled a remarkable amount of Nazi plots in occupied Europe, and lasted way beyond the end of World War II both in their own title and here, with 150 their final issue (although creators Simon and Kirby left with 83). The Martian Manhunter arrived in 225, accidentally transported from Mars with an ever-increasing array of abilities initially subsumed by his assumed identity as a police officer. His stories became ever more outlandish, and his demise was hastened by the addition of irritating alien companion Zook in 311, but he lasted until 326 before being bumped to *House of Mystery* from 143. At least he had a tenuous link to the theme of the comic, though. What Aquaman, however nicely drawn by Nick Cardy, was doing in 293-300 is anyone's guess. The back-ups decreased in number as the page-count shrank, with Batman remaining consistent at twelve pages from the mid-1940s. It wasn't until the 1970s that he evicted all other tenants, and even then they often sneaked back in.

327 is a landmark. The rot was unmistakably established, so Batman was revamped, marking the change by the addition of a yellow oval surrounding the bat emblem on his chest. The previous Batman was ascribed to an alternate Earth and destined to become a slate on which stories unsuitable for the hidebound, now 'proper' Batman were written. The new art team of Carmine Infantino and Sid Greene (later Joe Giella) signalled a clean step away from the past, and writer Gardner Fox introduced shock and suspense, beginning with the apparent death of Wayne's butler Alfred and a recurring new villain called the Outsider. The same team also produced the light and fun Elongated Man back-ups. The revamp was partially successful, although gimmickry still abounded, but the Batman TV show was in the works, drawing on the sillier aspects of the previous incarnation. When it hit, the camp humour transferred back to comics, bringing Batgirl with it in 359, emblematic of the era. It wasn't until the end of the 1960s that a gradual change introduced a far more realistic Batman. He once again became the brooding creature of the night, and mysteries supplanted the costumed villains, making their rare appearances special. Although sometimes straining too hard to be contemporary, and no masterpieces, these are the earliest *Detective* Batman stories to withstand a modicum of critical scrutiny as anything other than fun curiosities, but don't be suckered in by the generally excellent covers. The writing of Denny O'Neil and Frank Robbins has a greater sophistication than previous plots, and the artwork is well suited to the tone of the character, particularly the illustrative commercial style of Neal Adams (although his greatest triumphs were in Batman). In 400 Robbins and Adams introduce Man-Bat.

A feature of the 1970s *Detective* was numerous attempts to return to an extended format. 414-424 feature Batgirl back-ups alongside reprinted detective fillers, and 438-445, at a hundred pages, are uniformly excellent. Editor Archie Goodwin wrote a fine selection of Batman tales, drawn by artists new to the character, with a spirited Howard Chaykin job in 441 and Alex Toth's 'Death Flies the Haunted Skies' in 442 a standout. In 439 Steve Englehart, a writer who'd have a later impact on *Detective*, turned in his first Batman story. Goodwin filled the remainder of the hundred pages with an oddball, varied selection of reprint material, largely from the 1940s, and another strip of his, 'Manhunter', which débuted in 437. Illustrated by the then little known Walt Simonson, it's a fascinating blend of mystery, martial arts and action with ties back to the previous DC Manhunter, varied storytelling, and complete over six short episodes and one longer concluding team-up with Batman in 443. By far the best back-up feature to see print here, Manhunter has been reprinted both as a one-shot in 1984, a black and white book and in a 1990s edition with a new chapter. The next attempt at an oversize title, between 481 and 495, consisted of all new material, having absorbed the oversize *Batman Family*. The Batman stories apart, mediocrity was prevalent, but look for some nice Michael Golden art in 482.

Goodwin was to return with a fine story about obligation in annual 3, the best of the annuals by a long shot, but when he stopped editing *Detective* it slipped back, if not into mediocrity, then into mundanity, with only the gradual return of the costumed villains noteworthy. The best of the period is Denny O'Neil's sentimental addition to Batman's origin in 457. It took Steve Englehart and the art team of Marshall Rogers and Terry Austin to breathe life back into the comic, and they did so in spectacular fashion between 471 and 476*, producing arguably the best run of stories seen in the title. In six issues Englehart returned Hugo Strange and Deadshot as credible foes, delivered memorable encounters with the Penguin, and particularly the Joker, introduced crooked councilman Rupert Thorne, set up the only believable relationship Bruce Wayne's ever had with a woman, and brought continuity to the title. Rogers' art was stylish and thoughtful, and both creators drew on the mood of the 1940s Batman, reflecting it with a distinctly contemporary outlook. Reissued as the five-part Shadow of The Batman, it also included material drawn by Rogers after Englehart's departure, serviceable without ever thrilling.

Englehart and Rogers had upped the quality considerably, and since then there's never been a prolonged dip back into mediocrity, although crossover stories have, at times, tried the patience. Artists like Don Newton, Gene Colan and Norm Breyfogle maintained Batman as the mysterious figure of the night, while plots have been varied. For a sample of Newton see 497's Spirit homage, and Colan's rendition is consistently good. The 1980s also introduced the concept of the anniversary issue, with any excuse serving to increase the page-count and celebrate. Initially this resulted in fine material, with the oversize 500 a real nostalgia-seeped bonanza. Batman has an opportunity to prevent his parents' murder on an alternative Earth, and there's also an intriguing story of Batman at death's door, a Hawkman tale drawn by Joe Kubert and a teaming of the assorted non-costumed detectives to have appeared in *Detective* over the years. 526's celebration of Batman's 500th appearance in *Detective* takes a different tack, as Batman and allies, in a single night, have to face all his major foes and a threatening new introduction in Killer Croc. It also has a new Robin in costume for the first time, an appointment made permanent in 535. 572's fiftieth anniversary of the title is disappointing apart from the Alan Davis art, but 600 is outstanding, the best of the anniversary issues. Sam Hamm's screenwriting experience and Denys Cowan's cinematic layouts contribute to 'Blind Justice' (598-600*) being an excellent page-turner. Focusing on Bruce Wayne more than Batman, it involves morally repugnant experiments and a seemingly unbreakable set-up for which Wayne will take the fall. At 144 pages "Blind Justice" is never padded or slow, and contains some insightful, almost throwaway observations about Batman and his milieu. 627's reworking of Batman's first appearance falls way short in comparison; an interesting idea, albeit used previously in 387. 700 is very ordinary.

Early to mid-1980s *Detective* constantly crossed over with *Batman*, creating in effect a two-weekly Batman comic. A tight continuity was maintained, and there are no really bad stories, but none that stand out either. The creative team of Mike Barr, Alan Davis and Paul Neary transfer from *Batman and the Outsiders* in 569. Davis and Neary quit a chapter into 'Batman: Year Two' (575-578*), leaving Todd McFarlane to finish the story. It's a pointless exercise and very ordinary in comparison with 'Year One' (*Batman* 404-407). With 583 John Wagner and Alan Grant join in place pencil artist Norm Breyfogle for a very good run. Starting strongly with the début of gang boss The Ventriloquist and his psychotic dummy Scarface, they rely on bizarre and interesting new adversaries, and infuse a macabre humour to lighten the increasingly grim tone of the title without returning it to the stupidity of the 1950s. Grant eventually becomes the sole writer until 621. His Anarky two-parter in 608-609 is good, and the Penguin story in 610 and 611 the highspot of his solo run.

The writing of Peter Milligan, often excellent elsewhere, disappoints in 629-643, and succeeding writer Chuck Dixon takes until chapters of 'Knightfall' in 658-666* to settle in. As a title 'Knightfall' stretches a sobriquet too far, but having Batman beaten and replaced in a story crossing between all the Bat titles generated controversy, acres of print and boosted sales enormously, making the DC accountants very happy indeed. Sadly, it prompted only a minor upswing in quality. Many chapters were dull and padded to extend the story beyond its natural lifespan, but one aspect in its favour was the sense of uncertainty. For the first time ever Batman wasn't guaranteed an eventual victory. 'Knightquest', with the former Azrael in Batman's costume, provided for better comics, with 670's eerie Mr Freeze story being the best, and 'Knightsend' (676-677*), in which Batman goes over the top and is dealt with, is an improvement, and all the better for its brevity.

Bruce Wayne reclaims the Batman costume in 682, and Dixon writes until 730, largely with consistently good Graham Nolan art until 721. Improved production results in a better-looking package, but it's a deceptive step forward. With frequent crossovers, a leisurely pace, and larger illustrations meaning fewer panels, a story once told in twelve pages now takes two issues. Freed from the constraints of crossovers from 704, Dixon writes better Batman stories, suspenseful and imaginative, albeit ones still generally over-extended by sacrificing story for art. For a good sample of the Dixon/Nolan style try 704's glimpse at an inept recidivist stick-up man, or 714-715's mystery. Oddly, though, his best story is 716 drawn by Jim Aparo, in which Dixon strings the readers along to a surprise ending that will remain a surprise prior awareness notwithstanding. Another Dixon tale of note is his re-casting of Batman and associates as 17th century pirates in the seventh annual, although it's notable more for the excellent Alcatena art than an ordinary story.

720 starts 'No Man's Land*', another long crossover with much of Gotham City reduced to rubble. Refused federal rebuilding aid, Gotham becomes a sealed-off dog eat dog zone where villains thrive. The story incorporates Nightwing, Robin and the Huntress, leaving out Batman altogether in 727-729, and as a whole is an improvement on previous crossovers, with 730 a standout issue. In a lawless city lacking technology Batman takes on The Ventriloquist and Scarface to re-establish his authority in a good story from Bob Gale and Alex Maleev. Gale returns with Phil Winslade in 733, an even better story. Whereas most issues to 730 are individual stories within a larger context, 731-740 are chapters continued from other Batman titles, establishing Greg Rucka as the regular writer from 739. From a surprising plot twist in a kangaroo courtroom sequence with Two-Face in his first issue, Rucka establishes himself as a type of writer Batman titles hadn't seen in a decade, prioritising plot and character over action. His arrival shortly precedes that of Bob Schreck as editor, providing an immediate change of emphasis for *Detective*, signified by Dave Johnson's attention-grabbing covers often using black, white and just a single colour, and an equally effective mood setting, limited palette for the interiors.

Shawn Martinbrough's pencilling from 742 (to 764), beginning a gang war over immortality, is initially shaky in places, but improves with veteran inker Steve Mitchell. Certainly moody, it never quite loses a slightly wooden quality. There's no such problem with Steve Lieber from 767, although both are occasionally substituted by other artists. Sample the political manoeuvring and action required to remove conservationist Poison Ivy from a park in 751-752. A commitment to innovative stories explains 753, presenting a comic produced in therapy by Two-Face. It's the most novel issue in a sixty year plus run, although 754's more traditional chapter of a crossover story in which Police Commissioner Gordon is shot is much better. Throughout, Rucka offers new, yet consistent, slants on old villains from whom nothing new is expected. His Two-Face in 755 is excellent, but the process trickles down to the likes of third stringer The Mad Hatter (759-760). Rucka's ongoing subplot involves Sasha Bordeaux, a bodyguard appointed for Bruce Wayne who becomes too close and makes an inevitable discovery. She's the narrative voice for many issues, contrasting Wayne and Batman, while the Gotham police detectives also play a large part. These are good stories, but readers, with justification, bemoaned the minimal presence of Batman, although there's more of him once the 'Bruce Wayne: Murderer' story and its follow-ups begin in 766. It's a plot selectively ignored in *Detective*, although it does produce the excellent 772, with Bordeaux tempted in prison. By this time the back-up strip 'Josie Mac' is every bit as good. By Judd Winick and Cliff Chiang in 763-772, it spotlights a police detective with an ability to trace inanimate objects attempting to locate the missing grandson of a mob boss. It's an excellently characterised detective story, and almost worth the price of the comic alone.

The back-ups had returned in 746 with The Jacobian, a detective with a mysterious past, a way with hunches and an inexplicable ability to cope with supposedly insurmountable odds. It's infused with the feel of the 1970s Manhunter, and by the conclusion in 757 it's been a decent effort, if a little confusing in places. Better is the unexpected return of Slam Bradley in 759-762 looking for Catwoman, drawn in gritty 1940s style by Darwin Cooke. 'The Hunt' (773-775) introduces a new vigilante, and mention must be made of Michel Gagne's astonishing silent 'Spore' starting in 776. Rucka departs with 775, having written a landmark run, and *Detective* has recently been better than at any point since the Englehart and Rogers days. 'Evolution' collects Rucka's stories to 750.~FP

The DETECTIVE: Chronicles of Max Faccioni

Caliber: *1 issue 1998*
Sunset Strips: *3 issues 1999-2000*

A journalist, his curiosity aroused at a story about Max Faccioni told by a morgue attendant, is surprised to find himself bullied into searching for the missing detective. This is the framing sequence for two tales of the detective involving boxing and kidnapping, voodoo and a hurricane. The same stories are reprinted in the first Sunset Strips issue, intended as a 12 issue limited series. The series continues with stories told in flashback, 3 being the first part of an origin for Faccioni. Both art and story are by Goff who's clearly been heavily influenced by Toth, Kubert and Munoz as well as by Chandler and Hammett. Something of a curiosity at first appearance, but had been developing into something more than faithful homage before coming to a second halt.~NF

The DETECTIVES

Alpha: *One-shot 1993*

Anthology commemorating seventy years of the private eye. Best stories feature The Maze Agency and Michael Mauser, both better in their own titles.~WJ

DETECTIVES INC.

Eclipse: *Graphic Novel 1980, 2 issue microseries 1985, 3 issue miniseries 1987*

Detectives Inc was among the earliest graphic novels published for the American market, and a favourite with older comic readers throughout the late 1970s. Don McGregor's writing had always tackled adult subjects, and artist Marshall Rogers was fresh from the most acclaimed run of Batman stories for several years. Titled 'A Remembrance Of Threatening Green', the title gives a clue to writer Don McGregor's prose style, which gets whole huge typeset panels to itself among Marshall Rogers' once-fashionable heavily zipatoned drawings with their bizarrely extruded human figures. McGregor celebrated the idea of being able to produce a big comic for adults by including just about everything that he wasn't previously allowed to use that would fit into the contemporary private eye genre he'd chosen. So you see explicit sex (hetero and lesbian only – the male gayness is all in the relationship between the two detectives and well repressed, of course), children as killers and as victims of terrible violence, and references to sado-masochistic prostitution. The real emotional content is at the

---

* Available in a collected edition

Mary Tyler Moore TV level so it's nice to see comics finally aspiring to something so elevated, if you can stand reading "memories and fantasies" likened to "Siamese twins" or 42nd St to a "neon dinosaur". The 1985 microseries reprints the graphic novel. The follow-up series from 1987 is the one to try. McGregor restrains himself a bit and gets on with a good little mystery story, brilliantly illustrated by Gene Colan in pencil printed in sepia.~GK

DETONATOR
Chaos!: *2 issue microseries 1994-1995*

The destruction of Project Pandora unleashes a wave of genetic mutation. One of the resulting augmented beings is Detonator, who can explode himself and reform. He's looking to avenge the murder of his wife and child by Krill, who is manipulating those with powers and accumulating their powers for his own ends. This poor early work from Brian Pulido and Steven Hughes employs superheroes rather than their more characteristic, supernatural creatures, but the same violent, world-destroying themes are all present and correct.~NF

DETOUR
Alternative Press: *One-shot 1997*

Set in a near future when oxygen is bought like electricity, and masks are necessary when venturing outside, this is a story about Chris, living on an inheritance, but starting to think about finding a job. In the meantime, he observes the habits of his neighbours and housemates, one of whom has been developing a theory that the almost daily earthquakes have a pattern that can be understood through the bits and bobs he finds inside dead birds. Ed Brubaker details Chris' obsessive compulsions without judgement, in an unpolished, but effective, cartoony style. This was the first of an intended three-part series, and the whole may have been greater than this interesting, but remote, episode.~NF

DEVASTATOR
Image: *2 issues 1998*

Adapted by James Hudnall from his own unproduced screenplay, this is a dismally unimaginative and confused tale of a cop forced out of the force and into martial arts teaching. He's then implanted by crime bosses with a capsule that will make him kill the mayor of Los Angeles. The stiff unconvincing art by Greg Horn matches the dull plot, and the concluding third part never came out.~GK

Robin Bougie's DEVIANT
Venus: *1 issue 1999*

Think *The Slim Book Of Strange Sex* and you're there. Robin Bougie trawls medical journals, internet postings and foreign newspapers for his stories, and illustrates them in an appealing cartoon style. You'll gasp, you'll boak and you'll howl with laughter.~WJ

DEVIANT SLICE
Print Mint: *2 issues 1972-1973*

For once a comic that absolutely lives up to its title, as this Greg Irons/Tom Veitch masterpiece is about as deviant as they come. There's gore aplenty to be sure, but it's conceived by a keen sense of moral outrage at the establishment's shortcomings. It remains one of the most chillingly perceptive documents of the death of the *Age of Aquarius*.~DAR

Recommended: 1, 2

DEVIL CHEF
Dark Horse: *One-shot 1994*

In small doses, amid the eclectica of Deadline USA (in strips reprinted here), Devil Chef raised a smile or two. It's a caricature of the temperamental and tyrannical French chef, prone to towering rages, but twenty-eight unrelenting pages spread the paté far too thin. If you really can't get enough of our satanic gastronome, he's back in *Dark Horse Presents* 107-109.~WJ

DEVIL DINOSAUR
Marvel: *9 issues 1978, one-shot 1997*

One of many titles written and drawn by Jack Kirby – in a hurry, one suspects – where the grandiose concept and promise of an astounding universe was never fulfilled by the rather clichéd characters that peopled it. The misleading title doesn't help. Devil Dinosaur is, in fact, a singularly intelligent member of his species, telepathically controlled by a rather advanced cave youth called Moon Boy. The Devil doesn't come into it and Devil Dinosaur does nothing demonic except batter a few villains with his tail. Moon Boy communicates in odd bursts of purple prose, which gives the title an undeniably batty charm lacked by many later Kirby offerings. Certainly the maddest of many rather peculiar Jack Kirby creations. The 1997 attempt to revive the series is pretty mystifying also... three stories that say absolutely nothing, although Arnold Pander's frenetic art on the third one has a certain, rough charm.~FJ

DEVILINA
Atlas: *2 issues 1975*

Alias the sister of Satan, our behootered nominal heroine struggled to overcome her evil heritage while wearing a variety of skimpy fetishistic outfits. A patent Vampirella rip-off, she was backed up in this black and white magazine-sized comic by horror stories which, the ads boasted, "focused on fabulous females!", i.e. had a bit of badly drawn gratuitous nudity. Pathetic.~HS

DEVILMAN
Verotik: *3 issues 1995*

Akira Fudou has become merged with the demon Amon in order to protect mankind from an invasion of demons. Together with his friend Ryo he travels through time thwarting demons and meeting Hitler and Joan of Arc while he's at it. Go Nagai's gory adventure tries to be issue conscious – there's a lot of thought expressed in each story – but neither medium nor message attain a higher purpose.~NF

DEVIL'S REIGN
Image/Top Cow: *4 One-shots 1997*
Marvel: *4 One-shots 1997*

'La Ronde' style teaming of Marvel and Image's Top Cow line of characters. Silver Surfer and Weapon Zero bookend the continuity, which elsewhere has the second named character in the title continuing to the next chapter and moving up the billing. Thus Cyblade, Ghost Rider, Ballistic, Wolverine, Witchblade and Elektra also participate. Mephisto discovers a new world to conquer and has all the best lines, particularly at the expense of the Silver Surfer. Cyberforce's Heatwave plays noble hero while the heroes the issues are named for briefly team-up to be thrashed then leave before the finale. With eight different writers and seven artists (not counting the ten inkers on the final issue), the best bits are the one-liners from Wolverine, Ballistic and Mephisto (written to the tune of *Sympathy for the Devil*).~NF

DEVLIN WAUGH
Fleetway/Quality: *One-shot 1992*

The stylish and refined bodybuilder Devlin Waugh also happens to be the papal envoy and a freelance exorcist. When an underwater prison becomes infested with vampires, Devlin is the only man able to break the survivors out. He's just a little too glib and idealised to work properly in what is otherwise a gory thriller, but there's some excellent art from the underrated Sean Phillips. This was also available in the UK as a graphic novel.~WJ

DEXTER'S LABORATORY
DC: *34 issues 1999 to 2003*

Based on the Cartoon Network series, created by Genndy Tartatovsky, who writes and provides the artwork in 1-2. Dexter is a child genius, who has a secret laboratory under his parents' house. They don't know about the laboratory

and are generally blind to a large number of very strange events, but Dexter's sister Dee Dee does, and can't be kept out. She's Dexter's opposite and nemesis, a free spirit who's always pressing the buttons of Dexter and his inventions. The only person Dexter hates more is his rival, Mandark, who has his own laboratory, but suffers from an unreciprocated love for Dee Dee. In most adventures, Dexter naturally takes these rivalries to extremes, usually to his cost. Sample plots include the comic producing Kirbytron 2000 (1), Dexter's mind being transferred to his hamster (3), Mandark impersonating Dexter's mother to infiltrate the laboratory (5), a bubblegum blowing contest with Dee Dee and her friends (7), a teacher's pet competition (14), and a beardless Action Hank (25). Additionally, several strips are similar to cartoon episodes (including 2 and 11). There are normally two stories per issue, with a large number of different writers and artists, though most of the latter maintain a style as close as possible to that of the cartoon (largely thanks to the inks of Jeff Albrecht). John Rozum is the most regular writer, though Bobbi J. G. Weiss (from 15) and Robbie Busch (from 24) also appeared regularly, while Scott Roberts has written for half of the issues from 27. After 2, Tartakovsky turns up for several other issues (5, 10, 25), making these the best of the series, but Bill Wray (6, 12, 15, 25, 27) and Stephen DeStefano (11, 30) manage to leave something of their own distinctive style, while John Delaney is the best of the regular pencilers (over half of the issues).~NF
Recommended: 1-4, 8, 10, 25

Sergio Aragonés' DIA DE LOS MUERTOS

Dark Horse: *One-shot 1998*

DIABLO

Dark Horse: *One-shot 2001*

DICK DANGER

Olsen Comics: *2 issues 1998*

A detective comic for children launched at a time when there was little chance of it reaching the intended audience. The cartooning skills of W.W. Olsen are excellent, but there's not enough depth beyond that to engage an adult audience as the plot is stretched, and the gag ratio slight. Far better are the one page back-ups 'Crime-Quiz' mysteries.~FP

DICK TRACY Monthly

Blackthorne: *25 issues 1986-1988*

Published as a companion title to Blackthorne's 'Reuben Award Series' of *Dick Tracy* reprints, Blackthorne's monthly was edited by Shel Dorf. Though Dorf's love of the strip is clear, the decision to cut and paste the newspaper strip to fit a comic page was seen as heresy by purists. In fact, it is the change in panel size that does the most disservice to the strip. 14, containing the marriage of Tracy to Tess Trueheart, has the oddest printing, with two panels to a page instead of the usual nine of the daily pages. Chester Gould's *Dick Tracy* is a classic whose violence and conservatism has perhaps put it out of favour with today's comics readership. The series begins with reprints from 1940 but switches to 1949 with number 10. Lacking any information about the strip, the comic is nevertheless a noble attempt to bring Dick Tracy to a new audience.~NF

The Original DICK TRACY

Gladstone: *5 issues 1990-1991*

Even more heretically than Blackthorne, Gladstone's *Dick Tracy* comic (again, a comic to accompany a series of graphic novels) actually edited strips to avoid repetition, cut and pasted everything to fit a nine-panel page and coloured the originals. Published in no particular order (but all from the mid-1940s) each issue did contain a complete storyline, including the wedding of B.O. Plenty and Gravel Gertie in 5. Whatever purists might say, Gladstone's high production values made this an excellent showcase for Gould's artwork. Tracy himself is rather characterless but Gould's story-telling abilities make *Dick Tracy* an important part of newspaper strip history.~NF

DICK TRACY

Disney: *3 issues 1990**

John Moore and Kyle Baker turn in a witty and vividly coloured version of Dick Tracy, not at all harmed by having to include Warren Beatty's likeness as Tracy throughout. The first two issues act as a prequel to the 1990 movie, introducing Madonna's character Breathless Mahoney, and featuring several of Chester Gould's classic villains, including Flat Top and Prune-Face. Gripping, amusing and well plotted, they're the best *Dick Tracy* seen since Gould himself. Of course, Kyle Baker's sketchy and fluid art couldn't be further from Gould, but works nonetheless in conveying Dick Tracy's world. There's some doubt as to whether the third issue, containing the movie adaptation, was actually published. It is to be found, though, in the collection. Writer Len Wein was a little restricted by the film's less than sparkling script, but works wonders with it, and Baker is also present for consistency's sake.~WJ

DICK WAD of the Mega-Vice Squad

Slave Labor: *One-shot 1993*

Collection of Evan Dorkin strips from *One-Fisted Tales* and *Penthouse* along with new material. Satirising 1950s science fiction movies via the addition of sexual themes, this provides quite a few laughs and resurrects some very old jokes. Some cartoonists would kill to be this good, and others should, but it's just a minor part of Dorkin's work.~WJ

DICKS

Caliber: *4 issue miniseries 1997-1998**
Avatar: *4 issue miniseries (Bigger Dicks) 2001-2002, 4 issue miniseries (Dicks 2) 2002-2003*

What if the Freak Brothers had always lived in Belfast and were more scatological, prurient, obscene, violent and profane? The answer here, courtesy of Garth Ennis and John McCrea, is that they would be funnier. Our heroes, layabouts and would-be private eyes, take on gangsters, yokels, ghosts, cops and dumb soldiers. Each issue is a substantial read, and the 'Li'l Dicks' story in 2 is a highlight. There are a couple of scenes to make anyone wince, and if the whole thing didn't offend your mother you'd know you weren't old enough to read it yourself. The first Avatar series is largely reprint with some additional material, while the second is more of the same, if not even a little bit more scabrous, but just as funny. The loveable losers have apparent success in a rock band, tour the USA, meet the idiot President, and inadvertently take off in a Space Shuttle. One edition of the variant editions of 1 comes with a free green condom.~GK
Recommended: 1-4, Dicks 2 1-4

DIE CUT

Marvel UK: *4 issue miniseries 1993-1994*

Blade-handed anti-hero hacks his way through scratchily illustrated fights with the X-Men's Beast. Dismissable.~HS

DIFFERENT BEAT COMICS

Fantagraphics: *One-shot 1994*

Effectively a Fantagraphics sampler, it's a pity that *Different Beat* shows so few of their star creators to advantage. The blurb calls them rarities, but you're better off thinking of it as odds and sods by Joe Sacco, Los Bros Hernandez, Robert Crumb, Peter Bagge, Roberta Gregory and the other usual suspects behind a striking Dan Clowes cover. The best piece is the colour back cover by Chris Ware, an unsettling Jimmy Corrigan strip about going to a burger bar.~FJ

DIGIMON Digital Monsters

Dark Horse: *12 issues 2000*

To quote the various assembled Digimons in 1, "We're Digimons! Digital monsters, we're kinda cute and very loyal, with beautiful hair or maybe no hair at all". And that probably tells you all you need to know if you're over the age of ten. For younger readers, however, this is a well-crafted adaptation of the Japanese cartoon show, with Tai, Sora and pals and vast numbers of monsters, all present and correct. Peculiarly, the comics' credits are detailed enough to list designers and assistant editors but not the writer(s), which suggests these are adaptations of cartoon episodes. The publishing schedule was also bizarre, with four issues coming out in May 2000, then nothing for a couple of months followed by two issues a month for the rest of the run. Artwise, a variety of hands all acquit themselves well enough, with Nige Kitching probably the pick of the bunch. Fans of the insane should search out 6 with its Cactus creature vs. Teddy Bear slug fest!~DAR

DIGITEK

Marvel UK: *4 issue miniseries 1992-1993*

One of the more interesting concepts thrown up during Marvel UK's expansion period, Digitek is a warrior combination of deceased computer technician and advanced computer intelligence, able to move through electric conduits. The story never moves beyond battles with less benign counterparts, but there was potential here.~FP

DIGNIFYING SCIENCE

General Tektronics Labs: *One-shot 1999*

These are stories about female scientists, drawn by female artists, but written by Jim Ottaviani. Marie Severin (on Marie Curie), Carla Speed McNeil (Hedy Lemarr) Stephanie Gladden (one of the narrative voices on Rosalind Franklin) and Lea Hernandez (Barbara McClintock) are the most interestingly drawn, though the scripts are generally too worthy and uninvolving; the stories of Curie and Lemarr being the most personal. The Anne Timmons-drawn chapter on Birutė Galdikas was also issued as a one-shot sampler titled *Wild Person in the Woods*.~NF

DIK SKYCAP & Dr Ian DeFrost

Rip-Off Press: *2 issues 1991*

Black and white space humour title starring Dik Skycap as a dashing pilot and postal worker. He roams the galaxy, delivering stuff and risking his life, with subnormal sidekick Dr DeFrost. Written and drawn by Phil Groves, it's not laugh-out-loud funny, but is entertaining enough.~DB

DIM-WITTED DARRYL

Slave Labor: *5 issues 1998-1999*

Michael Bresnahan pulled off quite the achievement in producing a poke fun at the retard comic that altogether avoids malicious content, yet still managed to be funny. His cartooning style and approach comes straight from the John Kricfalusi school of animation, so nothing wrong there, and all in all this is a very confident debut. Repetition dulls the humour, though.~WJ

Recommended: 1

DINO ISLAND

Mirage: *2 issue microseries 1993*

Stunningly simple and gorgeous line art from Jim Lawson, with every illustration a postcard, sadly accompanies a stunningly simple and not so gorgeous story from Jim Lawson. Okay, there are dinosaurs, but they're not what we're used to, and even Amelia Earhart and a solution to the Bermuda Triangle mystery don't liven things up.~WJ

DINO RIDERS

Marvel: *3 issue miniseries 1989*

Everyone starts their career somewhere. Later fan-favourite artist Kelley Jones probably neglects to list this early work on his CV. A dull toy tie-in with a lame plot about opposing warring forces harnessing the power of dinosaurs after arriving in prehistoric Earth.~WJ

DINOSAUR REX

Upshot Graphics: *3 issue miniseries 1987*

Upshot was an imprint of Fantagraphics, primarily publishing the work of Jan Strnad. Dinosaur Rex is a pulp adventure story written in a style that owes a great deal to P.G. Wodehouse. It's more homage than pastiche; the characters are well-drawn and the script adapts well to the search for a dinosaur graveyard. Henry Mayo's artwork is smooth (in a similar way to Sam Kieth's), but though he's obviously inspired by such greats as Roy Krenkel and Burne Hogarth, he manages a distinctive style of his own. A back-up strip by Bill Messner-Loebs and Dennis Fujitake is light-hearted science fiction that deals with the question of racism without ramming its politics down the readers' throats.~NF

DINOSAURS

Hollywood Comics: *2 issues 1993*

The *Dinosaurs* TV series was a lot of fun featuring puppets and models as dinosaur family unit. The comic, on the other hand, while well drawn, fails to capture the spirit of the TV show.~FP

DINOSAURS, A Celebration

Marvel/Epic: *4 issue miniseries 1992*

Half of each issue is illustrated factual text, which is suitable for intelligent children or adult general readers. This is broken up by short strips about imagined everyday episodes in the lives of individual dinosaurs of the various orders. These are painted by star UK artists such as John McCrea and Liam Sharp. There's no dialogue, of course, and the stories inevitably tend to focus on the threat of gory death, but it's all intelligently and enjoyably done.~GK

Recommended: 1-4

DINOSAURS ATTACK

Eclipse: *1 issue 1991*

The fondly remembered *Mars Attacks* bubblegum card series spawned a successful imitator years later in *Dinosaurs Attack*. It's much the same plot told over a series of cards, but substitutes saurians for Martians committing atrocities the globe over. The comic tells the same story with additional scenes, or at least begins to do so, as the proposed second and third issues never materialised. Despite this Earl Norem's painted art is worth seeing, but in contrast the pages pencilled by Herb Trimpe and inked by George Freeman come off distinctly second best.~FP

DINOSAURS FOR HIRE

Eternity: *9 issues, one-shot ('3-D Special) 1988-1989*

Malibu: *12 issues 1993-1994*

Three permanently wise-cracking dinosaurs, toting heavy artillery, and accompanied by a glamourous scientist helper, go as undercover as they can for, among others, the US government. Tom Mason successfully pokes fun at TV, movies, licensing deals, other comics companies and their characters and staff, New York, France, and various 1990s fads in this pleasantly light hearted series, which doesn't leave him much room to do anything else you might expect from a story. The violence is fun and the thoughtless sexism less so, but both are adequately pictured throughout. The last half-dozen issues, pencilled by Leonard Kirk, are the best. The one-shot is a handy 3-D reprint of the first issue.~GK

The DIRTY DUCK Book

Company and Sons: *1 issue 1971*

Not a book at all, the title notwithstanding, but a comic collecting Bobby London's 'Dirty Duck' strips. London was one of the 'Air Pirates', a group of counterculture cartoonists who based their art styles on early comics pioneers. London's influence was very clearly George Herriman and his *Krazy Kat* feature. The first half of the comic contains typical underground humour, applied to animals, but by the second half London had grown confident enough to almost totally abandon dialogue, and his similarity to Herriman is astonishing.~DAR

Recommended

DIRTY LAUNDRY

Cartoonists Co-Op: *1 issue 1974*
Last Gasp: *1 issue (2) 1977*

The first couple of an underground comics team to reveal all about their life together. Individually both Robert Crumb and Aline Kominsky had produced some of the finest comics of their time, so the combination of the two should have been terrific. Sadly, it just doesn't work. For one thing the combination of their styles was simply too jarring. On her own Kominsky's art works because of the power of her stories, but when put next to Crumb's draughtsmanship it simply comes across as crude. Thematically, too, their stories are either misguided (the science-fiction segment in 1, for instance), repetitive (far too many stories of the pair 'doing it') or simply too domestic.~DAR

DIRTY PAIR

Eclipse: *4 issue miniseries 1988-1989, 4 issue miniseries ('Dangerous Acquaintance') 1989-1990, 5 issue miniseries ('A Plague of Angels') 1990-1991, 4 issue miniseries ('Sim Hell') 1993*
Viz: *5 issue miniseries 1994-1995*
Dark Horse: *4 issue miniseries ('Fatal But Not Serious') 1995, one-shot ('Start the Violence') 1999, 4 issue miniseries ('Run from the Future') 2000, 4 issue miniseries ('Sim Hell: Remastered') 2001*

Yuri and Kei think of themselves as The Lovely Angels. Trouble-shooters for the WWWA (Worlds-Wide Welfare Association), they visit whichever of the three-thousand-plus inhabited planets in the known universe has a problem and sort it out. At least, that's what they're supposed to do. A comedy action comic featuring a sexy and violent duo more prone to lose their tempers and solve a poser with an Uzi than discussion, *Dirty Pair* is unusual in being developed in America by Adam Warren and Toren Smith at Studio Proteus, then sold back to Japan, where it was made into a successful anime. The Viz series is based on the animation cells for the anime, and is smoothly drawn in full colour, as opposed to the slightly scratchy, semi-Westernised art of the originals. As the series develops there's more focus on the banter between characters, and the predictable horrified reaction of the people they're sent to 'help' than the violence. Note that 'Sim Hell Remastered' is a full colour version of the original series, issued with extra sketch pages all annotated by Adam Warren, so if you're into his art it's worth buying again. 'Start the Violence' collects and colours strips from *Dark Horse Presents* 132-134. And each issue of 'Run from the Future' has variant covers, to keep us on our toes.~FJ

DIRTY PLOTTE

Drawn & Quarterly: *12 issues 1990-1998*

Julie Doucet was one of the best, and probably laziest, cartoonists to come out of the Canadian scene of the early 1990s. Confrontational and abrupt, her strips about such unacceptable topics as cutting yourself with razor blades shimmer with real anger and frustration. There's something iconic about the way she draws, with rough, broad lines, filling in the page with pattern around her large-headed, somehow helpless characters. Although the quantity of her output is minimal, with various friends helping out on the art in later issues, *Dirty Plotte* is well worth seeking out, if only for vicarious thrills. The wittily titled 'Leve ta jambe' also includes hard-to-find work from Doucet's earlier mini-comics and was followed by *My New York Diary*.~FJ

DIRTY STORIES

Fantagraphics/Eros: *3 volumes 1997-2002*

This anthology is edited by Eric Reynolds, who claims "the underground is far more capable of dealing with sex in engaging fashion, in a way that offers rewards other than a stain in the pants". The first volume at least does offer some sexy, funny and thought-provoking fare from the likes of Renée French, Dame Darcy, Roberta Gregory, Peter Bagge, Steven Weissman, Bob Fingerman, Carol Swain, Paul Pope and Ivan Brunetti, whose own version of a Tijuana Bible contrasts with some examples of the real thing. The second volume offers more Brunetti, French (single page), Weissman and Fingerman, with the best of the rest being Dylan Horrocks, Ariel Bordeaux, Santiago Sequeiros, Tony Millionaire and Mack White, but the third has only Bordeaux, French (another page), Fingerman and Sam Henderson of note. Whilst some of these strips are funny or sexy, many are simply exercises in more explicit storytelling than is usual for the creators and only the first volume comes close to Reynolds' claim.~NF

DISAVOWED

Homage: *6 issues 2000*

Dalton Morrel is an alcoholic FBI agent whose life has been destroyed by his work straying towards cults and black magic. Telepath Cassandra Caulder hooks him up with Rachel Rande, a gifted magicienne, and a seer known as Iven. Their joint invstigations lead them to The Vatican and beyond with lethal consequences. Brandon Choi and Mike Heisler pepper this incomprehensible saga with a flurry of captions and expository dialogue impeding the excellent artwork by Tommy Lee Edwards. By the middle of 3 Edwards has left the art to the more decorative John Lucas. Abandoned by most of its primary creators, the series manages one further disappointment with its cop-out ending.~SW

THE DISCIPLES

Image: *3 issues 2001*

The series begins with Hong Kong being decimated by a nuclear bomb and The Great Myron being refused admission back into the cabal of magicians that star here. Evil forces have taken the name The Valetta Corporation and are trying to destroy the world. Standing against them are the Disciples, led by a psychic known as Mother, who operates behind the scenes at Arcana, her house in the USA's Deep South. The main players are Warlock, Eden, Psiren, Dexter and Simon, with Myron's assistant Ambrosia providing comic relief. In 2 we meet Suzi, another potential member, while Eden and Psiren play cat and mice with the unstoppable killer Mr Nunsthorpe in 3, set in Las Vegas. The writers are Colin Clayton and Chris Dows, one of whom is responsible for some pretty heavy word balloons that do the pacing no favours. The distinctive artwork is by Laurence Campbell inked by Larry Shuput. After 2 there was a four month gap in publication followed by 3 bringing a double-sized end to what had the potential to become an interesting series.~SW

The Mundane Adventures of DISHMAN

A DISTANT SOIL

WaRP: *9 issues 1983-1985*
Donning/Starblaze: *2 Volumes 1987-1988*
Aria Press: *14 issues 1991-1996*
Image/Aria: *15 issues (15-29) 1996-1999*
Image/Colleen Doran Studios: *5 issues + (30-34) 2000 to date*

Colleen Doran began her career as a professional graphic artist at the age of 15. Two years later, after a couple of false starts, she achieved the dream of most comics fans, writing and drawing her own series for a professional publisher, in this case Wendy & Richard Pini's WaRP Graphics. Superficially Doran's series, *A Distant Soil*, blended well with the standard fantasy images that were the stock-in-trade of WaRP, publishers of Elfquest; big eyes, pretty costumes, knights in armour, faery types and androgynous aliens. While there is a grain of truth to that evaluation, it doesn't do the series justice, by any means.

The heroes of *A Distant Soil* – *ADS* for short – are a young girl, Liana, and her brother Jason, both possessed of immense psychic powers. For several years, they've been held in a government institute, following the deaths of their parents in suspicious circumstances, while scientists attempt to duplicate their powers. On escaping, they immediately find themselves caught in another conflict as aliens from Ovanan seek out Liana, who has the powers of their hereditary ruler in sufficient degree to prevent the current incumbent from using his abilities. Liana is rescued by two men from Ovanan's resistance faction, the enigmatic Rieken, and his lover and protector D'Mer, but Jason falls into the hands of the Ovanan rulers, notably the lovely but evil Lady Sere. Meanwhile, Rieken and D'Mer assemble a group of warriors from human volunteers (including a conveniently time-lost Sir Galahad) and one Ovanan exile, the formidable shapechanger Bast. The battle lines are drawn.

The WaRP incarnation ended with 9, in litigation over ownership and copyright. Having legally established her ownership of the characters and concepts, Doran made another attempt to tell the story in 1987 with two full-colour graphic novels. 'Immigrant Song' and 'Knights of the Angel' did advance the story, but their unwieldy size and poor distribution condemned them to commercial failure. Following a series of rent-paying gigs at DC, Marvel and Disney, Doran launched a third series of ADS under her own Aria Press imprint. With the tenaciousness that seems to be her trademark, Doran appeared determined to get the story told, and told her way, no matter how long it took! 12 of the new series was a relief to all longtime readers, as the story progressed from the Donning/Starblaze volumes, although most earlier Aria issues had new material and extensive reworkings of the old. When Image took over the solicitation and distribution of *ADS*, Doran was free to concentrate on the creative side, and started to get into her stride. 25 is sought after by some because it features a fantasy story by Neil Gaiman that Doran illustrated, and from 27 to 33 extra non-*ADS* material features, usually in prose form, from acclaimed fantasy writers. However good this is, it's always going to be dismissed as padding by devotees, wanting more of the real thing! From 33 all non-story material is at least *ADS*-related, such as character profiles, sketchbook pages, and the like.

The protracted and extremely complex plotlines are still problematic, rendering the series virtually inaccessible to new readers (although 'the story so far' is readily available in trade paperbacks). We simply have to accept Doran's word that everything will, eventually, tie together, but given the determination she's shown so far, that's not too much of a leap of faith. Doran has a fine ear for natural, unstilted dialogue and good delivery of emotional lines. These are characters one can rapidly differentiate by their speech patterns alone, and people that one quickly comes to care about. Her art is striking, with influences of Mucha and Beardsley visible, but also homages to various Japanese comics creators, notably Riyoko Ikeda, in the use of apparently irrelevant background images to denote strong emotion. The beauty of her work also conceals a cold, hard edge to events. You marvel at a lovely picture, then realise with a shudder exactly what you are admiring! The contrast between the cruelty of events and their ornate depiction creates a sense of unease that suits the story admirably. Despite appearances to the contrary, this is no soft, fluffy comic.

Doran has stated in 2002 that a few more issues will finally see the resolution of the storyline that has occupied her entire adult life. This obsession, however enjoyable for the readers, must have seemed to her at times like a cross between a holy crusade and a custodial sentence. It will be interesting, to say the least, to see the direction her career takes after that.~HS

DIVA GRAPHICS Graphic Novels

This short-lived mid-1990s imprint published largely European material with a high sex content. Their one graphic novel *Flesh Wounds* is an examination of an unhappy sado-masochistic and abusive relationship. The material disturbs, but never enough to quell the distinctly uneasy feeling that this is intended as titillation whatever the redemption factor of the ending. *Naughty but Nice*, and *Pleasurable Passages* are anthologies. They include plenty of Dennis Sire crime and sex stories with Bettie Page, but while the material varies from trivial to explicit, there's very little that could be considered arousing. Sire has other concerns besides, but most other contributors don't, and while perhaps a glimpse at what pushes their buttons, why should anyone care?~FP

DIVINE RIGHT The Adventures of Max Faraday

Image: *8 issues 1997-1999**
WildStorm: *4 issues (9-12) 1999**

The subtitled Max Faraday is a twenty year old randy, insecure computer addict who substitutes a virtual relationship for reality, so not the type you'd figure on accidentally acquiring the secret of creation. In addition to manifesting physically, it comes with three other-worldly guardians, completing an already diverse cast. Of course, the secret of creation is a desirable piece of knowledge, and there are plenty of interested parties. The dynamism of Jim Lee's art has never been called into question, and when inked by Scott Williams, as it is for most issues, the appeal intensifies, but Lee's contributions diminish as the series continues. Lee also broadens his writing to a world beyond superhero fights. Unfortunately the secret of creation remains unrevealed, but as pageturning adventure entertainment, 1-7 are decent comics. With Max's power fully manifested, though, the wheels come off, with pages of exposition and dull demons for two issues. Everything appears concluded in 9, but there's a neat twist prompting the remainder crossing over into other WildStorm titles.~FP

DIVISION 13

Dark Horse: *One-shot 1993, 4 issues 1994-1995*

Introduced as part of *Comics Greatest World*, Division 13 was a military complex housing and testing superpowered and mutated humans. A break-in by escapees isn't entirely successful, but by the end of the introductory one-shot the facility has been breached and the internees are loose. The ongoing series concentrates on the previously introduced cast, which is a shame, as the imposing presence of fellow-prisoner Law is far more interesting. It's a decidedly average title, with Law coming into his own in the course of the far superior *Agents of Law*.~WJ

DJANGO & ANGEL

Caliber: *5 issues 1990*

Donne Avenell is better known as the writer of Axa, the popular European sword-and-sorcery newspaper strip. *Django & Angel* is a little-known thriller originally printed in Sweden. The premise is this: each issue Django, an ex-FBI agent working for Interpol, and Angel, an English private detective, solve a self-contained mystery, although they spend very little time in the same room together. Of minor interest to Axa groupies (if such sad beings exist).~NF

DNAGENTS

Eclipse: *Series one 24 issues 1983-1985, series two (The New DNAGENTS) 17 issues, 1985-1987*
Antarctic: *1 issue 1994*

As ever, Mark Evanier turns out an entertaining and well-crafted superhero tale, which just about manages to rise above the clichés on which it is built. The mad-scientist-infested Matrix Corporation discovers a formula by which to make creatures as near to human as you ever need to get, but who are capable of being programmed to obey. As a bunch of totally subservient superheroes wouldn't be much fun to read, the DNAgents soon manage to think for themselves, and spend the rest of the series at loggerheads with their (mostly) immoral Matrix bosses while they try to explore and discover their own identities. Despite the unoriginality of the basic concept and the high level of angst, probably influenced by contemporary *X-Men* stories, the title had its moments, not least of which were due to Evanier's strong characterisation ensuring that the artificial humans weren't always in agreement on how much, or in what way, they wanted to mix with the real world. The soap-opera elements of the series always outdid the action sequences. The final issue, which does its best to tie-up all the plot threads, finishes on one of the best cliffhangers you're ever likely to come across. Largely pencilled throughout by Bill Meugniot in his pin-up pose style, there is early Erik Larsen art in second series 13-17. A planned revival from Antarctic never worked out.~JC

D.O.A. COMICS

Jim Osbourne: *1 issue 1976*

Jim Osbourne was an undeservedly obscure underground artist with a fine eye for the grotesque, and this comic collects much of his best material. While his early work was a little crude, he quickly developed into a fine artist, and strips like 'The Suicide of Lupe Velez' are beautifully detailed, and written with some elegance. However, his subject matter was almost universally demented, and casual readers should be prepared to be offended.~DAR

Recommended

DOC BEHEMOTH

Chanting Monks Studios: *One-shot 1998*

Underdeveloped light-hearted homage to Doc Savage and the Atlas monster comics of the 1950s written by Roy Thomas. It's the humorous story of a man who likes to sing 'My Darling Clementine', trapped in the body of a giant alien. Sadly, despite the effort spent on it, John Orlando's artwork still appears amateur.~NF

DOC CHAOS

Escape: *2 issues 1984-1985*

Hooligan Press: *1 issue 1988*

The Escape issues establish the humorous premise of a near future in which politics are still conservative and the dangers of biotechnology have begun to exhibit themselves in random mutations. A group of anarchists hire detective Tito Livio to find Doc Chaos (a radical scientific genius who may or may not exist) to persuade him to kick-start the revolution. This could be a difficult task since no one knows what he looks like and he can move from body to body. Dave Thorpe and Lawrence Gray take a leisurely approach to storytelling but there's a lot of plot to keep your interest. Apart from an idea-packed script, the series also has the advantage of Phil Elliott's artwork. At once clearly European in style (heavily indebted to Hergé), it has a roughness that suits the sometimes outrageous characters and retains a distinctive feel.~NF

Recommended: Escape 1-2

DOC SAMSON

Marvel: *4 issue miniseries 1996*

Relying heavily on the cover-featured guest stars, Marvel, one supposes, knew a series starring a superstrong psychologist wasn't exactly a winner, and so it proves. Writer Dan Slott, throws every psychologist cliché (and plenty of others besides) into the brew, hoping to meld them into a plot. What story there is takes its cue from extrapolation in *Hulk* that exposure to gamma radiation results in a superstrong version of a previously repressed character facet. The art varies from dashed-off to appalling, and She-Hulk apart, the guest appearances are forced, and new gamma-superpowered character Geiger is irritating in the extreme. This will stink up your house worse than those trainers you've worn all week.~FP

DOC SAVAGE

Gold Key: *1 issue 1966*

Pulp novel adventurer Doc Savage has been licensed from comic publisher to comic publisher, most of whom have treated him rather shabbily. The first to do so were Gold Key in this poor adaptation of 'Thousand-Headed Man'.~FP

DOC SAVAGE

Marvel: *Series one 8 issues 1972-1974, series two 8 issues, 1 Giant-Size 1975-1977*

Relatively faithful to the all-action, convoluted adventures of the pulps, this short-lived series consists of two-issue adaptations of four original *Doc Savage* novels: 'The Man of Bronze', 'Death in Silver', 'The Monsters', 'Brand of the Werewolf'. Written by Steve Englehart, then Gardner Fox, and finally Tony Isabella, the comics are all plot, with most 'characterisation' taking place around the rivalry between Monk and Ham, two of Doc Savage's five aides. As a result the stories seem hurried but manage to retain something of the atmosphere and mystery of the originals. Ross Andru's artwork is not entirely inappropriate and is significantly improved by Tom Palmer's inking, but unfortunately with five different inkers in eight issues there's not much by way of a consistent look. Originally planning to bring Doc Savage into the 1970s, Marvel changed their plans and kept the adventures in the 1930s, but decided that other quirky period elements (such as Monk's pet pig) should be dropped.

Given more space to work with in the magazine-sized second series, Doug Moench wrote new Doc Savage stories, making good use of foreign locales, and gave him a chance to make greater use of Doc's companions and his cousin, Pat. Though several issues were drawn by others (John Buscema, 1 and 3, Val Mayerik 7), only the final issue, drawn entirely by Ernie Chan, doesn't bear the mark of Tony DeZuniga. Whether providing pencils and inks or just inking, his distinctive look provides a consistency that enhances the action-packed scripts. Not great, but faithful to the pulps and very entertaining.~NF

DOC SAVAGE

DC: *4 issue miniseries 1987-1988, 24 issues, 1 Annual 1988-1990*

DC tested the waters for a Doc Savage revival with a miniseries by Dennis O'Neil, drawn by the Kubert brothers, Adam and Andy, who then went on to produce a satisfying two-year run. It's a clever series, probing the origins of the Doc Savage 'myth', reintroducing the characters but updating them by providing Savage with a grandson and bringing Savage himself into the present. Though purists might dislike some elements of the story it does no disservice to the legend. Continuing from the miniseries, Denny O'Neil pits the Savages against creatures from the moon in 1-6. Mike Barr takes over the scripting with 7, which reintroduces Pat Savage, while 17 and 18 cross over with *The Shadow*. From 19 the series reverts briefly to the 1930s before a final storyline that ties up the stories from both eras. Drawn by Rod Whigham and Steve Montano, there's a blockiness and stiffness to the artwork that really dulls Barr's scripts. The highlights of the series are the covers by the Kubert brothers. The annual contains the first meeting of Doc and his companions in a story that takes them to the 1936 Olympic games.~NF

DOC SAVAGE: Curse of the Fire God

Dark Horse: *4 issue miniseries 1995*

Steve Vance has a good idea of what makes a cracking Doc Savage story, including the prominent use of his cousin, Pat. Pat Broderick's artwork doesn't suit the characters or the setting. Gary Gianni's eye-catching covers are a definite plus and the whole thing's a reasonable approximation of a pulp adventure.~NF

DR ANDY

Alliance: *One-shot 1994*

Dr Andy is a typically eccentric scientist with five mini-clones, an assistant, Betty and an intense rivalry with Dr Phineas, on whom he plays practical jokes like teleporting fruit rinds into his kitchen. When this teleportation device comes to the attention of the government, two agents are sent to buy or steal it. This screwball comedy is not unattractive (in a Joe Staton style), but nowhere near as funny as it thinks it is.~NF

---

* Available in a collected edition

DR ATOMIC

Last Gasp: *6 issues 1972-1981*

Dr Atomic is a genius scientist confident in most disciplines, and possessing a strong interest in dope and coke. These obsessions are shared by his assistant Billy, and resourceful dope dealer 'Crazy' Crosby, from 2, rounds out the main cast. The layers of counterculture topicality apart, this seems very much influenced by the Carl Barks duck stories. Larry Todd's full length efforts in 2 and 6, and some of the shorts in other issues, are inventive travelogues to the Barks template, while the shorter humour items also follow the Barks structure with Billy assuming the enthusiasms and dismal luck of Donald Duck. Everything is well-plotted, with the detail of the cartooning matching the plots, possibly explaining the usual two year gap between issues. Todd brings an obvious scientific knowledge to some stories, and Fortean topics also generate plots, although 4 is heavy on the information. Much underground material has dated badly, but good stories and art always have their place, and Dr Atomic starts strongly and improves. The best issue is 6, incorporating pure cocaine, a trip to Peru, flying saucers and Howard 'Huge'.~WJ

DOCTOR BANG and his Big Guns

Rip-Off: *One-shot 1991*

Lisa-Marie Monroe and her boyfriend are watching a 3D movie at a drive-in, when the Demontronic Empire crashes through the screen and tries to kidnap her. She is saved by the rock'n'roll superhero Doctor Bang, a glam rock nightmare that makes Kiss in their prime look like they're allergic to greasepaint. Lots of hitting and unexplained speeches occur, but it's so badly drawn/airbrushed in glorious monochrome that you can't make out what's going on. Reprinted from a stripzine called Profolio, though God alone knows why.~WW

DOCTOR CYBORG

Attention! Publishing: *6 issues (0-5*) 1996-1997*

Allan Gross, Mark Wheatley, Marc Hempel and Damon Willis concoct a tale strangely reminiscent of the classic *Jonny Quest* series. Malcolm Syberg is a physicist/archeologist seduced into working for an American covert agency, spying and building gadgets. When his bodyguard, son, Indian companion and dog are blown up by terrorists, Syberg builds super-android duplicates to replace them, before succumbing to his own injuries and placing his head on a cyborg body. The missions they then undertake lead them to question just who the good guys really are. Dark blend of *X-Files* and *Man From U.N.C.L.E.* deftly done and very readable. The strip continues online at www.insightstudiosgroup.com/fundays/docstory.htm.~WW

DR FATE

DC: *3 issue miniseries 1985, 4 issue miniseries 1987, 41 issues 1988-1992*

The first miniseries reprints the Walt Simonson story from *First Issue Special* 9, and back-up stories from Flash 306-313. The second moved the goalposts. Previously archaeologist Kent Nelson, aloof and nigh-omnipotent master of magic, Dr Fate was now the mystically aged former ten-year-old Eric Strauss merged with his stepmother Linda. When not being Dr Fate they separated, and were monitored by Nelson's mentor, the immortal Nabu the Wise, now occupying Nelson's aged body. Writer J.M. DeMatteis stuck around for the ongoing title, added some humour absent from the miniseries, introduced a varied supporting cast, and produced a solid enough run in the company of ever-improving artist Shawn McManus. For the best of the bunch try 7's pastiche of *Romeo and Juliet* with Yiddish demons in New York (honestly). There's a death in 12, and the tone becomes markedly darker. DeMatteis starts exploring the nature of fate and spirituality, ground he's positively stamped to death elsewhere, and the series isn't the better for it.

A change of the title logo to read *Doctor Fate* with 25 is as good an indication as any that a new broom is in town, and writer William Messner-Loebs makes sweeping changes. It's farewell to the previous supporting cast, and, indeed, to the previous Dr Fate, as a youthful Kent Nelson returns in the company of his wife Inza. Unpredictably, it's Inza who is now Fate. Rather than occupy herself with cosmic matters she works on an altogether more human level, deciding that her destiny is to improve the lot of her immediate New York neighbourhood, making some interesting moral decisions along the way. Engaging supporting characters abound, not least a surly Lord of Order trapped in Kent Nelson's old body. Once Messner-Loebs hits his stride with 28 almost every issue is worth a look, and things improve further as Scot Eaton and Peter Gross take over the artwork with 33. A good sample issue is 35, by which time Inza has re-shaped the neighbourhood and the authorities are starting to take an interest. The stories published as *Scarab* were initially intended for this title (doubtless in very different form) and the next try is as *Fate*.~FP

Recommended: 28-32, 34, 35, 39, 40

DOCTOR GORPON

Eternity: *2 issues 1991*

Created by Marc Hansen, *Doctor Gorpon* combines elements of cartoonist Ed 'Big Daddy' Roth's manic monsters-in-dragsters style of art with Michael Gilbert's Mr Monster character. No originality in conception or art then, what about plot? Ummm, actually not much cop there either. It's slapstick cartoon violence with Gorpon going about dispatching monsters with glee and relish, while his former assistant wants revenge for poor treatment at Doc's hands. Announced as a three-issue miniseries, the final issue doesn't appear to have been published.~FP

DR GRAVE

Slave Labor: *6 issues 2000*

Awful rehash of the costumed monster-hunter genre played, unsuccessfully, for laughs. Venal braggart Dr.Grave and his long-suffering manservant Shandar travel the world and the afterlife fighting the forces of supernatural evil as long as there's a quick buck or a sexy chick in it. Don't waste your time.~WW

DOCTOR GUMBO'S ONE TRUE JAZZ COMIC

Oh No! Novelties: *One-shot 1997*

The adventures of Doctor Cyril Gumbo who embarks on a slapstick, alcohol fueled vision-quest involving hallucinatory appearances by many jazz greats. This collection of Lindsay Arnold's daily strips from Tasmania bears the cover blurb "guaranteed to cause a classic headache if you read it in one sitting (without assistance)". It is indeed sixty pages of crudely drawn incoherence, but there is a great love of jazz music and its history evident that makes even an unassisted read entertaining. You might even learn the truth about jazz hairpieces if you partake sedulously enough!~SW

DOCTOR MID-NITE

DC: *3 issue miniseries 1999*

Socially crusading physician Pieter Cross obstructs the goals of organized crime once too often, and an 'accident' is arranged. Not only is he blinded, but he's also framed so that his medical license is revoked. However, the substance he was doped with to set him up for the accident is an unstable steroid that gives him enhanced physical prowess and perfect nocturnal vision. Using his already established network of operatives and informants, he sets himself up as a costumed vigilante.

Writer Matt Wagner makes a conscientious attempt, in the first issue, to create a figure reminiscent of the pulp heroes such as Doc Savage and the Shadow, but subsequently doesn't show much inspiration, and the good Doctor merely engages in bog standard heroic fisticuffs.

Although this prestige format series didn't prompt an ongoing title, the Doctor took the place of his 1940's namesake in the revived JSA from 1999, and remains a highly visible figure in the DC Universe.~HS

The Second Life of DOCTOR MIRAGE

Valiant: *18 issues 1993-1995*

Destroyed by the evil entity Master Darque, parapsychologist Hwen Mirage is brought back from the beyond by the love of his wife, Carmen Ruiz. Unfortunately, his 'second life' is as an intangible spirit with supernatural powers. The supernatural powers are fine, but the intangible bit causes Hwen and Carmen certain...romantic problems. How they solve them, and how their relationship survives this crisis, is the charm of this witty and likeable series. Most readers, one suspects, picked up the title to see how Hwen and Carm were getting along, rather than to see the spook-of-the-month action (though there was that too, for them as liked it). Bob Layton and Bernard Chang created two leads whose relationship was a partnership of genuine equals, with a refreshing lack of the power struggle that characterises so many comic relationships. It's also indicative of Valiant's willingness to take risks that there wasn't a major Caucasian character in the series, and interesting that most folks don't actually notice this until it's pointed out. While some people found the fact that our heroes were genuinely passionate about each other a little stifling, the series' strong romantic bias made it an unexpected hit with female readers. Sadly, there weren't enough to give the title a long run and it was cancelled mid-plot (19 was advertised, but never appeared).~HS

DR. ROBOT

Dark Horse/Maverick: *One-shot 2000*

This very brilliant comic by Bernie Mireault, reprints back-up stories from *Madman* along with one new story. It ought to be published in washable hardback and given to children of all ages for Christmas. The almost wordless strips are about a giant robot who lives in idyllic countryside with his genial elderly creator/operator, and their heartwarming adventures, for example dealing peacefully with a rampaging monster in the nearby city. The simple, brightly coloured art is delightful.~GK

Recommended

DOCTOR SOLAR

Gold Key: *27 issues 1962-1969*

Whitman: *4 issues (28-31) 1981-1982)*

Dr. Solar unexpectedly survives a nuclear accident and is endowed with enormous nuclear power. The transformation turns Solar's skin green, like the Hulk, also created in 1962. 1-4 feature Solar's adventures clothed in the everyday lab coat of a nuclear scientist. He feels impelled to keep his new abilities a secret from his associates, particularly the lovely Gail Sorensen who he is afraid of harming with his radioactivity. In 5 he finally dons his protective scarlet costume with the distinctive facemask visor and becomes the superhero known only as 'The Man of the Atom'. Over the next 23 issues he usually finds himself foiling the machinations of the bald, obese master plotter Nuro. The series was written by Paul S. Newman, with the initial 4 issues finely drawn in a realistic newspaper strip style by Bob Fujitani. From 5 Frank Bolle draws most of the remaining run, while Al McWilliams produced some splendid art on 20-23's experiment with a continued story before handing the title to Ernie Colón (24-26), the José Delbo for the final issue. The stories are self-contained, but pedestrian, the best individual issue being 15 where Solar goes back in time and is forced to relive the horror of his origin. After cancellation the Doctor was next seen as a guest in *Doctor Spektor* 14.

In 1981 Whitman revived the title and writer Roger McKenzie gave Solar a first name: Ray. That's about the only interesting thing in the new version, apart from the usual accomplished art job from Dan Spiegle. Magnus, Robot Fighter, also by McKenzie and Spiegle ran as a back-up. The Man of the Atom's next appearance was in Valiant's revision of the character simply titled Solar.~SW

Recommended: 1-4, 15, 20-23

The Occult Files of DR SPEKTOR

Gold Key: *24 issues 1973-1977*

Basically an ordinary anthology title, this is different in that Dr Spektor is brought into the 1970s Gold Key universe with 7, revealing a blood link between him, Dagar and Tragg. There were guest appearances by Dr Solar in 14 and 23, and the artwork is mainly by the Filipino artists Gold Key used at the time.~SW

DOCTOR STRANGE

Marvel: *Series one 15 issues (169-183) 1968-1969, Series two 81 issues, 1 Annual, 1 Giant-Size, 1 Graphic Novel 1974-1987, series three 90 issues, 3 Annuals (2-4) 1988-1996*

The first series was an enigmatic little number that owed more to its breathtaking Colan and Palmer artwork and wild panel layouts than to the scripting. Plots improved from those in *Strange Tales*, from which the publication and numbering continued directly, but Roy Thomas' ideas somehow failed to gel. 174-177 and 180-183 are a cut above the rest in both story and art departments. Plotlines concluded in *Sub-Mariner* 22 and *Incredible Hulk* 126, wherein Doctor Strange renounced his use of magic and abandoned his role as a sorcerer. He returned in *Marvel Feature* 1 and *Marvel Premiere* from 3 onwards.

The second series continued directly from his spell in *Marvel Premiere*. Ever since 1973, the character of Doctor Strange has been almost unrecognisable from that of the man portrayed in the 1960s Strange Tales stories. Whereas he was once little more than a superhero functioning in magical dimensions, he graduated into a truly eldritch and universal occultist. Steve Englehart and Frank Brunner finally broke through to concepts and abstract plots that could have flourished in very few other titles. Witness the story in 10-13 wherein Earth is annihilated, then recreated instants later. Many issues are cerebral but the absence of limits on the writers' scope does not endear the title to every reader. Four of their early issues are reprinted as *Doctor Strange Special Edition*, and a collection of Englehart/Brunner work was published in 2002. Later issues, mostly written by Roger Stern, are a touch more conventional, but quality is high from 48 on. A foothold on this planet is maintained through new supporting characters, particularly Morgana Blessing, who adds spice to Strange's static love life. Blessed by mouth-watering pencils from Marshall Rogers, Dan Green and Paul Smith, the second-half highlights capture a delightful time-travel tale in 49-53 (epilogue in 55) and an astonishingly powerful fable in 58-62, wherein Earth is rid of vampirism. The Doctor's adventures continued back into a new series of *Strange Tales*. The graphic novel Into Shamballa by J.M. DeMatteis and Dan Green accommodates lavish, abstract artwork but the grandiose presentation fails to disguise the pretentious story.

When Roy and Dann Thomas take over the scripting of the third series from 5 (with Jackson Guice on pencils), they promptly revert the misguided changes of *Strange Tales*. With 6 a back-up strip is introduced, 'The Book of the Vishanti', written by Roy Thomas and R.J.M. L'Officier, which serves as a history of magic. With excellent, moody artwork from Tom Sutton (6-8), suddenly the title was worth reading again, particularly as the back-up moved on to the history of the Darkhold, the legendary book of evil.

10 introduces Strange's brother, Vic, and establishes a relationship with scientifically created vampire Morbius. Thomas also takes the opportunity to restore vampires to the Marvel Universe in 'The Vampire Verses' (14-18), and his next major plotline (21-24) involves Strange in conflict witb Baron Mordo, Dormammu, Clea and Umar, but things start getting sticky from there in. Chris Marrinan takes over the pencils with 27 as the title becomes dogged with crossover

issues. The interminable *Infinity Gauntlet* issues (31-36) followed shortly by six *Infinity War* crossover issues (42-47) are enough to make anyone give up. In case they haven't Len Kaminski introduces a whole new 'new' direction as Doctor Strange decides, after all these years, that he's fed up with all these gods that he has to keep calling on for help. The events of 50 lead to the formation of The Secret Defenders.

The Infinity Crusade occupies 54-56, after which the 'Midnight Sons' banner starts to have its effect on *Doctor Strange*. The 'Siege of Darkness' crossover affects 60 and 61, written by David Quinn and pencilled by Melvin Rubi, after which the good Doctor is a different person with new powers. This 'new' Strange lasts until 75, with stories in which guest appearances are used to keep reader interest. Warren Ellis writes 80-83, followed by J.M. DeMatteis. Mark Buckingham and Kev Sutherland took over the artwork with 80 but, good as the pairing is, they're wasted on some very poor scripts. DeMatteis' characteristic 'let's take a look at the human being in this character' ploy was just an excuse to go over old ground.

After years of indifference, having large chunks of crossover continuity dumped into its storylines, and a stream of half-hearted revamps, none of which were allowed time to fully develop, it's no surprise that Doctor Strange was cancelled again.~APS/NF

Recommended: Series two 6-13, 15-16, 49-53, 55, 58-62, 71-73

DOCTOR TOMORROW

Acclaim: *12 issue limited series 1997-1998*

Those whose complaint is that comics aren't the way they used to be are advised to seek out this pleasing run through a superhero's career from the 1940s to the 1990s. Doctor Tomorrow accesses the technology of the future, enabling him to become the pre-eminent superhero of his day on starting his career, but as years progress sustaining his status becomes ever more difficult despite his superior gadgetry and knowledge of the future. Bob Layton wrote this as a tribute to the artists who influenced him as a youngster, which makes the wildly varying quality of the artwork disappointing. Tom Grindberg (7) effortlessly evokes the art of Neal Adams, which is no surprise as he's built a career imitating Adams, but only Anthony Williams and Andy Lanning's take on Frank Miller in 10 otherwise approaches the named artistic influence. An editorially compromised ending and extremely irritating sidekick are flaws, but not fatal.~FP

DR WEIRD

Big Bang: *1 issue 1994*

Those with an interest in unearthing the earliest works of writers and artists are directed to *Dr Weird*, which features not only the fanzine-style art of Jim Starlin, but the fan writing of science-fiction author George R. Martin. It's utter tosh. Dr Weird is based on 1940s mystical superhero Mr Justice, himself based on The Spectre, and runs through assorted poorly drawn and written genre material. Curiosity won't pay off.~WJ

DOCTOR WHO

Marvel: *23 issues, 1 Graphic Novel 1984-1986*

Colour reprints of the mainly Dave Gibbons-drawn stories for Britain's *Doctor Who Magazine*. Largely concentrating on the Tom Baker version of the Doctor, if you've not seen his quirky and eccentric portrayal his persona in the comics quickly becomes irritating. Unlike the TV show, there's no respite from a supporting cast as Marvel's contract only covered likenesses of the Doctor. The Peter Davison version of the Doctor is featured from 16, illustrated by other artists, and the Doctor can also be found in a trial run for this series in *Marvel Premiere* 57-60. The stories are generally well crafted and faithful, but lack the vital spark. The graphic novel, titled 'Voyager', is a further collection of stories reprinted from *Dr Who Magazine* (88-99), this time enveloping the Colin Baker incarnation in a battle of wits against an ancient time-lord. Steve Parkhouse and John Ridgway combine well for an imaginative romp introducing a new helper.~FP

DOCTOR WHO AND THE DALEKS

Dell: *One-shot 1966*

A pedestrian adaptation of the film starring Peter Cushing as the Doctor, now commanding extortionate prices. Timelords should journey back to 1966 and buy one from the newsstand. Anyone else buying one would have more money than sense.~WJ

DR WIRTHAM'S COMIX AND STORIES

Clifford Neal: *8 issues (1-4, 5/6, 7/8) 1976-1983, 1987 (9-10)*

After a solo first effort by Cliff Neal (or Oisif Egaux, as he prefers), this became a very patchy underground anthology. Steve Bissette and Rick Veitch contributed some obviously very early work to 2 and 4, while other artists included Will Meugniot (2) and Gene Day (3). Neal himself had a beautifully detailed style, and each issue featured a number of illustrations and 'stories' by him, though story-telling was obviously not an interest of his. The later issues, some of which are double-numbered and 10 indicated only by 'X' on the cover, are a great improvement. There's nice work from a greatly improved Bissette and Veitch (5/6, 7/8), Jay Kinney (5-10), the great Greg Irons (in 5/6, 7/8), Peter Bagge (7/8), Mark Nelson (7/8, 9) and Mike Matthews in 7-10.~DAR

DR WONDER

Old Town: *5 issues 1996-1997*

Dick Ayers is behind this attempt to produce faux-1960s style Marvel comics. Gaining super-powers from a handily discovered new element, Dr Wonder battles to keep humanity safe from saboteurs and super-villains. The comics are decently turned out for what they are, but with nostalgia as the sole impetus without any ironic qualities, they're very much out of step with the times. Their comparative lack of sophistication marginalises the appeal to a very small audience, and it was no surprise to see this fail. Superhero fans over the age forty might want to investigate, though.~WJ

DOCTOR ZERO

Marvel/Epic: *8 issues 1988-1989*

One of three linked titles (see *Powerline* and *St George*) set in a world like ours except for the existence of a second, super-powered race of "Shadow" people who have been manipulating human society since the beginning of civilisation. Dr Zero, the oldest and most powerful of the Shadows, fears mankind is out of control, and thus instigates a cynical contingency agenda involving him becoming a "Super-hero" and saving the world, for himself. Created by Archie Goodwin, and initially illustrated by Denys Cowan, the work is sadly ruined by heavy-handed scripts from Margaret Clark and Dan Chichester. The storylines were concluded in *Critical Mass*.~WW

DR ZOMBIE'S HOUSE OF FREAKS

Starhead: *1 issue 1992*

Comic directory of "Famous Freaks" past and present such as Koo Koo the Bird Girl (featured in Todd Browning's infamous movie Freaks), Pujol the Farter (!) and the Jim Rose Circus Sideshow. Quirky and disturbingly well-drawn in the manner of Drew Friedman and Rick Geary by the presumably pseudonymous Art Penn, this is certainly not to everyone's taste.~WW

DODEKAIN

Antarctic: *8 issue limited series 1994-1995*

Another Japanese series so obviously intended for young boys here translated and presented for a much older audience. Earth's invaded by aliens and a twelve year old inherits a giant battlesuit to fight them. Once that's done (4), there's a rival battlesuit on the way. The lack of sophistication ensures only those with formative minds will derive anything from this.~FP

DOG BOY

Fantagraphics: *10 issues 1987-1988*

Be careful not to mistake the title, written and drawn by Steve Lafler, with Charles Burns' book of the same name.

Lafler's opus is a humorous anthropomorphic tale, and while both get humour out of contrasting dog and human behaviour, Lafler's jokes are very much more obvious. Lafler's art is up to conveying what's going on, but little more than that. The inking is heavy-handed and the characters visually unsympathetic.~FJ

DOGS OF WAR

Defiant: *5 issues 1994*

Another bow-wow from Jim Shooter's short-lived Defiant comics. The Dogs of War are Shooter and Mouse, two supersoldiers introduced in the unreadable *Warriors of Plasm*. Presumably not based on the editor, Shooter is a hair-triggered psychotic with the power to turn invisible while Mouse, a gentle soul, quickly becomes horrified by his friend's single-minded viciousness. Returned to Earth and unemployed, this odd couple decide to become vigilantes, taking on child pornographers, tobacco barons, gun smugglers and general scum-of-the-earth. Drawing liberally from Steve Ditko's *The Hawk and the Dove* and numerous buddy movies, writer Art Holcomb obviously believes that virulent misogyny and mindless violence are the stuff of gritty realism. However, the rest of the comic is so laughably unreal that these calculated moments of political incorrectness only serve to underline Dogs of War's general mediocrity.~AL

DOLL

Rip-Off: *8 issues 1988-1991**

Guy Colwell's *Doll* is a sensitive erotic story of a hideously deformed man who approaches a hyper-realist sculptor to create a truly realistic sex doll, since no living woman will consent to have sex with him. The plot is complicated when a porn magazine editor who agrees to bankroll the projects wants to keep Doll for himself. There's plenty of tension and exploration of how men relate to women sexually in the book, but very little sex. The occasional penis sighting validates the 'adults only' label on the cover, but the actual encounters are more like asides.~FJ

DOLLMAN

Eternity: *4 issue miniseries 1991-1992*

Based on a film of the same name, this tells of the return of the roughest, toughest cop on the planet Arturos to Earth, in search of his arch-enemy, a disembodied brain with a thing for creating designer drugs and testing them out on great, big, fleshy women. That's why Earth is ideal as your average Arturan is approximately twelve inches tall. A predictable action shoot 'em up.~WW

DOLLS

Sirius: *One-shot 1996*

Toned black and white Bisleyesque art characterises this tale of a future where programmed female androids are hired as companions. When Leo's is repossessed permanently because he's behind on the rent he turns mad as hell. Carnage follows. Hardly worth the cover price.~WJ

DOLLZ

Image: *2 issues 2001*

Cute girls with sewn-on buttons for navels. China is, well, Oriental; Ragz is all stitches and scraps; Baby is a little girl who is very strong so long as she has her talking toy rabbit Mr Bunz with her. Their guardian is a bigger doll, long blonde hair, perfect make-up, wears pink a lot. There are bad dolls made by an evil church too, and a wicked puppetmaster lurking in the shadows. As well as being slick and accomplished the artwork by creator Randy Green is extremely efficient, showing us as many leg and up-the-skirt shots as possible.~SW

The DOME: Ground Zero

DC/Helix: *One-shot 1998*

A tired story of dumb humans tampering with forces beyond their ken. This time a Quantum bomb test awakens an interplanetary terraforming device, forcing a crack team of generic hero-types to penetrate the mysterious dome that popped up over the bomb-site in a last ditch attempt to save the world. Substandard fare from Dave Gibbons and Angus McKie.~WW

DOMINION

Eclipse: *6 issue miniseries 1989-1990**

Dark Horse: *One-shot 1994, 6 issue miniseries ('Conflict 1') 1996**

It's a future where the Earth's atmosphere is poisonous and direct contact with the air can be deadly. The Tank Police are a force created to deal with the threat of a single criminal, Buaku, whose gang has been proving very difficult to stop. The heroic Leona, despite being very fond of her tank (named Bonaparte), can't seem to stop Buaku, even though she and her pilot, Al, do keep coming close. The first series introduces the Tank Police and its world, culminating in Buaku's plan to leave Earth on a space shuttle, involving a truckload of hostage babies and lots of mayhem. In case you hadn't guessed, this is a comedy. Normal citizens fear the Tank Police more than they fear Buaku, and certainly more than Buaku fears the Police. The Chief's constantly on the verge of a nervous breakdown, incompetence runs rife and the citizens keep withdrawing funds.

After that, 'Conflict 1' seems to be a completely different series. The Tank Police still exist but are just another department of a large police force and the poisonous air has somehow been cleansed. Leona now leads a team (without Al) and finds herself nursemaid to Anna and Uni, mayhem-prone androids that once worked for Buaku. There's still an overall storyline but it's almost redundant given the interest shown in the background to the series and the many social and political conflicts within the force. 'Conflict 1' is certainly a more mature work, though the humour remains, including Masamune Shirow's trademark footnotes and occasional 'to the reader' comments. There is a density to Shirow's later work that can be off-putting, especially his tendency to tell you more than you need to know, but it repays careful reading, and the comedy is always there to counterpoint the political machinations.~NF

DOMINION FACTOR

Marvel: *8 issue miniseries (Fantastic Four 1.1, 2.3, 3.5, 4.7 Avengers 1.2, 2.4, 3.6, 4.8) 1999-2000*

Parallel miniseries from Dan Jurgens and Bob McLeod (Fantastic Four) and Jerry Ordway (Avengers) as the world is threatened by time rending mystic giants. It forces the FF and a select crew of Avengers to travel back to earlier periods of Marvel history in search of slices of a magic apple – no, really! – to repair reality. Simple, enjoyable romp, but probably a cheeky attempt by the creators to redraw some of their favourite Marvel moments.~WW

DOMINIQUE

Caliber: *One-shot ('Family Matters) 1994, one-shot ('White Knuckle Drive') 1994, one-shot ('Protect And Serve') 1995, one-shot ('Killzone') 1995*

Ill served by unrepresentative and off-putting covers, in Nikki Saunders, Charles and Lisa Moore have created a likeable and resourceful private investigator, although she trades freely on her F.B.I. past. She also wears her heart on her sleeve, a potential vulnerability. The best story is 'Killzone', where that vulnerability is exploited over drugs deals, decently drawn by Casey Jones and Mike Perkins. 'White Knuckle Drive' is severely hampered by the poor storytelling of artist Matthew Smith, although it is his first published work, and the art of Gene Gonzales on the other comics is fine. 'Dominique', by the way, is a code name, and she also appears in *Dark Horse Presents* 71-73, and *Negative Burn* 9, 13, 25 and 34.~FP

DOMINO

Marvel: *3 issue miniseries 1997*

X-Factor's assassin with the 'unnatural luck' has her chance at a solo adventure courtesy of writer Ben Raab and artist David Perrin, inked by Candelario. The villains of the piece include the evil spy organisation A.I.M. and messers Pearce, Lady Deathstroke and Skullbuster. There are predictable flashbacks to earlier days and along the way we meet Domino's first love, Dr.Milo Thurman. Domino has believed him to be dead for years, he thinking likewise of her. The bled-off artwork is dull and preoccupied with facial close-ups and clipped detail. The black and white elegance of Domino's costume is undermined by the computerised colour, the black circle around her left eye resembling a large grey bruise. A bit of a disappointment on all fronts, really.~SW

DOMINO LADY

Eros: *3 issue miniseries 1990-1991, 3 issue miniseries ('Jungle Adventure') 1992*

Okay, the first question that occurs is: has writer/artist Ron Wilber ever actually seen a naked lady? Live and in person? Because judging by this, you wouldn't think so. Taking the name from a 1936 pulp character who's fallen into public domain, Wilber tells the story of Ellen Patrick, a socialite who adopted the identity of the Domino Lady to avenge her assassinated politician father. This gets her into a series of scrapes in which her already-flimsy costume gets torn off, which would be all well and good if her anatomy bore any resemblance to the established human form. Given the bulbous, marrow-like appendages presented as breasts, not to mention the inky fog representing her genitals, it makes you wonder why the hell they bother to get her naked. The first series involves cavemen, dinosaurs, a horny private dick and a madness-inducing magic flute. The follow-up involves our heroine, via contrived circumstances, crashing in the jungle, donning an inadequate animal skin and romping with both Mussolini and Haile Selassie. Lord have mercy. In the interval between the two series, Wilber's art marginally improved – the breasts are more sincere – but his rendition of a vagina still looks like the vague scribble schoolkids used to doodle before they ever actually saw one. For a wanky comic, it's bafflingly crude, and not in a good way.~HS

DOMU: A Child's Dream

Dark Horse: *3 issue miniseries 1995**

A translation of Katsuhiro Otomo's manga novel. A housing estate has had twenty-five mysterious deaths in three years. The police investigate, but how likely are they to get to the truth: that a spiteful, senile old man is using his psychic powers to drive people to suicide or murder? And their job is made no easier when a young girl with matching powers moves into the estate and within days the conflict turns to open war. A superb piece of work. If you've been avoiding manga because you think it's all bambi eyes and huge robots, have a look at *Domu*. The story is exciting, intriguing and truly frightening, given an excellent translation here. The psychic conflict is handled particularly well, with both fighters staying in character throughout, so you can recognise the emotions and tactics from playground skirmishes. The artwork is beautiful: the characters are all individuals, not a stereotype in sight, and the domestic details of the estate are rendered with a degree of loving care which serves to make the violence that much more real and horrifying. Read this comic. You owe it to yourself.~FC

DON MARTIN MAGAZINE

Welsh Publishing: *3 issues 1994*

Don Martin's goofy stretched figures were immediately identifiable with *Mad* magazine for over thirty years, as was his sense of humour, confounding expectations with well set-up exaggerations in short gag strips. Here, though, he opts for extended strips for the most part, and it's very surprising to see that they just don't work, either bludgeoning a joke to death, or failing to hit on it in the first place. One might have thought his instinct regarding the latter infallible after so many years. The small amount of two or three panel gags that are run are up to expectations. It's a shame the remainder falls short.~FP

DON ROSA'S COMICS AND STORIES

CX: *2 issues 1983*

College professor and adventurer Lance Pertwillaby becomes involved in a quest for lost Nazi treasure at the South Pole and the problems caused by a universal solvent. Don Rosa's now considered the best creator to work on Disney's ducks since Carl Barks and these 1970s stories contain all the hallmarks of a classic Uncle Scrooge adventure tale. In fact 2 was reworked for Scrooge in *Walt Disney's Comics* 604-606. Difficult to find, but worth the effort.~WJ

Walt Disney's DONALD AND MICKEY

Disney: *18 issues 1991-1993*

Gladstone: *Series one 12 issues (19-30) 1993-1994, series two 7 issues 1995-1996*

Despite the title, only 26 by Paul Murry actually features Donald and Mickey in the same story (versus the Phantom Blot). Carl Barks' ten-page Donald stories from *Walt Disney's Comics and Stories* feature in all but that issue, while apart from odd stories, the rest of the strips are produced by Jaime Diaz and the Disney studios. Diaz' strips in 23-25 and 28-30 are extended stories featuring Mickey and Goofy in Egyptian and Arthurian adventures respectively, and although nicely drawn, they're too reliant on dumb one-liners (and Goofy being goofy) to be satisfactory. The Disney studios (19, 21, 22) produced an oddity in Mickey Mouse's adventures with The Sleuth, a Sherlock Holmes type, only dumb and reliant on Mickey to do the real detective work. They're not great, but they're mildly entertaining. Issue 20 has the added attraction of a few Floyd Gottfredson Sunday pages from the Mickey Mouse newspaper strip.

Renaming the title *Donald Duck and Mickey Mouse*, Gladstone started to publish ten-page Donald Duck stories by Barks coupled with Mickey and Goofy adventures. The latter include 'The Arabian Adventure' (1-3) by Disney and Jaime Diaz studios, 'The Treasure of Shark Reef' and 'The Trojan Horse', both by The Egmont Group.~NF

Walt Disney's DONALD DUCK

Dell: *85 issues 1952-1962*

Gold Key: *131 issues (86-216) 1962-1981*

Whitman: *29 issues (217-245) 1981-1986*

Gladstone: *62 issues 1986-1990 (246-279), 1993-1998 (280-307)*

It's assumed readers will know who Donald Duck is, and that he has a girlfriend Daisy, three nephews, Huey, Dewey and Louie, and an uncle, Scrooge McDuck. Making his screen début in June 1934, it was only a few months before he was also appearing in a 'Silly Symphony' comic strip. Not until 1940, however, did Donald star in a comic, reprinting newspaper strips drawn by Al Taliaferro in issue 4 of the original *Four Color* series. His first new story was notable also for being Carl Barks' first comic work. *Four Color* 9, 'Donald Duck Finds Pirate Gold' (reprinted in 250), was the first of twenty-nine *Four Color* issues before he started his own title with 26. Someone at Dell obviously failed their maths.

Until 1966, Carl Barks produced the best Donald Duck stories and his characterisation was what other writers and artists such as Paul Murry and Bob Gregory tried to emulate. Donald is generally short of money and either struggling at work, or else at the top of his chosen profession (of that month) until something goes wrong (and it always does). Sometimes Donald gets the better of his nephews or his cousin Gladstone (whose luck is near supernatural), but he's just as likely to be picking a fight with his neighbour Jones as getting anything done. Donald's irascibility is his greatest weakness and though he's perfectly happy playing pranks on other people, particularly his clever nephews, they almost always backfire. Apart from the short stories about life, love (Daisy's a little fickle and quite happy to date Gladstone) and getting ahead in Duckburg, there are longer adventure stories such as 'Secret Of Hondorica' (46), 'The Lost Peg-Leg Mine' (52), the search for wasps in 'The Forbidden Valley' (54, 248) or 'The Titanic Ants' (60). Other

* Available in a collected edition

Disney characters, including Goofy and Chip and Dale, appeared in short back-ups or in single page gag strips, but after 163 the title increasingly became a reprint comic.

When Gladstone restarted publication of Disney material the natural basis of their titles was reprinting the work of Carl Barks. From 246, only 283 didn't contain a Carl Barks strip, and that had the first new Donald strip since 236, written and drawn by Don Rosa, a man widely regarded as Barks' natural successor. Gladstone didn't stop with Barks, though. Determined to attract new readers, they reprinted European material not previously seen in the US. The popularity of Disney characters in Europe has not diminished as it has in their homeland, and Disney magazines have been published since the 1930s, so there was plenty of material to choose from. Volker Reiche (247, 249, 251, 260), Fred Milton (258, 277), Romano Scarpa (279), Marco Rota (300) and Frederico Pedrocchi (286) are among the named artists but many issues contain work by the Danish Gutenburghus and Dutch Oberon Studios. Rosa himself produced work for the Europeans (278) before creating new stories for Gladstone. His main rival for Barks' crown is William Van Horn (263-265, 268, 269, 271, 272, 286), whose artwork is similar to that of Barks but more rounded and uniform in line, while Rosa's ornate, more detailed style has fewer dramatic angles than that of Barks.

Al Taliaferro's short strips can be found in 247, 258, 259, 262-265, 267-276 and his work on the Donald newspaper strip, written by Bob Karp, features in 280-285, 287-299, 301-307). Taliaferro's smooth, long-necked Donald is one of the highlights of American newspaper strip history. Of note also in the Gladstone series is Walt Kelly's version of Donald in 275 and Floyd Gottfredson's in 286, co-starring Mickey Mouse. The break in publishing between 1990 and 1993 was caused by Disney's decision to publish under its own imprint though, strangely, they stopped Donald's title to launch *Donald Duck Adventures* in its place.

Though Barks didn't actually provide much of the material for issues 27-163, his influence can be seen in practically every story. The Barks reprints in the Gladstone issues are mostly from Walt Disney's Comics and Stories but those that aren't are often from the many one-shots and promotional specials published since the 1940s (*Vacation Parade* in 257 or *Firestone's Christmas Special* in 251). The longer Barks stories are all collected in Gladstone book format, either in their 1980s album series, or chronologically in 25 volumes of *Donald Duck Adventures by Carl Barks*. Much of Barks' best work was ten page stories from *Walt Disney's Comics and Stories*, and these are reprinted over fifty-two volumes of *Walt Disney Comics and Stories by Carl Barks*..~NF

DONALD DUCK ADVENTURES

Gladstone: *20 issues 1987-1990*
Disney: *38 issues 1990-1993*
Gladstone: *28 issues (21-48) 1993-1998*

Primarily a vehicle for longer Donald Duck stories, starting with reprints of the *Four Color* stories by Carl Barks, later issues included more European and non-Barks material. Of note are the longer new stories by Don Rosa ('The Crocodile Collector', 8, 'Return To Plain Awful', 12 and 'Lost Charts of Columbus', 43), Marco Rota's Viking adventure 'Andold Wild Duck' (23) and the two stories written by Barks but drawn by Daan Jippes ('Traitor in the Ranks', 31 and 'Storm Dancers', 32) both from *Huey, Dewey and Louis Junior Woodchucks* in the early 1970s.

Barks' stories are masterpieces of storytelling, as the additional story length provided full scope for his detailed backgrounds and exotic locales. His scripts extend from the satirical 'Dangerous Disguise' (2), which spoofs Cold-War spy stories as Donald matches wits with 'Madame Triple-X', to the slapstick 'The Pixilated Parrot' (22) and the adventure of The Golden Helmet (32). Others of particular note are 'Lost in the Andes' (3), 'Mystery of the Swamp' (7), 'Ghost Of The Grotto' (9) and 'Sheriff of Bullet Valley' (28).

Disney decided to publish their own comics in 1990, and showed a greater willingness to print work of writers and artists other than Carl Barks, though they reprinted European material previously unseen in the USA rather than commissioning new work. Vicar is represented most frequently (all issues except 1, 9, 10, 24, 26, 29, 33, 35-38), but the series also introduces Don Rosa (1, 22, 24, 34, 37), William Van Horn (2-8, 10, 13, 15, 16, 19, 20, 27, 37, 38), Daniel Branca (12, 24, 25, 26, 32, 33), Ron Fernandez (19), Romano Scarpa (22, 28), Santanach (1, 25) and Daan Jippes (26). Most of these are also represented in the later Gladstone run, but Rosa and Van Horn, spiritual heirs to Barks, consistently account for the most diverting material.

Barks is represented more towards the end of the Disney series (2, 4, 9, 17, 18, 21, 23, 26-29, 31, 33, 35, 37, 38), but these issues include the first Uncle Scrooge story ('Christmas on Bear Mountain', 9), 'The Golden Christmas Tree' (21), 'The Lost Peg Leg Mine' (23), 'In Darkest Africa' (29) and the 'Titanic Ants' (36).~NF

Recommended: Gladstone 1-23, 26, 28, 30-33, 43, 45, 48, Disney 1-10, 13, 15, 16, 19, 20-24, 27, 29, 34, 36-38

DONNA MATRIX

Reactor: *1 issue 1993*

A pleasure android goes bad. With all the editorial bluster about the advantages of computer graphics the folk at Reactor forgot a story's also desirable. Dreadful.~FP

DONNA MIA

Dark Fantasy: *2 issues 1996*
Avatar: *3 issue miniseries 1997, 2 issue microseries ('Giant-Size') 1997*, one-shot (0) 1997, one-shot ('Infinity') 1998*

Donna Mia is all to easily lumped in with exploitative 'bad girl' rubbish published by Avatar, but is deserving of wider attention. A demoness complete with large wings, long tail and cloven feet, on Earth she is an alluring woman able to disguise any two of these attributes simultaneously. This is quite the odd series. While there's certainly elements of the old tosh afflicting almost every story about demons in comics, there's also a real undercurrent of eroticism to the work, particularly the black and white issues. Mike Kaluta produced covers for the Dark Fantasy series, while Neil Gaiman consented to be used as major story character. Unfortunately, the infinity issue apart they're the weakest issues of the run, bettered by creator Trevlin Utz's previous Donna Mia stories in *Dark Fantasies*, which are reprinted in the Avatar Giant-Size issues with new pages.~WJ

DOOFUS

Fantagraphics: *2 issues 1997-1998*

Familiar to readers of Hate where the feature ran as a back-up from 21, Doofus and his croney Henry Hotchkiss are small town ne'erdowells. They're ugly, they're stupid and they probably smell too. Author Rick Altergott treats us to choice episodes from these painfully embarrassing jerks' lives, and the result is hilarious. Doofus is a non-hip salute to 1990s slacker culture, steering clear of anything that might vaguely resemble wholesomeness or a positive role-model. The comic is also well-rooted in underground comics through its creator's devotion to EC artist and sometime pornographer Wally Wood. An acquired taste but heartily recommended.~SW

Recommended: 1-2

DOOM

Marvel: *Graphic Novel (Emperor Doom) 1987, one-shot 2000, 3 issue miniseries 2000, 3 issue miniseries ('The Emperor Returns') 2002*

Sadly nothing to do with the great computer game, but dull Dr Doom comics. The graphic novel has Doom succeed in taking over the world, but it's not what he anticipates. The one-shot, part of the Heroes Reborn series of one-shots, has a Celestial plotting against Doom. In the miniseries he has to fight his way back to Earth. It's life or death for Doom, but just a paycheck job for Chuck Dixon and Leonardo Manco. Doom recreates the world his way in the second miniseries, which is another job and another paycheck for Dixon and Manco. Lucky them, there was more money from a collection of both miniseries.~WJ

DOOM FORCE

DC: *One-shot 1993*

Shortly after Image Comics launched, Grant Morrison and assorted artists came up with this pastiche of what was then their house style. Daft superheroes with dafter names (all with trademark notification appended) were drawn in misproportioned fashion with an excess of lines and on as many preposterous pin-up pages as could be managed. All women had globular breasts and buttocks, all men were impossibly muscled, and the characters argued among themselves throughout. The writing is staccato and ludicrously dramatic, but at fifty-six pages the joke is stretched too far, and probably won't appeal if picked up cold.~FP

DOOM PATROL

DC: *Series one 39 issues (86-124) 1964-1968 (86-121), 1973 (122-124), series two 63 issues, 1 Annual, 1 Special 1987-1993*
DC/Vertigo: *24 issues (64-87), 1 Annual 1993-1995*
DC: *Series three 13 issues + 2001 to date*

The 1960s series is a largely unknown treasure. Introduced in *My Greatest Adventure* 80, the "World's Strangest Heroes" proved so popular that the title became Doom Patrol with 86. All stories to 89 are collected in a DC Archive Edition. The team consisted of a wheelchair-bound genius, Niles Caulder, The Chief, who brought together three outcasts. Hollywood actress Rita Farr, the Elasti-Girl, inhaled strange volcanic fumes that enabled her to expand or reduce her body, while adventurer Cliff Steele's body was destroyed in an accident, but his brain was saved by the Chief to be placed in a cybernetic body, creating Robotman. He was an updated version of a 1940s creation who enjoyed a long run of back-up strips for fifteen years. The strangest of them was Larry Trainor, a pilot exposed to solar rays that made him radioactive, and enabled him to release Negative Man, a radio-energy being. If a team of outcasts led by a wheelchair-bound character sounds familiar, it should be noted that the *Doom Patrol* débuted at the same time as *X-Men*. Stretching the coincidence, while the X-Men fought the Brotherhood of Evil Mutants, the first Doom Patrol tale introduced the Brotherhood of Evil. Furthermore, scripter Arnold Drake was the only contemporary DC writer to predict the later popularity of Marvel. His writing upheld DC's high standards of plotting, but the excellent interaction between the characters created a wonderful soap-opera feel separating Doom Patrol from its 1960s DC counterparts, while Bruno Premiani's artwork, wonderful as it was, maintained the more subtle DC look. *Doom Patrol* lived up to its "World's Strangest Heroes" subtitle, with many strange adversaries, the most notable being the Brotherhood of Evil. Their leader, the Brain, was an evil genius whose body died, but who lived on as dismembered brain. He used his intellect to advance the IQ of a gorilla to genius level, and named him Monsieur Mallah, and they were joined by Madam Rouge, who could remould and stretch her features. That she was French was another unusual touch. Their eventful reappearances gave the series a nice sense of continuity. 91 introduced Mento, the wealthy and clever Steve Dayton, who created a helmet giving him telekinetic powers. His interest in the Doom Patrol was purely Elasti-Girl, with whom he was madly in love. The mid-1960s issues contain lots of wisecracking jokes or situations, particularly 104, where Mento and Elasti-Girl wed, with Robotman and Negative Man trying to stop the event. These were momentary lapses of concentration, because on the whole the series was well handled. Another landmark was 99, introducing Gar Logan, the green-skinned youngster, Beast Boy, who could change into any kind of creature. In due course he was adopted by Mento and Elasti-Girl.

The most exciting soap-opera theme running through the series was the development of Madam Rouge, who fell in love with the Chief, but never escaped the influence of the Brain. The weirdness returned with a vengeance in 115-116, featuring three grotesque creatures, perhaps a precursor to things to come in the 1980s. One had an eye for a head, another had eyes only on his palms, and the last was headless with his face on his torso. This continuing strangeness probably contributed to the falling sales, but given its general nature the surprise is that *Doom Patrol* lasted so long. Editor Murray Boltinoff and artist Premiani guest-starred in 121, asking the readers to keep buying the title to keep it going. If so, the Doom Patrol would return. The plea failed, and the Doom Patrol, who sacrificed their lives to save a small community, remained dead for many years.

Reprint issues in 1973 kept the name alive, as did a brief revival in *Showcase* 94-96, establishing Robotman had survived the explosion that had killed his comrades, and introducing Celsius, who claimed to be the widow of the Chief, Tempest, and Negative Woman. The successful 1980s revival of *Teen Titans*, featured Gar Logan as Changeling, and Robotman also returned there in 13-15, having survived the explosion that killed his comrades. The 1977 team stepped into their own title in 1987, for which Paul Kupperberg wrote stories concentrating more on superheroics than weirdness. They entertained without ever being outstanding. He introduced new outcasts and reintroduced the not-so-dead Larry Trainor, his negative-being now inhabiting Negative Woman instead. This caused a lot of tension, as did Celsius' belief her husband was alive. Readers were kept guessing until The Chief revealed himself in 15, meaning everyone but poor Elasti-Girl survived their apparent death. Kupperberg ended his run in good form in 17-18, tying in with the Invasion crossover with dire consequences for a few of the cast. Of the artists, Steve Lightle brought a smooth look to 1-5, while Erik Larsen provided a more dramatic line in 6-15, when he was replaced by Graham Nolan.

It was all change with 19. Grant Morrison, with artist Richard Case, took the original concept of the Doom Patrol being the world's strangest heroes to a new level of weirdness and originality. Joining the Chief, Tempest and Robotman are Rebis, a radioactive hermaphrodite composed of Larry Trainor and physician Eleanor Poole, and Crazy Jane, with sixty-four separate personalities, each possessing a super power. 'Crawling From The Wreckage' in 19-22* magnificently establishes Morrison's *Doom Patrol*, introducing the Scissor Men, creatures who can literally cut people out of reality, and come from a plane of existence created by a bunch of philosophers. The weirdness continues with a spirit of Jack the Ripper who's out to marry the comatose Doom Patrol member Rhea Jones (from Paul Kupperberg's run). The story introduces Dorothy Spinner, a young girl with an ape-like face who gives life to characters from her imagination; not always a pleasant experience. Both stories are available in a collection. Morrison excelled himself with the creation of Mr Nobody and the Brotherhood of Dada (26-29), who transfer themselves into a painting that then swallows Paris. While there's certainly an element of style over content, Morrison is so imaginative that this is acceptable, and when he incorporates potentially touchy topics, such as Crazy Jane's childhood abuse in 30, it's sensitively handled. 31-33 is another gem, featuring the obnoxious Willoughby Kipling, a Knight Templar who brings word to the Doom Patrol that the world is going to be destroyed. The storyline features the Book of the Unwritten Verse and the men from N.O.W.H.E.R.E, who all speak in anagrams. Hours of fun for all. The Brain and Monsieur Mallah return in 34, a great black comedy, but with little respect for the original characters, and 35 introduced one of the most bizarre comic characters ever invented. Danny The Street is a sentient transvestite street with the ability to teleport itself anywhere, named after Danny La Rue, Britain's most famous female impersonator! The issue begins a plot involving the Doom Patrol in intergalactic conflict, but it's not that straightforward, as it offers the final fate of Rhea Jones. It also leads into the origin of the wonderful Flex Mentallo in 42. Originally a wimp who's had too much sand kicked in his face, Flex gains mastery of all his powerful muscles and investigates just why the Pentagon is five-sided. Facial hair haters will love 45's Beard Hunter, who kills people with beards and is after the red-bearded Chief.

Mr Nobody returns with a new Brotherhood of Dada in 49-52, where he runs for the Presidency. Well, there have been worse candidates. By this time Morrison is becoming a victim of his own success. The weirdness that had been so startling originally is becoming stale with repetition, and even change-of-pace issues such as 53's Marvel pastiche, with the Doom Patrol in the Fantastic Four role, lack bite. Events starting in 55 play with readers' preconceptions. Dire consequences are in store for the Chief and Cliff Steele with the emergence of the Candlemaker in a storyline ending in 61. Morrison leaves with 63, chronicling the final tale of his marvellous Crazy Jane character. In a text page new scripter Rachel Pollack asks how she follows genius. Well, you don't. Obviously, you try to do your own thing. Perhaps editorial pressure resulted in her pale attempts to emulate Morrison's style, but she would have been better off making the series her own and introducing an entirely different direction. 64 is the first Vertigo issue, and while Pollack's run produced some good efforts, on the whole it didn't work, a particular drawback being the continuing exposure for Dorothy Spinner's countless manifestations. Her better ideas included George and Marion, 67's Sexually Remaindered Spirits, who like shopping. Then there's 70's villain the Codpiece, a none too well endowed, penis-size-obsessed character who builds a powerful mechanical codpiece with many abilities (the fantasies are endless). That issue also introduces a young woman who's had a sex change, calls herself Coagula and has the ability to dissolve things. Not her penis, by the way, but the Codpiece wasn't so lucky. Pollack's best moment is 'The Teiresias Wars' in 75-79, an ancient conflict involving the creation of the Tower of Babel inside the Pentagon. The story is helped by the unique and refreshing artwork of Ted McKeever, whose stark stylings added to the weird nature. Pollack and McKeever end the series on a relatively high note with 'Imagine Aris Friends' in 84-87, a story with Biblical overtones about a renegade Hassidic miracle-worker trying to stop a cult of messianic magicians from destroying the world. Doom Patrol to the rescue. But not in time to save the series.

The third series is an amalgamation of the previous ones. John Arcudi is in charge of the words and illustrations are by one of the finds of the new century, Tan Eng Huat. After a rather bad start with the word 'doomed' written all over the series, it soon settles down to become an interesting read. Arcudi brings back Cliff (Robotman) Steele, introduces four young misfits with obnoxious personalities and powers and a corporate head, Thayer Jost, wants to licence the Doom Patrol to makes lots of money. When Robotman decides he doesn't want to work for a big corporation, Jost creates a new Doom Patrol, this time consisting of Beast Boy, Elongated Man, Dr Light and Metamorpho – the latter apparently dead when last seen. Matters really hot up by the end of 5 as something very interesting happens to Robotman making this a must-read series. It's not long before we're reintroduced to someone from the Morrison/Pollack Doom Patrol, so weird things become the norm. If Arcudi can keep away from monsters, demons and such like this should turn out to be an entertaining series. Tan Eng Huat's art, along with clever colouring by Dave Stewart, make the series a visual treat, though emphasis on 'big-art' sometimes makes for a very quick read. 13 begins a story with an interesting premise as the new youngsters are stuck in the bodies of the original cast, and guest-penciller, Seth Fisher again offers great art.

Overall you have a title in four parts. If you like solid 1960s-style superheroics with a subtle sense of wonder, then the original series is for you. DC are now reprinting this series in their Archive format. If, however, you like superheroics with colourful characters, powers and personalities, then the Kupperberg/Lightle/Larsen issues are for you. And if you're a budding pseudo-intellectual then the Morrison/Pollack issues are for you. Lots of hours to ponder the relevance of surrealism. And if you like a bit of mixture pick up the latest offering.~HY

Recommended: Series one 86, 87, 90, 91, 93, 96, 97, 99, 100, 104, 107, 108, 110-113, 115-119, 121, series two 19-34, 42, 45, 57, 75-79, series three 6-9

DOOM 2099

Marvel: *44 issues 1992-1996*

With Latveria crushed under the heel of a brutal tyrant, an armoured figure claiming to be Dr Doom appears, and 1-4 see him oust the incumbent and assume control. Although a technological genius, is he really the 20th-century Doom beloved of the Latverian population? 6-10 have Doom in cyberspace, which wears thin long before the end, following which there's a global tour of 2099. All stories run to a formula in which Doom gets his armoured butt kicked, but returns to triumph over adversity. It's a relief when 25 resolves the question of who Doom is. From 26 Warren Ellis portrays a more vindictive and brutal Doom, and is handed a plot that sees him assuming control of the USA. This spills over to other 2099 titles, but it's soon all change again, with Doom on the run and hunted. Then he's in 1996 to encounter current Marvel superheroes. The problem throughout is that continually changing circumstances prevent any sense of cohesiveness. New readers never have time to adjust before the desperation to appeal to a larger audience overturns everything. The final issues have extraordinary but totally out of place pencil art from Jeff Lafferty, perhaps more suited to parody than a straight superhero title.~FP

DOOM'S IV

Image: *4 issue miniseries 1994*

Grimm, Slyder, Burn and Brick (which might give you some idea of the level of creativity Rob Liefeld brought to the creation of this mess) are a team of superheroes who are in conflict with Doom's Corporation, which has the nasty habit of sending armed robots to kill them. Co-scripted by Kurt Hathaway and penciller Mark Pacella, it's not very good, although well placed as a contender for the most stupid character ever in villain Dr Lychee, whose head is an enlarged lychee. A freebie issue 1/2 was offered via Wizard, also by Pacella.~NF

DOOMSDAY + 1

Charlton: *12 issues 1975-1976 (1-6), 1978-1979 (7-12)*

After a nuclear holocaust wipes out humanity three astronauts return to Earth, team-up with a newly thawed-out caveman (but of course!) and have loads of exciting adventures. No, really. Inevitably they weren't really alone, and pretty soon their world was over-run with robots, aliens, fish-people, mutants, killer apes and crazed Russkies. It's all great fun if you are under 10, but Joe Gill's scripts are far too basic to engage an older readership, and it's left to John Byrne's crude, but engaging art to carry the day. 7-12 reprint 1-6, and what was to have been 7 was eventually printed in *Charlton Bullseye*.~DAR

DOOMSDAY SQUAD

Fantagraphics: *7 issues 1986-1987*

A retitled reprint of *Doomsday + 1* including the *Charlton Bullseye* strip, but of interest really only as a curiosity. Far more appealing are the short back-ups promoting the published Fantagraphics strips. Dalgoda and Usagi Yojimbo in 1 and 3 are fine, but the standout is Daniel Clowes' Lloyd Llewelyn in 2, a commentary on the fuss surrounding John Byrne's 1986 reworking of Superman.~WJ

THE DOOR

Epoch: *1 issue 2001*

A bio-genetically engineered clone with Adolf Hitler's brain is sent back to the Wild West, and a party from Bio-Tech including an emu and the disembodied head of Abraham Lincoln is sent to retrieve it. More a gag vehicle than a plot, there are several good laughs, but overall this is too disjointed. Excellent cover, mind.~FP

DOOR MAN

Cult Press: *1 issue 1993*
Caliber: *4 issue miniseries ('Family Secrets') 1995-1996*

Quite the inventive concept from writer Mike Leonard and artist James Lyle. The Door Man is able to open doors to the past enabling those with a guilty secret to rectify, atone for or gain an alternative perspective on what haunts them. The failure is in the presentation, which is guilty of valuing style above content. It's often unclear seemingly for the sake of being so, and occasionally over-written, but there is enough of worth to make Door Man a decent bargain box purchase.~DB

DOORWAY TO NIGHTMARE

DC: *5 issues 1978*

DC fiddled with their house mystery format, extending stories over the entire issue, but the lovely Mike Kaluta covers are the only recommendation for this otherwise ordinary title.~FP

DOPE Comix

Kitchen Sink: *5 issues 1978-1984**

A very odd concept indeed. Almost five years after underground comics had largely given up the ghost one of the few publishers to survive and thrive decided to publish a series of stories about drugs. It's not quite as narrow in scope as the title might suggest, with all sorts of illicit substances covered. Predictably enough, there's a fair amount of contributors deciding to detail hallucinogenic experiences, boring bastards one and all, and most of 1-3 are extremely self-indulgent, with little of note. The standout strip is Howard Cruse's 'The Guide' in 3, in which a group experimenting with LSD appoint one of their number to ensure there are no accidents during their trip. By contrast 4 is vastly improved. Of the previous regulars only Dan Steffan and Steve Stiles remain, both among the better artists. The new contributors include Valentino, Greg Irons, Aline Kominsky-Crumb and Michael Gilbert, whose touching tale of an acid casualty is a salutary reminder of the possible payback among the general celebration. Steffan and Stiles are back for 5, but it's probably the Reed Waller Omaha short that's of most interest in a title that had run out of puff. *All American Hippie Comics* collects most stories.~WJ

DOPIN' DAN

Last Gasp: *4 issues 1972-1973*

Ted Richards gives us Beetle Bailey with dope. A few chuckles, but don't go out of your way.~WJ

DORK

Slave Labor: *10 issues + 1993 to date*

With *Milk & Cheese* proving an unexpected success, *Dork* was issued to collect Evan Dorkin strips previously published elsewhere along with a spattering of new material. If you only liked Dorkin's work in *Instant Piano*, it's all here, for instance, but from early on new strips outweighed reprints, and from 7 it's all been almost exclusively work first seeing print here. Dorkin is best known for his rant strips, but, as has been cemented by latter-day TV writing, his strength is being an adroit comedy turn, and his talent covers most facets of humour. Gags are exemplified by a torrent of three panel gems, anecdotes by his 'Devil Puppet' stories, and there's parody, observational humour and even sitcom. That's 'The Murder Family' a satire on feeble TV comedy, with the thrust being how to dispose of the corpses accumulated by this family of psychopaths and how to throw the police off the track. Throughout it helps that Dorkin is an excellent cartoonist, and for all his reputation, there's a humanity his work. The meat of many issues, and all of 6, is 'The Eltingville Comic-Book, Science-Fiction, Fantasy, Horror and Role-Playing Club', in which four anal-retentive outsiders band together in defence and celebration of their obsessions. Although Dorkin drops a fair share of savage barbs each strip, the humour comes from an understanding of what motivates the quartet. And let's not take the moral high ground here; you're reading this book. The best is their disintegration during a twenty-four hour *Twilight Zone* marathon in 4. 7 requires particular mention for a step away from the humour as Dorkin strips himself metaphorically bare in detailing how a fractured childhood led to an aggressive personality and demons that haunt to this day. The storytelling devices used throughout are mature and inventive, and still make the point. Although only published annually, there are few people in comics producing work anywhere near as funny as *Dork*, and anyone interested in more than superheroes should sample an issue or the collection of 1-5.~FP

Recommended: 3-10

DORK TOWER

Corsair Publishing: *8 issues 1998-2000*
Dork Storm Press: *13 issues (9-21) + 2000 to date, one-shot ('The Best of') 2001, one-shot ('Swimsuit Special') 2001, one-shot ('The Dork Towers') 2002, 1 volume ('Livin' La Vida Dorka') 2002*

Matt, Igor, Ken and Carson are gamers, and this, often laugh-out-loud funny, series is a mixture of single page gag strips and longer, humorous episodes from their lives. Matt is the voice of insecurity, and has a recurring failure to date anyone that understands him. Igor is an idiot, Carson is a muskrat (literally), Ken can be as bloodthirsty as Igor and Carson, but still manages to seem above it all. The humour springs from reactions to television, cinema, computers, games, comics and conventions, compared to some of which, even Igor has some dignity. Creator, John Kovalic, has a simple, but effective, cartoon style and uses many running jokes – his biggest tease being the budding romance between Matt and Gilly, the Perky Goth (of Clan Gangrene) – Goths, of course, being another source of humour. The characters are shown playing real and imaginary games and each issue tends to have some factual games-related material, if not the rules to a whole game. *Dork Tower* began as a monthly strip in *Shadis* magazine in 1996 and has since run in several other gaming magazines including *Dragon*, *Pyramid* and *Scrye* as well as on the Web. Most of the strips that haven't been reprinted in the regular series are collected in 'Livin' La Vida Dorka'. 'The Dork Towers' collects the various strips that relate to *The Lord of the Rings* and adds a few more for good measure.

'Nodwick' by Aaron Williams and 'PvP' by Scott R. Kurtz have been regular backups from the beginning, but in later issues the series has almost become an anthology with the addition of Lethargic Lad by Greg Hyland (from 16), PS238 (from 18) and The 3 Geeks (from 19). Mark Smylie's Artesia also had a brief run in 16-18. The 'Best of' issue contains strips from 1-6, and there are three collections of material up to 17, 'Dork Covenant', 'Dork Shadows' and 'Heart of Dorkness'.~NF

Recommended: 'Dork Covenant', 'Dork Shadows' and 'Heart of Dorkness'

DORMAN'S DOGGIE

Rip-Off: *1 issue 1979*
Kitchen Sink: *1 volume 1990*

Lots of fart gags about a very needy and stupid dog, and his long-suffering owners. Funny in places and nicely drawn by Foolbert Sturgeon, but not for those who've never owned a dog. The Kitchen Sink collection gathers material from far and wide, but there's not a great difference.~DB

DOUBLE DARE ADVENTURES

Harvey: *2 issues 1966-1967*

A misguided attempt to introduce light-hearted superheroes in the wake of the *Batman* TV show. Cover feature B-Man is stung by alien bees, develops wings, increases his strength by ingesting a honey concentrate, and turns criminal. "What sheer irony... Barry E. Eames, whose very initials spell BEE, is about to reap a harvest of riches because I almost am one," he proclaims. We're not talking high concept here. Nor is that a path followed by companion feature The Glowing Gladiator, although Magicman at least aspires to competency. Better by far are the short reprints by Jack Kirby in 1, and Reed Crandall and Al Williamson in 2.~FP

* Available in a collected edition

DOUBLE DRAGON

Marvel: *6 issue miniseries 1991*

Insipid adaptation of a video game starring a duo of martial artists. The sole redeeming feature is an Art Adams cover for the second issue.~HS

DOUBLE EDGE

Marvel: *2 issue microseries 1995*

These issues partition the Punisher's first and second series, and bookend his rampage through Ghost Rider 65, Daredevil 344, Hulk 433, and Dr Strange 81. In the first issue (un-numbered, but designated 'alpha') he's captured by S.H.I.E.L.D, and while under hypnosis is convinced that S.H.I.E.L.D. head honcho Nick Fury is responsible for the death of the Castle family, thus starting the Punisher's career. A chase ensues through the above titles, before a conclusion of sorts in the 'omega' issue. The second issue's better than the first, revealing the machinations of a factor within the law enforcement agency that used Castle as a pawn, with tragic consequences. Strangely, though, the ending appears rushed.~WJ

DOUBLE HAPPINESS

Jason Shiga: *One-shot 1999*

This is an excellent study culture clash and character. The naïve Tom has grown up in Boston, completely ignoring his Chinese heritage, but when he arrives to work in San Francisco his more worldly-wise cousin Jackson takes him in, in both senses of the term. Jackson exists in a Chinese community almost autonomous of the outside world, and intimidated by this new culture it's a long while before Tom awakens to the truth of what's going on around him. Jason Shiga's cartooning is deceptively simple, yet very expressive, and he acknowledges the influence of Malaysian cartoonist Lat. Many of his minicomics are advertised in the back, and they reward investigation.~FP

Recommended

DOUBLE IMAGE

Image: *5 issues 2001*

Anthology offering two series per issue. In 'Bod' (1-4), writer, Larry Young can't make up his mind what tone to adopt for the tale of a wannabe actress turned invisible woman, trying to deal with fame. In the unfinished 'Codeflesh' (1-5), by Joe Casey and Charlie Adlard, Cam is a bail bondsman, who puts on a mask to act as a bounty hunter on his own cases. Unfortunately, his obsession with work becomes increasingly dangerous. Adlard's artwork is good, but there's little of interest in the story to bring readers back. The final strip is 'Trust Trust In Me Me' (5), a painted, would-be-clever cannibal story that neither looks good nor reads well.~NF

DOUBLE SHOT

Marvel Knights: *4 issue miniseries 2001-2002*

Four stand-alone issues, each containing two unrelated stories by different creative teams, allowing name creators to present their take on the imprint's characters. As with all such anthology endeavours, the issues are hit and miss, with few turning up anything other than exactly what you'd expect from the names on the cover. On the other hand, if you're a big fan of Joe Quesada (1), Garth Ennis (1), Grant Morrison (2), Greg Rucka (3) or Gene Ha (4) among others, what you'll find is unlikely to disappoint. Ted McKeever's Man-Thing in 2 is worth a mention for at least being sufficiently different from anything you'll find in the regular titles to be worth a look.~JC

The DOWN AND OUT DAWG Treasury Bonanza!!

Cheshire Iguana Publications: *One-shot 1993*

Collecting James Sturm's college newspaper strip from 1987 and 1988 and a story that appeared in Check-Up (about Dawg selling one of his sons to fund a bet), this is very primitive cartooning, though it's not completely without style. Cultural references abound, particularly in respect of cartoons that could be said to be related like *Dick Dastardly and Muttley* or *Deputy Dawg*. There's some fun to be had in spotting these references, but no sign of the "laughs galore" promised on the cover.~NF

Dark Horse DOWN UNDER

Dark Horse: *3 issue miniseries 1994*

Perhaps inspired by Fantagraphics' attempt to introduce Australian cartoonists to the US in *Fox Comics*, Dark Horse launched this unsuccessful anthology, featuring material of mixed quality. Rather than feeling like a showcase, there's an air of ghettoisation about the book. Far better to have included the strips in *Dark Horse Presents*. Gary Chaloner and Ashley Wood's 'The Undertaker' is the only constant across the three issues, a dark but comic story of a serial killer and his stuffed dog. Wood's scratchy, heavily inked artwork shows early promise. The highlight of the series is the episode of Bacchus in 1. Eddie Campbell tells the tale of 'That Crafty Bastard Sisyphus' in his fine, irreverent style.~NF

DP7

Marvel: *32 issues, 1 Annual 1986-1989*

Following a celestial phenomenon known as "the White Event", people all over the world start spontaneously developing powers beyond those of mortal men, though often with a painful or disfiguring cost. Desperate for help and advice, an elderly schoolteacher, a suburban housewife, an overworked doctor and several others travel to a clinic that offers assistance in coming to terms with these "parabilities". The clinic has its own plans for them, though, and when they come to light, seven of the 'Displaced Paranormals', our DP7 of the title, flee the clinic, hotly pursued by its agents. An intelligent, enjoyable read, with likeable protagonists who are refreshingly capable of being selfish and indecisive, rather than the infallible paragons favoured by most comics. Mark Gruenwald turns in the second best writing job of his career (*Squadron Supreme* being the best), and Paul Ryan's realistic, low-key art enhances the human scale of the drama admirably.~HS

DRACULA

Dell: *7 issues 1962 (1), 1966-1967 (2-4), 1972-1973 (6-8)*

The success of the sixties Batman TV show encouraged numerous new superhero comics from publishers who hadn't a clue about irony, believing stupidity to be the essential ingredient for success. Dell don't disguise the fact, producing a wholesome superhero Dracula attempting to redeem the tarnished family name. He adopts the transparent alias of Al U. Card and was able to transform himself into a bat, only ever drawn as a black outline by appalling artist Tony Tallarico. He (Dracula, not Tallarico, although the latter might have been better value) appeared in plots so dumb even 1960s school kids could pick out flaws. The nadir is 4, in which Al deals with a guy who stands on chairs wearing a sheet to scare old women into donating their savings. 1 adapted the classic 1930s Dracula film, there was never an issue 5, and 6-8 reprint 2-4, presumably in a misguided attempt to sucker in readers enjoying the contemporaneous sophistication of *Tomb of Dracula*.~FP

DRACULA: Lord of the Undead

Marvel: *3 issue miniseries 1998*

The popular 1998 *Blade* movie revolved around a number of characters introduced in *Tomb of Dracula*. This belated follow-up series, from writer Glenn Greenberg and penciller Pat Oliffe, may well have been published to help Marvel secure certain contentious copyrights. Despite the fact that 'Lord of the Undead' features a rather tasteless plot about an AIDS-like virus that destroys vampires, the comic is otherwise curiously old-fashioned in tone and execution, and is plagued by far too much stilted expository dialogue. Inker Tom Palmer, who beautifully embellished Gene Colan's pencils on most issues of *Tomb of Dracula*, does his best to maintain some kind of mood and atmosphere. Prior to this miniseries several Dracula one-shots were issued by Marvel, all featuring reprints from *Tomb of Dracula*, and dealt with under that title.~AL

The Curse of DRACULA

Dark Horse: *3 issue miniseries 1998*

Dracula wants to control the world by putting his man in the White House. Ranged against him are the usual suspects; a disparate group of individuals led by Van Helsing, seeking vengeance after a bad experience. With Dracula, is there any other kind? *Tomb of Dracula*, on which Gene Colan and Marv Wolfman originally collaborated, is considered the benchmark for Dracula in comics, but while Colan's artwork is as good as ever, Wolfman has nothing new to say.~DB

DRACULA LIVES

Marvel: *13 issues, 1 Annual 1973-1975*

A companion title to *Tomb of Dracula*, this black and white magazine mixes stories of Dracula's adventures in the past with contemporary stories and articles on Dracula films. Roy Thomas and Dick Giordano adapted the Bram Stoker original (5-9), while a whole collection of artists and writers had a go at depicting the dread Count, including Wolfman and Adams (2) telling the story of Dracula's origin, Thomas and Colan, Mike Friedrich and George Evans (7), Tony Isabella and Colan (5), and Doug Moench and Tony DeZuniga (8). *Dracula Lives* lacks any real gems and the number of different creative teams means that there's no real consistency of approach. The 1975 annual reprints material from the regular series.~NF

DRACULA VERSUS ZORRO

Topps: *2 issue microseries 1993*
Image: *2 issue microseries 1998*

Returning by ship from Europe, where he's picked up a near-mystical sword, Zorro tries to defend a fellow-passenger from the attentions of Dracula, who's looking for a new bride to keep him company during the journey. Jousting over the beautiful Carmelita, Zorro and Dracula learn a healthy respect for each other before a final showdown in Notre Dame Cathedral. Don McGregor's writing is as sparse as he gets and becomes a treatise on the nature of love and loyalty. Tom Yeates' artwork beautifully complements the script. All together, a well-characterised, suspenseful package. The Image reprise is in muddy black and white.~NF

Recommended: Topps 1-2

THE DRAFT

Marvel: *One-shot 1998*

An entirely unremarkable yarn set in Marvel's 'New Universe', populated by just dozens of superpowered characters, not the usual thousands. An explosion has destroyed Pittsburgh. Not knowing who's responsible, the government start a massive military programme to test the entire population aged under forty-five for possible superpowers in case of a war. Nightmask, prominently cover-featured, is largely redundant inside, where half a dozen new superheroes are introduced and there's a surprise about Ronnie Reagan. The continuation can be found in *The War*.~FP

DRAGON: BLOOD & GUTS

Image: *3 issue miniseries 1995*

Jason Pearson writes and draws this miniseries, relating the trials and tribulations of a childhood friend of Savage Dragon's cop buddy, Alex, as she decides to testify against her husband, a superpowered evil maniac. The art is classy and confident, but the characters struggle to achieve one-dimensional status. There is less to this than meets the eye.~HS

DRAGON CHIANG

Eclipse: *One-shot 1991*

In many respects a straightforward action adventure, Tim Truman's *Dragon Chiang* gets its edge from its black humour and grim political background. Told in a cold, detached manner, it's the tale of a truck journey from China to San Francisco via a bridge across the Bering Straits. Violent and brutal, it's everything you want and expect from Truman, in fact.~NF

DRAGON FLUX

Antarctic: *3 issues 1996*

Thanks to the sword of Ahron, Joe finds himself transported to the world of Analon, where he meets Maria and cat-woman, Trish. Unfortunately, for Joe, Melvadore wants the sword and sends his Gemini Warriors to retrieve it. This is a slight, unfinished fantasy, in a rough manga style, from creator Tyrone Ford.~NF

DRAGON KNIGHTS

Amaze Ink: *1 issue 1998*

Vincent, one of the Dragon Knights, has killed the emperor whom they are sworn to protect. Now the other knights are pursuing him on their flying dragons. But did he kill him, or is there more to this than meets the eye? We don't know, because there's only one issue and it doesn't say. At a guess, though, yes.~DB

DRAGON KNIGHTS

Tokyopop: *6 issue miniseries 2002*

Silly Dungeons and Dragons style fantasy featuring Rune, Rath, and their bewildering entourage of anachronistic fairy tale knock-offs who lightheartedly – and dim-wittedly – seek to end the depredations of the evil Dragonlord Lykouleon. Maybe it's the translation, but it seems this tries for tongue-in-cheek but only manages cutesy and glib in an instantly forgettable Manga adventure.~WW

DRAGON LINES

Marvel/Epic: *4 issue miniseries 1993, 2 issue microseries ('The Way of the Warrior') 1993-1994*

Blending ancient Chinese fables and mysticism with a plot concerning taking over the world thirty years hence is just window-dressing concealing your basic superhero punch-em-up. The second series is marginally better, probably by virtue of being shorter.~WJ

DRAGONBALL

Viz: *12 issue limited series (Part 1) 1998-1999*, 15 issue limited series (Part 2) 1999-2000*, 14 issue limited series (Part 3) 2000-2001*, 10 issue limited series (Part 4) 2001-2002*, 7 issue limited series (Part 5) 2002, 2 issues + (Part 6) 2003 to date*

Immensely and inexplicably popular series from Japan created by Akira Toriyama. It stars a small, irrepressible, and above all, super-powerful boy named Son Goku who lives for fighting, eating and having adventures. It gradually transpires that Goku is no ordinary boy. Moriyama originally based his character on the classical Chinese legend Trickster King Monkey from *Journey to the West*, and like his inspiration Goku is rude, crude and mighty. Like Monkey he can fly by sitting on a cloud. Like Monkey he has a staff and a long furry tail, and when he looks directly at the full moon he is even transformed into a gigantic breaker killer ape. The creator soon changed his mind, however, and went about retro-fitting the backstory. Thus, we eventually discover that the boy's abilities are due to his being an alien foundling from a warrior race of Chi masters, largely covered in companion title *Dragon Ball Z*.

Integral to the magical universe that he inhabits, a world of anthropomorphic talking animals, of devils and aliens, rampaging villains and wacky wise men, mad science and mystic shape changers are the seven magic Dragon Balls. If they are gathered together, the Eternal Dragon Shelling will manifest and grant a single wish to the one who collected them. Part 1 covers some of the trials and misadventures of Goku and his female companion Bulma the teen genius as they strive to beat a host of crazy rivals to the magic totems. Once the initial "shoreline" (actually a loose string of collected tales with a shared theme) ends, Goku decides to learn all he can about the martial arts and enrolls with rival

Kuririn under the obnoxious tutelage of Kame-Sen'nin, the Turtle Hermit. He trains them and enters them in the "Strongest Under The Heavens" fighting tournament before Part 3 and beyond returns to the life of Dragon Ball hunting, now that the mystic spheres are recharged, re-hidden and ready to be found again. Naturally along the way the young hero and his friends encounter secret paramilitary cadres, monsters, rival Ball hunters and deadly supervillains. The entire series is a non-stop rollercoaster of big fights, slapstick set-pieces and toilet jokes that cannot fail to enthral young boys. Irresistible for some, unintelligible for many.~WW

DRAGONBALL Z

Viz: *9 issue limited series (Part 1) 1998*, 14 issue limited series (Part 2) 1999-2000*, 10 issue limited series (Part 3) 2000*, 13 issue limited series (Part 4) 2001-2002*, 10 issue limited series (Part 5) 2002*

In Japan, Goku's adventures ran 42 volumes from 1984 to 1995 and he gradually grew up during that period. For the animation series, and therefore for the western markets, the producers chose to run two parallel series. On one hand there are the largely comedic antics of the young superboy appearing in concert with the combat-heavy exploits of the grown warrior and parent Goku Kakkarot in what seems like one continuous landscape-shattering super duel after another.

Part 1 covers the period leading up to the arrival on Earth of two aliens, Nappa and Vegeta, determined to kill Goku and destroy the world. It seems there is an energy force in the universe that beings can be trained to manipulate to give the user mighty powers. On Earth it is known as "Ki" or "Chi" and in the Dragon Ball continuity masters of this energy, usually not from Earth, are called Saiyans. As Goku grows up he eventually learns that he is from the same race as the invaders, albeit of a less pure strain. Forewarned, and knowing he cannot defeat two such powerful masters, Goku dies, and travels the Serpent Road to find and be trained by the Master of Worlds, gaining more Chi and then rushes back to life. Part 2 has his son Gohan and his friends and foes-turned-allies Piccolo, Tenshinhan, Yamcha, Chaozu and Kuririn – all immensely Chi powered themselves – fight a catastrophic holding action until he can return. No sooner does this battle end than the gathered heroes are embroiled in battles with super cyborgs and time travelling alien invaders, in a non-stop fight scene that never seems to end. Well crafted but painfully unrelenting. Even fighting gets boring eventually, but the series continues in *Shonen Jump*.~WW

DRAGONFLIGHT

Eclipse: *3 issue miniseries 1991**

Painted graphic novel adaptation by Brynne Stephens and Lela Dowling. The inevitably abridged nature of the comic-book version expurgates much of the explanation behind the story in Anne McCaffrey's original book. Avoid if unfamiliar with the novel. Flat, wooden dialogue flows like a pile of bricks.~APS

DRAGONFLY

AC: *8 issues 1986-1987**

Nancy Arazello interrupts her boyfriend Ken in the middle of a deal with a demon, and Nancy, blundering in, obtains the powers Ken wanted. The demon, being a petty sort, collects Ken's soul anyway. It's an oddball opening to a series that quickly became a routine, if not badly done, superheroine feature. After the demise of the title, with poor old Ken now a rampaging cyborg, Dragonfly could still be seen as a member of Femforce. 1-2 were collected as 'Cycle of Fire'.~HS

DRAGONFORCE

Aircel: *13 issues 1988-1989, 5 issue miniseries (Dragonforce Chronicles) 1989*

Night Wynd: 8 issue limited series ('The Early Years') 1993

Spinning off from *Dragonring*, the surviving characters shuck their fantasy adventure roots and find themselves miscast in the roles of superheroes in a laborious and slow set of stories notable only for early work from writer/artist Dale Keown. Completists only. At two stories per issue, *Dragonforce Chronicles* reprints Dale Keown drawn issues of Dragonring (10-15) and *Dragonforce* 1-4, while the Night Wynd series reprints the same material.~WW

DRAGONLANCE Comics

DC: *34 issues, 1 Annual 1988-1991*

Based on a role-playing game, à la Dungeons and Dragons, *Dragonlance* is a fantasy adventure that makes the characters 'real', therefore negating the whole point of being able to become them in the game. Mostly drawn by Ron Randall, there's really nothing good to be said about it.~NF

DRAGONRING

Aircel: *6 issue miniseries 1986, 15 issues 1986-1988*

Dragonring began as another Barry Blair mystical adventure title with characters crossing over from *Samurai* and *Elflord* swamping any individual identity. There's early art from Patrick McEown in the second series, and with 9 Dale Keown becomes penciller. His dynamic layouts are apparent from the start, and the cast is rapidly whittled down to a core group of superheroes. Keown writes from 14, and while a vast improvement over earlier issues, these are still very ordinary. 10-15 are reprinted as *Dragonforce Chronicles* 1-3, and the characters would continue as *Dragonforce*.~WJ

Tandra: The DRAGONROK Saga

Hanthercraft: *13 issues 1993-1998*

After spending twenty years on the magazine sized *Tandra*, creator Hanther switched to a comic-size publication. He retains the text and accompanying illustration format, and 1-2 are life as normal on Tandra, but thereafter the story occurs on Earth until 11. The glamorous Tremaine and General Kargor arrive attempting to locate a sword, deliberately drawing attention to themselves with a high-profile campaign establishing them as the first aliens to visit Earth. There are some good jibes at the possible reaction to extraterrestrial life, and 7's superhero parody is well handled, but without the unique background of Tandra to sustain them, Hanther's characters lose their way somewhat, and the constant nudity appears exploitative. This isn't to say the series is bad. It's very good, if largely lacking the title character, but doesn't live up to what came before. 10, however, is essential for explaining most of what Tandra was and is. After 13 Hanther became majorly enamoured with computer technology and has been devoting his time to presenting improved versions of previous stories on CD-Rom. See www.tandra.com for further details.~FP

DRAGON'S CLAWS

Marvel UK: *10 issues 1988-1989*

Written by Simon Furman, drawn by Geoff Senior, and clearly influenced by movies like *Rollerball*, *Death Race 2000*, *Star Wars* and *Mad Max*. Set in 'Greater Britain' in 8162, Dragon's Claws are Mercy, Scavenger, Digit, Steel, and leader Dragon, ex-Champions of 'The Game', a murderous free-for-all now outlawed by the World Development Council. After being 'reactivated' by an embittered Agent named Dellar, Dragon's Claws begin new careers as unwilling Government Operatives, paving the way for routine encounters with villains like The Evil Dead (2), or the first version of robot bounty-hunter Death's Head (5). Competent enough stuff, but lacking any of the imagination or sadism that made the UK *Action* future-sport strip 'Death Game 1999' such a guilty pleasure.~AL

DRAGON'S STAR

Matrix: *3 issues 1987**

Caliber: *2 issues 1994*

Based on and set in Mary Ann Bramstrup's Shonn Universe, as seen in her novel 'Courier', Dragon's Star tells the story of Chandra, a young telepath thrown into the deep end of intergalactic intrigue. A half-human, half-Shonn hybrid, Jeremy Hawke, embroils her and frontier scout Marrik

* Available in a collected edition

Hawthorne – a Dragon warrior who is strong like Stallone and charming like Connery – in a mission to prevent the destruction of the galactic empire. The story is well-crafted, with excellent artwork from Ian Carr, confidently unfolding itself, making it a dreadful shame as the black and white comics implosion of 1987 killed it stone dead. In 1992, Caliber collected 3 Matrix issues and added a previously unpublished 70 pages to complete the first story arc. At Caliber Bramstrup returned to Shonn storylines with the Empire at war with the Pandorans, major league Bad Guy species. Hawthorne and Chandra find themselves on a devastated starbase with enemy aliens closing in. Dave Cullen and Peter MacDougall fail to match the charm of Ian Carr, and it all degenerates into standard space opera.~WW
Recommended: *Dragon's Star* collection

DRAGONS IN THE MOON

Aircel: *4 issue miniseries 1990*

For once the paedophile friendly imagery in an Aircel title isn't the work of Barry Blair, unless he's using an alias. This time the guilty party is Xiao Gui, illustrating a story of three young boys naturally adept at magic attempting to outwit an evil brotherhood. It's well enough executed, but the gratuitous pictures of near naked children are inexcusable.~WJ

DRAKUUN

Dark Horse: *24 issues 1997-1999**

Karula and Rosalia are sisters, princesses of Ledomiam. When the Emperor Gustav invades, they are separated and fall into a number of dangerous situations whilst trying to forge some sort of resistance to the occupying forces. One of Gustav's generals, Kurgh, is secretly plotting to take power for himself and tries to enlist Karula's aid by giving her a mystic sword. Gustav's daughter Minerva is soon also under threat from Kurgh's plans whilst Karula and Rosalia each finds herself the object of romantic, as well as murderous, attention. This is another science-fiction epic from Johji Manabe, with action, adventure, humour and a lot of space for the many likeable characters to shine. His artwork's a splendid mix of detail, large scale and cartoon effects. Unfortunately, the final story-arc of the series has not yet been released.~NF
Recommended: 1-24

DRAWN & QUARTERLY

Drawn & Quarterly: *Series one, 10 issues 1990-1992, series two 6 issues 1994-1997, series three 2 issues + (volume 3, volume 4) 2000 to date*

The personal vision of editor and publisher Chris Oliveros shines through this anthology. Primarily a black and white publication in its first incarnation, the rotated use of the few colour pages among regular contributors worked well, and the line-up is impressive when listed. Unfortunately, early contributions are slight, seemingly pages that had been lying around for a while. Only Joe Matt's one-pagers (a selection every issue to 6) and Julie Doucet consistently shine. By the later issues the good material far outweighs the bad, with Maurice Vellekoop's vignettes on gay culture and the likes of Mary Fleener (3-7), Roberta Gregory (7, 8), David Mazzucchelli (9) and Michael Dougan (6-10) all impressing. 8-10 gave an indication of the title's future with translations of Spanish artist Marti's work, and Debbie Drechsler presaging her *Nowhere* series in 10.

The second series is even better, as longer strips gave contributors breathing space. Jacques Tardi's stories of ordinary folk caught in the madness and squalor of World War One's trench warfare are magnificent, Vellekoop continued to impress while Carol Tyler and Avril and Petit Roulet make the first relaunched issue outstanding. Baru's story of an Algerian boxer in France unwillingly caught in his homeland's struggle for independence in 4-6* is also of note. There remained, though, an editorial penchant for well produced, but deadly dull material.

Series three so far consists of two 180 page books, labelled '3' and '4' on the spine. 3 is a gem, featuring thirty pages of the inventive *Gasoline Alley* newspaper strip commemorated via covers and a strip about its creator Frank King by Chris Ware. Other contents include several strips by excellent European artists not previously widely published in English, if at all. They'll not all have universal appeal, but dull material is minimal. Particularly noteworthy are R. Sikoryak's Sprang-era Batman recast in the Dostoyevsky Comics' adaptation of *Crime and Punishment* and Hincker Blutch's vignettes about the history of boxing. The highlight, though, is the 1999 Angoulême Comics Festival's grand prize winner, as Phillipe Dupuy and Charles Berberian present the first full-length novel starring their Monsieur Jean character. All three also appear in series two, 6, and this is a well-observed social comedy as Jean comes to terms with his life while his girlfriend is reconsidering their relationship away in New York. His novel is progressing only slowly, he's encumbered with responsibility for his injured flatmate's incontinent child, and his choices are influenced by an ancient Chinese fable and a possibly fictitious story of a painter in the 1930s. In 4 Sikoryak adapts *The Scarlet Letter* with Little Lulu, there's more of Blutch's boxing stories, more *Gasoline Alley*, and harrowing recollections of Miriam Katin's childhood in revolutionary Hungary and perhaps the first mathematics based comic strips by Ron Rege. The meat of the issue is biographical snippets from the life of *Tintin* creator Hergé, drawn in an approximation of Hergé's style by Stanislas. Dealing with an often puzzling man, with assorted references to his stories, it requires the supplemental index for full comprehension, a failing from the singly named writers Bocquet and Fromental. Overall it falls short of 3, but not by much.~WJ
Recommended: Series one 5, 7, 9, series two 1, 3, 5, volume 3, 4

DRAWN & QUARTERLY Graphic Novels

Drawn & Quarterly magazine specialises in combining top foreign language strips and work from the English-speaking small press. The periodical is supplemented with both collections of compiled strips from its own pages and graphic novels, either new to the general public or reprints enhanced with previously unseen, extra material. *Just the Facts* is a compilation of strips from David Collier, compellingly crafted in the manner of Robert Crumb, and ranging from autobiography to cultural and popular history to just, plain "cool-stuff-we-should-know". Collier is a wonderful example of a creator who would still work if he were the only person left alive. Good stuff. Much of this end of the industry uses perception of the everyday as the theatre for its tales. When the narrative arena is thus restricted, the personal preference of the reader becomes paramount. Both *No Love Lost* by Ariel Bordeaux and *The Fall of Homunculus* by Pentti Otsamo deal with the lives and relationships of the arty, philosophical introspective and disenchanted – the kind of people who read this type of strip. Each brings a highly personalised, art style. Bordeaux's protagonist wants to know why her relationships don't work, and Otsamo's doesn't know how to react to his partner's unplanned pregnancy. Only the latter really works, simply on the basis that it is much better drawn.

James Sturm's *The Golem's Mighty Swing* relates a tale of the early, less enlightened days of Baseball when non-white, non-Christian sportsmen were barred from competing with "real Americans". The Stars of David are a Jewish team, barely eking out a living touring the country, when a sharp promoter makes them a degrading yet potentially lucrative offer... It's a beautifully rendered and powerfully compelling book. *Road to America*, by Baru, also uses sport as a narrative device and metaphor in an award-winning story set in Algeria in the 1950s, when the country was struggling to achieve independence from France. The story documents the bloody rise of an impoverished boxer fighting his way out of the slums to the glittering lights of Paris, in a uncompromising and mesmerising yet never overblown strip.~WW
Recommended: The Golem's Mighty Swing, Road to America

DREAD OF NIGHT

Hamilton: *2 issues 1990*

Count Robespierre is joined by the hosts of Dread of Night's equally dire sister titles, Madraven Stark from *Maggots* and Echo, the ghost who narrates *Grave Tales*. Despite the presence of artists like Gray Morrow and Gene Colan, as well as writer Nick Cuti, we should be grateful that Hamilton comics' attempts to copy the Warren black and white horror format were justly short-lived.~SW

DREADLANDS

Marvel/Epic: *4 issue miniseries 1993*

Fleeing from scavenging mercenaries in an ecologically apocalyptic future, a band of soldiers and scientists end up in what they believe is Earth's distant past. Then the aliens arrive... An uneasy blend of popular science-fiction movie influences (*Aliens, Predator, Terminator*), this never quite gels.~HS

DREADSTAR

Eclipse: *Graphic Novel 1982*
Marvel/Epic: *26 issues, 1 Annual, 1 Graphic Novel, 1982-1986*
First: *38 issues (27-64) 1986-1991*
Bravura: *6 issue miniseries 1994*
Slave Labor: *4 volumes 2001-2002*

After the 'Metamorphosis Odyssey' serial in *Epic Illustrated*, Jim Starlin switched to Eclipse for 'The Price' (reprinted as the Epic annual) and concentrated on the adventures of immortal warrior Vanth Dreadstar. He escapes to a new galaxy (having been largely responsible for destroying his old one) and falls into a cosmic war between Church (The Instrumentality) and State (The Monarchy). Starlin wrote and drew the series, which was the first released under Marvel's Epic imprint, dedicated to the idea that creators who owned their work would, of necessity, produce better quality material.

The Marvel graphic novel, fully painted by Starlin, tells of Dreadstar's arrival on the agricultural planet Delta 219 and subsequent renunciation of violence. He marries Delilah, an Instrumentality anthropologist and the only human on a world of pacifist cat-human hybrids. Becoming a farmer, he enjoys an idyllic life enlivened only by periodic nights out with Syzygy Darklock (Bishop turned wizard from 'The Price') until Monarchy soldiers sent to investigate the planet, originally a test centre for breeding genetically enhanced warriors, slaughter the entire populace. Dreadstar, Syzygy and Oedi, the last Deltan, vow to end the 200 year conflict, which has become essential to the economies of both sides.

In the regular series Vanth and his freedom fighters initiate a long term plan to end the war. Hidden forces thwart them at every turn, however, and the Instrumentality leader The Lord High Papal (a third-rate version of Starlin's earlier creation, Thanos) rapidly takes centre stage. At this point *Dreadstar* devolves into little more than yet another bunch of tights and super-fights mess, meandering along until the title moves to First. The pace picks up immediately, and many long running subplots are swiftly resolved, leading to a final confrontation in 30. 31 reveals the real origin of Dreadstar and redefines his powers for new adventures. With 32 the series enters its only really interesting period as Vanth emerges from a two year coma to find the galaxy slowly recovering from economic chaos and all his surviving friends employed as state bounty hunters tracking down war criminals. 1-6 were reprinted as *Dreadstar & Company*.

This much darker vision coincided with Starlin relinquishing the art. Peter David began writing with 41, with Angel Medina drawing, thus the first mainstream published creator-owned title in decades became indistinguishable from the work for hire comics it was touted as destined to replace. Perhaps coincidentally, it also marked a drastic plunge in quality as the series degenerated into uninspired Space Opera, involving another galaxy, another space war, cosmic gods, stellar Sargassos and even *Star Trek* parodies. It was dead long before its inevitable cancellation. David partially redeemed himself with the 1990s miniseries, illustrated by Ernie Colón, wherein Dreadstar's daughter, raised by the resurrected Lord Papal, searches for her vanished father and her origins. A strong conclusion to an incredibly erratic series. The Slave Labor books start reprinting with 'The Metamorphosis Odyssey', continuing with the Eclipse published 'The Price', then the Marvel graphic novel before beginning on the Epic run.~WW

Recommended: Dreadstar (Marvel Graphic Novel 3), 1-2, 32-40, miniseries 1-6

DREAM ANGEL

Angel: *2 issues 1997, one-shot (Dream Angel and Angel Girl) 1998*

Was the world crying out for another poorly written exploitation comic from David Campiti in 1997? Probably no more so than at any stage for his previous efforts. This barely clad busty beauty wanders the dream realm shedding clothes and sorting problems. 1 has a special guest appearance by everyone's favourite Nazi dictator, your friend and mine, give it up for the one, the only, Adolf Hitler. Crap.~FP

DREAM WOLVES

London Night: *4 issues (0-3) 1993*
Dramenon Studios: *8 issues 1994-1995*
Gothic: *One-shot ('Swimsuit Bizarre #0') 1995*

The original storyline, in the London Night issues, has Carnifex as a politician and vampire, hunted by Desiree, a werewolf, for the murder of her mother, but in the Dramenon series, Carnifex is the werewolf, driven from his wolf pack, who attacks Desiree, causing her to become a werewolf, too. While Desiree tries to come to terms with her transformation, Carnifex is attacked by a vampire and become even more dangerous. In New Orleans, with her friend, Wendy, a romance blossoms, but Carnifex is not ready to let Desiree escape. 4-5 are a crossover with another of Daniel Presedo's series, *Practice in Pain*. The artwork uses photographs or computer-generated backgrounds, mostly not very successfully as they contrast badly with the scratchy artwork. Gothic were meant to be producing a further miniseries completing the story, but nothing has yet appeared.~NF

DREAMERY

Eclipse: *14 issues 1986-1989*

This fantasy anthology is probably best remembered for carrying the earlier appearances of Donna Barr's gentleman centaur, 'Stinz', but the other features, Cathy Hill's 'Mad Raccoons' and Lela Dowling's 'Alice in Wonderland', are also charming and eminently readable.~HS

THE DREAMING

DC/Vertigo: *60 issues, 1 Special 1996-2001*

Using various characters and concepts established in The Sandman, the title is taken from Sandman's kingdom. The series begins with various stories of different lengths, by different creative teams. The best of these is Terry LaBan and Peter Snejbjerg's tale of Goldie, the pet Gargoyle belonging to Abel from the *House of Mystery* (1-3). LaBan shows a keen understanding of the characters while Snejbjerg's artwork is a pleasure. Peter Hogan and Steve Parkhouse tell the tale of a man displaced from the 1950s in 4-7, and Alisa Kwitney and Michael Zulli tell the origin of Cain (8) while Jeff Nicholson (15) describes, in his blank-face way, how Bob's blue-collar dreams lead to a suicide.

Caitlin R. Kiernan effectively becomes series writer with a Corinthian tale (17-19) and one in which raven, Matthew reverts to human form (22-24). 26-34 deal with retaliation by Abel against Cain and a sequence of shorter stories have art from Snejbjerg (27, 29), John Totleben (33) and Marc Hempel (34) amongst others. 36-38 introduce regular penciller Christian Hojgaard and are a sequel to 'The Girl Who Would Be Death', while 39's dream sequence drawn by Shawn McManus is based on 'The Kindly Ones' from *Sandman* 57-69. 39-49 are effectively one storyline, as Madelaine, the Thessalian, Nuala and Lucien struggle against the will of

Titania. Both 50 and 55 have a number of guest artists, 55 in particular gathering a diverse group of artists together, including Daniel Torres, Paul Pope, Michael Kaluta and Adam Hughes. Bill Willingham's tale of Danny Nod, library assistant, collecting fable and folklore volumes from various parts of the Dreaming, is clever and entertaining. 52-54 and 57-60, complete long-running plotlines about the Corinthian and Cain, while Steve Leialoha (56) illustrates the story of how Edgar Allan Poe's cat saved him from despair. The special by Len Wein and Brian Apthorp puts Cain on trial for the repeated murder of Abel, with an unfortunately all too obvious outcome. Kiernan and Hojgaard provide some interesting and well drawn issues, and though the scope of the series is limited by linking it closely with past storylines, this provides a steady background from which to launch into the non-continuity stories. 1-8 are collected, and a second volume reprints 15-19 and 22-25.~NF

DREAMSMITH STUDIO'S BOOK

Dreamsmith Studio: *2 issues 1998*

Dreamsmith Studio is Ben Capozzi, who wrote the three historical fantasy stories in these squarebound comics and found good artists to draw them. Kevin Sharpe is the best, obviously influenced by George Pérez, who inks his first issue cover. Sharpe draws a story of Norsemen and werewolves in both issues, and the second chapter of 'Chimera' about a druid on a mission. Richard Pollard pencils 'Anna', whose father is the greatest craftsman of olden times. Credit should also be given for the smooth inking of Chris Dreier throughout. Capozzi is a decent writer, but if there's a criticism of the stories it's that there's not enough variety to the settings. On the other hand decent fantasy comics have been few, and two years later CrossGen would prove them saleable, so it's a shame this ambitious effort floundered.~WJ

DREAMWALKER

Dreamwalker Press: *5 issues 1995-1996*
Tapestry: *6 issues 1996-1998*
Avatar: *1 issue (0) 1999, 2 issue microseries ('Carousel') 1999, one-shot ('Summer Rain') 1999, 2 issue microseries ('Autumn Leaves') 1999*

When sleeping, medical receptionist Karen Brinson has the subconscious ability to enter and interact with the dreams of others. At first this is rather a puzzling surprise, but after a real heartbreaker in 2 she seeks help in the form of her neighbour, very at home in dreams. Despite the dreams, this is very much well-characterised slice of life material, but for some the pacing of the story may seem a little slow with too many talking heads. Their loss, as this would translate well to television and novelisation. By the Tapestry issues Jenni Gregory's initially awkward art has developed well into the type of simple expressive linework practiced by Terry Moore, and the story continues to twist away from expectations. Karen has to learn how to apply her ability to real world use when the Doctor for whom she works is lost in Brazil. The conclusion occurs in the first Avatar issue, otherwise a stepping-on point, while 'Summer Rain' reprints two short stories along with a new piece serving as a taster for 'Autumn Leaves'. ~FP

Recommended: 'Carousel' 1-2

DREDD by BISLEY

Fleetway: *One-Shot 1993*

Collecting and reprinting the Judge Dredd strips produced for *Rock Power Magazine*. The art is standard Bisley stuff but the stories, produced for adult heavy metal fans and intended for simultaneous release in seven European countries are some of the simplest, not to say dumbest, tosh ever produced. They're also available as a British collection titled *Heavy Metal Dredd*.~WW

DRIPPYTOWN COMICS

The Drippytown Manufacturing Concern: *1 issue + 2002 to date*

A rather aimless collection of material in the "let's throw the comic right here!" style. The lack of direction is summed up by contrasting the heartfelt contribution of Colin Upton, bemoaning political ignorance and corporate control, with the largely nihilistic and frankly pointless strips surrounding it. Tony Millionaire is the only other notable contributor, and James Lloyd is a good cartoonist and his inside back cover strip the only other worthwhile contribution. A wasted opportunity.~WJ

Star Wars DROIDS

Dark Horse: *6 issue miniseries 1994*, one-shot 1995, 8 issues 1995**

Being consistent with the films, there's a lighter touch applied to those loveable robotic personalities R2D2 and C3PO than is present in the remainder of the Star Wars titles. The miniseries is six tales, loosely connected by the droids being entrusted with the guardianship of a young industrial heir. It's set in a period prior to their Star Wars escapades, and the later one-shot details how they came to be in service. Dan Thorsland's light adventure scripts manage little more than filling up 24 pages, and his best issue is 3 by virtue of even knocked out Ian Gibson artwork being preferable to that of Bill Hughes. Gibson also illustrates 5, written by Ryder Windham, and that's the team responsible for 1-4 of the ongoing series. Gibson's on better form here, but the story ploughs much the same ground as those in the miniseries. Jan Strnad's effort in 5-8 is far better, as the droids fall foul of an unhinged dictator in search of an enslavement drug. It's matched by much improved Hughes art, and is the only story worth reading in the series. The later *Star Wars* one-shot 'The Protocol Offensive' is a Droids tale in all but name.~FP

Tex Avery's DROOPY

Dark Horse: *3 issues 1995*

Another failed attempt to bring cartoons to life in comics. Droopy's appeal is in no small part due to the fixed hangdog expression and drone of a voice. The latter's absence reduces the impact of these already weak strips. The back-ups featuring other Avery creations similarly fail to live up to cinema cartoons.~WJ

DRUID

Marvel: *4 issues 1995*

Doctor Druid was a dated mystic dredged out of Marvel's 1950s mystery titles in the early 1980s, eventually graduating to membership of the Avengers in a desperate attempt to popularise him. Always a third-stringer, there was plenty of scope for revamping. Warren Ellis turns in a tattooed, misanthropic sociopath in an ill-advised attempt to deliver the first New-Age horror comic. A total yawner.~HS

DRUNKEN FIST

Jademan: *54 issues 1988-1992*

Titled after a form of kung-fu, this is largely an ensemble piece, prone to switching focus for issues at a time, but shares the failings of the Jademan line in general. On the positive side there's a decent amount of pages (anything up to sixty-two), and, on occasion, a little more story than other Jademan comics. The tendency though, is still towards page long sequences of kung-fu. The plot boils down to the conflict between Chek Fai and the Invincible Swordsman, as a child with a destiny, Porky, grows up as their battles occur. Populated by an imaginative cast of villains, with artwork credited to publisher Tony Wong, any issue will provide a sample of what's on offer. Try 14 with Fai's wedding.~FP

DRUUNA

Catalan: *2 volumes 1990-1992*
Heavy Metal: *7 volumes 1993-2001*

If you're into tits and ass, you'll like Paulo Eleuteri Serpieri's creation Druuna, even if you've never had an interest in post-apocalyptic interstellar shenanigans. All stories first ran in *Heavy Metal*, so if you're looking for a cheaper version the cover dates of the issue concerned are provided. What sets Serpieri's creation apart from other attempts at adventure porn is his superb draughtsmanship: the guy could draw for his country. Not only does the soft-faced, round-assed Druuna look gorgeous, everything else is beautifully

* Available in a collected edition

delineated, even the hideous zombies, rotting cities, computer rooms and grimy sewers which seem to provide the backdrop for most of her adventures. Druuna's plot is like a Russian doll – each book opens one up to find another story hidden inside. We start, in *Morbus Gravis*, originally published by Catalan, and split over two volumes (Summer 1986 and Spring 1988), with the premise that most of the population has succumbed to a mysterious plague that's turned them into hideous mutants. The few 'normal' people need a special serum to survive. Druuna has more problems than most: her lover has half mutated and she'll do whatever's necessary to get more serum and keep him from turning into a monster. Then Druuna is contacted telepathically by the mysterious Lewis, leading her on a chase to save the city from destruction. Only it isn't a city, as she discovers in *Creatura* (November 1992), when she awakens on a devastated world and falls into the grasp of a strange bunch of sex-obsessed humans, the only survivors, and is rescued by a spaceship, seemingly from another dimension. In *Mandragora* (September 1995) she realises that the spaceship isn't what it seems as its computer begins to evolve and... Well, you get the idea (and it's continued in Aphrodisia (issue 170), *Carnivora* (July 1993), and *The Forgotten Planet* (May 2001).

Making it satisfying on both fronts, Serpieri manages to balance telling a rollicking story with lots of sex, some of it quite sadistic, although the worst is cut out, making some later books a bit jerky when whole pages of violent sex are removed. Amongst the strip volumes, there are also a number of Druuna collections (*Druuna X*, *Serpieri Sketchbook*, *Obsession*, *Druuna X 2*, and *Sweet Smell of Success*), featuring essays, sketches and layouts by Serpieri, in which he discusses his "obsession" with his own character. The raunchiest are the two *Druuna* X books.~FJ

Recommended: *Morbus Gravis* 1 and 2

DUCK TALES

Gladstone: *12 issues 1988-1990*

Disney: *19 issues 1990-1991, One-shot ('Dime After Dime') 1991*

How ideas fold back on themselves. Carl Barks' Uncle Scrooge stories inspired a TV cartoon christened *Duck Tales*, which in turn ended up as a comic. 1-2 have the Disney TV animation studio adapting episodes of the show, although they turn their hands to original material after that, and there are Barks reprints feature throughout. The better issues are those concentrating on Scrooge, Huey, Dewey and Louie, and avoiding the characters created for the TV show. The well intentioned but inept pilot Launchpad McQuack grates, as does the saccharine Webbigail, although matronly housekeeper Mrs Beakly has charm. William Van Horn either writes or draws most issues from 5, and does a decent job. His stories were later collected in slim volumes clunkily titled *Walt Disney's Uncle Scrooge Adventures in Color by William Van Horn*. With Disney temporarily deciding to publish their own comics, *Duck Tales* becomes the first title to run continued stories with Disney characters (although each issue is a self-contained part of the longer story). The reprints are cut, and 1-7 detail attempts to retrieve Scrooge's number one dime from Magica De Spell, followed by another six part tale. As with the Gladstone issues, the stories are fine, but fall far short of the Barks material that inspired them. This also applies to the squarebound one-shot reprinting material written by Americans (including Michael Gilbert) for the European market.~WJ

DUCKMAN

Dark Horse: *One Shot 1990*

After an appearance in *Dark Horse Presents* 22 Everett Peck's working class slob and inept Private Eye sidles his surreal, histrionic way through a collection of sordid, shocking, surreal and bleakly funny tales. Worth a look.~WW

Recommended

DUCKMAN

Topps: 3 issue miniseries 1994 ('The Mob Frog Saga'), 5 issues 1994-1995

In the miniseries Duckman tries to join the underworld only to accidentally murder his own gang boss during his initiation. Then things really start to go wrong... Stefan Petrucha and Jay Lynch tell a yarn that's more for TV fans than comic readers. The ongoing series is based on the animated TV show. It tries, but comes off a castrated second best to the Dark Horse issue, with poorly conceived, episodic tales from Stefan Petrucha and Gary Fields.~WW

DUKE SNIDER

Magnum: *1 issue 1992*

Professional runs through the careers of Brooklyn Dodgers centre-fielder Snider and Giants pitcher Sal 'The Barber' Maglie by Joe Orsak. Hardly in depth, this first and only issue of a planned three takes Snider's life to 1949, his breakthrough year. Snider may have been the more highly regarded player, but from the brief run-through Maglie gets as the back-up it would seem he had the more interesting career.~FP

DUNCAN'S KINGDOM

Image: *2 issue microseries 1999*

Reminiscent of Wally Wood's *Wizard King*, this is a psychodrama cleverly dressed as a bigfoot sword and sorcery tale. Duncan is the stringbean protagonist who becomes a reluctant hero thanks to the mysterious Brother Patchwork. Beset by persisting dreams of a far more mundane world, Duncan is finally forced to come to terms with his reality. Unobtrusively written by Gene Yang with efficient, clearline artwork by Derek Kirk, the story is given just enough darkness and mystery to disturb with its dreamlike qualities. These guys really know what they're doing.~SW

The DUNG BOYS

Kitchen Sink: *3 issue miniseries 1996*

A disjointed anarchist romp starring Hillary and her roadmates Stickee and the silent Benji out in middle America. As they are wrecking, shooting and insulting everything in their path they meet fellow sociopaths Clyde Hayseed, Lou in her bra-top, and a degenerate circus troupe. There is no plot, just lots of destruction. Author Robb Conaway is clearly a very talented artist, but his attempt at a *Tank Girl* knock-off extends to emulating the useless, sloganistic writing style too. Pseudo-nihilistic crap.~SW

DUNGEON

NBM: *3 issues + 2002 to date*

The Dungeon is immense, capped by four towers and a little world in its own right, peopled with monsters and phantoms. Amongst other adventures in 1-2, Herbert the Duck and Marvin the Dragon pose as interior decorators in an effort to infiltrate the headquarters of the soul-eating Hooded Ones. A new adventure begins in 3, as Herbert crosses the path of Sonja the Huge and tries to learn how to be a warrior so that his Belt of Destiny will allow him to draw his sword. Each two-issue storyline is reprinted from a single volume of the original French editions by Joann Sfar and Lewis Trondheim. Something is lost in the use of grey shades instead of the riotous colours of the originals, but Sfar's zany comedy and Trondheim's terrific cartoons are still a delight.~NF

David Greenberger's DUPLEX PLANET Illustrated

Fantagraphics: *15 issues 1991-1996*

David Greenberger, toiler in a retirement home, gets residents to tell him stories or answer questions. Transcribing the responses, since 1979 he's been publishing an infrequent magazine featuring their comments and anecdotes. A cult item, the poems of one resident have been set to music by various artists, and this title has Greenberger's transcriptions illustrated by various comic artists. Notable contributors include Chris Ware (2, 15), Jason Lutes (3, 4), Peter Kuper (4, 6), Mark Martin (5, 8, 11), J.R. Williams (2, 3, 5, 7, 10, 12) and Wayno in almost every issue. The comments are occasionally surprisingly moving, but more often just wandering and pointless.~HS

DUSTY STAR

Image: *2 issues (0-1) 1997*

Dusty is a hard-hitting no-nonsense sort of woman who, for reasons unrevealed, is being warned off from visiting the town of Bradstreet by various lowlifes. Dusty rides through a traditional wild west setting but with robotic adversaries and computers that help you play poker. The first two short stories in the first issue are reprinted from Negative Burn while the third sets the scene for the regular series, of which only the first issue has so far appeared. Joe Pruett and Andrew Robinson, writer and artist respectively, lace the strip with humour and hint at an interesting story waiting to be told. Stylistically, the artwork can be compared to that of Philip Bond but that's not to suggest that it's derivative.~NF

DV8

Image: *25 issues, 1 Annual 1996-1999*
WildStorm: 8 issues (0, 26-32), 1 Annual, one-shot ('Wild Times') 1999

Designed to be an antidote to the feelgood nature of Gen13, DV8 are similarly a team of young gen-actives led by Ivana Baiul, a former government operative. She plans to use the 'Deviants' as a spoiler force against other intelligence agencies, though what this means in practice is unclear. Threshold, Bliss, Frostbite, Sublime, Evo, Powerhaus and Copycat are a nasty bunch as written by Warren Ellis (1-8*) and Mike Heisler, though as the series progresses there is growth that sees them begin to take more responsibility for themselves and their actions.

A new member, Freestyle is introduced in 11, just before Ivana's relationship with International Operations (I.O.) is put on a formal footing with her as its head (13). One team member goes mad in 14 as a result of the drugs and mind-control being used against him by Ivana, while Grifter guest stars in 18. The Slipstream storyline running in 24-25 and the 1999 DV8 and Gen^{13} Annuals concerns an alternate reality and results in a death. Another member is sacked in 26, and later apparently dies in the final story arc, which sees them fighting for independence. *DV8 Rave* and an Image Preview issue contain background information on the characters and series, as well as a short story in the case of the latter. Artists include Humberto Ramos (1,2, 4-7), Juvaun Kirby (8-13), Tom Raney (14-16) and Al Rio (19-30). All do a reasonable job but the changing styles detract from the labyrinthine elements of the plotting and, after Ramos, can't keep up with the underlying down and dirty nature of the series. It's something of a tribute to Heisler that he manages to make anyone sympathetic after the Ellis issues, but the main enjoyment is the character interaction as the team's adversaries tend to be repetitive and dull.~NF

DV8 VS BLACKOPS

Image: *3 issue miniseries 1997*

Reading their letter pages, creators Shon Bury and Dan Norton, think they've produced a minor masterpiece. Back in the real world, we have a battle between a bunch of super-powered critters and a hi-tech government team with big weapons, both trying to get their hands on some super-duper technology. Not exactly a great plot, but the art is decent, even if the high production value colouring actually confuses the eye. What really lets this down is the distasteful and unnecessary violence. There's no respect here for human life, or a decent character in either organisation. For some good to result from all the violence the teams would have to kill each other. Alas, they all survive. Who needs role models like these?~HY

DYKE'S DELIGHT

Fanny: *2 issues 1993-1995*

Collection of lesbian cartoonists, edited by Kate Charlesworth and fronted by her amazing Auntie Studs character. Other contributors include Roberta Gregory, Griselda Grislingham, Jeremy Dennis and Lucy Byatt. Funny, wry and occasionally heart-rending, but sadly currently on hiatus. It's hoped further issues are in the pipeline.~HS
Recommended: 1, 2

DYLAN DOG

Dark Horse/Bonelli: *6 issue miniseries 1999*

The adventures of paranormal investigator Dylan Dog have been enormously successful in Italy since their 1986 introduction. Conceived and written by Tiziano Sclavi, a variety of artists illustrate these 96 page paperbacks, each adorned with a Mike Mignola cover. The plots, though, are very much at odds with the largely stylish art, the occasional poetic touches being submerged in old-fashioned Hammer horror sensibilities. Dylan Dog himself often performs as if programmed, and the eccentricity of having Groucho Marx as his assistant is a joke that's expired before the end of 1, which, oddly for an introductory volume, is the poorest of the run. The best issue is 6, with Dylan wandering London at night, followed by an axe murderer, or try 2 with Andrea Venturi's Neal Adams influenced art and a disturbing tale of an artistic prodigy who's also a legless deaf mute! Credit to Dark Horse for the reasonable cover price.~FP

DYNAMITE DAMSELS

Solo: *One-shot 1976*

Not quite Roberta Gregory's début, but her first major impact on the underground comics scene. The majority of the comic concerns Freida Phelps' struggle to attain her own identity and purpose, wrestling with issues of gender politics and sexuality. Far from being didactic, however, these strips are tender, wry and moving, with Freida's self-questioning confusion being oddly endearing. The stories at the front and back of the issue are fantasies: 'Superdyke' and 'Liberatia', one a naïve power trip, the other a bitter-sweet fable about a separationist nation of women.~HS
Recommended

DYNAMO

Tower: *4 issues 1966-1967*

In *T.H.U.N.D.E.R. Agents* 1 Len Brown was fitted with a belt that made him a superman for limited periods. Main writer and artist Wally Wood took Stan Lee's 'common touch' route with the character, portraying Len as a bit of a dope, albeit an heroic one with designs on the chief's daughter Alice. All 4 issues feature stories with Wood's distinctive inks, including a memorable teaming with Steve Ditko in 1. Other pencillers include Reed Crandall in 1, Ogden Whitney in 2, and Wood's credited collaborations with his assistant Dan Adkins throughout, some of which form a loose continuity about contact with an extra terrestrial race of telepaths resolved in 4. Other artists include Mike Sekowsky and Chic Stone. The scripts manage an entertaining balance of romantic gaffes and the defeat of numerous would-be tyrants and acronymic spy organisations. The 'Weed' back-up begun by Wood in 1 and continued by George Tuska is usually funny and rounds the sixty-eight page packages out nicely. These lightweight 1960s comics remain good, clean fun.~SW

DYNAMO JOE

First: *15 issues, 1 Special 1986-1988*

Dynamo Joe's back-up strips in Mars 10-12 are reprinted in the Special, and he then shared *First Adventures* before his own title. In the future humans are one of three races peacefully cohabiting. The peace is shattered by the arrival of a seemingly invincible new race, only temporarily halted by the seventy-foot-tall Dynamo battle suits. These suits are humanoid in shape for maximum mobility for the two occupants, and have a number of potent weapons. Yup, this is the American equivalent of the Japanese robot comic. There's a well-conceived political backdrop to the ongoing conflict, with a similarity to plots later used in *Babylon 5*. Often unpredictable, but it sticks closely enough to the restrictions of its genre to ensure it'll only appeal to those already hungry for giant robot titles.~WJ

E

EAGLE

Crystal: *16 issues 1986-1988*
Apple: *7 issues (17-23) 1988-1990*
Comic Zone: *4 issue miniseries 1992*

On a world where alien contact was made in the 19th century, Crystal City is rife with corruption from the Mayor down, but Eagle is a mysterious scourge of criminal elements. There are plenty of them, ranging from a martial arts cult to assorted mutated beings and a mysterious silent juggernaut. Eagle possesses a mysterious sentient orb offering abilities such as teleportation and communion with the recently deceased, but it's only used sparingly as he has good reason to consider its intentions less than benign. Luckily he can fall back on not insignificant martial arts talents. A wealth of backstory and a rich cast permit Eagle himself to remain the cipher until his origin in 12. There's the occasional Ditkoesque quality to the art of Neil Vokes and Rich Rankin (with Adam Hughes backgrounds on 8-12), and certainly to the writing of Jack Herman. 12 concludes the first story, and subsequent issues are less satisfactory, although the never completed six part story started in 20 was an upward curve. At the time of cancellation the creators offered a synopsis of the planned conclusion to anyone who sent a stamped envelope. The miniseries moves on to other matters, but 1-12 remain the issues to read.~WJ

EAGLE:The Making of an Asian-American President

Viz: *22 volumes 2000-2001*

As the subtitle suggests, this is the story of how Senator Kenneth Yamaoka, an American of Japanese descent, declares himself a candidate for President of the United States. On one level this is the straightforward story of his struggle to how he becomes the official Democratic Party candidate and what happens during the Presidential election of 2000 (including guest appearances from the Clintons). The introduction of Japanese reporter, Takashi Jo, Yamaoka's illegitimate son forms the basis for much of the intrigue in the series and provides another voice to be offset against Yamaoka's apparently altruistic actions – only he knows Jo's true identity. Alongside the political storyline, there's a romance between Jo and Yamaoka's adopted daughter, which is threatened by allegations that she's his real daughter. There's also the mystery of whether Yamaoka is as noble as he appears to be as Jo begins to suspect that his mother's recent death was not an accident.

Creator Kaiji Kawaguchi takes the reader on a tour of American politics, illustrating how the system works on the surface and behind the scenes, covering the compromises and the media battlefields as well as the desperation of both candidates and voters. On top of all this, Kawaguchi's Yamaoka expresses a political doctrine that borders on the fascistic cult of the individual whilst espousing a desire to hand back the real decisions to an informed populace (see *Sanctuary* for similar ideals in a purely Japanese context). So, depending on how much you want out of it, this is a suspenseful political thriller, a satire on US elections or a challenge to your political beliefs.~NF
Recommended: 1-22

EARTH 4

Continuity: *Series one 3 issues 1993, series two 4 issues 1994*

A bizarre numbering system barely hides the fact that *Earth 4* is in fact *Urth 4*, although someone clearly learned how to spell in the interim. As before, the writing is barely readable, but tragically the art from Walter McDaniel (and a cast of thousands on inks) owes more to Image than to Neal Adams. Lamentable stuff, with the first series being part of the company-wide 'Deathwatch 2000' crossover.~DAR

EARTH X

Marvel: *14 issue limited series (0-12, X) 1999-2000**

Twenty years in the future, the now blind Watcher (Uatu) kidnaps X-51, teleports him to the moon and forces him to become the new Watcher of Earth. After a quick fire fast forward through Marvel Earth's pre-history in 0, X-51 is brought up to scratch and reports current events back to Uatu. In this alternate future, all humans mutated and gained super powers ten years earlier. The plot flows like treacle as the constant dialogue between Uatu and X-51 serves as the vehicle for transmitting enigmatic crumbs of information to the reader, much of which is nauseatingly repeated time after time. Yet Jim Krueger and Alex Ross's sombre, dour story delivers loving touches of Marvel's history, rendering this series unsuitable for neophytes to the Marvel canon. John Paul Leon and Bill Reinhold's artwork is muted yet strangely engaging. Most issues are backed up by five to eight page appendices containing text features that merely continue that issue's graphic story, thus giving a somewhat unfinished feeling. Sampling any individual issue provides the flavour. Thereafter it's all or nothing. *Earth X* spawned sequels *Universe X* and *Paradise X*.~APS

EAST MEETS WEST

Innovation: *1 issue 1990*

Considering so much is made of his credentials as a film storyboard artist, it might be assumed that Paul Power could tell a story. He might be able to were he not so concerned shovelling his old comic strips between portions of a new story. That story is meandering and confusing, Power's art is now competent, but hardly distinguished and only the one issue of three was published. Three strikes. Yeeeeerrrrrr out!~FP

EAT-MAN

Viz: *6 issue miniseries 1997*, 5 issue miniseries ('Second Course') 1998**

Bolt Crank is an explorer in a futuristic yet desolate world where magic and sorcery co-exist with advanced technology. He's also an adventurer for hire whose abilities are usually at the service of the underdog. There's generally a pretty girl involved somewhere, but he always ends up walking off into the sunset on his own. His greatest asset is the element of surprise that he creates by being able to transform his arm into whatever weapon he last ate. A typical panel early in the story sees him swallowing some nuts and bolts. Sharply rendered grey tones and a healthy dose of humour make this a very attractive series even if creator Akihito Yoshitomi lays on the enigma a little too heavily at times.~NF
Recommended: 'Second Course' 1-5

EATING RAOUL

Mercury Film Distribution: *One-shot 1982*

This oddity was distributed through cinemas accompanying Paul Bartel's decidedly offbeat, independent film *Eating Raoul*. Uptight Paul and Mary Brand dream of opening a restaurant, but their dream is fading until a chance encounter with a swingers party. Realising there's money to be made from sex, they lure prospective clients to their place and murder them. Their nest-egg is accumulating nicely when the scheme is rumbled by crooked lockfitter Raoul, at which point things become complex. The sexual themes apart, Bartel's script could almost be a classic Hepburn and Stewart movie. It's hilarious, and this excellent adaptation by Kim Deitch is a rare instance where a comic of his doesn't connect to his intricately contrived and interlinking stories.~FP

ECHIDNA VARIATIONS

Damn Fine!: *1 issue 1996*

For a comic which, as writer/artist Lee Brimmicombe-Wood states, was "bashed out in ten days flat", this tale of three weird characters (a man, a woman, and an anthropomorphic cat) who stumble across giant robots in the desert is surprisingly slick and accomplished looking. The content, however, is so lightweight that it would blow away if you sneezed injudiciously. Intended to be continued, but so far no second issue has emerged.~HS

ECHO

Image: *5 issues 2000-2001*

A successful American attempt at capturing the spirit of Japanese action animation with good artwork from Long Vo, stunningly enhanced by colour and effects work he creates with Charles Park. That's not to suggest the story takes second place, though. In 2044 Echos are complex holograms capable of mimicking humans in every respect, and it requires special technology to reveal the deception. A team of covert operatives is charged with this task, and the back story of each is woven into the series by writer Ken Siu-Chong. There is also an inessential zero issue, which provides extra background information for the converted, but the series was just left hanging.~FP

ECHO OF FUTUREPAST

Continuity: *9 issues 1984-1986*

Ambitious if flawed attempt to create a *Heavy Metal*-style comic. Starting with the artistic line-up of Mike Golden, Neal Adams and Arthur Suydam on 'Bucky O'Hare' (1-6), 'Frankenstein' (1-5) and 'Mudwogs' (1-5) respectively, the title seemed likely to attract a following even if Jean Teule's 'Virus' (1, 3, 4, 6, 7) and Lindley Farley and Louis Mitchell's 'Tippie Toe Jones' (1, 5-9) were less inspiring. 'AE-35' (6-9) by the little-known Tim Ryan and William Jungkuntz, a science-fiction thriller, showed promise. The real bravery of the title was in including non-US material, but deciding to colour it, presumably for commercial reasons, now seems a mistake. Though creditable, the colours hide too much of the subtlety of Toth and Bernet's work on 'Torpedo' (8, 9) and Giminez' work on 'The Damned City' (7-9). Apart from Torpedo, the real strength of the title is in its artists, and the mix of science fiction, fantasy and thrillers should have provided the variety that keeps as many readers as possible coming back for more. However, it ceased publication with 9, leaving all the stories unfinished.~NF

ECLIPSE Graphic Novels

Early on, Eclipse were innovators in seeing the idea of stand-alone works for a more mature audience, and also in bringing a number of classics to the attention of a new audience. Their graphic novel line, though, was a real hodge-podge of reprints (both of their own and other companies work from the 1940s to present day), translations and original material, produced in a number of formats that we might not easily recognise as graphic novels today. For titles also having their own series, look under that entry.

Among the most important reprint collections are *Zorro in Old California*, more swashbuckling adventures by Nedaud and Marcello, translated from the French, and *Real Love*, a collection of Simon and Kirby romance strips from the 1950s. *Fast Fiction* reprints a rather poor version of Rider Haggard's *She* by Vincent Napoli, which originally appeared in the Fast Fiction series *Famous Authors Illustrated*.

The rest of the originated material is of very mixed quality. Worth a look is *Brought to Light*, a hard-hitting political book containing two stories about American atrocities in Central America, one written by Alan Moore and the other by Joyce Brabner. The desire to instruct occasionally gets the better of the pacing, but Bill Sienkiewicz's elliptical art on Moore's script gives it subtlety. *Floyd Farland*, by a then nineteen-year-old Chris Ware, reworks his newspaper strips from *The Daily Texan*. In an Orwell-style dictatorship, Floyd is so conformist that the authorities think he's involved with a new, subversive movement, but he's immune to their brainwashing techniques because he already believes. A curiosity in light of his extraordinary later work. *Stewart the Rat* is Steve Gerber's rather unsuccessful attempt to recreate the satirical appeal of *Howard the Duck*, drawn by Gene Colan. *Sisterhood of Steel*, by Christy Marx and Peter Ledger, continues their story from Epic Illustrated about an island of female mercenaries and is pappy stuff, if prettily drawn. *Samurai, Son of Death* is a US/Japanese collaboration. Sharman DiVono (writer) and Hiroshi Hirata (artist) base their tale on 16th-century Japanese history for a story about a samurai who seems to have returned from the dead.

Finally, there are two real curiosities. *Pigeons From Hell* is Scott Hampton's adaptation of Robert E. Howard's quite awful epic poem (poetry was the very least of Howard's accomplishments, way down the list below shooting, mother-fixating and self-pitying) and XYR is a choose-your-own-plot fantasy story. It's rather like a role-playing game book, where you read different bits in different orders depending on what you feel like.~NF

Recommended: Real Love

ECLIPSE Monthly

Eclipse: *Series one 8 issues 1981-1983, series two (comic size) 10 issues 1983-1984*

High-quality mainstream anthology, with good production values and an adventure-based remit. *Eclipse Monthly* mixed superheroes and Westerns, moral tales and thrillers, and featured a star-studded line-up. Steve Ditko's 'Static', while not the work of a creator at the peak of his powers, is still a thing of wonder (series two 1-3), and Doug Wildey's complex Western, Rio (1-4, 9-10), equals Clint Eastwood's finest efforts in the genre. Steve Englehart and Marshall Rogers' Coyote appeared in series one 2-8 before spinning off into its own Epic title, and Don McGregor and Gene Colan's 'Ragamuffins' was a far-sighted attempt – with its pencil-only artwork and reflective insight into the terrors and pressures of childhood – to expand what was an acceptable topic for a comic story. Although not to everyone's taste, Trina Robbins' stylised adaptation of a neglected and rather risqué Sax Rohmer pulp, *Dope*, is sympathetically executed. Although relying on a backbone of superhero adventures (such as B. C. Boyer's *Spirit* homage The Masked Man and Mark Evanier and Mike Sekowsky's Nightingale), *Eclipse Monthly* got the best out of its contributors and is a lasting monument to the publishing company. The first series is a black and white magazine with occasional colour pages, but the second is traditional comic format.~FJ

Recommended: Series one 2, series two 1-3, 10

ECLIPSO

DC: *2 issue microseries ('The Darkness Within') 1992, 18 issues 1992-1994*

The first two issues start and finish DC's 1992 big crossover in which Eclipso, an evil, god-like creature, takes over the bodies of various superheroes in order to destroy the Earth. Like all good characters he has a major fatal flaw: light. Bruce Gordon, the scientist who unleashed Eclipso, secretly puts together a group of superheroes to fight him, while a separate team under Hawkman is infiltrated by a possessed Starman. It all ends badly for Starman and nothing is really resolved (as if we expected it to be) because Eclipso's own series was due in a few months. Not bad, as crossovers go, written by Keith Giffen and Robert Loren Fleming, drawn by Bart Sears, but equally as disappointing as they tend to be, promising much but changing little.

For the ongoing title *Eclipso* takes over the South American country of Parador, killing a lot of people in the process. Bruce Gordon puts together another Eclipso SWAT team, including The Creeper, Cave Carson and Amanda Waller (from *Suicide Squad*). Darkseid turns up to emphasise how big a bad guy Eclipso is in the DC Universe and in 11 additional heroes turn up to continue the fight against him, including Commander Steel, Dr Midnight, Major Victory, Manhunter, Nemesis, Peacemaker and Wildcat. The series tries hard to be different – Eclipso is both villain and host – but in the end it becomes another team book because Eclipso's evil is too downbeat and serious for him to carry the narrative by himself. By far the best issues are 7 and 8, Eclipso vs Sherlock Holmes, by regular writer Robert Loren Fleming and guest penciller Ted McKeever. An unlikely recipe, but it works.~NF

Recommended: 7, 8

ECTOKID

Marvel/Razorline: *9 issues, 1 Special 1993-1994*

The result of a union between ghost and human, Dex Mungo is able to walk the Ectosphere, where the deceased exist. An interesting idea, initially well handled, soon descends into a standard human-battles-demons title. The special, titled *Ectokid Unleashed*, is an improvement and ties up loose ends from the series.~FP

EDEN

Ironcat: *6 issue miniseries, 1 volume + 2002 to date*

Not quite hardcore collection of short stories, prettily produced, on subjects of sexual conquest, escape from sexual tormentors, forbidden love and temptation. The first volume collects the miniseries, but two volumes of new material are scheduled for 2003.~NF

THE EDEN MATRIX

Adhesive: *2 issues 1994*

Poorly drawn, plotted and written rubbish about hacker trapped in a computer and forced to act by rebels. The first issue is almost entirely confusing random imagery, so few will have bought the second, and time hasn't dulled the ineptitude.~WJ

EDEN'S TRAIL

Marvel: *3 issues + 2003 to date*

Very much a departure for Marvel, this, as for the first time in a decade, a new title doesn't make use of the established Marvel Universe. It's not missed either. Steve Uy, with co-plotter and scripter Chuck Austen, merges elements familiar from Westerns with science fiction standbys to create an atmospheric character driven story. So far it focuses on bar owner Tila, the enigmatic Latch, who arrives at her bar one day, and inept hold-up man Mag. There are surprises in every issue to date, and Uy's manga animation style art is well considered, although makes little use of the landscape presentation.~FP

EDGAR ALLEN POE

Eternity: *One-shot ('The Tell-tale Heart and Other Stories') 1988, one-shot ('The Masque of Red Death') 1988, one-shot ('The Pit and the Pendulum') 1988, one-shot ('Murder in the Rue Morgue and Other Stories') 1989, one-shot ('The Black Cat and Other Stories') 1989*

Adaptations of Poe's stories reprinted three per issue from Skywald's 1970s horror magazines *Scream*, *Psycho* and *Nightmare*. Without exception the material is shoddy and slapdash and should be avoided at all costs.~WW

EDGE

Bravura: *3 issues 1994*

It's difficult to present a totally new take on superheroes, but Steven Grant and Gil Kane begin with a decent attempt concerning the ages-old idea that absolute power corrupts. Intended as the harbingers of a new and better age for mankind, a group of genetically created superheroes in a world otherwise largely lacking in superpowered individuals gradually decide that might justifies their interpretation of right and wrong. The son of their creator returns in the guise of one of their dead comrades, determined to end their oppression. It's a shame the ethical motivations are swept under the carpet after the first issue, because although *Edge* is a decidedly superior superhero series it's nowhere near the comic it might have been. It is a treat, though, to see Gil Kane illustrating an out-and-out superhero strip. The concluding issue was never published.~WJ

Over The EDGE

Marvel: *10 issues 1995-1996*

What a strange concept. In 1995 Marvel recompartmentalised their titles, cleaving off a bunch of them to be labelled 'Marvel Edge', the idea being that those darker and more violent characters would henceforth have their own linked editorial structure. That being the case, it's very odd, to say the least, that this title appeared at low price (signified by some issues being subtitled "And Under A Buck") designed to attract younger readers to what was ostensibly the more mature section of the Marvel line. Daredevil is the star of 1, 6 and 10, Ghost Rider occupies 4 and 9, and there's The Hulk in 3, the Punisher in 5 and Elektra in 8. The majority of issues don't stray above average, the exception being Dr Strange's appearance in 7 (he's also in 2). It's a suspenseful and intelligent story, also featuring Nightmare, drawn by Stephen Jones, who shares the pencilling duties on the series with Robert Brown. Both provide dynamic layouts, with Brown from the school of artists whose linear over-indulgence fails to hide a multitude of defects. Jones needs to sharpen up his anatomy and liven his action shots, but is the better of the pair.~FP

EDGE OF CHAOS

Pacific: *3 issue miniseries 1983-1984*

Gray Morrow's personal view of the Gods of Olympus seen through the eyes of his latter-day Hercules, Eric Cleese. Having been set his own quest to fulfil, Eric gets the chance to meet numerous interpretations of mythical deities and creatures, all drawn in the inimitable Morrow style. The licence to depict semi-naked nymphs and goddesses must have been something of a dream come true for Morrow. His scripting, while entertaining, reads as rather corny, which doesn't detract from the sword-and-sorcery feel of the title one whit. The format and paper stock changed from issue to issue, ruining any feeling of consistency. Indeed, the colour does the title few favours.~SW

EERIE

Warren: *139 issues, 3 Yearbooks 1965-1983*

Like its sister publication *Creepy*, *Eerie* was a black and white horror magazine that differed from most Warren publications by eventually featuring serials rather than solely short stories. Unusually, the first issue was a short-press-run collection of inventory and reprint material to secure trademark on the name, so to all intents and purposes 2 was the first proper issue. The first twelve issues of *Eerie* were predominantly drawn by former EC artists, so they're full of the likes of Al Williamson, Reed Crandall and Joe Orlando. While EC alumni Johnny Craig (2, 6, 7, 11, 12, 16) and Angelo Torres (2, 3, 5, 6) excelled themselves, it was the moody wash work of Gene Colan (2-11) and Steve Ditko (3-10) that impressed the most. Of writer and editor Archie Goodwin's many fine scripts the finest was 3's 'Monument', the tale of a murderous architect, rendered in a suitably elegant and sophisticated style by Alex Toth. Dan Adkins' breath-taking work on 'The Day After Doomsday' (8), and early strips by Neal Adams (9, 10) and Jeff Jones (11, 12, 15), round out this exceptional early period.

Sadly, as with other Warren titles, the late 1960s saw a calamitous drop in quality, and from 13 to 28 the comic was a sorry mixture of reprints and mediocre new material. Issues after 29 saw a gradual improvement due to an influx of new talent such as writers Gerry Conway, Marv Wolfman and Steve Skeates, and artists Pat Boyette, Tom Sutton and Billy Graham. More significantly, however, from 34 Eerie increasingly featured work from the more technically accomplished Spanish artists such as Victor De La Fuente (35), Luis Garcia (41) and Ramon Torrents (50). Amidst the European tide American artists were still very much in evidence, more so here than in Warren's other magazines, notably Mike Ploog (35, 40), Frank Brunner (35) and Neal Adams (53).

Eerie's first series ran in most issues from 39 to 52. Esteban Maroto's beautifully drawn sword-and-sorcery epic 'Dax the

Warrior' proved popular enough despite its frankly bonkers story-line, to inspire a flood of serials. Early efforts 'Dracula', 'Werewolf' and 'The Mummy' were patchy at best, but 52-57's post-apocalyptic 'Hunter', by Rich Margopoulos and Paul Neary, heralded a golden age of continued stories. A typical Warren serial ended with the hero's death, so sequels were rare, but Neary followed up his 'Hunter' story with the equally well drawn series 'Exterminator One' in 60, 63 and 64, written by Bill Dubay, and 'Hunter II' (67, 68, 70-73), written by Budd Lewis. Other notable stories were the Sherlock Holmes pastiche 'Dr Archeus' (54-58, 60, 61) by Gerry Boudreau and Isidoro Mones, the similarly Victorian set 'Hacker' by Steve Skeates, Tom Sutton (57) and Alex Toth (65, 67) and the Greg Potter and Richard Corben collaboration 'Child', a poignant and moving exploration of the Frankenstein myth.

52-72 are overflowing with fine strips, not all of them serials, and both Berni Wrightson (58, 60, 62, 68) and Wally Wood (60, 61) produced some of the finest work of their careers here. 54 and 55 featured beautifully coloured reprints of Will Eisner's 1940s strip 'The Spirit', which proved popular enough to lead Warren to begin publishing a *Spirit* magazine. Two of this era's finest stories were Bill Dubay's superb 'Daddy And The Pie' in 64, which predated E.T. by a decade and boasted typically fine Alex Toth artwork, and Budd Lewis' 'Godeye', drawn by Leopoldo Sanchez in 68, a deliciously acerbic debunking of fantasy clichés. No-one typified the era more than the veteran Spanish artist José Ortiz, whose gloriously dark and textured drawings graced a number of continued tales. Most notable were Bruce Bezaire's violent Dr Jekyll And Mr Hyde-inspired 'Jackass' in 60, 63-65, Budd Lewis' grisly Western 'Coffin' (61, 67, 68, 70) and his masterpiece 'Apocalypse', also scripted by Lewis, in 62-65. Following editor Bill Dubay's departure with 73 the comic took a significant dip in quality, from which it never recovered.

The post-Dubay period also saw a significant move away from horror to science fiction, fantasy and even the occasional superhero strip, but though it never achieved its earlier consistency the magazine could still come up with the occasional flashes of brilliance. The team of Bruce Jones and Richard Corben produced a fine time-travel story in 'Within You, Without You' (77, 79, 87 and later to prove an inspiration for the comic *Rip in Time*), and also contributed a nice story to 90. Jim Starlin's suitably cosmic 'Darklon the Mystic' (76, 79, 80, 84, 100) boasted both fine artwork and Starlin himself committing suicide, and was later collected for a one-shot comic published by Pacific. 81 was a themed issue based around a Frank Frazetta cover, featuring contributions from Corben, Torrents and Carmine Infantino among others. More significantly, the following issue saw the first appearance of Bill Dubay and Luis Bermejo's time-travelling cowboy The Rook, which quickly came to dominate the comic. Although rarely exceptional, The Rook was at least well crafted, and while its pre-eminence robbed *Eerie* of some of its diversity, following its departure to its own title in 105 the parent magazine became badly directionless.

With the exception of the odd Russ Heath (98) and Alex Niño (87, 92, 93, 95) efforts, the Rook era's finest hours were provided by Paul Gulacy, whose 'Trespasser', written by Don McGregor in 103-105, and 'Blood On Black Satin', written by Doug Moench for 109-111, were career highpoints. More typical, sadly, were the likes of Pablo Marcos' brainless 'Beastworld' (104, 105, 107-110) and the breathtakingly blatant *Star Wars* clone 'Mac Tavish' by Bill Dubay and Pepe Moreno (95, 96, 105, 107, 109, 111). *Eerie*'s last few years were, if anything, less appealing, with half-baked space opera becoming its staple ingredient. The sole exceptions to this were Victor De La Fuente's 'Haxtur and Haggarth' stories, which ran in most issues from 111 to the comic's demise. Even here, though, the fine art was sometimes scant compensation for the poor writing. With ever-increasing numbers of reprint issues, the magazine's days were clearly numbered, though the last few issues contain a few nice surprises. There's the return of the Rook in 132, a lovely Howard Chaykin strip in 127, and, best of all, the first English translation of Paul Gillon's masterful 'Les Naufrages Du Temps' (129, 132, 134, 136).

Between 1970 and 1972 Warren issued annual reprint anthologies, which they transferred to the parent title with 42. Subsequent reprint issues collected some of the comic's most popular serials: 'Dax' (59), 'Hunter' (69), 'The Mummy' (78), 'Within You, Without You' (97), José Ortiz' 'Hard John' (106), Leopoldo Sanchez' 'Spook' (112) and 'Jackass' (115). Other reprint issues concentrate on specific artists, with Richard Corben (86), Neal Adams (125), Wally Wood (131), Ramon Torrents (133) and Steve Ditko (135) those featured. For the more casual readers any of these would provide an excellent starting point for the comic.~DAR

EGON

Dark Horse/Shok Studio: *2 issue microseries 1998*

Egon, an over-muscled, hyperactive, yet sensitive serial killer who calls himself 'Uncle Crock' mistakenly butchers the wrong victim and feels compelled to adopt her monstrous children, a situation further complicated by their grandfather's hiring a bounty-killer to avenge their mother's death. Excessively violent and blackly comic with minimal story by Tatjana wrapped in lush Simon Bisley style art from Alberto Ponticelli. Originally printed in Italy.~WW

EGYPT

DC/Vertigo: *7 issue limited series 1995-1996*

Pure filth. Incest, human excrement, zombies, murder, torture, sex, foul language, missing penises, and even more human excrement – have comics ever seen such depravity? Well, the more the better, because Peter Milligan conceived an excellent series.

Vincent Me, a selfish, self-obsessed, miserable cretin, is murdered by a group of nutters experimenting with near-death experiences, influenced by the ancient pharaohs of Egypt. Poor Vince doesn't survive the experience, but is reincarnated in ancient Egypt. And that's when all the fun starts. After taking revenge on his murderers, he's back to Egypt to become involved in various battles between gods and the like. Milligan's plot is masterful, centring on rebirth and love, and his dialogue is exceptional. He also fleshes out the personality of our protagonist with great skill, especially the references to his incestuous thoughts regarding his sister. Milligan has really excelled himself here, while the ancient Egypt of artists Glyn Dillon, Roberto Corona and Phil Gascoine is a captivating place. You can believe the brutality and depravity as the underbelly of the advanced Egyptian culture. And just when you think you've figured everything out there's a surprise revelation about *Egypt*. The only let-down is the Hollywoodish ending, where our antihero sails off into the sunset with his lover. Then again the poor lad did atone for his past (or future) mis-doings. After all, who of us is perfect?~HY

EIGHT-LEGGED FREAKS

WildStorm: *One-shot 2002*

Judging solely by Marv Wolfman's script, the film on which this is based is an attempt to apply the post-modernism of *Scream* to the ecologically driven monster genre, with knowing characterisation and plot devices. A small town falls prey to giant spiders (conveniently kept by a local expert, though this allows the filmmakers to feature many different species), after eating insects contaminated by a chemical waste spillage. To mining engineer, Chris McCormack and Sheriff, Sam Parker, childhood sweethearts, falls the task of destroying the spiders before they kill everyone. This ought to be a lot more fun, but the artwork is very clunky and unappealing.~NF

EIGHTBALL

Fantagraphics: *22 issues + 1989 to date*

The late 1980s were a golden age for quirky but intelligent cartoonists, with Chester Brown, Peter Bagge and a host of others creating funny but scary series characterised by individual world-views and killer artwork. Chief among them was Daniel Clowes. Eightball is, in Clowes' own words, "An orgy of spite, vengeance, hopelessness, despair and sexual perversion". What a pity he didn't select the title Hate, later used by Bagge, which would have suited Clowes' glowering persona, ranting diatribes and black sense of humour, always tipping over into despair, to a tee.

Clowes' drawing style lends itself to the loving depiction of the grotesque and deformed: the American heartland has rarely looked uglier than in his 'Like A Velvet Glove Cast In Iron' (1-10*). Preceding Twin Peaks, it shares the same sense of visceral whimsy. A young man becomes obsessed with an S&M film, and in trying to track down its origins, he becomes drawn into a world of mysterious symbols, crackerjack wisdom, mutant fishwomen and bizarre coincidences. It's deeply disturbing stuff, as are Clowes' violently expressed narrative dialogues. He's forever finding the unnerving in the ordinary, even when illustrating the amusing non-sequiturs of old people giving their opinion on various topics in a series of strips reminiscent of *Duplex Planet*. Even his seemingly straightforward parody of Marvel Comics, the wickedly funny Dan Pussey series*, soon turns into a bile-driven lash out at the whole of the comic industry, from Stan Lee to *The Comics Journal*.

Some readers have complained that 'Ghost World'*, Velvet Glove's replacement, the suburban adventures of two anti-fashion girls, is much too ordinary. It's not: it's superbly observed, and shot through with bitterness. Clowes manages to make juvenile cynicism fresh all over again and saw it turned into an extremely successful film in 2001, staring Thora Birch and Scarlett Johanssen. He followed it up in 19-21 with 'David Boring', the story of a young would-be artist who works as a night watchman and becomes embroiled in a noiresque sequence of murders (including his own) due to his obsessive search for the perfect woman. It's a brave work, which echoes the films of Douglas Sirk and Rainer Werner Fassbinder more than other comic projects. Brave stuff for stylish readers. Bring your own neuroses.~FJ

THE EIGHTH WONDER

Dark Horse: *One-shot 1997*

In an alternate Victorian era, where the British Empire is building a bridge across the Atlantic, an ambitious lord tries to kill a scientist whose invention may speed the construction. Cast into the depths of the bridge, the scientist is befriended by a young girl and her steam-powered robot, Archie. This European feel in content is matched in Peter Janes' literate script, which barely scratches the surface of this strange world while Kilian Plunkett's intricate pencils are reminiscent of the Schuiten Brothers. Reprinted from *Dark Horse Presents* 85-87.~NF

80 PG GIANT

DC: *15 issues 1964-1965*

DC's first attempt at mining their then almost thirty years of material. Every issue contains a sympathetically selected parade of reprints, generally from the 1950s, that represented tremendous value at the time of publication. Sadly these are no longer cheap ways of obtaining classic old stories, having a rarity value themselves through their desirability and novelty at the time. Superman stars in 1, 6 and 11, with his pals Jimmy Olsen (2, 13) and Lois Lane (3, 14) also having their own editions, along with Superboy (10) and Superman's teamings with Batman from *World's Finest* (15). Batman inhabits 5, celebrating twenty-five years, and 12, with the Flash in 4 and 9 and *Sgt Rock's Battle Tales* in 7. The best issue is the 'Secret Origins' selection in 8, reprinting *Justice League of America* 9, and backing it up with the origins of Aquaman, Atom, Robin and an expanded Superman origin story. Having confirmed the popularity of the package, DC continued to use the title for reprint selections incorporated in the runs of their more popular titles, for some reason continuing the *80 pg Giant* numbering in the logo, even when the page-count dropped to 64 pages. *JLA* 39, 48, 58, 67, 76, 85 and 93, for instance, are all labelled 80 pg or 64 pg Giants. In 2001 DC issued reprints of 4 and 8.~WJ

87TH PRECINCT

Dell: *2 issues 1962*

Based on the TV series rather than the original Ed McBain books. Detective Steve Carella is the focal point of the action. In 1 Carella and his team investigate a murderous portrait painter with the help of Steve_s deaf-mute wife Teddy and in 2 Steve works undercover to expose a heroin importer. The inside back cover features a short sermon on a heroin but the illustration has had the dropper removed so the addict appears to be staring at his arm mournfully. The first story sports Bernie Krigstein_s last artwork in comics. Thrown together for poor rates and drawn straight onto the boards for the most part. Readers nevertheless still get to see Krigstein unleashed on 32 pages. The anonymous art in 2 is peppered with signs featuring names like Fitch and Jack Sparling, members of the disbanded Jacquet shop who packaged comics for Dell in the early 1960s. The zany scripts are like nothing else in comics.~SW

EL DIABLO

DC: *16 issues 1989-1991*

Using the name of the then defunct former *All-Star Western* character, Gerard Jones turned out very worthy scripts about a young Hispanic Councilman. He's so concerned about social issues he goes out and fights crime as a non-superpowered masked adventurer, kind of a Batman with a crusading bent. Jones fails to make his hero anything much besides earnest, and Mike Parobeck's art was at this point immature and uninteresting. The best story in 13-15 concerned illegal immigration into the USA, but by the time it saw publication cancellation was inevitable.~HS

EL DIABLO

DC/Vertigo: *4 issue miniseries 2001*

This El Diablo, given the bleak Vertiginous 'spin', is in a western setting once again, but Brian Azzarello and Daniel Zezelj use the title character only as a fleeting and threatening presence, driving the protagonist, Sheriff Moses Stone, to a rendezvous with fate. It's a good story with a fine sense of inevitability, but once again bears little resemblance to any previous version.~HS

EL-HAZARD

Viz: *5 issue miniseries 2000-2001*, 5 issue miniseries (...the Magnificent World) 2001*, 5 issue miniseries 2001*

Slick fantasy wherein the ubiquitous goofy but good-looking high-school lad, Makoto Mizuhara, finds himself transported to the fabulous Arabian Fairytale land of El-Hazard. Although at first glance a mystical place, it is soon revealed to be a place of fantastic technology and deadly intrigue. There's war brewing between the Allied Kingdoms and a marauding insect race, the Bugroms. led by Makoto's high school rival Jinnai. All the royal family have super powers which slowly begin to manifest in Makoto himself, and other Earth people keep arriving and becoming empowered. As Jinnai revives the demon Goddess Ilfurita, in actuality the girl who brought them all to El-Hazard, armageddon comes ever closer and total destruction seems inevitable. Solid fantasy adventure from Hidetomo Tsubura.~WW

EL SALVADOR: A House Divided

Eclipse: *One-shot 1989*

With story and art by Bill Tulp, this is a history of El Salvador, starting before the Spanish conquest of 1524, but concentrating on events since 1976, which he illustrates using a fictional family whose members end up on both sides of the civil war. The story is told very clearly and effectively, and in a detached style that allows the events to speak for themselves. However, he weakens his credibility by never showing the rebels being anything other than merciful and disciplined. Granted, they have more incentive to behave well than the government forces do, but surely

they can behave like ordinary humans once in a while and still have a just cause? Still, well worth a read.~FC
Recommended

ELECTRIC GIRL

Mighty Gremlin: *9 issues 1998-2002**
AIT/Planet Lar: *1 issue (10) 2002*

There is a simple whimsical charm, reminiscent of Andi Watson's work, to these stories of a young girl, Virginia, able to conduct electricity. Mike Brennan isn't quite the writer Watson is, but as he develops, there's a greater sense of movement to his art. Virginia is also plagued by a friendly gremlin, apt to cause trouble around her with comical consequences, and he's the one responsible for naming her dog Blammo. In 1 and 6 there's also a three year old genius child, and Brennan frequently presents stories of Virginia at an earlier age, one of which, in 4, is the best he's yet produced. It should be stressed that despite the ability, Virginia is no crime-fighter, in fact her talent is more often more of a hindrance than gift, and her encounters with robots, zombies and fractious development scientists are far from predictable. These are good-natured stories that can be enjoyed by parents and children alike, an all too rare commodity. It's planned that future stories are issued in book format.~FP

Strikeforce Morituri: ELECTRIC UNDERTOW

Marvel: *5 issue miniseries 1989-1990*

James Hudnall and Mark Bagley re-start *Strikeforce Morituri* using the surviving characters, set ten years after the original series. When Earth was invaded by a race of aliens called the Horde, the only defence was super-powered soldiers created by a secret process that gave superpowers but killed the recipient within a year. With the war over and a fragmented planet reconstructing itself, a dead Morituri soldier manifests himself to the survivors warning Earth remains under alien control and current unrest and weird phenomena are all part of a plan to 'harvest humanity'. A pedestrian tale, padded and predictable and the open ending is tantamount to a 'to be continued' label. Very unsatisfactory.~WW

ELECTRIC WARRIOR

DC: *18 issues 1986-1987*

The rich live in the top layers of the city and have various means to keep the bottom-dwelling poor in line: from the sprinklers that spray acid to the cyborg enforcers known as Electric Warriors. This story depicts what happens when one of the Electric Warriors starts to develop self-awareness, swiftly followed by a conscience – and it's a stronger conscience than any of the humans here display. There's something bad on the way (although it's a long time before we find out what), and the city's leaders take desperate and brutal measures to defend themselves. Doug Moench has written an absorbing story, where the ideas are powerful enough to move it steadily forward, even where the issue-by-issue plotting loses focus and the dialogue creaks loudly enough to wake the whole house. The style of the artwork is set by Jim Baikie, who pencils throughout and inks 1-7. While not striking, it establishes the atmosphere and tells the story well. All in all, a sturdy piece of craftsmanship.~FC

ELECTROPOLIS

Image: *4 issues 2001-2002*

Electropolis is the Radiant City of *Mister X* a few years down the line. Menlo Park is a private investigator with a gorgeous female assistant on the trail of those responsible for the death of his partner. The twist to this parade of clichés, as his receptionist Anesta keeps reminding him, is that Menlo is a robot. The continuity skips from Park's read-outs to Anesta's diary. Mister X joins the cast in 3, which also features a summary of his series. Instead of concluding the series over three issues, everything was combined in a jumbo-sized issue 4. Dean Motter's excellent design sense is present throughout but the art is slight and hasty. We see occasional glimpses of the title city but its mostly facials and three-quarter shots. A detective-flavoured style exercise.~SW

ELEKTRA

Marvel: *4 issue miniseries ('The Elektra Saga') 1984, 8 issue limited series ('Elektra Assassin') 1986-1987, Graphic Novel (Elektra Lives Again) 1990, series one 19 issues 1996-1998, series two 18 issues + 2001 to date, 3 issue miniseries (Elektra and Wolverine) 2002*

There are certain characters you don't want to know chapter and verse about, and Elektra is one. Matt Murdock's mysterious ninja ex-lover from the pages of Daredevil was such a good character precisely because she was never explained. During his first run on Daredevil, and especially in the *Elektra Lives Again* graphic novel, writer/artist Frank Miller dealt with Elektra on an almost mythical level. And ever since, everyone's been doing their best to analyse, explain and generally make her as boring as most other costumed characters. If you want a reminder of how good Miller's initial stories were they're chopped out of the issues and pasted together with the odd framing page as *The Elektra Saga*. The graphic novel is a largely allegorical, out of continuity work, a distraught Matt Murdock lives through the resurrection and transcendent death of his beloved once more. Unfortunately it's slowly downhill from there.

Elektra Assassin has a slow-starting plot mixing real-life conspiracy theory with eastern mystical societies. Brushing aside all the ninja jiggery-pokery, reveals this is actually about disturbed minds. Miller asks questions about perception and reality, having Elektra mentally dominating a number of other characters, bouncing consciousnesses from body to body. She's partnered with Garrett, a half-cyborg criminal turned agent of S.H.I.E.L.D. with a recorder implanted in his head, who embodies the concept of nothing being as it seems. Miller uses various narrative voices to give multiple versions of 'the truth', employing showy techniques that may annoy some as much as the multiple visual styles Bill Sienkiewicz uses will annoy others. Sienkiewicz produces some stunning single images, but his experimental approach to panel layout and order often hinders the flow of the story rather than reflecting its rhythms as intended. Nonetheless it's a brave try. If you can get through the inclination of both creators to show off, this series offers plenty of action linked to intelligent concepts.

In his premise for the first ongoing series, Pete Milligan turns her into just another hyper-violent babe. Mike Deodato Jr gives her the big, globular tits, scowl and frizzy perm of your average bad girl arriviste. Having briefly skittered around her death and apotheosis at the hands of Miller for the benefit of newcomers, Milligan begins an uninteresting plot in which Elektra must work out her inner demons while seeking out the mysterious, fire-starting Architect, who's drawing the world's top assassins to NY for his own nefarious purpose. Frankly poor, especially considering what Milligan's capable of when he tries. Later creative teams get stuck in the 'inner demons' groove. The majority of her second ongoing series is also about Elektra questioning who she is and what she does, after a very shaky espionage plot. Brian Bendis' script has approximately one useful word in every twenty he commits to paper, and it's stiffly drawn by Chuck Austen, who's discovered how to draw people in shadow with light behind them and uses it continually so everyone looks like a mud zombie. By contrast, thriller writer Greg Rucka (who also wrote the tedious Elektra/Wolverine illustrated story – not a comic), turns in terse issues about a group of people Elektra's murders have affected, who band together to capture her and feed her mind-warping drugs. She fights back, but to recover she gets involved with a female sensei who, like her, used to belong to The Hand – making you wonder just how many secret martial arts societies and their rejects there are dotted around the states. It just seems to be returning to old ground so her ideals can be knocked down again and rebuilt. Entirely forgettable.~FJ

ELEMENTALS

Comico: *Series one 29 issues, 1 Special 1984-1988, Special 1989, series two 26 issues 1989-1992, Sex Specials 4 issues 1991-1992, one-shot ('Oblivion War Special') 1992, one-shot ('Ghost of a Chance') 1995, 3 issue miniseries ('Birth of a Supernation') 1995-1996, 4 issue miniseries ('How The War Was Won') 1996, 4 issue miniseries ('The Vampires Revenge') 1996*

Through a long publishing history there's a rule of thumb easily applied to *Elementals*: if creator Bill Willingham has something to do with the issue it's probably a decent read. Otherwise it's not worth bothering with. The concept was first seen in the back of the *Justice Machine Annual*, in which four ordinary humans are chosen by ancient forces to be beneficiaries of the ancient elemental powers of air, earth, fire and water. Thus, respectively, Vortex, Monolith, Morningstar and Fathom are killed, then returned to life with the new abilities. 1-22 are sprightly superhero comics, relying as much on characterisation as supervillains, although the first special, looking at child abuse, is weak. Willingham's art develops from not quite the finished article, with skimpy backgrounds, to very accomplished storytelling with an appealing style. He's helped on scripts by Jack Herman (from 6), who will later write most of the issues Willingham doesn't. For a good character piece try 14 from the first series, 9's going-public issue, or 17's decent battle. After 22 Willingham's involvement is zero, and the only decent issue is 24's offbeat tale of the team being summoned to help Peruvian revolutionaries, written by Laurence Schick, and drawn by Jill Thompson. 1-5 were collected.

The second series is launched with a special written and drawn by Willingham, who then lets Mike Leeke and Mike Chen provide most of the art. They start off a little shakily, but develop quickly (although 12 is notable for Adam Hughes filling in). Willingham's outspoken editorials in early issues are largely spot-on, and his stories the same character led sagas as previously, with former enemy Ratman now almost part of the team. There's a major surprise in 6 concerning old villain Shapeshifter, and 11 is an odd experiment in rhyme. Most issues from 10 are leading towards 'The Oblivion War', with 15's board-meeting a highlight. 16 introduces Strike Force America, but Willingham once again leaves before he completes his story, and under Herman the title wanders into cancellation. Those wanting a conclusion will find it in the miniseries 'How the War was Won'. Tony Daniel art notwithstanding, it's uninspired, as are the remaining 1996 series. Willingham returns to write 'The Vampires' Revenge', hinging on the events of issue 9 from the second series, as a vampire council convenes to try the Elementals. In no small part a Ratman solo, it lacks the spark of his earlier writing. 'Ghost of a Chance' has it, along with an Alex Ross cover, but the interior art sucks all life from a wedding story.

There are a number of unique and commendable aspects to Elementals, the first being that the characters age and change from their introduction, particularly Monolith, who starts aged fifteen. Secondly, although his characters are in many ways superhero archetypes and there's core supervillains, Willingham moves the cast through a variety of tales, with fantasy and reality based stories. He's not afraid to acknowledge his characters have a sex life either. None of the sex specials are essential reading, but effort is made to see that beyond the bonking they tie into ongoing continuity. Don't expect much in the way of a story in most, although Willingham rather comes up trumps in the first issue.~WJ

Recommended: Series one 14, 24, series two 6, 15

ELEVEN OR ONE

Sirius: *One-shot 1995*

Quite the strange item from Joseph Michael Linsner. For a start there are no women in lingerie. A down at heel artist has a strange dream and wakes up with an extra finger. To his surprise, those closest to him don't notice the difference, but he's inspired by the experience to create a career breakthrough. The whole story is a strained metaphor, but it's decently drawn. There was a second printing in 1996.~FP

ELF-THING

Eclipse: *1 issue 1987*

It's odd to imagine that this lame humour/parody title induced such laughter among the Eclipse staff that they were compelled to publish. Perhaps blackmail was involved. Oddly enough there was no glorious career in comics ahead for the creators.~FP

ELF WARRIOR

Adventure: *3 issues 1987-1988*
Quadrant: *1 issue (4) 1989*

Half-witted fantasy, with the only item lacking being a checklist to ensure all the genre clichés have been included. Peter Hsu's artwork draws lavish praise from letter column scribes, though one wonders why when he's unable to trace a pose from a wank mag accurately.~FP

ELFHEIM

Night Wynd: *4 issue miniseries 1991-1992, 4 issue miniseries ('Volume 2') 1992, 4 issue miniseries ('Volume 3') 1992, 4 issue miniseries ('Volume 4') 1992-1993, 4 issue miniseries ('Volume 5: Dragon's Dream') 1993*

This continues the Elflord series and the adventures of Hawk Erickson and his sidhe companion, Windblade. Despite the different volumes, this is an ongoing storyline about the evil sidhe, Ichi's manipulation of King Bran and the latter's replacement by Hawk, the resulting distrust of Windblade amongst Hawk's subjects and wizard, Greylone's plans to use Ichi, Windblade and another sidhe, Kibbi, to assume power himself. Barry Blair's child-like elves are still disturbing, his use of photos to avoid drawing buildings ill-judged, and his artwork and narrative simplistic, though the themes of friendship and loyalty are distinctive.~NF

ELFLORD

Aircel: *Series one 6 issues 1986, series two 30 issues 1987-1989*
Night Wynd: *4 issue miniseries ('Return of the King) 1992-1993*
WaRP Graphics: *4 issue miniseries 1997, 7 issues 1997-1998*

Touched by controversy, as was almost everything Barry Blair went near, *Elflord* was either a substandard *Elfquest* rip-off or child pornography. Whatever its intentions, it was fairly dull and uninteresting unless you're into elfy quests enough to read any old rubbish or like to see half-naked pre-pubescents. Enough readers were, it seems – as well as the relative longevity of the original, the series was reprinted as *Elflord Chronicles* (8 issues, 1990-1991) and new material was presented in a string of *Elflore* miniseries between 1992 and 1994.~JC

ELFLORE

Night Wynd: *4 issue miniseries 1992, 4 issue miniseries 1992, 4 issue miniseries 1993, 3 issue miniseries ('High Seas') 1993*

On one level these are not particularly imaginative stories about a bunch of elves and demons. On another, they're very disturbing items. Barry Blair draws all his elves as if particularly decorative pre-pubescent boys, and they're perpetually almost naked, never mind the weather or task. Extremely sordid.~FP

ELFQUEST

WaRP Graphics: *Series One 21 issues (0-20) 1978-1985*, 2 issue microseries ('Elfquest Gatherum') 1985*
Apple: *8 issue limited series ('Siege At Blue Mountain') 1986-1988**
Epic: *32 issues 1985-1988*
WaRP Graphics: *9 issue limited series ('Kings of the Broken Wheel') 1988-1990, 35 issues ('New Blood') 1992-1996, 29 issues ('The Hidden Years') 1992-1996, 6 issue miniseries ('Wavedancers') 1993-1994, 20 issues ('Blood of Ten Chiefs') 1993-1995, 12 issues ('The Rebels') 1994-1996, 12 issues ('Jink') 1994-1996, 16 issues ('Shards') 1994-1996, 5 issue miniseries ('Two-Spear') 1995-1996, 6 issue miniseries ('Khavi') 1995-1996, one-shot ('Metamorphosis') 1996, 2 issue microseries ('Kings Cross') 1997, 2 issue microseries ('Hawk and Windblade') 1997, series two 32 issues, 1 Special + 1996 to date*

However far it's wandered from the original premise, and however much the strand of fantasy that it popularised has become debased, the original *Elfquest* series is still worth a look. Wendy Pini's story of a group of elves searching for the High Ones, their legendary ancestors, features strong characterisation and a number of sharp plot twists, even though the story itself sprawls towards the latter quarter of the initial epic, never mind the innumerable spin-offs. Against this creativity, however, you must weigh the sad sight of pudding-faced eighteen year olds with painted denim jackets and characters tattooed in the place where their bicep is supposed to be.

---

* Available in a collected edition

In Cutter, the brave but youthfully indecisive elf chief, and Skywise, his older but more daring best friend, Pini created a classic buddy team. She worked hard throughout the first ten or so issues to breath life into their many tribes folk, as foolish humans burnt their forest home and drove them across the desert to the discovery of a group of sun-loving elves. In the early issues Pini was obviously feeling her way, with occasional single-issue stories and at least one plot element wound up in each chapter, rather than the longer tales more typical of the later issues. In these Cutter and his wolfriders discover first a group of less devolved elves under the influence of the evil sorceress Winnowill, who believe themselves the equals of the High Ones, and finally snow elves The Go-Backs, who're engaged in a continual battle with trolls for the mountain inside which the original elves' palace is supposed to be hidden. Later stories suggest it's actually a crashed spaceship. Throughout, the development of relationships is kept in balance with the having of adventures, and by the end of twenty issues Wendy Pini has become an accomplished heartstring-plucker.

Later series create an extremely complex continuity. First Pini continues the story of the discovery of the palace in 'Siege at Blue Mountain', but then she and numerous other writers and artists start filling in gaps. They tell stories about the wolfriders' chiefs in 'Blood of Ten Chiefs', starting with Timmoran, a high elf who turned herself into a wolf and mated with one to produce a tribe of wild elves, denying these wolfriders the longevity of other elves. To make up for their short life spans some riders take to spending long periods 'wrapped' by the preservers, annoying little fairy creatures who serve the High Ones by 'preserving' their ways. This means they can pop up during 10,000 years of elf history for various storylines about the Sun Folk. Some stories appear entirely unconnected with the main characters, in which case Winnowill will almost certainly be the missing link. The 'Wavedancers' miniseries is about underwater elves who return in the current ongoing anthology title, along with Future Quest, which follows on from 'Jink' portraying the far future where elves have disappeared and Jink, a part elven shapeshifter, wants to find out what happened to them.

By dividing the original wolf pack into several questing groups, the Pinis had an awful lot of stories going at once (and between 1994 and 1996 published a bewildering variety of mini-series that flash back and forth in time). Cutter's daughter Ember leads some riders to find a new home after the destruction of the palace in 'The Hidden Years' series, and the adventures of Cutter's old rival, the magician Rayek, are explored in 'Rogue's Story' which reappears in the current anthology title. 'New Blood' offers a selection of stories from creators new to the Elfquest universe at first, but with 11 starts a major storyline about the war between the snow elves (or Go-Backs) and the sun elves, leading into the Forevergreen stories, in which Cutter's son leads the elves to a promised paradise, only to find he's been tricked by an ageing elf kept prisoner by humans who worship him. The main problem with 'New Blood' is you never know if you're going to get a comedy or a tragedy. The main problem with all of this is that it makes it difficult for readers to penetrate the story without starting at the beginning, making *Elfquest* more a fantasy phenomenon than a comics one.

There are some other problems with the original Pini creation. Although she periodically pulls her readership up sharply and reminds them that elves are fierce, despite their doe eyes, diminutive stature and long hair, she allows altogether too much cuteness for any but the most hardened lover of ditsy fantasy. From plucking at your heart-string, she soon moves to playing showy arpeggios, and an orgy scene in 17, although hilarious, was a big mistake. If you are a fantasy fan who can, with equanimity, sit in a convention hotel bedroom at one in the morning singing about Dorsai to the tune of 'My Bonnie Lies over the Ocean' then this is probably the best comic you'll ever read. If you'd rather cut your tongue out and cauterise the stump with your Zippo than do any such thing, you probably won't be able to stomach more than a few issues, in which case the earlier the better. If you're undecided into which camp you fall and would like to try pretending to be a wolf-riding warrior in the privacy of your own bedroom, there are plenty of poems and 'filk' songs reprinted in the two gatherums (21 of the first series is also a scrapbook with poetry). Oh, and a book of bedtime stories "for young cubs, with an Elfquest twist". Oh, please.

With the latest ongoing anthology title, also called *Elfquest* just to keep everyone confused, there's an attempt to turn back the clock. 4 begins 'Dreamtime' which has Pini's original characters waking up in a wood 10,000 years after the original storyline, allowing reintroduction of the characters and a series of isolated stories about rediscovering the Elfquest world. Other major stories include 'Wild Hunt', in which a bunch of young elves sneak around the world of the humans trying to undo the evil Winnowill's magic has created, and 'Rogue's Curse', in which the dark elf Rayek battles with the spirit of Winnowill which has taken refuge inside him. The ultra-cutesy 'Fire-Eye' is solo stories about the Elfquest universe's answer to Bat-Mite drawn by Barry 'jailbait' Blair at first, and later there's 'Wolfrider', which follows the bellicose Bear Claw's adventures, some of which are drawn by Pini. Wendy Pini's art, it must be said, is great: clean, clear, bold of outline, and making good use of patterns and styles to distinguish between the different cultures the elves encounter. Within two or three issues from the off she's firmed up her style and continues to influence the many artists who now draw *Elfquest*. Most are even more fantasy/illustration-influenced that she is, except for Barry Blair. Although his elves still look like they've come from paedophile heaven, at least he knows how to get a story moving. This is more than can be said for the likes of Gary Kato, whose elves look like close relations of Yoda, or Jozef Szekeres, whose work on 'Wavedancers' is all twiddly illustration without drama or pacing. Lorraine Reyes takes the prize for making her figures look like stuffed dolls.

Elfquest is surprisingly good, particularly given its reputation. Like all good things, the more hands involved, the more watered down it becomes. Little of any lasting importance happens in strips not written by Wendy Pini, which is a useful guide to which of the innumerable spin-offs to read, but one can't help but feel that twenty great issues (reprinted by Epic over thirty two issues) and then a nice, long rest would have produced better results than this sprawling epic. WaRP graphics claim to have every Elfquest story in print in a new trade paperback series (apart from 'Wavedancers' 1-6 which can't be reprinted for legal reasons).~FJ

Recommended: Elfquest 4-6, 8-13, 17(for the comedy orgy!)

ELIMINATOR

Malibu: *4 issues (0-3) 1995*

Written by Hank Kanalz and Roland Mann and drawn by Mike Zeck, this is a meandering series about a manhunter/assassin who becomes involved with the Ultraverse's secret government organisation. Very dull, and most of note because Siren's first appearance is in 1.~NF

ELONGATED MAN

DC: *4 issue miniseries 1992*

Spinning out of the character's involvement as a member of *Justice League Europe*, this puts the stretchable sleuth, and his lovely wife Sue, in the thick of murders at a political summit. Drawn to the tiny principality of Modora, Sue is strangely intrigued by its leader, and finds herself wondering if, all those years ago, she made the right choice in her marriage.

Gerard Jones provides a charming romantic comedy about domestic disharmony and the incipient conquest of the world, while the late Mike Parobeck's illustrations evoke memories of Carmine Infantino's work without imitating it. A positive triumph, and shamefully overlooked.~HS

Michael Moorcock's ELRIC

Marvel: *Graphic Novel ('The Dreaming City') 1982*
Pacific: *6 issues 1983-1984**
First: *Sailor on the Seas of Fate 7 issue limited series 1985-1986*, Weird of the White Wolf 5 issue miniseries 1986-1987, The Vanishing Tower 6 issue miniseries 1987-1988, The Bane of the Black Sword 6 issue miniseries 1988-1989*

Michael Moorcock's albino warrior has proved an enduring fantasy-fiction character, and even diluted by adaptation it's easy to see why. He's a striking and unique figure, with the weakness that he's beset by illness and initially sustained only by a mixture of magic and drugs. The combination of frailty and regal poise is exceptionally illustrated by P. Craig Russell in the graphic novel, and the team of Russell and Michael Gilbert for the Pacific series is also appealing, if somewhat muted initially by unsympathetic reproduction. That series adapts the first Elric novel, scripted, as are all the sequels, by Roy Thomas. It might be assumed that Thomas carries baggage with him from years of handling a diametrically opposed fantasy character, Conan, but his scripts here are faithful and dramatic, conveying Elric's questioning and tormented nature.

Michael Gilbert teams with George Freeman as artists for *Sailor on the Seas of Fate*, but their art, while very good, doesn't quite match the delicacy of Russell's illustration. Sailor unites Elric with other Moorcock heroes and introduces the idea of The Eternal Champion, but it's not the strongest Elric story. The same team adapt *Weird of the White Wolf*, a chapter of which formed the Marvel graphic novel. It's summarised by Russell, and the series also includes work originally published in Epic Illustrated. By the end of the story Elric is without a kingdom and despised by his former subjects. *The Vanishing Tower* has Elric wandering the lower kingdoms, eventually ties back in with other Moorcock stories and is well and truly scuppered by Jan Duursema's art falling short of previous standards. In *The Bane of the Black Sword* it seems as if Elric has actually made amends of sorts and found peace and happiness, but what's the point of a tragic hero if into his life a little tragedy does not fall? Initially the art of Mark Pacella and Nicholas Koenig vastly improves on the previous series, but is very rushed by the end.~FP
Recommended: Elric 3-6

ELRIC

Dark Horse/Topps: *7 issue limited series ('Stormbringer') 1997**

With the jointly published 'Stormbringer', P. Craig Russell concluded the comics' adaptations of Michael Moorcock's original six-volume *Elric of Melnibone* series. Acolytes of Dead God, Darnizhaan, who wants Elric's soul-stealing sword, Stormbringer, kidnap Elric's wife Zarozinia. Retrieving her, however, simply sets Elric on the path to his own final destiny, preventing the conquest of the world by the Chaos Lords. Russell's faithful adaptation is beautifully designed; the result owes much to colourist Lovern Kindzierski (with Digital Chameleon) and letterer, Galen Showman. Using a variety of styles, though always fluidly ornate, Russell brings this epic fantasy to life, capturing every bitter twist of Elric's fate.~NF
Recommended: 1-7

Moebius' Airtight Garage: ELSEWHERE PRINCE

Marvel/Epic: *6 issue miniseries 1990*

Most of Moebius_ famous meandering serial 'Le Garage Hermetique de Jerry Cornelius' took place on an artificial planet called Hyacinth. It had various themed levels, complete with indiginous populations, where adventures could take place. This is a secret you don't find out until the end of the story. This new series is set on Hyacinth and features a local artist's search for the inscrutable protagonist of the previous series: Major Grubert, for whom the planet was made. So the nebulous draughtsman, whose drawings are by Moebius, is in search of a god-like figure we already know to be mortal. The story also follows-up on the masked Archer who featured in the original series and looks, satirically, like a superhero. The self-regarding scripts suffer from a lack of any real impetus, but the attractive artwork is by Eric Shanower with short back-ups by Moebius.~SW

ELSEWORLDS 80-pg Giant

DC: *One-shot 1999*

These alternate, continuity violating versions of DC characters follow the template set by DC's 1994 annuals and assorted one-shots. Bronwyn Carlton and Greg Luzniak's re-casting of superheroes as recording celebrities is witty, as is Chuck Dixon and Enrique Villagran's faked newspaper strip, and there's some good art from Aaron Lopresti, and Ariel Olivetti. On the downside, was the po-faced return of the Super Sons from 1970s *World's Finest Comics* really wise? The highlight is Kyle Baker's selection of nightmare scenarios for the infant Clark Kent's babysitter, beautifully drawn in an old fashioned cartoon style. Apparently a scene of Superbaby in a microwave resulted in most of the print-run being pulped prior to going on sale, only the stock for Ireland and the U.K. escaping, thus making this a very rare comic. If you only want that story, it later appeared in the *Bizarro Comics* hardback.~FP

ELSEWORLD'S FINEST

DC: *2 issue microseries 1997*

In Elseworlds DC re-interprets its heroes. Here John Francis Moore and Kieron Dwyer deliver a Batman and Superman adventure in pulp style. The plot centres around an archaeological chase between Clark Kent and Alexi Luthor to find the Kryptonian 'Godstone', picking up down-at-heel, soldier of fortune, Bruce Wayne along the way. Familiar characters and relationships are mixed up to good effect, as in the romances between Clark Kent and Talia, Bruce Wayne and Lana Lang. Good use is made of both what is canonical and what might have been. Dwyer tries hard to capture a 1920s feel, but much of the scratchiness in the artwork seems rushed rather than intended.~NF

ELVEN

Malibu: *5 issues (0-4) 1994-1995*

Elven is a female Prime, though her powers have a magical as well as a scientific basis. She spends most of her time angry at men, while Prime or Primevil turn up in most issues to fight her. Len Strazewski practically clubs readers with his moralising and there's really no indication that the series had any kind of direction. Very poor.~NF

ELVIRA'S HOUSE OF MYSTERY

DC: *12 issues, 1 Special 1986*

Although some very striking covers were produced to exploit the pneumatic assets of B-movie queen Cassandra Petersen aka Elvira, they were insufficient to disguise the fact that this was mainly stale inventory material from *House of Mystery*'s previous incarnation. Delivered much less than it promised.~HS

ELVIRA, Mistress of the Dark

Claypool: *114 issues + 1993 to date*

Licensed from the B-movie actress of the same persona, Elvira recounts the adventures of a TV horror-show hostess with minor mystic gifts, who becomes involved in one supernatural calamity after another. Despite her simple desires for home, hearth and fabulous wealth, she's constantly forced to battle to make the world safe for bad moviegoers! Unlike her DC incarnation, Claypool gets our heroine firmly into the thick of the action, with no monster so menacing that she can't send them packing with a blue-tinged retort. Occasional infelicitous art teams render an unqualified recommendation impossible, but it's seldom less than amusing, and in its earlier issues, frequently riotous. As the series passes its 100th issue – a considerable achievement in itself – shtick has solidified a little bit into routine, but the series remains a pleasant time-passer.~HS

Recommended: 1, 10, 17, 22, 26

THE ELVIS MANDIBLE

Piranha Press: *One-shot 1990*

Starting with the preposterous proposition that Elvis Presley's allure derived from his jawbone, said mandible disappears when he's buried at Graceland. It falls into the hands of a market analyst, and the remainder is one seemingly endless, seemingly stream-of-consciousness shaggy dog story. Unfortunately it's more the shaggy dog's arse than the shaggy dog's bollocks.~WJ

ELVIS SHRUGGED

Revolutionary: *3 issue miniseries 1992*

A parody of Ayn Rand's novel *Atlas Shrugged* by Patrick McCray. It's all about artistic integrity, illustrated here through the music business, with the 'real' Elvis as the warrior hero. McCray has fun assembling his two armies, putting Madonna and Stephen Sondheim (goodies), against Sinead O'Connor and Andrew Lloyd Webber (not goodies), but his wit is blunt, and he makes his point far more effectively in the editorials than in the story itself.~FC

E-MAN

Charlton: *10 issues 1973-1975*
First: *25 issues 1983-1985*
Comico: *One-shot 1989, 3 issues 1990*
Alpha: *1 issue 1994*

E-Man is a sentient energy mass who adopts human form on arriving on Earth, where he meets full-time student and part-time exotic dancer Nova Kane. Written and drawn with a comic lightness by Nicola Cuti and Joe Staton respectively, the Charlton series is a lot of fun, with Plastic Man an obvious influence. E-Man being able to transform into any object sentient or otherwise gives Staton the opportunity for plenty of visual asides, and Cuti packs a lot into sixteen pages, sometimes achieving an unexpected poignancy in what is an offbeat superhero strip. Michael Mauser, a private eye giving the term 'seedy' a bad name, is introduced in 3, proving popular enough to run in a series of back-ups (also by Cuti and Staton) in the otherwise banal *Vengeance Squad*, and a one-shot in 1991. In 8 Nova is transformed, making her an equal partner rather than the admittedly spunky female who is nonetheless abducted too often. After cancellation E-Man continued to appear in *Charlton Bullseye*. The Charlton series also contains some notable back-ups. Steve Ditko obviously enjoyed himself lampooning liberal ideas by way of excessive exaggeration in 'Killjoy' (2 and 4), and Rog 2000 (6, 7, 9, 10) was also popular. Created by John Byrne at the start of his career, Rog is a robot cab driver who interacts with the world as if he's human. As scripted by Cuti, there's the same whimsical nature that characterised the lead strip, and there was later a collection. 1-6 were coupled with the Mauser strips by First for a mid-1980s series titled *The Original E-Man* and *Michael Mauser*.

E-Man was a welcome revival from the then fledgling First line, but the editorial judgement was misguided. E-Man was flexible enough to cope with parodying other comics, and the joshing of X-Men in 2-3 was among the earliest and best of such stories, but the idea wore thin after a while, and neither Staton nor new writer Martin Pasko showed much enthusiasm for it. Matters improved when Staton began writing with 11. The parody element diminished, and his was a more sympathetic touch. 24 saw the return of Nic Cuti, who had been the first choice for the revival, but he was prevented from writing by other commitments. His début is the outstanding issue of the First run. Dying from gunshot wounds, Mauser relates the story of his early, and defining, years, his character cemented in Vietnam. It's a masterful personality study from Cuti, and it's to Staton's credit that drawing in cartoon style doesn't detract in the slightest from the tragic events. The final First issue introduces E-Man's sister – in as much as sentient energy can have a sister – Vamfire. She's his opposite in all respects, but mischievous as opposed to dastardly.

The Comico one-shot reintroduces all the characters in a surreal story, and restores Nova's powers, lost in the First issues, but the highlight is the Mauser back-up strip concerning a missing child. The following three issues can be read independently, but contain a continuing plot about E-Man's search for his mother. They're a return to the light-hearted tales of the Charlton series, but Vamfire is unnecessary, and extra pages make the story drag. The Alpha Productions issue is more of the same.~FP

Recommended: Charlton 3, 7, First 24

EMBLEM

Venus: *8 issues 1994-1995*

Profoundly disturbing stories by Kei Taniguchi, translated from Japanese, all twinning sex and violence. Themes in 1-6 include classroom rape, humiliation and murder. Astoundingly, the story starring in 6 and running for the remaining issues raises the level of nastiness several notches higher, portraying the abduction and brutal degradation of a schoolgirl. It's preceded by a warning that it's not intended to arouse, but rather to "portray the repercussions of certain behaviour", which is frankly, bollocks. Taniguchi is an excellent expressive artist, and while resolutely unpleasant, the story could have been told with subtlety rather than explicitly presented with all frills and bows. This is about as extreme and unpleasant a path as comics for the US market have trodden, and the questions have to be asked about anyone who'd want to read it for pleasure.~FP

EMERALD DAWN

DC: *6 issue miniseries 1989-1990*, 6 issue miniseries 1991**

Of all the late 1980s DC revamps, Green Lantern initially got one of the better deals. Rather than riding wholesale over his past history, these two miniseries are more a 'Year One' and 'Year Two' for the character, bringing his origin up to date without doing anything to upset long-term fans too much. Apart from his being given a drink problem, Hal Jordan's origin remains largely unchanged. The second series has more of its own story to tell. Hal is behind bars for drink-driving, but that doesn't stop him using the power ring to slip out whenever he feels he's needed, which turns out to be mostly when Sinestro (not yet a recognised villain) comes calling, looking for help in controlling the society he has bullied into worshipping him. The last issue, featuring the trial of Sinestro, poses some interesting questions on the Guardians' self-appointed right to interfere with the Universe.~JC

The Pirate Queen EMERALDAS

Eternity: *4 issue miniseries 1990-1991*

An absorbing and well conceived tale removing Emeraldas from the pages of *Captain Harlock* and presenting her with a series of moral dilemmas on a remote planet. On one level about emotional repression, but more prosaically concerning slave trading and planetary destruction, Robert Gibson delivers a bleak script well illustrated in manga style by Ben Dunn and Tim Eldred.~WJ

Recommended: 1-4

EMERGENCY

Charlton: *4 issues 1976*

The day to day adventures of John Gage and Roy DeSoto of Rampart Emergency Squad 51, adapted from the TV series by Joe Gill. John Byrne devotees may find his early artwork in 1 interesting. Otherwise crudely printed and unremarkable.~SW

EMPIRE

Image/Gorilla: *2 issues 2000*

Golgoth is the Emperor of the world, having used teleportation to conquer it. He keeps his ministers on a short leash, addicted to a drug called Eucharist, but shields his young daughter from outside influences, ensuring that the true nature of his rule is kept from her. Written by Mark Waid and drawn by Barry Kitson, it's well constructed, but not involving. The two issues published don't indicate much about the series' direction though there is a hefty cast and abundant plot threads.~NF

EMPIRE LANES

Northern Lights: *4 issues 1986-1987**
Comico: *1 issue 1989*

A group of stock fantasy characters, including the princess, the dwarf, the knight and the priest, transport themselves to Earth, arriving in the Empire Lanes bowling alley. They're an engaging bunch, but the innovative setting remains largely unexplored beyond a few skirmishes with the local gangs, and even then they're possessed by other-worldly demons. Writer and artist Peter Gross seemed to be pacing his story as a novel, but it was never concluded.~FP

EMPTY LOVE STORIES

Slave Labor: *2 issues 1994-1996*
Funny Valentine Press: *1 Special, 1 issue 1998-1999*

A hilarious, skilfully crafted parody of the old DC style of romance stories with dilemmas only slightly more ridiculous than those found in the originals. How can a socialite beauty and a zombie find happiness together? How can you make a comatose trauma victim fall in love with you? Steve Darnall's stories, effortlessly invoking the spirit of the originals, are lovingly illustrated by Rob Walton, Colleen Doran, Hilary Barta and other classy delineators. Most of the stories are entertaining, but a couple stand out; 'Betraying the Master Race', and 'Love Behind Bars', both from the 1998 Special, work both as parody and as edgier, thought-provoking narrative, while the uproarious cover by Ty Templeton doesn't hurt, either. For a while it looked like an issue of *Empty Love Stories* would be our annual 'treat', but sadly, that didn't come to pass, and the title is much missed. Funny Valentine Press also issued reprints of the Slave Labor issues~HS
Recommended: Slave Labor 1-2, Special, Funny Valentine 1

EMPTY SKULL COMICS

Fantagraphics: *One-shot 1996*

In his introduction to this collection of Gerald Jablonski's work Jim Woodring sums it up brilliantly, writing "his comics have the hard-glass veneer of isolated intellect that distinguishes the product of a bona fide lunatic". Here's a world where Farmer Ned treats his pig to a drive-in movie, and a Martian schoolgirl is taught by an ant. The strips fall into three categories. The Farmer Ned material is laugh out loud funny, with the earnest Ned's recollections of truculent and misbehaving animals. There's a wonder of detail about a series of wordless strips about a bulgy-eyed kid and his accident-prone normal friend, but the final category falls flat. There are almost two dozen wordy one page strips about a father, quizzing his daughter about school. With the snappy dialogue Jablonski seems to be aiming at a Marx Brothers effect. It raises a smile the first time, but repetition seriously dulls the premise.~FP

EMPTY ZONE

Sirius: *4 issue miniseries ('Under Dead Television Skies') 1998*, 8 issues 1999-2000, 2 issues ('Conversations with the Dead') + 2002 to date*

The Empty Zone is an electronic 'Big Brother', established in 2018. Corinne is one of seven Tracers, a secret team created for retrieval of data using "micro-neural processing import storage implants". After killing her own team (under orders), Corinne becomes a target herself. In 'Under Dead Television Skies', Banx helps Corrine against a human form of the Empty Zone. The regular series is initially set several years before the miniseries, though by 6, with Corrine's conscience plaguing her, we appear to be back in her present, hired to retrieve a missing boy. 'Conversations With The Dead' is meant to be a five-issue miniseries and sees Corrine experiencing strange dreams and uncovering a factory of zombie assassins. Jason Alexander's cyberpunk series is difficult to follow (a proofreader would have been helpful), and, presumably deliberately, cryptic in its depiction of events, for instance in understanding how much of what Corrine experiences is meant to be real. Alexander's artwork becomes increasingly like that of Bill Sienkiewicz as the series progresses, though he also starts using just pencils in 6-8.~NF

ENCHANTED

Sirius: *3 issue miniseries 1997, 3 issue miniseries ('The Awakening') 1999*

Two bickering groups of twenty-something 'adepts' (witches and wizards to you) in New York face the dire threat of other-wordly entities. It all sounds quite entertaining in that fashion, but Robert Chang's pace is lethargic, and he'll never provide any action when a couple of talking heads can describe it. The second series is painted, which at least adds hair colour to his largely indistinguishable cast.~WJ

ENCHANTER

Eclipse: *3 issues 1987*

Intended to be an eight-part series, Don Chin and Mike Dringenberg's fantasy tale had a lot of promise. Minimal dialogue and beautifully rendered black and white artwork make it hard to understand why the story has never been finished. On the strength of these issues it looked likely to create the sort of following that *Elfquest* had.~NF

END OF THE CENTURY CLUB

Panic: *Graphic Novel 1996*
Ed Hillyer/Slab O Concrete: *4 issue miniseries ('The End'), Graphic Novel 1998*

The End of the Century Club is the feel good comic to end all feel good comics. It's set in an alternate present that slightly magnifies the paranoia of post-Thatcherite Britain with talk of identity cards, street surveillance and compulsory jobs for the unemployed. Despite this it promises that the youth of today can do something meaningful about their situation, although they have to break the law to achieve it. The story teams Bic, a bike-obsessed youth from a previous small press series by writer/artist Ilya with a bunch of other young misfits in South London, who are attempting to set up a club. All kinds of forces are against them, from local rent-a-cops to the mad Rastafarian predicting the end of the world, and they're so skint they have to steal the records for their opening night in the first part of *The End* (the title to which the miniseries is abbreviated). Reflecting the street-smart, multi-cultural lives of young Londoners, Ilya's characters are complex: sassy, confrontational, immature at times, often tender, often annoying. His art develops throughout the series, becoming increasingly loose and 'bigfoot' in style. When he lets rip, in the opening sequence of the graphic novel where Bic is stage diving, or in the fight that concludes the first part of the follow-up series, it's a delight on the eye. The wonderful thing about *The End of the Century Club* is that as it progresses you can see a talented cartoonist becoming more and more sure of himself. This isn't a splendid series from the very first page, which keeps getting better. The graphic novel was reprinted by Slab O'Concrete in 1998.~FJ
Recommended: Graphic novel, 1-4

Steven Grant's ENEMY

Dark Horse: *5 issue miniseries 1994*

Well-constructed thriller encompassing the FBI, covert government agency shenanigans and a man led to killers by the ghosts of those they've killed.~FP

ENEMY ACE

DC: *Graphic Novel 1991, 2 issue microseries 2001*

Created by Robert Kanigher and Joe Kubert, the German World War I aviator previously appeared in *Our Army at War, Star Spangled War Stories*, and a *DC Special*, but has his first star billing in George Pratt's graphic novel 'War Idyll'. It deals with a Vietnam veteran who seeks out the ageing

German pilot as part of his efforts to come to terms with the pyschological scars left by his own experiences of war. Pratt makes his points clear, but it's rather hard to believe that these men would actually be talking like this. In contrast, the 2001 microseries is set during World War II. This superb revisiting by writer Garth Ennis, never one to shun controversy, does an admirable job of forging a sympathetic hero of a man fighting for the Nazis without taking the obvious cop-out route of making him a defector and a traitor. Ennis portrays the ageing Hans Von Hammer as a patriot who doesn't want to see the destruction of a Germany he learned to love long before Hitler took its reigns. He is tired of the futility of war, but craves its adventure; a superb pilot who knows he isn't very good at anything else. As the story unfolds Von Hammer grows more and more disillusioned, until it becomes impossible to ignore that the side he's fighting for doesn't deserve to win. And yet nonetheless, Ennis enables him to maintain his integrity and honour all the way to the bitter end. The final sequence is heart-wrenchingly sentimental without being mawkish in the way that only Ennis can manage. If this wonderful series can be faulted at all, it is only that the two issues have different artists: Chris Weston and Christian Alamy in 1, Russ Heath in 2.~JC

ENIGMA

Vertigo: *8 issue limited series 1993**

No writers working in mainstream comics during the 1990s could challenge an on form Peter Milligan. He brought a knowing and erudite accumulation of popular culture and literary appreciation and an often concealed sense of humour to almost every title he handled. He's also a rarity in being far superior when conceiving and following through his own projects, tending to quickly lose interest when handling other people's characters, and appears to have no fear of tackling topics likely to engender controversy. Admirably, the hallmark of political correctness is of no concern in tempering his ideas. This, naturally, leads to some controversy, in the case of *Enigma* from his handling of the homosexual propensities or otherwise of his lead character Michael Smith. With Enigma he has the wit and imagination to present an innovative take on superheroes, another rarity.

Michael Smith orders his life to such an extent it's stultifying, but he's transformed by a near-death experience during which he glimpses The Enigma, the hero of a fondly recalled comic from childhood. Villains from the comic appear to terrorise reality, and Michael locates the writer of *The Enigma*, who can make no further sense of events than he. The most persistent and troublesome of the comic villains is The Truth, and the key to the entire series, although seemingly a throwaway line in the third issue, is when the comic's writer says, "I always figured The Enigma would have trouble with The Truth." Smith somehow feels drawn into and connected with the events playing themselves out, and indeed he is, although exactly how is a mystery only resolved at the death.

Enigma also charts the artistic growth of Duncan Fegredo. His first major work in pen and ink, it was begun in a somewhat cluttered and scratchy fashion, hiding a lack of confidence previously secreted behind painted pages under a multitude of lines. By the concluding issues he's confident enough to dispense with un-needed embellishments, which isn't to say the art here is substandard. Fegredo is an expressive artist who's a natural at conveying emotion and movement, and is ideal for the heady brew on offer. The final touch elevating *Enigma* to greatness is the cynical voice whose captions tell the entire story. Consistently transcending standard comic captions, they offer an extra layer of commentary, providing a fully rounded graphic novel. The identity of the narrator is unknown until the final pages and will surprise every reader. Intelligent, seductive and compelling, *Enigma* is a must read for anyone drawn to adult-oriented comics.~WJ

ENO AND PLUM

Oni Press: *One-shot 1998*

Terry LaBan's slacker couple here extend over a full comic. While LaBan's cartooning is as slick and professional as ever, this has the feeling of two short stories slapped together for the sake turning out a full-length comic. The frequent placement of throwaway gag strips interrupts the flow to no good effect, and all in all Eno and Plum are better sampled in the pages of *Cud*.~FP

THE ENVELOPE MANUFACTURER

Drawn & Quarterly: *1 issue 1998*

A man who owns an envelope factory is in deep financial trouble. He's paranoid about one of his employees, and is having violent fantasies that verge on hallucinations. Chris Oliveros produces a convincing portrait of someone in crisis, but it remains the only issue of a projected three issues to be published.~FC

EPIC

Marvel/Epic: *4 issues 1992*

This was an attempt by Marvel to relaunch several series that had lost their own titles, including *Alien Legion* (3), *Stalkers* (1-4), *Wild Cards* (1-3) and *Nightbreed* (1, 2), and, perhaps, to test the waters for a new regular anthology. Using primarily British artists for these strips (Dougie Braithwaite, Mark Farmer, D'Israeli, David Roach, Steve Whitaker and Woodrow Phoenix), it did them no harm but cannot have been considered a particularly commercial decision, especially given that there was a very good reason for the original failure of these titles. Of special interest is a *Cholly and Flytrap* two-parter (3, 4), drawn by Arthur Suydam but written by Bob Burden in his usual surreal style.~NF

EPIC Graphic Novels and One-Shots

Even dealing with the *Groo* and Moebius graphic novels under separate entries, Marvel's creator-owned graphic novels and one-shots make strange collective bedfellows. The poorest is *Heavy Hitters* Annual, a one-shot sampler with a story apiece of Alien Legion, Feud, Lawdog, Lester Girls and Spyke. The best is Feud (despite two pages printed out of order), and it's a meaningless codicil to the series, so don't bother unless a complete set is essential. Acclaimed science fiction author William Gibson's *Neuromancer* is adapted with very static airbrushed art by Bruce Jensen. Or at least the first part is. Epic didn't bother to complete the story, so it's not much use unless you're a major Bruce Jensen fan. And how many can say, hand on heart, that they are? More static painted art, this time from John Pierard, is found in the adaptation of Steven Brust's fantasy novel *Jhereg*. It's a slight story about an assassin with a difficult hit, but at least complete in itself.

Harvey Kurtzman's Strange Adventures isn't technically a graphic novel, rather a collection. Creating *Mad*, Kurtzman had been an innovator and the master comics satirist of his generation. Sadly, his day had passed by the time he plotted and laid out these limp genre parodies. A stellar line-up of artists including Sergio Aragonés, Dave Gibbons and Rick Geary faithfully follow the layouts, but respect outweighs inspiration. The best strip is Robert Crumb's two pages concerning Kurtzman's influence on his life and career, and yet how difficult he found it conforming to Kurtzman's exacting standards. The production department deserves full credit for designing an appealing and reverential hardback that finds space for Kurtzman's layouts.

It's a shame the in-house staff weren't as respectful when it came to *67 Seconds*, which manages to mis-spell artist Steve Yeowell's name on both the cover and the credit page (in two different ways). To add insult to injury, the editors responsible have their names on the title page, leaving the creative team anonymous until the following page. *67 Seconds* is excellent. James Robinson weaves a riveting adventure, told in flashbacks as a man contemplates his past and circumstances while he risks his life leaping for a flailing rope. Rich characterisation, a compelling mystery, a

* Available in a collected edition

well-realised fascist retro-future and top art combine for a sadly ignored story. *Someplace Strange*, though, garnered plenty of interest on release. The stunning John Bolton illustrations immediately captivate, and sent plenty of folk into enthusiasm overdrive. One suspects they didn't actually attempt to read this surrealistic modern-day fairy tale. While living up to the title, Ann Nocenti's script does little more than string together a succession of quirky happenings for an entirely unsatisfying read. But, oh, that glorious art! *Last of the Dragons* can also boast fine art, from writer Carl Potts inked by Terry Austin. Originally serialised in Epic Illustrated, there's a greater cohesiveness to the collected edition of this tale of 19th-century guardians of ancient Japanese dragons bringing them to the USA. Slightly awkward at times, it's unusual, involving and underrated.

Wearing his heart on his sleeve James Hudnall wrote *Sinking*. His intentions are good, and Rob Ortaleza's heavily photo referenced art is fine, but it's an earnest, overlong and often ponderous study of schizophrenia. The comic-sized *Seven Block* has rushed Jorge Zaffino art with plenty of ill-advised crosshatching that often turns to complete mud despite the well selected and limited palate of colourist Julie Michel. What makes this all the more distressing is that the story is a career benchmark for writer Chuck Dixon. It's a disturbing tale of medical experimentation on volunteer prisoners that inevitably goes disastrously wrong. Despite the predictability, *Seven Block* works, as it concerns mood, atmosphere and perception, but the artistic shortcomings from a generally superior creator preclude recommendation.~WJ

Recommended: *67 Seconds*

EPIC Illustrated

Marvel/Epic: *34 issues 1980-1986*

Marvel's attempt to emulate the success of *Heavy Metal*, *Epic Illustrated* had far fewer nods to the world of European cartooning. Using pretty much the same formula of serials and short stories, *Epic* relied heavily on established creators, including some whose work had appeared in *Heavy Metal*, including Paul Kirchner and Bob Wakelin.

There are some strong stories to be found: Delaney and Chaykin's 'Seven Moons' Light Casts Complex Shadows' (2), Roy Thomas and P. Craig Russell's *Elric* adaptations (3, 4, 14, 15), Ken Macklin's funny Dr Watchstop (10, 14, 17, 21, 29, 33, 34), Dave Sim's *Cerebus* colour strips (26, 28, 30), plus work by Trina Robbins (8, 16), Alan Moore (34) and Sergio Aragonés (a Groo story in 27). It's the artwork that most people will remember, however, whether the black and white linework of Mike Kaluta (17, 21, 24, 26), Charles Vess (5, 8-10, 16, 21, 22, 24, 27) and Tim Conrad (on 'Toadswart' in 25-28, 30-33), or the richly coloured artwork by Kent Williams which adorns 18-21, 29-31 and 33, while Arthur Suydam turns up in 1, 8, 10, 13, 14 and 34, and John Bolton has work in 7 and 15. He also illustrates Marada The She-Wolf* (10-12) in black and white, then in colour (22, 23). Interesting artwork carried a lot of so-so short stories, but on continued stories the series was weak. They included Jim Starlin's indulgent prelude to Dreadstar, 'Metamorphosis Odyssey' (1-9), Thomas and Conrad's clunky Almuric (2-5), Rick Veitch's interminable 'Abraxas And The Earthman' – a sort of Moby Dick in space (10-17) – plus science-fiction shorts in 4-6, 19, 25, 28 and 29), Archie Goodwin and Pepe Moreno's post-holocaust 'Generation Zero'* and the utterly tedious 'Last Galactus Story' by John Byrne in 26-34, still unfinished when the title was cancelled.

Slightly more interesting, but still only average, were Vaughn Bodé's Cobalt 60 (27-31), Doug Moench and John Buscema's Weirdworld (9, 11-13) and Dean Motter and Ken Steacy's Catholicism-vs-pure-evil-in-outer-space epic 'The Sacred and the Profane'*. Of the European reprints, only Zoran Vanjaka made more than a couple of visits, including various appearances by his science-fiction detective Gideon Plexus (12, 15, 23, 28, 29, 31). Leo Duranona was in 1 and 11, Mirko Ilic in 1 and 5, and Paulo Serpieri in 34.

Alongside strips, Epic included portfolio pages and interesting articles on various aspects of comics. Of note are Maurice Horn on fantasy in European comics in 2, the Barry Windsor-Smith interview in 7 and a Basil Wolverton retrospective by Ron Goulart in 12. *Heavy Metal* wasn't great during this period, but it still outshone Epic Illustrated.~NF

EPIC LITE

Marvel/Epic: *1 issue 1991*

Patchy humour anthology. On the plus side there's Evan Dorkin's TV sitcom parody 'The Murder Family', Scott Saavedra's satire on macho rednecks and some nice art from Hilary Barta. Kyle Baker's on autopilot for a lesson in comics economics, and Jim Valentino returns Normalman in order to get some venom about TV companies off his chest. Richard Rice's Bob The Alien is simple stuff and Mike Kazaleh occupies eight pages to no good effect.~WJ

EPICURUS THE SAGE

Piranha Press: *2 Graphic Novels 1989 & 1991*

Bill Messner-Loebs takes a whimsical look at the heyday of ancient Greek philosophy. It's an unlikely subject, with an unlikely hero, the moderate and reasonable Epicurus, who despairs of the rhetoric and weird notions flying among his fellows. Let's not forget that Plato thought everything existed in a big cave, and that our 'reality' was just a reflection of that cave. In volume 1 Epicurus sorts out the dispute between Demeter and Pluto over his kidnapping of Demeter's daughter, Persephone, hindered by the young Alexander the Great, and in vol 2 he tackles Zeus' various peccadilloes. The historically minded among you will already have noticed that Messner-Loebs plays fast and loose with history and mythology to create a rich fantasy Athens in which philosophers act like Tom & Jerry characters, as well as taking clever pops at each other's ideas. Unfortunately if you haven't had the benefit of a classical education many of these are too obtuse to be funny, which is a problem when addressing a twenty-something audience. Sam Kieth illustrates the whole slickly, drawing mythological monsters with great dash, and throws in lots of visual jokes to keep the story moving, but ultimately *Epicurus the Sage*, like *Deadface*, can only be fully appreciated by a limited audience.~FJ

Recommended: Vol 1

EPILEPTIC

L'Association: *1 volume + 2002 to date*

A major work equal to any comics yet seen in the English language. The title refers to the condition suffered from childhood by the brother of creator David B., here dropping the alias and referring to himself as Pierre-Francois. The main thrust of the book is a young child attempting to understand the distress and reactions of his brother, who undergoes traumatic experimental medical treatment, then alternative healing that works for a while. When he reverts to regular daily seizures his parents resort to ever more unconventional sources, hoping for a permanent cure. These sequences are powerful enough on their own, but what raises *Epileptic* a notch above is the way in which the narrative diverts to encompass unrelated topics. Large chunks of family history are covered, macrobiotic diets explained, and the harrowing experiences of others are spotlighted. We have the World War I memories of David B.'s grandfather, along with Algerian war recollections of comic writer Jacques Lob. There are also threads connecting *Epileptic* to *Maus*, a work with which it's not shamed in comparison. Discussions ensue with David B.'s parents concerning the suitability of revelations about family history, and the manner in which the older generation considers they'll be interpreted.

The book is drawn in a very adaptable simple blocky style that's powerful and up to portraying anything required. It's packed with memorable images. Styles of art familiar from historical cultures are incorporated to depict the battles that interested Pierre-Francois in childhood, and David B.'s version of Eastern imagery appears frequently. The epilepsy is given weight in the form of a ghost, and there are literal

---

* Available in a collected edition

interpretations of phrases such as "circle of doctors". Mention must also be made of Kim Thompson's superb translation. There's never a moment when it occurs this was originally produced in French. In France the entire story is being published over six volumes, and this reprints the first three. Anyone with a series interest in comics should read it.~FP
Recommended

EPOXY

Epoxy Press: *3 issues + 2000 to date*

"A pictogrammatic Bohemian Rhapsody; three movements composing one nutty song" is how creator John Pham endearingly describes *Epoxy*. He's a rarity in comics: a born storyteller, with everything he does sucking you in, down to the short paragraphs summing-up people in 3. 1 begins three stories, with the most dramatic being 'Elephantine', concerning one-armed boxer Jack, who hates his seedy life participating in illegal contests. There are elements of a crime story as well, not fully fleshed out with the strip absent in 3. This is the only strip not influenced by Vietnamese culture. 'Modesto' simply drips with it, starring industrious and inventive teenager Olive, forever creating new ideas and fantasies. 'Shiva' is a world where humanoid robots and dragons mix with ordinary humans, absent in 2, but returning to monopolise the ambitious squarebound 3. When that issue starts not with the continuation of the story from 1 (which does appear later), but with a long allegory, Pham is good enough to dispel any disappointment from the opening pages. Later that issue a series of strips combining the design techniques of Chris Ware with Hergé's simple style unites cartoon versions of his lead characters. Pham's art starts as overly-rendered, but, admirably, he selects different approaches appropriate to each of the stories. By 3 he's stripped down to the essentials for a very appealing set of simplified styles. Pham is tremendously talented and improving all the time.~WJ

EQUINOX CHRONICLES

Innovation: *2 issues 1991*

This is reminiscent of nothing so much as *T.H.U.N.D.E.R. Agents* with its mixture of limited super-powers and hi-tech agents in an otherwise real world. Equinox Research Group creates technological advances, but when the father of the corporate attorney is first framed for the robbery of their new electron laser accelerator, then abducted, it's clear there's trouble at t'mill. This is well plotted adventure by Jeff Hendricks, well drawn by then promising penciller Mark Jones. The only shame is that it was never finished.~WJ

ERADICATOR

DC: *3 issue miniseries 1996*

One of the four pretenders to Superman's throne during that gentleman's temporary demise, the Eradicator is a Kryptonian personality overwritten on a dead human psyche. This series explores the conflict between his two aspects, and is sensitively written by Ivan Velez Jr, with pleasant, if static, art by Roger Robinson. It's thoughtful, but ultimately a bit solipsistic for your average reader.~HS

EROS Graphic Novels

We have a lot to thank Eros comics for, not least keeping Fantagraphics, America's most experimental, quality comic publisher afloat. While keeping our right to read hastily drawn, virtually plotless fuckfests to the fore, they've also managed to dig up one or two interesting talents. Chief among these is Molly Kiely, whose breezy graphic novels set among polymorphic folk in the flatlands of the South, are full of loose sub-Jaime Hernandez linework and cheerful sex. In *Tecopa Jane* the eponymous protagonist recalls a failed relationship while living with her ex's transsexual 'brother', who has the hots for her. *That Kind of Girl* features an uninspired writer on a road trip through Nevada to visit her artist boyfriend and, after meeting Ruby Justice, a very southern cowgirl, tell him their relationship's finally over. The porn element's not so much in the freewheeling sucking and fucking that goes on, but in the fact that the characters seem emotionally unattached to their sexuality, waving each other off, accepting the sudden start or end of relationships without a blink. It's very pretty, and it's exultant about sex, rather than furtive and unhappy, as so many erotic novels seem to be.

Head of the Class, written by Hernan Migoya, with slick, cute cartoony art by Ruben del Rincon, manages to be both horny and look at the implications of our sexual culture. Nina's a college student, popular with the boys and the object of German's virgin crush. She also happens to be a very professional whore, like her mother. Her two identities clash when she finds herself drawn to the sweet, sexually active, but spiritually pure, world of boyfriends. It's thoughtful as well as sexy. Equally interesting, although almost impossible to read due to the pale printing, is Wilfred Santiago's *Pink*, in pink ink on pink paper. Santiago's a gifted draughtsman who draws in a smudgy style somewhere between Jose Muñoz and Ho Che Anderson, and writes authentic-sounding stories about casual sex among his range of ethnic characters. Very much porn for 2002 to counterbalance the outpouring of stale fantasies seemingly left over from the 1960s. He also co-wrote and illustrated *The Thorn Garden*, with Meroe Elahi, stories set around a modern fetish club, which set out to be realistic about the BDSM lifestyle.

Ron Wilber has long been a mainstay of the Eros line, churning out endless weakly humorous stories involving unfeasibly top-heavy totty. His *Bondage Cop* graphic novel features a fat female cop who can be transformed into the lithesome superheroine Bondage Cop (during which transformation the bulk of her body weight seems to shift to her chest) by wanking herself on a magic truncheon. Ahem. Equally feeble is *Karate Girl*, poorly illustrated psuedo-manga that manages to have the pages printed in the wrong order. *Lady X*: 'Lust's Captive' belongs to the old-fashioned tradition of European adventure porn. Giovanni Degli Esposti draws in a highly detailed, measured style and depicts the sensuous, ornate world of pre-revolution France, as Madame de Beaufluer, now a nun, tells the story of her former life as mistress and murderer among the nobility. Rather a surprise in this company is Ernie Colón's *Strip Search*, decidedly sketchy and old-fashioned even with the concession of a few tattoos, nipple rings and ponytails on otherwise bald men. It concerns a private dick hired to find the runaway wife of a millionaire. Credit Colón with trying to provide a proper story, though, and one of the most grotesque demons even to adorn a gate. One might also imagine Matt Howarth's sparse, stippled cartooning, and discursive plots to be entirely unsuited to erotica. In *Tryx*, though, he comes up trumps. Including a giant in full proportion, a shapechanger, and three more randy android sex toys, under the command of a seemingly uptight and definitely inexperienced new captain. Howarth's plots are imaginative and witty, while offering the full complement of sexual permutations.

Erotic comics tend to fall into two categories – so specialist you wonder if there's an audience, usually reflecting the artist's own little peccadilloes, or a quick spin through every combination a *Sun* reader could conceive of, i.e. a little anal, a blowjob or two, a threesome and a gang bang to finish, with plenty of cum shots. Here's the original *Sun* selection. *Hummers* has a suspiciously large-breasted analyst subjecting her equally juglicious patient to regressive hypnotherapy in the hope that she'll be cured of her nymphomania. Cue lesbian hotties in Egypt, more lesbian hotties in the Renaissance (oops, missed a straight bang in feudal Japan), a threesome in Paris and an all-girl orgy at some unspecified date and time. The chapters read like individual stories that have been shoehorned into the structure at a later date, and the art, by Scorpio, is incredibly old-fashioned, sixties style erotica over which random airbrush shading has been added in black and white. Dawn's *Little Black Book* pretends to be the real-life escapades of a sexual adventuress. It takes in everything from phone sex lines to orgies. For straightforward short sex stories drawn in a fluid manner that are actually quite pretty try *Insatiable* by Fernando Caretta, collected from *Selen*.

Sexus, not to be confused with Eros miniseries *Beta Sexus*, is a not terribly inventive, but fetish-laden, story of a rich young man whose analyst turns out to be a top dominatrix, who swiftly works out how to deal with his frustrations. What stands out about it is the art. Creator Markku Virta draws women who look like sociopathic drag artists and puts in the incredible amount of detail only someone in love with fetishistic clothing can be bothered with. He also draws several hundred individual body hairs on all his male figures, making them look like they've been carpeted. Even more specialised is the work of Kono Yaro and Suke Bei. Their *Lust in Space* is westernised manga featuring androgynous women with huge nipples and lots of multi-tentacled monsters. If that particular combo's your thing, get stuck in!

For more extreme sex try *Harem Nights* by Michael Lacombe and Yanick Paquette. Tatia's a slave who has to get it on every day or die due to some magic spell. Obviously this makes her rather desperate to have sex with just about anything, animal vegetable or mineral. *Tana's Secret World* also features fantasy elements, as the young daughter of a Peruvian shaman comes to America, chiefly it seems to discover new positions to have sex in. Surely it goes without saying that she's beautiful and highly sexed as well? Of course there's a good reason for all the sex – she's using the energy to enter a kind of x-rated dreamtime. Or there's *She-Dom*, 'The Awakening of Clara Rosenberg' by Roberto Baldazzini and Pes. Straighter than most of Baldazzini's fantasies (the heroine basically discovers she's a switch and is submissive to her husband, but sadistic to her boyfriend) it contains a fair amount of violence, as well as a lot of detailed fetishwear, drawn in Baldazzini's distinctive, heavy outlined, even lined style, reminiscent of Moebius with access to a few less pens.~FJ

The EROTIC Worlds of Frank Thorne

Eros: *6 issues 1990-1991*

Good old Frank Thorne, never afraid to dress up in a silly costume to get his picture taken with a large-breasted fan. Many (including Wendy 'Elfquest' Pini) flocked in chainmail bikinis to impersonate Frank's heroines and are shown here. 1 contains two Ghita of Alizarr adventures; the language is colourful – "Out of my way, Bumhole, or I'll pry loose your junks with this nutpick'" – but the pictures rarely match what's being said, making it read like a bad translation. The art's much more carefully composed than the loose line suggests and you'll either like his pouty-mouthed, wide-eyed women or not. 2 and 3 feature Moonshine McJuggs: *Li'l Abner* with added incest, hick stupidity and carnal knowledge of cows. For 4 it's strap on your oxygen helmet (and not much else) for a continuation of the sci-fi graphic novel *Lann*, while 5 reprints the Danger Rangerette strips he did with Ted Mann and 6 features Red Sonja. Several worlds, pretty much the same character.~FJ

ERT!

Caliber: *1 volume 1995*

With his deceptively simple stick-figure characters Matt Feazell was an inspiration to creators of minicomics throughout the 1980s, although few matched his rate of productivity. 126 pages of work prove that Feazell's reputation stands not only on his productive nature, but also on his being a reasonable gag writer. His primary characters Stupid Boy, Cute Girl and particularly The Amazing Cynicalman are amply represented, and you're unlikely to come across the minicomics today, so this is worth looking for.~WJ

ESC <escape>

Comico: *4 issue miniseries 1996*

ESC attempts to pass itself off as something for the newly sophisticated comics fan ready for real science-fiction rather than mythology, which is insultingly patronising to start with. This is based on some Hollywood chancer's screenplay in which he feebly attempts to paste some trendy virtual reality ideas onto an out of control vigilante story not fit for one of Arnold Schwarzenegger's more low-rent efforts. Bad draughtsmanship smothered in post-Bill Sienkiewicz flashy effects doesn't help it at all. Appalling rubbish.~GK

ESCAPE

Escape: *9 issues 1983-1986*
Titan: *10 issues (10-19), 2 Graphic Novels 1986-1989*

The British self-publishing scene of the early 1980s was healthy and vibrant, and *Escape* began as an attempt to present the best of that material to a wider audience. Eddie Campbell, Glenn Dakin, Phil Elliott, Hunt Emerson, Myra Hancock and Rian Hughes are all well represented in the first seven digest-sized issues, which are a 50/50 combination of text and strip. The interviews with the likes of Leo Baxendale and Raymond Briggs are illuminating and the articles, largely on the work of European comic creators, are informed, but the bite-sized pieces of comics are unsatisfying. This changes when the title switches to magazine size with 8 and broadens its remit to include longer strips, more eccentric North American contributors, and translated work from respected European creators such as Baudoin (15), Mattotti (11), Muñoz (10), and Varenne (18). Phil Elliott and Paul Grist's 'Absent Friends' in the uncharacteristically sub-par issue 11 exemplifies the charm of *Escape*. A guy bumps into the nutter who used to live on the roof above his flat two years after they'd last met, and attempts to explain to his girlfriend the mixture of threat and allure he exuded. In this eloquent and well-observed story tension, wit and a twist in the tale are combined by two top-notch creators whose work is sadly under-appreciated.

The glorious eclecticism of Escape permits the publication of such astonishingly diverse and uncharacteristic material as Brian Bolland's introspective and questioning 'Mr Mamoulian' (11-19), Simon Bisley's fashion illustrations (15), and Howard Chaykin's biography of Lester Young (18). The Pleece Brothers' hilarious pastiche '70s Cop' is in 19, as is the prologue to the graphic novel *London's Dark*. The title is a reference to the blackouts observed to confuse enemy bombers during World War II, and James Robinson and Paul Johnson weave a tale of romance and dirty dealings amid a convincingly portrayed 1940s. The creators might handle aspects differently with more experience, but it's an assured début for both. The same can be said of *Violent Cases*, by Neil Gaiman and Dave McKean. It's a recollection of a childhood encounter with Al Capone's osteopath, and in turn the osteopath's recollections of Capone, in which a child's puzzled acceptance of the world is vividly evoked.~FP

ESCAPO

Horse Press: *One-shot 1999*

This contains two chapters in the life of escape artist, Vic, dealing with his escape, firstly from death, and then from love of Aerobella. Paul Pope's drawings continue to amaze in this meditation on the mythic themes surrounding the fear of love and death.~NF

ESPERS

Eclipse: *5 issues 1986-1987*
Halloween: *6 issues 1996-1997*
Image: *7 issues 1997-1998*

In the Eclipse 1-4* a pan-continental group with paranormal abilities are gathered to rescue hostages from Beirut-based terrorists. Writer James Hudnall concentrates on personalities more than powers, with the Espers remaining in civvies throughout, and artist David Lloyd proves very able at conveying emotion through posture. These issues form a good self-contained thriller very much tied to the real world, but the proposed second story is stillborn, with 5 notable for being the only American comic drawn by British master artist John M. Burns. It's eventually told in Interface, which bridges the first and second series of *Espers*. By the Halloween issues the cast are a more confident and experienced outfit, and the focus is largely back on them, but as seen through the eyes of a new teenage member. Artist Greg Horn is very good, and his technique of avoiding the inking process works surprisingly well.

The Image series incorporates Brian Marx from *Chiller*, and thereby introduces sorcery to Espers, albeit largely in the form of more super powers. 1-4, though, are very much flash and thunder to the exclusion of all else. Matters improved thereafter with a run of single issues enabling more time for the cast to breathe, but cancellation was premature.~WJ

Recommended: Eclipse 1-4

THE ESTABLISHMENT

WildStorm: *13 issues 2001-2002*

Take several lose ends from the WildStorm universe, add a UK version of the Authority made up of three Midwich Cuckoos, a doctor with Bride-of-Frankenstein hair, an English gent, a voluptuous killer, and a dead homosexual sharing bodies with a live, flatulent ex-copper – all led by hard-nosed, no-nonsense agent Jon Drake. Stir in some Vertigoesque British strangeness, incorporate a plethora of UK pop references and nods to such diverse television shows as *The Prisoner*, *Grange Hill* and *Fawlty Towers* and you'll end up with *The Establishment*. Thought-provokingly written by Ian Edginton and lovingly illustrated by Charlie Adlard, this wonderfully entertaining series combines the paradoxical aspects of time-travel with an intricate plot involving pocket universes, alternate realities, invading aliens, and Venusian nanites. Oh, and a sentient, omnipotent god-like machine that wants nothing less than to reconfigure the universe in its image. The many ideas and plot twists crammed into the story ensure that it improves with each re-reading; one can only hope that a sequel is not out of the question.~JC

ETC

Piranha Press: *5 issue miniseries 1989*

Tedious pseudo-sci-fi female Frankenstein story that looks half-drawn with broken ballpoints and painted with old bath sponges by a commercial artist having his first go at comics. Writer Tim Conrad's sub-Anthony Burgess or William Burroughs attempts at future language and science are laughable.~GK

ETERNAL ROMANCE

Best Destiny: *4 issues 1997-1998**

Romance stories with a twist as narrated by vampire, Destine, whose oßwn tale of date mix-up is included, as she arranges to meet a vampire, werewolf and zombie on the same night. Otherwise these are about couples brought together by or rising above the difficulties of the supernatural to find love. Janet L. Hetherington's stiff artwork is somewhat offset by her ornate inking and the nostalgic feel and charm of the strips just about carries them off.~NF

ETERNAL WARRIOR

Valiant: *50 issues, 2 Yearbooks 1992-1996, one-shot ('Wings of Justice') 1995, 2 issue microseries ('Fist and Steel') 1996*

Spinning off from the *Unity* crossover, this became the continuity backbone of the Valiant Universe, and uses the entire history of the world as a backdrop to the story of Gilad Anni Padda. He's the oldest of three brothers born before the time of Gilgamesh, an immortal warrior pledged in service to the Geomancer, a hereditary spokesperson for the Earth. This is a cracking good adventure series managing to mix the best of historic action with superscience, crime fiction, and espionage intrigue. The artwork varies from acceptably workmanlike to excellent, and the variation in settings often used to highlight a contemporary adventure works well over and over again. Another big plus is that despite a potentially huge back-story, individual issues are surprisingly approachable with almost any story being a jumping-on point.~WW

Recommended: 1-4, 6-15, 18, 24-27, 36, Yearbook 1

ETERNAL WARRIORS

Acclaim: *6 issues 1997-1998*

A succession of one-shots that introduce the Forever Family to the Acclaim Universe. Art Holcomb and various artists tell extra-length tales of Ivar, Gilad and Aram/Armstrong who have lived for thousands of years and created a secret society of immortals who all but run the world. The first issue, 'Time and Treachery' tells of a civil war in the society as members of the family are being murdered. 'Digital Alchemy' then delves into Armstrong's past as a lost love uses lost arts to attack the world's gold reserves. 'Archer and Armstrong', 'Blackworks', 'Mog' and 'The Immortal Enemy' all deal increasingly with the rift between the three brothers as Solar, the God-like Man of the Atom comes ever closer to ending the world. Although starting well, the series degenerates into a clearing house for plotlines running through the rest of the Acclaim Universe, but is still generally a good read.~WW

ETERNALS

Marvel: *19 issues, 1 Annual 1976-1978, 12 issue limited series 1986-1987, one-shot 1991, one-shot 2000 ('Apocalypse Now')*

The Eternals was the highspot of what was an unhappy return for Jack Kirby to the company his dynamic art and exciting plots had a major part in establishing. It concerns itself with familiar Kirby themes. Two races who've lived among humanity since the dawn of time are the god-like beings who've inspired myths of the Greek deities, and the ugly Deviants existing beneath the planet's surface. The impending arrival of the Celestials, creators of mankind, to sit in judgement on humanity draws the immortal beings into open conflict. Unfortunately, great plots, wonderful ideas and expansive artwork are monumentally flawed by Kirby's often terrible dialogue. The best samplers of the original series are 11, in which the Soviets attempt to topple a Celestial while the Eternals gather to communicate, and the annual. Stay away from the saga of the cosmic-powered Hulk in 13-16, though. It's a stinker. Dangling plotlines from the prematurely cancelled first series were resolved in *Thor* from 272.

For the revival writers Peter Gillis and Walt Simonson and pencil artists Sal Buscema and Paul Ryan wisely opt not to imitate Kirby, and settle on political intrigue and the pursuit and responsibilities of power as themes. It starts well, but drags over twelve issues. The 1991 special, 'The Herod Factor', is plain daft. Among other plot holes you could drive a bulldozer through, everything hinges on the deceit of someone who had no way of knowing the information that sets events in motion, there's silly expository dialogue throughout, and Mark Texeira's figurework is very lax. The 2000 one-shot was obviously intended as an X-Men style resurrection, and introduces a bunch of new Eternals amid the machinations of Apocalypse. There's little to the new cast beyond names and design, and the lack of follow-up indicates its success.~FP

ETERNITY SMITH

Renegade: *5 issues 1986-1987*
Hero: *10 issues 1987-1988*

Sent back from the future to the 1980s, Smith has to prevent the future that spawned him, but there are already those in place whose task it is to ensure his mission fails. Smith is helped by future technology, but there's no way he'll be returning, and a previous visit to the 1960s produced a daughter, now a renowned rock star and reunited with her father. That's the premise of the Renegade series, which is concluded in the first Hero issue. It's a well-conceived science-fiction romp, but whenever matters begin to become absorbing there's a tedious, intrusive fight scene. Once the initial plot is concluded, the series meanders for a horror story set, for some strange reason, in the Antarctic, and dull back-ups spotlighting the supporting cast.~WJ

ETHEL & ERNEST

Jonathan Cape: *1 volume 1998*

This is Raymond Briggs' biographical tale of his parents' meeting, as milkman and parlour maid before World War II, and their subsequent life together, including his own birth,

---

* Available in a collected edition

growth and leaving home, and their deaths. Their relationship is depicted as a rock against which the constantly changing world washes, but can't weaken. Providing an interesting social history as well as a moving tribute to his parents, Briggs tends towards a sentimental view, particularly with the deaths first of Ethel and then of Ernest, but his simple text and drawings underscore the tenderness of his approach, making this moving and affecting rather than maudlin.~NF
Recommended

THE EUDAEMON

Dark Horse: *3 issue miniseries 1993*

Mark Nelson is an excellent action artist. Unfortunately Nelson's talent as a writer is ordinary, and this tale of the renewal of an age-old battle between demons is only noteworthy for the art.~FP

EUROTICA Graphic novels

When they took over Catalan Publishing's back catalogue, NBM inherited most of the best European erotic artists around, most notably Guido Crepax, Milo Manara and Georges Pichard. They created the specialist Eurotica line as their output began to expand, whether to make it easier for book dealers to shuffle out the smut or simply to make things more manageable for themselves. So at ground level the line had creators interested in more than packing as many blowjobs into forty-eight pages as possible, people who regarded erotica as a worthwhile creative pursuit rather than as a quick way of making some money. And you had a breadth of interest, everything from hardcore S&M to voyeurism to sexual comedies of manners.

Of the three, Crepax is the most exceptional stylist, with his elongated women, scrawny men and experimental page layouts, as well as awareness of line quantity, from frenetic, scratchy pen to loaded brushwork. He is the only artist who can convincingly draw an orgasm simply by depicting the movement of lips or a sequence showing the tightening and spasming of an anus. *Story of O*, dealt with separately, and *Venus in Furs* are probably his fetish masterpieces, and he also brings something new to his version of the notorious skin flick *Emmanuelle* (two volumes). He supplies an elegance and fetishistic grandeur that the film lacked. Volume 1 has a particularly useful introduction for new readers, including samples of Crepax's art from his different periods. Less satisfying are the *Anita* collections, erotic encounters based around TV and video technology. For some reason the first two-thirds of *Anita Live* are in one volume, with the conclusion and another, shorter story in volume 2. As *Anita* is somewhat fluffier and less plot-driven this is not an insurmountable problem and the reprints retain the partial use of colour that's about the only innovative aspect of the strip. NBM took longest in reprinting the first segments of Crepax's early masterwork, *Valentina* (two volumes), the erotic adventures of a pretty female photographer. Surreal and full of 1960s iconography, as well as fabulous sado-masochistic imagery, they're drawn in a less linear style than the later works. At this stage Crepax is just finding his artistic feet and pushing at the boundaries of the strip format, making for some incredibly exciting art.

Some people will find Crepax's interest in sado-masochism a little disturbing. If so, they will not want to come within a hundred miles of George Pichard's more extreme efforts. *Marie Gabrielle* is a fake picaresque morality tale in a nunnery where women are tortured to punish them for their sins. There's a strong anti-religious undercurrent and a number of digs at social and religious hypocrisy to the tale, which excellently captures the voice of the genre it pastiches. However, one suspects that most readers will be buying it for the rampant sadism and not therefore be too worried about the soft-peddle translation and cuts in the English version. *Madeleine* is a less convincing retake on the theme, set on an alternate earth where women who commit sexual crimes are incarcerated and punished. The second, more extreme volume was never published in English. *The Red Countess* is a particularly detailed account of the outrages committed by Elisabeth Bathory, whose story gave rise to a number of vampire legends. She was outstandingly cruel even by the standards of her day (16th century); Pichard delights in recreating her excesses in pointillist detail. *Ulysses* (two volumes) is an early work, adapted by Lob from The Odyssey, from the period when the artist was less obsessive about the female form, the art giving a nod towards Greek painting. Although Pichard again adapts his drawing style for *The Illustrated Kama Sutra* (two volumes, text and illustrations rather than strip), it's still very clearly his work. The Indian liking for fleshy women fits in well with Pichard's own particular interest in well-curved victims. Bridging the gap between these and Pichard's later style is his 1981 rendition of *Carmen*, an earthy tragedy much closer to Prosper Merimée's original than the operatic story we're more familiar with.

Milo Manara proved to be a huge money-spinner for NBM, and frankly who can resist his gorgeous, long-legged nymphets and good-humoured tales? Manara is so pretty and cheery in his approach that it's easy to overlook the rapes, bestiality and humiliation he slips in from time to time (should such things bother you at all). As well as the seminal *Click!* series there's two volumes of *Butterscotch* to enjoy, in which a man discovers an ointment to make himself invisible and does what most men would do under the circumstances: uses it to spy on, tease and torment beautiful women. Then a team of bank robbers thinks of another use for it...

Hidden Camera and *Shorts* are collections in the same vein, a series of shorts with a peeping tom theme. Manara's touch is always light. He has an eye for the way a skirt flips or a woman inadvertently exposes herself climbing out of a car reminiscent of photographer Roy Stewart, and his first love is clearly voyeurism. However his later works explore more hardcore kinky themes, including his version of the *Kama Sutra* (a narrative involving a young woman who discovers an ancient Indian charm). *The Art of Spanking*, probably the most beautiful NBM collection, has him providing sepia wash illustrations for Jacques Enard's ruminations on bottom-reddening. Much less edifying is the recent *WWW.*, about sexual game playing among three girls staring in a live web cam sex stream, the manipulative man who runs it and the supposedly abusive boyfriend of one of them. It tries to explore interesting new territory while maintaining a slapstick comedy element (the girls think they've killed someone and attempt to cover it up during the moments between the web cam refreshes), but get sidetracked by extraneous sex. Beautiful to look at, of course. As is *The Model*, Manara's history of women modelling for famous paintings, although it's a little peculiar to see him drawing in styles reminiscent of old Masters, Impressionists and Symbolists. All are easily identified as Manara pictures, however, as he can't sublimate his style that much.

One of his most expansive and freely drawn efforts of the 1990s, *Gullivera*, gave rise to a string of imitators. He turns Swift's satirical hero into a nubile girlie, managing to keep some of the point of the original story while finding creative uses for a giant snatch. In a similar vein, and equally lightweight, we have Leroi and Gibrat's *Pinocchia*, a dirty version of the wooden-boy story, in which a lusty Gepetto carves himself a wooden mate who is brought to life by magic. Of course it all started with Vittorio Giardino's *Little Ego*, a saucy takeoff of Little Nemo in which Giardino apes McCay's drawing style perfectly, but substitutes less innocent dream imagery. *Gullivera* provoked a trend in the European softcore magazines, and Eurotica recently published Eric Maltaite's *Robinsonia*, an engaging romp through the plot of *Robinson Crusoe*, with a feisty redheaded babe replacing the rather maudlin sailor of the original. The blowup on the cover makes his artwork look rough and crude, but inside it's fluid and very sexy. Even better is his, *The 1001 Nights of Scheherazade*, where he's got cracking storytelling to base the work on, and visually stimulating subjects. In a similar retro porn vein there's also Gregory Baisden's attempt at adapting Lord George Herbert's *Night in a Moorish Harem* in two volumes, with each of the harem ladies' stories illustrated by a different artist. The result is unfortunately pedestrian storytelling and artwork of patchy quality.

In the past five years there are been fewer great discoveries, although Spain's *El Vibora* and *Kiss* have provided some interesting fare. The Eurotica editors seem to have hedged their bets by taking on some very stylised creators (i.e. Juan Emilio, Ignacio Noe) while also putting out very staid, old-fashioned looking stories. Emilio's painted artwork on *I Can See You Comin'* (short stories) and his first *Minerva* volume staring a Latin lass who likes well endowed men can only be described as volumetric and voluptuous (great pity it's in black and white). Another interesting artist is Spain's Paya, who uses heavy brush outline on figures with limited wash shadowing. It works well for sex, less well for scenes where background detail is more in demand. In Hypocrites!, with a very dull plot by Revilla, a group of sluts bring their straightlaced friend to a strip joint for a hen party and tell her stories of their sexual hi-jinx. This enables the creators to tip their hat to every major fetish in turn. His two solo volumes of *Nina* stories pretty much dispense with plot altogether. Nina likes sex. A lot. Nuff said? Noe's *Ship of Fools* features particularly ugly men and plastic Barbie women, all coloured very orange for some reason, enjoying kinky sex when a space freighter's bored crew accidentally release a bunch of sex maniacs being transported on their ship. Too ugly to be sexy, everyone looks like they carry a super size bottle of Mazola with them at all times. All this sliminess is toned down a little in *Convent of Hell* (lots of demon fucking and sacrilege, if that's your bag), and exploited to comic effect in *Doctor! I'm Too Big*, about a girl who wants to be a model but is just too curvy – her medical cure turns her into a nympho, a la *Click!*. If you particularly like cartoony artwork, and like fantasy mixed into your sex check out Richard Moore's *Horny Tales*, collecting material from *Radio Comix* and *Anthill Comics*. Tony Luke's *Sin 7* belongs, stylistically, in the Amerotica camp, using extensive montage and photo reference techniques as it does. Full marks for a plot about a whore whose nether regions lead to another dimension!

In the old-fashioned camp is *Lethal Orgasm*, by El Gringo, memorable only because it features high flying business women and sex with a corpse – you can't say the line doesn't feature something for everyone – and *The Lady and the Vampire*, subtitled 'A Saucy Vikki Belle Romp'. It looks about as retro as the title, even though it was drawn in 1999 by Colin Murray. The style is reminiscent of Gray Morrow, all sturdy women with pointy tits and bare midriffs (in a small English town, we're asked to believe). Very *Carry On Vamping... Emily's Secret* is pedestrian Belle Époque erotica, in which two young girls visit a faintly sinister aunt and get caught up in kinky sex games. Prettily, if sketchily, drawn. If you want genuinely good historical erotica, look no further than Massimo Rotundo's *Ex Libris Eroticis*, actually the third volume in a series, the first two being published by Cha Cha. This man understands proper debauchery. While most of his tales are set at the turn of the century, here he has a noblewoman retired to a monastery entertaining her sisters with tales of her family's rampant sex life during the 19th century, for which he adopts a more dynamic illustrative style than in his often cold previous volumes. The story is a load of old tat, but is dryly told. "This event decisively compromised the relationship of my parents," says the narrator, describing her mother's drugging and castrating of her father.

If you enjoy the clear line style, you will no doubt be panting to enjoy *Casa Howhard* by Baldazzini (one of Moebius' faves), which shows his mentor's influence in the very even, measured line weights, small features and use of decorative pattern. Unfortunately the book's a fairly plotless set of encounters between a load of ladyboys in an apartment block, which seems dedicated to putting them up in some style. If beautiful women with very neat genitals don't float your boat, *Casa Howhard* is unlikely to be your first pick after all. Finally, if you're looking for something truly beautiful and weird, there's *Angel Claw*, a collaboration between Moebius and Jodorowsky, consisting of full-page black and white illustrations and short accompanying text. What's peculiar, apart from the overtly sexual nature of the pictures, is that Jodorowsky constructed the order and story after Moebius had done the drawings, creating an artificial excuse for us to have a look at Moebius' fantasies. Needless to say the drawing's very fine indeed, and the symbolism is revealing – particularly the woman carefully sewing together her own cunt lips.~FJ

Recommended: *Angel Claw, The Art of Spanking, Gullivera, Little Ego, Marie-Gabrielle, The 1001 Nights of Scheherazade, Robinsonia, Valentina* 1 and 2, *Venus In Furs*

EVANGELINE

Comico: *2 issues 1984*
Lodestone: *1 Special 1986*
First: *12 issues 1987-1989*

The concept of a sexy killer vigilante nun neatly encompasses a variety of comic archetypes in a single package, and should, therefore, have been enormously successful. The scripts from Charles (more recently Chuck) Dixon show he's studied his action movies, and Judith Hunt's art, if a little static at times, moves the Comico issues along nicely despite the shoddy colouring. They're reprinted with additional codas as the Lodestone special, and the First series picks up from the conclusion. Evangeline's background is presented in 2 and 8. She works for the Vatican, distressingly still wielding power and influence in the 23rd century. The period is never well evoked, and with Evangeline back on Earth for most of the series it might have carried more punch with a contemporary setting. Dixon's plots hold up throughout, but Evangeline, despite her background of inherent contradictions, rarely transcends a blank slate. Hunt goes with 7 and the spirit of the title departs with her. Never previously exploitatively handled, the final issues by inferior artists have plenty of gratuitous poses. As an undemanding action/adventure title this is better than many.~WJ

E.V.E. Protomecha

Image/Top Cow: *6 issue miniseries 2000**

This bog-standard robo-babe sci-fi strip owes a large stylistic debt to the dystopian Japanese comic *Akira*, although its reliance on cliché and stock characters means it never approaches the same visionary heights. Dazzling, state-of-the-art computer colouring is used to disguise the deficiencies in Ale Garza's pencilling, which veers erratically between big-eyed cartooning and over-muscled superheroics. Hormonally excited teenage boys will, however, be pleased to learn that the female lead character has the regulation hyper-inflated breasts that are a hallmark of the Image school of gender studies.~AL

THE EVERYMAN

Marvel/Epic: *One-shot 1991*

Bernie Mireault and Madman creator Michael Allred feature familiar themes of death and rebirth. A murdered witch is resurrected as a hermaphrodite and given the chance to avenge her death. When the job is done, her personality recedes, allowing other restless souls to take over the body. As yet, their stories remain untold.~JC

EVIL ERNIE

Eternity: *5 issues 1991-1992**
Chaos!: *4 issue miniseries ('The Resurrection') 1993*, 4 issue miniseries ('Revenge') 1994-1995*, one-shot ('vs The Super Heroes') 1995, 5 issue miniseries ('Straight to Hell') 1995-1996, 5 issue miniseries ('Encore Presentation) 1996-1997, one-shot ('Vs The Movie Monsters) 1997, 9 issue limited series ('Destroyer') 1997-1998, 10 issues 1998-1999, one-shot ('vs The Super Heroes II') 1998, 3 issue miniseries ('Depraved') 1999, 3 issue miniseries ('War of the Dead') 1999, one-shot ('Untold Tales') 2000, one-shot ('Pieces of Me') 2000, one-shot ('Returns') 2001*

Despite writer Brian Pulido claiming he's created something different, other than a slapdash attempt to explain a murderous personality as the result of childhood abuse, Evil

Ernie is identical to the horror movies it's inspired by. So, in the same spirit... the Eternity series (later subtitled 'Youth Gone Wild') has one guy ripped in half, two eyeballs poked out, the pneumatic personification of death in a bikini, a swimming pool of blood, the storming of the White House by killer zombies, dozens of corpses, ten ribs, a nutty-dream reading machine, graveyard-fu, zombie biker-fu and square-jawed psychiatrist pushed too far-fu. Heads roll, eyeballs roll, truckers roll. Half a breast, no beasts unless you count Ernie, no dwarves. The earlier Chaos series are much the same, except in colour with four fewer ribs, and there's an Adventure Comics reprint of the first Eternity issue, and a Chaos reprint of the Eternity series titled 'Youth Gone Wild: Encore Presentation'.

From 'Destroyer', well-drawn in places by Kyle Hotz, there is a marginal improvement, as Pulido co-plots with other, usually better, writers. Fans of David Quinn's work might want to check 7 of the ongoing series (although no-one else should bother), and Pulido's back thereafter.~WJ

EVIL EYE

Fantagraphics: *9 issues + 1998 to date*

This is a showcase for Richard Sala's wonderful creations. 'Reflection in a Glass Scorpion', due to finish in 12, is a complex mystery along the lines of 'The Chuckling Whatsit' (serialised in *Zero Zero*). Would-be photographer, Kasper and Judy Drood, Girl Detective, team up to solve a number of murders that seem to involve a scientist, Massimo Ibex. He's trying to unravel the secrets of longevity by experimenting with glandular fluids, but is being hunted by Auntie Azalea and her crew of girl pirates as well as Herr Schpook, a war criminal. In the back-up strip, Peculia is a young woman whose evening strolls attract the attention of the masked Justine, as well as various zombies and other scary creatures, but her butler, Ambrose, usually appears out of nowhere when things become too dangerous. Both Obscurus, a strange hunter/protector, and Dr Trepan seem to believe that Peculia can survive an examination that involves looking at four photographs, which have terrified everyone else. There's also a *Peculia* paperback reprinting strips from this series with a new colour story. Sala's characters exist in a twilight world where something menacing is always just a shadow away, and very few emerge unscathed. His artwork is both grotesque and whimsical; it's very much his own, but shows the influence of Aubrey Beardsley and Edward Gorey amongst others. The humour is delightfully black and the twisted plots as labyrinthine as the tunnels under the city into which Judy stumbles.~NF

Recommended: 1-9

EVILMAN!

Moonstone: *One-shot 1996, 2 issue microseries ('Tentacles, Toasters & Terror') 1997, one-shot 1999*

Evilman resembles a big peanut with teeth and limbs. With such imagination expended on the design there was obviously none left for the stories. Or maybe there was none in the first place.~DB

EX-DIRECTORY:THE SECRET FILES OF BRYAN TALBOT

Knockabout: *One-shot 1997*

This collects short strips by Bryan Talbot from hither and yon, three in collaboration with Alan Moore and Neil Gaiman. These are the highlights of the comic, and well worth the purchase if you've not come across their original printings in *Food For Thought* and *Knockabout*. The other strips are decently drawn, but show little hint of the good writer Talbot would become.~FP

EXCALIBUR

Marvel: *125 issues, 2 Annuals, 1 Graphic Novel ('Weird War III'), 6 Specials 1988-1998*

Anyone wishing to dip into *Excalibur* should be aware immediately that if an issue has the hand of Alan Davis as artist or writer it's a decent superhero story or better, whereas those with which he has no involvement veer from acceptable to mediocre. *Excalibur* debuts as an uneasy mixture, bonding *Captain Britain* and Meggan from the Marvel UK *Captain Britain* (written and drawn by Davis) with three surplus to requirements X-Men Nightcrawler, Phoenix and Shadowcat. The team unite in a special later re-issued as 'The Sword is Drawn', taking their tenuously X-Men linked name from *Captain Britain*'s Arthurian origins and British base of operations. The debut is ordinary, but the ongoing series hits its stride immediately, merging a far lighter tone than writer Chris Claremont was adopting for his contemporary X-Men work with the meticulous storytelling, humourous artistic asides and splendid pencilling of Alan Davis, well matched with Paul Neary's inking. That mixture is best sampled in 4-5 featuring a daft set of old Captain Britain villains and the only slightly less daft X-Men foe, Arcade. 11 begins 'The Cross-Time Caper' in which the team are bumped through a series of other-dimensional Earths either being transformed themselves or encountering variations of familiar characters. It drags on until 24, having long outlived its welcome, and with Davis and Neary wise enough to have effectively bailed out with 17, although possibly out of guilt for their part in starting the mess they return to finish it in 23 and 24. The parade of fill-in artists don't offer anything other than filling pages, even the odd combination of Barry Windsor-Smith inked by Bill Sienkiewicz in 27, and Claremont's best post-Davis issues are the *St Trinians* homage in 32-34, reuniting Shadowcat with her team-mates.

Davis returns to write and pencil from 42, in the company of polished inker Mark Farmer. Until 67 they provide the best run of Excalibur issues, introducing interesting new characters (particularly Kylun The Barbarian and the Technet, inept alien bounty hunters), restoring a sense of humour to the series, and providing inventive excellently drawn superhero stories. Davis also has the consideration to wrap up mysteries introduced in the earliest issues. Highlights of his run include a telling time for Phoenix from, of all people, Galactus in 61, and in 66-67 an finely crafted sequel to the fêted 'Days Of Future Past' story from *X-Men* 141-142. 94 offers a far lesser dabble in the same waters. After Davis there's a very rapid plunge into mediocrity, as *Excalibur* becomes more closely integrated with *X-Men* titles, although there's a slight blip back to quality for Scott Lobdell's touchingly written 71 tying up an *X-Men* loose end concerning Colossus, marred by some unsightly artwork. Later fan favourite Joe Madureira debuts in 57 and 58, but he's still learning here.

83 is a step back up. The introduction of writer Warren Ellis prompted fanfares, but the attractive art of Terry Dodson and W.C. Carani is equally worthy of note. Sadly they only last the single issue. The jarring inconsistency to the art lasts for the remainder of the run, and it's a damning statistic that in the five years post-Davis no penciller manages more than four consecutive issues. David Williams in 89 and portions of the following two issues is very good, but it's the unappealling Ken Lashley who draws more issues than anyone else, and the one period of relative stability is when Casey Jones or Carlos Pacheco pencil all issues between 92 and 103. Both styles have an appeal, with Pacheco specialising in pneumatic women. Ellis brings a bleak sense of humour to the title, along with his trademark chain smoking Englishman who projects an offensive personality, but is sound underneath. In this instance it's Pete Wisdom, mutant covert agency operative. Beyond his alterego, Ellis isn't very interested in Excalibur other than Shadowcat, and she monopolises the majority of issues he writes, but he does evolve the title adding the homeless Colossus and Rahne Sinclair to the team. Super-villains are few and far between in the Ellis issues, except when punctuated by four issues of *X-Calibre*, a forced tie-in to the ill-conceived marketing-led 'Age of Apocalypse' story running in all *X-Men* titles. Ellis' issues are best sampled as *Excalibur* is prodded into become proactive once again in 97-100, which reinforce the team and re-introduce the Hellfire Club. Ben Raab is the writer who sees the title into cancellation, never bad, but with no spark to distinguish his scripts, his best being the final issue. Those who enjoy

sentimental superhero gatherings will be rewarded by the sloppy everything including the kitchen sink wedding of Captain Britain and Meggan.

Despite their number, *Excalibur* has been very poorly served by the graphic novels and specials distinct from the ongoing series. None of them are the complete article, with 'Air Apparent' and 'Possession' total stinkers to be avoided at all costs, although it one would be extremely curmudgeonly not to be captivated by Art Adams' art for 'Mojo Mayhem'. Shame about the script, though. Scott Lobdell's on better form for *Excalibur Vs the X-Men*, in which they are shunted around time and matched against the original X-Men. It just about merits the designation 'Special' despite some of the artists, each of whom handle a chapter, being decidedly below par. Both annuals contain a decent short back-up tale, but only masochists will wade through the remaining tosh to get to them.~WJ

Recommended: 3-5, 42-43, 61, 66-67

EXCRETA

Slab-O-Concrete: *1 volume 1999*

Taking bodily fluids as a theme, Danish cartoonist Ole Comoll Christensen turns out half a dozen short strips commenting on human nature. They're whimsical, funny and drawn in a slightly more jagged Kurtzman style. This won't change the way you look at the world, but is worth a look if you come across it.~WJ

THE EXEC

Comics Conspiracy: *One-shot 2001*

A tale of corporate power that actually turns out a lot better than expected from the cliched opening sequence and characters. In a near-future world corporations are unrestrained, and resolutely corrupt in achieving their aims, so someone has to change things. You can almost imagine Bruce Willis starring in the film version. There are connections with previous Comics Conspiracy releases *Operator 99* and *Taxman*.~FP

Mack Bolan THE EXECUTIONER

Innovation: *4 issue miniseries 1993*

The man who provided the template for Marvel's Punisher transfers from paperback novels to the comic page. He arrives with the considerable coup of his author Don Pendleton (and wife Linda) adapting the first *Executioner* novel 'War Against the Mafia'. It's a serviceable action thriller that sees the vet marksman revenge the murder of his family by infiltrating the Mafia, and it's serviceably drawn by the team of Sandu Florea and Mike Deodato Snr. The first issue in particular, though, suffers from time and diluted copies rendering Bolan cliché-riddled, and despite being the original article, the concept isn't strong enough to withstand that.~FP

EXILES

Malibu: *4 issue miniseries 1993, 11 issues 1995-1996*

The Exiles are a group of superpowered youths whose abilities have been triggered by the Theta Virus. Corporation head Malcolm Kost is planning to use the virus to create an army and the Exiles are out to stop him. Unfortunately they haven't the experience and after recruiting Amber Hunt most of them are killed in an accident caused by her reckless attempt to activate her powers. Written by Steve Gerber, *Exiles* is rather frantic, and serves as a prelude to *Break Thru*. Ghoul survived this title to become a member of Ultraforce. After Marvel's absorption of Malibu's Ultraverse, The Exiles name is re-allocated to the group of characters from both companies' universes lost and thrown together on an alien world. The new line-up is Juggernaut, Reaper, Siren, Blaze, Shuriken, Amber Hunt and Warstrike (renamed just Strike). As with all the Ultraverse material after the Marvel takeover, it's not worth the effort.~NF

EXILES

Marvel: *20 issues + 2001 to date*

The promotion for this series described it as "Like the TV show *Sliders* with mutants", so one could readily be forgiven for muttering "Sweet Zombie Jesus", swearing off superheroes for life, and stomping off to look out those back issues of *Katy Keene*. It would be more accurate, though, to describe the series as "Sliders done right", and it manages, from an unpromising premise, to be an upbeat, entertaining comic. Our dimensionally-orphaned heroes travel across parallel worlds, trying by their actions to undo the twists in time that left each one of them as a chronological 'loose end', without a reality to return to – hence the series' name. The stars are Blink, an alumna from 'our' *X-Men*'s 'Age of Apocalypse' storyline, and a rag-bag accumulation of alternate-earth X-people, none of whom were seen before. We have no good reason to care about them, but scripter Judd Winick is skilful enough to make us care, which makes it doubly interesting when the first fatality occurs at the end of 2, and further cast changes and upheavals become a feature of the series. Mike McKone's clean, pleasing linework is adventurous without being needlessly cluttered, or ever sacrificing clarity for style. Despite starting as a collection of genre stereotypes – the orphan-of-war, the big strong guy, the jester, the slutty chick – the deft and lively handling of the characters enables the series to transcend its apparent limitations. An entertaining read with a touch more depth than most super-hero fare.~HS

EXIT

Taxi: *8 issues 1992-1994**

Caliber: *6 issue miniseries 1996*

A triumph of design over content, this highly acclaimed series by Nabiel Kanan is possibly one of the most oblique comics ever. The introductory issue is the most impenetrable, with captions and dialogue balloons sprinkled almost randomly over the pages. It's a story of people discovering the lies they've told to and about each other, with a backdrop of one young man's obsessive quest to get to America, and the sudden outbreak of war.

Granted, any series which opens a couple of issues with sophomoric poetry deserves a degree of condemnation, but nevertheless there is much to commend here. From 2, while the story-telling is as deliberately ambiguous, the art is much stronger, with striking and lovely images grabbing your attention. Nevertheless, virtually the entire series is talking heads or conversational set-pieces, with an elegant avoidance of anything actually happening that isn't related in conversation. Just when you think this is the only way Kanan can tell a story, an unconnected little tale, 'Accident; The Recovery Room', appears in 4, and is clear, concise and punchy. So all this floaty, woolly stuff must be a deliberate choice, then. Ah, well. Later issues are told with single horizontals over double-page spreads, which enhances the already considerable visual appeal. The Caliber series exaggerates the faults of the first, with Karl and Louise returning. There's a continual feeling of being short-changed as admittedly nicely drawn static illustrations accompany blocks of text. The conclusion is even worse for having hardly any text, and very little story.~HS

EXIT 6

Plastic Spoon Press: *3 issues 1998-1999*

Here's a crying shame. Sean Tiffany is a talented writer with an intriguing story to tell about supernatural occurrences in a little town. The cast is good, the plotting's good and the artwork is very good and far better than you'd expect from anyone producing their first three comics. And it improves visibly over the three issues. It was well promoted, and well received by those who got to see it. And the advance orders for 3 came in at under five hundred copies. What is wrong with comic readers?~WJ

EX-MUTANTS

Eternity: *Series one 8 issues 1986-1987*, series two 15 issues, 1 Special 1988-1989, series three 18 issues 1992-1994*

Ron Lim's first comics work was this daftly titled idea of a bunch of genetically created humans being the only non-mutates in an otherwise devastated world. Don't bother. The second series was subtitled 'Shattered Earth Chronicles', and revives all the characters for another go round. It's no better. The third series was a relaunch as part of Malibu's superhero line, with the fantasy and horror aspects toned down. There's some cross-pollination with *The Protectors* in later issues, but this remains undistinguished in every respect.~WJ

EXO Squad

Topps: *1 issue (0) 1994*

Intended as the prelude to a miniseries, and based on an animated science fiction series, in this issue, Len Wein and Joe Staton introduce the Exo Squad as a police force battling space pirates and the man-made, Neosapiens, whose unsuccessful rebellion led to the force's creation. It's garish and very dull.~NF

EX-PARTE

Lone Star: *2 issues + 2002 to date*

The title is a legal term referring to an appeal or injunction on behalf of only one party in a court case, and Janine Porter is a lawyer who represents costumed characters. It's written with some wit by Bill Williams, as Porter defends an arrogant undersea monarch in 1 and copes with a hero who draws his powers from animals in 2. The sources are obvious, but the treatment isn't, and anyone who likes superhero comics with more than fights should enjoy this.~WJ

EXPLORERS

Explorer Press: *3 issues 1995-1996*
Tapestry: *3 issues 1996-1997*

Xenology, Inc. is a team of troubleshooting investigators of strange phenomena, led by Alex and Anita Hunt, with their sons, Trex and Chico, Leon, brother of Alex and a pet dinosaur, Stan. The team's nemesis, Kimberley Wolcott attacks them with mechanoids in 1 and supplies the tools for an apparent trip to the Wild West in 3. Investigation of a government installation leads to the discovery of Primate, whom they eventually rescue in 1-2 of the Tapestry series. The last issue sees them unearthing some Aztecs from a lost city. Written by Terry Collins and with artwork from Bill Neville (1-2) and Brian Hodges (3, 1-3), Explorers has a *Jonny Quest* approach and appeal, though the adventures themselves are more reminiscent of those from the *X-Files*.~NF

EXPOSURE

Image: *4 issues 1999*

Doctor Lisa Shannon and Officer Shawna McMatta Diaz quit their respective jobs to fight monsters and the supernatural as paranormal investigators. But also, and much more importantly, to shed their clothes as often as possible. If your main interest in a comic is near-naked females you can find much better-drawn ones than those presented by Al Rio.~DB

EXQUISITE CORPSE

Dark Horse: *3 issue miniseries 1990*

An exploration of the psychology of a sex-murderer. Designed so the issues can be read in any order, it has the feel of an eastern European experimental film: clarity and resolution not a priority, but it leaves something behind in your head.~FC

THE EXTENDED DREAM OF MR. D.

Drawn & Quarterly: *3 issue miniseries 1998-1999**

This is purportedly a visual interpretation of the dreams experienced and later transcribed by a man who lapsed into a forty day coma. The logical and convenient conclusion rather argues against this. Whether or not it's the case is irrelevant, though, as Spanish cartoonist Max weaves dreams within dreams and sustained ethereal intrigue in the manner of a Thomas Pynchon novel. His expressionistic art suits the fables, and he adapts his style as necessary. This is far more about mood than the linear exposition of a story, and will therefore not appeal to many. Those who value instinct above logic and let the heart rule the head should investigate.~FP

EXTINCT!

NEC: *2 issues 1991-1992*

The comics equivalent of a Dr Demento show, or the *Golden Turkey Film Awards*, this reprints preposterous or offensive, or bizarre, or hilariously wrong-minded stories from the 1940s and 1950s. See racial epithets thrown with abandon, wife-beaters, murdering mothers, seductive robots, teenage sex clubs and much, much more lovingly compiled by editor Larry Boyd. He also provides a good article about the sanitising effect of the Comics Code on reprinted tales. The most preposterous story of the lot is about the man-size killer cactus plant in 1. Some will see this material as just plain bad, with no redeeming features, so only approach if your kitchometer is set high.~WJ

EXTRA!

EC: *5 issues 1955**
Gemstone: *5 issues 1999-2000**

When EC could no longer publish tales of zombies and ghoulish revenge they cast around for fresh, action-packed genres and came up with the glamorous and dangerous world of news reporting. *Extra!* was largely created under the aegis of Johnny Craig, who drew the lead story in each issue and edited. In his hands the stories owe more to newspaper adventure strips than traditional EC fare, with no tendency for shock/suspense endings or ghostly goings-on creeping in. Unfortunately they're also among the dullest stuff EC ever produced.

Unlike most ECs, *Extra!* established a regular set of strips. Craig's 'Dateline' featured fearless newshound Keith Michaels (oh for the days when Keith was a heroic name!) travelling the world with his assistant Vicki to follow up rumours of secret conspiracies and hidden Nazi treasures. It should have offered plenty of variety, but many of the stories are pedestrian; but they're nowhere near as contrived as the adventures of Slick (later wisely changed to Steve) Rampart, photographer, who always seems to be bumping into assassins disguised as snappers (1) or taking pictures of things he shouldn't (2). John Severin's artwork was bold and assured, if a bit roughly inked, especially when compared to Reed Crandall's super-smooth efforts on the third regular, 'Geri Hamilton'. Being a woman was pretty much Geri's only gimmick; inevitably as well as having Far East adventures she ended up investigating sob stories, as in 3's eponymous tale of a young hood who's convinced his dead father must have been someone important. It's dire, but not as bad as 1's 'Holiday For MacDuff', in which a Scottish reporter stumbles upon a scientist hidden from enemy nasties on a tiny Scandinavian island. Much "hoots, mon"-ing and "wee while"-ing ensues. The Gemstone issues are facsimiles and a hardcover black and white book collecting 1-5 was published in the 1980s.~FJ

EXTREME DESTROYER

Image/Extreme: *2 issues 1996*

Parts one and nine of a story running through other Image Extreme titles, pretentiously mislabelled Prologue and Epilogue but in fact, of course, the opening action and climax. It's dedicated to Stan Lee and Jack Kirby, which is presumably meant to excuse the whole thing being not much more than an overblown rip-off of the first Galactus story. However, in this version, the Silver Surfer analogue gets to knob one of the busty superheroines, which is the sort of fine idea available to you when you have twenty-one people on the creative team.~GK

EXTREME JUSTICE

DC: *19 issues (0-18) 1995-1996*

An ugly and ignominious end to the inventive and lighthearted version of the Justice League introduced in the 1980s, seemingly introduced to copy the violent Image superhero titles then extremely popular. Considering themselves constrained by the Justice League's ties to the United Nations, some members wanting to take a more proactive role against villains form their own group.

---

* Available in a collected edition

Predictably enough these include the gung-ho Maxima and Captain Atom, but the lack of consideration given this title is exemplified by the further inclusion of the previously lighter Blue Beetle and Booster Gold. The only creator to last longer than half a dozen issues is writer Dan Vado (0-7), and he's obviously ill at ease with the premise. Possibly again in a misguided emulation of Image, the art is ugly and distorted throughout. Horrible.~WJ

EXTREME SACRIFICE

Image/Extreme: *2 issues 1994-1995**

Mind-bogglingly awful multi-title crossover from Rob Liefeld's Extreme Studios. There are demons, immortals, and superheroes trying to sort out a cosmic game between the infernal Mr Graves and the recently deceased Chapel, but everyone involved seems as baffled as you will be. The comics to beware of are *Extreme Sacrifice Prelude, Supreme* 23, *Bloodstrike* 18, *Brigade* 16, *Newmen* 10, *Team Youngblood* 17, *Prophet* 10, *Extreme Sacrifice Epilogue* and *Youngblood Strikefile* 11 which promised to slaughter prominent characters presumably in a bid to boost sales and revive interest. Not enough and way too late.~WW

THE EXTREMIST

DC/Vertigo: *4 issue miniseries 1993*

Peter Milligan wrote an interesting story, which jumps back and forth in time, concerning hidden desires and frankness in sexual relationships, vigilante killings, racism, seduction, corruption and hairdressing. Probably a little too much was attempted in such a short run, and the whole may seem slight because of it, but it's very readable indeed, not unprovocative. Additionally, Ted McKeever produced throughout some of the best of his blotched, smeared and scratchy (to great effect) high-contrast art. It's an all-too-rare serious piece of work, and Patrick/Pierre, the memorably sarcastic, campy, manipulative, bisexual (at least), Marquis-de- Sade-quoting, immoralist, cigarette-holdered presiding villain, is more self-consciously extreme than any of the soppy characters who wear the Extremist bondage uniform. That might be the point of it, or part of the point of it. Interesting.~GK

THE EYE OF MONGOMBO

Fantagraphics: *7 issues 1989-1991*

Imagine if you will Indiana Jones played by Donald Duck. That's the thrust of *The Eye of Mongombo*, played strictly for laughs by Doug Gray. Renowned archaeologist Cliff Carlson pisses off the wrong witch-doctor and is transformed into a talking duck. Before searching for a way out of his situation he decides to follow an unscrupulous colleague who's stolen a map purporting to reveal the location of the legendary eye of Mongombo. It's deep in the Amazon jungle, so that's where our cast head. When each issue's recap and page-numbering systems are a delight in themselves, you know you're on to a good thing. Unfortunately, Gray was obviously tempted away by the thought of earning money somewhere, and leaves the story incomplete. What there is, though, is consistently and astonishingly funny in a slapstick and wisecracking fashion.~FP

Recommended: 1-7

THE EYEBALL KID

Dark Horse: *3 issue miniseries 1997*

Ed 'Ilya' Hillyer illustrates an action-packed story that spins off from Eddie Campbell's *Deadface.* Written by Campbell, it originally appeared in *Dark Horse Presents* and stars the multiple-eyed grandson of Argus, who stole Zeus' power and slew all the Greek gods except for Bacchus and Hermes. This series takes up the story after a particularly nasty group of mythical brothers, the Telchines (rendered in Campbell's updating as corporate nasties), have in turn stolen the power, using the Stygian Leech. After a whistle-stop tour of the Eyeball Kid's origin, there's a madcap, knockdown fight between Hermes and his Big Hand (don't ask) and the Telchines for possession of the leech. Ilya does a good Eddie Campbell take-off on the art, and the script is amusing if slight.~FJ

EYEBEAM

Double Diamond: *5 issues 1990-1993*

Reprints of humourous newspaper and magazine work, most of which is three-panel or one-page in format. Sam Hurt's stuff is good on the whole, as he has the offbeat thinking needed to crack the three-panel formula. Even the fact that he can't draw that well doesn't matter much, as the ability to be funny on paper is far rarer than the ability to draw.~DB

E.Z. WOLF'S ASTRAL OUTHOUSE

Last Gasp: *One-shot 1977*

E.Z. Wolf goes on a journey through the astral plane, a plot device creator Ted Richards used to avoid thinking more than four pages ahead of the page he was drawing. His lumpy cartooning is great, and your reading pleasure might increase if you're on the astral plane yourself, but don't bank on it.~FP

F-III Bandit

Antarctic: *10 issues 1995-1996*

Single or two to an issue fantasy stories about changing points in ordinary lives, like evolving a tail, transforming from man to woman, losing an image from the mirror and meeting a werewolf, meeting Peter Pan or falling in love with the personification of death. Ippongi's Bang strips are sexy and humorous in her light-touch manga style. These are multi-faceted tales; not perfect by any means, but enjoyable.~NF

FABLES

DC/Vertigo: *6 issues + 2002 to date*

The surviving inhabitants of the myriad magical realms have settled on Earth as a secret society of refugees, driven out of their own worlds by The Adversary. Creating the new community of Fabletown, with King Cole as Mayor, they hide their true natures from humanity. 1-5, by Bill Willingham and Lan Medina, concern Sheriff Bigby Wolf's attempt to solve the disappearance and apparent murder of Rose Red, Snow White's sister, whose apartment has been wrecked and is covered in blood. Suspects include her boyfriend, Jack of the Tales, Prince Charming and Bluebeard, the last of whom she had agreed to marry. 6 is the start of the five-part, 'Animal Farm', by Willingham and Mark Buckingham, set on the Farm where the fables that can't pass as human are forced to live. These fables, however, are tired of their imprisonment and resentful of the rest of Fabletown. Willingham has created an entertaining and clever premise, with scope for a wide range of stories, and the characters seen so far, as well as the politics of their world are well drawn. Medina and Buckingham are both fine artists and this is shaping up to be a series to savour, and 1-5 have already been collected.~NF

FABULOUS BABES

Drawn & Quarterly: *1 issue 1995*

Anthology title by Rozanna Bikadoroff, Fiona Smyth and Maurice Vellekoop that seriously lacks direction. It has the feel and contents of a fanzine behind a deluxe colour cover, and trots out some very tired ideas (fake ads in which Charles Atlas becomes Charlene Atlas, for instance). There are more illustrations than strips, and while Fiona Smyth's work is very pleasing on the eye, it doesn't tell a story.~FJ

THE FACTOR

About Comics: *5 issue miniseries (0-4) 1998-1999*

First seen in *Negative Burn* 29-31 (reprinted in 0), writer Nat Gertler's good idea is to focus a comic on a superhero rarely seen, so leaving him open to assorted interpretations. Gertler's stories highlight those affected by the superhero either directly or otherwise. They're admirably varied in approach, will often surprise and there is one gem in each issue. On the art front there's less consistency as enthusiastic amateurs mix with the likes of Matt Feazell, Carla Speed McNeil (both 2), Ted Slampyak (3) and Joe Staton (1). The artistic find, though, is Janine Johnston (0).~FP

FACTOR-X

Marvel: *4 issue miniseries 1995*

X-Factor became *Factor-X* for the four months of 'Age of Apocalypse', which thrust the X-characters into an alternate Earth where their enemy ruled supreme. Probably the best of the Apocalypse books, the root of the story here is the jealousy between Alex Summers and Scott, the brother whose shadow he can never hope to escape. It's easy to see the characters we know in these darker versions of themselves, a tribute to the skill of John Francis Moore and Steve Epting, at the time the 'real' X-Factor's regular creative team.~JC

Recommended: 1-4

Incredible FACTS O'LIFE Sex Education Funnies

Multi Media Resource Centre: *One-shot 1972*

Information about sex and related topics by the top underground cartoonists of the day. Thirty years on it remains a paragon of non-patronising good sense, although a stellar list of contributors fall short of their best work. Gilbert Shelton starts off with 'Fat Freddy Gets the Clap', and also on board are Robert Crumb, Shary Flenniken, Gary Hallgren, Bobby London and Ted Richards.~WJ

FADE FROM BLUE

Second 2 Some Studios: *4 issues + 2002 to date*

Four young half-sisters are forced into hiding when their mothers are killed and their bigamous father disappears. Now, nine years later, Iya's finding it hard to stay in a job, Elisa's in acting school and starting to date, Christa is a freelance writer and Marit is a police sergeant, still trying to find their father and their mothers' murderer. Myatt Murphy and Scott Dalrymple are producing a terrific comic with realistic dialogue, well-drawn characters and smooth, realistic artwork (hints of John Byrne, but better).~NF

Recommended: 1-4

FAFHRD AND THE GRAY MOUSER

Marvel/Epic: *4 issue miniseries 1990-1991*

Howard Chaykin might not have been the obvious choice to adapt veteran fantasy writer Fritz Leiber's light-hearted sword-and-sorcery stories, but his scripting is deft, witty and faithful to the source material. 1 adapts *Ill Met in Lankhmar*, explaining how the sophisticated barbarian Fafhrd and dapper cutpurse The Gray Mouser come to be partners. Thereafter each issue contains two stylish stories of swordsmanship, thievery and magic. Mike Mignola, inked by the great Al Williamson, does an excellent job of capturing the decadent atmosphere of Lankhmar and the nightmarish, almost surreal quality of the magic permeating every scene. Credit should also go to Sherilyn Van Valkenburgh, whose colouring ensures that the look of the work as a whole is richly rounded. A fine example of how to get adaptations right.~NF

FAIRY TALES OF OSCAR WILDE

NBM: *3 volumes 1992-1998*

Quite what the great man would have made of these comic adaptations of his famous fairy tales we can only guess, but he would surely have appreciated the love and care that have gone into them. Artist and adapter P. Craig Russell has always been a subtly beautiful illustrator, and his art here does not disappoint; it is pure elegance and grace. As an adapter, he is perhaps a little too true to the text but, although the strips are rather wordy, they move along briskly none the less and the stories are in any case classics. That said, there is a melancholia that underpins many of the tales, and Wilde tacks on some positively heartbreaking endings to stories such as 'The Selfish Giant' (in volume 1) and 'The Infanta' (in vol 3), so they are unsuitable for more sensitive children.~DAR

FAITH: A Fable

Carbon-Based Books: *Graphic Novel 2000*

The salvation of jaded and disgraced journalist Roy Westerly comes via a 12 year old girl with a remarkable capacity for connecting with people to help them overcome their problems. Bill Knapp produces a far better drawn book than might be imagined from the poor cover, and his exploration of humanity's need for reassurance is warm and touching. He's not skilled enough, however, to avoid the made for TV movie sentimentality infusing his story. This is a debut of enormous promise, though, and Knapp's progression should be worth monitoring.~WJ

The FALCON

Marvel: *4 issue miniseries 1983*

Quality adventure as Jim Owsley turns Captain America's black sidekick into a strong, positive, heroic force in the slums of New York. Paul Smith and Mark Bagley illustrate tales of gang-bangers, giant robots, civil unrest, supervillains and multiple kidnappings of Ronald Reagan. Great fun.~WW

FALLEN ANGELS

Marvel: *8 issue limited series 1987*

This is a New Mutants spin-off. Roberto Da Costa attacks a friend in a moment of anger, decides instantly that he must be an evil person just like his father, and runs away to New York to make a start on his life of crime. The mutant group Fallen Angels invite him to join them, and despite themselves they end up teaching him about friendship and loyalty and stuff like that. The series is probably intended as humour (what else can one make of the lobsters that are part of the group?) but there aren't nearly enough jokes and the few that there are should never have been stretched over eight issues. Highpoint: the origin stories for the lobsters from issue 3, pencilled by Marie Severin.~FC

Recommended: 3

FALLING IN LOVE

DC: *143 issues 1955-1973*

Another long-running DC romance title, *Falling in Love* had the usual stable of consummate craftsmen working on the stories: Mke Sekowsky, J. Scott Pike, Gene Colan, John Romita, John Rosenberger et al. One odd thing, though, is the bizarre medical fetish present from the early 1960s onwards. This title could hardly claim sole licence on the trick, of course, but it does seem that *Falling in Love* had a particular fondness for stories depicting a crippled/blind/disfigured heroine tearfully confronting or fleeing from the man she loved! The Editor-In-Chief must have spent a lot of time in hospitals about then. Dying in dignity in 1973, without reaching the frantic hysteria that its sisters attained trying to keep an audience in more permissive times, *Falling in Love* is remembered by those who remember it at all as a solid, craftsmanlike title with many exquisitely illustrated stories.~HS

FALLING MAN

Image: *1 issue 1998*

On the anniversary of his wife's death, a man starts falling through one plane of reality after another, for reasons undisclosed, though one theory is advanced. His understandably confused reactions become a bit annoying, and the lack of background and context makes the whole exercise a little too cryptic for its own good. Cancelled before completion.~HS

FALLOUT

G.T. Labs: *1 volume 2002*

The third of Jim Ottaviani's distillations of scientific achievement in comics form. Whereas *Two-Fisted Science* and *Dignifying Science* presented biographical snippets, here Ottaviani takes on the development of the atomic bomb from the conception of theory to the fallout. It's a clever title, referring to political consequences in later, more suspicious times rather than the obvious association. The primary artists, Janine Johnston, Steve Lieber, Vince Locke, Bernie Mireault, and Jeff Parker all turn in creditable pages, while Eddie Newell's portraits of the major players are excellent. This, though, is a very dry tome packing in detail, but often unintelligible without reference to the copious notes at the back, thus defeating the purpose. The best part, Oppenheimer's later problems, benefits from the inclusion of significant amounts of text, highlighting the problem that this is perhaps a story that cannot be told effectively in comics.~WJ

FALLOUT 3000

Caliber: *1 issue 1996*

As Mike Deodato's popularity increased in the USA, Caliber reprinted old strips never previously seen in English. This is his first published work, illustrating a florid and tedious exposition on the end of humanity, written by his father. It's drawn well enough, but hardly in the style that accelerated his fanbase.~WJ

FAMILY MAN

Paradox Press: *3 issue miniseries 1995*

The second of Paradox's series of mystery novels, Family Man is written by noted thriller-writer Jerome Charyn and drawn by Joe Staton. It's set in the near future, when New York is a ruined city, the police are out of control and the Mafia families have all been wiped out. The Family Man is Alonzo, haunted by the murder of his wife and children. His brother Charles is the leader of the police force and is coming ever closer to total power in the city. When Charles orders a round-up of all 'criminal' elements into a makeshift prison camp, the various plots start to come apart and only Alonzo can save the city. Charyn is a good writer and this is some of Staton's best work. The result is not perhaps the best thriller ever written, but it's certainly worth a look.~NF

FAMILY TREE

Diva: *One-shot 1994*

Collection of a gay comic strip sequence with a 'pretend family' of friends visiting the *Gay Games*. Amusingly written and roughly but appealingly drawn, this was planned to launch an ongoing title that never materialised.~HS

FANBOY

DC: *6 issue miniseries 1999**

Mark Evanier and Sergio Aragonés are on good form in this amusing series featuring the life and times and vivid imagination of geeky comics fanatic, Finster. He has the best job in the world – he works in a comics store! He takes his comics very seriously, so much in fact that his mind drifts into imaginary adventures. These segments are drawn in relevant style by some of the industry's finest talents. Great to see Russ Heath on Sgt Rock again in 4. But what a shame we'll never see Gil Kane on Green Lantern again as we did in 2, or Dick Sprang on Batman in 5. An ongoing plot involves our hero lusting after a pretty young girl, who scorns his advances, but failing to notice the young lady who does admire him. We can probably see a bit of ourselves in our young hero so when it ends happily, there's hope for us all. Other notable contributors include Neal Adams, Brent Anderson, Dave Gibbons, Mike Grell, Frank Miller, Marie Severin, Dan Spiegle and Bernie Wrightson to name a few!~HY

FANG

Sirius: *3 issue miniseries 1995, 4 issue miniseries ('Testament') 1996-1997*

Fetishistic wankathon poorly drawn and badly written by Kevin Taylor. The first series lets Taylor achieve the treble with shoddy colours as well.~FP

FANNY

Knockabout: *4 issues 1991-1993*

The flagship title of the British Women's Comic Collective, each issue has a different theme. *Ceasefire* dealt with women and war, mostly the then current Gulf conflict, and the topic of *Voyeuse* was sex. *Dissenting Women* covered religions, and 4's *Night Fruits* related women's experiences with dreams, prophesies and the general supernature. The title got off to a slow start, and was originally something one bought to be seen to be doing the right thing rather than with expectation of enjoyment; nevertheless there were always one or two good pieces. By 4 Fanny had become a solid, thought-provoking read.~HS

FANTAGOR

Last Gasp: *4 issues 1970-1972*

An underground anthology put together by Richard Corben, whose own contributions are by far the highlights. All issues feature beautiful and occasionally fully painted Corben art, but it's only 4's 'Space Jacked' that has a memorable story.~DAR

FANTAGRAPHICS Graphic Novels and Collections

Looking back over Fantagraphics' output of graphic novels it becomes apparent that editors Gary Groth and Kim Thompson have always chosen carefully no matter how schizophrenic their tastes may have seemed at the time. Their line shows no inclination to jump on bandwagons, and it is clear that, given the limited financial options available to them, they have consistently tried to introduce new reading experiences to the audience, including handsome reprints of vintage artists such as Otto Messmer *(Felix the Cat)* and their *Red Barry* collection. Initially the output of original material was intermittent, beginning with a reprint of Gil Kane's violent *Savage*. Recently they were able to unearth Kane's 1974 sword and sorcery creation *Blackmark*, originally published by Bantam Books, and reprinting not only it, but also a second, unpublished volume. There were early anomalies like *Children of the Night*, a volume containing two black and white fairy stories, both written by Jan Strnad. His long-time collaborator Dennis Fujitake drew the first strip, about Winston, a bored dragon, and Tim Solliday illustrated 'Goblin Child' entirely in pencils. Both are competent but unexciting.

Given the volume of material issued by Fantagraphics, it's easiest to separate them into categories, although some defy that gesture. It should also be noted that many collections are dealt with in separate entries covering the comics as originally published.

UNDERGOUND

Ignoring the many collections of comics already published by the company, from the first year or so three distinct strands to Fantagraphics' graphic novel output become obvious. The first is the production of collections of material by single creators, largely underground cartoonists, collecting strips from obscure sources accompanied by bibliographical material and strong introductions. The most notable of these, in both hardcover and paperback editions, is The Complete Crumb series (16 volumes to date), which starts with Crumb's earliest attempts at anthropomorphic strips and chronologically prints every strip and published piece of artwork since. Accompanying it are a series of sketchbook volumes, nine so far, and the themed collections The Book of Mr Natural and The Life and Death of Fritz The Cat. Equally wonderful is Love That Bunch by Aline Kominsky-Crumb, his wife. Her autobiographical strips about growing up fat and Jewish are no less brutally honest than her husband's more famous work and feature several jam strips between them. As the cover says, there's something for everyone: 'Sex, food, death, pain and romantic adventure.' Three Kim Deitch collections, All Waldo Comics, A Shroud For Waldo and Beyond The Pale, offer a broad sampling of his work. All Waldo collects the early strips about his eponymous cat hero plus appearances in Raw and Weirdo, while A Shroud collects weekly strips from the LA Reader, and Beyond The Pale selects material from two decades of cartooning. It offers a fascinating insight into Deitch's creative development from a rough, sub-Crumb style to his smooth, doll-like images today. Deitch is a painstaking stylist, but few artists approach the obsessional attention to detail evident in the work of the Friedman Brothers, who comment on modern life via the iconography of trash culture. They're not afraid to show their teeth either, lampooning everyone from Bob Hope to Tor Johnson in two collections, Warts and All and Any Similarity To Persons Living or Dead. Fantagraphics have a strong history of collecting of Zippy the Pinhead material, and have lavish reprints of Bill Griffith's Sunday pages in *Zippy's House of Fun*, while *Get Me A Table Without Flies*, Harry selects from Griffith's sketchbooks.

The collection of Spain Rodriguez' Trashman strips, Trashman Lives!, is less successful because Spain's work hasn't really moved over the twenty years covered in the collection. It depends on whether or not you're interested in his dystopian politicking in a series of stories set in a grim future where America has divided into self-governing states. His *My True Story*, is a mix of autobiography and historical accounts of key political movements such as the Paris Commune. Equally stuck in time is the work of Vaughan Bode, the quintessential spaced out illustrator and erotic asphyxiation enthusiast. A strong seller to the spaced-out-hippy club still (and there's a new generation along every ten years or so, eager to recreate the peace and love generation) there are three volumes of *Erotica*, three volumes of sketchbooks, two volumes of *Junkwaffel*, which contains the first *Deadbone Erotica* pages. *Deadbone* has most of them all over again, plus *Schizophrenia*, which kicks off with the title story, a psychedelic painted monologue about... life, the universe and not much. Bodé's most enduring character is Cheech Wizard, and there are two volumes collecting stories originally from *National Lampoon*, plus various colour strips and some new material. Scraping the barrel for the last time there's *Lizard Zen*, combining early college drawings with some of the creator's last doodling. Bodé work is colourful, phantasmagorical and rather cutesy, heavily influenced by drug taking, and the narratives tend to dribble on rather. However, he died in possibly the most entertaining way a comic artist has managed, so he should be forgiven a lot.

Optimism of Youth collects Jack Jackson's often horror-inspired underground work, including the infamous Leather Nun stories, and *God's Bosom* concentrates on his work about Texas, whether historical or satirical. While credited with producing the first underground comic, Jackson never really received the attention he deserved. Quietly fascinating is *Housebound with Rick Geary*, which sees Geary examining the minutiae of everyday life including illustrations of motel bedrooms, intermingled with a few murders. Great if you like his lumpen illustrative style. Less exciting is Howard Cruse's *Early Barefoots*, a collection of old underground work which features all the standards – sex, drugs, rock'n'roll – but lacks the smooth sophistication of his later work. Basil Wolverton was an inspiration for the underground cartoonists, and there are also two bits of Wolverton material from the 1950s and 1960s: *Wolvertoons*, a mind-boggling selection of grotesques, and *Powerhouse Pepper*, collecting strips about the dumb, but kind-hearted, strongman. The most recent underground collection is Robert 'Outsider Art' Williams' *Hysteria in Remission*, which collects much of his classic work from *Zap*, *Snatch* et al, and includes thirty pages of hotrod art done for the legendary Ed 'Big Daddy' Roth.

Fantagraphics have continued to show commitment to exploring the history of comics and regularly produce standout volumes of criticism and coffee-table reading. Among recent offering there are two books on Arnold Roth; *Arnold Roth: Free Lance* collects many of the noted editorial cartoonist's most brilliant illustrations, spanning thirty years of contributing to some of the most famous magazines in American publishing. He ranged widely, from *Sports Illustrated* to *TV Guide* to the *Saturday Evening Post*; the companion volume features two years of his syndicated strip, *Poor Arnold's Almanac* from 1959-1961, which commentated on fads and news items of the day.

NEW DISCOVERIES

Fantagraphics' second strand is the publication of initially lesser known creators, many of whom have not produced regular comics, being editorial cartoonists or illustrators instead. In their race to be experimental, a few don't actually succeed in producing comics at all, missing the storytelling point, but these are few and far between among some startling talents. Peter Kuper was introduced to a wider public with *New York, New York*, a series of meditations on life in the big city drawn in a variety of styles à la Spiegelman. Later came *World War 3 Illustrated*, collected writings and drawings from the magazine of the same name he edited from 1980 to 1988. It was followed by a volume of autobiographical stories collected from *Bleeding Heart* and *Wild Life*, called *Stripped*.

The most illuminating newspaper discovery of recent years is Tony Millionaire. His two volumes of *Maakies* strips (*Maakies* and *The House at Maakies Corner*), feature pairs of newspaper strips. The upper tier takes place on board a strange ship, and concerns the nihilistic adventures of an alcoholic crow and his jaded ape companion, who often wind up shooting themselves in the head, while the lower is a cynical gag strip (Woman to man "What do you look for in a relationship?" Man: "Two things: absolute monogamy and plenty of lying.") Brilliant. If *Maakies* isn't quite depressing enough, take a look at *Haw!* by Ivan Brunetti, a beautiful little package of single panel gags that push bad taste to the max, but are presented in such a self-deprecating manner that it's hard to dislike them. Brunetti's an amazing cartoonist anyway, and genuinely does push the boundaries both here and in his comics. If you're ever asked to define nihilism, just show Brunetti's work.

Like Brunetti and Millionaire, Steven Weissman's frame of reference seems to be strip cartoons. He continues the adventures of his large-headed, weird named kids from *Yikes in Champs* (dealing with their obsession with bike racing) and Don't Call Me Stupid, where each of his kid gang has a turn in the spotlight. The latest work, *White Flower Day*, explores the idea of getting revenge from three different angles. The repetitiveness of the action in many of the strips, and the quirks that characterise his kid gang, are reminiscent of *Peanuts*, but drawn by someone with a much more unwholesome take on childhood than Schulz. The stand out among new talents of recent years, though, is Dave Cooper. He's produced two excellent original graphic novels. *Suckle*: 'The Status of Basil' begins with Basil being born (or perhaps born into) a surreal world where plants have strange sexual overtones and strange creatures appear from nowhere. He finds his way through this confusing world, encountering more and more people and learning more about how to behave, until he reaches a city and begins to learn the pitfalls as well as the pleasures of civilisation. A bit like "What if *Pilgrim's Progress* were told by Jim Woodring", Suckle creates its own fascinating version of the world. *Dan and Larry* is an even stranger, and more intense, study of the nature of interdependent relationships. Dan is a rather dumb, sarcastic duck, lacking in confidence, and Dan is a mushroom-headed half robot who's managed to convince him he's really cool. As the strip progresses it becomes apparent that Dan is much older, cannot form relationships with adults, and is sexually attracted to Larry. Brain-bending, superlative stuff.

Santiago Cohen is another breath of fresh air, working in a very different style and to very different ends. His *The Fifth Name*, based on a story by Stefan Zweig, a pacifist who supported a united Europe and committed suicide in 1942 in exile, develops like an Arabian religious tale, but turns into a fable about humility and the inability of the pious to disassociate themselves from the world in a responsible manner. Beautifully told, it's drawn in a broad brush style with duckegg blue washes, and seems clumsy at first until the eye becomes accustomed to its particular visual language. There's also the Raw -inspired Kaz (*Buzzbomb*, *Underworld*, *Sidetrack City & Other Tales*), whose sophisticated, but simple, style illustrates skull-headed creatures, tales of Satan and such uplifting stories as 'Demis-O, The Clown Of Death'. Very much in the same vein is Henrietta Valium's *Primitive Cretin*, an oversize comic format featuring increasingly schizophrenic page layouts. Imagine if Julie Doucet were even weirder than she is... And for *Raw* completists there's Mark Beyer's *Dead Stories*, a luxury hardback reprint of one of his early *Amy and Jordan* adventures.

LESS GOOD

Leaving aside matters of individual taste, Fantagraphics should be saluted for producing consistently engaging, confrontational and experimental material, as well as keeping classics in print. Their output very much reflects the interests of a well-rounded comic fan (apart from a notable lack of superheroics), and they are never afraid to try new formats and let creators lead the way. With Fantagraphics, you really don't know what you're going to see next. They'll put out *The Theatre of Cruelty* by Marc Tessier and Alex Lafleur, which is about as big a muddle of mystical nonsense as you can find, with dream sequences, hallucinations and lots of eastern inspired decorative touches to the art, and then they'll soften you up with the immensely likeable *The Moon Looked Down* and Laughed by Malachy Coney and Paul Holden. That's a blarney-filled, nicely rounded story of murder and redemption set in small-town Ireland, drawn in a style reminiscent of a less experimental Paul Grist. And while you're in a mellow mood they'll hit you with a non-linear work like *The Big Wheels* or *The Most Important Thing*, both by Graham Chaffee, which are more meditations on big city life using clips from random narratives than straightforward graphic novels, drawn in a style somewhere between Toth and Alex Varenne. If that isn't enough to mix you up, the next Fantagraphics graphic novel might be something like *Trosper*, a beautifully packaged Frank spin-off, by Jim Woodring, a gorgeous little picture book with accompanying CD by Bill Frisell.

Fantagraphics are admirably open to the idea that the feel of a volume, its paper, printing process, weight and format are part of the reading experience, hence the numerous different shapes and sizes among their output. Without their willingness to put their money where their mouth is, the independent comic boom of the 1980s might have taken a very different path, and many creators we now regard as major figures might have remained obscure scribblers and scratchers. However, for all the successes there are always going to be some experiments that didn't quite make it. Among the less successful offerings are Jim Blanchard's spoof pinup book *Glam Warp*, which shows impressive mastery of technique, but makes you think 'why bother'? and Pat Moriarity's *Popcorn Pimps*, drawn in a variety of styles. Under some inkers it looks very slick, but it suffers from slight subject matter and the fact that Moriarity's style seems to change to ape that of other more successful Fantagraphics creators like Peter Bagge. Richard Lupoff and Steve Stiles' take off Jules Verne in *Professor Thintwhistle*, which seems to have nothing much to say about anything.

Never unwilling to experiment with the idea of what actually is a comic book, there are unusual projects such as *The Seduction of Mike*, a spoof biography of a supporting character that treats comics as though they're films, and shows Mike appearing in all manner of genres. Written by Michael Smith and R. Sikoryak, and illustrated in suitably aped styles by Sikoryak. It's slight, but fun, for half an hour or so. By contrast you could spend days poring over Ted Jouflas' two graphic 'novels', *Filthy* and *Scary*. Although obviously very talented, Jouflas defeats the object of the exercise by writing in a loop-heavy, shaky hand, with lines following the contours of his subject matter, squashed in wherever there's room. And then compounds it by writing in somewhat forced verse. Filthy is a long, stream-of consciousness poem that winds its way among some exemplary drawings, done in a naive style with extreme passion. Individual images are astonishing, but have little function as part of a narrative. *Scary* is a little easier to read, but still makes you work hard to decipher the interlinked tales about Winkie, a fading actress, her pets and lovers. It's not a cheery picture. Much more successful an experiment is Chris Lanier's *Combustion*, a scraperboard comic strip without words where fire connects an interlinked set of stories.

As well as publishing various books of autobiography and illustration by Barry Windsor Smith under the title *Opus*, Fantagraphics issued the curious *Adastra in Africa*, originally drawn as an X-Men story featuring Storm. Adastra is one of the cosmic heroes the Young Gods (who comes from the planet Orgasma, oh dear), who winds up bringing succour to a starving, but very attractive looking, African tribe by giving them belief in the old mystical ways after the white man's raped and pillaged the land blah blah blah. The heavy glossy paper does his detailed, textural artwork few favours and the slender hardback is bulked out with an 'interview' with the character. Indulgent in the extreme.

Many volumes in the Fantagraphics library have a strong social conscience, and aim to comment on modern-day America. Alongside his erotic work, Fantagraphics also published culturally aware graphic novels by Ho Che Anderson. *King* (two volumes), is an attempt to humanise the lionised black leader. It begins with contemporary reminiscences, followed by a series of incidents displaying racism in America today, before plunging into the story of Martin Luther King's early life, especially his eye for the girls. It's an uneven structure, but an interesting experiment. Much more compelling is the later *Young Hoods In Love*, a series of tales about young black people in the city. It starts with a superb story in which a young couple are bickering about whether to take their baby to work with them. As the story progresses you realise they're about to rob somewhere.

Andrew Zaben tells tales of big city life and ordinary people crushed by the modern world. *Dream Big Dreams* is about a bar owner thinking of selling up, *Queens Blvd*, the everyday life of three bookmakers, and Tuesday and Thursday about a civil servant who commits a crime because he thinks his life is in a rut. While the writing is of passing interest, the art is of the sort that fanzine editors rejected routinely, trying to be realistic, but with little sensitivity to line or shading (or indeed what things look like). *A Sleepyhead Tale* by Jeremy Eaton, uses dreams to satirise America, and in his equally heavy handed next effort, *The Island of Dr Moral*, there's a microcosm nanny state, although interesting to look at. Ralph Steadman's *America*, by contrast, is a sharp road trip of observation by the great British satirical cartoonist, whose work stands squarely beside the three volumes of Jules Feiffer's *Collected Works* issued alongside his well-regarded *Tantrum*. Far funnier and fast moving than *Falling Down*, it has a businessman overcome by modern life, throwing fits until he finally regresses to infancy.

Mail Order Bride is like a parable specially constructed for comic fans. Of course Mark Kalesniko knows who's chiefly going to be reading it... Monty, who owns a comic shop and collects just about everything he can get his hands on, sends for an Asian mail order bride because he's obsessed with certain manga characters and the presentation of Asian women in comics as tiny giggly girls. But Kyung Soo doesn't begin to fulfil his stereotypical expectations. For a start she's far too tall and strong, and she despises his job/hobby as childish. She too has expectations, and finds the west a letdown. The novel follows their struggles to find a way to adapt their dreams to real life, drawn in a beautiful, ethereal style that references manga yet emphasises the difference between solid reality and desire. Previously, Kalesniko produced *Why Did Pete Duel Kill Himself?* which deals with childhood depression and its effects in later life, as the narrator looks back on the dreams and fantasies he readily accepted, only to find that nothing, especially cowboy heroes, are what they're cracked up to be. It's written with an affecting sense of longing, and drawn in a light, almost ghostly style that itself reflects the impermanence of reality.

Jeremy Pickle Goes To Prague takes a New York art student, fed up with his dead end job as a guard in an art gallery, and relocates him to exotic, bohemian Prague to teach English. However Andrew London's hero soon finds he can't cope in what he reacts to like a third world city, where they eat hamburgers for breakfast and the language sounds "barbaric". While the contrasts between Eastern Europe and the bloated US are cleverly drawn it's not exactly a novel point. The art, however, is intriguingly dense. Initially it appears deceptively child-like but takes on a demonic dimension as Jeremy's world begins to disintegrate.

AUTOBIOGRAPHY

Looking at their overall output, you have to say "What is it with Fantagraphics and biography? Or even worse, autobiography?" Other companies publish autobiographical and semi-autobiographical comics and books, but Fantagraphics seem to have become the cynosure for the genre. In no other medium is navel gazing so frequently lauded as art. Carol Tyler's *The Job Thing* is barely long enough to qualify as a graphic novel; it's a fun collection of "stories about shitty jobs", including various cartoonists' recollections of spectacularly awful ones, but it's hardly groundbreaking. *Can of Worms* by Catherine Doherty chronicles her search for real parents, using silent panels and official documents. Yawn. And while *Monkey Food* by Ellen Forney, about being seven in 1975, is cute, it's also the paper equivalent to those *I Love 19*** programmes infesting British television schedules. Mary Fleener has a stronger eye for comic situations than most people who mine their own lives for material. *Her Life of the Party* has a refreshing lack of whining or point making. It covers her adventures in the 1970s party scene and recaptures the daffy hedonism of the pot-fuelled period without glorifying it. Everything is drawn in her characteristic 'cubist' style, with multiple planes and distorted figures, which you will either warm to and which will seem natural after a few pages of reading, or it'll be something you cannot get around and read sufficiently to enjoy these observational stories. One of the most powerful exponents of the genre is Penny Van Horn, whose tales of nervous breakdowns, fat neighbours running off with jailbirds, and obsessive boyfriends in *Recipe For Disaster* seem torn from her, just as her scraperboard art is gouged and chiselled angrily into the page.

Rich Tommaso's road trip stories, *Let's Hit The Road*, have him and his buddy drive a lot, eat snacks, have trouble staying awake etc. and finally get to his old flat to collect some furniture. Or maybe it's post. You'll lose the will to remember after about forty pages of buddy banter and meandering conversation. A big disappointment after *Clover Honey*, a hard-boiled detective thriller about Abigail, an aspiring hitwoman, who has to track down her old mentor who's absconded with Family funds, drawn in an expressive sub-Hernandez style. But star of the navel gazers is *Daddy's Girl* by Debbie Drechsler. It's a harrowing series of vignettes about growing up with sexual abuse. Far funnier than you'd think possible, it's also deeply moving. Her follow up volume about a young girl coming to terms with her sexual identity in a new town in the late 1960s, *Summer of Love* is well observed but less emotionally gripping.

Not quite biographers, but miners of human experience, UK/US collaborators, Simon Grennan and Chris Sperandio draw in a kind of naïf catalogue illustration style, recounting real stories. Most of their work is commissioned by art galleries and councils – smart move lads, turning comics into exhibitions. These include *The Bradford One Hundred* (for The National Museum of Photography), an offbeat collection of one pagers in which people from Bradford (which the Fantagraphics blurb-writer hopefully describes as a "small English community") describe their everyday lives and *Dirt*, commissioned by the Museum of Fine Art, Boston as an exhibition and comic. It looks at fame through the stories of four ordinary people who have a brush with celebrities, from a girl chosen to help a child star demonstrate her new workout video on TV to a basketball player's housekeeper. London's ICA did a similar exhibit, based on stories from their members in *Cartoon Hits*. If that's not enough there's still spooky true-life incidents in *The Ghost on the Stair* (with Tate Liverpool), Invisible City for The Public Arts Fund about behind the scenes city workers and finally *Crime Story*.

The most celebrated real life cartoonist to emerge in recent years is Joe Sacco, who's part of a movement to turn comics towards reportage, covering big issues and making people notice them due to the novelty of the format. His masterwork to date is *Safe Area Gorazde*: 'The War In Eastern Bosnia 1992-1995'. In it, he demonstrates the strengths that comics have for war reporting. Initially one might think very few, but in an age where video streaming, satellite links and blanket TV coverage mean real pictures often do little to excite or touch us, the emotional overtones of drawings serve to communicate both the big picture and the little stories beautifully. Sacco spent months in the last civilian 'safe zone' the UN maintained, having paved the way for wholesale slaughter when the two others in Srebrenica and Zepa were declassified due to political wrangling. He learned the stories of ordinary people, watching how they adapted to life with enemy guns all around them, waiting to find out if they to would be sacrificed in the complex chess game being played among the numerous ethnic factions and peacekeeping countries. The art's not fancy; it's honest, straightforward storytelling with powerful characterisation, simple page layouts making a direct appeal. The real skill is in the script, weaving political events and the lives of the large band of friends Sacco quickly makes together with vignettes illustrating the absurdity, the sudden eruptions of violence and the horrifying tales of genocide. Completely engrossing from cover to cover – we should throw out the history texts and give kids this sort of thing to read if we want them to understand modern history.

Sacco honed his eye producing *Palestine* (see separate entry), following visits to the Palestinian territories in the early 1990s, and in that work you can see the stirrings of the surety with which he handles materials in *Safe Area Gorazde*. Most recently Fantagraphics have released *Notes from a Defeatist*, which collects his early work, some of it reportage, plus autobiographical musings and satirical strips. He chronicles touring Europe with his local punk band, tells war stories and pores over his own life and reactions honestly, but it's his eye for recording the small details of the big picture that he'll be remembered for.

FOREIGN

The third early thrust of Fantagraphics' graphic-novel line was the translation of outstanding European graphic novels from outside the adventure and erotic traditions favoured by most American publishers. They've continued, intermittently, to pursue this line, but with several other publishers specialising in translations, they have chosen carefully and looked way outside the mainstream. The first was *Barney & the Blue Note*, Philippe Paringaux's extraordinarily haunting account of the life of a fictitious jazz genius told in flashback, as pieced together by an admirer, drawn in a flat, blocky style by Jacques de Loustal. It was followed by Muñoz and Sampayo's *Billie Holiday*, again about a jazz great, again written from the point of view of someone looking back. One big problem with a number of translations is the difficulty of translating idiomatic or linguistic devices in the original language into contemporary English. By using three translators who're clearly as familiar with the language of comics as they are with the source language (Katy MacRea, Robert Boyd and Kim Thompson), *Billie Holiday* has a fresh, lively voice.

Fog Over Tolbiac Bridge, an early attempt to popularise Jacques Tardi (which cause would later be taken up by Cheval Noir), is a difficult, stimulating thriller featuring his observant turn-of-the-century detective, Adele Blanc-Sec. They also published Tardi's collaboration with French thriller-writer Leo Malet, *Nestor Burma*, featuring his eponymous iconoclast detective. *Lea* is a morality play about under-age sex, wordy but clever. Christian Rossi creates rounded, modern characters and Serge LeTendre's lanky artwork suits the world of self-satisfied, arty folk in which the story's set. And finally Ana (1991), the story of a young woman caught up in a violent political struggle against a fascist state. Writer Gabriel Solano Lopez systematically tramples his characters' idealistic notions into the mud, while his son F. Solano Lopez, better known for his soft porn, draws the ugliness in grim detail. After these initial attempts to introduce some of the more literate Mediterranean creators to American audiences Fantagraphics has concentrated on other areas, specifically Scandinavia. An early discovery was Max Andersson, who'd already developed a strong underground reputation by the time Fantagraphics brought out *Pixy*, drawn in a style reminiscent of George Grosz more than most comic artists. Andersson creates a twisted world in which his protagonists are harassed by phone calls from their aborted child, Pixy, from the kingdom of the dead, and wind up bringing him back to earth despite having set off to kill him all over again. Perverted desires, living houses that can be killed or turn on their occupants and eat them, money farms and time running backwards all spiral together into a confusing but never confused ride.

All of their Scandinavian cartoonists are good but, true to unfortunate stereotype, few are happy bunnies. Take Thomas Ott, another frenzied scratcher of depressing messages whose drawings look like they're been torn from his suffering psyche. All his stories centre on violence, unavoidable, deep-seated prejudice, and death, and his anger is apparent in the scribbled, tortured drawing. *Greetings from Hellville* and *Dead End* are both strong collections, the former slightly better, and much of the latter having seen print less lavishly in Spx Expo 2001. Jason is one of Fantagraphics' greatest recent finds. No doubt there are many brilliant cartoonists in Scandinavia, but it's not often we get the pleasure of reading their work in translation. *Hey, Wait* starts off following the picaresque adventures of two young boys (represented as anthropomorphic characters) passing the summer, each page a little vignette. Just when you think you're in very charming but unchallenging Calvin and Hobbes territory, Jason pulls the carpet out from under you and you realise the slow build up has been towards the pivotal moment in one of the boy's lives. Afterwards it begins a despondent spiral as we see how one mistake affects the rest of his life. It was swiftly followed by *Sshhhh!*, collected short stories which show the same mix of charm, humour and fatality.

The one happy bunny in the group is Lewis Trondheim whose McConey series features, you guessed it, a bunny. *Harum Scarum* and *The Hoodoodad* were huge hits in Europe, and Fantagraphics so expected his quietly humorous, but involved, anthropomorphic mysteries to be as popular in the States that they reputedly swapped all their rights to Chris Ware for him. How wrong they were. The charming thrillers, starring a rabbit detective and his journo sidekick, Richie the cat, undeservedly bombed. The drawing is simplistic, but extremely eloquent, and the script is sharp – a delight from start to finish.

Finally, two must-have collections that don't really fit in anywhere else. In *The Best Comics of the Decade* (two volumes, 1990), editors Gary Groth and Kim Thompson were willing to make enemies as well as friends by selecting the best creators. And there's very little to disagree with in their choices, from huge commercial successes like Matt Groening to near-forgotten scribblers of genius like Dori Seda.~FJ

Recommended: *Ana, Any Similarity to Persons Living or Dead..., Barney and the Blue Note, The Best Comics of the Decade Volumes 1 & 2, Beyond the Pale, Billie Holiday, Clover Honey, The Complete Robert Crumb 5, 6, 9, 10, Daddy's Girl, Dan & Larry, The Fifth Name, Harum Scarum, Haw!, Hey, Wait, The Hoodoodad, Love That Bunch, Maakies, Mail Order Bride, New York, New York, Safe Area Gorazde, Suckle, Trosper*

FANTASCI

Warp: *5 issues 1986-1987*
Apple: *4 issues (6-9) 1987-1988*

Terrible title for a poor black and white anthology that unimaginatively mixes fantasy and science fiction. For the record, *Fantasci* contains three continuing features. There's Don Lomax's tiresome superhero skit Captain Obese (big fat bloke becomes a costumed do-gooder for 'the common man' and, er, that's it), a laugh-free dwarf comedy 'A Hero Named Harold', by Kevin Davies and Steve Stirling, and an atrocious science-fiction adventure from Mark Stadler and Dave Hoover entitled 'Hunter XX'. The good news is that the latter is gone from 7.~AL

Basil Wolverton's FANTASTIC FABLES

Dark Horse: *2 issue microseries 1993*

Wolverton is best known as a master of the 'ugly mug'. His obsessively rendered headshots 'graced' the covers of *Mad* and *Plop!* amongst many other mags. This two part series usefully collects a variety of Wolverton's comic strip work. There's relatively straight space opera like 'Meteor Morgan', goonery reminiscent of Wolverton's 'Powerhouse Pepper', and, most interestingly, a series of full-page pen and ink drawings done for an illustrated Bible series. Wolverton cross-hatches the *Book of Revelations* into an astonishing catalogue of torment and misery; the end of the world has never looked so gorgeous or grotesque. These stories are collected, along with Spacehawk, in *Basil Wolverton in Space*.~AL

FANTASTIC FIVE

Marvel: *5 issues 1999-2000*

Based in the alternative universe of M2 where a new team of the Thing, Human Torch, Ms Fantastic, Psilord and Big Brain, offspring and survivors of the original Fantastic Four gather to solve the mystery of what became of Reed and Sue Richards. Tom DeFalco and Paul Ryan pick up where they left off during their tenure on *Fantastic Four*, but they really shouldn't have bothered.~WW

FANTASTIC FORCE

Marvel: *18 issues 1994-1996*

This Fantastic Four spin-off title joined the adult team's teenaged son Franklin Richards with another two superpowered youths and an other-dimensional warrior who claimed somewhat dubiously to be his aunt. The comic never really raised itself above being just another teen hero book, and despite later additions of more established and more popular heroes from the mother book – both the Human Torch and She-Hulk were members at one time – it suffered badly from clichéd dialogue and uninspired plots. It's not until the last issue that any depth is given to the characters. As Franklin reflects on mistakes which have led to the break-up of his team and the pressure he is under to live up to his parents' legend there's a hint that perhaps, underneath everything, this did have a story to tell. Unfortunately, by then it was too late.~JC

FANTASTIC FOUR

Marvel: *Series one 416 issues, 27 Annuals, 6 Giant-Size 1961-1996, series two 13 issues 1996-1997, series three 63 issues +, 4 Annuals 1997 to date*

Hot on the heels of the DC (then National Periodicals) superhero revival, Stan Lee and Jack Kirby launched the *Fantastic Four*. A more mature approach to comics, with strong characterisation and soap-opera plots to counterbalance the action, the comic revived the flagging fortunes of the company which had, until then, been Atlas but with *FF* 1 was renamed Marvel. The exact history of that first issue has been lost in apocrypha and legend. Debate rages on how much creative input came from Lee and how much from Kirby, and on the (still uncertain) identity of the uncredited inker. What is certain is that *Fantastic Four* changed the face of the industry, and presented the 1960s comic reader with sophisticated stories that have given the comics themselves a remarkable endurance.

1 tells the story of brilliant scientist Reed Richards who, determined to beat the Commies into space, blasts off ahead of them. This is despite warnings from his best friend and pilot, Ben Grimm, that the effect cosmic rays may have on their rocket has not been sufficiently researched. Grimm's caution is vindicated: the rocket hits a cosmic ray storm and crashes back to Earth, giving its crew (Richards, Grimm, Richards' fiancée Sue Storm and her brother Johnny) fantastic powers. As all upstanding citizens do, they soon agree to use these powers to fight evil and save the world. Early issues have a look and feel reminiscent of the monster comics which were popular at the time and on which Lee and Kirby had both worked. It is not until the distinctive blue costumes are introduced in 3 that the title becomes unmistakably a superhero comic. *Fantastic Four* 1 and 2 mark an evolution between these and the superhero comics DC had started to revive. It's speculated this was a deliberate attempt not to compete obviously with the superhero titles of National Periodicals, on whom Marvel then relied for distribution.

Kirby and Lee's remarkable 102-issue run is unparalleled in comics, both for the scope of characters and situations introduced and for the sheer quality of the art and writing. Almost all of the villains who will reappear over the next four decades are introduced in the first twenty issues, creating a formula few writers have tampered with since. The Thing vs The Hulk battle (25-26) is considered to be the classic slugfest by readers who like that sort of thing. It is around the mid-30s, however, that Kirby and Lee really hit their stride, and by 44, the first appearance of Gorgon of the Inhumans, the comic is in a golden age. The Inhumans storyline leads straight into the 'Galactus Saga', arguably the title's greatest moment. Kirby and Lee keep the quality high throughout the next twenty issues, and even when the partnership begins to run out of steam the quality is still above average, such as the Prisoner-inspired issues 84-87.

Without Kirby's creative input after 102, Stan Lee's scripts were never enough to carry the comic alone and 103-125 are best avoided. Once Lee had left, an unimpressive run by Archie Goodwin was followed by strong stories from Gerry Conway, and Roy Thomas which lifted the comic over the following fifty issues. High points were the alternate-world tale in 160-163, The Thing vs The Hulk battle in 167 and the George Pérez/Joe Sinnott art on most issues between 164 and 192. By this time, however, the quality of the stories was already starting to drop and rarely climbs above mediocre again until the arrival of John Byrne, sporadically from 209 and permanently in 232-293. Byrne brought back much of the classic feel of the 'old' *Fantastic Four* and his run is generally considered to be a second golden age. It's worth noting that Byrne was one of the first writers to tamper with established Marvel continuity, changing the Fantastic Four to suit his own vision even when this didn't necessarily fit in with what the creators between him and Lee/Kirby had done. While not as drastic as the effect Frank Miller had on Daredevil, Byrne's tampering nevertheless changed the book and ensured its success into the 1980s. The Byrne stories are amongst the most popular in the comic's long history. Those around 250, packed with guest-stars such as the X-Men and the Avengers, are worth mentioning, as is the plot concerning the death of Galactus in 244, 257 and 261-262*. Not afraid to challenge the status quo, Byrne replaced The Thing with the She-Hulk (for whom he had always had a particular fondness), and proceeded to have the character's long time girlfriend, Alicia Masters, fall for and marry the Human Torch. The soap opera implications of this added a new undercurrent to the title under Byrne and his successors, and it is almost a snub to Byrne that Marvel eventually decided to reveal that it was not the real Alicia but a Skrull impostor whom the Torch had married. Other major changes he made to the series were to seriously upgrade the Invisible Girl's powers (and change her name to the Invisible Woman), and alter the team's costumes for the first and only time, albeit mildly. Byrne's last issue comes halfway through a storyline finished admirably by Roger Stern and Jerry Ordway, 293-295.

After the following twenty-fifth-anniversary issue, the *FF* enters what must be the nadir of its run, suffering often ludicrous plots and competent but uninspired art from issue 297 for pretty much the next hundred issues. The only notable exceptions are 334-350, written and sometimes drawn by Walt Simonson, which at least attempted to try something new, although the offbeat direction doesn't always hit the mark and some issues are incomprehensible. One of his better stories teaming Ghost Rider, Hulk, Spider-Man and Wolverine as a new FF in 347-349 was collected. Around the late 380s, the regular creative team of Tom DeFalco and Paul Ryan start to get well enough acquainted with their cast to produce stories which, while by no means classics, are at least good fun, and more readable than most of the previous runs had been. The 'Nobody Gets Out Alive' storyline in 387-392* is the closest this period gets to a highlight.

By the time Marvel decided to turn to flavour-of-the-Nineties writer-artist Jim Lee for a revamp and continuity overhaul, the *Fantastic Four* was in dire need of a new direction. Marvel's flagship title had never really recovered from Jack Kirby's departure, with subsequent creators building on old glories, but never able to move on nor bring much originality to the series. The early issues show him sticking tightly to the old continuity while updating the stories for a more demanding 1990s audience. For instance, Richards now takes his fiancée and her teenaged brother with him because the rocket is owned by their father and they are needed to initiate its launch sequence, not just because he thinks it's a good idea. Lee's take on the team is fresh and vibrant, making it the one 'Heroes Reborn' title that didn't outstay its welcome. Unfortunately, the saying "you can never go home again" has rarely held true in the Marvel Universe and so it's soon back to normal with a new number 1, although nothing much resembling a new direction.

The first three issues of the third volume, by Scott Lobdell, Alan Davis and Mark Farmer are enjoyable, standard superhero fun with a slightly lighter touch than Marvel have generally allowed on their first family in the past. While hardly setting the series alight, the creative team were certainly doing no wrong, which is more than can be said about Chris Claremont, who arrives with 4. By the late 1990s, Claremont was so far past his sell-by date that it's hard to remember a time when every word balloon and plot he produced didn't seem like a tired old parody of himself. His *FF*s are execrable, mainly due to his inexplicable desire to ignore the Fantastic Four themselves and instead insert into their adventures the least interesting supporting characters from his days on *X-Men* and *Excalibur*. Thus the FF end up as little more than supporting characters in their own title while a bunch of Claremontites rampage across the omniverse. Thankfully, we've been rescued from this drivel by 33, starting an entertaining fill-in by John Moore and Salvador Larocca, followed by the arrival of Carlos Pacheco who soon puts the series back on its feet. While clearly a dedicated fan determined to play to tradition, Pacheco manages to add new spice as he reintroduces much missed old favourites such as the Baxter Building, royal blue costumes, the Negative Zone and the Inhumans. There is an overwhelming feeling that he understands the FF's strengths and knows how to play to them while at the same time being careful not to simply retread old ground. His run on the series is an absolute joy, with 35-39 collected, and a very hard act to follow. Luckily, Adam Warren's 57-59 don't embarrass themselves.

Mark Waid takes over with issue 60, a 9 cents promotional issue, in which he crafts a lovely stand-alone tale that leaves long-term readers in no doubt that he completely and utterly understands the appeal of the Fantastic Four and how to make the best of this. His four issues so far are yet to put a foot wrong.

The first of the 1974-1975 giant-size issues was actually titled *Giant-Size Superstars*, and there have been numerous reprint packages of the classic Kirby and Lee *FF*s over the years, most notably in *Marvel Collectors Item Classics* (*Marvel's Greatest Comics* with 23), which ran ninety-six issues from 1965 to 1981. The hardback volumes of *Marvel Masterworks* reprint 1-50 along with annuals 1-3, while 1-63 along with the first four annuals are available in three black and white collections of *Essential Fantastic Four*.~JC

Recommended: 1-6, 10, 19, 25, 26, 38-51, 84-87, 150, 160-163, 234, 239, 261-262, 267, 285, 292-295, series three 45, 54, 60

Marvel Action Hour: FANTASTIC FOUR

Marvel: *8 issues 1994-1995*

Marvel Action Hour presents adventures taken from the television show of the same name with Joey Cavalieri adapting TV scripts broadly based on the early Lee/Kirby tales improbably and uncomfortably illustrated by European veteran Alcatena. Nobody's finest moment and best ignored by all.~WW

FANTASTIC FOUR Miniseries and one-shots

Marvel: *One-shot (Fantastic Four Roast) 1982, 4 issue miniseries (vs X-Men) 1987*, 2 issue microseries ('Atlantis Rising') 1995, 3 issue miniseries ('Fireworks') 1999, one-shot (The Fantastic 4th Voyage of Sinbad) 2001, 4 issue miniseries ('1234') 2001-2002**

The Fantastic Four Roast may have seemed a good idea around an editor's desk, celebrating twenty years of continuous publishing by having humorist Fred Hembeck and a jam of creators lambaste the team at an awards dinner. It's painful in execution, intolerable to fans and impenetrable to the casual reader. In the X-Men team-up Chris Claremont and John Bogdanove do a decent job. Reed Richards' lost journal seems to indicate that rather than accident the tragedy that formed the FF was a deliberate act by a cold hearted genius. Can such a person then be trusted when asked by the X-Men to cure one of their number of a potentially fatal scientific phenomenon?

'Atlantis Rising', further subtitled Alpha and Omega, are mediocre bookends for a truly dire crossover event (*FF* 401-402, *Fantastic Force* 8-9, *Warlock and the Infinity Watch* 41-42) which has the Sub-Mariner's sunken homeland rise from the sea to become the prize in a mindless squabble by various factions of the Marvel Universe. It is supplemented by an unusually informative and well-packaged Preview Special which includes three chapters of the classic Stan Lee/Jack Kirby 'Tales of the Inhumans' from *Thor* 146, 149 and 152. More familiar stories are in 'Fireworks', which begins a trend of rehashing the glory days. Jones' Gerard and Jeff retell and refit the tale of the Human Torch and his Inhuman girlfriend Crystal from their first meeting to his quest to find and free her from the impenetrable Negative Zone (FF series one 44-58).

The FF and their children are kidnapped by a Djinn from a Magic dimension in 'The Fantastic 4th Voyage' and blackmailed into gathering mystic talismans with which to breach the barriers between worlds. Can the ingenuity of the legendary Captain Sinbad tip the scales in their favour before all reality is lost? Chris Claremont, Pascual Ferry and Scott Hanna reveal all in a surprisingly engaging piece of eye candy, whilst Grant Morrison, Jae Lee and Jose Villarrubia play dystopian mind games with continuity in the darkly ponderous '1.2.3.4.' . Dr Doom attacks the FF using his time machine and the reality-altering powers of his Prime Mover robot. A thorough grounding in FF history is vital to even comprehend this, but older fans should enjoy the stylish re-examination of the canon.~WW

FANTASTIC 4 2099

Marvel: *8 issues 1996*

If you ever fancy a series in which Marvel's original superteam is transported to the future in order to re-run old plots try to find one other than this. A different artist almost every issue doesn't give a damn, and even Karl Kesel's initial enthusiasm has departed issues before he does with 6. Wretched.~WJ

FANTASTIC FOUR UNLIMITED

Marvel: *16 issues 1993-1996*

Quarterly specials focusing on one character and/or telling a self-contained story. Started at a time when the monthly title was at its most tired and formulaic for years, these 'extra' stories have been no better and the series is best avoided. If you're an Ant-Man fan there's big changes in 9.~JC

FANTASTIC FOUR UNPLUGGED

Marvel: *6 issues 1995-1996*

Unbelievably poor low-price, lower-quality FF stories from new (and mostly never to be heard of again) creators. Most issues are self-contained, all are best avoided. If you really have to sample, 4 is so ludicrous it's funny. The Human Torch's estranged shapechanger wife disguises herself, chats him up and is then pissed off when he uses the same chat-up lines he lavished on her first time round. It reminds you that here are two characters so stupid they deserve each other. Or maybe don't bother.~JC

FANTASTIC GIANTS

Charlton: *1 issue (24) 1966*

This is a giant-rampaging-monsters comic, formerly *Konga*, which only ran for one issue in this incarnation. All four stories are drawn by Steve Ditko: there's Konga (huge gorilla in London), Hogar (alien robot in South Africa), Gorgo (sea-reptile in London again), and 'The Mountain Monster' (hooded creature in central Europe). They're all off-the-shelf stories, but he does bring a lot of character to Gorgo.~FC

Ganbear's FANTASTIC PANIC

Antarctic: *8 issue limited series 1993-1994, 8 issue limited series 1995-1996*

Japanese creator Ganbear (Satori Yamasaki) is a decent artist, and populates his story with characters either brimming over with enthusiasm or experiencing the pits of despair. That's when they're not stepping out of character to supply supposedly comic moments. The first series has the cast journeying towards a tournament to choose a hero to defeat the big bad villain, but is so discursive it will irritate all not in tune with Ganbear's sense of humour. The second is no better.~FP

Don Marquez's FANTASTIC STORIES

Basement Comics: *2 issues + 2001 to date*

Don Marquez would be Frank Frazetta, even, embarrassingly, to the point of imitating elements of his signature. Artistically he obviously doesn't match Frazetta, and would benefit from looking at other artists besides to improve already very talented pages. He produces old style anthology stories, again harkening back to Frazetta's time in comics, which while perfectly acceptable pastiches are hardly novel. Each issue also contains an adaptation of a Conan-Doyle *Professor Challenger* story.~FP

Frank Frazetta FANTASY Illustrated

Quantum Cat: *8 issues 1998-1999*

The limit of Frazetta's personal contribution is covers and a first issue editorial, while his art is showcased in 4's article. Since the magazine's intended to be a tribute to his genius and inspiration, the editors really should have found better material with which to fill this second-rate *Epic Illustrated*. There are some well-drawn stories, but precious few are well written. Wendy Pini's Elfquest tales in 1 and 4, therefore, are a pleasant surprise, as is Moebius in 2, albeit a wordless story last seen in *Moebius Comics*. Fantasy artwork then from Richard Corben (1, 3), Joe Jusko (1, 3), Tony Daniel (1), Tony Harris (2), the Hildebrandt Brothers (2, 3, 5, 6), Charles Vess (3) and Alex Niño (7, 8). Maybe you just have to be in the right mood for today's fantastic stories.~NF

FANTASY ILLUSTRATED

New Media: *1 issue 1982*

Partner to *Adventure Illustrated*, this too only saw the one issue published. Written by Steve Englehart, 'The Djinn' is an old-fashioned pulp adventure set in Cairo with hints of mysticism and secret societies, while Steve Ditko in black and white, inked by Steve Leialoha is great to look at. This was given another chance in Marvel's *Coyote*. Another artist whose work is a revelation in black and white (after the terrible printing in many of Charlton's titles) is Tom Sutton. His illustrations for Don McGregor's 'Alexander Risk' are intricate and atmospheric, as befitting a strip paying homage to *Sherlock Holmes*. After a King Arthur text story with a couple of P. Craig Russell pictures, the final strip is Mark Evanier and Mike Sekowsky's Ryder, continuing from *Adventure Illustrated*. This is a stronger issue than *Adventure* and fans of Ditko and Sutton won't be disappointed, but it's not compelling.~NF

FANTASY MASTERPIECES

Marvel: *Series one 11 issues 1966-1967, series two 14 issues 1979-1981*

The first series is an odd selection of reprints largely unavailable elsewhere which are useful as samplers of otherwise expensive material from the 1940s and 1950s, although it's monster stories in 1 and 2. The Sub-Mariner and Human Torch clash – regarded as a 1940s highlight – is in 8, and the original Human Torch's origin is in 9. Captain America occupies 3-6, and the Black Knight reprints in 11 have some fine Joe Maneely artwork. The 1940s Marvel team the All-Winners Squad is in 10, and the remaining issues star Sub-Mariner. The reprints continued backing up a new story as the title changed to *Marvel Superheroes* with 12. Series two reprints the first fourteen issues of the 1960s *Silver Surfer* series and, from 8, Warlock's appearances in *Strange Tales* 178-181 and 9-11 of his own title. The reproduction is shoddy and you're better advised to seek out *Marvel Masterworks* volumes for the Silver Surfer stories and the later 1980s reprint for Warlock.~WJ

FAR WEST

Antarctic: *4 issue miniseries 1998-1999*, 2 issue microseries 2000*

At first glance this looks horrible, because of the indistinct grey tone art in the second series and all the tawdry garish covers. However, the stories, about a tomboyish elf bounty hunter and her talking bear sidekick in a fantasy/wild west setting, by Richard Moore, are quite readable and even occasionally witty. The first series, with adequate black and white line art, is the better. The puerile dwelling on the exposure of the elf's buttocks will not appeal to everyone.~GK

FAREWELL TO WEAPONS

Marvel/Epic: *One-shot 1992*

Akira creator Katsuhiro Otomo story about cyberwarriors of the future being slaughtered by an automated combat drone. A neatly written, beautifully illustrated parable on the futility of war.~HS

Recommended

FARSCAPE: War Torn

WildStorm: *2 issue microseries 2002*

Written by Marv Wolfman, this series perfectly captures the spirit of the TV series while Robert Teranishi's detailed, decorative artwork accurately portrays the actors' likenesses. The premise of *Farscape* is that Earthman, John Crichton is thrown through a wormhole into an unknown universe where he accidentally joins a number of escaped alien prisoners (Zhaan, D'Argo and Rygel) on a living spaceship (Moya), who are trying to find their way home. In the main story here, the crew find themselves caught between two races warring over the right to populate a planet they each believe is theirs by divine right. A backup story drawn by Carlos Mota features Chiana helping a group of her homeworld's rebels.~NF

FASHION IN ACTION

Eclipse: *One-shot 1986, one-shot 1987*

Spinning off from back-ups in early issues of *Scout, Fashion in Action*'s 1986 appearance was subtitled a summer special, and the 1987 version was a winter special. John K. Snyder's strip is more typical of European adventure strips than American, concerning a team of women acting as celebrity protection agents. The second is better than the first, focusing on team leader Frances Knight, as she recalls an episode of US 'special forces' having been involved in an African state in the past, while having to deal with another plan of arch-enemy Dr Cruel in the present. There are some nice original touches in both – Dr Cruel's sympathetic henchman in the Winter Special for one – but overall the characterisation of the leads isn't good enough to engage reader sympathy.~WJ

FAST FORWARD

Piranha Press: *3 issues 1992-1993*

According to a first-issue text page, *Fast Forward* is 'a free-form forum' for "today's brightest talents". More accurately, it's a hotch-potch anthology, each issue loosely assembled around a different theme. 1 is Phobias, and leads with a long strip entitled 'A Glass of Water', by Grant Morrison and Dave McKean. A lengthy monologue from a spinster librarian only threatens to become interesting. McKean's sinister artwork is a technically impressive mixture of treated photos, photomontage and linework, but often feels inappropriate when accompanying Morrison's resolutely ordinary script. There are also some minor fillers from Andy

---

* Available in a collected edition

Helfer and Glenn Barr, David Quinn and Gil Ashby, Alec ('overrated') Stevens, and Russell Braun. The Family-themed 2 leads with a peach of a strip by Kyle ('underrated') Baker. 'Lester Fenton and the Walking Dead' is an inventive, funny zombie farce, rendered in Baker's beautifully offhand style. Lester's father returns from the dead, and proceeds to mess with his son's teen love life. Average work from Bob Rozakis and Stephen DeStefano, Dean Motter, Douglas Michael, Mark Williams and Brian Stelfreeze, and John Figueroa and Kirk Etienne rounds up the rest of the issue. The third number, Storytellers, is dominated by two lousy short stories with a few illustrations, a pointless rip-off for something sold as a comic book. William Messner-Loebs and Sam Kieth slightly redeem things with one of their entertaining yarns featuring philosopher Epicurus the Sage, but Steve Purcell inexplicably wins the cover slot for his overly cute fantasy 'Toybox'.~AL

FAST WILLIE JACKSON

Fitzgerald: *7 issues 1977*

Fitzgerald Periodicals had a modest success with their *Golden Legacy* series of educational comics about famous figures in black history, launched in 1966 and reissued periodically. Wanting a regular newsstand comic to 'cross over' into the mainstream market, they devised Fast Willie Jackson, best described, forgive me, as Archie in blackface. In the decade of 'blaxploitation', it may have made some kind of sense, but taking the most whitebread comics series ever, and setting it in the cleanest ghetto on record, seems like a predestined money-loser in retrospect. Fast Willie and his teenage chums were as bland as their white counterparts, but their supporting cast were bizarre, including a racist cop with a heart of gold, a fat fortune telling mama who regularly invoked the name of Satan, and a white feminist named 'Jane Fronda', who hadn't realised she should move the hell out of the neighbourhood! This melange of clichés would have been offensive enough if Archie had decided, patronisingly, to produce a comic "just for all the coloured folks out there", but coming from a company that established itself by promoting black heritage and dignity, it's nothing short of deplorable. In the final issue Fitzgerald played the shabbiest scam ever on their readers, when a "See Yourself In The Comics" contest winner – step forward Jimmy Moore, of Brooklyn – was portrayed as Fast Willie, with Willie's name whited out of an obvious inventory story and Jimmy's inserted. Talk about lazy rip-off tricks. Shortly thereafter, Fitzgerald stopped publishing. My money's on a disgruntled Jimmy Moore visiting the offices at midnight with a kerosene can...~HS

FAT DOG Mendoza

Dark Horse: *1 issue 1992*

Scott Musgrove's *Fat Dog Mendoza* is a completely off-the-wall slice of whimsy that will have any right-minded person falling off the chair with laughter. Some, of course, won't get it. Plot is minimal, but jokes are plentiful as Fat Dog roams about impersonating the Pope and being trapped under a tree. It's a joy to see fellow Loose Teeth alumni The Fruitheads return, and Musgrove also introduces a new character, overweight superhero The Whoosh, who leads The Squad Patrol. In the latter assemblage are some of the most preposterous supertypes ever conceived, complete with listings of superpowers and exploits. If you ever see Ol' Pops Pimple run for it. Fat Dog returns in *Dark Horse Presents* 116, set prior to his equally funny animated series. Catch the animated series as well.~FP

Recommended

FAT FREDDY'S CAT

Rip-Off/Knockabout: *7 issues* + 1978 to date.*

Frederick Freekowski, Esq., the nutritionally unchallenged member of the Fabulous Furry Freak Brothers, gives his feline companion free rein in these short stories, which show the feline species at its finest: puking, crapping, lazy, vicious hairballs. Mostly half-pagers culled from various underground newspapers, the longer stories which front each issue add occasional surreal touches (the Cockroach Wars in 5 for example), but it's the short strips which are the funniest, when our hero is behaving most like a cat and least like a human Everyman. The "Just wait till he puts on his stereo headphones" gag is still a classic.~HS

FATALE

Broadway: *6 issues 1995-1996**

Introduced in *Powers That Be* and *Shadow State*, Broadway's leading lady rapidly spun off into her own title. Reminiscent of the X-Men's Rogue in that she leeches strength and knowledge from others on skin contact, she significantly differs in that she can choose to 'drain' others or not, and as a consequence revels in her power. The product of experiments by a sinister organisation called The Brotherhood, Fatale spends most of her time fleeing from the organisation's various warring factions. Attempts have been made to cast her as a superpowered Modesty Blaise, complete with eccentric supporting cast and at least two romantic interests. The blatantly voyeuristic nature of the art, held in check in the early issues, becomes increasingly creepy as the series progresses, robbing the strip of its initial appeal.~HS

FATALIS

Caliber: *1 issue 1999*

The immortal Wilde, his band of helpers and the Fatalis Corporation investigate a series of murders in Los Angeles with supernatural associations. Mark Chadbourn's script is too knowing and somewhat pretentious whilst Vince Danks' photo-referenced artwork, despite many attractive features, is too dark and one-toned. Intended as a two-issue series, only the first appeared.~NF

FATE

DC: *17 issues 1994-1995*

The disembodied power was formerly affiliated with Dr Fate, but the events of *Zero Hour* rendered this relationship redundant, and it seeks a new host. Unaccountably it selects a chain-smoking thug with guns and an attitude. This series tramples the ideals of Dr Fate into the ground for no good purpose, as, the questionable association aside, this is to all intents and purposes a new character. Worse, it does so incompetently. It's worth a look at almost anything rather than this.~HS

FATE OF THE BLADE

Dreamwave: *3 issues + 2002 to date*

In 2035 drug dealing film executive Vic Richardson purchases a genetically engineered woman who meets his every requirement. Implanted with false memories, Mya is programmed to love him, but after a year becomes frustrated with her life anyway. Although the covers picture Mya as a warrior woman with sword the series has yet to reach that point, but writer Chris Sarracini has an intriguing enough, although sparse, plot going. Penciller Job Yamen has mastered mood and style before anatomy, but not to the point where it detracts from the story. This is very finely poised, though, and could yet turn out to be just another chick with a blade comic.~WJ

FATHER AND SON

Kitchen Sink: *4 issues 1995-1996**

Bad Habit: *One-shot 1998*

Inept and cynical grunge cash-in from writer/artist Jeff Nicholson. Uptight straight Richard Schultz is perpetually at war with his slacking son Christopher. Dad believes in hard work, talent and integrity, while Son is an idle moron who sponges off his hard-working old man. In almost every strip, Dad is shown to be more sophisticated than his couch-potato offspring, a curiously reactionary message from a comic clearly trying to grab some of that 'alternative' Seattle action (five years too late, but never mind). Perhaps it's all highly sophisticated parody, and Nicholson is a fierce satirist baiting his intended audience. However, none of the characters, situations or locations are especially well observed, the humour is strictly sitcom fare and the drawing amateur.~AL

FATHER CHRISTMAS

Hamish Hamilton/Putnam: *1 volume 1974*
Hamish Hamilton/Penguin: *1 volume ('Goes on Holiday') 1975*

These are short stories for children about a grumpy Father Christmas, bemoaning his lot while preparing himself and his reindeer for the busiest night of his year, but proving to have a heart of gold after all. His holiday takes in France, Scotland and Las Vegas, as he looks for warmth, but has to move on when children begin to ask whether he is Father Christmas (though the rich French food upsets his stomach and he doesn't like the cold in Scotland). Raymond Briggs' droll scripts go some way towards keeping adults as well as children entertained, and the slight stories are nicely observed, letting the artwork carry much of the narrative. The volumes are more generally found combined these days.~NF

FATHOM

Comico: *3 issue miniseries 1987, 3 issue miniseries 1992-1993*

Two dull miniseries spun-off from the briefly popular Elementals. In the first, slightly superior, instalment, writer Lawrence Shick ponderously recaps our aquatic superheroine's origin – sailing accident leads to Rebecca Golden's reincarnation as 'Wet! Wild! Webbed!' Fathom, acolyte of watery deity Aqua – before sending her to a strange underwater city where she's literally treated like a Princess. Artist Jill Thompson here blandly mimics the work of series creator Bill Willingham. In the 1990s story Fathom is summoned by Aqua to battle the dreaded Dera Aeshma, "despoiler of the world's pure waters", a turgid eco-thriller from David DeVries and Tim Eldred.~AL

FATHOM

Image: *15 issues + (0-14), 2 Swimsuit Specials 1998 to date*

Once a passenger on a cruise ship that went missing for nearly 10 years, the orphaned Aspen Matthews graduates as an expert on all things aquatic. She is swept up in the world-threatening schemes of Killian, an undersea terrorist, and his adversary the secretive, power-mongering Admiral Maylander. The opening nine issue story arc is seen through many eyes including Killian, a ghostly water-guardian, Killian's woman Kyla, agent Cannon Hawke who's more than he seems, hotshot pilot Chance Calloway and his brother, flatmate Tyler Kincaid and Aspen herself. When she realises she and Killian are of the same undersea race they join forces briefly, and she then finds she has powers that amaze even Killian's followers. Eventually Aspen, Hawke, Chance and the unlucky Kyla, are the only ones who can stop Killian. There is a team-up with Witchblade and Lara Croft in 12-13.

Creator Michael Turner does an admirable job of telling a story by avoiding drawing anything except pin-ups wherever possible. Despite obvious design strengths, his storytelling relies on clipped close-up detail, hardware, facials and effects. Some measure of confusion is saved thanks to the incredible colour work by Star of the Show Jonathan D. Smith, whose contribution is more of an embellishment than that of inker Joe Weems. Since 10 the colour has passed to the equally smooth Peter Steigerwald. Bill O'Neil's writing is clumsy, often intrusive and fatally impeded by concrete galoshes of expository text, but that's because its doing many of the jobs normally left to the artwork. Despite plenty of action the main character remains a buff cipher surrounded by adventure story clichés, not a sin in itself, but single issues are close to incomprehensible. 0-9 were reprinted two to a collected edition, and those issues have since been collected in book form.~SW

FATHOM: KILLIAN'S TIDE

Image: *4 issue miniseries 2001-2002*

A sister title focussing on the distinctive master villain from *Fathom*. It introduces a younger Killian and his restless group of peers, relating the whys and wherefores of their developing into ecological terrorists. Killian's agenda is complicated by his need for vengeance against his parents' murderers from the surface. As a bonus we get our first look at the secret land where Fathom is from. The comic is plot-driven with input from creator Michael Turner, penciller Talent Caldwell and scripter Bill O'Neil but the usual long expository blurbs are kept to a minimum. Caldwell's artwork has a simplified look sometimes at odds with the rendered colour but the pin-ups and facials are mercifully leavened with some decent storytelling. The upshot is that the villains in Fathom now have more dimension than the main character.~SW

FATMAN THE HUMAN FLYING SAUCER

Lightning: *3 issues 1967*

The creators of the original *Shazam!* Captain Marvel reunite twenty years on with this strange series aimed at the younger end of the market. Rotund Van Crawford is a superhero called Fatman who can also transform himself into a flying saucer in times of need, but with a tendency to be distracted by any food. Lacking the charm of *Captain Marvel*, it proves lightning doesn't strike twice.~FP

FAULTLINES

DC/Vertigo: *6 issue miniseries 1997*

Tracy Farrand is a girl in retreat, on the run from responsibility, and in fear of her sanity. Either she's having a nervous breakdown or she's the victim of telepathic episodes. So it's not her best idea to visit friends in a remote mountain college town that's a psychic hot-zone complete with romantic ghosts and supernatural killers. Lee Marrs and Bill Koeb produce a well-paced expressionistic thriller with moody, innovative art. Good Stuff.~WW

THE FAUNA REBELLION

Fantagraphics: *3 issue miniseries 1990*

The animals get as mad as hell and aren't gonna take it no more in this ecological fable by R.L. Crabb. Funny in places, and decently drawn, it runs out of steam and inspiration long before the end.~WJ

FAUST

Northstar/Rebel: *10 issues 1989-1995**

An inordinately violent psychopath with apparent multiple-personality disorder assumes a costumed identity with metal claws, eviscerating to quench an uncontrollable bloodlust. There's more to the series, but the central theme is an exploration of what occurs when the rage inside everybody bursts loose. *Faust* certainly attempts to justify the high sex and gore content with a credible, if confusing, plot, but is ultimately unrewarding on any level other than as vicarious gratification.~FP

FAZE I FAZERS

AC: *4 issue miniseries 1986*

Artist and writer Vic Bridges introduces the Fazers, a collection of superhumans with the most unlikely names in the history of comics (Non-Man and Girl-Bot being favourites). Drawn very much in John Byrne's style, they're kidnapped by aliens for no good reason. 4 features early Erik Larsen fill-in art and a splendidly bitchy publishorial about Bridges' deadline problems.~HS

F.B.I.

Dell: *One-shot 1965*

One of the many one-off titles produced by Dell in the 1960s, this is a little dated, but has some nice art by Joe Sinnott. It's probably the last comic he pencilled before becoming the definitive inker on the *Fantastic Four*.~SW

Adventure into FEAR

Marvel: *31 issues 1970-1975*

The first nine issues reprint 1950s weird / horror short stories, then Man-Thing became the cover feature running to 19. Marvel's muck monster was created by a combination of a defective supersoldier serum and the magical affinity of the Florida swamps. Captain America should be thankful. A foul, seven-foot-tall mass of rotting vegetation with no mind to speak of, Man-Thing reacts involuntarily to the emotions of those around him, fear causing him the most distress. Following his initial appearance in *Savage Tales* (first series) 1 and a handful of guest appearances, he graduated to his own strip under the masterful touch of Steve Gerber and Val Mayerik. Most issues are above par, with the outstanding 18 summarising the nature of the human race in nineteen pages. 19 introduces Howard the Duck in a slightly substandard story that concludes in *Man-Thing* 1.

In 20 Marvel jumped on the vampire vogue by starring Morbius in two concurrent series (see *Vampire Tales*). Neither lasted. In *Amazing Spider-Man* 101, Michael Morbius developed a serum from bat enzyme to cure his rare blood disease. It worked but endowed him with selected vampiric symptoms as a side-effect. Marvel's "scientific" vampire experienced revulsion at his blood-sucking antics but was powerless to break his habit. This directionless series does science fiction, fantasy, horror, detective, mystery, supernatural, and singing crabs (in 29), and does them all badly – especially the singing crabs. Four writers and seven pencillers in twelve issues provides explanation for the awful standard. Paul Gulacy's art saves issue 20, but it is hard to find a single redeeming script feature. 31's "She bit me! On the neck! What'll I tell Joey if it leaves a mark??" is the best that can be mustered. Unbelievably, some of these stories were reprinted in 1993 as *Morbius Revisited* during the heyday of the Midnight Sons. The first issue is cover-blurbed "Classic Tales of the Living Vampire". Were Marvel to be less disingenuous it might read "Ropey old reissues for a fast buck".~APS

Recommended: 18

Bissette & Veitch's FEAR BOOK

Eclipse: *One-shot 1986*

Eight very short horror stories, being early professional work done while the excellent artists Steve Bissette and Rick Veitch were at Joe Kubert's Comic Art school, and originally published in educational magazines. They're silly fun.~GK

FEAR EFFECT

Image/Top Cow: *One-shot 2000, one-shot ('Retro-Helix') 2001*

Plotted very much to formula in the style of the computer game it's based on, with a character starting a mission and overcoming a number of obstacles en route to a goal. There are thousands of better comics actually worth your time and money.~FP

FEARLESS FOSDICK

Kitchen Sink: *2 volumes 1990-1992*

Fearless Fosdick was created by Al Capp as a newspaper strip within a strip in *Li'l Abner* in 1942, and these volumes present some of the Fosdick appearances between then and 1977, when *Li'l Abner* ended. It's a cruel parody of *Dick Tracy*, in which Fosdick is an utterly moral, but naïve and stupid, detective. Running jokes include his poor pay, regular sackings, loss of pension rights and high daily body count. He is almost prescient in his ability to shoot assassins before they can shoot him, but his solution to hearing that a villain has poisoned a single can of the most popular brand of baked beans is to kill anyone he sees trying to eat beans. Other stories have him outwitted by his parrot, a plutonium-enriched bum, a Chippendale chair, and lose his fiancé, Prudence Pimpleton to his robotic replacement. Capp's cartooning is sharp and there are some blackly humorous sequences, but it's not a sense of humour that will appeal to everyone.~NF

FEDS'N'HEDS

Print Mint: *1 issue 1968*

This effervescent collection of counterculture humour by Gilbert Shelton was one of the first important underground comics. It featured early appearances by both of Shelton's much-loved family favourite strips Freak Brothers and Wonder Warthog, as well as songs, poems, posters and the legendary Oat Willie. Consistently funny, the humour has a universality that easily overcomes its hippy origins.~DAR

Recommended

FEEDERS

Dark Horse: *One-shot 1999*

Pretentious horror gibberish, written by Shane Hawks as a prelude to his indie movie *Eyes to Heaven*. Although Mike Allred's artwork is as clean, slick and attractive as ever, it's not enough of a redeeming feature to justify buying this nonsense.~DB

FELIX THE CAT

Harvey: *57 issues (62-118) 1955-1961*

Harvey Classics: *Series one 7 issues 1991-1993, series two (The Nine Lives of…) 1991-1992, one-shot (The Adventures of Felix the Cat) 1992*

Felix is a talking cat, created by Otto Mesmer for the Pat Sullivan Animation Studio in 1915. An instant world hit, the cartoons led to a long career as a newspaper strip, as well as product in many other media. Messmer wrote and drew the Sunday strip for decades before the cat made the jump to the fledgling world of comic books in 1943, with most of the material being reformatted reprints from the newspaper strips. Harvey took the title over from the defunct Toby Press, and published new tales in addition to Messmer reprints. As the cat evolved through successive movie shorts and eventually TV appearances, the additional paraphernalia of mad professors, clunky robots and the magic bags of tricks gradually became icons of the magical cat. The work retains a certain charm and many of the rapid-fire, surreal gags still find favour with the youngsters they're aimed at. With the 1990s advent of two rival TV shows starring Felix, Harvey relaunched the cat in a series of reprints from the early days of the strip. Series two features stories by Messmer, but otherwise erratic selection of material makes these for dedicated fans only. The dedicated Messmer fan should seek out the 1996 Fantagraphics hardback *Nine Lives to Live*, reprinting classic 1920s strips.~WW

FELON

Image: *4 issue miniseries 2001-2002*

Not much reading in these at three dollars a time. You'd be better off with the Parker novel by Richard Stark open on the protagonist's prison bed on the cover of 1. A hard boiled female armed robber back outside looking for the jobmates who set her up is still a novelty. It's readable, but the inconsistent art, with messy storytelling, is only saved by the colouring (except in 4, which is black and white and looks awful), as so often is the case nowadays. Balloon placement and spelling are typically careless. Never mind, the quasi-cinematic background noise (pop music, extraneous dialogue etc.) works well and a nasty chap gets his balls blown off. The question of whether we want our young people to identify with violent criminals remains.~GK

FEM FORCE

Americomics: *116 issues †, 1 Special, 8 one-shots 1985 to date*

An all woman team of superheroes, the Fem Force was assembled from the characters that AC founder Bill Black had been publishing in fanzines since the late 1960s. Having survived uneven distribution, retailer indifference and almost universal critical disdain, they've achieved their 100th issue, a feat very few independent titles can equal. Core members of the team include the ultra-patriotic Ms Victory, the feral She-Cat, the mystic Nightveil, intergalactic adventuress Stardust, and a personal favourite Synn, the Girl from LSD, a burned-out acid casualty ex-stripper whose hallucinogenic powers ensure that when she trips out, everybody trips out! The implausibly costumed and impossibly stacked protagonists are very much in the cheesecake good girl art tradition, and as such attract a negative response from the po-faced comics establishment. However, if you manage to set the enormous breasts aside –

and those puppies take a lot of setting, it has to be admitted – what you're left with is a very traditional and moral superhero title. Tragedies occur occasionally, but virtue is generally rewarded, evil is thwarted and there's a clear distinction between the bad guys and the good guys, or good gals in this instance. As such, it's a welcome contrast to the plethora of twisted, psychopathic, murderous 'heroes'. *Fem Force* is very much a curate's egg. There are a few real stinkers, particularly a run in the late 1980s drawn by Dick Ayers who not only can't draw gorgeous women, but can't manage humans, but most issues are an undemanding fun read.~HS

FERRET

Malibu: *One-shot 1992, 10 issues 1993-1994*

Spin-off from The Protectors team starring their token feral misanthrope. Mostly competent, with a few glimpses of potential, but sunk by the hopelessly derivative nature of the character. The first issue, however, has a gimmick so dumb it should be in any collection of esoterica – the cover is trimmed to match the shape of our hero's head!~HS

FEUD

Marvel/Epic: *4 issue miniseries 1993*

In an otherworldly scenario four races co-exist: the Stokers are engineers, the Grunts are a hardy working race, the Kites are flying artists and the amphibious Skids are fishermen by trade. Their uneasy alliance is shattered when the heir to the Skids' throne is abducted by Kites, leaving clues implicating Stokers. With the co-dependency of the races, this is merely the old game of paper/stone/scissors transferred to comics, but it's well conceived by Mike Baron, well illustrated by Mark Nelson and hideously coloured by Ray Murtaugh.~WJ

F5

Image: *4 issue miniseries 2000**

Dark Horse: *One-shot ('Origin') 2001*

At Image covert action team F5 falls to pieces when trying to save the world from a megalomaniac intent on launching fatal germs across the globe. It's a decently drawn, in an anorexic fashion, and well-plotted thriller that *Danger Girl* fans should enjoy. Some will carp about the plethora of gratuitous underwear shots, but one presumes that for creator Tony Daniel it's part of the fun. The one-shot is poor value, with only twelve pages of story giving background on the cast padded out with cover repros of the Image series, and preparatory sketches for it.~WJ

50'S FUNNIES A Blast from the Past!

Kitchen Sink: *One-shot 1980*

A decent William Stout cover contains a largely disappointing set of strips from folk who'd become far better writers and artists. The 1950s theme is only loosely adhered to by the likes of Tom Yeates, Scott Shaw, Alfredo Alcala and Steve Bissette among others. The best strip pits Ed Gein against the kids from the Bazooka Joe strips by Bill Kelley and Rick Veitch, but even that's an awkward mix of Mad style parody and horror elements. A curiosity for the curious, but only from the bargain boxes.~FP

Big Monster FIGHT

Kidgang Comics: *2 issues (0-1) 1995-1996*

When Madame Marquis attacks a city with a giant monster (a la Godzilla), Doc Delilah uses four kids of the Science Gang to man her giant robot in its defence. The backup is a butt-kicking Alice against the Jabberwocky and Mocking Turtle. Jay Naylor's parodies should probably have been left to a single issue, though they're good-looking enough.~NF

FIGHT FOR TOMORROW

DC/Vertigo: *6 issue miniseries 2002-2003*

Grim'n'gritty martial arts tale set in the sleazy parts of a big city featuring Cedric, a Kung Fu student who is looking for love and answers to all the big questions, but is drawn into the deadly gangster-ridden world of underground street-fighting. If he's taking all the punches and kicks, why is it that his friends are the ones always getting hurt? Sharp but conventional action thriller from Brian Wood, Denys Cowan and Kent Williams.~WW

FIGHT MAN

Marvel: *One-shot 1993*

What does Fight Man do? He fights. Evan Dorkin turns out a very funny superhero pastiche starring the dimbulb crusader so beloved of Bill and Ted. With the merchandising, the alimony, sidekicks dying all the time and public protests, Fight Man's having a hard time of it. What's the solution? To fight, of course.~FP

Recommended

FIGHT THE ENEMY

Tower: *3 issues 1966*

Oh dear, oh dear. Tower's comics usually looked quite good, and so does this, with the occasional art by Mike Sekowsky, Al McWilliams and Dick Giordano amongst others, but these war and espionage stories (featuring the macho Mike Manly) leave a lot to be desired. For every story with a poignant statement, there's a matching one that's pure jingoism. There's an early Boris Vallejo story in 2, but by and large the adverts offer more enjoyment. Especially the "Man-Oh-Man! How Slim You'll look Wearing the New Commander Abdominal Supporter Belt". If only. Wonder if they're still on sale...?~HY

FIGHTIN' 5

Charlton: *21 issues 1964-1967 (28-41), 1981-1982 (42-48)*

Charlton's mid-1960s attempt at copying uniformed teams like Blackhawks and Challengers of the Unknown. The title inherited its numbering from *Space War* and the 1980s issues are all reprints. Hank Hennessy and his blue-uniformed, red-bereted task force did little to distinguish themselves in any of their lame counter-espionage adventures. Writer Joe Gill worked with a number of artists including Rocke Mastroserio and the team that became the title's mainstays Bill Montes and Ernie Bache. Eventually Peacemaker, the title's back-up in 40-41 by Gill and Pat Boyette, proved novel enough for him to be given his own title with the cancelled *Fightin' 5* as his back-up. That says it all, really.~SW

FIGHTING AMERICAN

Headline: *7 issues 1954-1955**

Harvey: *1 issue 1966*

When crippled war hero Johnny Flagg is killed by Communist agents, his timid younger brother Nelson promises to bring his murderers to justice. Military superscience transfers Nelson's consciousness into his brother's rebuilt and fortified body. With the aid of kid sidekick Speedboy the freshly minted Fighting American sets out to defeat a ludicrous array of Bolshevik villains, including Rhode Island Red, Count Yuscha Liffso, Poison Ivan and Hotsky Trotski. After creating Captain America in the 1940s, top team Joe Simon and Jack Kirby revived their patriotic superhero concept at the height of 1950s Communist baiting. Although Fighting American was a sincere Cold War warrior, Simon and Kirby's decision to play things mainly for laughs ensures this comic remains a good fun read some forty years after it was first published. The Harvey issue reprints selections from the 1950s run, plus a modicum of new material and many copies of the Marvel hardback collection were misprinted, so caveat emptor.~AL

Recommended: 3, 4

FIGHTING AMERICAN

DC: *6 issue miniseries 1994*

This is an updating of the 1950s Fighting American. A government research team combines the 'fortified' dead body of Johnny Flagg with the mind of his brother Nelson, with the aim of producing a superhero to fight communism. But by the time Fighting American emerges from the vat, the USSR is no more, and the enemies confronting our hero are all 100% American. There's the Media Circus (a 'performance art mercenary terrorist troupe'), the Gross National Product (pure, guzzling greed), and the Phoroptor

---

* Available in a collected edition

(whose rose-coloured lenses produce paralysing rays of nostalgia). Obviously, you're in for a few panels of lecturing with each issue, but the touch is generally light, and the priority is entertainment.~FC
Recommended: 1, 5

FIGHTING AMERICAN

Awesome: *2 issue microseries 1997, 3 issue miniseries ('Rules of the Game') 1998, 3 issue miniseries ('Dogs of War') 1999*

Dire reconstruction of the Joe Simon and Jack Kirby classic using what looks like rejected pages from Liefeld's controversial *Captain America.* John Flag, The Fighting American, comes out of retirement just to quit and in 'Rules of the Game' he's forced out of retirement by a gaggle of old enemies plundered from the original Simon and Kirby run. He's got a shield, a dead partner replaced by a cyborg girly in a leather jacket and cycle shorts, and he's even got a thunder god and a guy in a metal suit. What he hasn't got is one single idea that hasn't been used a zillion times, so everyone concerned gives up and turns the character over to Jim Starlin and Steven Platt to begin again, again. Where are the lawyers when you really need 'em? Pitiful stuff.~WW

FILIBUSTING COMICS

Fantagraphics: *One-shot 1995*

Pastiche of Understanding Comics by Dylan Sisson that is very funny at times. In the end, though, there's not an awful lot to parody and it runs out of steam well before the twenty-four pages have elapsed.~WJ

THE FILTH

DC/Vertigo: *5 issues + 2002 to date*

For all the hoopla that preceded this title, there's very much a feeling of Grant Morrison treading water, throwing in more hollow terminology and ladling on the sex to disguise the fact. Of course, even coasting, Morrison's prodigious imagination tops most other comic writers at their best. The Filth starts with an amnesiac Ned Slade, being very reluctantly retrieved from down time in a suburban identity created for him. He is an officer of The Hand, an organisation involved with paranormal cleansing of intrusions from worlds beyond most of humanity's imagination. In other words, a sort of surreal Ghostbusters. If Morrison is so far a victim of his track record, he breaks it in another respect. Throughout his pre-*X-Men* career he's been burdened with artists not only incapable of conveying the nuances of his scripts, but the likes of Chas Truog, Richard Case and, to a lesser extent, Howard Porter, couldn't even master the basics of drawing stories. Here Chris Weston and Gary Erskine are relishing the chance to step away from their previous reputations, producing detailed sleazy pages. Less than halfway through a planned 13 issue series, Morrison can still turn all expectations around, and it wouldn't be the first time.~FP

FILTHY HABITS

Aeon: *One-shot 1994, 4 issues 1996-1997*

Clay is an appalling specimen. Abrasive, misogynistic, and self-absorbed he's irredeemably old lad, with little appeal. He also manages to bring out his acquaintances' less endearing qualities to varying degrees. The aim is comedy, but the one-shot falls completely flat and is best ignored. Two years on and artist Eric Jones has refined his style into an appealing fusion of Roger Langridge and Ed Brubaker while Landry Quinn Walker's scripts are altogether sharper. The first issue has Clay on the rampage in search of a desired record, but the best story spreads over 3 and 4 as the cast is sometimes moved beyond caricature when Elmo and Diane have an unpredictable parting of the ways.~FP
Recommended: 3-4

THE FINAL NIGHT

DC: *4 issue miniseries 1996**

The year's big crossover, suspensefully written by Karl Kesel and smoothly drawn by Stuart Immonen. An entity known as the Sun-Eater heads for earth and puts out its sun. With Superman's powers depleted by lack of solar energy, the rest of Earth's heroes race against time to cope with the panicked population and try to devise a means of reigniting the sun. Green Lantern, Parallax, Lex Luthor, Superman, Brainiac 5 and Ferro are the major players in what is a better than usual annual uniting of DC's heroes. The effects spill over into most of DC's regular superhero titles and leave Superman powerless in his own titles for several issues.~NF

FINDER

Lightspeed Press: *28 issues + 1996 to date*

Carla Speed McNeil crafts a compelling science fiction saga, ostensibly following the enigmatic Finder, an artefact hunter in a post-apocalyptic world where humanity, and various alien races, live in huge city-domes. It's all simply a vehicle for an engaging series of explorations of personalities and the technologies that increasingly impinge upon them. 1-14* comprise one long story as the charismatic Finder explores his devastated world, eking out a living and getting closer to the secret of his seeming imperviousness to harm. With the next arc ('King of Cats') and later stories, the settings expand and even the lead character is off-stage for issues at a time, but the strong narrative and increasingly impressive drawing continue to captivate. A treasure of good old fashioned comic storytelling.~WW
Recommended: 1-5, 15-19, 23-24

A FINE MESS

Alternative Comics: *1 issue + 2002 to date*

'Aranda's Coat' is a tale of rivalry between two teachers over the greater reality of a coat or its picture. In 'Night of the Grossinator', Guard Tindell, has a night out getting drunk, also acting as a conspiratorial narrator and commentator on events. The 'Exercises in Style' are eight single-pages all describing the same event in different ways e.g. as a monologue, subjectively, as a template, as a photo comic, as dailies in a newspaper strip. Based on the work of Raymond Queneau, the aim is to produce as many variants as possible on a simple one-page non-story, with others to appear in later issues. Matt Madden's formal exercises seem very impersonal and detached. They may raise a smile at their cleverness, but don't engage the heart.~NF

FINN

Fleetway/Quality: *4 issue miniseries 1993*

Pat Mills throws up a hodge-podge of old Earth legends, witchcraft and nasty, nasty corporations, occasionally punctuating it with a couple of pages of preaching. Earth activist Finn is rather pointless in the middle of it all. The whole series is painted, very badly in places, and with a minimum of background throughout. Not a career highlight for anyone involved.~WJ

FIRE

Caliber: *2 issue microseries 1994**

This is the point at which it began to gel for Brian Michael Bendis and his noir crime stories. Here the inclusion of photographic collage, heavy black panels and oddly shadowed figures transformed from seemingly whimsical irritants to serving the text. That text is narrative heavy, and stretches a little mystery a long way, but Bendis successfully evokes a mood. That he would progress to more complex stories shouldn't mean *Fire* is completely irrelevant. Bendis significantly retouched the pages for the Image collected edition, recognising the amateur quality of the lettering, and re-writing as he corrected the deficiency. He also restored the ending as originally conceived, making for a better (and more easily located) work.~WJ

FIRE FROM HEAVEN

Image/WildStorm: *2 issues 1996*

Although only two issues were actually titled *Fire From Heaven*, the story of the same name runs through Backlash 19-20, *Deathblow* 26-28, *Gen*^{13} 10-11, *Sigma* 1-3, *Stormwatch* 35-36, *Sword Of Damocles* 1-2, Wetworks 16-17, and *WildC.A.T.S* 29-30. Far reaching in its implications for the titles it touched and their connected continuity, these two issues are the first chapter (although there are preludes) and penultimate chapter (the tale concludes in Deathblow 28). Considering the amount of creators involved in what is essentially one continued story incorporating dozens of characters, the entirety is quite an achievement, although occasional chapters fall flat. Neither of these issues ranks among the best chapters. Both written by Alan Moore, the second issue is superior by virtue of a few good jokes and Jim Lee's art scoring over Ryan Benjamin's uneven quality in the first issue.~WJ

Vietnamese Grandfather Nguyen Van Tan runs a grocery store in an impoverished part of the Big City with his grandson Cam McMurphy. When local skinheads try to force them out as part of a mob-backed land grab Cam is saved from death by soldiers, old friends of his grandfather. The last time Nguyen saw them, however, they had all just died helping baby Cam escape in the last helicopter out of the jungle. The dead soldiers of the Fire Team swiftly polish off the thugs before taking Cam on their real mission, which is to rescue Cam's missing Dad and liberate Vietnam. Dubious nonsense from the normally competent Don Lomax.~WW

FIREARM

Malibu: *19 issues (0-18) 1993-1995, 30 minute video 1993, 6 issue miniseries (Codename: Firearm 0-5) 1995*

James Robinson scripts the adventures of British expatriate and ex-spy Alec Swan who ekes out a living as a private eye in a California brimming with Ultrahumans. With a reputation for mayhem and a supergun from his covert days he specialises, albeit reluctantly, in cases involving the paranormal. After destroying a ring of cannibal millionaire Ultras he stumbles through a sequence of crossovers ('Breakthrough', 'Search For Prime') and filler tales until he faces his ultimate foe in 'The Rafferty Saga' as a deranged soldier declares war on Ultras and challenges Swan to stop him from killing them all. This occupies 13-18 and numerous crossovers in other Ultraverse publications. The series launched with an issue zero and half hour video that combined, rather jarringly and unsuccessfully, to create a complete adventure before launching into a more traditional format. From the outset the strip transcends standard action fare, blending sensitivity and tension with easy grace, especially when drawn by Cully Hamner (1-6, 9) or Gary Erskine (10).

The uninspired miniseries written by Marv Wolfman and David Quinn featured Swan's old spymasters and a new 'Codename: Firearm', with Swan himself relegated to an equally uninspired back-up strip. Despite its connection to the original series the execution is so confused and clichéd it's safer and certainly preferable, to consider it a separate entity entirely.~WW

Recommended: 1-5, 9-12, 16, 18

FIREBRAND

DC: *7 issues 1996*

Drawn by Sal Velluto, *Firebrand* has a distinctive and appealing visual style not matched by the lacklustre sub-*Knight Rider* storyline. An ex-cop was blown up hunting child abusers and has returned as an enhanced vigilante thanks to a wealthy benefactor. Brian Augustyn's script doesn't work hard enough to make the full story any more readable than it sounds in thumbnail form. Those really interested in Firebrand might want to check *JSA Secret Files* 2.~NF

FIREBREATHER

Image: *1 issue + 2003 to date*

Here's a new twist on the superhero in high school hell: he's the son of a dragon. It's wittily written by Phil Hester and well drawn by Andy Kuhn, and so far the most promising of Image's new line of superheroes.~FP

FIRESTAR

Marvel: *4 issue miniseries 1986*

This is an *X-Men* and *New Mutants* limited series. At thirteen, Angelica Jones starts to exhibit her high-temperature mutant power. She is immediately recruited by the evil White Queen, who spends the next few years working to make the unsuspecting Angelica into her best weapon against the X-Men. The story could have been interesting, but the delivery is plodding and repetitive – it would have been twice as good at half the length.~FC

FIRESTORM the Nuclear Man

DC: *Series one 5 issues 1978, series two 100 issues, 5 Annuals 1982-1990*

After years writing for Marvel Gerry Conway moved to DC, where *Firestorm* was the best title he produced. He followed the Marvel template in creating the character and his world. In the usual implausible comic way, high-school student Ronnie Raymond attends an anti-nuclear demo and is caught when a bomb detonates near a nuclear pile. His personality is fused with the creator of the reactor, a Professor Martin Stein, and together they become the atomic-energy being Firestorm. Raymond controlled Firestorm's body, but was directed by Stein, and he was also able to separate their bodies and return them to normal. Whenever trouble was at hand Raymond would concentrate, and no matter how far apart they were, the bodies would merge to become Firestorm. For a long while Stein had no memory of what had occurred once they separated. *Firestorm* was light superhero action drawn by Al Milgrom, with soap opera, but was cancelled before it had a chance, along with a large proportion of DC's line in 1978.

Conway persisted with Firestorm, though, writing a back-up strip in *Flash* 289-304 and inducting him into the Justice League. The second solo title was called *The Fury of Firestorm*. Solidly written by Conway and well illustrated by Pat Broderick, the formula was much the same as before, with an early plot concentrating on Professor Stein's increasing instability regarding his memory blackouts. Ronnie doesn't escape mental-anguish either, as his journalist father has some very shifty friends, and dies in 16. Never mind, though, because the next issue introduces Firehawk, a female counterpart to Firestorm, who became very popular. She was a bit less popular with Ronnie, who'd been dating her as Lorraine Reilly. Still, making the best of a bad thing Firestorm and Firehawk start dating instead. How nice it is to have a girlfriend with similar interests. Ronnie now conveniently attended the college at which Stein was teaching, making transformations a little less traumatic, although the knowledge of what was going on also helped. Penciller Rafael Kayanan arrived on 19, and Blue Devil débuted in 24's insert (and for those who really care, 6 had an insert featuring The Masters of the Universe).

Conway was still producing what is in essence a Marvel-style comic with a DC bullet on the cover. There's the emphasis on soap-opera characterisation, light superheroics and the occasional bombshell, generally resolved within five issues. The Phantom Stranger drops by in 32 for an unusual teaming of light and dark. Ronnie's college nemesis, as introduced in the first series, was Cliff Carmichael, a continuing irritating presence for our young hero. This leads to a confrontation in 40, alienating his friends. Joe Brozowksi takes over the art in 43 and there's a happy moment in 50 when Ronnie's father marries again. Just as well he didn't really die in 16 after all. There's a run-through of the Raymond family history in the first annual. Conway ends with 57, by which time, although never poor, *Firestorm*'s light tone had become very familiar and slightly stale. It required a good jolt, and that's what occurred with new writer John Ostrander.

Ostrander took a far grittier approach, and started introducing more character-based plot elements, although he continued Conway's plot for the unlucky Professor Stein, diagnosed with a brain tumour. Wanting to do something useful before he dies, he and Ronnie use Firestorm to destroy the world's nuclear weapons, which doesn't sit too kindly with the Soviet Union. In annual 5 they dispatch Pozhar to deal with him, and just to make sure, detonate a nuclear missile on the pair of them. As Firestorm and Pozhar are in contact during the detonation their matrixes merge and transform, leading to the creation of a new Firestorm. This one, though, has a personality independent of his constituent parts, and can form spontaneously, making life difficult for both, but more so for Mikhail, formerly Pozhar. During his absence his family has been arrested by the KGB, and in a stressful plot he's reliant on a group of superpowered teenagers called Soyuz to pull his fat out of the fire (Firestorm being unavailable). It all comes to a head in 73.

As the series continues Firestorm grows as an entity, and resents being used only in combat. His powers are almost limitless, and he wants a greater influence on the good of the world. 77-79 form 'The Eden Trilogy', in which Firestorm's solution to famine in Africa is to replenish the soil, creating a new garden of Eden. It may seem a glib answer to a real world tragedy, but Ostrander handles it with sensitivity, making it more than just a superhero adventure. Tom Grindberg brings his Neal Adams stylings to Firestorm from 81, but is soon replaced by Tom Mandrake with 86. Having been tinkering with Firestorm and who can form him since his début on the title, Ostrander's revelation in 85 still comes out of left field. Unfortunately the idea is taken one step too far as a battle ensues in 90-93 between Firestorm and Swamp Thing, Red Tornado and the freshly created water elemental Naiad. 100 concludes the series in satisfying fashion with still more revelations concerning Firestorm's origin.

Ostrander's issues are more inventive than Conway's, but not necessarily any better. Both were well served by their respective pencillers, and both turn in solid superhero stories. As subplots tend to continue unresolved from issue to issue, noting sample issues is difficult, but the first and fifth annuals adequately showcase the differing approaches of each writer. Anyone enjoying them is likely to enjoy most issues of *Firestorm*.~HY

FIRKIN

Knockabout: *7 issues 1989-1993*

These are collections of two-page strips that originally appeared in the soft porn magazine *Fiesta*, written by Tym Manley and drawn by Hunt Emerson. Firkin is a cat, and he provides a robust commentary on human sexual behaviour. The first few strips are rather down-to-earth, in the style of observational comedy ("Hey, lads, you know what it's like when you..."), but they steadily become more and more fantastical and extravagant, as you'd expect with Hunt Emerson involved. Throughout, the attitude to sex is well-balanced. It recognises that women as well as men have sexual fantasies, and that life feels no obligation to fulfil the fantasies of either side. This is very refreshing given the sadly misogynist track record of sex comics. Not that every strip is a gem: there's a persistent weakness in the endings, and an over reliance on fart and constipation jokes (though if that pushes your buttons...). Still, there are nice touches every few panels, regardless of the story. The best issues are 4 for the *Dan Dare* spoof and the part of the time-travelling urinal saga that takes place in the Garden of Eden, and 7 for the sexual problems of various comics heroes, the survey of methods of penis-enhancement, and the little footballers in 'Words of Fear'. You will doubtless find your own favourites. 1-4 were previously collected by Virgin Books in 1985.~FC

THE FIRST

CrossGen: *25 issues + 2001 to date*

In CrossGen continuity each series plays upon its own dimensional plane with occasional brief meetings between protagonists and ancillary characters. Narrative events spark in each individual series when a protagonist gains superpowers by being given a Sigil mark by one or more mysterious strangers. The First is a kind of over-series, dealing with a group of god-like (if not godly), beings who believe themselves to be the creators of the various universes. As a pantheon they borrow heavily in character from Zeus's Olympians with a heavy helping of Jack Kirby's *New Gods* thrown in. Once a united group led by the all-powerful Altwaal, philosophical dissention leads to a plot to murder the God-King. It goes awry, and as destruction escalates a raging and heartsick Altwaal ends the conflict in the only manner he can, separating the warring factions and partitioning the universe. The First were divided into two houses kept apart and in a state of enforced détente by a tremendous energy barrier called the Eidolon Rift. Should any god cross the Rift they would lose all their power. When equilibrium is restored Altwaal is mysteriously gone leaving both houses to fester and scheme in shallow millennia of bed-hopping and family politicking in a kind of *Dynasty* for deities.

The creation of the Sigil bearers rouses the First from their indolence as their house leaders meet to discuss the rise of this unprecedented threat to their supremacy. This leads to alliances being formed and the cycle of plotting and betrayal begins again. Despite its mythic premise, this is a petty and squalid affair with bullying and whining in equal amounts, and no seeming progress or learning from mistakes for any of the "superior" beings involved. It makes for a rather tawdry soap opera on steroids, and Barbera Kesel, Bart Sears and Andy Smith are responsible for this interminable nonsense.~WW

FIRST ADVENTURES

First: *5 issues 1985-1986*

Anthology featuring Blaze Barlow (comedy detective), Whisper (Steven Grant's tale of espionage, a precursor to the Bad Girls trend) and Dynamo Joe (a manga-influenced giant robot adventure series). Each strip had some merit within its genre but only Whisper and Dynamo Joe made it to their own series.~NF

FIRST ISSUE SPECIAL

DC: *13 issues 1975-1976*

As an updated version of *Showcase*, this try-out title wasn't a great success. Only Mike Grell's *Warlord* (8) and a revived *New Gods* (13) graduated to their own titles, and neither was particularly interesting. Other issues also featured revived characters, and while Metamorpho (3) and The Creeper (drawn by his creator Steve Ditko in 7) were pleasant enough, Dr Fate (9) by Martin Pasko and Walt Simonson was absolutely outstanding. Jack Kirby updated his old Manhunter feature in 5, and also produced two new strips, the mythological Atlas (1) and the kid gang Dingbats (6). None of them neared his finest work, but all were entertaining. So were two efforts by Kirby's old partner Joe Simon, The Green Team (2) and the Outsiders (10). Both were drawn by Jerry Grandenetti and Creig Flessel, both were kid gang strips of a sort, and both were completely mad. The remaining issues starred Code Name: Assassin (11) and a new Starman (12), though neither was of any note.~DAR

THE FIRST KINGDOM

Comics and Comix: *3 issues 1974-1975*
Bud Plant: *21 issues (4-24) 1976-1986*

Written and drawn in black and white by Jack Katz, this was one of the first independent comics. The earth was laid waste by war, and many generations later, the survivors are still at the Stone Age level, hunting giant lizards and fleeing man-eating ogres, clad only in ragged loincloths. But some of the gods who live on the high towers want to see change, and they have chosen the great hunter Darkenmoor to build the first city. That is to say, it's utterly standard heroic fantasy, until 4, when some utterly standard space opera gets mixed in too. The problem is that Katz cares too much. It's perfectly perfunctory hackwork, but he finds every detail of his world fascinating, and, of course, utterly necessary to the story he's telling. If only he'd had a ruthless, soulless, commercial editor to say, "This sequence is completely irrelevant", or "This is the third time you've had Fara sold into slavery", or "These panels are so crammed with detail, I can't figure out what I'm supposed to be looking at", or "I can't tell any of your women characters apart. If you won't put clothes on them, at least show some difference in the shape of their breasts." Pruned to six issues, the ideas (and they are there) would retain their vigour, and the virtues of Katz' art would not stale with repetition. He has a striking way with landscape and monumental architecture, and with eerie rituals, such as the sequence in 1 where a god is banished to hell. The sequence turns out to be irrelevant, but it casts a spell.~FC

1ST MAN

Image: *1 issue 1997*

A light-hearted superhero romp as theology student Luke Henry is forcibly merged with Apollo, a dying alien who is carrying the last thousand minds of a dead civilisation. Almost instantly he's the target for every space warrior in the galaxy. Insubstantial nonsense.~WW

FIRST SIX PACK

First: *2 issues 1987*

Bite-sized snippet previews of First's regular publications, excerpting a maximum of five pages from each title and providing text page with background information. There's a decent Dave Dorman cover painting on the first issue, but there's no other conceivable reason for buying this now.~WJ

FISH POLICE

Fishwrap: *11 issues 1985-1987*
Comico: *1 Special 1987, 14 issues (0, 5-17) 1988-1989 (5-17), 1991 (0)*
Apple: *9 issues (18-26) 1989-1990*
Marvel: *6 issues 1992-1993*

Everyone has their fifteen minutes of fame, and for a while it looked like Fish Police would stretch theirs to several hours. Steve Moncuse's easygoing funny fish comic is exactly what the title suggests, a pleasant soap opera about crime and love set in a world of talking fish, centring around the adventures of Inspector Gill. The quirk is that Gill may be a real policeman reliving his life as a fish in his dreams. The characters are pleasing, there are plenty of quirky humorous touches and it's drawn in a clean, open style with neither too much nor too little detail. But something doesn't smell right. It's just too smooth around the edges, like a glossy dramatisation of a blockbuster, specially designed not to be too upsetting or too taxing.

Fish Police had more chances at becoming a hot title than anything else that comes to mind. Originally printed under creator Steve Moncuse's own imprint in black and white, it was picked up first by Comico, who preceded their tenure by collecting the first four stories in colour as the graphic novel *Hairballs*. They then continued reprinting the previous series in colour from 5, picking up with new stories from 12. Comico also printed a 0 issue, originally designed as a pilot issue set earlier in *Fish Police* continuity. Under Apple the series reverted to new black and white stories, and after a two-year hiatus Marvel took it up on the basis of the cartoon series' popularity, and started reprinting from the original issue 1, in colour. So if you want it, it's not hard to find the start of the story.~FJ

FISH SHTICKS

Apple: *6 issues 1992-1993*

This is an offshoot of the *Fish Police* comics, and is written by *Fish Police* creator Steve Mancuse with art by Steve Hauk. It's a world much like ours, except funnier, and with everyone turned into a fish or other aquatic lifeform. The action centres around Inspector Gill, the local bar, and the reporters at the *Fishwrap* newspaper. The stories are quietly surreal, but the star is the dialogue: fresh, funny and wonderfully human.~FC

FISSION CHICKEN

Fantagraphics: *4 issues 1990*
Mu Press: *One-shot (Plan Nine From Vortox) 1994*

Spewed from the pages of *Critters*, J.P. Morgan's superhero chicken stories are primarily a vehicle for parodies of everything from other superheroes through H.P. Lovecraft and *Nightmare on Elm Street* to weird UFO conspiracy theories. How on earth Fantagraphics thought the character strong enough to carry its own title is anyone's guess, although some people have a sneaking fondness for the sheer daftness of it all. The back-up strip, Duck "Bill" Platypus by Kyle Rothweiler, is much more interesting. An anarchic cross between *Pogo* and *Krazy Kat*, it's full of puns, visual and literal, political satire and surreal plots. The "Chicken of Wrath" returns for a long adventure in the one-shot, fighting old enemies the Vortoxians, "marketing experts from beyond!" The usual targets are hit about quite a bit, particularly commercialism and media manipulation.~NF

5 DUCK RUSH

Alpha Productions: *1 issue 1995*

Full comic debut from Sean Bieri reprinting some of his minicomics along with new material. Bieri's cartooning is very confident, resembling the slick style of Terry LaBan, and his stories are very funny and varied. There's the tale of a dental hygienist produced in the style of Frank Miller, unconventional superheroes Cool Jerk and Homo Gal, and a number of well-observed shorter strips. By now Bieri should have progressed to being a very recognisable name in comics, so let's hope his talent is earning him a fortune at some other artistic endeavour.~FP

FIVE STAR SUPERHERO SPECTACULAR

DC: *One-shot 1977*

No false modesty at DC when it came to titling this anthology, but honesty in calling it *Two Star Superhero Average* probably wouldn't have helped sales. There are rather pointless solo spots for Atom, Aquaman, Green Lantern and Flash, but the Batman story is the best, concluding the plots from *Kobra*.~WJ

FLAMING CARROT

Killian Barracks: *One-shot 1981*
Aardvark-Vanaheim: *6 issues 1984-1985**
Renegade: *11 issues (7-17) 1985-1987**
Dark Horse: *14 issues (18-31) 1988-1995, 1 annual 1997, one-shot (Flaming Carrot & Reid Fleming) 2002*

The Flaming Carrot is an ordinary young man, brain-damaged after reading five thousand comics in one sitting. Putting on a giant carrot mask he patrols Iron City, his favoured mode of travel is a pogo stick, protecting it from villains like the Artless Dodger and Gonzaga. There is an element of whimsy and wish-fulfilment to all of this: when Death turns up, he and the Carrot go out for a night on the town; The Bikini Teens (super—owered bimbos) seem to exist for no other reason than to hang out with the Carrot. His friends include Uncle Billy, whose 'Jungle Woman' story is told in 18, Death and Dr Heller.

The first issues chronicle adventures from his early days as a crimefighter (2, 3). The following issues take him from the bender to end all benders (and a miraculous recovery courtesy of Dr. Heller) to a dastardly Communist Revolution, engineered by Gonzaga, who has perfected a super explosive made from the cellulite of pampered American women (5-11). Of course there are a few other heroes around, too. As a member of the Mystery Men (Screwball, The Shoveler, Captain Attack, Jumpin' Jehoshaphat, Red Rover, Mr Furious, Jackpot and Bondo-Man amongst others) the Carrot helps defeat the Vile

Brotherhood's clones of Hitler's feet (16-17). It's Screwball's pet shoelace that saves the day when Flaming Carrot teams up with the Teenage Mutant Ninja Turtles against Frankenstein's head (25-27). The Bikini Teens are helpful when the Carrot must defeat Don Wiskerando and his flying dead dog, who has tricked Dr Who and Star Trek fans into helping an alien invasion (19-24). When Iron City secedes from the Union and becomes a Communist state, it is a hunted Carrot who must restore order and democracy. The Annual was published over two years after the last regular issue and contains a Carrot story and a preview of the *Mystery Men* series. The Carrot meets Reid Fleming when they're both guests on the Celebrity Standoff quiz show, which pits them against the likes of Christopher Walken and Luciano Pavarotti, then sees them in a chase to capture the Vampire Lassie. Written by Burden and drawn by David Boswell (except for the Carrot himself), this is a welcome reappearance of both creators.

Burden himself describes the Carrot as a "second-string, cut-rate hero of marginal glamour and dubious powers". His powers are actually non-existent, though he has a catchphrase: "Ut!" The Flaming Carrot is only vaguely sane and if, in Iron City, the extraordinary seems ordinary, the Carrot's adventures are still a constant surprise. This is one of those odd creations that may not appeal to everyone but whose wit and inventiveness will endear itself to those who like a touch of surrealism in their comics.~NF

FLARE

Hero: *3 issue miniseries 1988-1989, series one 14 issues, 1 Annual, 1990-1993, series two (Flare Adventures) 12 issues 1992-1993, series three (Flare First Edition) 11 issues 1992-1993*

Like almost all of Hero Graphics' output, *Flare* was good-girl art superheroics, generally using scantily clad, impossibly proportioned heroines to make up for the lack of artistic and writing quality. At least *Flare* was more honest about its intentions than some of the other Hero titles, which tried to pass their protagonists off as straight superheroes. Here there was never any suggestion that it was intended as anything other than soft porn. *Flare Adventures* and *Flare First Edition* are largely reprint, also featuring Flare's *Champions* appearances, and *Adventurers* is a flip-comic with *Champions*.~JC

FLASH

DC: *Series one 246 issues (105-350), 1 Annual, 1 Spectacular 1959-1985, Series two 191 issues +, 13 Annuals, 2 80-Page Giants, 3 Secret Files, 2 Specials 1987 to date*

The Flash of series one is Barry Allen, actually the second Flash. His comic continues the numbering of the 1940s Flash Comics (see below) which starred the first Flash, more of whom later. As written by Robert Kanigher, then John Broome, and drawn by the team of Carmine Infantino and Joe Giella, Flash proved his popularity in Showcase 4, 8, 13 and 14. By his own title a formula is already established. It involves a gimmicky villain, superspeed thrills, the odd scientific fact thrown in, and Barry Allen being late meeting his girlfriend (and future wife) Iris West, who often refers to him as the slowest man in the world, not realising his other identity (ho ho). Variations included time travel, 'inescapable' traps, visiting other Earths and bizarre transformations. Flash's foes later became known as The Rogues Gallery (holding meetings as such) and are an essential part of the formula, devising ingenious heists and deathtraps, and almost acting out conflicts instead of actually getting stuck into them. There's little effort made to explain their abilities, nor, indeed, to explain Flash's superspeed. That he was bathed in chemicals when struck by lightning suffices, as it should, apart from a lunatic and long-ignored alternative origin in 167. For ten years *Flash* was light-hearted superheroics with excellent art, and very enjoyable as such, although a little dated now. Anyone enjoying one issue pre-175 is likely to enjoy most of them, so try one of the fine reprint giants, 160, 169, 178, 187, 196, 205 or excellent hundred-page 214 and the unnumbered hundred-page Super Spectacular. DC are also producing a continuing run of hardbound 'Archive' editions reprinting the earlier stories, and the1990s *The Greatest Flash Stories Ever Told* provides a fine sample of Flash in all incarnations. 205 and 214 also contain stories of the 1940s Flash produced during that decade, but never previously printed. Particular mention should be made of 'Flash of Two Worlds' in 123. As a story it's no better or worse than average, but its importance lies in the reintroduction of the 1940s Flash, now established as living on Earth Two, a dimension separated from Earth One and accessible to the Flash if he vibrated at a certain frequency. Outstanding at the time, ironically it began the alleged complication of the worlds occupied by DC's superheroes, precipitating *Crisis on Infinite Earths*, in which Barry Allen was killed.

The late 1960s and early 1970s were not happy times for *Flash*. With 174 Infantino departed, to be replaced by Ross Andru, who, while technically fine, lacks Infantino's style and individuality. Irv Novick from 200 is more suitable. He was initially paired with Robert Kanigher, whose human-interest stories were too great a contrast to what had come before, eschewing the popular villains in favour of one-off challenges. For his best see 206, in which two people are given a second chance at life. Cary Bates became permanent writer with 210, having contributed a bizarre story in 179. He went on to be the longest-running creator on a title noteworthy for long runs. Bates reverted to old-style *Flash* stories with the accent on superspeed action and cleverly plotted battles of wits between Flash and his foes, with characterisation an afterthought. He was soon managing this as well as, if not better than Broome, and with few exceptions this remained the pattern until 275. 254-256 form a fine sample of the Bates/Novick issues, with plenty of villains and a good plot. The landmark Green Lantern and Green Arrow pairing is concluded in 217-219 (art by Neal Adams), with GL as back-up feature until 246. Firestorm occupied the back-up slot in 289-304, Dr Fate was there in 305-313, and The Creeper was in 318-323, meaning Flash was rarely allocated the full page-count in his own title. 275 is a pivotal issue as The Reverse Flash (also known as Professor Zoom!) murders Iris Allen. The story injected a dose of realism into the Flash's world, and Cary Bates proved himself as adept with the introduction of continuity and characterisation as he had been with simpler stuff. Don Heck's pencils are surprisingly good, tiding the series through until the return of Infantino with 296, on a fine offbeat story. Infantino's art had become more stylised since his earlier days, and may disappoint purists, but he had lost none of his dynamism or storytelling skills. The excellent 300 has a paralysed Barry Allen convinced his career is a delusional fantasy, but despite the death of Iris Flash remained essentially light-hearted. That changed with 324, in which the Reverse Flash returns, and in order to stop him from murdering again Flash accidentally kills him. Arrested for manslaughter, he has to lose his civilian identity, and there's little respite from a depressing storyline working its way to series one's final issue. Although successful in maintaining suspense, the story is over extended, but nearing the conclusion with Flash's trial from 340 it improves, with an extraordinary amount of well-conceived twists and red herrings, including the return of a character believed dead, but, credit to Bates, not the obvious selection. Bates, the old sap, gives everyone a better ending than could have been hoped for, which is just as well, because in Crisis 8 Flash dies.

With Barry Allen dead, his mantle was inherited by Wally West. Beginning the second series, writer Mike Baron had a difficult task. Flash had been surplus to requirements as out of step with the times, yet his successor was the long-time kid sidekick wearing the same costume. Baron has a brave stab at differentiating them. Reasoning that superspeed burns calories and energy at an excessive rate, they obviously had to be replaced at an equally excessive rate, therefore Flash needed vast amounts of sleep and food. Never mind the cost, though, because he also won the lottery. And whereas Allen almost introduced the term Mr

Nice Guy, Baron's West is a selfish dilettante and nowhere near as fast. Both characteristics alter with time. Baron doesn't resort to using the old supervillains either, but it's all just window-dressing because once West is costumed there's little difference between the new *Flash* and the old. The best samples are 9-11, introducing the intriguing Chunk and the transition between pencillers Jackson Guice and Mike Collins.

By the time *Flash* graduated to TV William Messner Loebs had been writing the comic for almost two years, arriving with penciller Greg LaRoque on 15. It's a smooth changeover. Loebs emphasises West's individuality and confidently returns the Rogues Gallery in a very funny 19. That's followed by a heavy-handed but right-minded story about the destitute involving another rogue, and an encounter with Fidel Castro in 21 and 22. The diversity sums up Loebs' tenure. He turns out consistently grabbing stories, but they could be about anyone. His only interest in superspeed is abstract, exemplified by 30's cinema assassination attempt or 54's story of how it can be used to escape a plane. For a sample try 53, with a guest appearance from Superman, an interesting revelation from reformed villain Pied Piper, and Wally at his foot-in-mouth best.

62 starts four issues scrutinising Wally's first year as a superhero, later collected as 'Born To Run'. It also premieres Mark Waid's writing. Waid's greatest professional asset is an ability to concoct plots that suck the reader in and pull them along to a generally well-conceived conclusion. Even secure in the knowledge that the status quo isn't going to be changed, at least not in the long term, Waid's plots can make compulsive reading, and it's usually his longer stories that are the most compelling. His first prolonged effort begins with the surprise return of Barry Allen in 73, with the circumstances and mystery agonisingly prolonged until 79*. Waid pulls strings like a puppet master, and comes through with a well-planned pay-off. That's the final issue for penciller Greg LaRoque, not everyone's favourite but, like Novick on the first series, always solid and reliable. 'Terminal Velocity' in 95-100* investigates the intricacies of speed and why Barry Allen was faster and more controlled than Wally West. Impulse, debuted in 92, and Max Mercury who'd been introduced/revived during the Barry Allen story, both play a part in discovering a nebulous energy named the speed force that they all utilise, some with greater control than others. 'Dead Heat' (108-111* and *Impulse* 10-11) continues the theme with a less benevolent entity tapping the speed force. Flash lost in time has a masterful conclusion in 118, but the long-awaited 'Chain Lightning' (145-150) is overcrowded with all previously seen speedsters and more besides. By this time Brian Augustyn is credited as co-writer, and while there's a neat twist for continuity buffs in 150 the tale drags overall. That's not the problem with Waid and Augustyn's final lengthy tale in 152-159, where all the stops are pulled out to provide plenty of twists. Wally West goes missing as a mystery Flash turns up. His identity and agenda, and Wally's fate, are the focuses of the story, which manages to feature a large cast over several time zones without ever seeming crowded or confused. Of Waid's shorter efforts, 87's cynical spirit-of-Christmas story stands out, as does 127-129 in which some deceased villains are revived in deadly fashion. The best of them, though, is 120-121 in which political campaigning intrudes into the Flash's life. There's mystery, villains and a neat twist, making these the issues to sample if you want to investigate Waid's *Flash*. The remainder of his work is always decently plotted and readable, and thus no better or worse than those of his predecessors. The partnership of Grant Morrison and Mark Millar write 131-142, and their tenure is also immensely readable. There's an admirable variety in the stories they tell from a wonderful day in the life of the 1940s Flash (134) to a desperate race organised by all-powerful aliens in 136-138. 133 is of note for a fine Mirror Master appearance.

164 marks the debut of Brian Bolland for a characteristically fine run of striking cover images and Geoff Johns as writer. Johns plays down the speed force aspect of the stories that had come to dominate, and introduces elements reminiscent of the off-kilter early 1970s *Flash*, working them in far more successfully, although it gives the series a harder tone. It's the arrival of Scott Kolins as artist with 170 that sees Johns' run begin to shine. Utilising the most individual style seen on the Flash since latter-day Infantino, in combination with the muted colouring of James Sinclair, Kolins is the best regular artist on the *Flash* since, well, latter-day Infantino. Their first stories to 176, including a savage Weather Wizard in 174-175 are collected. Johns believes in keeping subplots smouldering for a while, which can irritate rather than tantalise, but has a fresh view on well-used characters, particularly the classic villains, whose backgrounds he fleshes out. There's a superb look at Captain Cold in 182 and the reformed Pied Piper is spotlighted in 190, but Johns is far from entirely reliant on the past and his deadlier Rogues Gallery in 184-188 is particularly menacing. If you don't enjoy Johns and Kolins' treatment of Grodd in 178, their *Flash* is probably not for you.

Over the years, in both incarnations, *Flash* has been a very good superhero title. The small quantity of recommended issues is testament to the consistency achieved, with few issues managing to stand out above the general run. Of the various annuals, specials and spectaculars, annual 3 sees William Messner Loebs having fun with Chunk, 5 and 10 are of note for the early artwork of Travis Charest and John Cassaday respectively, while 7 provides the best story, giving Flash a problem he can't outrun. The 80-page Giants have a lot of talented creators producing okay material without managing anything particularly memorable.~FP

Recommended: Series one 214, 219, 296, 300, 308, 309, 314-320, 345-350, series two 19, 22, 30, 33, 53, 74, 76, 78, 79, 87, 90, 91, 97, 108, 110-112, 118, 120-121, 133, 134, 156-158, 175-176, 178, 182-188

FLASH Miniseries and one-shots

DC: *One-shot (Flash + Nightwing) 1997, Graphic Novel (The Life Story of the Flash) 1997, 3 issue miniseries (Flashpoint) 2000, one-shot ('Iron Heights') 2001, one-shot ('Time Flies') 2002*

In *Flash Plus...* Wally West and Dick Grayson's annual vacation is interrupted when they stumble upon a murder mystery-cum-alien invasion. It's excellent superhero shenanigans from Mark Waid, Bryan Augustyn and Eduardo Barreto. *The Life Story* is ostensibly the career of the Silver Age Flash as related by his widow. In actuality it's a slick re-tooling of the Barry Allen character to fine-tune the current continuity courtesy of writers Mark Waid and Bryan Augustyn and artists Gil Kane, Joe Staton and Tom Palmer, told in a combination of comics and prose. A comfortable read. Iron Heights is the maximum security prison that most of the Wally West Flash villains are sent to. When a deadly plague erupts there the superfast hero has to break in to save the day. Naturally all is not as it seems and the events here are merely the prelude to a major storyline in the Flash's regular comic. It's entertaining enough but needlessly over-packaged. In 'Time Flies' John Rozum and Seth Fisher have Wally chase a 1950s test pilot through the time stream in a race to save creation. The intriguing plot centres on the discovery that the jet is causing time itself to speed up and Flash must reverse the process or the universe will die of old age before tea-time. Whimsical but entertaining in *Flashpoint*. Pat McGreal and Norm Breyfogle use the Elseworlds banner to explore a world where Barry Allen was crippled in a suspicious accident, and can only help the world as a wheelchair bound scientist. Overblown and histrionic in places, it quickly devolves into yet another moribund conspiracy theory story, but the art is lovely.~WW

FLASH COMICS

DC: *104 issues 1940-1949*

Most superhero anthology comics of the 1940s took time to build up their 'cast', starting off with one major feature, and developing the rest of the line-up from there. Not so *Flash Comics*, which started strongly with three long-running heroes still extant in some form more than sixty years later. First, of course, was the titular hero the Flash. Jay Garrick, an indolent university student, inhales hard water fumes during one of those experiments-gone-wrong beloved of comics writers, and gains superhuman speed as a result. Created by Gardner Fox, the purity of the super-speed concept resonated with young readers; Superman was, after all, a little beyond the ability of most kids to really empathise with, but everyone could imagine the fun to be had if you could run really fast! The appeal of the concept carried the series despite the leaden and pedestrian art in its early years, first by Harry Lampert, then by E.E. Hibbard. Both gentlemen were perfectly workmanlike, but wooden and stolid in execution, the antithesis of what a speedster needed. The plots, however, were lively and imaginative, and the Flash's girlfriend, Joan Williams, a cut above the average comic-book token chick. Fully in Jay's confidence from the beginning, there was no Lois Lane nonsense of trying to discover his secrets, and she was much more an equal partner, showing courage and initiative throughout the series' run.

---

* Available in a collected edition

The other major player was another Gardner Fox creation, Hawkman. Carter Hall, wealthy collector of weapons, has his ancient memories unleashed by a curious artifact, and discovers he is the reincarnation of the ancient Egyptian Prince Khufu. Using his invention of an anti-gravity metal, and clad as the Hawk-God, Anubis, he thwarts the reincarnation of his ancient enemy, handily bumping into the modern avatar of his old lady love, Shiera, in the same 12 pages. Some plot strands are heavily borrowed from the then-popular Mummy movies, but the result is an enjoyable romp, and Denis Neville's airy artwork suits very well. Fox obviously preferred mature romantic interests, as there was never any question of Shiera not knowing Carter/Hawkman's identity; in fact, she joined him as Hawkgirl from 24, one of the first super-heroines. Admittedly she wasn't very good at it at first, but she improved. From 3, the art on Hawkman was by Sheldon Moldoff, who remained until 61. Notoriously 'influenced' by Alex Raymond's *Flash Gordon*, Moldoff nevertheless gave the strip a richness and depth all its own, with a dark, menacing feel to the environs.

The third long-running strip was John Wentworth and Stan Asch's Johnny Thunder, or Johnny Thunderbolt, as he was often known at first. A Seventh Son, born at 7 a.m. on the 7th of July, 1917, John L. Thunder is heir to a great magic power, command of the Badhnisian Thunderbolt, which are unleashed when he is seven years old. Unfortunately, Johnny's naïveté and ineptness prevent him using these powers to any great effect, and he stumbles across his magic word Cei-U, which sounds like "Say, you", only by purest accident. A very slight concept, but well-meaning everyman Johnny struck a responsive chord with the readers (he was, despite his power, someone they could feel superior to) and had a long run until 92, when the Black Canary, of whom more later, hijacked his series.

Filling out the first issue were crusading reporter Cliff Cornwall, the Flash Picture Novels (by Minute Movies' Ed Wheelan), and the Whip, aka Rod Gaynor, an Anglo playboy who dressed like Zorro, and flagellated his enemies rather than using a sword. Cornwall and the Picture novels were early casualties, but the Whip enjoyed a healthy 55 issue run, but his adventures in modern-day South America are largely forgotten now.

The King, a Shadow-like gentleman crime fighter, ran in 3-41, while the Ghost Patrol, poltergeist adventurers (think 'dead Blackhawks'), enjoyed a lengthy career from 29 to the final issue. The Atom was a successful transfer from *All-American Comics* from 80 to the final issue, but other than that, the most significant change in the line-up was when Johnny Thunder met a new nemesis, shapely jewel thief the Black Canary. She became so popular with the readers that eventually she was revealed only to have been stealing from criminals in a Robin Hood manner. Thus exonerated, she was given the feature in her own right after co-starring with Johnny for several issues. She was also given a new love interest, private eye Larry Lance, and Johnny departed, an ignominious fate for one of *Flash*'s founders.

The two major strips, meanwhile, had been undergoing improvement. From 1946 onwards, the Flash's art had been handled primarily by Carmine Infantino or Lee Elias, with occasional incursions by Joe Kubert, all skilful and dynamic artists who at last made the strip come alive with movement and velocity it had previously been lacking. New villains, also, had livened up the series; the Thinker, the Fiddler, and especially the Thorn, a schizophrenic harridan in a bikini top and mini-skirt whose alter-ego, the Rose, was unaware of her 'sister's' wrong-doing. The Thorn made such an impact that the artists were subsequently ordered to tone down her sexy appearance and put her in a more sedate blouse and jodhpurs ensemble.

Hawkman, too, had been changing. From 62, Joe Kubert had been the primary artist, and while Moldoff's menacing, enclosed panels had given the strip a great claustrophobic atmosphere, Kubert's mastery of layout and composition unlocked the series and let it stretch. More than anything else in his early career, Kubert seemed to be having fun with the possibilities of Hawkman.

Despite the presence, by 1948, of five high-quality features, *Flash Comics* became a victim of the first heroic slump. The post-war years saw readers turn away from superheroes and towards western, crime or comedy titles. Not even the combined powers of the Flash, Hawkman, Atom, the Black Canary and the Ghost Patrol could stem this tide, and the series was cancelled (rather abruptly, as at least two full issues are believed to have been prepared but unpublished) with 104. The Flash remained a vivid memory in many readers' minds, though, and it isn't surprising that years later, his was the first series chosen to be revived.~HS

FLASH GORDON

Nostalgia Press: *One-shot ('In the Ice Kingdom of Mongo') 1967, one-shot ('Into the Water Kingdom of Mongo') 1971*
Kitchen Sink: *6 volumes 1986 (1), 1989-1994 (2-6)*
Kitchen Sink: *2 volumes 1992 ('The Dailies')*

This is the classic science-fiction adventure mapped in choice sequences from the 1930s to the 1950s. In 1934 'Flash' Gordon is a "renowned polo player and Yale graduate" who, whilst resisting an alien invasion, is whisked off to the planet Mongo along with his girlfriend Dale Arden and colleague Doctor Hans Zarkov. Mongo is ruled by the evil warlord Ming the Merciless, and every Sunday for the next seven and a half years Flash and his friends became key elements in a growing resistance movement against his regime. Along the way they met Ming's slinky daughter Aura, her husband Prince Barin of Arboria, Queen Fria of the Ice Kingdom, Vultan leader of the Hawk-Men and Undina who ruled the underwater regions of Mongo. June 1941's liberation of Mongo was followed by a brief return to Earth but it wasn't long before the three adventurers were back on Mongo fighting a new tyrant named Brazor whilst trying to deal with the intrigues of Queen Desira of Tropica. The influence of this feature on the comics of the 1930s and 1940s is enormous. Just as Hawkman was inspired by Vultan's winged soldiers and many underwater strips took the sequences with Undina as their style guide, so many professionals were influenced by the elegant artwork of Alex Raymond (quite apart from all the tracings and swipes). The daily strip follows a completely different adventure on Mongo and is slightly hampered by having to continue from tier to daily tier. The earliest pages date from 1934, reprinted in the second Kitchen Sink book. Don Moore scripted for creator Raymond from early on, often playing up Dale's jealousy of the other women Flash encounters. Whilst maintaining some restraint, it's definitely not written with nine year olds in mind. Each Kitchen Sink volume contains nearly two years worth of Sunday pages. In the first two books a reader can watch Raymond's already accomplished style gradually mature. 3 features the famous ice and underwater sequences, as well as Flash appearing to die three times, and 4 continues the rebellion on Mongo to its conclusion and features the Hawkmen. In 5's splashdown to Earth and 6's return to Mongo there's a discernible drop in enthusiasm. Raymond joined the Marines in 1944, leaving the strip for good, the final story being completed by his assistant Austin Briggs. The Nostalgia Press books are shorter, and also feature material printed in Kitchen Sink volume three. The two volumes of Flash Gordon Dailies start at the beginning with May 1940, running to June 1944 and were all the work of Moore working mainly with Briggs, himself a top illustrator and a key collaborator with Raymond. The first Kitchen Sink collection was the revival of the daily strip in the 1950s, subcontracted by artist Dan Barry to writer/editor Harvey Kurtzman. Frank Frazetta, Jack Davis and Al Williamson among others pencilled the panels before they were passed back to Dan for his distinctive finish (on which his brother Seymour assisted). These strips have a homogenised science-fiction approach to Flash's heroics: more modern, but with little of the fantasy and romance that made the 1930s feature so memorable. There isn't a better word than 'classic' for the mid to late 1930s sequences.~SW

Recommended: Volume 3 ('The Tides Of Battle')

FLASH GORDON

King: *11 issues 1966-1967*

Based on the famous newspaper strip created in 1934 by Alex Raymond. 'Flash' Gordon, a college polo player, is thrust into the middle of warring factions on the planet Mongo after thwarting an attempted invasion of Earth by Mongo's ruler Ming The Merciless. He is accompanied on his adventures by his girlfriend Dale Arden and scientific genius Doctor Zarkoff. If this sounds hackneyed it's worth bearing in mind that this is the romantic fantasy that virtually everyone since has copied from. It's a sourcework with the gravitas to command considerable respect for an original formula that has survived 58 years.

There was real excitement to be found in King's *Flash Gordon*, and these issues remain some of the finest examples of comics craftsmanship produced in the 1960s. Flash received a new lease of life from artist Al Williamson, in extremely Raymondesque mode, and writer Archie Goodwin in 1 and 3-5. Goodwin and Williamson were succeeded on the title by Larry Ivie and veteran artist Reed Crandall, who also produced excellent comics (6, 8 & 11). Somehow 2's cover depicts the story running in the back of The Phantom, and the contents were drawn by the less exciting Frank Bolle, whilst the balance of issues ran re-sized reprints by Raymond and the then current Sunday newspaper strip artist Mac Raboy. As well as launching Flash in his own title King ran him as a back-up feature in The Phantom 18-20, lovingly drawn by Wally Wood & Gil Kane, while Flash's title hosted Mandrake and Secret Agent X9 back-up strips.~SW

Recommended: 1, 3, 4, 5

FLASH GORDON

Charlton: *7 issues (12-18) 1969-1970*

When Charlton licensed several of King's characters there was some classy inventory material left over from 1967 by Reed Crandall (12). There were also new stories by Jeff Jones (13) and Mike Kaluta (a filler in 18). The new adventures of Flash, Dale and Dr.Zarkoff were by Joe Gill and Pat Boyette. This was a period when Boyette was experimenting with diagonal page divisions, which didn't help Gill's reverent but pedestrian scripts. The usual poor colouring, printing and paper quality just added further hindrance to any real enjoyment one might get.~SW

FLASH GORDON

Gold Key: *One-shot 1965, 9 issues (19-27) 1978-1980*
Whitman: *10 issues (28-37) 1980-1982*

Gold Key reprinted a late 1940s strip from Dell's Four Color in 1965 as a one-off before the King Comics issues appeared the following year. They revived Flash Gordon in 1978 continuing the numbering from Charlton's issues, and the early scripts were by John Warner with fine, Raymond-influenced artwork by Carlos Garzon. Sadly, by the time the publisher's name had changed to Whitman Flash was being drawn by the less-spectacular Frank Bolle once again. 31-33 featured an excellent adaptation of the 1980 Dino DeLaurentis movie written by Bruce Jones and drawn by Al Williamson, assisted by Dan Green. This story appeared in hardback collections in Europe. The title finally winked out when Whitman ceased publishing in 1982.~SW

Recommended: 31-33

FLASH GORDON

DC: *9 issues 1988-1989*

This is a retelling of the veteran science-fiction story of football star Flash Gordon versus Ming the Merciless. At four issues, it might just have worked, at least as nostalgia, but there's no justification for dragging it out to nine. The only tiny spark of interest is the fact that this Flash Gordon is in his forties, and has moments of bitterness as he looks back at his sporting career. This idea is used well at the end, but not well enough to repay the effort of reading.~FC

FLASH GORDON

Marvel: *2 issues 1995*

One of the medium's finest draughtsmen, Al Williamson, is near the top of his form on the character created by Alex Raymond, who was so influential on Williamson's romantic style. For this classic space opera Mark Schultz wrote traditional characterisations of all the leading players, such as Emperor Ming and Dr Zarkov. It's well coloured and exceptionally well printed, too. An old-fashioned bit of escapism, perhaps, but of top-drawer quality. It's a treasure not to be overlooked.~GK

Recommended: 1-2

FLAXEN

Dark Horse: *1 issue 1992*
Caliber: *1 issue ('Alter Ego') 1995*

Flaxen is the true-life secret identity of a 'supermodel' who, during the 1990s was the flesh and blood 'mascot' of the Golden Apple Comics Store, making promotional convention appearances galore. The Dark Horse issue, behind a rather lovely Steve Rude cover, features the tale (courtesy of Mark Evanier and Richard Howell) of how plain, dumpy nurse Susie Owens is transformed into the superheroine Flaxen. This would be more inspirational if the photographic evidence submitted by Ms. Owens did not, in fact, suggest that she had transformed herself from a competent, attractive, healthy professional person to an anorexic parody of womanhood with the flat dead eyes of a serial killer. The Caliber issue is bog-standard heroics, indifferently told, notable only for the involvement of Brian Bendis, the 'hot ticket' writer of the late 1990s. It's reassuring to know even he has some skeletons in his closet.~HS

FLEENER

Zongo: *3 issues 1996-1997*

Mary Fleener moves from the slice-of-life, adults-only emphasis of her previous series, *Slutburger*, to more whimsical subjects in this general-audience series. Animated tiki gods, sentient canapés (who, disturbingly, run a restaurant), and grotesquely distorted hillbillies are the stars of the three issues, still drawn in Fleener's distinctive, frenzied pseudo-cubism.~HS

FLESH:The Legend of Shamana

Fleetway/Quality: *4 issue miniseries 1993*

Reprint from *2000AD* wherein the Time-To-Time corporation sends freelance stockmen into pre-history to harvest dinosaurs for meat. In this lacklustre tale the harried reptiles resistance is led by a rebel human woman. Dumb as it sounds.~WW

FLESH & BONES featuring Dalgoda

Fantagraphics: *4 issue miniseries 1986*

Flesh & Bones continues where Dalgoda's hastily truncated story-line ends. The cute canine spacer of the title is on his way towards the wreckage of his home planet in a fleet that's been hastily cobbled together by an Earth government not completely convinced they should help their doggy allies out, even if it increases the chance that they won't suffer the same fate at the hands of the mysterious and violent Nimp.

The action comes thick and fast, punctuated by lovely character touches, as Dal fights to keep his leadership and his sanity. Highly recommended if you're more interested in reading about people (albeit some with bushy tails and wet noses) than the costumes they wear.~FJ
Recommended: 1-4

FLESH-COLORED HORROR
ComicsOne: *1 Volume 2001*

Part of the Junji Ito *Horror Comics Collection*, this contains six tales that succeed admirably in unsettling the reader. Ito's scenarios are apparently commonplace, a couple's break-up, a murder, a boy's bad behaviour in kindergarten, but readers and characters are then drawn into weird, often supernatural situations with some genuinely creepy denouements. All of this is aided by Ito's simple yet realistic artwork which picks out the horror in all its detail.~NF
Recommended

FLESH CRAWLERS
Kitchen Sink: *3 issue miniseries 1993-1995*

An alien-attacks-small-town script that would have been rejected by 1950s B-movie makers as too pedestrian combined with fanzine quality art doesn't make for the usual Kitchen Sink quality package. All the more remarkably, there was a seventeen-month gap between first and second issues, yet the series was still completed. One can only assume that pressure was brought to bear.~FP

FLEX MENTALLO
DC/Vertigo: *4 issue miniseries 1996*

Flex Mentallo has all the hallmarks of a classic Grant Morrison script: a slightly ludicrous hero, lots of referential bits and a soupçon of surrealism. As part of his new, uncynical take on superheroes he makes Flex a big-hearted muscleman slightly (and amusingly) out of his depth in a world of nasty villains. Morrison effectively contrasts his character's happy-go-lucky attitude to life and adventuring with the realisation that there are problems a good right hook can't solve. The series is notable for bringing Frank Quitely (think about it) to a wider US audience. Not only is his artwork breathtakingly detailed, it's also beautifully composed – his handling of perspective in crowd scenes makes you want to weep. Rarely do you see action storytelling and such beautiful drawing so effectively balanced. Sadly, complaints from Charles Atlas' company mean this is never likely to be reprinted.~FJ
Recommended: 1-4

FLINCH
DC/Vertigo: *16 issues 1999-2001*

Given the number and quality of the different writers and artists at work on this horror anthology, there ought to be something for everyone. In fact, few individual issues meet expectations. There are three stories to an issue, and there's usually some good artwork to attract the casual reader. Amongst the artists are: Jim Lee (1), Richard Corben (1), Frank Quitely (1, 12), Kelley Jones (3), Kent Williams (4), Phillip Hester (6), Dave Taylor (9, 11), Danijel Zezelj (10, 16), David Lloyd (10), Tim Truman (13), Bernie Wrightson inked by Tim Bradstreet (14), Ted McKeever (14), the Pander Brothers (15) and Philip Bond (16). Amongst the writers are: Bruce Jones (1, 4, 9, 12, 14), Scott Cunningham (3, 12) and Joe R. Lansdale (5, 13). Individual stories worthy of note are a Titanic tale by Garth Ennis and Kieron Dwyer (3), a western by Bruce Jones and Paul Gulacy (4), and an S&M obsession by Joe R. Lansdale and Bruce Timm (11). 2 features Dean Motter with Bill Sienkiewicz, Brian Azzarello (also in 10 and 13) with Eduardo Risso and Bob Fingerman with Pat McEown, while 8 matches Greg Rucka with James Romberger, Robert Rodi with Marcelo Frusin and John Kuramoto with Jon J. Muth.~NF
Recommended: 2, 8

The FLINTSTONES AND THE JETSONS
DC: *19 issues 1997-1999*

Superior funny book for children of all ages pairing the far future and the distant past in separate tales, although many issues are thematically linked. The transition of 1960s cartoon icons to 1990s sensibilities is handled well, with creators such as Mike Carlin, Bill Wray and Bernie Mireault supplementing the various creative teams. Especially noteworthy is the story in 4 where the Great Gazoo turns Fred and Barney into Wilma and Betty. Hideous but hysterical. Worth looking into.~WW
Recommended: 1, 4, 8

FLIPPER
Actus Tragicus: *2 volumes 2000*

Four members of an Israeli art collective produced a story for these flip books, one cover promoting each story. B. Kolton has no cover representation and fewer pages in total, but they're in colour and her grotesque work is in both volumes. It's really a shame the effort expended on producing a well-designed package wasn't equally applied to the material it showcased in 1. The material is slim, stretched and fails to engage with detached worldviews and unsuitable art, although it may have appeal for fans of Richard Sala's work. 2 is far better, with the art complementing the narrative rather than fighting it, and two worthwhile stories. The temperamental diva and her horrendous entourage in 'The Sisters d'Espard' by Y. Pinkus are gloriously portrayed and illustrated in ligne clair style, and while not as well drawn, Rutu's 'Bygone' neatly pulls back a family secret through coincidence. These won't have universal appeal, but all probe territory rarely investigated in English language comics.~FP

FLOATERS
Dark Horse: *5 issue miniseries 1993-1994*

There are a lot of interesting ideas concerning a future society where use of narcotics is commonplace and legal. Both script and art leave a lot to be desired, however, which is odd as this was originally conceived as a Spike Lee screenplay.~WJ

FLOOD RELIEF
Malibu: *One-shot 1994*

Fund-raiser that perhaps rather tastelessly has the Ultraverse heroes fighting a flood that actually occurred, but ascribing it to a supervillain, thereby trivialising very real problems. Buying it now won't pass money to a good cause, so don't.~FP

Adventures of THE FLY
Archie: *31 issues 1959-1965*

Teenager Tommy Troy was given a ring that when wished-upon turned him into The Fly, insect-powered superhero, once every twenty-four hours. Creators Joe Simon and Jack Kirby were recycling their 1950s character The Silver Spider, an arachnoid copy of Fawcett's *Captain Marvel*, and 1, 2 and 4 feature some of their last work as a creative team. It's alongside the likes of George Tuska, Bob Powell, Al Williamson and someone whose work was so indescribably ugly he isn't credited! 3 has the only known superhero story by Jack Davis. The stories have a definite feeling of anyone and everyone pitching in on the inking, and a teenaged Neal Adams pencilled a couple of pages of these issues. Scripter Robert Bernstein inherited the title, then Jerry Siegel as Tommy grew to become attorney Thomas Troy, and blonde film star Kim Brand became his sidekick Fly Girl (origin in 14). Their adventures became world-saving affairs and their insect powers grew in strength and diversity. The presence of Siegel may account for the introduction of Chlordane a green substance that beset the winged duo in much the same way as Kryptonite did Superman. It wasn't the only similarity the strip bore to DC's bread and butter. John Giunta briefly took over the art with 5 before they fell to John Rosenberger's attractive, romance-styled drawings. He brought a great deal of charm to the comic and more than a dash of pulchritude to Fly Girl. He was sorely missed when Giunta returned to draw the last few stories. The scripts are all inane with no exemplary issue standing out although the Comet made his first reappearance in 30's solo Fly Girl strip. After 31 the title changed to Fly Man, the publisher changed to Mighty Comics and all of a sudden John Rosenberger's rather staid interpretation of the character looked to be the definitive one.~SW

THE FLY

Red Circle: *9 issues 1983-1984*

A grown-up Thomas Troy is called upon by the mystic Turan to take up once more the mantle of the Fly. The first issue gets off to a good start artistically with work by James Sherman on the Fly and Trevor Von Eeden on the back-up Mr Justice, but the scripts, by Jack C. Harris and Chris Adams respectively, seem clichéd, if enthusiastic. Sherman's gone by 2 but one of his replacements is Steve Ditko so that's all right, even inked by Rich Buckler. Flygirl is a major part of the stories in 3 (both drawn by Ditko) and by 5, Ditko is plotting the Fly strips as well as drawing them. Ditko's work is always interesting but in this short-lived series he's not given enough time to expand the nature of the strip, nor its main characters. The back-ups are no better than average and the initial enthusiasm of the editorial team seems to evaporate quickly.~NF

The FLY

DC/!mpact: *17 issues, 1 Annual 1991-1992*

Archie Comics' superheroes were given a 1990s makeover by DC and this series from Len Strazewski, Mike Parobeck and Paul Fricke was the best of the bunch. Jason Troy designs a modern day hero as a homework assignment, but when the mysterious Mr Abin (a substitute teacher no one else can see) gives Jason a fly amulet enabling him to become his creation, the boy's life is changed forever. Charming and witty, the stories evoke a genuine sense of breakneck exuberance as The Fly tackles villains and other neophyte heroes with equal verve, and deals with real issue such as child abuse and animal rights without becoming preachy. The series ended ambiguously as the recession caused the entire line to amalgamate into *Crucible*.~WW

Recommended:1-8, 11-13, 15, 16

FLY MAN

Mighty Comics: *8 issues (32-39) 1965-1966*

Noting the success of the more jocular and realistic style of superheroes being published at Marvel, Archie reinvented themselves as Mighty Comics, remodelling their existing superheroes in the process. Thus *The Fly* became *Flyman*, and Jerry Siegel's plots became even sillier than they'd been for the previous incarnation. Attempting to mimic Marvel, Siegel picked up on the idea of guest stars, the sometimes corny humour and the bombastic dialogue, but didn't appear to understand how it slotted in alongside other elements to make readable titles. And instead of having Jack Kirby to draw his comics he had Paul Reinman, a man who hadn't let an inability to master a single basic artistic technique deter him from a career as an artist. Not bothering with trivialities such as perspective or anatomy, Reinman had plenty of time left to draw Siegel-written back-ups featuring other revamped Archie superheroes. Their skewed Marvel imitation is bizarre, and best sampled in small doses only by those already submerged in kitsch. With 40 the title was changed again, and, unbelievably, *Mighty Comics Presents* was a further plunge down into the chasm of ineptitude.~FP

FLYING COLORS 10TH ANNIVERSARY SPECIAL

Flying Colors: *One-shot 1998*

Concord comic shop *Flying Colors* celebrated a decade in business with this special. The Dan Brereton cover is the best aspect, but there's also Jeff Bonivert's Fun Boys, Jeff Nicholson's Father and Son, and Smith Brown Jones by Jon Hastings among other strips. A nice souvenir for customers, but not worth hunting down.~WJ

FLYING SAUCERS Comics

Dell: *5 issues 1967-1969*

Masquerading as 'impossible but true' tales of alien encounters, this anthology features short tales of abductions and cover-ups. The stories are pedestrian, but are illustrated by some decent artists of the mid-1960s, such as Frank Springer, Dick Giordano, Chic Stone, Sal Trapani, Sam Glanzman and Jose Delbo, and retain a peculiar period charm. Fans of X-Files will love this stuff.~WW

FOG CITY COMICS

Stampart: *3 issues 1977-1979*

This wonderful Canadian underground comic started life as a funny-animal anthology and grew into a varied collection. Contributors of the funny-animal strips in 1 include Norm Drew, Mark Newgarden and the scatologically-minded Rand Holmes, but the highpoint was George Metzger's wonderfully evocative reminiscence 'Comic Book Addict'. The remaining two issues again featured Metzger and Holmes in fine form on more traditional science-fiction material, but the comic's real star was the little known Brent Boates. From the anthropomorphic issue 1 to the stunningly drawn science fiction in 2, Boates excelled astonishingly, making his lack of strips elsewhere very regrettable.~DAR

FOOD FOR THOUGHT

Gary Millidge: *One-shot 1985*

It doesn't really matter what a famine-relief comic contains, although the fewer politically naïve, heavy-handed satires the better. This UK effort brings together specially created strips with oddments that were clearly not done for the anthology. As you'd expect there are some highlights and some stinkers. The best contribution is Alan Moore and Bryan Talbot's 'Cold Snap', a slick tale of anthropomorphic dinosaurs that starts "It was early evening in the late Cretaceous..." The point's not new but the broad parody of US consumerism will make you smile anyway. Most of *2000AD*'s stars of the time (Dave Gibbons, Ian Gibson, Pat Mills, Kevin O'Neill) make respectable contributions and Grant Morrison completists will need to find it for the Gideon Stargrave two-pager, the art for which makes you appreciate Morrison's writing skills in a whole new way.~FJ

FOODANG

Continuum: *1 issue 1994*

August House: *2 issues 1995*

Michael Duggan's superhero satire isn't immediately apparent as such, and the best model for it surely isn't a clown fused with his make-up in the accident that powered him. And then there's the strange, murderous family who adopt amnesiac patients and the mad doctor in the hospital to be explained. Duggan tosses a lot of balls in the air, but whether he'd have been able to keep them there is another matter. For such a weird premise the humour is standard, albeit reassuringly adolescent, and the art is fine, but it's not worth buying now. The first August House issue is a colour reprint of the Continuum issue.~FP

FOOLKILLER

Marvel: *10 issue limited series 1990-1991*

Introduced in Steve Gerber's *Man-Thing*, the Foolkiller executes those he deems to be fools. Depressed over his father's murder, bank employee Kurt Gerhardt loses his job, wife and home, and settles for work in a burger joint when other attempts to find employment fail. Seeing the previous Foolkiller on TV he begins a correspondence and assumes the identity, starting by killing local muggers and drug dealers. Pencil artist J.J. Birch is unspectacular throughout, making this very much Gerber's title. He uses the series as a treatise on the acceptance and fear of violence in society and to study what transforms someone into a vigilante and how far the obsession can progress. Gerhardt's rite of passage in 4 is truly frightening. Why this works so much better than *The Punisher* in exploring similar territory is that *Foolkiller* concentrates on Gerhardt's entire life, not just his costumed escapades. The series overruns in making its point, but has a satisfactory conclusion.~WJ

FOOP GOOP FROLICS

Glen Bray: *1 issue 1975*

A lavish tabloid sized compendium of old and unpublished strips by the unique Basil Wolverton. The material runs the gamut from humour ('Bing Bang Buster' and 'Yap Yap Trap') through science fiction ('Milt Archer' and 'Meteor Morgan') to single panel grotesques ('Scoop Goop Foop, the Novelist with nineteen navels') and apocalyptic panoramas from The *Book of Revelations*. For those already acquainted with the obsessive rendering and punning of Wolverton's work this is a delight, while for the uninitiated it's a wonderful introduction to one of comics' most "unchategorisical genius". However, with a print run of only 1200 this is sadly a tough comic to find.~DAR

Recommended

THE FOOT SOLDIERS

Dark Horse: *4 issues 1996**

Image: *5 issues 1997-1998**

The future's a dismal, oppressive time with all the heroes gone. They've left their accessories, though, to be found by three teenage runaways kicking against the pricks. Having acquired useful relics they proceed to battle the odds and inspire a downtrodden population. Writer Jim Krueger presents a well-rounded concept and packs the comic with innovative ideas, and his enthusiasm and proselytising in the editorial pages are heart-warming. At Dark Horse he concocted a rarity, a superhero comic that for all its strained allegory and referential material aims for the stars and makes quite a distance. Michael Avon Oeming and Jason Martin's artwork adequately portrays the grim future, and they draw a nice set of big boots. The team stop over in *Asylum* 9 prior to the black and white Image series, which continues what was planned as 12 issues from Dark Horse. In addition to chapters of the ongoing 'Arch Enemies', drawn by the always interesting Phil Hester, there are individual segments and background information to the world occupied by the Foot Soldiers drawn by other artists, and omitted from the collection. Krueger's to be commended for aspiring to more than superheroes by numbers, but these issues strain the patience with their moralising, and despite glimpses into the cast do little to move the story forward.~FP

Recommended: Dark Horse 1-4

FOR*ETERNITY

Antarctic: *4 issues 1997-1998*

A manga-style yarn by Rod Espinosa. Millennia ago, a group of immortal, alien women were stranded on Earth, and were hailed as goddesses wherever they settled. Now, however, the military want to capture them for research. Standard doe eyed warrior woman stuff, notable only for the pointless convolution of the narrative.~FC

The FORBIDDEN BOOK

Renaissance Press: *2 volumes 2001*

Michael Cohen's fantasy anthology, following *Mythography*, has attracted a number of interesting creators (including Dennis Fujitake, Jeffrey Jones, Al Davison and David Wenzel) with its general theme of magic-related stories. Each volume features a variety of strips, some folktales, some dream-inspired, some sword and sorcery and a few horror. The best strips of the first volume, 'Journeys into the Mystic', are Colleen Doran's witches' tale of love, revenge and resurrection and Cohen's own, new fairytale. Volume 2, 'Into the Uncharted Realm', contains a wistful story of the last dragon by Frank Brunner, a humorous, feminist, sword and sorcery tale by Craig Taillefer, and Cohen and Tom Yeates' tale of a priestess' quest to enter a sealed tower. Taillefer also contributes a solo story of Alicia, from his *Wahoo Morris* series. Overall, the artwork is of a high quality, and most of the stories worth at least one reading.~NF

The FORBIDDEN KINGDOM

Eastern: *8 issues 1988*

Out of greed for the Eighteen Demons of Gold, orphans, Ping, Mugyol and Komhyang, kill an old man and the other orphans he had taken in off the streets. Only Saeok survives and vows revenge. Several years later, renamed Sain by his teacher, Saeok is persuaded to act as protector to a dying emperor's heir, who's being menaced by one of the murderers, now hidden in the emperor's court. Translated from Korean, this is artistically very much in the same tradition as *Lone Wolf and Cub*. While Sung-Nam Ha's artwork isn't as impressive his combination of revenge tragedy, mystery and action makes for compelling storytelling. Note that the series ended without concluding the story.~NF

FORBIDDEN KNOWLEDGE

Last Gasp: *2 issues 1975, 1978*

As the title suggested, this was a compendium of facts too shocking to be common knowledge. Amongst the contents were such shockers as 'The True Story of the Hellfire Club' and 'The Castrators of Russia' in 1, and 'The Man They Couldn't Hang'. This is in addition to a number of more unmentionable subjects. Creatively, only the three pages by Brent Boates in 1 stand out, making this a fun read, but not an essential one.~DAR

FORBIDDEN PLANET

Innovation: *4 issue miniseries* 1992*

A good adaptation of the classic 1950s science fiction film that launched a dozen shops. Artist Daerick Gross works from the screenplay as well as the video, and tells the story largely via double page spreads with smaller panels laid over. His art is rushed towards the end, but those familiar with the film ought to enjoy this version. For readers not familiar with *Forbidden Planet*, there's the danger of comparing it with later science fiction, and it may disappoint.~FP

FORBIDDEN TALES OF DARK MANSION

DC: *11 issues (5-15) 1972-1974*

After a patchy first few issues continuing from *Dark Mansion of Forbidden Love*, this settled down to become one of DC's better mystery titles. 5 contained a Gothic romance story left over from the previous incarnation, memorable only for the heroine's uncanny resemblance to Wonder Woman in her white catsuit period. 6 contained inventory material, including a decent Jack Kirby story left over from his *Spirit World* magazine. From 7 on the comic contained new mystery stories written by Jack Oleck, Robert Kanigher and Michael Fleisher, and predominantly drawn by Filipino artists. Highlights were provided by Alfredo Alcala (9-11, 13), the little known, but highly talented Ernie Santiago (8), and, best of all, Alex Niño (8, 12, 14) and Nestor Redondo (14). American artists Howard Chaykin (7), Gil Kane (13), George Evans (14) and a young Dan Green (14, 15) also contributed. While none of the stories were ground-breaking they were often raised to greater heights by exceptionally fine art. This was never more so than the case of the title's masterpiece, Oleck's vampiric 'They Walk By Night', graced with the astonishing artwork of Bill Payne in 10.~DAR

FORBIDDEN WORLDS

ACG: *145 issues 1951-1967*

A suspense anthology that has a plethora of vampires, ghosts, witches, werewolves and even a were-spider populating the early issues and "Exploring the Supernatural" as a tagline. The advent of the Comics Code in 1954 put a stop to the staple fare of Forbidden Worlds, and a temporary hiatus saw the comic renovated from 35 with a new tagline of 'Strange Adventure'. It might not have seemed so at the time, but this was for the best, forcing writer and editor Richard E. Hughes to stretch himself a little, resulting in a stronger comic. He operated under numerous aliases, even to the extent of conceiving fake biographies for the likes of 'Zev Zimmer'. Artist Ogden Whitney began appearing from 35, and there's even a strip by Leonard Starr in 37. Al Williamson is an occasional contributor and other regular artists like John Forte and John Rosenberger were suited to the material supplied. The popularity of superheroes sees the introduction of the mundane Magicman as lead feature in 125, but he's dropped for the final five issues. While never matching the contemporary EC titles on which it was originally based, *Forbidden Worlds* has far more to offer than most other similar titles, ranking far above similar Marvel product, for instance. Richard E. Hughes was a fine, imaginative writer of science-fiction suspense, and had a good eye for contributing artists, making this a decent read more often than not. 75 is a good sample. John Buscema débuts with a story about a clock foretelling the future, Forte draws an ironic commentary on modern furnishing, the magnificent Ogden Whitney's contribution has a man attempting to break a speed record, but managing much more, and there's also Paul Reinman, but you can't have everything. *Forbidden Worlds* is also the place where Herbie first came to life in 73. He's an obese, bespectacled, semi-comatose child able to do anything or converse with anything, including going back through time when powered with special lollipops. It's insane stuff by Hughes and Whitney, and would recur in 94, but really hits its stride with 110, 114 and 116, at which point Herbie graduates to his own title.~WJ

Recommended: 110, 114, 116

THE FORCE OF BUDDHA'S PALM

Jademan: *55 issues 1988-1993*

As with other Jademan kung-fu titles (*Blood Sword, Drunken Fist, Oriental Heroes*), any single issue of this Hong Kong produced comic will amaze with its generous page count, frenetic kung-fu action, eccentric characters and dynamic art. The disappointment comes with the realisation that there's little to differentiate one issue from another beyond the basic set-up. Set it feudal Persia, twin brothers are separated at birth, Samsun, eager to please but easily manipulated respectable hero, and Devilito, loveable rogue. A complex (and far-fetched) revenge plot sets them against each other for deeds done two generations previously. There's also Nine Continents, who has rather a hard time of things considering he's the greatest hero of them all, the manipulative evil White Crane, and the women who love them, but sometime can't make up their minds which of them they love. From 40 the travails of Nine Continents dominate. There are few resolutions, and each encounter is merely a step on the road to another encounter. While the same criticism can be levelled at superhero comics, and this is the closest they come in Hong Kong, most these days are plot-led, leavened with subplots and soap opera characterisation. Here the only respite is occasional humour, but unlike other Jademan titles cancelled mid-story, this runs to a conclusion of sorts. The title, by the way, refers to a form of kung-fu.~WJ

FORCE SEVEN

Lone Star: *6 issues + 1999 to date*

Generally well-considered action with a covert superhero team gathered in their leader Amazon's own feature. The Claremont and Byrne *X-Men* seems to be the template, with bickering and soap opera accompanying the fast-moving action sequences, and as such it's well done. Given the extremely erratic publication schedule (latest issue sighted May 2001) perhaps stories continued over three issues or more are not the best idea.~WW

FORCE WORKS

Marvel: *22 issues 1994-1996*

Created after the dissolution of Avengers West Coast, Iron Man's new team is intended to act "proactively, in the interests of defence and security", which translates as "getting our retaliation in first". It's consistent for the USAgent to go for that line, but the other founders – Spider-Woman, the Scarlet Witch, and, fleetingly, Wonder Man – seem badly chosen for such an aggressive policy. Not that it really matters, as writers Dan Abnett and Andy Lanning never really pursue said policy, treating the team as just another bunch of people in tights and armour, and Tom Tenney's impenetrable artwork means you wouldn't really be able to tell if they did! Wonder Man's replacement with the enigmatic alien warrior Century creates a not very interesting mystery that occupied much of the title's run. Other diversions along the way include a deeply embarrassing run-in with an aboriginal superhero, and a tedious crossover with War Machine. The title folded before it reached a quarter of the run of the comic it replaced, and was largely unmourned.~HS

FOREVER AMBER

Image: *4 issue miniseries 1999*

A corporately employed hunter, Amber's task is to locate those who've left their jobs, a no-no in this conglomerate-controlled future. When things go wrong for her, though, she proves more resilient than people suspected. There's a charm and vulnerability to Amber as portrayed by Don Hudson, and his plot would make for a good action film.~FP

FOREVER MAELSTROM

DC: *6 issue miniseries 2003*

A real disappointment from the usually sassy team of writers Howard Chaykin and David Tischman. The premise is a good one: a mad scientist destroys the timeline and it's up to our time travelling hero, Forever Maelstrom along with his talking wolf, a warrior woman and bunch of misfit sidekicks to fix things up in a number of alternative realities. Illustrator John Lucas has a nice style, but is totally unsuited for this series, which requires more subtle visuals for the humour to work. Mind you, how subtle can you get showing Queen Victoria having a fart? She would not be amused. And neither are we.~HY

FOREVER PEOPLE

DC: *11 issues 1971-1972, 6 issue miniseries 1988*

Part of Jack Kirby's highly acclaimed Fourth World Saga, the original series dealt with the adventures of five young, idealistic New Genesis Gods – Mark Moonrider, Serifan, Big Bear, Vykin the Black and Beautiful Dreamer – during and immediately after their attempt to rescue the kidnapped Beautiful Dreamer from Darkseid. Filled with many moments of Kirby genius with ties to *New Gods*, the Apokolips/New Genesis war often seems little more than a game to the youthful team, whose ability to combine themselves into the single entity they call the Infinity Man might well have made them major players had they taken things more seriously. Amidst the inevitability of war and constant struggle apparent in *The New Gods* and *Mister Miracle*, *Forever People* offered a taste of the carefree paradise and idealism of New Genesis at its best. 4-9 also included reprints of Kirby's 1940s Sandman stories.

If Kirby's intention had been to suggest that the *Forever People* were too young to be cynical and too innocent to be affected by the war, in the 1980s revival J.M. DeMatteis saw to it that their passage into adulthood was not so smooth. He used them as allegory for the 'Me Decade' of the 1980s against the idealism of the 1960s. Kirby's series left them stranded in the otherworldly paradise Adon, and DeMatteis picks up perhaps a decade later when they've grown up and

apart, until circumstances force them to take a long hard look at what they've become and how that compares to what they should have been.~JC
Recommended: Series one 1-11

The FOREVER WAR

NBM: *3 volumes 1988-1990*

European adaptation of Joe Haldeman's Hugo and Nebula award-winning science fiction novel by cartoonist Marvano (Mark Van Oppen) with Haldeman himself providing the English text. Private Mandella relates the story of his army career fighting an alien enemy at relativistic speeds far from Earth, every day taking him further from home and further from humanity. As cold and stoic an attack on the insanity of war and the idiocy of the military mind as the book it's based on. Good stuff.~WW

FORGOTTEN REALMS

DC: 25 issues 1989-1991

Forgotten Realms adapts the characters and settings from the TSR novels and role-playing games. If you enjoy the original source material you'll probably enjoy these light fantasy comics as well. If you don't... well, there's some nice Rags Morales and Dave Simons art in the first 15 issues.~FP

FORLORN FUNNIES

Absence of Ink: *2 issues + 2002 to date*

Tremendous design and artwork are immediately apparent, as is Chris Ware as a strong influence, but while the transitions between elements of the first issue are interesting, Paul Hornschemeier has very little to say in these fragments of whimsy. 2 is better, although now Ware's cod-formal archaic language has also been appropriated. It's the first chapter of a story concerning a widower finding it difficult to come to terms with his bereavement, and his seven year old son observing the change in his father. It is very much a detached narrative, but has great promise. To fully bloom, though, Hornschemeier must find his own voice.~WJ

FORT: Prophet of the Unexplained

Dark Horse: *4 issue miniseries 2002**

In the days before 1900, New York is stunned by a series of grisly murders. Eccentric, Charles Fort, with the boy, H. P. Lovecraft, discovers an alien, Yhir, who has travelled to Earth to kill a virus that escaped from his world. Together they must avoid arrest for the murders themselves and stop the monster before it reproduces. This is a rather pedestrian adventure from writer Peter M. Lenkov, despite its attempts to mix the real personalities of Fort and Lovecraft with other historical and invented situations. Frazer Irving's artwork, with heavy use of blacks to indicate form, is like a smoother Frank Miller's, but isn't strong enough on its own to rescue this.~NF

FORTUNE AND GLORY

Oni Press: *3 issue miniseries 2000**

Brian Michael Bendis details his attempts to sell a screenplay to Hollywood. Both a primer and a depressing crash course in the ignorance, vanity and egotism of the film industry, the extra layer of involvement is that despite being able to see Hollywood for what it is, Bendis desperately wants to suck on the golden teat. Simple, engaging and very funny, the autobiographical tack may not appeal to fans of Bendis' crime comics, but they'd be missing out. The collection is a form of director's cut with a few extra pages.~WJ
Recommended: 1-3

THE FORTY-YEAR-OLD HIPPIE

Rip-Off: *2 issues 1978-1980*

While perhaps not being in the same class as Gilbert Shelton, Ted Richards is none the less an entertaining and talented cartoonist, as he reveals here. This title collects together selected strips from Rip-Off Press' syndicated *Free Press* strip, with additional lengthier, harder-hitting strips. It is very much in the tradition of Shelton's *Freak Brothers*, with added toilet humour, but the generation gap theme is an unusual twist on the genre and the comic is always engaging.~DAR

FOUR HORSEMEN

DC/Vertigo: *4 issue miniseries 1999*

Four sermons disguised as black comedy, with each issue occupying roughly the same timeframe. A rock concert on December 31st 1999 accidentally summons four less-than-worldly Horsemen of the Apocalypse. Whilst the crowd riots the riders repair to a bar across the way. The issues are themed to each Horseman. In 1 Famine listens to an abortion clinic nurse's tale of woe. In 2 War interfaces with a music business PR man. In 3 Pestilence sees an ex-convict single mother's misfortunes turn her dangerously paranoid. Finally, in 4 Death encounters a dysfunctional kid wandering around with his dad's gun. It's Armageddon Lite as the riders update their plans. Whilst drawn efficiently enough by Essad Ribic the series is desperately in need of some interpretive editing. Robert Rodi's self-righteous monologues interrupt the pacing throughout. His insertion of humour is tasteless and, by dodging any standpoint on the issues raised, the series stands as an impotent and exploitative rant.~SW

THE FOUR IMMIGRANTS MANGA

Stone Bridge Press: *One-shot 1999*

Yoshitaka (Henry) Kiyama was a Japanese immigrant to America. Using characters based upon himself and people he knew, Kiyama describes the experiences of being an immigrant in San Francisco between 1904 and 1924, covering such events as the 1906 earthquake, the World's Fair of 1915 and World War I. Kiyama was keen to assimilate western forms into Japanese art and produced this fifty-two chapter story, designed to be serialised over a year, closely following the conventions of the period's newspaper strips. With twelve panels per episode, Kiyama's style is simple yet full of background detail. This is a remarkable, fascinating historical document in which humour is used to comment on the social and political conditions of the time. Originally published in 1931 in Japanese and English, this edition is translated into English by Frederik L. Schodt.~NF
Recommended

FOUR STAR BATTLE TALES

DC: *5 issues 1973*

Reprints of 1950s war stories from the DC archives, mixing examples of series like 'The War That Time Forgot' (set on an island where dinosaurs still live, by Andru and Esposito) and Johnny Cloud by Irv Novick with one-off war tales by the likes of Bernie Krigstein (5), Mort Drucker, Russ Heath and Joe Kubert.~NF
Recommended: 5

FOUR STAR SPECTACULAR

DC: *6 issues 1976-1977*

Wholly undistinguished reprint title, the highlights of which are a Flash story written in the 1940s and redrawn for publication in the first issue, the original art deemed too shoddy, and a 1940s Blackhawk story in the final issue.~HY

FOUR WOMEN

Homage: *5 issue miniseries 2001-2002**

Donna is talking to her therapist about a recent trip she took with three friends, which went horribly wrong. As her retrospective narrative unfolds, her therapist's questions cause her to question and change her recollection of what "really happened" on that traumatic afternoon. Writer/artist Sam Kieth shows considerable insight into the fallibility of memory, and the fragmented narrative technique arouses curiosity rather than bewilderment. Unfortunately, in his successful attempt to differentiate between the protagonists, Kieth makes them so incongruous with each other that the reader never buys why four such disparate people would hang out together. Furthermore, the ending, after such a build-up, inevitably disappoints, and the whole thing becomes, in the words of Bart Simpson, "Just a bunch of stuff that happened." A brave attempt, nonetheless.~HS

FOX AND THE CROW

DC: *108 issues 1951-1968*

This was originally a series of Columbia Pictures (1941-1947) and then United Productions of America (1948-1950) cartoons. DC published the characters in the 1940s in *Real Screen Comics* before giving them their own title in December 1951. Fauntleroy Fox is constantly having to protect himself from Crawford Crow's chiselling nature, and there's no saying which one of them will come off best in these short (4-6 page) stories. Mostly written by Cecil Beard (whose animation credits include *Bambi* and *Fantasia*) and drawn by Jim Davis, the series is good-humoured, and made more interesting by having neither character be the constant victor. Back-up strips such as 'Flippity and Flop' and 'The Hound and the Hare' gave way eventually to all Fox and Crow issues before, in the mid-1960s, DC started to introduce some new concepts. 'The Brat Finks' were 'rock-n-rollicking rascals' and the very popular Stanley and his Monster (95-108) took over the title completely with 109. Lisping Stanley believes his monster is a 3000-year-old dog, and they have adventures such as meeting Napoleon's ghost and discovering that the reason for his keeping his hand inside his coat is to keep his socks up. A good series, if not outstanding.~NF

Recommended: 95

FOX Comics

Fox: *23 issues 1984-1989*

Fantagraphics: *4 issues (24-27), 1 Special 1989-1991*

Beginning as a home-made offshoot of a comics fanzine, by its final issue *Fox* had progressed into a fine anthology showing the best of contemporary Australian comics creators. Taking their lead from the self-published comics appearing in early 1980s Britain, 1-13 are A5-sized and photocopied. Enthusiasm outstrips talent, but Martin Trengrove's 'Roscoe The Dawg', a private-eye strip, has polished cartooning from the off. By 3 British small-press creators are aboard, though often with work already seen in Britain. Eddie Campbell's 'The Pajama Girl' in 5, about an odd Australian murder case, is the standout of the early issues, and Ed Pinsent and Phil Elliott also submit decent strips. Meanwhile Fil Barlow and Greg Gates are developing very quickly, and Paul Harris' two-page masturbation strip in 7 is an excellent study of facial expressions.

With 11 *Fox* started colour covers, and the final small-size issue, 13, has a theme of EC comics. Ed Pinsent analyses them, several creators attempt to emulate them, and there's a pastiche of 'My World'. By far the most notable aspect is the outstanding art of Darrel Merritt, with both a pencilled study of trench warfare and a cartooned strip of childhood fears. He'd developed from the early issues, but tragically, his only interior recurrence is a disappointing three pages in 18. 14 is a single issue blip in the steady progress, as more British contributors (Glenn Dakin, Chris Flewitt, Steve Way, John Bagnall) mix with the ever-improving Dillon (Brendan Naylor), Ian Eddy and Tony Thorne, a contributor from the start. Issues in the mid-teens are plagued by strips of stilted whimsy, a form only David Hodson regularly engages with, while Michael Graham and Chloe Brooks-Kenworthy are tedious.

18 introduces serials, although the first, 'Lifestyles of the Small And Insignificant', is more a series of episodes under a collective title. Written by Lazarus Dobelsky and drawn by Ian Eddy, it begins as poignant tales about life's embarrassing moments, before moving beyond into presumably autobiographical recollections. Eddy's cartooning is very expressive, and it's very funny. If only the same could be said of 'Sex' (20-23), which bears the hand of Dylan Horrocks, but is the least salacious and most tedious musing on the topic you'll ever read. Far more successful is 'Tattoo Man' in 24-27. After being beaten up at a carnival, a man awakens to find his body covered in tattoos. David Hodson's scripts are well matched by the moody art of Greg Gates for a diverting and mysterious idea. As *Fox* departed before concluding it, the final chapter saw print in a one-shot collecting the remainder of the material.

19 has a landmark with the début of the utterly mad Lindsay Arnold, who's in most issues thereafter. Considerably older than most other contributors, his stories are of adolescence in 1950s Tasmania. His crowded cartooning, complete with labelling, instinctive storytelling and very funny anecdotes are an instant highlight, contrasting with the introspection of several other strips. There's a succession of Eddie Campbell strips from 20 onwards, now creating material specifically for *Fox*. Publication at Fantagraphics is preceded by a decent reprint sampler, and they increase the page-count to good effect, with an irony being that, still under David Vodicka's editorship, *Fox* instantly bettered any Fantagraphics anthology title seen before. All the Fantagraphics issues have at least two excellent strips, with Phil Elliott and Paul Grist's story paralleling the inception and success of Britain's *Escape* magazine a standout.~FP

Recommended: 13, 18, 20, 22 25-27

FRANCIS Brother of the Universe

Marvel: *One-shot 1980*

If you've been yearning to read the life-story of the first Franciscan monk in comic form, look no further. Taking great care to conform to the approved Catholic version, there's very little of the Dr Doolittle stuff and plenty of handwringing doubt. The interesting artistic combination of John Buscema and Marie Severin is sympathetic, but Buscema carries his baggage with him, and when Francis receives Jesus' stigmata it could be a scene from *Thor*.~WJ

FRANK

Nemesis: *4 issue miniseries 1994*

Dan Chichester (not very many words) and Denys Cowan (extremely sketchy pencils) come together to update *Frankenstein* so that the monster can have lots of particularly violent fights with the world that doesn't understand him. Ahhhh. The word 'predictable' comes to mind.~FJ

FRANK

Fantagraphics: *4 issues 1996-2001**

Jim Woodring's surreal hero surfaced once more in his own comic-sized series. In a hallucinatory world just one step to the side of nightmare, Frank struggles to make sense of the baffling events and changing environment around him. As straightforward as an innocent child's dream, full of symbols and bizarre creatures, and as frightening as your worst nightmare, Frank communicates on a wordless but profound level, visiting different universes and making friends with the strange creatures that surround him. What's most fascinating for the reader is the cohesiveness of the Frank universe, the internal logic among all the mosaic-like patterns, alien life forms and sudden surreal twists. For more Frank adventures see *Tantalising Stories*.~FJ

Recommended: 3-4

Phil Yeh Presents FRANK THE UNICORN

Fragments West: *8 issues 1986-1988*

Cartoonist Phil Yeh's admirable aim is to combat increasing illiteracy around the world. He's been a tireless organiser of events for this cause, and this series was intended to appeal to adults and children alike, encouraging them to read. Having already appeared in four illustrated books, the title character is largely a passive observer and occasional commentator as movie star Gail Tokuda relates experiences or becomes involved in adventures where reading is necessary, with the cast widening as the title progressed. They're well cartooned, and certainly imaginative, but the constant repetition of the message is intrusive and lacks subtlety.~FP

FRANKENSTEIN

Prize: *33 issues 1945-1948 (1-17), 1952-1954 (18-33)*

This is based more on the film monster than on Mary Shelly's novel. Artist and writer Dick Briefer's style is a caricaturish, uncluttered one well-suited to humour and that's the unlikely direction he took the monster in the 1940s. The patchwork creature's nose moved up his face until it was in the middle of his forehead. The grotesque comedy of the strip compares to nothing more than Jack Cole's *Plastic Man*. The 1940s issues are forty-eight pagers with two to three feature stories in each, and later issues give Ed Goggin occasional script credits. When the title was revived in 1952 it was as a horror series, still produced by Briefer but in a less bigfoot style (if that's possible with Frankenstein!). After the first couple of quarterly issues the series settled into a bimonthly, one feature story per issue groove. The thirty-two pages were filled out with horror shorts by *Black Magic* regulars like Mort Meskin and Marvin Stein.~SW

FRANKENSTEIN

Dell: *4 issues 1964 (1), 1966-1967 (2-4)*

The first issue adapts the classic Boris Karloff-led 1930s horror film, and manages a very creditable job of it. The remainder, well, they were part of Dell's superhero triumvirate based on old horror characters, not necessarily a bad idea in principle, but in practice... Frankie has a skintight red costume and a white crew cut, although this is sometimes open to question, as the art throughout is by Tony Tallarico. On seeing this you'd question if Tallarico knew which end of the pencil he should be drawing with. The writer wisely selected anonymity as the preferable option.~WJ

The FRANKENSTEIN Monster

Marvel: *18 issues 1973-1975*

Considering that the success of Marvel Comics is founded on bombast and in-your-face artwork, it's surprising that many of their early to mid-1970s titles were deliberately understated. Such was initially the case with *Frankenstein*, which gave notice of its intent by adapting Mary Shelley's original novel, rather than any of the film versions, in the first two issues. Gary Friedrich's script is workable, and the subtle and expressive artwork of Mike Ploog creates a very nice mood. The series continues in the 19th century, but Friedrich couldn't maintain the quality, and once Ploog left with 6 the art was never more than adequate. Doug Moench becomes writer with 12, and sets his stories in the present day, but his work was sloppy, and matched by the art. 1-6 are worth a glance for Ploog's work, but stay well away from the rest.~WJ

FRAY

Dark Horse: *6 issues + 2001 to date*

Buffy the Vampire Slayer creator Joss Whedon, with Karl Moline art, makes his first foray into comics with this series charting the adventures of Melaka Fray, the Vampire Slayer of the 23rd century. As well as the usual demons and vampires, Melaka has to contend with a post-apocalyptic social decay and radiation induced mutants, all of which she manages to dispatch with the usual combination of high kicks and stakes through the heart. Despite much anticipation from the comics community and *Buffy* fans alike, *Fray* is nothing special and is unlikely to appeal to a crossover audience of comics fans not already tuning in to the TV series. Still, *Buffy* fans generally seem to approve of it. Planned as an eight issue limited series, there has been no new issue for almost a year.~JC

FRAYED ENDS

Jason Brightman: *3 issues + 2000 to date*

Paul is reacting badly to his girlfriend's walking out on him, and is defensive when advised by his friend. Then he's sucked into another reality, where the imaginary friend of his childhood, Edward, turns up, looking for his heart. Jason Brightman's meditations on loneliness offer some gratuitous satire on American gun law, but the whole is unmoving and remains, so far, unfinished.~NF

The Fabulous Furry FREAK BROTHERS

Rip-Off/Knockabout: *14 issues (0-13) 1976-1992* (1-12, 0), 1997 (13)*

Certainly the world's most popular underground comic, Gilbert Shelton's *The Fabulous Furry Freak Brothers* first appeared in a 1967 issue of *The LA Free Press*. They continue to star in their own comics, each edition kept constantly in print throughout Europe and America. The Freak Brothers still appeal to nostalgic hippies, pot-smoking ravers, and a huge general readership, uninterested in superheroes but in love with Shelton's wild humour and accomplished story-telling.

Exemplars of the long-hair lifestyle, The Freak Brothers are Fat Freddy, Phineas and Freewheelin' Franklin, three shiftless room-mates whose constant craving for dope forms the basis for many of Shelton's funniest strips. Born in Texas in 1940, Shelton was a teenage EC-addict with a particular fondness for the work of *Mad* creator Harvey Kurtzman. In *Blab* 1 Shelton wrote that "Kurtzman's style was my favorite. It was strong, full of action, and well-suited to a story-teller's style". Kurtzman once returned the compliment, describing Shelton as the "true pro" of the underground. Inspired by the first manifestations of flower power, Shelton's early Freak Brothers strips were drug-guzzling, cop-baiting, free-loving farces that both epitomised and satirised the counterculture scene. Whilst Shelton's drawings were often extremely crude, his well-defined characters and meticulously constructed scenarios sustained a series of thigh-slapping one and two pagers, collected in the first four issues of the comic. He also began a series of strips devoted to Fat Freddy's Cat, a flea-ridden ginger tom who proved almost as popular as the Brothers. By 5, longer stories like 'Grass Roots' or 'Come Down' allowed Shelton to stray from the basic formula of failed dope deals and run-ins with Norbert The Narc, leading to the epic 'Idiots Abroad' story-line in 8-10*, which remains Shelton's finest work to date. The Freaks decide to travel to Bogotá to buy cheap weed "from the source", only to be separated at the airport. They are soon caught up in a series of misadventures. Franklin is captured by pirates, Freddy travels through Europe (stopping in Amsterdam, natch) and Phineas becomes the ruler of a powerful Middle Eastern country. Produced in collaboration with Paul Mavrides, gloriously coloured by Mavrides and Guy Colwell, this globetrotting romp also enabled Shelton to abandon the hard-core drug humour which had previously alienated potential readers. 12 is a return to the format of the earliest issues, containing lots of shorter strips, often in collaboration with Mavrides.

With Shelton seemingly disinclined to produce more Freak Brothers comics, 13 limped out in 1997 reprinting in black and white stories from the colour 1978 'Thoroughly Ripped', themselves originally printed in *High Times* (and one from *Playboy*). Another story from this collection occupied half of 11, the final colour issue. 1985's issue 0 was more old work, this time the earliest versions of the Freaks.

The popularity of *The Freak Brothers* enables Shelton to exercise a great deal of quality control over his best loved characters. Never fully embraced by either the mainstream or 'serious' comics pundits, the static *Freak Brothers* world often strikes non-believers as anachronistic or tired, a stale joke. However, devotees understand that while the hippy dream may well be dead, Shelton's comics transcend their historical moment. They remain constantly amusing and endlessly re-readable, and how many other comics can you say that about?~AL

FREAK FORCE

Image: *18 issues 1993-1995, 3 issue miniseries 1997*

Following build-up, back-ups and hype in Erik Larsen's *Savage Dragon*, the early issues lived up to expectations. Old-timer Super Patriot and the experienced Dart team up with Mighty Man, Rapture, Ricochet, Barbaric and Horridus. They're five of Chicago's younger and mostly incompetent superheroes, providing a light-hearted romp reminiscent of early Giffen and DeMatteis *Justice Leagues*. Giffen's plots (although the script was Larsen's) no doubt played a large factor in this.

Amongst the jokes Larsen and Giffen nonetheless manage to weave some entertaining and clever plots. A well-executed mystery over Mighty Man's true identity, swimming with red herrings, which reaches a conclusion only obvious in retrospect, provides the most entertainment. While early issues received much critical acclaim, sales were less encouraging, and an inevitable round of team-ups attempting to boost sales in 8-12 leads into a tedious alien-invasion storyline, after which the series never quite regains its way. Attempts to take itself more seriously by becoming grim and gritty only served to drive away the fans who had enjoyed the fun of the earlier issues.

The team return in a miniseries that brings them firmly back into line with dozy-but-fun superhero antics. Their enemies track them down by the change of address cards they sent out; they mostly screw up. Directly after this they're back to being *Savage Dragon*'s support cast in issue 40 of that title, where they belong.~JC

FREAK SHOW

Dark Horse: *One-shot 1992*

The Residents are a difficult band to describe to newcomers. They're four musicians who keep their identities a secret behind giant eyeball masks. Their music is always adventurous and very uncommercial. *Freak Show* is a concept album with each song telling the story of a different freak. Some friends were asked to interpret these songs as strips and this is the result. Given its origins, it was never going to be entirely coherent: the disparate styles work against any sense of coherence and Dave McKean's 'Lillie', in particular, disrupts the visual identity of the book. That said, there are some interesting pieces by the likes of Kyle Baker and Savage Pencil. Particularly worth reading are Brian Bolland's 'Harry The Head', Matt Howarth's 'Jello Jack The Boneless Boy' and Richard Sala's 'Herman the Human Mole'.~NF

FREAKS

Monster Comics: *4 issues 1992-1993*

A bit late in the day for an adaptation of Tod Browning's infamous film about a gold-digger who marries a sideshow freak for his money only to have a horrible revenge visited upon her when his deformed carnival buddies find out what she's up to. Jim Woodring's script is bought to life by F. Solano Lopez's clear pencilling, although Lopez's tidiness doesn't serve the story well during its muddy, rain-drenched climax. Woodring does his best to bring the characters to life, and though flaws in the original film stop the script being truly great, it remains worth reading.~NF

FREAKS AMOUR

Dark Horse: *3 issue miniseries 1993*

Following a nuclear incident known as 'Caliban's Night', 77,000 people are irradiated and mutated to form an ostracised underclass. A harrowing social commentary deftly adapted from the Tom DeHaven novel, it succeeds both as a modern tragedy and a horror story.~HS

Recommended: 1-3

THE FREEDOM COLLECTIVE

Rough Cut: *One-shot 2002*

An intriguing idea well handled: What if Stan Lee and Jack Kirby had created *The Avengers* in 1960s communist Soviet Union? The scenario avoids outstaying its welcome over an entire comic, with the text pages and fake ads adding to the joke. Artist Dom Regan manages a creditable Kirby/Ayers style as well. A good laugh.~WJ

FREEDOM FIGHTERS

DC: *15 issues 1977-1978*

Appallingly sloppy and featuring staggeringly inane villains, Bob Rozakis scripts were a standard feature of DC's second and third-string titles during the mid- to late 1970s. Here, however, he redeems himself with a well-considered, scintillating revival of the 1940s characters. Only joking. It's all rubbish apart from 12, in which the mustard is just about cut. It's not all his fault, though, as Martin Pasko established the format of creative apathy, and when the best art one can point to is Ernie Chan covers you know things are in a bad way.~FP

FREEMIND

Future Comics: *3 issues + (0-2) 2002 to date*

Trapped his entire life almost immobile in a wheelchair, Mac Flint is a superb engineer. His ultimate plan is to create an artificial body into which he can transfer his mind, but other parties also have an interest in the technology. With their years of experience, David Michelinie (plot and script), Bob Layton (plot and inks) and Dick Giordano (pencils) know how to produce a professional comic. In fact, the whole feel of the title is something that could have come from Valiant a decade ago. Professional, however, doesn't equate with compelling, and so far there's nothing to make this a compulsory purchase.~FP

FREEX

Malibu: *18 issues, 1 Giant-Size 1993-1995*

Mediocre take on the successful *X-Men* formula as Gerard Jones and Ben Herrera relate the adventures of misunderstood, super powered and highly generic teen misfits. Pressure, Anything, Sweet-Face, Plug and Boom Boy team up and go on the run pursued by the usual suspects, government agents, freelance bounty hunters and the like. 7 introduces The Old Man, an immortal who offers them survival training in return for their help battling Ultraverse arch-villain Rex Mundi. They're captured by Contrary, a dead ringer for *X-Men*'s Emma Frost, who also happens to run a school for super powered children. Their escape (11) leads into the Giant-Size as lizard kid Cayman replaces Boom Boy and the Old Man takes them under his wing as young warriors. Other than a so-so Rune guest-shot in 17 the series starts off half-baked and peters out from there. It's tough being a freak, but not as tough as reading this rubbish.~WW

FRENCH ICE

Renegade: *13 issues 1987-1988*

French Ice offered readers two classic French humour characters not previously translated into English: Lelong's cantankerous old woman Carmen Cru and Binet's smart-arse dog, Kador. Most readers passed, and they're not entirely to be blamed. While Lelong's cartooning is a delight, his stories of irascible bull-headedness rely to a great extent on a knowledge of French life and an acquaintance with little French peasant women. Carmen Cru, around whom the earlier issues are built, may be a national treasure but she doesn't travel well. Kador, on the other hand, fits in with a long tradition of animal-joke crackers à la Garfield, with the added humour of his owner's continual marital problems, and by the last issue Kador dominated the comic.~FJ

FRENCH KISS Comix

Ediciones La Cúpula: *4 issues + 2001 to date*

This hardcore sex anthology aims to present the best in erotic comics, offering material published in the Spanish *Kiss* magazine. Some artists will be familiar from NBM's Eurotica line (Kevin Taylor, Ignacio Noe, Belore, Juan Emilio and Tobalina), or Last Gasp's Priapism Press (Ferocious), but it's worth mentioning the clean lines and humour of Messina (1, 3-4), Honey (1-4), Alvaro (2-4) and Man (4), and the fluidity of Val & Marcelo Sosa (1-4). 1-3 also contain the manga, Miss DD, by Tomo Chiyoji, which, as the title suggests is aimed at lovers of big breasts, and 3 has the advantage of the inclusion of one of Solano-Lopez' *Silly Symphonies.* With one hundred page issues and half of the strips presented in colour, this is an attractive package, with a wide variety of strips and styles, excitement practically guaranteed.~NF

FRENCH TICKLERS

Kitchen Sink: *3 issues 1989-1990*

Continued from Renegade's *French Ice,* Kitchen Sink wisely added more elements to the staple diet of Lelong and Binet, relying less on the dubious charms of Carmen Cru and more on the selling power of known names such as Moebius and Franquin. Even so it only managed to limp along for three issues. Humour is obviously not as universal as we'd like to think.~FJ

J. Michael Leonard's FRESH BLOOD Funny Book

Last Gasp: *1 issue 1978*

Confident cartooning in a variety of styles from Leonard, who can also produce a good gag strip. He has a selection of archetypal characters whose milieu and even appearance changes from strip to strip, but who remain in character. Foremost among this repertoire company are Skipper Seaweed, the salty seadog, Bumboat, the idiot, and a couple of dogs in civil war stories, the longest and lest rewarding strips here. The maxim "Don't judge a book by its cover" also holds true; the drawing is far better inside than out.~FP

FRESCAZIZIS

Last Gasp: *One-shot 1977*

Best described as a hallucinatory journey through the artist's subconscious, *Fresczizis* was Melinda Gebbie's solo title. Typical of Gebbie's early work, the art has a wonderfully sensuous, almost art nouveau line, and a cavalier disregard for artistic convention. Those looking for a coherent story-line would be best advised to look elsewhere, as the many, frequently sexual short stories on offer here are very short on conventional narrative.~DAR

FRIENDS

Renegade: *3 issues 1987*

Attempting to ape Winsor McCay art is no bad thing, and Bill Dinardi's managed the delicate line characterising McCay's work. He's managed little else, though. While attempting the whimsy of McCay's strips he falls woefully short with twee tales of bonding between Will and his humanoid alien buddy, and the stunning and innovative layouts of McCay elude him entirely. The result is page after page of static talking heads with nothing of interest to say.~WJ

FRINGE

Caliber: *8 issues 1990-1991*

Nutty telekinetic architect animates superball and is hunted by bald nun. Sounds interesting, no? Sadly muddled and confused, it's very much an amateur effort, notable only for early art from Philip Hester. 1-4 are collected.~WJ

The FROGMEN

Dell: *12 issues 1962-1965*

One of small group of 1960s sub-aqua comics. Compared with Dell's usual offerings of the period this title is noteworthy for some surprisingly good artwork from George Evans and Mike Sekowsky among others, and particularly Alex Toth in 5. The back-up strip 'Boy Of The Pacific' was occasionally drawn by Frank Thorne.~SW

FROM BEYOND THE UNKNOWN

DC: *25 issues 1969-1973*

DC's rich legacy of well-drawn science-fiction stories from the 1950s provided adequate material for twenty-five issues of reprints. The actual plots are generally pretty silly, the covers and splash-page teasers being the best thing about them, but artists of note include Murphy Anderson and Carmine Infantino in most issues and 'Al' Toth in 2. 7-17 are forty-eight or sixty-four pages, and the new material by Denny O'Neil andAnderson in 7 and 8 is neither's best work.~FP

FROM HELL

Tundra: *3 issues 1991-1993**

Kitchen Sink: *7 issues (4-10) 1994-1996**

Alan Moore and Eddie Campbell's *From Hell* concerns the Jack The Ripper murders that occurred in London in the late 1880s, probably the most famous serial killings ever. The perpetrator was never caught. Moore has them committed by the Queen's physician, Sir William Gull, with Victoria's knowledge, to protect her son from a blackmail attempt by a group of prostitutes, one of whom has acted as nursemaid to an illegitimate grand-daughter, the child of Prince 'Eddy' and a shopgirl. Gull is also impelled by his Masonic duty to the crown. As the killings progress he becomes deranged by what he has seen and done, seeking the ultimate, emblematic meaning for his hideous acts in Masonic lore and ritual.

Moore takes the huge body of Ripper scholarship – some of it far from scholarly in tone – and threads through it until he has the means to develop the moral and metaphysical points at the heart of the story. His version of Jack the Ripper starts off as an awful, human tragedy, a monster conjured up by a group of weak people who, once an idea that will get them off the hook has been planted in their brains, cannot forget it. It ends up in an extraordinary vision of evil down the ages. People who object that he's taken his theory from *The Ripper and the Royals,* one of many books on the subject, are missing the point. The point is that the particular and extraordinary circumstances surrounding the Jack The Ripper murders allow the writer to examine certain facets of human nature. They also, of course, ignore the many elements drawn from other sources, all carefully detailed in the appendices for intrigued readers, along with information on which scenes are factual and which have been invented.

Eddie Campbell, illustrating a story which moves from the hideous poverty of the East End of London right through to visionary dreams of Blakean stature, draws extensively on his knowledge of Victorian satirists and illustrators. He adopts an extremely dense, etched style, involving intricate open cross-hatching and the use of very fine lines that you usually associate with printmaking. This is balanced by occasional heavy use of ink, and the many scenes set at night. Occasionally the art unravels at the edges to express extreme emotions. Both he and Moore have researched the project carefully, and it shows, in everything from the correct label on a cocoa tin to the architectural detail of London during the period. There is a tightness and rigidity, echoed in the regular use of page grids, which is juxtaposed by the way certain panels fade out, and the way certain characters are never quite in focus, diffusing into a mass of lines.

From Hell is an extraordinary piece of 'faction', carefully dramatising events, including contradictory evidence, yet also making exciting leaps of the imagination. Moore, as you would expect, brings in all sorts of intriguing odds and ends of Ripperology, from Buffalo Bill Cody to the Mad Monk of Mitre Square and the interest Ian Brady took in the case, while building an overall picture of a time of social unrest, class struggle, racial tension and terrible deprivation. It is beautifully rendered, each panel oozing atmosphere and quietly but firmly supporting the dismal, depressing mood of each of the chapters. In From Hell there are no heroes and villains. Judgement is withheld. We are all to be pitied.~FJ

Recommended: 1-10

FROM HUNGARY

Tom Galambos: *One-shot 1996*

Tom Galambos' parents were born in Hungary and escaped the country after the anti-communist uprising of

1956. Here he details their terrifying experiences. Don't be put off by Galambos' awkward and sketchy art as it serves the story rather than distracts from it. This is an absorbing read, and serves to bring home how some of us take our comforts and freedoms for granted.~WJ

FROM THE PIT

Fantagor: *1 issue 1994*

Intended as a seven-issue series, this Richard Corben magazine is now merely a tantalising glimpse at what could have been a great horror comic. The art is some of Corben's best of the 1990s, and a nice H.P. Lovecraft-adapted back-up (reprinted from *Slow Death*) only adds to the disappointment of the title's untimely demise.~DAR

FRONTIER LINE

CPM: *7 issue limited series 1999-2000**

During a war, fought with giant robot warriors between the North and the South on the planet Sodom, various soldiers and civilians are introduced between great swathes of exposition. The character biographies provided in the collection tell you more about the series than reading it, as its narrative focus is so random. This is not a well-told, well-reproduced or memorable series.~NF

FRONTLINE COMBAT

EC: *15 issues 1951-1953**
Gemstone: *15 issues 1995-1998**

The immediate success of *Two-Fisted Tales* led to this companion title. Editor Harvey Kurtzman used *Two-Fisted*'s stable of artists to draw stories from his plots and layouts, but while promulgating the same pacifist ideals, *Frontline Combat* was initially distinct, with more stories focusing on the hardware enabling effective warfare. This is exemplified by 'War Machines' in 5 and later issues featuring a large selection of plane-based tales. The artwork was stunning throughout from the likes of Wally Wood, Jack Davis, Kurtzman in early issues and George Evans from 9, and the team of John Severin and Will Elder. Wood highlights are the heart-rending 'A Baby' in 10, 'The Charge of the Light Brigade' in 4 and a tale contrasting the nobility of Rommel with the atrocities of the Nazis in 3, while Davis' speciality was evoking the dirt and grime of war in almost every issue. Alex Toth contributes two airplane masterpieces in 8 and 12.

An ambitious and never completed project encompassing both EC's war titles and intending to tell the entire story of the US Civil War began in 9. Opening with a biography of Abraham Lincoln and the attack on Fort Sumpter, it's the only Civil War special to appear in *Frontline Combat*. There are other theme issues, though, an excellent detailing of the Iwo Jima campaign in 7, and an Air Force special in 12. Notable biographies include Julius Caesar in 8, Stonewall Jackson (5), Immelman (14) and both Geronimo and Napoleon in 10. Despite lacking the variety of *Two-Fisted Tales*, as a run *Frontline Combat* is of higher quality. It's also without that title's initial fumblings, and it was cancelled before any misguided change of direction. The Gemstone issues are reprints in the original format, collected as annuals, but the connoisseur will want the hardbound boxed set reprint.~FP

Recommended: 2, 3, 5-10, 14

FROST

Caliber: *3 issue miniseries 1989**

Black and white adventures of a private eye who likes to wear sunglasses. With pedestrian plots involving drugs, murder and child-beatings there's nothing original, but creator Kevin VanHook shows promise.~HY

FRUSTRATION

Methuen: *3 volumes 1982-1986*

French cartoonist Claire Bretécher employs a sketchy, almost scribbled, style of art, and offers social commentary, dinner table philosophy and the dissection of contemporary relationships and thoughts about them. The satirical content is occasionally barbed, but she's more often than not satisfied by highlighting the idiocies of the educated middle-classes who lapped up her work from the late 1970s. This is where she falls short of obvious influence Jules Feiffer, although most people do, by not offering any real insight. One imagines her hanging around bars and cafés surreptitiously scribbling notes as she overhears those around her. Perhaps Feiffer comparisons are invidious, but they're inevitable when so much of her repertoire stems from him. There is considerable wit on display in these collections, and if you've not looked at Bretécher's work in twenty years it deserves another glance.~WJ

FUGITIVE

Caliber: *One-shot 1989*

A killer and the detective chasing him are moving through a series of scenarios from old TV shows. In *Caliber Presents* the idea ran out of steam very quickly, and so it is here. Mind you, if you've lied awake at night wondering how badly James O'Barr would draw the *Star Trek* cast this is the place to look.~FP

FUN BOYS Spring Special

Tundra: *One-shot 1991*

Fondly remembered days of childhood friendship and comic collecting are deftly contrasted with the disturbing experiences that children accept. Jeff Bonivert's subtlety and illustrative cartooning is a joy. A short back-up strip contrasts the main story with the characters now as cynical teenagers. They re-appear in the *Flying Colours 10th Anniversary Special*.~FP

FUNGUS THE BOGEYMAN

Hamish Hamilton: *1 volume 1977*

In print twenty-five years after quietly outpunking all competition at what was quite a punky time, this faultless hymn to filth, written and drawn by Raymond Briggs, is mystifyingly still not on the national curriculum. The Bogeys live below our surface, and everything that disgusts us delights them. They sleep in damp mildewed beds, cultivate boils, and eat rotten eggs. They hate anything new so read oldspapers (filled with "strip cartoons – a form of entertainment for the simple-minded"). Fungus is a kind, industrious family Bogeyman, working steadily by our night at the usual Bogeyman business of frightening the surface dwellers, known as "drycleaners", creaking our doorknobs and tapping at windows. He adores his wife Mildew ("Good smelly dumpling keeps the house filthy") and his boy Mould.

All this is innocent mucky fun for young and old, packed with witty footnotes explaining Bogey habits and the inventive language ("I'll glaur the bar muffs on the Bogeybike, Dad"). There are literally hundreds of laugh-out-loud bits on the beautifully drawn grey, brown and snot-green pages. Meanwhile, though the Bogeys are ostensibly in conflict with us, they can clearly be seen to be a portrayal of us, specifically the British, stuck in a gloomy world of tradition and meaningless work, redeemed only by love. At the bleak ending, just before the final slimy endpapers, Fungus, his nose dripping at hugely increased rate, breaks down, unable to understand why he lives as he does.

Look out for 1982's *Plop-Up Book*, not a comic, but too amazingly hilarious and disgusting to miss.~GK

Recommended

FUNNY AMINALS

Apex Novelties: *One-shot 1972*

An anti-vivisection benefit comic edited by future Crumb documentary maker Terry Zwigoff, featuring a number of top underground cartoonists. For some reason many, including principal artist R. Crumb, somewhat missed the point, and a lot of the stories feature violence against animals as entertainment. It's redeemed, however, by Art Spiegelman's devastatingly poignant Maus strip, which still retains its power to shock today.~DAR

Recommended

THE FURIES

Carbon-Based Comics: *7 issues 1996-1997*

Seeing a team of female superheroes as commercially viable, creator Bill Knapp then did his best to ensure they were fully-rounded personalities, not just melon-sized breasts falling out of costumes. Prematurely curtailed, presumably due to lack of success, this is a well-considered attempt to produce a superhero comic with some humanity, and that makes these worth picking up if you come across them.~WJ

FURRLOUGH

Antarctic: *51 issues 1991-1997*

Radio Comix: *61 issues + (52-112) 1997 to date*

Anthropomorphic anthology dedicated to a mix of manga, humour, action, drama and adult comedy with cute fuzzy animals as the protagonists. There are long running serials such as Tall Tails' by Jose Calderon and Daphne Lage (78-101), 'Star Run' by Louis Frank and Steve Fait (41- 61) and 'Heebas', Scotty Arsenault's fluffy- but barbed take on Friends (intermittently from issue 48), complemented by short, complete vignettes on every genre from World War I and II action, science fiction, detective, slice-of-life, surreal comedy. There's even an adaptation of *The Song of Jenny the Pirate* by Berthold Brecht and Kurt Weil in 84.

Some well known alternative lights have also appeared. Ben Dunn was in 1 and his series 'Swimmer' ran in 39-47. Ganbear (Satoru Yamasaki) previewed *Fantastic Panic* in 9 and Kyle Baker was a guest illustrator in 62. Later issues began to act as a memory lane/catch basket for vanished anthropomorphic features such as Fission Chicken by J. P. Morgan (85) and Patrick Morans' 'Tunesia' (91-95) and there are many appearances of Fred Patten and Steve Gallacci's Erma Felma from the pioneering anthropomorphic animal comic *Albedo*.

Furrlough is always enthusiastic, and with a huge cast of contributors it ranges from the usually adequate to the sometimes excellent, such as 'Stinz: Bad Memories' by Donna Barr (32). A steady diet of funny animals, though, no matter how thematically varied, won't be to everyone's taste.~WW

FURY

Marvel: *One-shot 1994, 4 issue miniseries (Fury Of S.H.I.E.L.D.) 1995, 2 issue microseries (Fury/Agent 13) 1998*

Max: *6 issue miniseries 2001-2002**

The one-shot tells the background and origin of Nick Fury and the covert organisation he heads, S.H.I.E.L.D. It clarifies inconsistencies and, somewhat unconvincingly, 'corrects' certain events in S.H.I.E.L.D.'s previously revealed history. For completists only. The miniseries is a great little number with Howard Chaykin on script, slick Corky Lehmkuhl pencils, and plenty of intrigue and double-cross as the heads of S.H.I.E.L.D. and HYDRA team up. Any comic featuring Nick Fury at a Smokestoppers Anonymous meeting must be worth the entrance fee. The decoder supplied with 4 is one of the better comic gimmicks. Having killed Nick Fury elsewhere, it seems to have occurred that this may not have been the brightest editorial idea. We therefore have Agent 13 discovering he may still be alive. An ingenious way of sneaking a look at Fury heading the Howling Commandos in World War II occurs amid a decent pageturning plot. The downside is the unattractive artistic distortions making every character resemble a constantly morphing clay model.

The Max 'adult' makeover has an ageing Nick Fury and an old Russian sparring partner from HYDRA use a banana republic island as their playground for all-out carnage. Garth Ennis strains to out-gross himself with very similar material to his contemporary *Punisher* stories. Unfettered by the Comics Code Authority, Nick Fury is portrayed as never before and consequently appears strangely out of character. Darick Robertson and Jimmy Palmiotti abet with the gruesome gore.~APS

Recommended: 1995 miniseries 1-3

FUSED

Image: *3 issues + 2002 to date*

A series plagued by delays and increasing gaps between issues, which is a shame as Steve Niles has concocted a good action thriller about a man who's merged with an experimental armoured suit. The trappings and supporting cast are recognisable, but not obviously enough to drop into cliché. The sources of artist Paul Lee (1-2) are more familiar (Christopher Walken for one), and while his art is occasionally stiff, the story moves fast enough to distract attention. A group of government sponsored superheroes The Implementers turn up in 3, and well conceived back-up strips in 2 and 3, excellently drawn by Diego Jourdan, detail the first day on the job of one member, Kid Crash. All in all, thoroughly enjoyable and with the potential to be very successful if it would only appear.~FP

FUSHIGI YÛGI

Viz: *7 volumes + 1999 to date*

Yu Watase creates an engaging soap-operatic fantasy epic recounting the somewhat interminable adventures of a schoolgirl transported to a magical land within an old book. Miaka first gets drawn in with her best friend Yui, where they are rescued by the celestial warrior Tamahome and escape back to the real world. After an argument with her mother, Miaka returns to the library where the magic book is kept and is once again drawn into the world within – The Universe of the Four Gods. The world within is a facsimile of ancient China and Miaka becomes the priestess of Suzaku, destined to save the kingdom and find true love. As the series progresses Yui is also drawn back and becomes the priestess of a rival kingdom. Miaka spends most of her time deciding who to be in love with, trying to reconcile with Yui who now hates her and searching for a complete set of seven celestial warriors to win the upcoming battle for Suzaku. Well done of its type, but in need of severe pruning. This was originally introduced to the English speaking world as part of the line-up of manga anthology *Animerica Extra*, and in order the seven collections are titled 'Priestess', 'Oracle', 'Disciple', 'Bandit', 'Rival', 'Summoner', and 'Castaway'.~WW

FUSION

Eclipse: *17 issues 1987-1989*

Fusion is a space opera that follows the adventures of the cargo ship Tsunami, crewed by a mixture of humans (Indio, Dow Cook) and animalistic aliens (Haven, a bird, Tan, a squirrel, Alshain, a cat, Herrick, a flightless bird and Carz, a lion). 'The Soulstar Commission' in 1-5 sets the tone for the whole series: conflict, tragedy and betrayal as the Tsunami becomes caught in a war over a Royal House. Thereafter the stories concentrate as much as possible on characterisation, losing the plot to an extent that isn't helped by the almost constant shifting of writers from issue 6. Originally written by Steve Barnes (1-5), the following twelve issues credit no less than six different writers, including Steve Gallacci (7-9, 16-17) and Christy Marx (14-15). Most of the artwork's by Gallacci and Lela Dowling, neither of whose work is particularly bold or dynamic. Better than the lead feature are Ken Macklin's clever back-ups Dr Watchstop in 1-5 and 7-8, and The Weasel Patrol (5-17). The latter is a deliciously frenzied comedy shoot-em-up featuring armed and dangerous, but mostly stupid anthropomorphic characters. Check *Fusion* out for the back-ups.~NF

FUTURAMA

Slave Labor: *3 issues 1989*

Art Deco science fiction à la Metropolis, or the far superior Hernandez brothers comic Mister X. Set in generic future city Kronos, the silly script has rival night club owners Frank Dekker and baddie Karl Von Horst fighting over beautiful singer Zarah Heiberg. Zarah is engaged to Frank, and exclusively contracted to his establishment, The Egyptian. The singers at Karl's Club Dementia are all robots, so he sets in motion a wicked scheme to convince Zarah that she's actually an android named Zara. In addition to satisfying his own depraved appetites, Karl hopes that Zarah/Zara's drugged, robotic performances at Dementia will cause Frank to forget all about his business, leaving The Egyptian ripe for takeover... Although Futurama tries far too hard for it to be really 'cool', the sexy, streamlined artwork of Ken Holewcyznski is worth a mention. While clearly influenced by the 'clear line' style of Spanish artist Daniel Torres, Holewcyznski's gift for retro design still deserves a better showcase than this instantly forgettable piece of fluff.~AL

FUTURAMA

Bongo: *10 issues + 2000 to date, 2 issue microseries ('The Futurama/Simpsons Infinitely Secret Crossover Crisis') 2002-2003*

Based on Matt Groening's other cartoon series, set in the year 3000, this series features further adventures of all of the regular characters: dumb man-out-of-time, Philip J. Fry, robot Bender, one-eyed alien, Leela, Fry's descendant, senile Professor Farnsworth, consummate bureaucrat, Hermes Conrad, rich-girl, Amy Wong and lobster-like alien, Dr Zoidberg. They all work for the Professor's *Planet Express Delivery Service* and must face giant sea monkeys on a rampage (1), robotic space pirates (2), and the consequences of Fry and the Professor having their minds switched (9). Other issues include parodies of Apocalypse Now (4), *Who Wants To Be A Millionaire* (5) and *X-Men* (8, a homage to Jack Kirby). Eric Rogers wrings plenty of humour out of the scripts, and the different artists (including James Lloyd and John Delaney) manage to maintain a look consistent with the cartoon throughout.

The Simpsons crossover is written by Ian Boothby and drawn by Lloyd with the set-up being that Evil Brain Spawn have trapped the *Futurama* characters in a *Simpsons* comic where only Fry and Leela's pet, Nibbler are immune to assimilation into the comic's reality. Not as funny as the separate strips, unfortunately, though there is some fun to be had in the way the characters react to each other.~NF

THE FUTURIANS

Marvel: *Graphic Novel 1983*
Lodestone: *3 issues 1985-1986**
Eternity: *1 issue 1987*

The graphic novel tells the origin story for this group of superheroes, and it's a complicated one, involving two warring factions from Earth's future who come back to the 1980s to fight their last battle. The villains have arrived with a full warfleet, but the white hats were only able to send one representative. This representative gathers a group of people with various talents and tricks them into undergoing a process that turns them into superheroes, complete with helmets and costumes, and immediately sends them into battle. The other issues, which are published as a collection in the Eternity book, are set in the aftermath of the battle.

Even though many elements of the story-lines have been seen elsewhere, and more than once, Dave Cockrum (as writer) has put in a lot of imagination where it counts, making the comic a fresh read, with solid characters and plots. True, the characters aren't particularly striking as individuals, but Cockrum handles them well as a team, and the tension of their forced origin is always simmering quietly in the background. Cockrum's pencilled artwork doesn't call attention to itself, but tells the story very clearly, and it's a story that deserves to be continued.~FC

Recommended: Marvel Graphic Novel, Eternity collection

FUZZ & PLUCK

Fantagraphics: *1 volume 1999, 2 issues + ('Splitsville') 2001 to date*

Fuzz is a teddy bear and Pluck a featherless rooster, who inhabit a strange world where humans and talking animals co-exist, but where the exact boundaries between them are not defined. 'Splitsville' picks up where the *Zero Zero* serial, reprinted in the 1999 volume, left our heroes – working in a fast-food joint called, Lardy's. The adventure begins when a surly dog attacks Fuzz during a delivery and Pluck is fired after fighting with a customer. Fuzz finds himself at the mercy of a young girl's other toys, while Pluck is signed up for a gladiatorial show. Ted Stearn draws in a crude style that suggests lack of ability (though it's not unappealing), but the inventive, cynical storylines more than compensate.~NF

* Available in a collected edition

G

G-8 AND HIS BATTLE ACES

Blazing: *1 issue 1991*

Strange attempt to revive G-8, the pulp fighter ace from World War One, in which the green monstrosity Grun hogs the limelight, happily killing Allies and Hun alike. On the flip side of the comic is 'The Spider's Web' (by the same creative team of Chuck Dixon and Sam Glanzman), which explains what happens between a couple of panels in the G-8 story when Grun passes through a time portal and meets another pulp hero, the Web-Man. Nothing more than a curiosity.~NF

G. MEN

Caliber: *1 issue 1991*

Hard-boiled science fiction thriller with a rookie trying to fit into an experienced team with a tough leader. Despite amateurish artwork and by-the-numbers plotting there is also a certain verve, too.~NF

GABRIEL

Caliber: *One-shot 1995*

Extrapolating an interesting alternate papal-controlled Glasgow, *Gabriel* ultimately comes down to an all-too-easily resolved God vs Satan conflict. The muddied storytelling obscures what could have been a far better tale, but David Hill's black and white artwork is excellent, echoing the disciplined standards of 1960s British adventure comics.~FP

GAG

Harrier: *7 issues 1987-1989*

Good old Harrier, not just there to fill the shelves with substandard sexist-fan crap, they also picked up on the 1980s British small press. Eddie Campbell is the most successful graduate of this anthology, and there are plenty of his slices of life, but Glenn Dakin's contributions are consistently better. Both are below par, though, in the best overall issue, 5, with Phil Elliott, Paul Grist, Ed Pinsent and Steve Way carrying the day. Nothing in *Gag* changes the world, and it rarely lives up to the title, but there's a gem in every issue, with John Bagnall's tale of backwoods religious repression in 6 particularly memorable. 1-3 are standard comic size, with the remainder magazine format.~FP

Recommended: 5-7

GAIJIN

Matrix: *1 issue 1987*
Caliber: *One-shot 1990*

In an America where the Republicans and Democrats live under different laws and governments, Ella Salidor, Agni, Maurice, Scream and Moravick, perform industrial espionage for the highest bidder, though there is always a chance of betrayal. The Caliber issue presents a redrawn and completed version of the story begun in the Matrix issue, then restarted in Caliber's *Roulette*. Gabriel Morrisette's artwork is full of heavy blacks, but becomes scratchier by the second strip in the Caliber issue (a solo adventure of young female, Scream, facing hooligans in a mall), and the whole tone seems unbalanced.~NF

GALACTIC GUARDIANS

Marvel: *4 issue miniseries 1994*

Dull and pointless *Guardians of the Galaxy* spin-off. Biff, Bang, Pow all the way.~FP

GALACTICA: The New Millennium

Realm: *1 issue 1999*

Another uninspired comic about the Brave Colonials fleeing from and fighting back against those insidious Cylons. It's no use issuing a warning as *Galactica* fans will pick it up no matter what, while regular comic fans won't go within laser-range of it. Just more of the same~WW

GALACTUS

Marvel: *One-shot (The Origin) 1983, 6 issue miniseries (The Devourer) 1999-2000*

The Origin uses panels from old Stan Lee and Jack Kirby *Thor* issues, heavily edited with new bridging text by Mark Gruenwald. In *Galactus the Devourer*, Louise Simonson, John Buscema and Bill Sienkiewicz tackle the age-old problem of rejecting Galactus' unwelcome advances as he attempts to eat planet Earth. Again. The Silver Surfer, Fantastic Four, Avengers and all the usual cosmic, alien races chip in to this competent if uninspiring fare. The plot stretches too thinly over six issues although the finale is neat and unconventional.~APS

GALAXION

Helikon: *11 issues, 1 special 1997-1999, one-shot (Galaxion/Amy Unbounded Flip-book) 1999*

Impressive space-opera epic, with Manga overtones from Tara Jenkins Tallan. When the starship Galaxion tests its experimental hyperspace engines they return to real space orbiting a planet in what seems to be an alternate universe. When a contact team touches down they find the remains of the lost starship Hiawatha, missing for a decade, and commanded by the husband of the Galaxion's commander, Scavina. Mystery piles upon mystery as survivors are found and the natives of the planet try to embroil the crew in their war with mind controlling aliens. How can the crew hold themselves together and get themselves home? The special recounts an adventure of the contact team in their student days, and the flip-book co-stars Amy Unbounded, a sort of Pippi Longstocking, set in medieval Wales. Welcome fun, well handled.~WW

GALAXY EXPRESS 999

Viz: *5 volumes + 1998 to date*
